Making the Case for Adding AI to Police Departments

It's a common meme in modern movies: A video surveillance camera captures an image of a person's face, which is instantaneously identified by artificial intelligence (AI), quickly leading to an arrest—or whatever the next plot twist is. However, in the real world, surveillance systems often fail to live up to this ideal, with police unable to leverage video footage to match identified faces to the names of known offenders. This eBook shows how your department can identify leads faster!
