[Intelligent Visitor Management for Healthcare Facilities](#)

Product

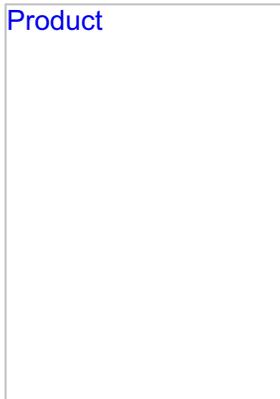

HID SAFE™ for Healthcare is a web-based, policy-driven solution that addresses the specific needs of hospitals in managing the entire physical access lifecycle of each visitor to deliver security in an open environment. The solution enables patients to register their approved and restricted visitors, screens the visitors against watch lists with proper background vetting, allows visitors to check-in based on the visitation policy of the patient and securely provisions identities into diverse Physical Access Control Systems (PACS).

[Start a free trial of Ally](#)

Product

Ally is a SaaS platform designed to effectively streamline security incident management and communications in one centralized database. Its web-based nature lets you capture, search, and report incident data from any mobile device with an internet connection. You can enhance decision-making through embedded analytics and reports for fast trend analysis. Ally's user-friendly design makes it easy to navigate, even with no software experience. You can also connect your team with reliable voice communication and information sharing across MOTOTRBO radios, smartphones, and workstations.

[How Fast Can Your School Lockdown?](#)

Locking down external doors quickly is essential in threatening situations and can be a serious challenge. Manual lockdown can take thirty minutes or more, but Detex's lockdown system makes it happen with the push of a button located in the administrative offices, saving critical minutes. Making sure that unauthorized people can't enter and allowing exit in an emergency are accomplished rapidly with central control.

Hi Danielle,

Every day you're entrusted with protecting students, and your first line of defense is the front office. Equip your personnel with state-of-the-art digital monitoring systems to screen and track visitors.

The Raptor Visitor Management system flags an average of **40 registered sex offenders every day** trying to gain access to our clients' schools. [Click here](#) to see how the Raptor Visitor Management system works to protect students and staff.

Is there a good time for us to speak next week about your district's visitor sign-in process and to discuss ways we at Raptor Technologies can help optimize it?

Thanks,

Jamie

Subject: Keeping your campus safe with Raptor

Hi Josh,

My name is Devin Compton and I am reaching out to introduce you to Raptor Technologies. The Raptor [Visitor Management System](#) is the core of an integrated set of front office security solutions designed to protect students, faculty, and staff.

Our technology will allow you to monitor all who enter the school, their purpose for visiting, and it will instantly let you know if that person should, or should not, be in your school.

Key Features:

- Instant Screening
- Accurate Records
- Efficient Reporting
- [Volunteer Management](#)
- [Emergency Management](#)

I would like to schedule a call in the next week or so to go over our system and show you how we can help create a safer environment for your students and faculty

Do you have 20 minutes next week?

Thanks,
Devin Compton

Hi Danielle,

With more than 750,000 registered sex offenders in the U.S., it is more important than ever to be able to monitor and track everyone who enters your campus.

The Raptor Visitor Management system flags an average of **40 registered sex offenders every day** trying to gain access to our clients' schools. [Click here](#) to see how the Raptor Visitor Management system works and learn why more than 22,000

schools across the nation trust Raptor Technologies to help protect their students and staff.

Thanks,

Jamie
