Hi Kerri-Ann,

Enclosed is a copy of the CPS contract. Info on EHRs-C is below.

Larry

EHRs-C (Electronic Health Care in Corrections) is a certified Electronic Health Record.

EHRs-C received ONC-ATCB certification and is compliant with all their rules and standards to suffice security, privacy and reliability mandated to be able to use the system with full confidence that the software has the necessary capabilities to meet Meaningful Use standards.

EHRs-C is successfully certified on Security and Privacy as follows:

170.302 (s) – Integrity

EHRs-C uses a secure Hash algorithm as a cryptographic hash function. Note: this is not a 3rd party tool, this is a tool designed and developed as part of the EHRs-C

170.302 (u) – General Encryption

It has its own module to encrypt and decrypt data.

Let me know if you need anything else on this.

**Subject:** Document Request

Good afternoon,

I'd like to request the contracts (if they it's more than one) for the Correctional Psychiatric Services, and to include all the facets in which services are provided. IE mental, dentistry, and healthcare.

Also, I'd like to learn more about the EHRs-C (Electronic Health Care in Corrections) system that has been running in the Bristol facilities. Is that a CPS or another 3<sup>rd</sup> party provider for that information system? I'd like to seek data security information on this database, to review reliability and security. If you could provide me with the system management designated to Bristol, that would be greatly appreciated.

I appreciate your continued support, and I look forward to viewing this material at your earliest convenience.

Thank you,

**KERRI-ANN M. HANLEY**
