The NPS is interested in counting how many people are on there property at Pickering Wharf in a given time period. We have three cameras in our system that cover their property.

Hi Captain Ryan,

When you refer to people counting, are you looking to determine if a preset number of people are in a particular location, or are you trying to determine how many people passed by a target point or location? Also, of course you can invite a rep from the National Park Service. You can invite as many people as you wish who may have an interest in seeing the software.

Regards,
Drew

Good Evening Drew,
I'll probably be the one person from the department reviewing the Briefcam software so I have a couple of questions. 1) Does it do people counting and 2) can I invite a representative from the National Park Service? I'm off next week but am available the following week except for the 11th.

Gentlemen,

Thank you for participating in the facial recognition demonstration today. If you would like to see a second option from a company called Briefcam, which is less facial recognition, and more object detection, please let me know some dates and times so I can arrange for a demo.

Thank you,
Drew
