Public Safety Mobility: The Power of Connectivity in Police Operations

Mobility is what makes it possible for agencies to combine the power of sensors found inside digital devices with the technology available at police headquarters. It's revolutionizing what officers can do as they step away from their squad cars and onto the streets. However, few agencies are taking full advantage of this powerful policing technology.

Making the Case for Adding AI to Police Departments

It's a common meme in modern movies: A video surveillance camera captures an image of a person's face, which is instantaneously identified by artificial intelligence (AI), quickly leading to an arrest—or whatever the next plot twist is. However, in the real world, surveillance systems often fail to live up to this ideal, with police unable to leverage video footage to match identified faces to the names of known offenders. This eBook shows how your department can identify leads faster!
