Hi Emiliano,

Attached are all email hits on Clearview and Clearview AI. There is a pdf attachment which shows search I did. Also, I did a search for just “facial recognition” and I got more hits but most of them were from the detectives group communication on OPEN cases and fall under the exception rule under public records law.

I can say that we as a department do not use facial recognition. I have in the past, many years ago, while running detectives I have utilized the RMVs facial recognition to try and identify suspects but was never able to get a positive ID.

Let me know if you have and question or concerns.

Thanks

Dan
