Title: (U) Opening EC

Date: 05/23/2013

From: TAMPA

TP-ORA5

Contact: [REDACTED]

Approved By: SSRA [REDACTED]

Drafted By: [REDACTED]

Case ID #: 89B-TP-2886360

(U) IBRAGIM TODASHEV;

SPECIAL AGENT [REDACTED]

May 22, 2013

Synopsis: (U) The purpose of this EC is to request captioned matter be opened

Full Investigation Initiated: 05/23/2013

Details:

On May 22, 2013, at approximately 12:00am, Special Agent (SA) [REDACTED] [REDACTED] from the Boston office of the Federal Bureau of Investigation and officers from the Massachusetts State Police conducted an interview of Ibragim Todashev at his residence located at [REDACTED] Orlando, Florida. Todashev was known to be aware of the identity of SA [REDACTED] and the other officers, and knew SA [REDACTED] was a lawfully appointed federal law enforcement officer.

While TODASHEV was being interviewed, he physically assaulted SA [REDACTED] and a melee ensued which resulted in SA [REDACTED] fatally shooting Todashev. SA [REDACTED] sustained non-life threatening injuries and was transported to the hospital.

It is requested that the above-captioned matter be opened and assigned to SA [REDACTED] ORA-5.

FEDERAL BUREAU OF INVESTIGATION

Date of entry 05/23/2013

On May 22 and May 23, 2013 an autopsy was conducted on IBRAGIM TODASHEV by District 9's Deputy Chief Medical Examiner, Dr. Gary Utz. Dr. Utz determined that TODASHEV was shot seven (7) times. TODASHEV was shot six (6) times in the torso and one (1) time in the head. Dr. Utz located five (5) bullets in the torso during the autopsy. Dr. Utz believed the bullets in the torso entered from the left side of the body and traveled to the right side of the body in a downward direction. Two (2) of the bullets entered TODASHEV via his left upper arm and continued through to the left side of his chest. Dr. Utz located one (1) bullet in the head and believed the bullet entered the top of skull and traveled in a downward direction. Cause of death of TODASHEV was believed to be via multiple gun shot wounds.

Dr. Utz will finish his formal report and it will be forthcoming the week of May 27, 2013.

FEDERAL BUREAU OF INVESTIGATION

Date of entry 05/28/2013

[redacted] (hereinafter referred to as [redacted], date of birth [redacted], Social Security account number [redacted], telephone number [redacted], was telephonically interviewed by Special Agent [redacted] of the Federal Bureau of Investigation (FBI) on 05/23/2013. After being advised of the identity of the interviewing agent, [redacted] voluntarily provided the following information:

b6
b7C

[redacted] was located [redacted] and had left [redacted] on [redacted]. [redacted] had used telephone number [redacted] for three-to-four years, but the number was subscribed to [redacted] (hereinafter referred to as [redacted]. [redacted] was also located in [redacted] but could not speak on the phone because [redacted] also used phone number [redacted]

b6
b7C

[redacted] knew IBRAGIM TODASHEV (hereinafter referred to as TODASHEV) from Orlando, FL. TODASHEV was in an automobile accident in about April 2012 and afterward was a patient at a chiropractic business in Orlando [redacted]. Outside of a business relationship, [redacted] and TODASHEV [redacted] but were not really friends because TODASHEV was from Chechnya and [redacted] was from [redacted]

b6
b7C

[redacted] last spoke with TODASHEV in mid/late April, 2013. Agent [redacted] informed [redacted] that according to telephone records, TODASHEV last spoke with [redacted] on 04/15/2013 about 1.5 hours before the Boston Marathon bombing occurred. [redacted] did not specifically remember the conversation that he had with TODASHEV on that day. TODASHEV never talked

[REDACTED] to [REDACTED] about the Boston Marathon bombing. TODASHEV never talked to [REDACTED] about [REDACTED] hereinafter referred to as [REDACTED]. [REDACTED] offered that TODASHEV used to live in the Boston, MA area and may have known [REDACTED] since they were both fighters and liked mixed martial arts. TODASHEV did not want to be involved with anything that would get him into trouble; he did not drink alcohol and did not want anything to do with terrorism.

b6
b7C

[REDACTED] had heard that TODASHEV had been shot and killed by the FBI after TODASHEV attacked the agents. [REDACTED] offered that TODASHEV was a person who lost control easily and he probably made some kind of sudden motion that caused the agents to shoot him.

b6
b7C

[REDACTED] asked if the FBI was reviewing TODASHEV's financial records. [REDACTED] explained that TODASHEV received a check for \$4,000 from Traf MGT, Inc. in about February or March 2013 as an insurance payment for the surgery on his knee resulting from the car accident. The owner of Traf MGT, Inc. was a friend of [REDACTED]. TODASHEV's attorney for the car accident was [REDACTED].

b6
b7C

[REDACTED] intended to return to [REDACTED] but he was not sure if he was going to make the trip because he [REDACTED] [REDACTED] his schedule was dependent on [REDACTED]. [REDACTED] was available for re-contact by the FBI as needed.

~~X~~ Re: [redacted] 05/31/2013

[redacted] Orlando, FL 32811). TFO [redacted] was speaking with TODASHEV in his living room. TFO [redacted] observed a large sword hanging perpendicular to the ground in the living room. The sword was located near the stairwell in the living area behind a tall plant. The sword was had a notch taken out of the wooden handle so it could be hung on a nail on the wall.

b6
b7C

While speaking with TODASHEV, I asked TODASHEV if I could look at the sword and he nodded his head affirmatively. I picked up the sword and examined it. It was sharp with writing on the blade. I placed the sword back in the spot that it was after looking at it. [redacted]

CASE SUMMARY

Positively identified 27 y/o male shot multiple times by FBI agents during a case related interview. No other information provided at this time. FBI requesting blood specimen.

CIRCUMSTANCES

FBI agents responded to the decedent's apartment style residence for an arranged case interview. At some point during the interview the FBI agents were physically threatened by the decedent. FBI agents opened fire; decedent sustained multiple gun shot wounds. Decedent was pronounced on scene by Orlando Fire Engine 10 @ 0015. UPDATED 5-22-13 @ 1000 BY INVESTIGATOR [Redacted]. The following was obtained from FBI agent [Redacted].

The incident took place at 0007 on 5-22-13. The FBI agents fired approximately seven times from their glock 23. Agent [Redacted] stated a red stick was found under the decedent and a sword located leaning up against the wall with no fluid stains. The sword was removed prior to my arrival and placed on evidence paper away from the decedent.

OBSERVATIONS

On 5/22/13 at 0205 hours I was contacted by Sgt [redacted] of the Orlando Police Department who advised they were working a homicide scene along with the FBI. Sgt [redacted] could not provide any other information. I arrived on scene to an apartment style residence located on the bottom floor of a two story apartment building. I was advised that the scene was actually an officer involved shooting involving two FBI agents and the decedent during an arranged case interview. I entered the residence in full tyvek, booties, hair net and mask. I took overall photographs of the first floor of the residence to include the decedent who was lying fully clothed in a prone position in the foyer of the residence. The decedent's left arm was tucked under his torso with his right arm resting along his right side with the right palm facing upward. I observed suspected blood on the floor around the decedent's torso, on the back of his shirt and along an opened wound on the left tricep. I photographed a Florida issued driver license removed from a wallet on the kitchen counter by Special Agent [redacted]. At this time I was notified by SA [redacted] that they needed to diagram the interior of the residence and placement of the decedent using a total station system before the OCMEO removed him. SA [redacted] advised she would notify the OCMEO when this was completed so that an investigator could remove the decedent from the scene. I departed the scene at 0314 hours. UPDATED 5-22-13 @ 0730 BY INVESTIGATOR [redacted] who returned to the scene of decedent apartment. The decedent apartment was noted with a bed in the living room area, multiple clothes and shoes. A sword was noted on brown evidence paper. The room temperature was cool, no alcohol, illicit drugs noted. Evidence markers 2,3,4,5,6,7 & 12 were shell casings. FBI agents discovered a projectile in the living room after OCMEO left the scene. The decedent was observed clothed lying on the foyer floor that is covered by carpet. The decedent left side of his face was in contact with the carpeted floor. Multiple shoes were noted around the decedent. A red round stick was located under the decedent and a portion of the stick was noted exposed above his head. Multiple wounds were noted to the decedent. The decedent was cool to touch, complete rigor and lividity was consistent with body position.

b6
b7C

DISPOSITION

The decedent hands and feet were bagged by investigator [redacted] and decedent was placed in a shroud and body bag and was sealed. The decedent arrived back at OCMEO with seal intact.

NARRATIVE ADDENDUM SUMMARY

RA/viewing: The decedent's [redacted] arrived at the OCME at 1300 with [redacted] and the [redacted] of the decedent. I spoke with them in regards to how to make arrangements for the decedent locally so that he could be transported back to Russia for burial. [redacted] filled out a request for a copy of the autopsy report when it is completed in which I gave to records. While speaking with them, Dr. Utz was asked to come into the family room at their request. After speaking with Dr Utz, he gave approval for [redacted] to see the decedent in the viewing room. The decedent was prepared by Inv [redacted]. Dr. Utz and I took the three to the Investigations building to see the decedent. After a few minutes, they were grateful for being allowed to see him. They were scheduled to meet with the funeral home this afternoon. Inv [redacted] placed a call to FBI Agent [redacted] to see if they would be doing major case prints before the decedent was released. Inv [redacted] was told [redacted] would call a supervisor and let him know.

[redacted] was interviewed at the 9th District Medical Examiner's Office located at 2350 East Michigan Street, Orlando, Florida, 32806.

After being advised of the identity of the interviewing Agent and the nature of the interview, [redacted] provided the following information:

SA [redacted] spoke to [redacted] about obtaining photographs taken during IBRAGIM TODASHEV's autopsy. Prior to receiving the photographs, SA [redacted] signed a Request for Autopsy Photographs stating the photographs would not be released to anyone outside the active investigation.

[redacted] provided SA [redacted] a compact disc containing photographs taken during TODASHEV'S autopsy. The compact disc and Request for Autopsy Photographs was placed in a 1A envelope.

with the FBI. I understand the provisions of Florida State Statute, Chapter 406.135 shown below. As part of our investigation of this death, and in accordance with paragraph (3) (b), I am requesting a copy of the District Nine Medical Examiner's autopsy photographs taken during examination. The ME case number is ME13-00623

Todashev, Ibragim
27 Years - M 5/22/2013

406.135 Autopsies; confidentiality of photographs and video and audio recordings; exemption.—

(3)(b) A local governmental entity, or a state or federal agency, in furtherance of its official duties, pursuant to a written request, may view or copy a photograph or video recording or may listen to or copy an audio recording of an autopsy, and unless otherwise required in the performance of their duties, the identity of the deceased shall remain confidential and exempt.

(c) The custodian of the record, or his or her designee, may not permit any other person, except an agent designated in writing by the deceased's surviving relative with whom authority rests to obtain such records, to view or copy such photograph or video recording or listen to or copy an audio recording without a court order.

(6)(a) Any custodian of a photograph or video or audio recording of an autopsy who willfully and knowingly violates this section commits a felony of the third degree.

FEDERAL BUREAU OF INVESTIGATION

Date of entry 07/24/2013

Writer is attempting to reconcile the location of Item 15 in the sketch of [redacted] Orlando, Florida compared to where the item was physically located the night of the search. This is in response to a question from the Inspection Division's Shoot Incident Review Team who noted a difference between the evidentiary sketch of the scene and the photographs taken at the crime scene. Writer spoke to Special Agent [redacted] who was the drawer of the sketch and the following is the reasoning of the discrepancy between the location of item 15 on the sketch and the actual location of item 15:

b6
b7C

A deceased person was located by FBI Evidence Response Team members face down on the floor in the residence in the approximate location depicted in the sketch. Crime scene photographs show the exact location of where the body was lying in the residence. The physical evidence in question, marked Item 15 on the sketch, was found on the floor where the deceased individual's body was lying after the Orange County Medical Examiners (ME) Office personnel turned the body over from the stomach to the back. It is believed that in the process of moving the body, sketch item 15 came dislodged from the torso of the deceased and fell out onto the floor where the body was lying before the ME personnel turned the body over. As the body was being flipped, a large amount of fluids came out of the body and it is believed item 15 came out with the fluids. Item 15 was erroneously marked in the sketch so it appeared it was closer to the middle of the living room area because item 15 was not seen until the body was moved. Item 15 was actual positioned underneath where the body was lying.

Investigation on 05/22/2013 at Orlando, Florida, United States (, Other (Clarify sketch))

Form: 302 (Rev. 5-8-10)

FEDERAL BUREAU OF INVESTIGATION

Date of entry 08/07/2013

On May 23, 2013, the Tampa Division Evidence Response Team processed a scene involving an agent involved shooting at the residence of IBRAGIM TODASHEV. As part of processing the scene, personnel from Florida's District 9 Medical Examiner's Office responded to the scene. In a photograph taken by an investigator with the Medical Examiner's Office, a stack of evidence markers appear outside of the opened front door. The markers in the photo were evidence markers that were to be used to mark evidence items as they were discovered. These markers were not marking a specific item of evidence and were part of the supplies waiting to be used on the scene.

Title: IBRAGIM TODASHEV;
SPECIAL AGENT
May 22, 2013

Date specimens received: August 8, 2013

The FBI Laboratory has received your request for examination. The accompanying items of evidence have been inventoried. The provided listing and description of the submitted items may be subject to change when the examination phase begins. If changes are made, they will be reflected in the Report of Examination issued by the examiner making the change.

Specimens:

THE FOLLOWING ITEMS WERE SUBMITTED TO THE FBI LABORATORY BY FBI TAMPA PER REQUEST OF FBI INSPECTION DIVISION:

Q26 White table (1B32, E03415562)

Q27 Shelf from table (1B33, E03415561)

Each examiner assigned to your request will issue a separate Report of Examination that will address the results of his/her expertise. For technical questions, contact the following unit(s) assigned to your case:

FEDERAL BUREAU OF INVESTIGATION

Date of entry 10/18/2013

On 05/22/2013, the Tampa Division Evidence Response Team (ERT) processed the scene at [redacted] Orlando, FL.

b6
b7C

Prior to moving the body of the deceased for transport to the District 9 Office of the Medical Examiner, the ERT collected EV14 (Broom Stick), which was located underneath the body.

A photograph of the body (Photo #196) was taken prior to members of the ERT handling the body. The ERT then worked alongside [redacted] an Investigator with the Office of the Medical Examiner to partially roll the body off EV14. Members of the ERT stabilized EV14 in place and data points were collected via the Total Station to digitally document the location of EV14. Once the data points were collected, EV14 was removed and placed on brown paper to be further photographed.

b6
b7C

The body of the deceased was then rolled back down in place and photographed again (Photo #197) documenting that EV14 had been removed. The hands and feet were then bagged by the Office of the Medical Examiner. The body was further prepared for removal from the scene by the direction and assistance of the District 9 Office of the Medical Examiner.

Re: Florida Statute, Chapter 119, Public Records Laws Exemption

Please be advised that the District Nine Medical Examiner's Office is an office under Orange County Government. As such, our records are open for personal inspection and copying by any person. On occasion; however, there are certain pieces of information in our records that might have to be redacted due to a Florida State Statute exemption. The record you have requested does have such an exemption. Therefore, please be advised that the redacted information is based on the following Florida State Statute, 119.071(2)(d) and 119.071(4)(c), which exempts from public record the identity of law enforcement surveillance and undercover personnel.

REPORT OF AUTOPSY

DECEDENT: Ibragim Todashev **CASE NUMBER:** ME 2013-000623

MANNER OF DEATH: Homicide **IDENTIFIED BY:**

AGE: 27 years **SEX:** Male
RACE: White **DATE OF DEATH:** 5/22/2013

DATE/TIME OF AUTOPSY: May 22, 2013 at 11:00 am

PERFORMED BY:  7/8/2013
Gary Lee Utz, MD, Deputy Chief Medical Examiner

CAUSE OF DEATH: Multiple gunshot wounds

AUTOPSY FINDINGS

- I. Gunshot wound of head (Gunshot Wound "A"), indeterminate range, entering left parietal scalp, without exit:
 - A. Perforation of skull and brain
 - B. Subarachnoid hemorrhage
 - C. Calvarial fractures
 - D. Basilar skull fractures
 - E. Projectile recovered from soft tissue at left base of skull

- II. Gunshot wound of torso (Gunshot Wound "B"), indeterminate range, entering left upper back, without exit:
 - A. Perforation of lung
 - B. Hemothorax
 - C. Rib fracture
 - D. Projectile recovered from left lung

continued...

- III. Gunshot wound of torso (Gunshot Wound "C"), indeterminate range, entering right upper back, without exit:
- A. Perforation of lung
 - B. Hemothorax
 - C. Rib fractures
 - D. Projectile recovered from right chest wall
- IV. Gunshot wound of torso (Gunshot Wound "D"), indeterminate range, entering right back, with exit:
- A. Perforation of right lower lung lobe
 - B. Rib fracture
 - C. Hemothorax
 - D. Exit wound right lower chest
- V. Gunshot wound of torso (Gunshot Wound "E"), indeterminate range, entering left chest, without exit:
- A. Perforation of heart
 - B. Perforation of aorta
 - C. Perforation of esophagus
 - D. Hemothorax
 - E. Hemopericardium
 - F. Projectile recovered from subcutaneous tissue of right lower back
- VI. Gunshot wound of torso (Gunshot Wound "F"), indeterminate range, entering left upper arm, without exit:
- A. Exit wound medial left upper arm
 - B. Reentry wound left chest
 - C. Perforation of heart
 - D. Rib fracture
 - E. Projectile recovered from heart
- VII. Gunshot wound of torso (Gunshot Wound "G"), indeterminate range, entering left upper arm, without exit:
- A. Exit wound medial left upper arm
 - B. Reentry wound left chest
 - C. Perforation of costal cartilage
 - D. Perforation of stomach
 - E. Projectile retrieved from stomach

TODASHEV, IBRAGIM
ME 2013-000623
PAGE 3

TOXICOLOGY ANALYSIS: See laboratory report.

CONCLUSION: In consideration of the circumstances surrounding the death, and after examination of the body, and review of the available investigative records, it is my opinion that the death of Ibragim Todashev, a 27 year old white man who was shot by a Federal Bureau of Investigation agent, is due to multiple gunshot wounds. The deceased suffered a total of 7 gunshot wounds. One projectile entered the top of the head, passed through the brain and the base of the skull. It was recovered. Three projectiles entered the back; one exited and two were recovered in the body. Two projectiles passed through the left upper arm and re-entered the left chest. An additional projectile also entered the left chest. All three projectiles were recovered. There is no evidence of close range firing in any of the gunshot wounds.

The manner of death is homicide.

**POSTMORTEM EXAMINATION
OF THE BODY OF IBRAGIM TODASHEV**

A postmortem examination of the body of a white man identified as Ibragim Todashev is performed pursuant to Florida statute 406.11 by Gary Lee Utz, MD, Deputy Chief Medical Examiner, District Nine at the Orange County Medical Examiner facility, Orlando, Florida on 5/22/2013 at 11:00 am.

IDENTIFICATION: The body of Ibragim Todashev is identified by
The positive visual identification is made to
on 5/21/2013 at 7:13 pm at the scene.

CLOTHING AND VALUABLES: The body is received clad in a T-shirt, jeans with a web belt, boxer briefs, and olive socks. The hands and feet are bagged. A key fob and a lighter are present in the left front pants pocket. Three keys are on the ring. There are defects on the front of the T-shirt consistent with the entrance wounds later described. The most medial defect is $\frac{3}{4}$ inch x $\frac{1}{2}$ inch. The middle defect is round, $\frac{3}{8}$ inch in diameter. The most lateral defect is a cluster of small, apparently individual defects, measuring in total $1 \frac{1}{2}$ inches x $\frac{1}{2}$ inch. On the back of the T-shirt are three roughly circular defects corresponding in location to the gunshot entrance wounds later described. In the right left lower front are multiple small defects measuring $\frac{1}{8}$ to $\frac{1}{4}$ inch that roughly correspond to the location of the exit wound in the right lower chest. There are multiple cosmetic defects in the jeans which are not associated with gunshots. None of the defects display evidence of close range firing.

SPECIAL PROCEDURES: Prior to the performance of the autopsy postmortem radiographs were obtained. Five projectiles were identified in the torso, and one in the head.

Fingernail clippings were obtained.

EXTERNAL EXAMINATION

The body is that of a well-developed, well-nourished, white man that weighs 159 pounds, measures 68 inches in length, and appears compatible with the stated age of 27 years. The body is cool to touch. Rigor mortis is fully fixed in the extremities and jaw. Minimal blanching purple livor mortis extends over the posterior surface of the body, except in the areas exposed to pressure.

The scalp hair is dark brown and measures 3 inches in length over the crown. The facial hair is a closely trimmed beard and mustache. The irides are brown; the corneas are clear. The sclerae and conjunctivae are pale. There is marked bony deformity of the nose. Both ears display cauliflower type deformities. The nose and ears are without evidence of acute trauma. The oral cavity is free of blood and the mucosae are without evidence of trauma. The teeth are natural and in fair repair. The neck is without masses, and the larynx is in the midline. The thorax is well-developed and symmetrical.

The abdomen is flat. The external genitalia are those of a normal adult man.

The anus and back are unremarkable. The upper and lower extremities are well-developed and symmetrical, without absence of digits.

IDENTIFYING MARKS AND SCARS: A faint, linear scar oriented in the coronal plane, is present on the undersurface of the chin. There is a faint, discontinuous linear scar over the anterior aspect of the right knee.

EVIDENCE OF MEDICAL INTERVENTION: None.

EVIDENCE OF INJURY

NOTE: Gunshot wounds are numbered and labeled arbitrarily.

Head and Neck:

Gunshot wound "A": A gunshot wound of entrance is identified in the left posterior parietal scalp, centered 4 ½ inches above and 1 inch posterior to the level of left external auditory meatus. It is also 1 inch below the top of the head. The wound is stellate, 5/8 of an inch x 3/8 of an inch, with a central circular punched out defect measuring slightly more than ¼ inch in diameter. There is minimal marginal abrasion. No soot or stippling is present.

The projectile travels downward, slightly toward the right, and slightly toward the rear.

The projectile enters the cranial vault producing an inwardly beveled irregular defect in the left parietal calvarium. The projectile then perforates the left

parietal lobe, perforates the left temporal lobe, perforates the left lobe of the cerebellum, and exits the basilar skull in the posterior fossa just posterior to and 1 inch lateral to the level of the foramen magnum. A damaged, partially jacketed lead projectile is retrieved from the soft tissue just deep to the skull defect and retained, labeled "Projectile from Left Base of Skull".

A $\frac{3}{4}$ inch abrasion/pressure mark is at the lateral canthus of the left eye.

Torso:

Gunshot wound "B": A gunshot wound of entrance (#9 in photographs) is identified in the left upper back, centered 2 $\frac{1}{2}$ inches left of the midline and 10 $\frac{1}{2}$ inches below the top of the head. The wound is round, $\frac{3}{8}$ inch in diameter, with circumferential marginal abrasion most prominent in the 8 o'clock to 1 o'clock position. No soot or stippling is present.

The projectile travels left to right, back to front, and downward.

The projectile traverses the soft tissues of the left upper back, enters the thoracic cavity through the third intercostal space posteriorly, grazes the body of the fourth thoracic vertebra, and comes to rest in the lung. A damaged, partially jacketed lead projectile is retrieved from the upper portion of the left lower lung lobe, and retained labeled "Left Lower Lung Lobe".

Gunshot wound "C": A gunshot wound of entrance (#10 in photographs) is identified in the right upper back centered 2 inches to the left of the midline, and 13 $\frac{1}{2}$ inches below the top of the head. The wound is round, $\frac{3}{8}$ inch in diameter with circumferential marginal abrasion. No soot or stippling is present.

The projectile travels left to right, back to front, and downward.

The projectile enters the right thoracic cavity at the second intercostal space near the spine, producing a comminuted fracture of the third rib. The projectile then perforates the right upper lung lobe and exits the thoracic cavity through the second intercostal space laterally. A damaged, partially jacketed lead projectile is retrieved from the soft tissue of the lateral right chest, and retained labeled "RT Chest Wall".

Gunshot wound "D": A gunshot wound of entrance (#11 in photographs) is identified in the right back centered 1 ¼ inches to the right of the midline, and 16 ½ inches below the top of the head. The wound is round, 3/8 inch in diameter, with circumferential marginal abrasion. No soot or stippling is present.

The projectile travels left to right, back to front, and downward.

The projectile enters the right thoracic cavity through the 6th intercostal space near the spine, producing a comminuted fracture of the 7th rib. The projectile then perforates the right lower lung lobe and exits the thorax through the 6th intercostal space anteriorly, fracturing the 7th rib.

A gunshot wound of exit (#1 in photographs) is identified in the right lower chest, 5 inches to the right of midline and 22 inches below the top of the head. The wound is "L" shaped, ¾ x ¼ inch, without soot, stippling, or marginal abrasion. No projectile is recovered.

Gunshot wound "E": A gunshot wound of entrance (#3 in photographs) is identified in the left lateral chest, approximately 1 inch below the level of the nipple, 6 inches to the left of midline, and 18 inches below the top of the head. The wound is oval, 5/8 x ¼ inch, with minimal circumferential marginal abrasion. No soot or stippling is present.

The projectile travels left to right, front to back, and downward.

The projectile enters the left thoracic cavity, through the fifth intercostal space producing a comminuted fracture of the fifth rib. The projectile then perforates the inferior left ventricle of the heart, perforates the aorta, grazes the esophagus, then perforates the right lower lung lobe and exits the thorax through the posterior 10th intercostal space. A damaged, partially jacketed lead projectile is retrieved from the subcutaneous tissue of the right lower back, 5 inches to the right of the midline and 21 inches below the top of the head. It is retained labeled "RT BACK".

Gunshot wound "F": Gunshot wound "F" is composed of an entrance in the left upper arm, an exit in the medial left upper arm, and a reentry wound in the torso.

A gunshot wound of entrance (#6 in photographs) is identified in the lateral left upper arms, centered 14 ½ inches below the top of the head. The wound is

round, 3/8 inch in diameter with circumferential marginal abrasion most prominent at the superior margin. No soot or stippling is present. The projectile travels left to right, front to back, and downward.

The projectile traverses the soft tissue of the left upper arm, and exits medially.

A gunshot wound of exit (#8 in photographs) is identified in the medial left upper arm, centered 18 ½ inches below the top of the head. The wound is irregular, 1 inch x ¾ inch with ragged, partially abraded margins. No soot or stippling is present. The projectile reenters the body in the left chest. A gunshot wound of entrance (#4 in photographs) is identified in the left chest in the anterior axillary line approximately 1 inch below the level of the left nipple, 8 ½ inches to the left of midline, and 18 inches below the top of the head. The wound is irregular, ¼ x ½ inch with irregular superficial abrasion at the margins measuring up to ¼ inch in thickness.

The projectile enters the left thoracic cavity through the 7th intercostal space, fracturing the 6th rib. The projectile then perforates the left lower lung lobe, perforates the lateral left ventricle of the heart, and comes to rest. A damaged, partially jacketed lead projectile is retrieved from the heart muscle, and retained labeled "Heart".

Gunshot wound "G": Gunshot wound "G", like gunshot wound "F", is composed of an entrance and exit in the left upper arm, and a reentry wound in the torso.

A gunshot wound of entrance (#5 in photographs) is identified in the left upper arm centered 17 inches below the top of the head. The wound is oval, ½ x ¼ inch with circumferential marginal abrasion, most prominent in the 12 o'clock to 2 o'clock position. No soot or stippling is present.

The projectile travels from left to right, front to back, and downward.

The projectile traverses the soft tissue of the left upper arm and exits medially. A gunshot wound of exit is identified in the medial left upper arm (#7 in photographs), 19 ½ inches below the top of the head. The wound is oval, 1 ¼ inches x 5/8 inches with scalloped, minimally abraded margins. Irregular, purplish contusions surrounds the inferior and anterior margin. Small, discrete, irregular superficial abrasions are above and below the wound. No soot or stippling is present.

The projectile reenters the body at the anterior torso. A gunshot wound of entrance (#2 in photographs) is identified in the left chest approximately 2 ½ inches below the level of the left nipple, 4 inches to the left of the midline, and 19 ½ inches below the top of the head. The wound is irregular, ½ x 5/8 inch with eccentric, irregular 5/8 inch abrasion at the superior margin. The wound edges are slightly scalloped and minimally abraded. No soot or stippling is present.

The projectile enters the subcutaneous tissue of the left chest at an oblique angle, traverses the soft tissue, and enters the body through the costal cartilage of the left 8th rib. The projectile then perforates the anterior wall of the stomach and comes to rest. A damaged, partially jacketed lead projectile is retrieved from the stomach and retained, labeled "Projectile from Stomach".

Upper and Lower Extremities: See above.

INTERNAL EXAMINATION

BODY CAVITIES: The numbering of the gunshot wounds in this report, and the labeling of the gunshot wounds in photographs is completely arbitrary, and is in no way associated with the sequence in which the wounds were sustained.

Associated with the above injuries is a large defect in the anterior and lateral wall of the left ventricle of the heart. It measures approximately 8 x 4 cm. A smaller, 1.5 x 2 cm defect is present in the posterior aspect of the left ventricle at the lateral margin. Defects in the pulmonary parenchyma associated with the path of the projectiles result in minimal associated hemorrhage. Approximately 100 ml of minimally clotted blood is present within the pericardial sac, 350 ml in the left chest, and 200 ml in the right chest. No blood is present within the abdomen.

Associated with the gunshot wound of the head is thin subarachnoid hemorrhage over both convexities and the basilar brain. There is disruption of the parenchyma associated with the path of the projectile. Displaced linear fractures extend from the entry defect anteriorly and posteriorly through the calvarium. There is moderate associated subgaleal hemorrhage. Slightly displaced fractures extend into the left middle cranial fossa. There are slightly displaced fractures at the posterior margin of the exit defect in the left posterior fossa. A non

displaced linear fracture extends through the petrous portion of the left temporal bone.

The above injuries, having been mentioned once, will not be repeated in the individual descriptions of the organ systems. Those descriptions refer to the uninjured portions of the organs only.

CARDIOVASCULAR SYSTEM: The heart weighs 300 grams. The pericardial surfaces are disrupted owing to the gunshot wound previously described. The coronary arteries arise normally, follow the usual distribution, and are widely patent, without atherosclerosis or thrombosis. The chambers and valves exhibit the usual size-position relationships and are unremarkable; the atrial and ventricular septa are intact. The myocardium is red-brown and firm, without focal abnormalities. The aorta and its major branches arise normally, follow the usual courses, and are widely patent, without atherosclerosis. The vena cava and its tributaries return to the heart in the usual distribution and are free of thrombi.

RESPIRATORY SYSTEM: The right and left lungs weigh 320 grams and 300 grams, respectively. The upper airway is clear of debris and foreign material; the mucosa is yellow-tan and smooth. The pleural surfaces are smooth, glistening and, except as noted otherwise, intact. The pulmonary parenchyma displays evidence of the previously described gunshot wounds. Surrounding parenchyma is mildly hemorrhagic. Uninvolved parenchyma exudes a moderate amount of blood and frothy fluid and is without focal lesions. The pulmonary vasculature is unremarkable.

HEPATOBIILIARY SYSTEM: The liver weighs 1520 grams. The hepatic capsule is smooth, glistening and intact, covering a red-brown parenchyma without focal lesions noted. The gallbladder contains approximately 5 milliliters of dark green, slightly mucoid bile; the mucosa is velvety and unremarkable. The extrahepatic biliary tree is patent, without evidence of calculi.

ENDOCRINE SYSTEM: The pituitary, thyroid and adrenal glands are unremarkable. The pancreas has the usual yellow-tan, lobulated appearance and the ducts are clear.

DIGESTIVE SYSTEM: The esophagus is lined by a gray-white, smooth mucosa. The gastric mucosa is arranged in the usual rugal folds and the lumen contains a scant quantity of thin, tan liquid. The small and large intestines are unremarkable. The appendix is present.

GENITOURINARY SYSTEM: The right and left kidneys weigh 110 grams and 120 grams, respectively. The renal capsules are smooth, thin and semitransparent, and strip with ease from the underlying smooth, red-brown, firm, cortical surfaces. The cortices are sharply delineated from the medullary pyramids, which are red-purple to tan and unremarkable. The calyces, pelves and ureters are unremarkable. The urinary bladder contains no urine; the mucosa is gray-tan and smooth.

The prostate gland and seminal vesicles are unremarkable.

RETICULOENDOTHELIAL SYSTEM: The spleen weighs 100 grams and has a smooth intact capsule covering a deep red-purple, moderately firm parenchyma; the lymphoid follicles are unremarkable. The regional lymph nodes appear normal. The exposed bone marrow is red-purple and homogeneous, without focal abnormalities.

MUSCULOSKELETAL SYSTEM: Except as noted otherwise, the bony framework, supporting musculature, and soft tissues are not unusual.

NECK: Examination of the soft tissues of the neck, including strap muscles, thyroid gland, and large vessels, reveals no abnormalities. The hyoid bone and larynx are intact.

HEAD AND CENTRAL NERVOUS SYSTEM: The brain weighs 1370 grams. There is disruption of the dura associated with the gunshot wound previously described. Subarachnoid hemorrhage is present. The cerebral hemispheres appear to have been symmetrical. The structures at the base of the brain, including the cranial nerves and blood vessels, are intact and free of additional abnormalities. Coronal sections through the cerebral hemispheres reveal the path of the projectile but no lesions within the cortex, subcortical white matter, or deep parenchyma of either hemisphere. The ventricles are normal in caliber. Sections through the brainstem and cerebellum reveal no additional abnormalities.
