Max,
The two camera's on Rt 28 appeared to be ok during the day but at night not doing very well. suggestions?

Vic

Hi Victor,

I'm in Atlantic City now but i'll remore into the system later to check.

I notice some difference before, did someone change the settings?

Thank you

Max.
Whitey adjusted and lowered the pole on the Rt 28 two LPR cameras today. I setup the two in the web client under vehicle detection. During the daylight hours the capture rate was pretty good. I checked tonight and in he dark capture rate not good. If you get a chance look at them.

Hi Victor,

I'm in the system since 10 min.

RT28 north is pretty good. RT28 South not so much. I'm trying to remote into each LPR camera because I see some change on the shutter speed (the proof is that the plates are not so clear).

I'll keep you updated.

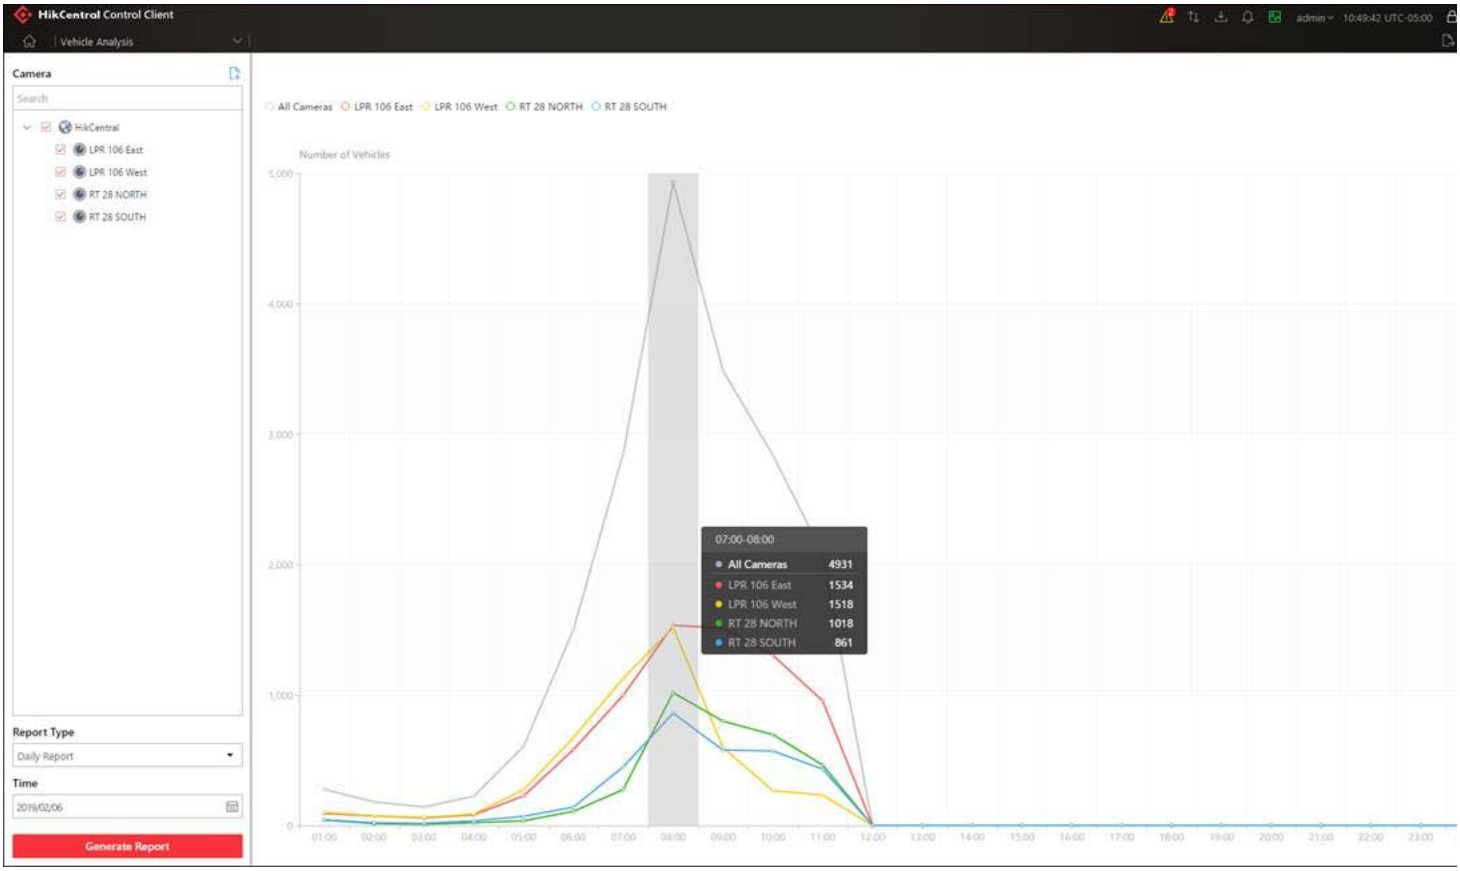
Hi Victor,

Now all looks fine.

Both LPR cameras on RT 28 are capturing pretty well both lanes. The sun hits RT 28 south during the morning and 28 North during the afternoon, so this was challenging but we are doi
as you cans see from the chart.



IMPORTANT: I see LPR 106 West went down for a while (yellow line). Please double check that it's all right with it.

Thank you
