# Campus Security and Life Safety Newsletter

## TOP STORY

### How Safe is Your Campus?

**By Minu Youngkin**

Effective campus security consists of more than just a budget line-item and the proverbial "knocking on wood" in today's day and age.

Today, administrators are inundated with marketing that touts the latest and greatest security products whether it be: cameras, wireless devices, alarm systems, etc. These all might boast advanced technological characteristics and outstanding performance, but to what end?

Failure to consider things such as engineering specifications, efficiencies, and maintenance issues can result in buyer's remorse. Prudent choices follow careful planning, and careful planning begins with a focus on the protection of people first.

[More...](#)

## NEWS

### [Extraordinary Protection](#)

**By Alan Morris**

Following several high-profile incidents alleging abuse special needs students (including some non-communicative students), and the activism of a number of parent groups in the State of Texas, Governor Greg Abbott signed Texas Senate Bill 507, requiring districts to install audio and video surveillance equipment into select

special education classrooms when requested.

The new law, which followed a similar, failed attempt at similar mandates in 2013, requires the installation of cameras and recorders in classrooms meeting certain criteria, if and when a parent, school board member, or school staff requests them from the 2016-2017 school year forward. Surveillance must cover all areas in a classroom, with bathrooms and changing areas excepted, and recorded footage must be retained for a minimum of six months.

**Subject:** Security Layers are the smart way to protect your school assets

**Date:** Wednesday, December 28, 2016 at 10:01:06 AM Eastern Standard Time

**From:** Sielox

**To:** MCOGLIANDRO@REVERE.MEC.EDU

## [Security Layers are the smart way to protect your school assets](#)

With many security and safety choices to select from, K-12 school administrators can be overwhelmed with which technology or solution to deploy first. Adding to the dilemma is the major consideration of initial purchase price, operating cost and system management.

Most experts agree that a layered security approach works best when schools are faced with budget constraints. Communication, perimeter management and access control are the key elements to the layers. Preparing for an emergency or even daily incident requires a communication solution to immediately share what is happening internally and with first responders. Private communication solutions significantly improve the safety and security of locked-down building occupants and the ability for first responders to maintain order, even as they attend to the most critical situations first.

Securing the perimeter of the school and even interior doors is important to ensure that no unwanted visitors enter the building. Lockdown of all perimeter doors is a powerful feature that saves lives. With electronic wireless locks, schools can now afford to control all of their interior doors also. Access control provides critical information on who has entered your school and when, and clearly identifies both staff and visitors. The access control system can be integrated with a visitor management solution that checks the background of each potential visitor.

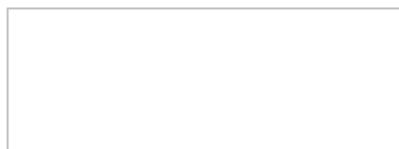

Sielox Class - Crisis Lockdown Alert Status System - is a cost effective, easily deployed, daily incident and

crisis management communication solution using existing devices and networks. Class reduces notification time to responders using chat and email alerts, and provides instant visibility using dynamic floor plans for All Hazards. Sielox Class provides critical instant communications and notification for daily incidents and crisis events. Alert levels are pushed to teachers and staff who select condition color status for their location. Both internal and external responders view a dynamic floorplan with color conditions, chat with and monitor events.

Sielox LLC and Technology Partner HID Global Security have long been recognized as leaders in the physical security industry. Sielox Pinnacle advanced access control software and 1700 intelligent controllers integrate with HID readers and credentials, Easy Lobby visitor management and Fargo credential printers to provide multiple layers of security for your students, teachers, staff and assets. Choosing proven and reliable Sielox and HID Global solutions ensure that your limited security dollars are well spent and garner a strong return on investment.

The unfortunate reality is that school safety and security concerns are only going to increase and it is incumbent upon schools to make sure their students and staff are well-prepared for an emergency situation. By layering proven solutions every school can afford to deploy important safeguards to communicate, control access, and secure all doors instantly.

Sielox LLC and HID Global are two industry leaders you can trust to get your layers on.

## TOP STORY

### Going for the Gold

By Raleigh Gerber

When the Olympic Games come to town, the welfare of people and property are of paramount importance in both the planning process and during the event. The 2016 Summer Olympics in Rio de Janeiro drew 500,000 foreign visitors and sold \$7.5 million tickets to people who watched 10,500 athletes compete. There were 85,000 security staff on hand, and the overall budget for security totaled \$895 million.

### [Holiday Security Fears](#)

The older I get the more I realize one thing: holidays are stressful. If it isn't making sure you've got a gift for everyone in your extended family making you crazy, then it is scheduling Christmas with in-laws and avoiding your crazy uncle.

There are also the fears that keep you up late at night, what if a burglar visits your home while you are out? What if you get stuck in line at the airport's security check point and miss your flight? What if half your presents from Amazon have been mysteriously disappearing from your porch?

### A Glimpse Into The Future Of IP Video

By Fredrik Nilsson

This year marks the 20th anniversary of the world's first IP network camera, a technology that eventually revolutionized the video surveillance landscape. When IP video was still an emerging technology skeptics wondered whether it would gain any traction, let alone take over the whole video surveillance market. A decade ago video analytics was discussed as the biggest promise for the industry, with estimates that it would become a billion dollar market on its own within a few years. Cloud services were rarely talked about in the context of physical security. IT security and physical security were mentioned in the context of "convergence," but no one really considered the cyber threat that IP video equipment on a corporate network could potentially present to a large organization.

## Innovations, Solutions and a Renewed Sense of Pride

**By Sharad Shekhar**

It's an exciting time to be in the security industry, as evidenced by the successful year we have seen in regards to technology innovations, mergers and acquisitions, and a renewed sense of pride in the industry. As we look toward the future, several trends are emerging that will have a significant impact on how products go to market, serve specific market segments and provide end users with overarching value.

Today, there is a renewed focus on the quality being delivered to end users through technology innovations. Those companies that spend significant time developing products will be the most successful. In the past, we've seen companies market products using strategies that were only considered "shell" strategies, which include various marketing and product development plans presented on a surface level. Now, however, we see a shift in focus to the development of core strategies, implementing significant changes to the innermost workings of the company.

### TOP STORY

#### Terrorism Suspected in Ohio State Attack

By Sydney Shepard

It's been more than since 18-year-old Abdul Razak Ali Artan rammed his car into a group of people on Ohio State's campus before exited his car wielding a butcher knife injuring 11 people, within a minute he was shot dead.

Police have searched through surveillance footage, talked to witnesses and have obtained a search warrant to view the Artan's residence, but they are still looking for any clues that might provide them with information about the motive behind this violent incident.

### [Class In Session](#)

**By Jumbi Edulbehram**

Video analytics enable schools to proactively recognize behaviors to create an efficient and safe environment with minimal disruption. The ability to capture behavior patterns and track a scene, both retroactively and in real time, make it easier than ever before to recognize trends and patterns. This analysis can be critical in the case of a security investigation, but it can also be used to improve operations. For example, densely populated areas of a school can present a challenge for administrators in the event of a serious emergency. Video analytics help pinpoint potential issues proactively and allow administrators to make these areas safer for students.

### [Free Webinar Today: Bullying Hinders School Security](#)

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

=====

Speaker:

Pam Hayes has been a long-standing advocate for children. In 2011 she founded the Student Services program which ensures that children have a voice in preventing bullying and violence in our communities through the means of technology and education. She worked diligently to see this grow into the Student Safety Alliance. Pam was key in growing the Stand4Kind initiative through which school assemblies are performed to empower students to stop bullying with kindness.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Pam works with leaders in technology and corporations to promote kindness and help students.

### [5 Best Practices for Video Surveillance in Municipalities](#)

**By Todd Dodrill**

There is perhaps no other vertical market as fraught with as many challenges when it comes to deploying video surveillance technology as that of the municipal sector. Not only are the technical hurdles immense - building out and maintaining network infrastructures that can span hundreds or, in some cases, thousands of square miles - but all of the political and legal wrangling that come with installing a publicly funded camera system are just as daunting. Unlike a private enterprise where a select group of executives can decide whether or not they're going to make a capital investment in security cameras and implement them throughout a company, installing a city video surveillance network is a process that requires buy-in from the community and local lawmakers, soliciting bids from various systems integrators and finally developing the network.

---

### [Sponsored - Time, Energy, Money, Quality: Total Cost of Ownership and your security success](#)

**By Steve Surfaro**

Total cost of ownership, or TCO, is a way to assess direct and indirect costs and benefits related to the purchase of any IT component. The goal is to create a total estimate of fixed and variable costs that may be used for budget development.

The American Automobile Association (AAA) says that, on average, it

costs 52.2 cents to drive one mile. To drive a Ford Focus 20K miles per year, the average cost is 37.6 cents per mile.

Based on J.D. Roth's vehicle purchase price (\$16,500), interest paid (\$1,300), actual mileage (82K over 5 ½ years), fuel (\$1,650, \$0.0812 per mile), insurance (\$765, \$0.0376 per mile) and service (\$507.07, \$0.0250 per mile), the actual TCO/mile is 36 cents, pretty much the same as the AAA estimate.

In The Millionaire Next Door, one of the best-performing groups in terms of personal net worth were "quality used car prone" people. These folks buy a car with an excellent service record that is 3 to 5 years old and drives it for many years, contributing to very high net worth.

## [Free Webinar on Wednesday: Bullying Hinders School Security](#)

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

Join us for this free, one-hour Webinar on Wednesday.

<http://click.1105info.com/?qs=dc19bfc63d5130cdcd12ff39191c3d5ba0421f5035f1a32d3f5ec87b6c52c4c40d1759bf78006c00>

=====

Overview:

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

#### Spread Acts of Kindness

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

=====

Speaker:

Pam Hayes has been a long-standing advocate for children. In 2011 she founded the Student Services program which ensures that children have a voice in preventing bullying and violence in our communities through the means of technology and education. She worked diligently to see this grow into the Student Safety Alliance. Pam was key in growing the Stand4Kind initiative through which school assemblies are performed to empower students to stop bullying with kindness.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to

promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Pam works with leaders in technology and corporations to promote kindness and help students.

=====

Sponsors:

Napco Security Technologies' products are designed and manufactured to provide long-lived, durable school solutions, for any application and budget and are a favorite in many leading educational institutions worldwide. Comprising Napco, Alarm Lock, ContinentalAccess and Marks Divisions, the Company secures K-12s, colleges & universities with a range of solutions: From affordable mechanical LocDown™ classroom intruder locks that lock from inside; to electronic Trilogy® PIN-code Access Locks with built-in lock schedules, logs, LocDown Button or portable keyfob; and from Networx™ Wireless ID Badge Access Locks that can be globally locked down or unlocked in 10-seconds from any one lock or from the campus server; to enterprise class systems, integrating access control, visitor-/threat-level management, locking, video, burglary/fire alarms for a few doors to thousands. Today, quality Napco technology products protect millions of people, schools, businesses, hospitals & residences, all built to last, and proudly backed by the industry's longest warrantees.

=====

Overview:

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

#### Spread Acts of Kindness

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

=====

Speaker:

Pam Hayes has been a long-standing advocate for children. In 2011 she founded the Student Services program which ensures that children have a voice in preventing bullying and violence in our communities through the means of technology and education. She worked diligently to see this grow into the Student Safety Alliance. Pam was key in growing the Stand4Kind initiative through which school assemblies are performed to empower students to stop bullying with kindness.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to

promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Pam works with leaders in technology and corporations to promote kindness and help students.

=====

Overview:

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

#### Spread Acts of Kindness

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

=====

Speaker:

Pam Hayes has been a long-standing advocate for children. In 2011 she founded the Student Services program which ensures that children have a voice in preventing bullying and violence in our communities through the means of technology and education. She worked diligently to see this grow into the Student Safety Alliance. Pam was key in growing the Stand4Kind initiative through which school assemblies are performed to empower students to stop bullying with kindness.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Pam works with leaders in technology and corporations to promote kindness and help students.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Pam works with leaders in technology and corporations to promote kindness and help students.

=====

Overview:

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

#### Spread Acts of Kindness

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

## WEBINAR

DATE: **Wednesday, November 30, 2016**

TIME: 2:00PM ET | 1:00PM CT | 11:00AM PT

# Bullying Hinders School Security

**REGISTER NOW**

**Sponsored by: NAPCO Security Technologies, Salient Systems,  
HID Global, Security Today, Security Products, and Campus  
Security & Life Safety**

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

Spread Acts of Kindness

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

### Pam Hayes

Pam Hayes has been a long-standing advocate for children. In 2011 she founded the Student Services program which ensures that children have a voice in preventing bullying and violence in our communities through the means of technology and education. She worked diligently to see this grow into the Student Safety Alliance. Pam was key in growing the Stand4Kind initiative through which school assemblies are performed to empower students to stop bullying with kindness.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Pam works with leaders in technology and corporations to promote kindness and help students.

Security & Life Safety**

Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

Spread Acts of Kindness

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

### Pam Hayes

Pam Hayes has been a long-standing advocate for children. In 2011 she founded the Student Services program which ensures that children have a voice in preventing bullying and violence in our communities through the means of technology and education. She worked diligently to see this grow into the Student Safety Alliance. Pam was key in growing the Stand4Kind initiative through which school assemblies are performed to empower students to stop bullying with kindness.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Bullying can threaten students' physical and emotional safety at school and can negatively impact their ability to learn. The best way to address bullying is to stop it before it starts. There are a number of things school staff can do to make schools safer and more secure, and prevent bullying. Conduct assessments in your school to determine how often bullying occurs, where it happens, how students and adults intervene, and whether your prevention efforts are working. Create a mission statement, code of conduct, school-wide rules, and a bullying reporting system. These establish a climate in which bullying is not acceptable. Disseminate and communicate widely.

Bullying in school occurs when one student or a group of students intentionally hurt another student. This abuse may be physical, psychological, or emotional. The last type is one of the most common forms of bullying in schools, and one of the least recognized by parents. Reasons for bullying vary almost as much as its types.

Spread Acts of Kindness

Join us in making your school a more secure and a positive place for everyone, creating a culture of kindness.

### Pam Hayes

Pam Hayes has been a long-standing advocate for children. In 2011 she founded the Student Services program which ensures that children have a voice in preventing bullying and violence in our communities through the means of technology and education. She worked diligently to see this grow into the Student Safety Alliance. Pam was key in growing the Stand4Kind initiative through which school assemblies are performed to empower students to stop bullying with kindness.

In April of 2014 Pam helped to form the Utah Anti Bullying Coalition. As a board member and Program Director, Pam works to bring assemblies to help stop bullying to Utah schools. She has devoted her work to promoting awareness of bullying and the approaches proven to prevent it. She advocates for prevention of bullying and works to bring students, parents, teachers, and the community together in supporting school- and community-based bullying prevention initiatives. The Utah Anti-Bullying Coalition provides a teaching kick-off assembly, anonymous text or call tip line, training for students, parents, school staff and sets up student-led Ambassador Clubs which create competitions to promote kindness in the school. 2015 Pam provided technology and assist for the first state mobile app and web crisis line for Utah serving over 600,000 students. Pam works with leaders in technology and corporations to promote kindness and help students.

## Improve School Safety in 3 steps.

Students tap their card for attendance on the bus, at the school door and in the classroom.

Safety begins with smart ID cards that automate attendance at the building, classroom and bus! Identify and record who wants school access with visitor management. Authorized staff simply tap their card to gain access to secure doors.

It all starts with a smart ID card - the ScholarChip One Card.

### How to Check for Updates Within Your Security System

By Phil Lake

According to a recent report from the FBI, businesses account for 28.4 percent of all reported burglary offenses in 2015. And with 1.5 million annual burglaries occurring in the United States, it's all the more important that you're using a proactive, reliable security system so that you experience the least amount of downtime. With that in mind, here are our top four methods to check your security system for updates so that you don't have to worry.

### [Expanding the Role of Security in Healthcare](#)

**By Samuel Shanes**

Security is a vital function that has become a major part of healthcare organizations' day-to-day operations. Recognizing this reality, hospitals and other providers have invested heavily in video surveillance, access control, visitor management and other technologies and systems to maintain the highest possible level of protection for patients, staff, visitors, prescription drugs and other assets.

Protection is the main function of security, but this is not its only contribution to providers' operations. Traditional security solutions can also deliver additional value to other areas of an organization using some of the same technologies. This includes the ability to streamline operations and ensure compliance with the many regulations that govern the healthcare industry and more, which can transform security into a valuable organizational partner.

### [Upcoming Webinar: Leveraging Innovative Technologies to Overcome Security Challenges with Identity Management on Your Campus](#)

Colleges and universities have the ultimate responsibility to provide a safe learning environment for all campus goers including students, faculty, staff, contractors, vendors, and visitors, while also providing a user-friendly experience throughout the campus.

Provisioning and de-provisioning these identities and respective access levels to a wide range of campus assets/areas presents a unique challenge for campus security.

Join Quantum Secure and HID Global for a FREE webinar to understand how higher education institutions are taking steps to ensure a safe learning environment for all campus goers while leveraging innovative technology solutions.

This free, one-hour webinar will take place on Wednesday, Nov. 9.

## [Securing the Third Presidential Debate](#)

SpotterRF, a provider of low-cost, compact surveillance radar (CSR), is collaborating with Milestone Systems through an integration of the NMS SpotterXP plugin that was used to secure both air and ground perimeter at the U.S. Presidential Debate held on October 19th at the UNLV Thomas & Mack Center in Las Vegas, Nevada. This was the first such debate monitored not only for ground threats but also aerial threats, by using SpotterRF's new award-winning A2000 CSR created especially for monitoring low-flying UAVs (Unmanned Aerial Vehicles or drones). The U.S. Department of Homeland Security (DHS) deems presidential debates to be National Special Security Events (NSSE), as they may be a potential target for terrorism or other criminal activity.

**Subject:** Security Layers are the smart way to protect your school assets

**Date:** Tuesday, October 25, 2016 at 3:41:16 PM Eastern Daylight Time

**From:** Sielox

**To:** MCOGLIANDRO@REVERE.MEC.EDU

## **Security Layers are the smart way to protect your school assets**

With many security and safety choices to select from, K-12 school administrators can be overwhelmed with which technology or solution to deploy first. Adding to the dilemma is the major consideration of initial purchase price, operating cost and system management.

Most experts agree that a layered security approach works best when schools are faced with budget constraints. Communication, perimeter management and access control are the key elements to the layers. Preparing for an emergency or even daily incident requires a communication solution to immediately share what is happening internally and with first responders. Private communication solutions significantly improve the safety and security of locked-down building occupants and the ability for first responders to maintain order, even as they attend to the most critical situations first.

Securing the perimeter of the school and even interior doors is important to ensure that no unwanted

visitors enter the building. Lockdown of all perimeter doors is a powerful feature that saves lives. With electronic wireless locks, schools can now afford to control all of their interior doors also. Access control provides critical information on who has entered your school and when, and clearly identifies both staff and visitors. The access control system can be integrated with a visitor management solution that checks the background of each potential visitor.

Sielox Class - Crisis Lockdown Alert Status System - is a cost effective, easily deployed, daily incident and crisis management communication solution using existing devices and networks. Class reduces notification time to responders using chat and email alerts, and provides instant visibility using dynamic floor plans for All Hazards. Sielox Class provides critical instant communications and notification for daily incidents and crisis events. Alert levels are pushed to teachers and staff who select condition color status for their location. Both internal and external responders view a dynamic floorplan with color conditions, chat with and monitor events.

Sielox LLC and Technology Partner HID Global Security have long been recognized as leaders in the physical security industry. Sielox Pinnacle advanced access control software and 1700 intelligent controllers integrate with HID readers and credentials, Easy Lobby visitor management and Fargo credential printers to provide multiple layers of security for your students, teachers, staff and assets. Choosing proven and reliable Sielox and HID Global solutions ensure that your limited security dollars are well spent and garner a strong return on investment.

The unfortunate reality is that school safety and security concerns are only going to increase and it is incumbent upon schools to make sure their students and staff are well-prepared for an emergency situation. By layering proven solutions every school can afford to deploy important safeguards to communicate, control access, and secure all doors instantly.

Sielox LLC and HID Global are two industry leaders you can trust to get your layers on.

# Visitor Management, it's an important decision.

Visitor Management can add a layer of security to a school - there are many features to consider.

**Accurate Visitor Identity:** It's up to you to know who these people are, if they should be in your school, and if they should be picking up a particular student. It's up to you to make sure that your system has accurate information and works, every day, every time.

**School Safety:** One of the most vital aspects of safety is knowing who is in your school at any given time. Schools can have hundreds of visitors every day: vendors, volunteers, and those who are picking students up. Visitor Management is an incredibly important part of school safety and not something that should be left to chance.

# How to inform parents & visitors about visitor management procedures

Hello,

We just wanted to share with you a recent blog post.

[Visitor procedures - how to inform parents & school staff about what is expected](#)

Schools occasionally have a hard time getting visitors to comply with their manual sign-in or electronic registration protocol. Parents, in particular, might not feel the need to comply because their children are students and they don't consider themselves "visitors". So, parents (your most common visitors) and school staff (who will enforce this process) need to know what is expected of them ... [\[click to continue\]](#)

**Subject:** Security Layers Are the Smart Way to Protect Your School Assets

**Date:** Monday, September 26, 2016 at 10:05:03 AM Eastern Daylight Time

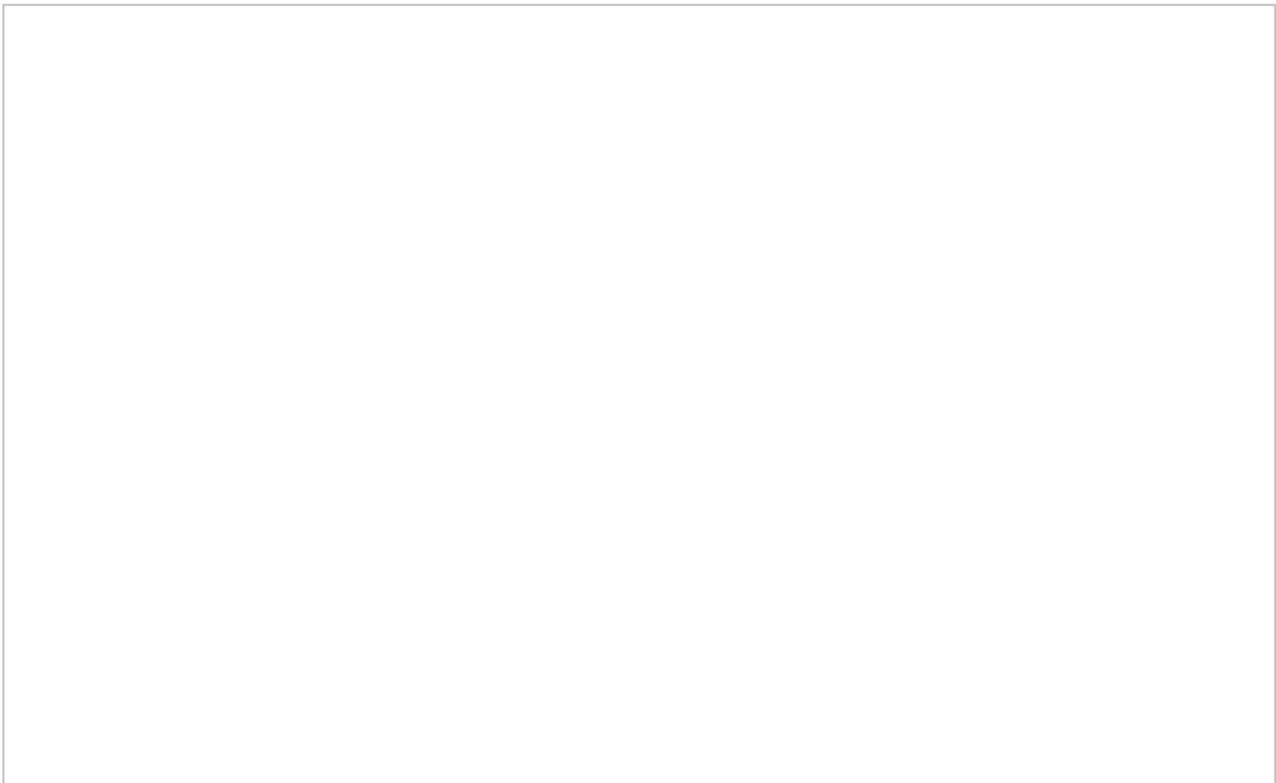

**From:** Campus Safety Featured

**To:** MCOGLIANDRO@REVERE.MEC.EDU

*Content from our Sponsor*

## Security Layers Are the Smart Way to Protect Your School Assets

It can be overwhelming to select which security technology or solution to deploy first. Experts agree that a layered security approach works best for schools.

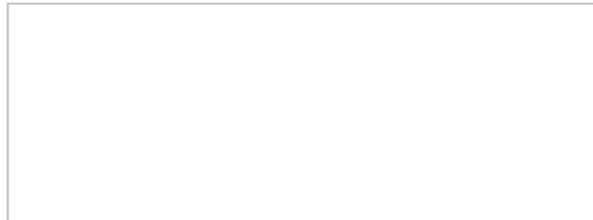

Start with a communication solution to notify First Responders, significantly improving the safety and security of locked-down building occupants and the Responders ability to attend to the most critical situations first.

Lockdown of all perimeter doors is a powerful feature that saves lives. And an access control system provides critical alerts and can be integrated with a background check visitor management solution.

Choosing proven and reliable Sixelo and HID Global solutions ensure that your security dollars are well spent to provide multiple layers of security for your students, teachers, staff and assets.

## When visitors (and parents) don't comply, use this

Hello,

We just wanted to share with you an informative blog post that addresses the challenge of getting visitors to follow your security processes.

[What's a Visitor Pass Security Kit and why do I get one free with my first order?](#)

At Visitor Pass Solutions, we know it can be difficult to introduce a new visitor management protocol, particularly for visitors who may never have been to

your facility before. Even if you've always asked your visitors to stop and sign in, let's face it – they don't always comply. To help our customers enlist cooperation from their visitors, we've created Security Kits ... [[click to continue](#)]

Please let us know what you think.

Thank you,  
Your Education Specialists  
at Visitor Pass Solutions

P.S. See our suggested [sample communications to parents and staff](#) as you implement your new visitor management processes.

LEARN MORE

See how we can help with your school's visitor management process.

**Subject:** Billerica and Lowell School Districts Increase Safety with Raptor  
**Date:** Tuesday, September 20, 2016 at 10:38:27 AM Eastern Daylight Time  
**From:** Jose Pineda  
**To:** EMOCCIA@REVERE.MEC.EDU

Providing a safe learning environment for students is on everyone's mind these days. Read how **Billerica Public Schools** and **Lowell Public Schools** help ensure the safety of their students, faculty and staff by [implementing the Raptor Visitor Management System](#).

Raptor's mission is to protect every child, every school, every day. With the Raptor system, schools can:

- Know who is in your school at all times
- Screen out registered sex offenders from entering your schools
- Receive custom alerts for custody issues, banned visitors, restraining orders, and more
- Manage volunteers and events, and record volunteer hours
- Verify approved guardians for student early dismissals

To learn more about Raptor's integrated school safety technologies for K-12 schools, contact me at 713-880-8902 x109. I look forward to speaking with you.

Best,

Jose Pineda

**Subject:** Billerica and Lowell School Districts Increase Safety with Raptor  
**Date:** Tuesday, September 20, 2016 at 10:35:26 AM Eastern Daylight Time  
**From:** Jose Pineda  
**To:** NMARTEL@REVERE.MEC.EDU

Providing a safe learning environment for students is on everyone's mind these days. Read how **Billerica Public Schools** and **Lowell Public Schools** help ensure the safety of their students, faculty and staff by [implementing the Raptor Visitor Management System](#).

Raptor's mission is to protect every child, every school, every day. With the Raptor system, schools can:

- Know who is in your school at all times
- Screen out registered sex offenders from entering your schools
- Receive custom alerts for custody issues, banned visitors, restraining orders, and more
- Manage volunteers and events, and record volunteer hours
- Verify approved guardians for student early dismissals

To learn more about Raptor's integrated school safety technologies for K-12 schools, contact me at 713-880-8902 x109. I look forward to speaking with you.

Best,

Jose Pineda

## Higgins Corporation Has a New Blog!

Higgins Corporation recently launched a new blog on our website at <https://www.higgins3.com/news/category/blog/>. Stay tuned for new articles and fresh content! The first post was on the very relevant topic of school safety.

Here is a snippet:

### **Incorporating Modern Technologies in School Safety**

*The Importance of Implementing Modern Technology into School Safety  
Visitor Management, Student Tracking, Access Control and Photo ID's*

School Safety is continuously a growing concern. Too many frightening headlines of shootings bring to mind the importance of access control, visitor management and photo identification. Screening people before they enter a building is imperative for many different reasons. Knowing who is sharing the school building with students and staff is important to protect physical well-being. This is also essential for matters of unwanted visitants, such as sex offenders posing as a parent or relative. Custody disputes and parental kidnapping are other causes for worry. Ensuring someone is legally in their rights or is a safe individual to pick up a child from school, is something that should be confirmed.

Keeping track of everyone in the case of any type of emergency, even environmental, is critical. Being able to identify at a moment's notice where every student and faculty member is, stands crucial when every second matters. Thesetrepidations are significant, but sadly tend to be addressed only after an incident occurs.

## Higgins Corporation Has a New Blog!

Higgins Corporation recently launched a new blog on our website at <https://www.higgins3.com/news/category/blog/>. Stay tuned for new articles and fresh content! The first post was on the very relevant topic of school safety.

Here is a snippet:

### **Incorporating Modern Technologies in School Safety**

*The Importance of Implementing Modern Technology into School Safety  
Visitor Management, Student Tracking, Access Control and Photo ID's*

School Safety is continuously a growing concern. Too many frightening headlines of shootings bring to mind the importance of access control, visitor management and photo identification. Screening people before they enter a building is imperative for many different reasons. Knowing who is sharing the school building with students and staff is important to protect physical well-being. This is also essential for matters of unwanted visitants, such as sex offenders posing as a parent or relative. Custody disputes and parental kidnapping are other causes for worry. Ensuring someone is legally in their rights or is a safe individual to pick up a child from school, is something that should be confirmed.

Keeping track of everyone in the case of any type of emergency, even environmental, is critical. Being able to identify at a moment's notice where every student and faculty member is, stands crucial when every second matters. Thesetrepidations are significant, but sadly tend to be addressed only after an incident occurs.

### Vanderbilt Security Management System (SMS)

Delivering a powerful, single-source solution for integrating a facility's access control technologies, digital video and alarm monitoring systems, the Vanderbilt Security Management System (SMS) is a campus' go-to solution. Systems are scalable so that security teams can meet their security requirements today, and expand to meet growing business needs tomorrow - all while keeping budgets at top of mind. SMS provides unparalleled flexibility by supporting an unlimited number of devices and cardholders, making it perfect for large, multi-site or global organizations. It also allows users to manage alarms, photo ID badging, visitor management, elevator control, online and offline locks, advanced reporting and much more - all from a single software platform.

[Our One Card Story](#)

[View this email in your browser](#)

## Improve School Safety in 3 steps.

Students tap their card for attendance on the bus, at the school door and in the classroom.

Safety begins with smart ID cards that automate attendance at the building, classroom and bus! Identify and record who wants

school access with visitor management. Authorized staff simply tap their card to gain access to secure doors.

It all starts with a smart ID card - the ScholarChip One Card.

## 4 criteria for tracking early dismissals effectively

Hello,

We wanted to share with you an informative blog post.

### [4 criteria for tracking early dismissals effectively](#)

One of the security goals that all schools should have is to keep track of students who sign out early. Sometimes students need to sign out early to go to a doctor appointment, because they are feeling ill, or just have an off-site meeting during school hours. It is important for schools to document those instances as this is a liability concern ... [\[click to continue\]](#)

**Subject:** 5 Steps to Safely Manage School Visitors

**Date:** Wednesday, August 17, 2016 at 1:31:11 PM Eastern Daylight Time

**From:** Seton US

**To:** csvendsen@revere.mec.edu

Hi Carl,

Looking for ways to take some stress out of visitor management? Here are 5 tips to help you improve your visitor management practices, and keep your students and staff safe.

1. **It starts in the parking lot.** Funnel visitors to one location. Make sure that you have clearly marked visitor parking areas, and [signage that directs visitors](#) to your designated visitor reception area. Go outside and pretend you are a visitor. Can you tell exactly where to go? Look for other doors that a newcomer might mistake as the primary entrance and ensure they are locked and marked with [signage directing them to the correct location](#).
2. **Introduce self-expiring visitor badges** to ensure that a visitor can not use the badge for more than one day. After 24 hours, red lines appear on the badge, clearly showing that it is no longer valid.
3. **Provide parents & frequent visitors with permanent badges** to reduce the check-in line at busy drop-off and pick-up times.
4. **Adopt upgraded video surveillance systems** and post [signage](#) indicating that the property is under surveillance.
5. **Train your parents & staff that security is everyone's job!** Everybody must do their part to keep your school environment safe and secure. Plan time in the new school year to communicate to parents and train your staff on visitor policy. One school we work with makes it fun and ignites the competitive spirit of its staff by issuing a brief quiz. First one with all the correct answers wins!

Give our safety experts a call at 888-672-0604 or visit [www.seton.com](http://www.seton.com). We can help you select the right access control products for your school so that you are ready when your students arrive.

Regards,

**Sam Iverson**

***AIDC = Automatic ID and data capture***

Although we do offer turnkey solutions, we don't try and reinvent the wheel, rather find a solution to meet your needs.

- ***Bar code solutions:*** Software, Printers, Asset tags, labels and ribbons.

***Are you purchasing expensive asset tags ? ""In past we used pre-printed asset tags which were expensive and we had to re-assign new numbers if the tags were ever removed or destroyed. We now have a solution in place to create custom asset tags for up to 15,000 asset tags along with a high volume printer for the same cost I would normally pay for just 1000 pre-printed labels. If tags are ever removed we can simply reprint them with the same number which helps keep our inventory system in check. Big time and money saver!!!"***

Dennis Roche - Natick School Department

- **Student ID Card Systems:** Software, Printers, HID, Mag Stripe or Barcoded, with integrated software to a host database
- **Mobility Software / Hardware:** We offer A line of enterprise level handheld devices, both barcode and RFID to proliferate tasks like Physical Inventory, Check in / Check out, Asset Tracking, & Attendance, Integration to other asset Programs like Web help Desk & Schooldude. Custom applications are available.
- **Inbound Package tracking:** is a complete stand-alone solution that tracks the movement of packages from receipt into your mailroom to the final disposition, which includes delivery, pickup at pickup window, forward to another address or return to sender. Campus is used by colleges & universities, K-12, federal & state government, and medium to large companies. Any entity with a central package receiving area can benefit from Campus.
- **Asset Software:** Web or PC based, RFID or Barcode edition of fixed asset tracking software is a complete fixed asset database with the ability to collect data on RFID / Barcode enabled mobile computers. The software includes RFID reader licenses for compatible mobile computer models. Keep asset records up to date and periodically take a physical inventory of assets. Data fields include RFID tag ID, barcode ID, location, department, maintenance, purchasing, warranty, lease, depreciation, information technology, reservations, Service tickets, check-in Check-outs and other user definable fields.
- **Pos Systems:** for your Cafe or Bookstore
- **LobbyGuard:** Visitor Management Solution

## ***Pinnacle v.10 Access Control Platform is Available!***

***More Powerful Functionality.  
Increased Operational Efficiencies.***

Our newly enhanced **Pinnacle v.10 Access Control Platform** is now available and includes more than 30 upgrades/features designed to help users improve access control management.

### **Notable enhancements to Pinnacle v.10 include:**

- New look and feel with responsive design
- Latest software support for Windows 10, SQL Express 2008 R2 and SQL Express Management Studio
- Two-Man Rule moved to controller for decisions – no longer server-based
- Detailed privilege access levels / reports
- Data Sharing for sharing manual additions of new cardholders to partitions
- Increased programming capabilities include:
  - Time zone summaries
  - 1700 Controller programming
  - Property configurations
  - Daily reboot
  - Lockdown programming
- Upgraded biometrics capability and integrations with

Easy Lobby visitor management as well as Otis,  
Thyssen Krupp and Schindler elevator systems

**Subject:** Gift #3...as promised

**Date:** Saturday, July 30, 2016 at 12:18:11 PM Eastern Daylight Time

**From:** on behalf of Robin Hattersley

**To:** MCOGLIANDRO@REVERE.MEC.EDU

Yesterday you received:

Gift #1: [Guarding the Front Door: School Visitor Management Best Practices](#)

Gift #2: [Managing the Unimaginable: Crisis Communications After An Active Shooter Incident](#)

...along with a picture of me recognizing the exceptional campus safety efforts John Venuti, Chief of Police at Virginia Commonwealth University.

So, if you missed those, you might want to do a search in your inbox for this subject line: Here's the gift I promised

Go ahead and do it now, I'll wait :)

Now that you're caught back up, you need to check this out:

[9 Tips for More Effective School Lockdowns](#)

I truly saved the best for last.

You're about to access insights from Chris Dorn, an analyst for Safe Havens International. He discusses nine critical considerations in developing your school lockdown procedures.

This was one of the top stories on our site last month, so I know you'll love it too.

Even if you don't work in a school environment, the tips are equally applicable in a hospital, college or worship setting.

So what are you waiting for? Go read it now!

Talk soon,  
Robin Hattersley

P.S. Like what you've seen in these last few messages?

Then good news!

Twice a week I send out even more content just like this, so there's even more good stuff coming your way.

You can also see more of my archived content here:

<http://www.campussafetymagazine.com/topic/category/news>

But here's the BIGGIE...

You need to make sure you whitelist my email address: [csreply@ehpub.net](mailto:csreply@ehpub.net)

...and mark all my mails as "Important" if you're using Gmail.

Also, make sure you're following me on [Facebook](#) and [Twitter](#) because I also announce new content updates on those platforms, and wouldn't want you to miss out.

**Subject:** Here's the gift I promised

**Date:** Friday, July 29, 2016 at 12:17:14 PM Eastern Daylight Time

**From:** on behalf of Robin Hattersley

**To:** MCOGLIANDRO@REVERE.MEC.EDU

I promised yesterday that I would send you one of our most popular campus safety articles...but before that, I wanted to tell you a little more about myself.

This is a picture of me at last year's Campus Safety Conference presenting an award for Director of the Year to John Venuti, Chief of Police at Virginia Commonwealth University. This is one of the things I love most about my job – learning about what campus safety leaders are doing every day to keep students, staff and visitors safe. Then recognizing that exceptional effort on a national platform so that others can also benefit.

OK, now that we know each other a bit better...check this out:

[Guarding the Front Door: School Visitor Management Best Practices](#)

This is the top article that I promised to send you. You're going to find it really valuable. It delves into leading strategies for controlling visitor access.

Go read it now, because there's more coming your way tomorrow...

Talk to you soon,  
Robin Hattersley

P.S. OK, so I changed my mind...

Since I like to always under-promise and over-deliver, I'm going to go ahead and

give you your second gift today instead of having to wait until tomorrow. (See, it pays to read these messages from beginning to end.) :)

Here you go:

[Managing the Unimaginable: Crisis Communications After An Active Shooter Incident](#)

Tomorrow your third gift will hit your inbox, so keep an eye out for this subject line: Gift #3...as promised

**Subject:** Welcome to the Campus Safety Family

**Date:** Thursday, July 28, 2016 at 12:08:06 PM Eastern Daylight Time

**From:** on behalf of Robin Hattersley

**To:** MCOGLIANDRO@REVERE.MEC.EDU

My name is Robin Hattersley and I am Executive Editor of Campus Safety magazine and CampusSafetyMagazine.com. I wanted to take a second and say hello and welcome you to the family. Our mission is to provide campus safety professionals, IT personnel and executive administrators with the information you need to keep your campus safe – whether at a hospital, school or university.

We recently partnered with Safe Havens International to provide you with five free audios that describe emergencies that can occur on any type of campus with scenarios that cover medical emergencies, weapons, lockdowns, emergency notification and more: [How to Use Scenarios in Training to Improve Campus Safety and Security](#).

I hope that you find this podcast useful. I would also love to hear from you as I am planning our upcoming articles. If you have a minute, please email me at rhattersley@ehpub.com and let me know what about your job keeps you up at night. What are the challenges that are hardest to solve and what information would make your job easier?

Thanks for joining the Campus Safety family. Be sure to also connect with us on [Facebook](#), [Twitter](#) and [LinkedIn](#) so we can share the latest news with you.

Have a great day,

Robin Hattersley

P.S. I almost forgot to tell you to keep an eye out for an article I will be sending tomorrow about how to drastically improve visitor management on your campus.

Stoughton has used Raptor for the last 5 years for visitors. It actually checks a person's (not sure, but believe that we are only connected to the MA registry) license against the sex offender registry by scanning it. Don't believe that it works with PowerSchool.

We use a bar code reader with our student ID's (Lifetouch puts the bar code on the ID for us) to track students late arrivals through our attendance office. This goes directly into PowerSchool. Attendance office puts the time in the comment field. Works well.

## TOP STORY

### Is Your VMS as Smart as Your Phone?

By Ken LaMarca

Is your software up to date? Years ago, that question was probably intended for your desktop computer, but today it could also refer to your laptop, tablet, smartphone and much, much more. Professional security systems are no different in terms of their dependence on software. Access control, identity management, video surveillance, communications and every other critical security and safety function in some way relies on software to operate properly and effectively.

### [Sponsored: From Intelligence and Data to Dollars](#)

By Steve Surfaro

The largest device market in the world will no longer be smartphones, according to Gartner's November 2015 study. In fact, by 2020, 28.1 billion devices, will offer connectivity and data, from smartphones and vehicles to embedded microcomputers and security devices according to an IDC forecast. This is the Internet of Things.

**Subject:** Is your visitor management process as secure as it was three months ago?

**Date:** Thursday, July 14, 2016 at 11:17:59 AM Eastern Daylight Time

**From:** Visitor Pass Solutions

**To:** ameriano@revere.mec.edu

Hello,

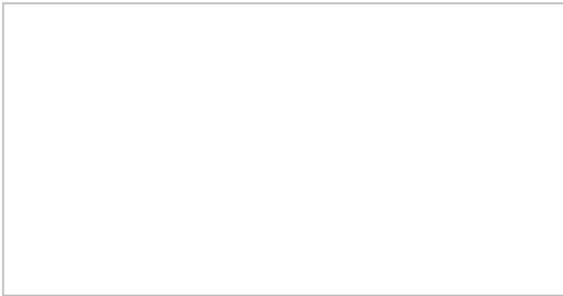

We just wanted to share with you a recent blog post. Please let us know what you think.

[Visitor Management Protocol should be updated regularly](#)

Organizations that have a procedure to sign-in visitors know that it is a good security practice. Why? So that they know now, and months later, who was in their facility, for what purpose, and for how long.

But are your current visitor management protocols still the best way to accomplish the goals they were intended for? Visitor management security tools are always evolving with new functionality. A tool that didn't seem to fit a few months ago might now be the perfect visitor management instrument for your facility. [[click to continue](#)]

## Improve School Safety & Operations

[Request a Case Study > ScholarChip](#)

### 6 Steps to Improve School Safety and Operations:

#### #1. Start With "Smart" Student ID Card

Smart IDs are the starting point to automate student safety and attendance. The One Card is highly secure. (It has a chip in it like the new credit cards.)

#### #2. Take Attendance

Students simply tap their One Card onto a reader and attendance is taken. Automate attendance taking on the bus, entering the building, cafeteria and classrooms.

#### #3. Mobile Monitoring

Use tablets/phones to identify students, visitors, and hallway monitoring - as well as to

#### #4. Secure Door Access

Centrally manage door access for all card holders. Now with emergency lock-down.

#### #5. Visitor Management

Identify, track and issue badges to adult visitors. Validate their status against public and school district records. (Also manages student pick-up.)

#### #6. Review on Management Site

Administrators review all data via a secure website. Attendance and safety issues can be quickly identified and acted upon.

access student info and capture attendance.

*"Recently we implemented ScholarChip to replace employee and student ID badges at Richland School District One. The implementation went rather quickly...and we were impressed with the company and the multiple uses they provided with a single badge and look forward to utilizing it to improve business efficiencies in the district."*

- Richland School District One, Columbia, SC.

## NEWS BRIEF

### Federal Reserve Victim to Over 50 Cybersecurity Breaches

By Sydney Shepard

The U.S. Federal Reserve has detected more than 50 cybersecurity breaches between 2011 and 2015. The central bank's staff suspected hackers or spies as several of the incidents were described internally as "espionage," according to the records.

The Fed's computer systems play a major role in global banking and hold confidential information on discussions about monetary policy that drives financial markets.

Reuters reported that the cybersecurity reports, obtained through a Freedom of Information Act request, were heavily edited by Fed officials to keep security procedures secret.

[More...](#)

### [Solid ROI Metrics Support Case for PIAM](#)

**By Don Campbell**

ROI metrics, both tangible and intangible, are commonly used throughout organizations to justify the need for new expenditures or support for an existing program. More recently they have become increasingly important in organizations' security divisions as those departments transition from cost centers to revenue centers. While conventional technologies such as video surveillance and even video management systems can be more easily valued, newer technologies such as Physical Identity and Access Management (PIAM) may have fewer case precedents to rely on but are no less critical for improving security's effectiveness.

---

### [Upcoming Webinar: Rethinking the Visitor Experience: Implementing a Customer Centric Solution to Solve Your Visitor Management Challenges](#)

While visitor management is recognized as a crucial facet of physical security, traditionally security departments haven't recognized it as a crucial part of their organization's brand experience. A visitor, whether they are a customer, potential employee, or VIP begins their experience with your organization the moment they're invited to your facility. While for your organization's employees, visitor management is a key aspect of their experience with your department. Slow, manual, error-prone processes for registering and checking-in visitors creates a poor experience for both the host and the visitor and results in a negative impression of your organization and the security department.

Join Quantum Secure and HID Global to learn how you can implement a customer centric approach to visitor management that will enhance security while also creating a positive customer experience for your visitors and employees.

Join us for this free, one-hour Webinar on Wednesday, June 8.

SPEAKERS:

Don Campbell, Vice President of Product Management at Quantum Secure

Don began his career as a United State Marine Corps officer where he ran a 13 person team with responsibilities ranging from managing the 35 building/5000 user network. Upon leaving the Marine Corps, Don held a number of positions with technology companies ranging from LE satellite communication to directory systems, to IT Security management building sales in the federal government and commercial spaces. In 2003, Don joined the physical security space as PSIM products began to arrive on the market. Don received his BS in Electrical Engineering from Duke University.

Nils Wahlander, Senior Product Marketing Manager at HID Global

Nils Wahlander, a Senior Product Marketing Manager at HID Global, a leading provider of secure identity and access control solutions. With more than 10 years of experience in the secure issuance and card printing industry, Nils works with customers to continuously evaluate and improve their safety and security strategies. He received his BS in Mechanical Engineering from Mississippi State University and an MBA from the Carlson School of Management at the University of Minnesota.

### Free guide explains how to assess your visitor management process

Our [free guide](#) was written to help organizations decide what kind of visitor management system to buy. But you can also use it to help you assess your current system.

#### **This guide includes:**

- The basic criteria most organizations should concern themselves with.
- Three fundamental questions that organizations should answer.
- The pro's and con's of signing in visitors by hand vs. signing them in with a computer.

You may download your free guide by [clicking this link](#).

**Subject:** School Safety: Are More Expensive Technology Products Really Needed?  
**Date:** Thursday, May 26, 2016 at 12:23:23 PM Eastern Daylight Time  
**From:** Brittany Havranek  
**To:** pdakin@revere.mec.edu  
**Attachments:** image001.gif

## School Safety: Are More Expensive Technology Products Really Needed?

*With limited budgets, how are schools prioritizing technology and related needs to improve school safety?*

Schools have implemented a variety of programs and spent thousands of dollars on new security products to prevent violence. PBIS, zero tolerance policies, visitor management systems, anonymous reporting tools, cameras, locks, active shooter drills and security guards are all approaches used to improve student safety. However, it can be difficult to measure the ROI on these efforts and students and their families are always asking if more can be done.

A recent [report](#) from Rand.org reviewed the key challenges associated with keeping schools safe and examined the wide variety of technologies that schools use. This report can be a great resource as you plan your budgets for next school year!

The panelists from the report ranked highly two types of technological needs.

1. Better data collection and analytics to understand the problems that schools encounter and could be used for internal and external accountability for preventing, reducing, and responding to school violence.
2. Staff members need easier and faster access to information on school safety. Improved access is key to preventing, reducing, and responding to the entire spectrum of school violence.

Leading schools across the Nation are using Awareity's TIPS Prevention Program to more effectively determine what types of safety concerns their students, parents and staff might have, where issues are occurring more often, if risks are escalating, and if current programs and processes are working. TIPS is helping schools address all 6 Essential Steps of Prevention and saving lives, reputations and bottom lines.

Best of all, the TIPS platform will cost only a fraction of your school's security budget!

Reacting is expensive, start preventing today! **To schedule an online demonstration for your school, [click here](#).**

Thank you,

Brittany Havranek

[qs=ede03f756271d075e10c398a762eec08c20c91f76631bddb39b66830552cfff5cddbdaafd949d53](http://click.1105info.com/?qs=ede03f756271d075e10c398a762eec08c20c91f76631bddb39b66830552cfff5cddbdaafd949d53)

Overview:

While visitor management is recognized as a crucial facet of physical security, traditionally security departments haven't recognized it as a crucial part of their organization's brand experience. A visitor, whether they are a customer, potential employee, or VIP begins their experience with your organization the moment they're invited to your facility. While for your organization's employees, visitor management is a key aspect of their experience with your department. Slow, manual, error-prone processes for registering and checking-in visitors creates a poor experience for both the host and the visitor and results in a negative impression of your organization and the security department.

Join Quantum Secure and HID Global to learn how you can implement a customer centric approach to visitor management that will enhance security while also creating a positive customer experience for your visitors and employees.

Key takeaways you don't want to miss:

- \* How the role of security is changing from inhibitor to a service organization
- \* Managing the visitor lifecycle to deliver a high-end visitor experience while also enhancing security
- \* Creating a service portal to make it easy for internal customers to engage security

## The 1st Step to a safer school is Visitor Management.

No other Visitor management system is this connected or offers so many K12 safety functions..

- Searches public sex offender records.
- Issues smart IDs to frequent visitors.
- Supports notifications and messaging.
- Supports School defined alerts.
- Student pick-up.
- Provides volunteer time clock.
- Integrates with all student information systems.
- Self service mode available.

[Rethinking the Visitor Experience:](#)

**Implementing a Customer Centric Solution to Solve Your Visitor Management Challenges**

**Overview:**

While visitor management is recognized as a crucial facet of physical security, traditionally security departments haven't recognized it as a crucial part of their organization's brand experience. A visitor, whether they are a customer, potential employee, or VIP begins their experience with your organization the moment they're invited to your facility. While for your organization's employees, visitor management is a key aspect of their experience with your department. Slow, manual, error-prone processes for registering and checking-in visitors creates a poor experience for both the host and the visitor and results in a negative impression of your organization and the security department.

Join Quantum Secure and HID Global to learn how you can implement a customer centric approach to visitor management that will enhance security while also creating a positive customer experience for your visitors and employees.

**Key takeaways you don't want to miss:**

- How the role of security is changing from inhibitor to a service organization
- Managing the visitor lifecycle to deliver a high-end visitor experience while also enhancing security
- Creating a service portal to make it easy for internal customers to engage security

**Date: Wednesday, June 8, 2016**

**Time:** 2:00PM ET - 1:00PM CT - 11:00AM PT (duration: 1-hour)

**Presented by:**

**Don Campbell, Vice President of Product Management at Quantum Secure**

Don began his career as a United State Marine Corps officer where he ran a 13 person team with responsibilities ranging from managing the 35 building/5000 user network. Upon leaving the Marine Corps, Don held a number of positions with technology companies ranging from LE satellite communication to directory systems, to IT Security management building sales in the federal government and commercial spaces. In 2003, Don joined the physical security space as PSIM products began to arrive on the market. Don received his BS in Electrical Engineering from Duke University.

**Nils Wahlander, Senior Product Marketing Manager at HID Global**

Nils Wahlander, a Senior Product Marketing Manager at HID Global, a leading provider of secure identity and access control solutions. With more than 10 years of experience in the secure issuance and card printing industry, Nils works with customers to continuously evaluate and improve their safety and security strategies. He received his BS in Mechanical Engineering from Mississippi State University and an MBA from the Carlson School of Management at the University of Minnesota.

**A Q&A session will be held during the last 15 minutes of the Webinar.**

**Date: Wednesday, June 8, 2016**

**Time: 2:00PM ET - 1:00PM CT - 11:00AM PT (duration: 1-hour)**

[qs=bba1a764ec291268682cc9273e92a1af0550cc72f69069fd85c6348dee66d1c2ee723994317febbd](http://click.1105info.com/?qs=bba1a764ec291268682cc9273e92a1af0550cc72f69069fd85c6348dee66d1c2ee723994317febbd)

#### Overview:

While visitor management is recognized as a crucial facet of physical security, traditionally security departments haven't recognized it as a crucial part of their organization's brand experience. A visitor, whether they are a customer, potential employee, or VIP begins their experience with your organization the moment they're invited to your facility. While for your organization's employees, visitor management is a key aspect of their experience with your department. Slow, manual, error-prone processes for registering and checking-in visitors creates a poor experience for both the host and the visitor and results in a negative impression of your organization and the security department.

Join Quantum Secure and HID Global to learn how you can implement a customer centric approach to visitor management that will enhance security while also creating a positive customer experience for your visitors and employees.

Key takeaways you don't want to miss:

- \* How the role of security is changing from inhibitor to a service organization
- \* Managing the visitor lifecycle to deliver a high-end visitor experience while also enhancing security
- \* Creating a service portal to make it easy for internal customers to engage security

#### SPEAKERS:

Don Campbell, Vice President of Product Management at Quantum Secure

Don began his career as a United State Marine Corps officer where he ran a 13 person team with responsibilities ranging from managing the 35 building/5000 user network. Upon leaving the Marine Corps, Don held a number of positions with technology companies ranging from LE satellite communication to directory systems, to IT Security management building sales in the federal government and commercial spaces. In 2003, Don joined the physical security space as PSIM products began to arrive on the market. Don received his BS in Electrical Engineering from Duke University.

Nils Wahlander, Senior Product Marketing Manager at HID Global

Nils Wahlander, a Senior Product Marketing Manager at HID Global, a leading provider of secure identity and access control solutions. With more than 10 years of experience in the secure issuance and card printing industry, Nils works with customers to continuously evaluate and improve their safety and security strategies. He received his BS in Mechanical Engineering from Mississippi State University and an MBA from the Carlson School of Management at the University of Minnesota.

A Q&A session will be held during the last 15 minutes of the Webinar.

**Subject:** eVisitorPass webinar recording, poll results, and special offer  
**Date:** Wednesday, May 11, 2016 at 11:18:30 AM Eastern Daylight Time  
**From:** Visitor Pass Solutions  
**To:** ameriano@revere.mec.edu

## **eVisitorPass software for schools**

*Webinar recording, poll results, and special offer*

Last Friday we hosted a webinar about our popular visitor management system, called "eVisitorPass." If you missed it, you can still see [the recording we made](#), as well as [download the slide show](#) that we used during the presentation.

-----

### **Poll Results**

When people registered for the webinar, they were asked to answer a multiple-choice poll question. Here are the results:

### **In your opinion, what is the most important reason for having a visitor management system?**

Identify visitors with a badge.	<b>67%</b>
Keep track of visitors during their visit.	<b>17%</b>
Have a record of visitors after their visit.	<b>8%</b>

**Note:** to make sure the webinar presentation was ready in time, we tallied the results of the poll before every registrant had finished voting. These are the final results.

As you can see, two-thirds of the respondents think that identifying visitors with a badge is the most important reason for having a visitor management system. Fortunately, our Visitor Pass Solutions satisfy all three reasons, so you don't have to choose!

-----

**We offer our eVisitorPass system three ways:**

**Basic** Package                    **\$250** (regularly \$490)  
(software, printer, one roll of labels)

Basic Package **Plus**            **\$990** (regularly \$1,279)  
(software, printer, one roll of labels, driver's license reader, camera, USB hub)

**Build Your Own**                You choose the components you want  
You may [download this flyer](#) for all the details. Shipping is always free!

-----

Please [contact us today](#) to schedule a free personal demonstration of eVisitorPass at your convenience! We look forward to serving you.

**Subject:** School Safety: Are More Expensive Technology Products Really Needed?  
**Date:** Wednesday, April 27, 2016 at 1:53:41 PM Eastern Daylight Time  
**From:** Brittany Havranek  
**To:** pdakin@revere.mec.edu  
**Attachments:** image001.gif

## School Safety: Are More Expensive Technology Products Really Needed?

*With limited budgets, how are schools prioritizing technology and related needs to improve school safety?*

Schools have implemented a variety of programs and spent thousands of dollars on new security products to prevent violence. PBIS, zero tolerance policies, visitor management systems, anonymous reporting tools, cameras, locks, active shooter drills and security guards are all approaches used to improve student safety. However, it can be difficult to measure the ROI on these efforts and students and their families are always asking if more can be done.

A recent [report](#) from Rand.org reviewed the key challenges associated with keeping schools safe and examined the wide variety of technologies that schools use. This report can be a great resource as you plan your budgets for next school year!

The panelists from the report ranked highly two types of technological needs.

1. Better data collection and analytics to understand the problems that schools encounter and could be used for internal and external accountability for preventing, reducing, and responding to school violence.
2. Staff members need easier and faster access to information on school safety. Improved access is key to preventing, reducing, and responding to the entire spectrum of school violence.

Leading schools across the Nation are using Awareity's TIPS Prevention Program to more effectively determine what types of safety concerns their students, parents and staff might have, where issues are occurring more often, if risks are escalating, and if current programs and processes are working. TIPS is helping schools address all 6 Essential Steps of Prevention and saving lives, reputations and bottom lines.

Best of all, the TIPS platform will cost only a fraction of your school's security budget!

Reacting is expensive, start preventing today! **To schedule an online demonstration for your school, [click here](#).**

Thank you,

Brittany Havranek

## School Visitor Management: Invest in the safety of your students and staff

### Ditch the sign-in sheet and provide peace of mind by securing your facility

Unfortunately, it's something most parents, teachers and staff members have wondered at some point: *"Is my school safe enough?"*

Today's schools can't cut corners when it comes to security. It's time to face facts: that sign-in sheet or notebook left at the front desk is no longer good enough.

A Visitor Management system will help create a safer, more secure learning environment for your school.

School Visitor Management

[Read our Visitor Management post »](#)

Our recent blog post, [4 Ways a Visitor Management System Helps Secure Your School](#), details the benefits your school will see from adopting such a system.

- Learn how detailed reporting leads to better tracking of guests.
- Find out how a Visitor Management system can stop guest problems before they arise.
- Get free trials of multiple Visitor Management systems.

Check out our post and try out the system that intrigues you most, free of charge.

## **6 Things You Can Learn From School Security Experts**

Keeping students safe is top priority for educators across the country. A top-tier security system combined with well crafted policies can go a long way toward ensuring safety and preventing property damage and theft.

Download this paper and discover how a visitor management plan can help to improve overall campus security. Putting a plan together doesn't have to be complicated or expensive. This guide provides the six essential components of access control. Read on and learn how to develop, implement and enforce visitor management protocols that will add a new layer or protection.

**Subject:** Free webinar: "eVisitorPass" software for schools – how it works and why it's different

**Date:** Wednesday, April 20, 2016 at 11:46:35 AM Eastern Daylight Time

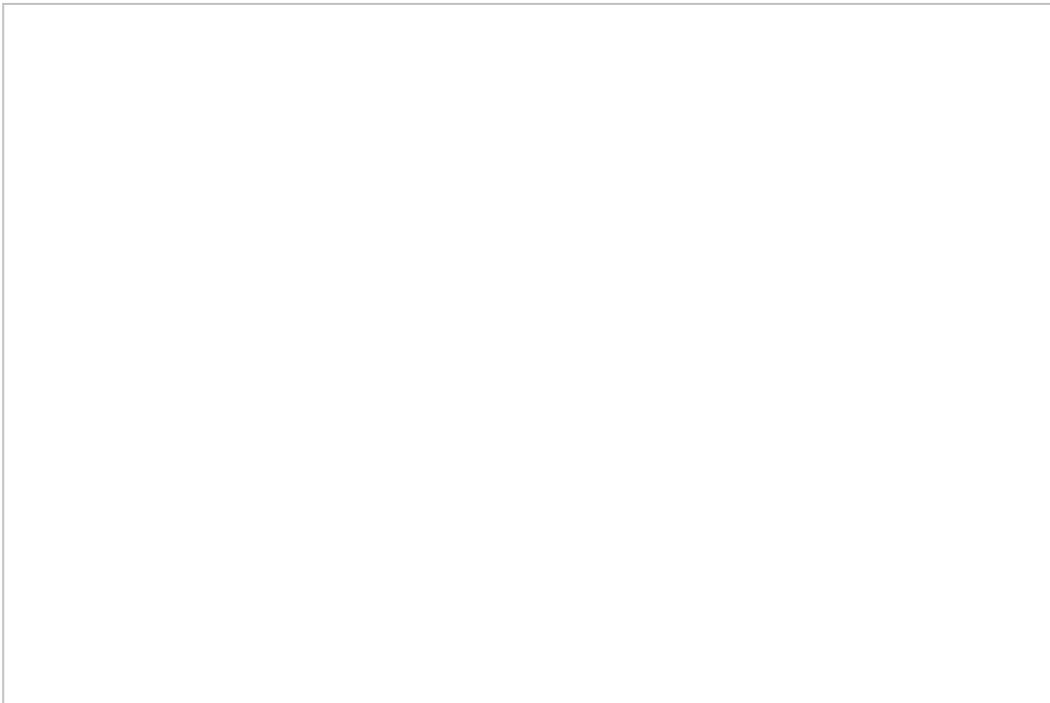

**From:** Visitor Pass Solutions

**To:** jwillett@revere.mec.edu

**FREE WEBINAR:**

**"eVisitorPass" software for schools — how it works and why it's different**

Your visitor management experts for Schools and School Districts will explain our easy-to-use and economical "eVisitorPass" software in a free webinar on Friday, May 6, 2016, at 1 p.m. ET.

During this webinar you will learn about:

- Our 54-year-old company, Data Management, Inc., and our flagship product line, Visitor Pass Solutions
- "eVisitorPass," our easy and economical visitor management system, specifically: what it is, what it does, who it's for, and why it's different
- How eVisitorPass works

This presentation will be followed by questions from the audience.

Register now by clicking this link:

<https://attendeegotowebinar.com/register/6567546054157743364>

Space is limited. We look forward to having you join us!

Key features to the product include instant sex offender and red flag checks, student custody management, student attendance, volunteer hours management and much more. LobbyGuard offers more options and more product choices

## 2016 National School Safety Conference

**July 25-29, 2016**

**Omni Champions Gate Resort & Spa**

**Orlando, FL.**

In Partnership with the

**National Association of Campus Safety Administrators**

The 2016 National School Safety Conference and Exposition is the largest and most comprehensive conference focused on all the aspects of school safety and security. Centered around national best practices and proven localized programs and efforts, this conference brings together the most knowledgeable and internationally renowned keynote presenters into one forum to provide the highest quality professional development possible in one conference. In addition to our exceptional keynote presenters, you will be able to take advantage of complimentary pre-conference trainings and over 40 breakout sessions by current professionals in the fields of education and school safety addressing the most pressing issues facing our schools today.

This year's conference promises to be the largest yet and the **host hotel will sell out quickly** so register for conference and book your room now.

### **NACSA College & University Campus Safety Specialty Tract**

The National Association of Campus Safety Administrators, College & University Campus Safety Specialty Tract will offer attendees the unparalleled opportunity to not only attend their specialized training but all other conference general sessions, breakout sessions, networking receptions, pre-conference trainings, and exhibit hall. This unique opportunity will allow professionals, dealing with school safety from education, law enforcement, and security on all levels, to learn in a cooperative environment from world class instructors and each other.

### **Advanced School Resource Officer Certification Free To All Conference Registrants**

The National School Safety Conference will again offer the opportunity for School Resource Officers to receive their Advanced School Resource Officer Certification during the conference. The certification will not require you to attend a separate class but only to attend specific courses during the conference to receive your certification. There is no additional fee once you are registered and anyone wishing to receive their certification should mark the appropriate box on their online registration form.

### **Pre-Conference Sessions Free To All Conference Registrants**

than anyone in the industry to address the budgets and specific needs of your schools.

Visit LobbyGuard at the National School Safety Conference or online at [www.LOBBYGUARD.com](http://www.LOBBYGUARD.com)

## Visitor Management remains Crucial in overall School Safety Strategy

Curtis S. Lavarello, Executive Director SSAC

Time after time while conducting a campus safety assessment, our teams will be asked the question, what is the single most important strategy for reducing the potential for a major school safety breach. And while we remain convinced that there is no single item that stands out ahead of the other issues of importance, there certainly are some of those basic items that in today's day, should be routine in terms of keeping staff and students safe. Without a doubt, a key strategy, or item, should be a functional, easy to use, visitor management system.

The management of who comes and goes at a school seems like such a basic strategy, yet in many of our assessments, we see schools that don't make visitor management a priority, or lack any real management of visitors at all.

Over the past several years the presence of visitor management products and enhanced visitor policies has become the "next wave" of school security. Following the large-scale adaptation of cameras, DVR, and access control systems, schools all over the country are rapidly addressing policies surrounding visitors to the school: who is allowed in the school? Who should be stopped or prevented from entering? What information do we need from each visitor? What's the best way to address custody issues, student late arrival/early dismissal and volunteer hours? What about visitor badges? Can we do all this without creating a line of visitors at the front office each morning? Developing and understanding the Best Practices in this emerging area can be difficult at best, and the large number of school visitor management products that are available to meet this new demand can make that task all the more daunting.

We continue to see schools that are still operating in the old sign in/sign out sheets for visitors, which as many of us know, just isn't doing a great job of safeguarding our children and staff. I often say when I speak at conferences and conventions, that even Walt Disney World made visitor management a priority and they are the "Happiest Place on Earth", yet its a reminder that times have changed and schools MUST adapt to that change.

At this year's National School Safety Conference, SSAC is pleased to have Mr. Kevin Allen, joining us from LobbyGuard to discuss best practices for Visitor Management. LobbyGuard will also be host of the "Welcome to Key West" Poolside Reception at the Conference, which will feature live entertainment, incredible Key West Cuisine, Key West Drinks and the opportunity to network with over 800 of your peers from across the globe.

## National School Safety Leadership Academy - Palm Springs, CA

## About the National School Safety Leadership Academy

Be among the first graduates of the prestigious 1st session of the National School Safety Leadership Academy. The Leadership Academy is a professional development course for U.S. and International Law Enforcement and Educational leaders. The goal of the Academy is to improve the administration of overall school safety strategies and districts and schools at home and abroad and to assure that school safety is a priority in the overall educational process. The Leadership Academy seeks to develop a new breed of school safety professional that "creatively and courageously" propels learning in the schools and communities they lead.

The mission is to support, promote, and enhance the personal and professional development of School Safety leaders by preparing them for complex, dynamic, and contemporary challenges they face in keeping our children and schools safe.

It is highly recommended that communities send at least one member from Law Enforcement and another from the school administration team. In addition to nationally accredited trainers and speakers that will provide the comprehensive instruction, SSAC will provide ample time to network with your peers across the globe.

### Topics will include:

- Historical aspects of School Safety
- School / Community Collaboration - Best Practices
- Creating / Enhancing your School Safety Protocol
- Understanding the importance of School Safety Assessments
- Homeland Security threats to our Schools
- Selecting the right personnel for the right job
- Creating the perfect Collaborative Memorandum of Understanding between Law Enforcement & Education
- Engaging community partners into the School Safety Process
- School Safety Liability and Legal Considerations

**When:** November 10-11, 2016 (Thursday & Friday)

**Where:** The famed Riviera Resort in Palm Springs  
1600 N. Indian Dr, Palm Springs, California 92262

## Visitor Management remains Crucial in overall School Safety Strategy

Curtis S. Lavarello, Executive Director SSAC

Time after time while conducting a campus safety assessment, our teams will be asked the question, what is the single most important strategy for reducing the potential for a major school safety breach. And while we remain convinced that there is no single item that stands out ahead of the other issues of importance, there certainly are some of those basic items that in today's day, should be routine in terms of keeping staff and students safe. Without a doubt, a key strategy, or item, should be a functional, easy to use, visitor management system.

The management of who comes and goes at a school seems like such a basic strategy, yet in many of our assessments, we see schools that don't make visitor management a priority, or lack any real management of visitors at all.

Over the past several years the presence of visitor management products and enhanced visitor policies has become the "next wave" of school security. Following the large-scale adaptation of cameras, DVR, and access control systems, schools all over the country are rapidly addressing policies surrounding visitors to the school: who is allowed in the school? Who should be stopped or prevented from entering? What information do we need from each visitor? What's the best way to address custody issues, student late arrival/early dismissal and volunteer hours? What about visitor badges? Can we do all this without creating a line of visitors at the front office each morning? Developing and understanding the Best Practices in this emerging area can be difficult at best, and the large number of school visitor management products that are available to meet this new demand can make that task all the more daunting.

We continue to see schools that are still operating in the old sign in/sign out sheets for visitors, which as many of us know, just isn't doing a great job of safeguarding our children and staff. I often say when I speak at conferences and conventions, that even Walt Disney World made visitor management a priority and they are the "Happiest Place on Earth", yet its a reminder that times have changed and schools MUST adapt to that change.

At this year's National School Safety Conference, SSAC is pleased to have Mr. Kevin Allen, joining us from LobbyGuard to discuss best practices for Visitor Management. LobbyGuard will also be host of the "Welcome to Key West" Poolside Reception at the Conference, which will feature live entertainment, incredible Key West Cuisine, Key West Drinks and the opportunity to network with over 800 of your peers from across the globe.

## National School Safety Leadership Academy - Palm Springs, CA

## About the National School Safety Leadership Academy

Be among the first graduates of the prestigious 1st session of the National School Safety Leadership Academy. The Leadership Academy is a professional development course for U.S. and International Law Enforcement and Educational leaders. The goal of the Academy is to improve the administration of overall school safety strategies and districts and schools at home and abroad and to assure that school safety is a priority in the overall educational process. The Leadership Academy seeks to develop a new breed of school safety professional that "creatively and courageously" propels learning in the schools and communities they lead.

The mission is to support, promote, and enhance the personal and professional development of School Safety leaders by preparing them for complex, dynamic, and contemporary challenges they face in keeping our children and schools safe.

It is highly recommended that communities send at least one member from Law Enforcement and another from the school administration team. In addition to nationally accredited trainers and speakers that will provide the comprehensive instruction, SSAC will provide ample time to network with your peers across the globe.

### Topics will include:

- Historical aspects of School Safety
- School / Community Collaboration - Best Practices
- Creating / Enhancing your School Safety Protocol
- Understanding the importance of School Safety Assessments
- Homeland Security threats to our Schools
- Selecting the right personnel for the right job
- Creating the perfect Collaborative Memorandum of Understanding between Law Enforcement & Education
- Engaging community partners into the School Safety Process
- School Safety Liability and Legal Considerations

**When:** November 10-11, 2016 (Thursday & Friday)

**Where:** The famed Riviera Resort in Palm Springs  
1600 N. Indian Dr, Palm Springs, California 92262

## Visitor Management remains Crucial in overall School Safety Strategy

Curtis S. Lavarello, Executive Director SSAC

Time after time while conducting a campus safety assessment, our teams will be asked the question, what is the single most important strategy for reducing the potential for a major school safety breach. And while we remain convinced that there is no single item that stands out ahead of the other issues of importance, there certainly are some of those basic items that in today's day, should be routine in terms of keeping staff and students safe. Without a doubt, a key strategy, or item, should be a functional, easy to use, visitor management system.

The management of who comes and goes at a school seems like such a basic strategy, yet in many of our assessments, we see schools that don't make visitor management a priority, or lack any real management of visitors at all.

Over the past several years the presence of visitor management products and enhanced visitor policies has become the "next wave" of school security. Following the large-scale adaptation of cameras, DVR, and access control systems, schools all over the country are rapidly addressing policies surrounding visitors to the school: who is allowed in the school? Who should be stopped or prevented from entering? What information do we need from each visitor? What's the best way to address custody issues, student late arrival/early dismissal and volunteer hours? What about visitor badges? Can we do all this without creating a line of visitors at the front office each morning? Developing and understanding the Best Practices in this emerging area can be difficult at best, and the large number of school visitor management products that are available to meet this new demand can make that task all the more daunting.

We continue to see schools that are still operating in the old sign in/sign out sheets for visitors, which as many of us know, just isn't doing a great job of safeguarding our children and staff. I often say when I speak at conferences and conventions, that even Walt Disney World made visitor management a priority and they are the "Happiest Place on Earth", yet its a reminder that times have changed and schools MUST adapt to that change.

At this year's National School Safety Conference, SSAC is pleased to have Mr. Kevin Allen, joining us from LobbyGuard to discuss best practices for Visitor Management. LobbyGuard will also be host of the "Welcome to Key West" Poolside Reception at the Conference, which will feature live entertainment, incredible Key West Cuisine, Key West Drinks and the opportunity to network with over 800 of your peers from across the globe.

## National School Safety Leadership Academy - Palm Springs, CA

## About the National School Safety Leadership Academy

Be among the first graduates of the prestigious 1st session of the National School Safety Leadership Academy. The Leadership Academy is a professional development course for U.S. and International Law Enforcement and Educational leaders. The goal of the Academy is to improve the administration of overall school safety strategies and districts and schools at home and abroad and to assure that school safety is a priority in the overall educational process. The Leadership Academy seeks to develop a new breed of school safety professional that "creatively and courageously" propels learning in the schools and communities they lead.

The mission is to support, promote, and enhance the personal and professional development of School Safety leaders by preparing them for complex, dynamic, and contemporary challenges they face in keeping our children and schools safe.

It is highly recommended that communities send at least one member from Law Enforcement and another from the school administration team. In addition to nationally accredited trainers and speakers that will provide the comprehensive instruction, SSAC will provide ample time to network with your peers across the globe.

### Topics will include:

- Historical aspects of School Safety
- School / Community Collaboration - Best Practices
- Creating / Enhancing your School Safety Protocol
- Understanding the importance of School Safety Assessments
- Homeland Security threats to our Schools
- Selecting the right personnel for the right job
- Creating the perfect Collaborative Memorandum of Understanding between Law Enforcement & Education
- Engaging community partners into the School Safety Process
- School Safety Liability and Legal Considerations

**When:** November 10-11, 2016 (Thursday & Friday)

**Where:** The famed Riviera Resort in Palm Springs  
1600 N. Indian Dr, Palm Springs, California 92262

---

## 2016 National School Safety Awards

Nominations for the 2016 National School Safety Awards are now being accepted online at [www.SchoolSafety911.org](http://www.SchoolSafety911.org). Nominations will be accepted through June 15th, 2016. Winners will be recognized at the 2016 National School Safety Conference in Orlando this July. Download the nomination for by clicking here:

## Visitor Management remains Crucial in overall School Safety Strategy

Curtis S. Lavarello, Executive Director SSAC

Time after time while conducting a campus safety assessment, our teams will be asked the question, what is the single most important strategy for reducing the potential for a major school safety breach. And while we remain convinced that there is no single item that stands out ahead of the other issues of importance, there certainly are some of those basic items that in today's day, should be routine in terms of keeping staff and students safe. Without a doubt, a key strategy, or item, should be a functional, easy to use, visitor management system.

The management of who comes and goes at a school seems like such a basic strategy, yet in many of our assessments, we see schools that don't make visitor management a priority, or lack any real management of visitors at all.

Over the past several years the presence of visitor management products and enhanced visitor policies has become the "next wave" of school security. Following the large-scale adaptation of cameras, DVR, and access control systems, schools all over the country are rapidly addressing policies surrounding visitors to the school: who is allowed in the school? Who should be stopped or prevented from entering? What information do we need from each visitor? What's the best way to address custody issues, student late arrival/early dismissal and volunteer hours? What about visitor badges? Can we do all this without creating a line of visitors at the front office each morning? Developing and understanding the Best Practices in this emerging area can be difficult at best, and the large number of school visitor management products that are available to meet this new demand can make that task all the more daunting.

We continue to see schools that are still operating in the old sign in/sign out sheets for visitors, which as many of us know, just isn't doing a great job of safeguarding our children and staff. I often say when I speak at conferences and conventions, that even Walt Disney World made visitor management a priority and they are the "Happiest Place on Earth", yet its a reminder that times have changed and schools MUST adapt to that change.

At this year's National School Safety Conference, SSAC is pleased to have Mr. Kevin Allen, joining us from LobbyGuard to discuss best practices for Visitor Management. LobbyGuard will also be host of the "Welcome to Key West" Poolside Reception at the Conference, which will feature live entertainment, incredible Key West Cuisine, Key West Drinks and the opportunity to network with over 800 of your peers from across the globe.

## Visitor Management remains Crucial in overall School Safety Strategy

Curtis S. Lavarello, Executive Director SSAC

Time after time while conducting a campus safety assessment, our teams will be asked the question, what is the single most important strategy for reducing the potential for a major school safety breach. And while we remain convinced that there is no single item that stands out ahead of the other issues of importance, there certainly are some of those basic items that in today's day, should be routine in terms of keeping staff and students safe. Without a doubt, a key strategy, or item, should be a functional, easy to use, visitor management system.

The management of who comes and goes at a school seems like such a basic strategy, yet in many of our assessments, we see schools that don't make visitor management a priority, or lack any real management of visitors at all.

Over the past several years the presence of visitor management products and enhanced visitor policies has become the "next wave" of school security. Following the large-scale adaptation of cameras, DVR, and access control systems, schools all over the country are rapidly addressing policies surrounding visitors to the school: who is allowed in the school? Who should be stopped or prevented from entering? What information do we need from each visitor? What's the best way to address custody issues, student late arrival/early dismissal and volunteer hours? What about visitor badges? Can we do all this without creating a line of visitors at the front office each morning? Developing and understanding the Best Practices in this emerging area can be difficult at best, and the large number of school visitor management products that are available to meet this new demand can make that task all the more daunting.

We continue to see schools that are still operating in the old sign in/sign out sheets for visitors, which as many of us know, just isn't doing a great job of safeguarding our children and staff. I often say when I speak at conferences and conventions, that even Walt Disney World made visitor management a priority and they are the "Happiest Place on Earth", yet its a reminder that times have changed and schools MUST adapt to that change.

At this year's National School Safety Conference, SSAC is pleased to have Mr. Kevin Allen, joining us from LobbyGuard to discuss best practices for Visitor Management. LobbyGuard will also be host of the "Welcome to Key West" Poolside Reception at the Conference, which will feature live entertainment, incredible Key West Cuisine, Key West Drinks and the opportunity to network with over 800 of your peers from across the globe.

## National School Safety Leadership Academy - Palm Springs, CA

## About the National School Safety Leadership Academy

Be among the first graduates of the prestigious 1st session of the National School Safety Leadership Academy. The Leadership Academy is a professional development course for U.S. and International Law Enforcement and Educational leaders. The goal of the Academy is to improve the administration of overall school safety strategies and districts and schools at home and abroad and to assure that school safety is a priority in the overall educational process. The Leadership Academy seeks to develop a new breed of school safety professional that "creatively and courageously" propels learning in the schools and communities they lead.

The mission is to support, promote, and enhance the personal and professional development of School Safety leaders by preparing them for complex, dynamic, and contemporary challenges they face in keeping our children and schools safe.

It is highly recommended that communities send at least one member from Law Enforcement and another from the school administration team. In addition to nationally accredited trainers and speakers that will provide the comprehensive instruction, SSAC will provide ample time to network with your peers across the globe.

### Topics will include:

- Historical aspects of School Safety
- School / Community Collaboration - Best Practices
- Creating / Enhancing your School Safety Protocol
- Understanding the importance of School Safety Assessments
- Homeland Security threats to our Schools
- Selecting the right personnel for the right job
- Creating the perfect Collaborative Memorandum of Understanding between Law Enforcement & Education
- Engaging community partners into the School Safety Process
- School Safety Liability and Legal Considerations

**When:** November 10-11, 2016 (Thursday & Friday)

**Where:** The famed Riviera Resort in Palm Springs  
1600 N. Indian Dr, Palm Springs, California 92262

Curtis S. Lavarello, Executive Director SSAC

Time after time while conducting a campus safety assessment, our teams will be asked the question, what is the single most important strategy for reducing the potential for a major school safety breach. And while we remain convinced that there is no single item that stands out ahead of the other issues of importance, there certainly are some of those basic items that in today's day, should be routine in terms of keeping staff and students safe. Without a doubt, a key strategy, or item, should be a functional, easy to use, visitor management system.

The management of who comes and goes at a school seems like such a basic strategy, yet in many of our assessments, we see schools that don't make visitor management a priority, or lack any real management of visitors at all.

Over the past several years the presence of visitor management products and enhanced visitor policies has become the "next wave" of school security. Following the large-scale adaptation of cameras, DVR, and access control systems, schools all over the country are rapidly addressing policies surrounding visitors to the school: who is allowed in the school? Who should be stopped or prevented from entering? What information do we need from each visitor? What's the best way to address custody issues, student late arrival/early dismissal and volunteer hours? What about visitor badges? Can we do all this without creating a line of visitors at the front office each morning? Developing and understanding the Best Practices in this emerging area can be difficult at best, and the large number of school visitor management products that are available to meet this new demand can make that task all the more daunting.

We continue to see schools that are still operating in the old sign in/sign out sheets for visitors, which as many of us know, just isn't doing a great job of safeguarding our children and staff. I often say when I speak at conferences and conventions, that even Walt Disney World made visitor management a priority and they are the "Happiest Place on Earth", yet its a reminder that times have changed and schools MUST adapt to that change.

At this year's National School Safety Conference, SSAC is pleased to have Mr. Kevin Allen, joining us from LobbyGuard to discuss best practices for Visitor Management. LobbyGuard will also be host of the "Welcome to Key West" Poolside Reception at the Conference, which will feature live entertainment, incredible Key West Cuisine, Key West Drinks and the opportunity to network with over 800 of your peers from across the globe.

## National School Safety Leadership Academy - Palm Springs, CA

## About the National School Safety Leadership Academy

Be among the first graduates of the prestigious 1st session of the National School Safety Leadership Academy. The Leadership Academy is a professional development course for U.S. and International Law Enforcement and Educational leaders. The goal of the Academy is to improve the administration of overall school safety strategies and districts and schools at home and abroad and to assure that school safety is a priority in the overall educational process. The Leadership Academy seeks to develop a new breed of school safety professional that "creatively and courageously" propels learning in the schools and communities they lead.

The mission is to support, promote, and enhance the personal and professional development of School Safety leaders by preparing them for complex, dynamic, and contemporary challenges they face in keeping our children and schools safe.

It is highly recommended that communities send at least one member from Law Enforcement and another from the school administration team. In addition to nationally accredited trainers and speakers that will provide the comprehensive instruction, SSAC will provide ample time to network with your peers across the globe.

### Topics will include:

- Historical aspects of School Safety
- School / Community Collaboration - Best Practices
- Creating / Enhancing your School Safety Protocol
- Understanding the importance of School Safety Assessments
- Homeland Security threats to our Schools
- Selecting the right personnel for the right job
- Creating the perfect Collaborative Memorandum of Understanding between Law Enforcement & Education
- Engaging community partners into the School Safety Process
- School Safety Liability and Legal Considerations

**When:** November 10-11, 2016 (Thursday & Friday)

**Where:** The famed Riviera Resort in Palm Springs  
1600 N. Indian Dr, Palm Springs, California 92262

## TOP STORY

### Seven Superior Steps

By Pan Kamal

Today's instant economy requires that more of a company's business processes be open to external stakeholders. Employees, contractors, vendors, partners, service providers and visitors all need access to particular assets, facilities and resources within the enterprise. But how much access is too much? And, if granted, how much risk is the company taking? To ensure that commercial transactions and internal operations remain up and running at all times, successful and secure enterprises track the individuals in each of these classes as identities.

## [Six Ways Banks Are Fighting Fraud with Video Based Business Intelligence](#)

**By Debi Sumner**

Every year, banks and credit unions suffer millions of dollars in losses from fraudulent activities like the use of lost or stolen debit cards, the passing of counterfeit checks, and fraud against bank deposit accounts. In fact, the American Bankers Association estimates that the latter crime cost the industry \$1.9 billion in losses in 2014 alone (2015 ABA Deposit Account Fraud Survey).

## [Upcoming Webinar: What's the future of Identity? Understanding how we will create, manage and use trusted identities in the future](#)

When you see the word "identity" what comes to mind? Seems like a simple concept but it is actually quite complicated. Is it a physical item, like a passport or driver's license? Is it a virtual item, like a system login or user ID? Is it changeable or is it fixed? Or is identity all of these things? In the physical security world many people use the word "identity" but the meaning may vary. If we don't all have a common understanding of what identity means, how can we understand how to manage the numerous types of identities utilizing our facilities on a daily basis? Why does this matter? Why does the world need trusted identities? Join us for this free, one-hour Webinar on Thursday, April 14.

[Gavin Myers](#)

In our finance class we have recently discussed our counties new all-school tech push with providing every school with at least a 1:3 iPad to student ratio. I had question regarding how other school systems have held standards and pushed student privacy and safety.

The National Technology Education Plan talks about how there is more of a technology push because cost is down and capability of tech is up. A relative issue with more technology is more unsupervised and inappropriate use. The amount of research and internet use can lead to a problem with protecting student privacy along with teacher and parent privacy among the world. If your school system, or know of a school system that has implemented technology for more than a 2:1 ratio, how have they protected their student's privacy on a school wide level? Has this protection and awareness been on an individual school or a school system level?

Thank you for your informative post on implementing 1:1 iPads in your schools. A couple other questions I have; Does every school have a person who is responsible for repairs and troubleshooting? Also who pays for these services?

Brian,

I posted a similar question a few days ago and was curious if you could lend your expertise with your experiences with the changes in school policy. You have already spoken to where you get your funding but with the increase in school shootings and other activities that are going on in and near the schools how has your school's safety policy changed? How you you train the staff?

With the recent school shooting in Ohio are you concerned that there could be a copy-cat shooting and how do you anticipate a problem?

Thank you so much for taking your time to answer our questions for our assignment.

Stacey

From: Brian Moore  
Subject: School Safety and Security: Graduate Course Assignment

Great question Tyler! There are quite a few funding sources out there and they can be used for a ton of different possibilities. We used a Department of Justice COPS Grant to secure matching funding for access control and security cameras. COPS grants can also be used for contracting School Resource Officers from your local Police Department (just remember they are usually matching grants and they have a two to three year life, plus they have to be for law enforcement, not armed security guards etc.) There used to be REMS grants through the US DOE for Readiness Emergency Management. These grants were used to create a new emergency response plan for your District as well as to train employees. The only caveat was it had to be training them up to the National Incident Management System or NIMS level. Not that hard to achieve.

In our state we contracted with Safe Plans to create an online portal and gave access to every District in Delaware. The online portal uses information from a statewide emergency response plan for schools that we wrote five years ago and includes training modules to make it easier for school staff to have access to and to learn the materials.

Typically you only have a few areas to address safety and security:

- Physical security (access control, camera systems, electronic visitor management)
- Emergency Planning (actual emergency response plan and tools used for incident management)
- Staffing (School resource officers, constables or other public safety or security personnel)
- Training (behavior training such as awareness programs or Run, Hide, Fight)

I am sure there are more but based on my experience these are the keys and most can fit within one of the categories. Feel free to reach out if I can be of any assistance!

All the best,

Brian

(The ASBO resident cop with a calculator!)

### The Importance of Youth Suicide Awareness and Prevention

sad girl

Last month, one 15-year-old girl in Glendale, Arizona [fatally shot](#) another student and then killed herself in a tragic murder-suicide. Recently, "suicide pacts" or "games" on social media encouraging children to harm themselves are making [headlines](#) and sparking concern throughout communities.

Suicide is the leading cause of death

## Management

Manage your chemical inventory lists and SDSs in our affordable and easily-accessible system. Also compliant with GHS.

among children aged 14 and younger and suicide rates among 10 to 14 year olds have increased over 50% in the last 30 years. And, according to a study by the American Association of Suicidology, suicide was the third leading cause of death for those aged 15 to 24.

However, tragedies like these can be prevented through proper education and awareness. At Scenario Learning, we're committed to the safety and well-being of your students. That's why SafeSchools Training offers a variety of expert-authored courses to help staff identify, address, and prevent suicide, as well as forms of bullying:

1. [Bullying: Recognition & Response](#)
2. [Bullying: Recognition & Response \(Refresher\)](#)
3. [Dating Violence: Identification & Prevention](#)
4. [Making Schools Safe for LGBT Students](#)
5. [Online Safety: Cyberbullying](#)
6. [Student Mental Health](#)
7. [Youth Suicide: Awareness & Prevention](#)
8. [Youth Suicide: Awareness & Prevention \(Jason Flatt Act\)](#)

State specific versions of our *Bullying: Recognition & Response* course are available for AZ, IN, NJ, OH, OR, and WA.

To find out how SafeSchools Training can help your district's prevention efforts, call 1-800-434-0154 or email [info@safeschools.com](mailto:info@safeschools.com) today.

## Autism Awareness

***"Every student can learn, just not on the same day, or the same way."***

**- George Evans**

Did you know that more than 3.5 million Americans live with an autism spectrum disorder? And, lifelong costs of living with an autism spectrum disorder can be reduced by over 60% with early diagnosis and intervention.\* April is Autism Awareness Month and a great time to promote inclusion within your school community.

Does your staff know how to support students affected with Autism? That's one of the reasons why we developed [Exceptional Child](#), our online professional development system that delivers evidence-based Special Education-related training to all staff that

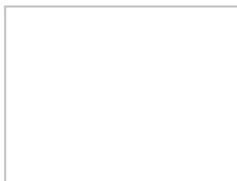

support your students with exceptionalities. What makes the system so unique is that every training is written by the nation's leading Special Education experts, including Carol Gray, Andy Bondy, Tim Lewis, and many more. Now you can access their collective experience and expertise in one convenient online system. Administrators can also easily assign, track, and report on training completions as well as customize courses to meet district-specific needs. Course categories include ADHD, Autism, Behavior, Co-Teaching, Dyslexia, Bullying, IEP Process, Transition, Special Education Law, and more.

To learn more about how the Exceptional Child System can help you easily train all of your staff on important Special Education-related topics, please contact us at [info@exceptionalchild.com](mailto:info@exceptionalchild.com) or 1-800-434-0154 today. **We will also be at the CEC National Convention in St. Louis, Missouri, next month, so stop by our booth #1014.**

\*Autism-Society.org

## National Poison Prevention Week

□

The U.S. Congress established National Poison Prevention Week to help promote poison prevention across the U.S. since over two million poisonings are reported each year. This year it is March 20-26.

### What can your school do?

[PoisonPrevention.org](http://PoisonPrevention.org) has posters, tips, videos, and many more resources for your staff to help promote poison prevention at school.

[SafeSchools SDS](#) is also a great resource to help prevent poisoning incidents from occurring at school because the online system lets you organize, update, and store chemical inventory lists and SDSs into virtual binders. You can print out these online binders as well as secondary container labels and location fliers that include important hazard warnings specific to the contents. The powerful search feature allows you to quickly find a specific SDS in case of an emergency. Our system is also compliant with the 2012 Globally Harmonized System of Classification and Labeling of Chemicals (GHS). **By June 1 of this year all districts must be fully compliant with these chemical classification guidelines.**

*"Having remote access to our Safety Data Sheets helped us save the life of a student who had ingested a hazardous chemical."*  
Kelly Breeding, Director of EHS at Fayette County Schools in Kentucky.

We also offer two courses from our SafeSchools Training program, [Hazard Communications: Right to Understand](#) and [Safety Data Sheets \(SDS\)](#) to help train your staff on the handling of hazardous chemicals.

For a demonstration or free trial of these programs, contact us today at 1-800-434-0154 or [info@safeschools.com](mailto:info@safeschools.com).

## New Partnership: VACORP

---

We're proud to announce our new partnership with the Virginia Association of Counties Group Self Insurance Risk Pool (VACORP). Through this partnership, members now have complimentary access to the SafeSchools Online Staff Training System and a suite of 10 courses covering important safety topics. Members have the option to upgrade to our entire Course Library with hundreds of expert-authored courses, at a discounted rate.

If you're a VACORP member, contact us at 1-800-434-0154 or [info@safeschools.com](mailto:info@safeschools.com) to get started with SafeSchools Training today! We look forward to working with you.

## Visit Us in Person!

---

Throughout the year, you can find our staff at various trade shows, conferences, and education-related events across the country. Look for the SafeSchools booth this month at the following event:

Utah Public Education Human Resource Association (UPEHRA)  
3/30-3/31, St. George, UT

## Autism Awareness

***"Every student can learn, just not on the same day, or the same way."***

**- George Evans**

Did you know that more than 3.5 million Americans live with an autism spectrum disorder? And, lifelong costs of living with an autism spectrum disorder can be reduced by over 60% with early diagnosis and intervention.\* April is Autism Awareness Month and a great time to promote inclusion within your school community.

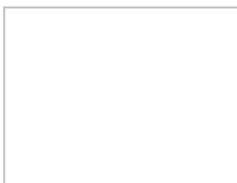

Does your staff know how to support students affected with Autism? That's one of the reasons why we developed [Exceptional Child](#), our online professional development system that delivers evidence-based Special Education-related training to all staff that support your students with exceptionalities. What makes the system so unique is that every training is written by the nation's leading Special Education experts, including Carol Gray, Andy Bondy, Tim Lewis, and many more. Now you can access their collective experience and expertise in one convenient online system. Administrators can also easily assign, track, and report on training completions as well as customize courses to meet district-specific needs. Course categories include ADHD, Autism, Behavior, Co-Teaching, Dyslexia, Bullying, IEP Process, Transition, Special Education Law, and more.

To learn more about how the Exceptional Child System can help you easily train all of your staff on important Special Education-related topics, please contact us at [info@exceptionalchild.com](mailto:info@exceptionalchild.com) or 1-800-434-0154 today. **We will also be at the CEC National Convention in St. Louis, Missouri, next month, so stop by our booth #1014.**

\*Autism-Society.org

## National Poison Prevention Week

The U.S. Congress established National Poison Prevention Week to help promote poison prevention across the U.S. since over two million poisonings are reported each year. This year it is March 20-26.

### What can your school do?

[PoisonPrevention.org](http://PoisonPrevention.org) has posters, tips, videos, and many more resources for your staff to help promote poison prevention at school.

[SafeSchools SDS](#) is also a great resource to help prevent poisoning incidents from occurring at school because the online system lets you organize, update, and store chemical inventory lists and SDSs into virtual binders. You can print out these online binders as well as secondary container labels and location fliers that include important hazard warnings specific to the contents. The powerful search feature allows you to quickly find a specific SDS in case of an emergency. Our system is also compliant with the 2012 Globally Harmonized System of Classification and Labeling of Chemicals (GHS). **By June 1 of this year all districts must be fully compliant with these chemical classification guidelines.**

*"Having remote access to our Safety Data Sheets helped us save the life of a student who had ingested a hazardous chemical."*  
Kelly Breeding, Director of EHS at Fayette County Schools in Kentucky.

We also offer two courses from our SafeSchools Training program, [Hazard Communications: Right to Understand](#) and [Safety Data Sheets \(SDS\)](#) to help train your staff on the handling of hazardous chemicals.

For a demonstration or free trial of these programs, contact us today at 1-800-434-0154 or [info@safeschools.com](mailto:info@safeschools.com).

## New Partnership: VACORP

We're proud to announce our new partnership with the Virginia Association of Counties Group Self Insurance Risk Pool (VACORP). Through this partnership, members now have complimentary access to the SafeSchools Online Staff Training System and a suite of 10 courses covering important safety topics. Members have the option to upgrade to our entire Course Library with hundreds of expert-authored courses, at a discounted rate.

If you're a VACORP member, contact us at 1-800-434-0154 or [info@safeschools.com](mailto:info@safeschools.com) to get started with SafeSchools Training today! We look forward to working with you.

## Visit Us in Person!

Throughout the year, you can find our staff at various trade shows, conferences, and education-related events across the country. Look for the SafeSchools booth this month at the following event:

Utah Public Education Human Resource Association (UPEHRA)  
3/30-3/31, St. George, UT

Hi All

My role is within the development and growth of business managers for our Western Australia education system. I am currently applying for a research scholarship which will afford me the opportunity to travel overseas to conduct valuable research. The knowledge, experience, ideas and innovation I will bring back will inform improvements and ideas for the betterment of our system.

My research will focus on how other education systems, similar to that of Western Australia, have gone about changing the culture and lifting the profession of the Business Manager in an autonomous education system, demonstrating their value. As part of the application process I am required to nominate what locations I will be travelling to overseas to undertake my research. I definitely want to visit the NCSL/TDA in the U.K. and I am looking for contact names and direction as to what systems or districts I should be focussing on in the USA or other countries.

I will be on holidays in the US in September and will attend the Annual ASBO International Conference, so hopefully I can meet people and make contacts. However my scholarship application is required by May 2016 (before the conference) which requires my itinerary to be included, so If I could get any leads or contacts I would greatly appreciate it.

Regards

[Brian N. Moore](#)

Great question Tyler! There are quite a few funding sources out there and they can be used for a ton of different possibilities. We used a Department of Justice COPS Grant to secure matching funding for access control and security cameras. COPS grants can also be used for contracting School Resource Officers from your local Police Department (just remember they are usually matching grants and they have a two to three year life, plus they have to be for law enforcement, not armed security guards etc.) There used to be REMS grants through the US DOE for Readiness Emergency Management. These grants were used to create a new emergency response plan for your District as well as to train employees. The only caveat was it had to be training them up to the National Incident Management System or NIMS level. Not that hard to achieve.

In our state we contracted with Safe Plans to create an online portal and gave access to every District in Delaware. The online portal uses information from a statewide emergency response plan for schools that we wrote five years ago and includes training modules to make it easier for school staff to have access to and to learn the materials.

Typically you only have a few areas to address safety and security:

- Physical security (access control, camera systems, electronic visitor management)
- Emergency Planning (actual emergency response plan and tools used for incident management)
- Staffing (School resource officers, constables or other public safety or security personnel)
- Training (behavior training such as awareness programs or Run, Hide, Fight)

I am sure there are more but based on my experience these are the keys and most can fit within one of the categories. Feel free to reach out if I can be of any assistance!

All the best,

Brian

Subject: School Safety and Security: Graduate Course Assignment

I am currently enrolled at Frostburg State University in a Public School Finance course. I am interested in learning about different schools views and policies on safety and security. While reading School Business Daily, there is a common theme of additional training for staff and students due to school tragedies, such as Sandy Hook as these events are becoming more popular. I am interesting in finding out how specific schools or districts are using their funds for school safety and security. Also, specifically what policies do you have in place to prepare or prevent a school tragedy from happening? I would appreciate any feedback and look forward to learning more.

I like the approach your district has taken in regards to flexibility of scheduling. You mentioned that the extra 4 hours was "negotiated." I am taking this as it is in the contract language. What happens in your district when a teacher has to miss these extra 4 hours? How do you hold them accountable for these sessions?

From: Matthew Przywara

Subject: Professional Development Scheduling

We negotiated an additional 4 hours per month for all teachers to do professional development. Each building sets their own time schedule either before or after school (or Saturday). The schedule is set by the faculty council and the principal sets the agenda. Teachers can then differentiate by different topics or content specific to work on what is needed. Many groups of teachers have been building in instructional technology as a main topic of consideration.

They must do time in increments of no less than 30 minute sessions. We also have 1 day per month where school is released early to have additional PD time, where instructional technology sessions are held throughout the district. The key is to build time into the work year where possible.

Let me know if you need more information.

[Duane Frund](#)

Thank you, Kirk, for your response. I am not involved in the decision making, as it is happening at the county level. I am in a relatively small K-5 school with 185 students. We have tried to be creative with PD scheduling separate from the county decisions, but our special teachers are only with us part time. This adds a whole new dynamic challenge that we have yet to overcome in regards to consistency.

Subject: Professional Development Scheduling

Duane:

I'm sure we are a much smaller district than you but we had a similar problem. We adjusted some Wednesday's so that the special classes (art, music, pe, etc) were in the afternoon. We then had PD for the core teachers in the afternoon's of those days. Changing the school day causes problems for parents (day care schedules, getting students to school, having students wait on buses, etc.). There were some bumps but it's turned out to be working.

Not sure how that would work in your district but it's an idea.

I like the idea of the 2.5 hour summer institute. I have heard quite a few times from teachers how summer is the best time for them for PD. How does your summer institute work? Who presents? Is it mandatory for teachers?

Our District is a full 1:1. We have since the inception of the program in 2009 provided early release days for students to allow staff dedicated time for training during the regular school work day. Our parents have been very supportive of the early release days. We believed early in our implementation this was essential to a successful launch of the new program. We still use the early release days to continue to provide our staff with quality PD. We also have a Summer Institute that is 2.5 days long to

provide more intensive training.

## NEWS BRIEF

### Annual Assessment Outlines the Greatest Security Threats Facing the U.S.

By Sydney Shepard

Attacks by "homegrown" Islamist extremists are among the most imminent security threats facing the United States in 2016, along with dangers posed overseas by the Islamic State and cybersecurity concerns.

Director of National Intelligence, James Clapper, listed the top threats against the United States in his annual assessment of national security. Clapper warned that fast-moving cyber and technological advances "could lead to widespread vulnerabilities in infrastructure and U.S. government systems."

### [Ahead of the Curve](#)

By Ralph C. Jensen

Thirty years ago, maybe more, the dream of the IP camera was about to make its debut. The technology, as I remember it, wasn't all that well received, but that didn't mean it was a bad idea. It became an exercise of marketing the future to the here and now.

Martin Gren, founder of the IP camera, only saw this as an opportunity to make the new technology better and much more user friendly. In a few short years, the technology moved from a toe hold to a tidal wave of acceptance.

As of last year, Axis Communications is part of the Canon Security team, or at least 85 percent of it, but according to Gren, nothing is going to change, and he plans to keep on working. As you can imagine, he has been approached to sell the company, but chose to stay the course, until Canon came along.

**Subject:** Webinar: Lessons Learned from the Arapahoe High School Shooting: Closing the Gaps in K12 Threat Assessment  
**Date:** Monday, February 22, 2016 at 1:13:24 PM Eastern Standard Time  
**From:** Brittany Havranek  
**To:** pdakin@revere.mec.edu  
**Attachments:** image001.gif

## **Webinar: Lessons Learned from the Arapahoe High School Shooting: Closing the Gaps in K12 Threat Assessment**

February 24, 11:00 CT

[Register here](#)

Last month, investigators released a review of how Arapahoe High School (AHS) and Littleton Public Schools (LPS) officials responded to threats by a student who shot and killed 17-year-old Claire Davis on Dec. 13, 2013. Their report concluded there were missed opportunities that might have prevented the tragedy. Despite the many security measures that were in place to help prevent school violence (SROs, emergency planning committee, integrated security system, visitor management systems, lighting sensors, anonymous tip line, etc.), the school still lacked the tools to proactively prevent this incident from occurring.

Webinar will discuss the major findings and gaps identified in the report, including:

- Was there a failure to share information between the school and local law enforcement/SROs?
- Did the fear of violating FERPA block critical information from being shared and connected?
- Did the school lack effective threat assessment processes and a multi-disciplinary threat assessment team?
- Was inadequate staff and student training on how to identify and report concerning behaviors to blame?
- Did administrators fail to hold assigned staff accountable for continued monitoring and follow-up of the at-risk student?

Awareity's prevention specialist, Rick Shaw, will review the key findings of the investigative report and share critical strategies and next steps for schools who want to improve their ongoing threat assessment and prevention capabilities. Viewers will also receive a sneak peek of Awareity's award-winning TIPS prevention platform.

Is your school making any of these same mistakes and putting your students and staff/faculty at risk?

[Click here](#) to attend the live webinar – seating is limited so reserve your space today!

## **Webinar: Reports Released from the Arapahoe High School Shooting – Is Your School Making the Same Mistakes?**

February 24, 11:00 CT

[Register here](#)

**Remember the Arapahoe High School Shooting? Did you see the recent Reports? Is your school making the same mistakes?**

Last month, investigators released multiple reports of how Arapahoe High School (AHS) and Littleton Public Schools (LPS) officials failed to connect numerous concerning behaviors and indicators of a student who shot and killed 17-year-old Claire Davis on Dec. 13, 2013. Multiple reports concluded there were missed opportunities to intervene and prevent this tragedy...is your school making the same mistakes with your at-risk individuals?

This webinar will explain how traditional and common security measures (SROs, emergency planning committee, integrated security system, visitor management systems, lighting sensors, anonymous tip line, etc.) that most schools have were and are NOT enough. The reports and findings overwhelmingly reveal how AHS (like most schools across the USA) lacked the right tools to proactively prevent an at-risk individual from escalating towards violence...even though pre-incident indicators existed for years.

This webinar will not just review the mistakes and disconnects, Awareness's Prevention Specialist, Rick Shaw, will share groundbreaking strategies and the 6 essential and proven steps that must be achieved to successfully, pro-actively and pre-actively PREVENT incidents, liabilities and tragedies in your school.

**How many of the mistakes and disconnects identified at AHS are common in YOUR school?**

- Inadequate training and awareness for faculty, staff, students and parents on identifying and reporting concerning behaviors (if your school is not receiving hundreds of incident reports...your school could be at risk)
- Failures to share information known by administrators, teachers, counselors, SROs and local law enforcement (if your threat assessment team doesn't know everything your administrators, teachers,

- counselors, SROs, parents and students know...your school could be at risk)
- Lack of awareness of FERPA's guidelines on sharing information and maintaining threat assessment records (if you are maintaining incident reports, threat assessment records, conduct and other safety actions in your Student Information System...your school could be at risk)
  - Lack of an effective multi-disciplinary threat assessment team with processes, training and tools (if you don't have a multi-disciplinary threat assessment team or better yet a community-based threat assessment team...your school could be at risk)
  - Failures to hold assigned staff accountable for continued monitoring and follow-up of the at-risk student/individual (if you don't have a central secure platform to measure and monitor actions and behaviors of at-risk individuals...your school could be at risk)

**Are you interested in learning how leading schools are successfully preventing incidents, liabilities and tragedies?**

**[Click here](#) to attend the live webinar – seating is limited so don't miss out on this valuable webinar and reserve your spot today!**

Thank you,

Brittany Havranek

### 3 Mistakes That Can Derail Your Threat Assessment Process

*If we don't ask ourselves hard questions about our processes, someone's plaintiff attorney will.*

Michael Munger · January 27, 2016 · Campus Safety

"You're the professional. Is this kid a threat or not?" That's the question my director asked, fingers drumming on the athletic calendar drafts stacked on his desk. My waffling response had not provided him the level of confidence he wanted. As with most K-12 threat assessments, clear answers are few, and predictions are reckless. Threat assessments always start and often end with questions.

**Make sure your threat assessment process can actually be executed before you implement it.**

They run against the grain of the comfort for many of us. If the child is a threat, then we take disciplinary action, perhaps

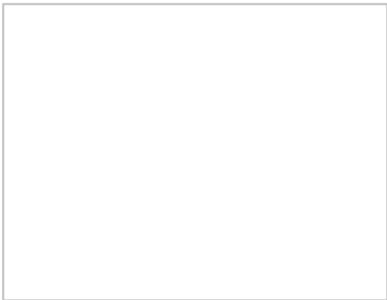

[Follow us on Twitter](#)

[View our videos on YouTube](#)

put together a safety plan and coordinate with law enforcement. If the student is not a threat, we mop our collective brow and return to finish whatever work was sidelined during the investigation. As school safety professionals, if we allow our process to end with a toggle switch conclusion and a binary type of answer, we run the risk of exposing our organizations to excessive liability, as well as our students and staff to ongoing but unmanaged threats.

Several elements of the assessment process itself deserve a deeper level of scrutiny. A well-considered, commonly applied and faithfully-executed process not only makes the initial assessment work better but also helps to protect students, staff and the organization itself from future unmanaged threats. As investigators, we work to solve the, "Is he a threat?" question; as professional assessors, we owe it to our students and to our organization to ask a few other questions as well. We can rest assured that if we don't ask ourselves hard questions about our processes, someone's plaintiff attorney will. [Read More](#)

## Accountability & Incident Management

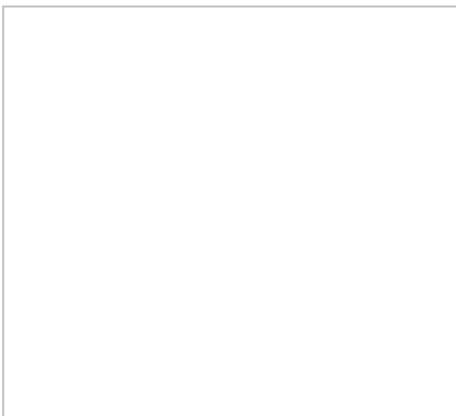

With an accountability system from Higgins, your school can identify, authenticate, track and report on all personnel during emergency situations.

Track a person's qualifications/certifications, location, purpose and time spent on-site.

Improve security and risk management with a [Higgins accountability system](#).

## School, student and visitor tracking system

Maintaining security in today's school environment is becoming ever more challenging. Keeping track of who's late and why, and where students go after they arrive, is never easy. Combined with the unprecedented number of extra-curricular, and security concerns of parents, it's getting harder than ever to figure out exactly where your students are.

That's why it's more important than ever to get [PeopleTrack SM](#) and [SM Mobile](#). SM is specially developed for the K-12 environment, letting you track student activities to give you the clearest picture yet of exactly what's going on in your school. You'll improve safety,

security and student accountability, and have an easily accessible record for future use.

Whether your school is large or small, when students are on the go, you have to be on the go as well. Track students as they move from one activity to another, before-school, after-school or even

off campus.

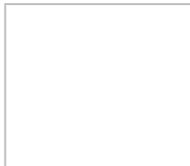

SM Mobile brings the functionality of SM from your desktop PC to a handheld. Whether in school or at sporting events, after-school activities and field trips, principals, hall monitors and security officers can keep attendance or school policy violations current from almost anywhere.

SM is designed to work on a standalone PC in the main office or on multiple workstations connected to a central database on the campus network. Features include:

- Built in Visitor Management system
- Sex offender search
- Family tab with pick up permissions
- Multi-day schedule
- Event tracking

[Download a free 20-day trial version of PeopleTrack SM](#). When the trial period expires, you will be prompted with instruction for obtaining a license key that will activate the full version of PeopleTrack SM.

**Date:** Thursday, January 21, 2016 at 1:49:14 PM Eastern Standard Time  
**From:** Visitor Pass Solutions  
**To:** ameriano@revere.mec.edu

eVisitorPass - easy, economical software.

## Why we developed "eVisitorPass" – and what makes it different

eVisitorPass Visitor Management Software for Schools

After many years of producing visitor badges, we have found that customers get frustrated with two things:

- (1) the **high cost of visitor management software**, and
- (2) having to pay for **features they don't use** or even need.

That is why we developed the proven **eVisitorPass** system. Amazingly affordable and user-friendly, it lets you choose and pay for only the functionality you want and need – nothing more, nothing less. [Learn more](#).

### Limited-time offer

You can start using eVisitorPass for only \$250 ([basic system](#) is regularly \$490).

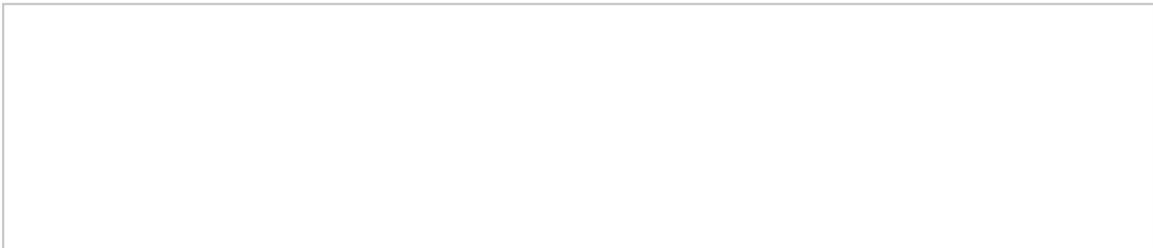

Not ready to buy? Then **see for yourself** what makes eVisitorPass so special, with an [online slide show and in-use video](#). You may also [schedule a live demonstration](#), over the phone, with an eVisitorPass representative. Or you can [try eVisitorPass free for 30 days](#). None of these options costs a thing.

Please let us know what you'd like to do. It's never been easier to get a visitor management system!

Sincerely,

The Education Sales Team

**P.S. Come and see our Visitor Pass Solutions at the 2016 AASA Show (American Association of School Administrators) in Phoenix, AZ from February 11 - 13, 2016. Stop by Booth #931 and talk with Kim.**

**Subject:** Increase safety and accountability with a staff attendance tool

**Date:** Wednesday, January 20, 2016 at 11:38:16 AM Eastern Standard Time

**From:** IDenticard

**To:** jsicuso@revere.mec.edu

This message contains graphics. If you do not see the graphics, [click here to view](#).

Educators focus on student attendance, making it a key part of every school routine. But what about staff attendance?

WhosOnLocation's employee-attendance management feature makes it easy to track the presence and whereabouts of your staff, from office workers to maintenance staff, all from an affordable, secure, cloud-based Visitor Management solution.

At its most basic, employee-attendance management tracks the time in and out of a worker. However, it has a larger use as well: it allows a user to know which employees are on-site and where they're located in case of emergency.

**Easy sign-in/-out** Employees can sign themselves in or out on kiosks or cell phones, or a secretary or security guard can operate the module and process all arriving employees.

**Location tracking** Location status is a built-in field in the module, allowing employees to record their location for easier tracking in case of emergency.

**Detailed reporting** View real-time employee data, export historical data, view attendance graphs and more.

**Multiple options** Access on a smartphone, tablet or a computer. Staff can also "tag" in and out using a smart card or fob with an integrated access control system.

[LEARN MORE](#)

[FREE TRIAL](#)

With WhosOnLocation, you're able to eliminate worries about the status of employees and instead focus on the education of your students. Try WhosOnLocation's employee attendance management feature at your site by getting a [free 30-day trial](#) today!

*This feature combines with WhosOnLocation's web-based Visitor Management software to create a powerful tool for education facilities of all kinds. [Learn more about the program](#) and see a full list of WhosOnLocation features.*

### EDUCATION/TRAINING SERVICES

#### Facility Management Is Changing: 2016 White Paper

Today, the facility manager's role goes well beyond maintenance. He or she must keep up with new codes and standards, learn emerging trends and technologies, and consider new ways to teach new recruits as boomers retire. [Download the white paper, "How Facility Management Is Changing in 2016,"](#) to learn more.

### ACCESS CONTROL

#### EasyLobby Secure Visitor Management

EasyLobby, an HID Global business, automates the entire process of registering a visitor and printing professional badges. Know who's in your buildings and why. Capture detailed visitor information in seconds without typing, create watch lists, allow employees to pre-register guests, and integrate with your access control system. Free online demo. [Click here for more information.](#)

### COMMUNICATIONS EQUIPMENT

#### We Turn Poor Coverage Into Productivity

No matter where, all things connected should perform at their peak. With the Ericsson Radio Dot, you have the power to deliver optimal app coverage for people to take business anywhere. [Click here for more information.](#)

### ENVIRONMENTAL SUSTAINABLE SOLUTIONS & TECHNOLOGIES

#### EasyPak™ Pre-Paid Recycling Containers – [LampRecycling.com](#)

EasyPak™ Containers are a safe and easy way to recycle intact fluorescent bulbs, batteries, ballasts, electronics, and thermostats. One price includes everything you need: UN Certified recycling container, shipping to the recycling center, and recycling fees. Enjoy Online Features including recycling reports, certificates, and more. Call 888-640-6700! [Click here for more information.](#)

## HVAC/IAQ PRODUCTS

### **Fujitsu's Airstage VR-II Heat Recovery System**

Fujitsu's Airstage VR-II is a heat recovery system that allows for simultaneous heating and cooling operation. Energy efficiency doubles when the system provides 50% cooling and 50% heating at the same time. Airstage VR-II provides an efficient heating and cooling solution for your entire building, using advanced controls and simple building management integration. [Click here for more information.](#)

## LIGHTING PRODUCTS & CONTROLS

### **LEDs From Forest Lighting: Affordable Performance**

Forest Lighting manufactures high performance, affordable LED lamps and luminaires for the commercial, industrial, education, retail, and parking markets. With inventory in Atlanta and Houston, Forest Lighting offers customers quick shipment for both retrofit and new construction projects. [Click here for more information.](#)

### **New HyLite High Performance 100W Arc-Cob**

The new 100W HyLite LED Arc-Cob offers energy savings retrofit solutions for 400W HID lamps. Up to 80% energy savings & 60,000 hours of rated life with free surge protection. Directional Illumination with Type III & V distributions makes the HyLite LED Arc-Cob the ideal choice for Street, Area & Flood Lights. [Click here for more information.](#)

## RESTROOMS & PLUMBING

### **Excel Dryer, Inc.**

With a 95% cost savings over paper towels, The XLERATOR high-speed, energy-efficient hand dryer helps facilities around the world save money, reduce their carbon footprint and improve restroom hygiene. XLERATOR is Made In USA Certified and can help qualify for LEED credits. [Click here for more information.](#)

## ROOFING

### **IMETCO's Roof Deck Systems Offer Outstanding Structural Strength**

IMETCO's Perform-A-Deck roof deck systems provide outstanding structural strength, maximum energy efficiency, optimal acoustical value, excellent moisture protection and UL fire rated designs. When integrated with IMETCO's structural roof panel, the system is engineered and tested to resist extreme wind and debris impact. [Click here for more information.](#)

### **Garland Introduces New Innovative Modified Membrane**

Garland's OptiMax™ thermoset polyurethane-modified membrane combines two highly effective waterproofing materials – polyurethane and asphalt – in an “active modification” process involving chemically reacting the polyurethane modifier to specific molecules within the asphalt, providing enhanced long-term performance characteristics and weatherability. For more

information, visit [www.garlandco.com](http://www.garlandco.com).

[ScholarChip - Our Card Does Many Things...](#)

[View this email in your browser](#)

## Consolidating services with one vendor extends your school budget - providing more purchasing power for school safety and student accountability services.

**Begin with the One Card...**a student ID card that can also take attendance (on the bus, at the building entrance and in the classroom).

School safety services can then be added with visitor management, secure door access. Improve operations by using the One Card to buy lunch.

> [Request a Case Study](#) <
