RE: Special Mobile ID Device Pricing

Dear [Redacted]:

Thank you for your inquiry regarding providing pricing for the Mobile ID devices. The Mobile ID Device is the DWP Evolution. It is a Samsung smartphone in a ruggedized case which also integrates an IB FAP-30 single fingerprint reader. The device can operate with Bluetooth, Wi-Fi or Cellular (Verizon) connectivity. It includes the requisite software for capturing and sending subject fingerprints to the MASP AFIS and returning either a Hit, No Hit or Possible Hit notification only or the full suspect record data depending on the configuration. In the case of only the Hit, No Hit or Possible Hit configuration, the suspect data from a Hit is returned to the vehicle MDT, not the device. With this in mind, the costs the devices is as follows:

Evolution Mobile ID Device			
Description	Quantity	Each	Total
FAP-30 FP Reader, ruggedized case, Samsung Smartphone, USB or wireless charging. Includes standard USB charging cable w/ wall charger and case. Bluetooth, Wi-Fi or **Cellular communication. MID Software, Authentication Software, MDM software (Mobile Data Management) and MDT response application license if so configured. Includes shipping, on-site set-up and training, 3 year warranty w/24x7 maintenance coverage and 48 hour or less replacement if needed.	[Redacted]	[Redacted]	[Redacted]
24/7 Maintenance Coverage after year 3 w/48 hour replacement – per device			\$ [Redacted]
8-5 M-F Maintenance Coverage after year 3 w/48 hour replacement – per device			\$ [Redacted]

**Customer is responsible for Cellular Account activation and must provide their own Verizon SIM card to Dataworks with the approved IP through MA DCJIS.

Upon your review of this proposal please contact me with any questions. Thank you for your continued business with DataWorks Plus.

Sincerely,

[Redacted Signature]
