A Good Partnership 3xLOGIC and Sonitrol Great Lakes Team Up with Flint Boys and Girls Club to Improve Safety and Security

THE SITUATION

The Flint Boys and Girls Club seeks to be a safe place for the children of the community and the Flint club looks after a lot of them—160-180 children daily during the school year and in the summer, upwards to 250 a day.

THE CHALLENGE

The Club's previous video surveillance system was adequate, but it was getting old and staff wondered if they were missing out on newer, better technology. "We had grown our old system up to 16 cameras, and we had expanded the number of areas under surveillance. However, the image quality was

THE SITUATION

The Flint Boys and Girls Club seeks to be a safe place for the children of the community and the Flint club looks after a lot of them—160-180 children daily during the school year and in the summer, upwards to 250 a day.

THE CHALLENGE

The Club's previous video surveillance system was adequate, but it was getting old and staff wondered if they were missing out on newer, better technology. "We had grown our old system up to 16 cameras, and we had expanded the number of areas under surveillance. However, the image quality was not great, and we didn't have much zoom capability." Taouzer Robinson, CEO, Flint Boys and Girls Club

THE SOLUTION

Between Sonitrol Great Lakes and 3xLOGIC, the two companies worked with the Club to design and install a brand new, fully IP system of 16 4MP cameras, backed by a 3xLOGIC V5000 server. 3xLOGIC discounted the hardware and Sonitrol Great Lakes donated all the installation and on-going support and labor.

"Our new 3xLOGIC system is 100% better. Before, it would take an act or ten hours to resolve an incident, now it's immediate. We must be able to solve issues quickly, and get back to work, back to our priorities for the children."

—Taouzer Robinson, Chief Executive Officer,
Flint Boys and Girls Club

THE BENEFITS

- The new video surveillance system monitors key areas inside the club and outside, with views of the approach to the entrance, as well as the parking lot, where buses and cars pickup and drop off.
- "We could tell a huge difference immediately between our old cameras and the new 3xLOGIC IP cameras," recounted Robinson, "and the ease of use was very clear as well."
- As children move about the building, staff can monitor them, key in on any shenanigans, or worse, zoom into a situation with excellent clarity and solve any problems.
- Robinson is also impressed with his 24/7 mobile access to camera views. "If I'm at home at 8:30 at night, I can access video on my iPad and make sure we're closed properly. That provides real peace of mind."
- With the new system functioning well, 3xLOGIC and Sonitrol staff have recommended installing a 3xLOGIC V5000 facial recognition camera. Such FR technology enables the Club to create a watch list of faces, so they are notified if a person of interest approaches the building; this way, unauthorized people are not picking up children from the Club.

Facial Recognition Camera Demo at PSA TEC in Denver, CO

Low Cost Dual Lens 2MP
Camera - VX-FR-01

Our advanced facial recognition camera is a special purpose, low cost dual lens 2MP camera for instant face detection, identification, and notification of persons of interest (POI) as well as people counting.

Along with our Facial Recognition application and mobile app, our newest camera allows users to review captured facial images and choose persons of interest to place on a watch list. These POI's can then be securely communicated via standard AES encryption to the VIGIL TRENDS Cloud Portal and responsible parties can be notified locally on site via WiFi using the 3xLOGIC facial application (iOS or Android) or via the VIGIL Server or Client for quick response.

August 2016

[ACADEMY](#)[WEBINARS](#)[EVENTS](#)[PRESS RELEASES](#)

Featured news

Safety 's the name of the game!

As the world prepares for the summer Olympic games, [stadium and venue security](#) is top of mind for many security professionals. Learn how Axis helps stadiums and venues strike a balance between keeping spectators safe while enjoying their favorite events.

Solutions

Pittsburg convention center drastically improves safety

With our high-definition network cameras, the [David L. Lawrence Convention Center](#) is now able to provide safety and security to their valued employees and visitors. Learn how you can upgrade your security system today!

Guarding the stadium

The video surveillance solution at the [National Training Center SFZ Poprad](#) in Slovakia not only exceeds legal requirements several times over (and within budget), it also provides football coaches with valuable high-quality recordings for training analysis.

Tools & services

Are You Ready for Game Day?

OK, so you have the major game day essentials. But are they safe? Learn how easy it is to [secure your stadium or venue](#) with Axis.

Technical corner

The sharpest images

4K Ultra HD combines the complete overview of an entire stadium or venue with zoom capability to examine even the smallest details – providing exceptionally valuable images for full situational awareness and evidence.

Zipstream just got better – much better

Axis' Zipstream technology was a game changer when launched in 2015. Now we introduce Zipstream with dynamic frame rate. Everything you need with even less of what you don't.

Product news

Top-of-the-line for tough conditions

The new generation **AXIS Q60 PTZ Dome Network Camera Series** offers sturdy design and reliable construction, as well as better focus, higher light sensitivity and Zipstream technology to lower bandwidth and storage costs.

Outstanding image quality with easy installation

AXIS Q36 Network Camera Series provides exceptional video quality with 1/2" sensors, Lightfinder and WDR – Forensic Capture. For efficient installation and re-adjustment, the camera offers a unique, remote PTRZ solution.

Empower your analytics

AXIS Q1942-E Thermal Camera combines cost savings with higher performance, improved thermal image contrast and powerful analytics capacity over its predecessor. Read more on how our **thermal technology** can quickly detect people and objects in any lighting conditions 24/7.

Small and powerful door security

[AXIS A8105-E Network Video Door Station](#) is a full-fledged security camera, communication device, and door opener in one. It's a natural complement to your surveillance solution providing reliable 24/7 identification.

Moving on up

Mounting your [AXIS F4005](#) and [AXIS F4005-E](#) Dome Sensor Units on the surface of ceilings and walls just got easier – a new adapter is now available and included in shipments of these units.

Mount your cameras anywhere

Outer corners, ceilings, poles, column tops, parapets, beams, soffits, canopies and more – with [AXIS T94Q01F Ceiling-and-Column Mount](#) (fixed cameras) and [AXIS T94R01B Corner Bracket](#) (fixed, mini-dome, and bullet-style cameras).

Topic of the month

Expand your horizons with facial recognition

How do you keep potential perpetrators from entering your stadium or venue, without interfering with the spectator experience? With a [facial recognition](#) solution from Axis and partners. Improve your business with benefits beyond security.

www.officerstore.com.

Pryme BTH-300 Bluetooth Headset Wins Mobile Tech Award

Pryme spent years perfecting their new PrymeBlu BTH-300 Bluetooth Headset with built-in wireless PTT. BTH-300 uses any Apple compatible wired audio accessory converting it to wireless operation and dual-pairs with Android or IOS cellphone/tablet and two-way radio simultaneously--perfect for undercover applications operations as the Status multi-color LED is almost invisible. Use your earbuds or choose one of PrymeBlu's 8 unique, heavy-duty headset kits including D-Ring Boom Headset; Dual-element Throat Mic; Surveillance Earphones and more. Maximum performance with 10+ hours talk time (50 hours standby) and

Enabled Enterprises Electric Bike

Enabled Enterprises, a business founded by disabled veterans, along with its GSA approved manufacturing partner, developed the first of its kind Electric Patrol Bike for police and military. Pedal, pedal assist, or full power. Streets, trails, snow, grass. Up to 25 mph. "Bike has performed well our guys and the public love them," said Chief John Sliozis, Deerfield, Ill. PD. For more information visit, www.enabledenterprises.com.

OPS Public Safety CVE Wheel/Axle Scales Unit

OPS Public Safety's all-new CVE Wheel/Axle Scales Unit is specifically designed for Commercial Vehicle Enforcement. Engineered for the Ford Explorer, it holds four scales, gear and rifles. Manufactured of heavy gauge aluminum with available features that include a 10"H X 35"W X 20"D Storage drawer with heavy-duty 200 lbs. ball bearing slides, a 36 inch-deep drivers side storage compartment, an anti-skid top surface with perimeter cargo rail, durable anti-skid rubber in drawer bottom and side compartment.

includes USB charger. Clips securely almost anywhere for hands-free wireless communications. For more information, visit www.pryme.com/promo/lo.

Vigilant Solutions FaceSearch Facial Recognition Solution

FaceSearch is an easy-to-use facial recognition solution that results in more investigative leads. Developed by Vigilant to deliver a functional, scalable and advanced facial recognition solution that any investigator can use, FaceSearch is available as a PC-based or web-based solution, and is hosted in the cloud and available on Android and Apple OS mobile devices. For more information, visit www.vigilantsolutions.com.

The detachable scale compartment has Teflon slide rails. To access the spare tire, simply unfasten and remove the scale compartment. The base and brackets utilize OEM bolt holes that eliminates drilling for installation (optional barrier available). For more information or a demo visit www.OPSPublicSafety.com.

Dickies Tactical Softshell Performance Jacket

The Dickies Tactical Jacket, through its warm lining and articulated elbows, offers comfort and ease of movement. Hidden front and back ID panels and a side holster for simplified CCA access lets this jacket store all your tools and accessories, keeping your hands free when you need them most. The jacket is available in black and blue. For more information, visit www.DickiesDelivered.com.

OSI Online First Aid Kit Builder

Officer Survival Initiative (OSI), a leading manufacturer and distributor of high quality, innovative medical solutions for high risk and tactical environments, is introducing a system that allows first responders to build their own response kits online at the IFAK Builder web page. Kits are custom built by the user starting with the of bag and color, and followed by a selection of contents from some of the leading names in the industry: combat dressings, tourniquets, QuikClot and other hemostatics, chest seals, decompression needles, PPE, tape, gauze and a wide selection of tools. For more information, visit

www.officersurvival.org.

RexONE Backpack Stretcher

REX Rapid Extraction introduces the RexONE First Responder Backpack Mobile Stretcher - A tri-fold backpack stretcher for the rapid extraction of patients by a single responder. Safely move more patients faster with the RexONE Rapid Extraction system. Developed by emergency responders for First Responders, the state-of-the-art RexONE is the fastest and safest patient extraction device available. It can mean the difference between life and death in any emergency, especially tragic situations involving multiple patients. Completely portable, the RexONE mobile stretcher can be carried as a backpack in folded position and can be folded and hung on the wall ready for quick deployment. For more information visit www.rexems.com.

Face off:

Does facial recognition tech belong in the workplace?

When Apple announced its iPhone X, the company joined Samsung and Microsoft in offering face unlock technology. For IT pros already experiencing the joys of a workplace filled with mobile devices and their associated security features, one big question comes to mind, will all of this facial recognition tech make it harder or easier to keep data secure?

Veritone's suspect identification solution, IDentify, was recently featured in a Police Magazine story:

"A lot of people believe that video surveillance tools and evidentiary video systems like in-car and body-worn cameras have made the jobs of law enforcement investigators much easier. But the truth is that even when individuals are caught on camera at the scene of a crime, investigators still have their work cut out for them to identify suspects and connect them to the crime.

Veritone IDentifyâ€ can make this task much easier."

Click the button below to read the full article on Veritone IDentify.

New Legislation Needed to Regulate Police Facial Recognition Technology

Facial recognition technology, being trialled by major police forces in Britain, should be subjected to more rigorous testing and transparency, according to new research.

The Leicestershire Police and the other two forces trialling FRT – the Metropolitan Police

Service and the South Wales Police – argue the technology is lawful and its use in surveillance operations is proportionate. But researchers from UEA and Monash University in Australia say the technology could violate human rights. They argue there has not been sufficient statistical information about the trials made publically available for scrutiny. The limited outcomes that have been shared, the researchers say, have shown high false-positive identification rates and a low number of positive matches with ‘known offenders’. [Read More](#)

Open-Access Satellite Data Allows Tracking of Seasonal Population Movements

A massive release of passive-surveillance satellite data of nighttime lights could help researchers in fields ranging from agriculture to epidemiology. Researchers at Penn State and the University of Southampton in the UK have provided open access to detailed satellite data on brightness for five cities in Niger and Nigeria from 2000 to 2005, as well as detailed methods for analyzing the data to track seasonal population movements. Addressing Cooling Needs and Energy Poverty Targets in the Global South

Exposure to health risks due to extreme temperatures have been growing worldwide and a significant number of heat-related deaths are reported annually during the summer months in both the northern and southern hemispheres, particularly among the elderly, the poor, and in densely populated cities.

Due to its high cost, air conditioning is considered a luxury, and only 8% of the 2.8 billion people living in the world's hottest regions possess an air conditioning unit. In addition, more than one billion people lack access to electricity and at least one billion live in slum conditions, both of which make access to space cooling challenging. The lack of access to essential indoor cooling is a major equity issue and is increasingly seen as a dimension of energy poverty and wellbeing that demands attention from policymakers. Safe to Use Hands-Free Devices in the Car? Yes, According to Research

Eight-hundred and forty-three people died on Virginia roads in 2017, according to the Virginia Department of Motor Vehicles. Of these, 208 fatalities and 14,656 injuries were attributed to distracted driving, an 18.2 percent increase from 2016. Texting/cell phone use was cited as one of the top three causes.

New research from the Virginia Tech Transportation Institute (VTTI) suggests that drivers who use hands-free electronic devices, as opposed to handheld ones, are less likely to get into a crash. [Read More](#)

Subject: Learn How Anaheim PD Increased Suspect Identification Rates

Veritone aiWARE
**The Operating System for
Artificial Intelligence**

Hi John,

Investigators and crime analysts spend thousands of hours sifting through arrest records, asking colleagues or polling the public to identify perpetrators in video and photographic evidence. This arduous process stalls investigations and drives case clearance rates down.

This is why Veritone created IDentify - to assist law enforcement in closing more cases using facial recognition technology.

Click the link to learn how Anaheim PD used IDentify to tap into their arrest records and identify potential suspects within video evidence, accelerating their investigations and increasing case close rates.

Subject: Automate Suspect Identification to Accelerate Investigations

Veritone aiWARE
**The Operating System for
Artificial Intelligence**

Hi John,

Manually sifting through hundreds, if not thousands, of known offender records to identify suspects is labor-intensive and time-consuming. But those days are gone now! Veritone IDentify is here to empower police departments and agencies to take full advantage of their databases with the use of facial recognition.

Veritone IDentify uses facial recognition technology to systematically compare known offender and person of interest databases with video and photographic evidence to quickly identify suspects for further investigation. Automating the identification process not only increases productivity but also increases match rates to accelerate investigations.

Click the button below to download a one-sheet outlining all of Veritone IDentify's features and functionality.

Combining Multiple CCTV Images Could Help Catch Suspects

Psychologists compared how effectively humans and computer facial recognition systems could identify people from high quality images, pixelated images, and face averages. The results showed that both people and computer systems were better at identifying a face when viewing an average image that combined multiple pixelated images, compared to the original poor-quality images.
