NEWS BRIEF

Congressional Security Questioned Following Attack

The security of members of Congress is drawing scrutiny after a shooting that wounded a top Republican lawmaker who had protection that isn't typically afforded to Capitol Hill's rank and file.

Capitol Police officers were at the congressional baseball practice in Alexandria, Va., as part of U.S. Rep. Steve Scalise's security detail when 66-year-old James Hodgkinson began to open fire into the diamond.

[Building in Security](#)

By Ralph C. Jensen

A family-oriented municipality with a thriving business environment, the city of Cypress is home to 48,000 residents in North Orange County, Calif. In partnership with the community, Cypress strives to sustain and enhance a safe, attractive and quality environment for people to live, work and play. Among the public facilities that help support these initiatives are the Cypress Senior Citizens Center and Community Center.

The Cypress Senior Citizens Center is housed in a 17,600 square foot structure that offers special interest clubs, enrichment classes, meals, transportation and advocacy programs, serving as a welcoming and supportive hub for elderly residents.

[Sponsored -- The 5 Benefits of Thermal](#)

Imaging Cameras

Thermal cameras let people see what their eyes can't: invisible heat radiation emitted by all objects regardless of lighting conditions. Some of the greatest benefits of thermal imaging come in the domain of security. Security cameras have become a staple of protection for many (if not all) major businesses across the country, and in such a landscape, the need to produce quality images is critical to provide constant protection against potential intruders.

Upcoming Webinar: The Lifecycle of an Active Shooter Incident

Emergency management, security and other professionals concerned with the evolving active shooter threat can best prepare their organizations by understanding the complete life-cycle of active shooter incidents and aligning critical risk indicators with the traditional phases of emergency management. There are important action steps in mitigation, preparedness, response and recovery that can help leaders and decision-makers anticipate the phase-specific challenges in detecting, deterring, responding to and recovering from shooting incidents and other forms of violence directed at their organizations and personnel. This one-hour webinar introduces the most current thinking in early threat recognition, workforce training and effective intervention before, during and after an active shooter incident. Join us for this free, one-hour Webinar on Thursday, June 22.

NEW PRODUCTS

Compact SSD Electronic Media Destroyer

Ideal for low volumes, the SEM Model 0205 SSD Destroyer is smaller than most paper shredders can destroy a variety of solid state media including SSD drives (with cases), mini tablets, cell phone/smart phones and more. LCD touchscreen controls provide ease of use and visual operator status. Unique auto sync dual voltage feature allows for use with 120v-240v / 50-60 Hz power. [Learn more.](#)

Galaxy Cloud Concierge

Subject: Summer reading ?
Date: Tuesday, June 20, 2017 at 11:53:35 AM Eastern Daylight Time
From: BURKE Thomas
To: mcosta@revere.mec.edu
Attachments: image001.png, education_network infrastructure configuration blueprint.pdf

Hi Matt - I hope you've been well.

I've recently joined Alcatel Lucent to be their local representative. We work with state blanket vendors to provide our data and voice products to many local school districts.

Attached is a fairly generic document outlining some network architectural best-practice ideas for the educational IT community. Some product info, but more technical in nature. I hope you find it useful and have an enjoyable and productive summer.

Best regards,
Tom

Subject: Summer reading ?

Hi Julie – I hope you've been well.

Attached is a fairly generic document outlining some network architectural ideas that the Alcatel Lucent engineering staff has put together for the educational community. There are some references to our products, but on the whole it's a useful tool without much marketing fluff. I hope you find it useful, and have an enjoyable and productive summer.

Best regards,
Tom

Subject: CEN event last week

Hi Julie,

Just a quick note to follow up on the CEN event last week.

I'm hoping that you might afford us 30-45 minutes one day in the coming weeks whereby we can simply share our voice/data/cloud portfolio. We've got the best story that no one has ever heard ! No sales pitch, just a quick overview so at least you'll have an idea as to who Alcatel Lucent Enterprise is and what we do well (and even not so well).

Thank you very much in advance,
Tom

Sielox CLASS™ Emergency Response System Takes New Jersey School Security to the Next Level

Quality education is a primary consideration for parents, students, faculty and governing boards of **Sterling High School in Somerdale, New Jersey**. Also primary to these stakeholders is a safe and secure environment that is ensured with both technical and procedural measures, including video surveillance, badging and visitor management.

When Sterling High School decided to advance their security to the next level, they implemented **Sielox CLASS (Crisis Lockdown Alert Status System)**. **Read More Here** about how Sielox CLASS has enabled Sterling High School to have real-time classroom status, updates and notifications to administrators and first responders using graphical maps, email and text messaging to assist in making split-second decisions in the event of an incident or developing situation.

Integrating Visitor Management into HealthCare Security and Safety

How will HealthCare facilities mitigate concerns that open campuses introduce to staff, patients, information, and assets with regard to unmanaged movement of visitors and the risks that unencumbered movement presents?

Sponsored by:

Moderated by:

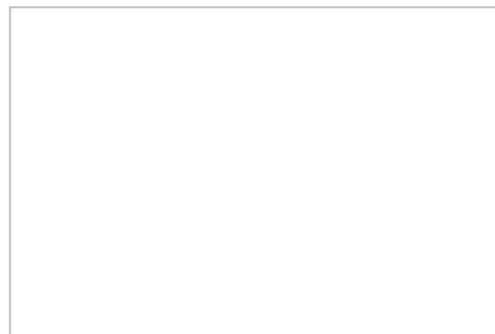

Robin Hattersley,
Executive Editor,
Campus Safety
Magazine

Thursday, June 15, 2017 at 2:00pm EST

Live Online Event

Sitting in a safety discussion with the nursing staff of a hospital facility without a robust visitor management program is like walking into a bull ring carrying a red cape. With Work Place Violence (WPV) assaults in Health Care accounting for two times more reported incidents than all other industry combined, nurses are looking for solutions to incidents that can be mitigated.

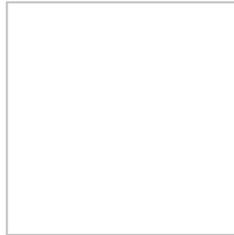

With regulatory agencies and legislation stepping in to address hospital security of patient information, provision of a “Safe Culture”, and accountability for the patient and family experience, management of visitor movement in health care facilities is front and center.

Join the [FREE one hour webinar](#) with HealthCare Physical Security Director Don Wright to look at Visitor Management in health care:

- Identify common primary and secondary hazards related to active killer events
- Integrate active killer incidents to an All-Hazards plan
- Prepare staff to respond to active killer incidents
- Put into place an exercise and evaluation system to test and improve the plan

Dear Carl,

Here at School Planning & Management magazine, we understand that your time is valuable so we decided to take this opportunity to highlight some of the top stories from the most recent issue which you have yet to view.

To view, please click on the link below the issue date:

===== May 2017 =====

<http://1105insight.com/portal/wts/ucmcmQec2SaqkbDc3r-g0so-e>

* Designing for Immersive Learning Environments

* Restrooms, Locker Rooms
Changing With the Times

* Making School New Again
Technology Reinventing Teaching, Learning

* Should I or Shouldn't I
Facing the Outsourcing Decision

===== April 2017 =====

<http://1105insight.com/portal/wts/ucmcmQec2SaqkbDc3rDg0so-e>

* 5 Building Blocks
Early Childhood Design

* Specifying Building Materials
Making the Right Choices

* Visitor Management
Keeping 'Them' Out

* Special Section
Healthy Facilities

Click on the link and read a story now, or download the issue to read later at your convenience. Either way, we hope you will find the time to peruse these headlines and take advantage of your digital subscription status.

Thank you,

School Safety & Operations News

10th Largest School Division In US Installs ScholarChip's Visitor Management System

Fairfax County Public Schools, one of the largest districts in the country, has installed 125 ScholarChip's Visitor Management systems in its elementary, middle and high schools. Installation of 200+ buildings will be completed by June, 2018.

With a population of more than 186,000 students in pre-K through grade 12, the district tracks thousands of visitors a day. With the ScholarChip Visitor Management program, when a visitor, vendor, or volunteer comes to a school, their drivers' license is scanned, an integrated national database for sex offenders is searched, and if the person is approved, they are issued a name tag for entry to the school.

The ScholarChip system efficiently collects and catalogs information electronically on visitors who want access to Fairfax County Public Schools; administrators are able to use real-time reports for auditing purposes and in evidence-based decision making.

Creating a safe environment for learning is paramount for any school district, and one of the most vital aspects of safety is knowing who is in a school at any given time. By implementing this program, Fairfax County Public Schools verify identity and gather information on its daily visitors: vendors, volunteers, and those who are picking students up, which keeps its students safer and its schools more secure.

School Safety & Operations News

10th Largest School Division In US Installs ScholarChip's Visitor Management System

Fairfax County Public Schools, one of the largest districts in the country, has installed 125 ScholarChip's Visitor Management systems in its elementary, middle and high schools. Installation of 200+ buildings will be completed by June, 2018.

With a population of more than 186,000 students in pre-K through grade 12, the district tracks thousands of visitors a day. With the ScholarChip Visitor Management program, when a visitor, vendor, or volunteer comes to a school, their drivers' license is scanned, an integrated national database for sex offenders is searched, and if the person is approved, they are issued a name tag for entry to the school.

The ScholarChip system efficiently collects and catalogs information electronically on visitors who want access to Fairfax County Public Schools; administrators are able to use real-time reports for auditing purposes and in evidence-based decision making.

Creating a safe environment for learning is paramount for any school district, and one of the most vital aspects of safety is knowing who is in a school at any given time. By implementing this program, Fairfax County Public Schools verify identity and gather information on its daily visitors: vendors, volunteers, and those who are picking students up, which keeps its students safer and its schools more secure.

Subject: [SUSPECTED SPAM] [MKTG] Smart Visitor Management™ - Limited Time Introductory Offer

Date: Tuesday, May 23, 2017 at 10:38:50 AM Eastern Daylight Time

From: Countability

To: Dianne

Countability®, the first Incident Command System for Schools, introduces **Smart Visitor Management™**, the only system that seamlessly connects teachers to the security at the front door.

Smart Visitor Management™ notifies teachers of potential visitors and allows teachers to accept or deny access to visitors; thereby preventing emergency situations. Integrated communication lets teachers confirm when a visitor has arrived at the classroom.

In addition to providing the standard visitor management functions, **Smart Visitor Management™** utilizes Artificial Intelligence (AI) to recognize changes in visiting patterns.

In celebration of our roll out of this new application, **Countability®** is offering its new **Smart Visitor Management™** as a free add-on when you sign up for the **Countability®** Emergency Management system by July 31, 2017.

Artificial Intelligence (AI) is not new to the field of education. Since the 1980's, AI has been used to generate "Smart Content" in the form of digitized guides to textbooks, and to create "Intelligent Tutoring Systems," for example.

Now Countability is using AI technology in its ***Smart Visitor Management™*** and ***At Risk Identifier™*** Systems to assess information and provide to administrators and teachers early warning of potential threats and at risk behavior patterns.

NEWS BRIEF

Campus Security Coalition Launches Grant Program

The newly formed Campus Security Coalition, a networking group focused on sharing ideas and spearheading discussion about security and safety at schools nationwide, today unveiled its 2017 School Security Grant Program. The initiative is designed to help schools better address threats, further strengthen security efforts and realize more proactive intelligence efforts.

[Assessing the Tone of the Situation](#)

By Cameron Javdani

Over the last several years, there has been a noticeable increase in

school violence, burglaries, vandalism and other threats that have moved school officials across the country to rethink their existing security systems and procedures. As such, educating security directors on the importance of deploying a complete security solution that maximizes situational awareness, improves visitor management and shortens response time is becoming more important than ever. One simple, yet effective campus security option that is commonly overlooked is the dynamic combination of audio and video monitoring for additional verification.

[Fire and Security Technicians Battle Fire at Elementary School Until Firefighters Arrive](#)

Red Hawk Fire & Security was recognized for the courageous actions of its technicians who prevented a potentially catastrophic fire by quickly extinguishing a blaze at a Tacoma, WA elementary school until firefighters could arrive on scene.

[Campus Gun Laws Create Need for More Security Measures](#)

For Kansas, a new gun law will allow for concealed carry almost anywhere in the state besides hospitals and college campuses when they go into effect. However, this law differs from others states' as they require the sanctuary areas to increase security to prohibit firearms.

[Upcoming Webinar: How to Reduce Security Incidents on Your Campus](#)

There are over 130,000 K-12 schools and over 4000 Colleges/Universities in the United States. Administrators and Campus officials must continue to provide a safe and secure campus for their 70 million students.

Recent incidents on campuses emphasize the need for adopting, implementing and practicing emergency preparedness and violence prevention plans. While it is impossible to eliminate all the risks, this presentation will help identify measures that can be put in place to help minimize tragic situations from occurring and deal with the emergencies when they do.

Please join us for this one-hour presentation that can help you identify risks, prioritize short and long-term needs, work within your budget,

and implement a security plan.

Join us for this free, one-hour Webinar on Wednesday, May 17.

NEWS BRIEF

Campus Security Coalition Launches Grant Program

The newly formed Campus Security Coalition, a networking group focused on sharing ideas and spearheading discussion about security and safety at schools nationwide, today unveiled its 2017 School Security Grant Program. The initiative is designed to help schools better address threats, further strengthen security efforts and realize more proactive intelligence efforts.

[Assessing the Tone of the Situation](#)

By Cameron Javdani

Over the last several years, there has been a noticeable increase in

school violence, burglaries, vandalism and other threats that have moved school officials across the country to rethink their existing security systems and procedures. As such, educating security directors on the importance of deploying a complete security solution that maximizes situational awareness, improves visitor management and shortens response time is becoming more important than ever. One simple, yet effective campus security option that is commonly overlooked is the dynamic combination of audio and video monitoring for additional verification.

[Fire and Security Technicians Battle Fire at Elementary School Until Firefighters Arrive](#)

Red Hawk Fire & Security was recognized for the courageous actions of its technicians who prevented a potentially catastrophic fire by quickly extinguishing a blaze at a Tacoma, WA elementary school until firefighters could arrive on scene.

[Campus Gun Laws Create Need for More Security Measures](#)

For Kansas, a new gun law will allow for concealed carry almost anywhere in the state besides hospitals and college campuses when they go into effect. However, this law differs from others states' as they require the sanctuary areas to increase security to prohibit firearms.

[Upcoming Webinar: How to Reduce Security Incidents on Your Campus](#)

There are over 130,000 K-12 schools and over 4000 Colleges/Universities in the United States. Administrators and Campus officials must continue to provide a safe and secure campus for their 70 million students.

Recent incidents on campuses emphasize the need for adopting, implementing and practicing emergency preparedness and violence prevention plans. While it is impossible to eliminate all the risks, this presentation will help identify measures that can be put in place to help minimize tragic situations from occurring and deal with the emergencies when they do.

Please join us for this one-hour presentation that can help you identify risks, prioritize short and long-term needs, work within your budget,

and implement a security plan.

Join us for this free, one-hour Webinar on Wednesday, May 17.

I would recommend looking into a visitor management system like Hall Pass. It allows you to screen all people that enter the building, including parents, vendors, volunteers, etc. The software is web-based so it monitors visitors in real time. Also check with your local police department, because they may be able to recommend a vendor they already utilize.

Original Message:

Sent: 04-20-2017 01:20
From: Michael Johnston
Subject: Volunteer Software Management System

We are looking for a system to help us manage and screen our volunteers in the district. It would be nice to have the system be able to allow the parents to complete information online to sign up to be a volunteer and to help manage the screening and background checks needed. Does anyone have a system that has been designed for schools that they are happy with? If so can you provide the name of the system so we can look into it.

Thanks!

From: John Musso

Subject: ASBO International meets with President Trump's Education Team

Last month, I had an opportunity to sit down with representatives of President Trump's education team to discuss the administration's position on several education policies and how the Department of Education and ASBO International can work together moving forward.

Jason Botel, senior education adviser to the White House, who heads this team has worked in education reform for decades, most recently in Baltimore, Maryland, where he taught middle school and then launched the KIPP Baltimore charter schools. He was joined by Ebony Lee, former senior program officer at the Bill & Melinda Gates Foundation and former chief of staff of the Department of Education's Office of Innovation and Improvement under George W. Bush, and Karen Stratman, the Department of Education's director of external engagement.

During the meeting we discussed a number of things. Thanks to many of you, I was able to carry some of your questions and comments to the White House team.

I would encourage all of you to read my column in the upcoming May School Business Affairs for a more in depth look of the discussion at this encouraging meeting.

John D. Musso, CAE
Executive Director

School Safety & Operations News

10th Largest School Division In US Installs ScholarChip's Visitor Management System

Fairfax County Public Schools, one of the largest districts in the country, has installed 125 ScholarChip's Visitor Management systems in its elementary, middle and high schools. Installation of 200+ buildings will be completed by June, 2018.

With a population of more than 186,000 students in pre-K through grade 12, the district tracks thousands of visitors a day. With the ScholarChip Visitor Management program, when a visitor, vendor, or volunteer comes to a school, their drivers' license is scanned, an integrated national database for sex offenders is searched, and if the person is approved, they are issued a name tag for entry to the school.

The ScholarChip system efficiently collects and catalogs information electronically on visitors who want access to Fairfax County Public Schools; administrators are able to use real-time reports for auditing purposes and in evidence-based decision making.

Creating a safe environment for learning is paramount for any school district, and one of the most vital aspects of safety is knowing who is in a school at any given time. By implementing this program, Fairfax County Public Schools verify identity and gather information on its daily visitors: vendors, volunteers, and those who are picking students up, which keeps its students safer and its schools more secure.

School Safety & Operations News

10th Largest School Division In US Installs ScholarChip's Visitor Management System

Fairfax County Public Schools, one of the largest districts in the country, has installed 125 ScholarChip's Visitor Management systems in its elementary, middle and high schools. Installation of 200+ buildings will be completed by June, 2018.

With a population of more than 186,000 students in pre-K through grade 12, the district tracks thousands of visitors a day. With the ScholarChip Visitor Management program, when a visitor, vendor, or volunteer comes to a school, their drivers' license is scanned, an integrated national database for sex offenders is searched, and if the person is approved, they are issued a name tag for entry to the school.

The ScholarChip system efficiently collects and catalogs information electronically on visitors who want access to Fairfax County Public Schools; administrators are able to use real-time reports for auditing purposes and in evidence-based decision making.

Creating a safe environment for learning is paramount for any school district, and one of the most vital aspects of safety is knowing who is in a school at any given time. By implementing this program, Fairfax County Public Schools verify identity and gather information on its daily visitors: vendors, volunteers, and those who are picking students up, which keeps its students safer and its schools more secure.

The ScholarChip system efficiently collects and catalogs information electronically on visitors who want access to Fairfax County Public Schools; administrators are able to use real-time reports for auditing purposes and in evidence-based decision making.

Creating a safe environment for learning is paramount for any school district, and one of the most vital aspects of safety is knowing who is in a school at any given time. By implementing this program, Fairfax County Public Schools verify identity and gather information on its daily visitors: vendors, volunteers, and those who are picking students up, which keeps its students safer and its schools more secure.

School Safety & Operations News

10th Largest School Division In US Installs ScholarChip's Visitor Management System

Fairfax County Public Schools, one of the largest districts in the country, has installed 125 ScholarChip's Visitor Management systems in its elementary, middle and high schools. Installation of 200+ buildings will be completed by June, 2018.

With a population of more than 186,000 students in pre-K through grade 12, the district tracks thousands of visitors a day. With the ScholarChip Visitor Management program, when a visitor, vendor, or volunteer comes to a school, their drivers' license is scanned, an integrated national database for sex offenders is searched, and if the person is approved, they are issued a name tag for entry to the school.

Visitor Management, it's more important than ever.

Before you purchase a K12 Visitor Management system, there are many features to consider.

Visitor Identity: It's up to you to know who these people are, if they should be in your school, and if they should be picking up a particular student. Your Visitor Management system must have accurate information and work, every day, every time.

School Safety: One of the most vital aspects of safety is knowing who wants access to your school. Schools can have hundreds of visitors every day: vendors, volunteers, and those who are picking students up. Visitor Management is an incredibly important part of school safety and not something that should be left to chance.

Visitor Management, it's more important than ever.

Before you purchase a K12 Visitor Management system, there are many features to consider.

Visitor Identity: It's up to you to know who these people are, if they should be in your school, and if they should be picking up a particular student. Your Visitor Management system must have accurate information and work, every day, every time.

School Safety: One of the most vital aspects of safety is knowing who wants access to your school. Schools can have hundreds of visitors every day: vendors, volunteers, and those who are picking students up. Visitor Management is an incredibly important part of school safety and not something that should be left to chance.

Vanderbilt Security Management System (SMS)

Delivering a powerful, single-source solution for integrating a facility's access control technologies, digital video and alarm monitoring systems, the Vanderbilt Security Management System (SMS) is scalable so that security teams can meet their security requirements today, and expand to meet growing business needs tomorrow. SMS supports an unlimited number of devices and cardholders, making it perfect for large, multi-site or global organizations. It also allows users to manage alarms, photo ID badging, visitor management, elevator control, online and offline locks, and advanced reporting from a single software platform.

LocDown™ from Marks USA Allows Teachers to Safely Secure the Classroom from the Inside

LocDown™ from Marks USA Allows Teachers to Safely Secure the Classroom from the Inside

LocDown™ from Marks USA Allows Teachers to Safely Secure the Classroom from the Inside

Marks USA, a trusted source in some of the largest school districts across the country, including Los Angeles Unified, created LocDown™ security mechanical locking solutions for every educational building, door, application and budget. LocDown™ Classroom Intruder Locksets easily and economically retrofit any standard lock, but in an emergency, allow the teacher to lock it down with a simple key, safely from inside the classroom. Available in cylindrical or mortise with exclusive Marks Lifetime Mechanical Warranty.

For more, visit www.marksusa.com or **ISC West booth 12043**.

VoIP Station Kit (TKIE-2) **VoIP Station Kit (TKIE-2)**

VoIP Station Kit (TKIE-2) Extend the possibilities of deploying intelligible audio by building Zenitel inside your design, form and/or function with our next generation VoIP Station Kit. Customers have done this for elevators, parking barriers and other custom communication applications.

Visit us at ISC West booth 12121

Improving School Safety With School Data

Collect school data using a smart ID card and start improving safety

Schools are perhaps the most data driven sector in the U.S.

Safety begins with smart ID cards that automate attendance at the building, classroom and bus. Identify and record who wants school access with visitor management. Authorized staff simply tap their ID cards to gain access to secure doors.

(System integrates, pushes and pulls data from your SIS)

It all starts with a smart ID card - the ScholarChip One Card.

Improving School Safety With School Data

Collect school data using a smart ID card and start improving safety

Schools are perhaps the most data driven sector in the U.S.

Safety begins with smart ID cards that automate attendance at the building, classroom and bus. Identify and record who wants school access with visitor management. Authorized staff simply tap their ID cards to gain access to secure doors.

(System integrates, pushes and pulls data from your SIS)

It all starts with a smart ID card - the ScholarChip One Card.

Subject: [SUSPECTED SPAM] [MKTG] Check out this week's cutting edge facility management solutions

Date: Wednesday, March 15, 2017 at 1:02:46 PM Eastern Daylight Time

From: Facility Executive

To: csvendsen@revere.mec.edu

Take a look at the most cutting-edge facility management solutions that will help you run your facility more efficiently and effectively.

BUILDING ENVELOPE/ROOFING

KEE-Stone® membrane leads industry in UV and aging performance

Garland's KEE-Stone FB 60 thermoplastic membrane is formulated using the highest grade DuPont™ Elvaloy® HP Ketone Ethylene Ester (KEE), standing up against the harshest weather and UV radiation. KEE-Stone is designed for use as part of a two-ply hybrid roof system. For more information, visit www.garlandco.com or call 800-321-9336.

IMETCO's Roof Deck Systems Offer Outstanding Structural Strength

IMETCO's Perform-A-Deck roof deck systems provide outstanding structural strength, maximum energy efficiency, optimal acoustical value, excellent moisture protection and UL fire rated designs. When integrated with IMETCO's structural roof panel, the system is engineered and tested to resist extreme wind and debris impact. [Click here for more information.](#)

Every Roof Is Our Reputation

With high-performance commercial roofing systems, building insulation and mechanical insulation, Johns Manville's line of commercial and residential products help you build sustainable structures. [Learn more at jm.com/roofing.](http://jm.com/roofing)

COMMUNICATIONS

Are You Keeping Your Tenants Safe?

Kenwood NX-5000 digital radios don't rely on the public network, so they will work in the most demanding, continuous use conditions. With text messaging and other advanced features, these devices can tie into your existing telecomm or IP network. [Click here for more information.](#)

EDUCATION/TRAINING

Save The Date. Facility Executive Live! Is Coming To Chicago

The pages of Facility Executive magazine come to life when the inaugural Facility Executive Live! comes to Chicago on October 3, 2017. This one-day regional conference, taking place at the Summit Executive Centre in downtown Chicago, will provide a package of education and networking opportunities, designed to maximize your time while keeping you informed of the latest trends in the facility management industry. [Click here for more information.](#)

HVAC/IAQ

Fujitsu's Single Phase J-II Series VRF System

Fujitsu's J-II single-phase VRF is a heat-pump, serving ambient heating and cooling applications in a 3- to 5-ton size range, making it ideal for large residential and small commercial installations. The J-II offers up to 19.8 SEER and 11.4 HSPF, significantly exceeding other equivalent VRF products and rooftop units of comparable size. [Click here for more information.](#)

PEST/BIRD CONTROL

Pest Control for Today's Environment

Bird-X is the leading brand of humane pest and bird control solutions worldwide, dedicated to protecting human health, wildlife, and the environment. Established in 1964, Bird-X boasts a complete line of pest control products with unmatched quality and efficacy. [Click here for more information.](#)

RECYCLING/WASTE MANAGEMENT

Configure™: A Recycling System Tailored to You

The Configure™ trash receptacles provide a customizable recycling solution with sleek, smooth surfaces and contoured edges. This recycling system has a modern appearance that will fit seamlessly into any indoor or outdoor commercial environment. [Click here for more information.](#)

SECURITY/ACCESS CONTROL

EasyLobby Secure Visitor Management

EasyLobby, an HID Global business, automates the entire process of registering a visitor and printing professional badges. Know who's in your buildings and why. Capture detailed visitor information in seconds without typing, create watch lists, allow employees to pre-register guests, and integrate with your access control system. Free online demo. [Click here for more information.](#)

WORKPLACE DESIGN

Tired of Sitting at Work All Day?

FlexiSpot Desktop Risers and Monitor Mounts provide back pain relief and allow movement throughout the day which enhances productivity and maximizes work space. Whether sitting or standing, receive the healthiest and optimal viewing positions! [Click here for more information.](#)

Subject: Top Five Missing Elements to Campus Safety

Date: Wednesday, March 8, 2017 at 1:47:46 PM Eastern Standard Time

From: Jose Pineda

To: mcoyle@revere.mec.edu

Maurice,

Nationwide, schools face security challenges every single day. In one solution, Raptor Technologies can fix safety issues related to:

- No screening of visitors against the national sex offender database
- No non-custodial parent alerts
- No central database to manage visitors
- No dedicated emergency alert button that will text, call and email administrators
- No management of visitor and volunteer hours on campus

Raptor is a web based system that provides K12 visitor management to over 17,000 schools nationwide. Let me know if you are interested in setting up a five minute phone call to discuss security suggestions for your school.

Jose Pineda

Sales Engineer

Raptor Technologies, LLC

631 W. 22nd St.

Features and Benefits

Benefits Of a Mobile Device

- Ability to modify your current solution to RFID or barcoding
- Integration to solutions that don't normally support devices
- Check in / Check out for 1:1 Initiative
- Ability to accomplish inventory management tasks as the staff can access and update the data from anywhere.
- Empowers the user with real-time access as well as it allows a precise view of inventory status on a move.
- Incorporates inventory management with any existing warehouse or asset back-end.
- Ensures better control over remote and mobile asset data.
- Ensures accurate physical cycle counts.
- Efficient receiving processes such as receipt inspections and asset verification.
- Better mobile inventory tracking and management by employing bar code and RFID.
- Manage and maintain inventory with cycle counting. Check, and confirm, and update inventory status.
- Easy to scan the inventory at remote locations and warehouses.
- Cut short the data entry errors with barcode scanning.
- Enhances transaction accuracy with real-time data validation.
- Reduces inactivity due to the utility of mobile devices.

Subject: Please Tell Campus Safety About Your Access Control Challenges
Date: Wednesday, January 25, 2017 at 1:04:45 PM Eastern Standard Time
From: Campus Safety
To: MCOGLIANDRO@REVERE.MEC.EDU

Dear Campus Safety Professional,

As a valued reader of *Campus Safety* magazine, we are requesting your participation in a survey on campus access control, locks, door hardware and visitor management. We conduct this study every three years so we can help hospitals, schools, and universities better understand and address the challenges and benefits associated with these technologies.

If you've already had the chance to complete the questionnaire that we first brought to your attention about a week ago -- **Thank You** very much! But, if not, there's still time -- and we'd still very much welcome your input. The survey will take about five minutes to complete. As a token of appreciation for your participation, you will be entered in a drawing for the chance to win one of the four \$25 gift cards that we'll be awarding at the conclusion of the survey.

Please note that your specific responses, E-mail address and identity, as well as that of your campus, will remain confidential and will only be used in tabulation with answers from other respondents. The results of this survey will appear in an upcoming issue of *Campus Safety* magazine as well as online at CampusSafetyMagazine.com.

[Simply click here to be brought directly to the survey questionnaire.](#)

Thank you for helping *Campus Safety* -- and good luck in our prize drawing!

Robin Hattersley Gray
Executive Editor
Campus Safety Magazine

[Our One Card Story](#)

[View this email in your browser](#)

Improve School Safety in 3 steps.

Students tap their card for attendance on the bus, at the school door and in the classroom.

Safety begins with smart ID cards that automate attendance at the building, classroom and bus! Identify and record who wants school access with visitor management. Authorized staff simply tap their card to gain access to secure doors.

It all starts with a smart ID card - the ScholarChip One Card.

Improve School Safety in 3 steps.

Students tap their card for attendance on the bus, at the school door and in the classroom.

Safety begins with smart ID cards that automate attendance at the building, classroom and bus! Identify and record who wants school access with visitor management. Authorized staff simply tap their card to gain access to secure doors.

It all starts with a smart ID card - the ScholarChip One Card.

Subject: Check out this week's cutting edge facility management solutions
Date: Wednesday, January 11, 2017 at 3:00:00 PM Eastern Standard Time
From: Facility Executive
To: CARL SVENDSEN

[View as a Web page](#)

Take a look at the most cutting-edge facility management solutions that will help you run your facility more efficiently and effectively.

ACCESS CONTROL

EasyLobby Secure Visitor Management

EasyLobby, an HID Global business, automates the entire process of registering a visitor and printing professional badges. Know who's in your buildings and why. Capture detailed visitor information in seconds without typing, create watch lists, allow employees to pre-register guests, and integrate with your access control system. Free online demo. [Click here for more information.](#)

BUILDING MATERIALS

IMETCO's Roof Deck Systems Offer Outstanding Structural Strength

IMETCO's Perform-A-Deck roof deck systems provide outstanding structural strength, maximum energy efficiency, optimal acoustical value, excellent moisture protection and UL fire rated designs. When integrated with IMETCO's structural roof panel, the system is engineered and tested to resist extreme wind and debris impact. [Click here for more information.](#)

COMMUNICATION

Are You Keeping Your Tenants Safe?

Kenwood NX-5000 digital radios don't rely on the public network, so they will work in the most demanding, continuous use conditions. With text messaging and other advanced features, these devices can tie into your existing telecomm or IP network. [Click here for more information.](#)

HVAC

Fujitsu's Single Phase J-II Series VRF System

Fujitsu's J-II single-phase VRF is a heat-pump, serving ambient heating and cooling applications in a 3- to 5-ton size range, making it ideal for large residential and small commercial installations. The J-II offers up to 19.8 SEER and 11.4 HSPF, significantly exceeding other equivalent VRF products and rooftop units of comparable size. [Click here for more information.](#)

LIGHTING

SubstiTUBE® IPS T8 LED Lamps

SYLVANIA SubstiTUBE IPS LED T8 lamps directly replace fluorescent T8 lamps on instant-start electronic T8 ballasts with a 5-year product warranty (24/7 operation). These shatter resistant lamps contain no mercury, provide instant light and a uniform light distribution. SubstiTUBE IPS lamps minimize labor and recycling costs while offering significant energy savings, making this lamp the right choice for all your lighting needs. [Click here for more information.](#)

LG Introduces Sensor Connect Light

New LG Sensor Connect fixtures feature daylight and occupancy sensing via an embedded sensor in the fixture lens. Sensor Connect uses the LG LED Lighting commissioning app for Android, allowing the facility manager to customize light levels, set daylight harvest levels and program occupancy settings. [Click here for more information.](#)

POWER SUPPLY

Outdoor Charging Stations | Permanent Outdoor Power

Introducing Outdoor Mobile Charging Stations from Legrand®. Elegantly designed pedestals combine standard power outlets and USB charging outlets with LED illumination. Choose from 3 standards finishes – bronze, silver, or black. Or, choose a custom color to match your facility. It's the first in a series of UL-Rated designs that bring power, lighting, data, and A/V to outdoor spaces, rain or shine. Visit www.legrand.us/outdoor to learn more.

ROOFING

Garland Introduces New Innovative Modified Membrane

Garland's OptiMax™ thermoset polyurethane-modified membrane combines two highly effective waterproofing materials – polyurethane and asphalt – in an "active modification" process involving chemically reacting the polyurethane modifier to specific molecules within the asphalt, providing enhanced long-term performance characteristics and weatherability. [For more information, visit www.garlandco.com.](http://www.garlandco.com)

Every Roof Is Our Reputation

With high-performance commercial roofing systems, building insulation and mechanical insulation, Johns Manville's line of commercial and residential products help you build sustainable structures. [Learn more at jm.com/roofing.](http://jm.com/roofing)
