Subject: AWS Monthly Webinar Series - New Service Launches

New Services and Features Launched at AWS re:Invent 2016

Throughout December and January, we'll cover the new services and features that were launched at re:Invent 2016. These tech talk sessions will help you quickly learn about our new capabilities and how you can apply them to your applications. The sessions will be led by AWS solutions architects and engineers, featuring live demonstrations followed by Q&A with AWS experts.

Artificial Intelligence

- Amazon Lex: A service for building conversational interfaces using voice and text.
- Amazon Rekognition: A service that makes it easy to add image analysis to your applications.
- Amazon Polly: A service that turns text into lifelike speech.

Analytics

- Amazon Athena: An interactive query service that makes it easy to analyze data in Amazon S3 using SQL.
- Amazon QuickSight: Business analytics for everyone.

Application Services

- AWS Step Functions: A new, fully managed service that makes it easy to coordinate the components of distributed applications and microservices using visual workflows.

Desktop & App Streaming

- Amazon AppStream 2.0: Stream desktop apps securely from the AWS cloud directly to users on the device of their choice, and eliminate the need to rewrite them for the cloud.

Compute

- Amazon EC2 F1: A new compute instance with programmable hardware for application acceleration.
- Amazon EC2 Systems Manager: Automate important management tasks such as collecting system inventory, applying OS patches, automating image creation, and configuring OS and applications at scale.
- Amazon Lightsail: The easiest way to launch and manage a virtual private server with AWS.
- AWS Batch: Learn how to start processing large-scale batch jobs with ease.
- Free Hands-on Training: Learn about running Windows on AWS.
- Amazon EC2 Instances: An overview of the Amazon EC2 instance platform, key platform features, and the concept of instance generations.
- AWS Lambda: Run code without provisioning or managing servers.

Console Tools

- AWS Personal Health Dashboard: Personalized view of AWS service health.

Containers

- Blox: A collection of open source software that enables customers to build custom schedulers and integrate third-party schedulers on top of ECS.

Databases

- Amazon with PostgreSQL Compatibility: Learn about the preview access of Amazon Aurora with PostgreSQL Compatibility.
- Amazon Aurora: A MySQL-compatible relational database engine that combines the speed and availability of high-end commercial databases with the simplicity and cost-effectiveness of open source databases.

Developer Tools

- AWS CodeBuild: Build and test code; pay by the minute.
- AWS X-Ray: Analyze and debug your applications.

IoT

- AWS Greengrass: A software that lets you run local compute, messaging and data caching for connected devices.

Management Tools

- Chef Automate: Learn how to automate operations with Chef Automate.

Mobile

- Amazon Pinpoint: Run targeted campaigns and improve user engagement in mobile apps.

Networking & CDN

- Lambda@Edge: Deliver richer content for web apps at low latency.

Security

- Amazon Shield: A managed DDoS protection service that safeguards your web applications using Elastic Load Balancing (ELB), Amazon CloudFront, and Amazon Route 53.

Storage & Content

- Amazon Glacier: Dive deep into the recently launched Amazon Glacier retrieval features.
- AWS Snowball Edge and AWS Snowmobile: Migrate your terabytes or petabytes of critical data in a fast, secure and cost effective way.
- S3 Storage Management: Learn about the portfolio of storage management features available in S3.

Subject: [You're Invited] AWS Online Tech Talks

AWS Tech Talks are a selection of live online presentations that cover a broad range of topics at varying technical levels. These webinars feature technical sessions led by AWS solutions architects and engineers, live demonstrations, customer examples, and Q&A with AWS experts.

Featured Sessions

Artificial Intelligence

Build and Deploy Chatbots Fast with Amazon Lex: Learn about the features of Amazon Lex and how you can easily build and deploy a chatbot, today!

Integrate Your Amazon Lex Chatbot with Any Messaging Service: Learn how to integrate your Amazon Lex Chatbot with any messaging service using Amazon Lex, AWS Lambda, and AWS API Gateway.

What's New with Amazon Rekognition: Learn about new features in Amazon Rekognition including celebrity recognition, estimating age range, and moderating certain content in images.

Big Data

Building Analytics Pipelines for Games on AWS: Learn how you can use AWS services to build your own analytics platform for your game to stay competitive.

Serverless Big Data Analytics using Amazon Athena and Amazon QuickSight: Build a fast, scalable, serverless big data analytics solution using Amazon Athena and Amazon QuickSight.

Streaming ETL for Data Lakes using Amazon Kinesis Firehose: Get an overview of Amazon Kinesis Firehose and dive deep into how you can use the service.

Compute

Deep Dive on Amazon EC2 F1 Instance: Learn how to develop custom hardware accelerations in the cloud using Amazon EC2 F1 instances.

Scaling Up Tenfold with Amazon EC2 Spot Instances: Learn best practices you can immediately apply to your application portfolio.

Deep Dive on Amazon EC2 Elastic GPUs: Learn how Amazon EC2 Elastic GPUs can help you cost-effectively run your 3D applications in AWS.

Containers

Building a CICD Pipeline for Container Deployment to Amazon ECS: Learn best practices for creating a CICD pipeline for containerized workloads.

Databases

DynamoDB - Architectural Patterns and Best Practices for Infinitely Scalable Applications: Learn about the benefits and features to help you get the most out of your DynamoDB database.

Convert and Migrate Your NoSQL Database or Data Warehouse to AWS: Learn how to easily migrate your databases and data warehouses to the cloud.

DevOps

Deep Dive - Continuous Delivery for AI Applications with ECS: Learn how you can use the DevOps practice of CI/CD for operationalizing data science and machine learning applications.

Enterprise & Hybrid

Moving to the AWS Cloud - An Overview of the AWS Cloud Adoption Framework: Learn how the AWS Cloud Adoption Framework (AWS CAF) can help your organization and key stakeholders prepare for a cloud adoption journey.

Best Practices in Planning a Large-Scale Migration to AWS: Accelerate your journey to the cloud and reduce risk by learning AWS best practices, tips and techniques for planning a large-scale migration.

Hands On Lab

Hands On Lab - Windows Workloads on AWS: Get started deploying Windows Workloads on AWS.

Hands On Lab - Introduction to Microsoft SQL Server in AWS: Learn steps to launch and configure your first Microsoft SQL Server instance on Amazon Relational Database Service (RDS).

IoT

How to Connect Your Own Creations with AWS IoT: Configure your first AWS IoT environment, and explore how AWS IoT concepts are used by your custom creations to create connected devices.

Management Tools

OpsWorks for Chef Automate - Automation Made Easy!: Learn about configuration management with AWS OpsWorks for Chef Automate.

Mobile

Test Your Android App with Espresso and AWS Device Farm: Get an overview of the Espresso framework and AWS Device Farm.

Security & Identity

Advanced Techniques for Federation of the AWS Management Console and Command Line Interface (CLI): Learn how to single sign-on and manage access to AWS with your existing identity provider in this webinar on advanced federation techniques for AWS.

Securing Your AWS Infrastructure with Edge Services: Dive into how to protect your AWS infrastructure with an enterprise grade security at the edge.

Serverless

Serverless Orchestration with AWS Step Functions: Learn how to orchestrate serverless applications using visual workflows and AWS Step Functions state machines.

Building Serverless Web Applications: Learn the essentials for building serverless applications using services like AWS Lambda and Amazon API Gateway.

Storage

Moving Data into the Cloud with AWS Transfer Services: Learn about 6 different AWS data transfer services that can simplify and accelerate your cloud migrations.

Subject: Cloud-based tools can help police work more efficiently

February 20, 2018 | View as webpage

3 ways technology will make police departments more agile

By PoliceOne BrandFocus Staff

Police departments across the country are leveraging new technologies made possible by the cloud to improve the way they protect and serve. These advanced tools are improving the speed of investigations, storing data securely and quickly combing databases for relevant information that may have taken much longer to gather in years past.

In this article, learn how the cloud-based tools of the future are changing the face of law enforcement:

- Artificial intelligence, or AI, helps police search massive amounts of data to gather actionable information

more efficiently.

- Secure cloud storage and management helps police analyze video from body-worn cameras, dash cams, surveillance footage and even citizen-generated video.
- Cloud-based CAD and RMS platforms provide real-time intel to boost situational awareness and enhance officer safety.

INVESTOR DNA

You are about more than investment ideas

Dear Reader

Hilarity. This website continues to bring a smile to my face. Its a random website generator complete with the company "core" values, attributes, and full list of employees names and their korky titles. Keep on hitting the "Get Started" button. **To tech firms out there (you know who you are):** if your website looks anything like one of these, **start redesigning now.**

A NO NO, if you want to do build goodwill with the plans! I just saw the website for a consulting firm that has created a page that lists the salaries of all the public pension plan employees (I am protecting the identity of the firm). I can't tell you how annoying this is for the public plans. Now I know that the info is already publicly available, but must you make it that easy for whomever?

(repeat) First and foremost a **huge congrats to my daughter** who just graduated college. I cannot express how proud I am about the way she finished on time, despite an open heart surgery in 2016. The perspective on life she has gained has taught me a few humbling lessons too. **Congrats on the end of one phase and the start of the next!**

Lots of new papers have been accumulated in my library. Here are a few search links: Factor Models, Economic Outlook, Global Outlook, ESG, and Smart Beta. If you haven't already, pick a password (once) and you should be able to access all the libraries from now on. Bear in mind, as I add more pieces, the same link will give you more results. Make sure you explore around a bit (type "Show me research uploaded by ken").

PLEASE help us grow. So, if you like what you see, please encourage a friend, family member, or enemy to sign up for Investor DNA by forwarding this email to them. They can also subscribe here. Can you **ask just ONE friend to join**.

As a provider of aggregated news, our mission is to enable you to see interesting articles you may not have missed. So we wanted to let you know that we've updated our privacy policy **here**, in line with new GDPR data regulations. You can manage your email preferences at **the bottom of this email.** We use iContact as our service provider. you can access their privacy policy here.

Thank you for your time.
Kind Regards

Ken

Mixed Impacts of the Federal Tax Reform on Consumer Expectations Liberty Street Economics
The Tax Cuts and Jobs Act of 2017 changed the tax brackets, tax rates, credits and deductions for individuals and similarly altered corporate tax rates, deductions and exclusions. In this post, we examine whether the reform has shifted individuals' expectations about their financial situation and the macroeconomic outlook. We also ask whether households have already started to adjust their behavior in line with their expectations. In order to answer these questions, we use novel data from a special module of the New York Fed's Survey of Consumer Expectations (SCE) fielded in February 2018 to a nationally representative sample of heads of households.

Iran leader: Europe must protect trade with Tehran to save nuclear...
Iran's top leader set out a series of conditions on Wednesday for European powers if they want Tehran to stay in a nuclear deal after the U.S. exit, including steps to safeguard trade with Tehran and guarantee Iranian oil sales.

Why Trump's Strategy for Iran Is Likely to Lead to War
His hopes for a "better deal" are based on the myth—partly encouraged by Obama—that sanctions forced Iran to come to terms in 2015.

Iran: Supreme Leader Announces 7 Demands to Remain in Nuclear Deal
Iran's Supreme leader Ayatollah Ali Khamenei announced seven conditions for Tehran to remain in the Iran nuclear deal, formally known as the Joint Comprehensive Plan of Action (JCPOA), Al-Arabiya Television reported May 23.

Iranian officials split over response to U.S. demands
For all of Iran's fierce verbal response to fresh U.S. threats of tougher sanctions, some senior officials in Tehran believe the door to diplomacy should stay open.

[William Kidd | English pirate]
William Kidd: William Kidd, 17th-century British privateer and semilegendary pirate who became celebrated in English literature as one of the most colourful outlaws of all time. Fortune seekers have hunted his buried treasure in vain through succeeding centuries. Kidd's early career is obscure. It is believed he

_____

Funnies, Facts, Quotes, etc...
antemeridian
[an-tee-muh-rid-ee-uh n]

1: occurring before noon.
2: of or relating to the forenoon.

Quotes:
1: And what, pray tell, is the point of “Twitter”? Seriously, I don't “get” it. I meanest, I see what people use it for; I simply do not comprehend the urge to share publicly thy basest observations about celebrated thespians during ceremonies of awards and the quality of thy antemeridian coffee ...
Teddy Wayne, "My Kingdom for an English Course!" New York Times, November 9, 2013

2: In the first antemeridian hours there was a lull in the restless hotel night.
Vladimir Nabokov, Lolita, 1955

Origin: The Latin adverbial phrase ante merīdiem means “before midday, before noon.” The noun merīdiēs is a dissimilation of medīdiēs “middle of the day, midday, south,” formed from the adjective medius “middle, middle of” and the noun diēs “day.” The Roman polymath Varro (c116-c27 b.c.) wrote that he saw the archaic or dialectal form medīdiēs on a sundial in Praeneste (modern Palestrina), a towneast southeast of Rome. Antemeridian entered English in the 16th century.

All wars are follies, very expensive and very mischievous ones.
— Benjamin Franklin

WHITE PAPER

Europe's Strong GDPR Privacy Rules Go Into Full Effect

by Mathew J. Schwartz

The EU's General Data Protection Regulation has gone into full effect as of May 25, 2018. After a two-year grace period following the passage of the legislation, member states' data privacy watchdogs are now enforcing the strong privacy rules, which offer worldwide protection for Europeans.

POLICING & POLICY

City In India's Assam State Boosts Anti-Smoking Enforcement.

The Assam Tribune (IND) (7/13) reports "the Guwahati Police has intensified its drive against smoking at public places, fining violators under the Cigarettes and Other Tobacco Products Act, 2003 (COTPA). It is also acting tough against direct or indirect advertising, sale to or by minors, sale within 100 yards of schools and non-display of pictorial warnings on all tobacco product packages." The article quotes an official with the Sambandh Health Foundation and a cancer surgeon who is also a member of the Voice of Tobacco Victims.

Toronto To Deploy 200 Police Officers After Uptick In Shootings.

The Daily Mail (UK) (7/12, Hajjaji) reports Toronto "will deploy about 200 police officers in response to the recent spate in shootings." Police Chief Mark Saunders said, "Our men and women are getting the necessary intelligence and we have put a play-book together. ...This overlay will provide the opportunity of roughly 200 extra officers at various times of the day."

Secret Service Produces Guide To Preventing School Shootings.

The New York Times (7/12, Yoon-Hendricks) reports that the Secret Service's National Threat Assessment Center has prepared an "eight-step guide" on preventing school shootings. The report backs "the formation of 'threat assessment teams' that employ mental health, law enforcement and education professionals to help identify and support troubled youths." The Times says the report is "one of the most explicit pieces of literature to come out of the Trump administration on how to prevent targeted attacks." According to the center's chief, Lina Alathari, the report grew out of "decades of research showing that in a majority of school attacks, students knew of the perpetrators' plans or had concerns about their behavior."

CRIME & DRUGS

California Man Sentenced To 15 Years For Drug, Firearms Charges.

The Vallejo (CA) Times Herald (7/12) reports that Wesley Keith Smith, 35, of Fairfield, was sentenced in federal court Tuesday to 15 years in prison "for possessing methamphetamine with the intent to distribute it and for being a felon in possession of firearms, according to U.S. Attorney McGregor W. Scott." The investigation was conducted "by the Fairfield Police Department and the FBI Solano County Violent Crimes Task Force."

Texas Man Charged With Assault After Being Shot During Federal Operation.

The Houston Chronicle (7/12, Blakinger) reports, "A Houston man was charged with aggravated assault on a public servant Thursday after he was shot by a federal agent during a drug raid a day earlier, according to authorities." Michael Dewayne Dennis "was still in the hospital and expected to survive as of late Thursday, a Houston police spokesman said." According to the Chronicle, "Gunfire broke out around 6 a.m. Wednesday in the 6100 block of Grapevine, where the Drug Enforcement Administration and Immigration and Customs Enforcement's Homeland Security Investigations branch spearheaded a raid looking for guns and drugs," and "when three agents forced their way into one of the buildings, they spotted the suspect carrying a gun, according to Houston police." The man "allegedly refused to obey their verbal commands, authorities said," and court records indicate "he threatened two agents with a weapon." The Chronicle adds, "Fearing for their lives, at least one of the lawmen opened fire."

South Carolina Man Charged With Drugs Is Fugitive Wanted By FBI.

The Rock Hill (SC) Herald (7/12) reports Derrick McKnight Cook, “a man with ‘shaking hands’ caught by Rock Hill police for having illegal Oxycodone pills is being held without bond after officers found out the man was a wanted fugitive being sought by the FBI, authorities said.” The FBI “had been searching for Cook because Cook is accused of violating federal parole.”

Police Seek Help To Find Person Who Tried To Steal High Voltage Cable.

WDAF-TV Kansas City, MO (7/12) reports that police are requesting the public’s help to find someone who caused up to $24,000 in damages while attempting to steal a high voltage cable owned by Kansas City Power & Light on Wednesday night. The police say “evidence shows that whoever tried to steal the cable will have severe burns to their hands and face.”

In New Hampshire, Sessions Unveils Federal Effort Against Synthetic Opioids.

The New Hampshire Union Leader (7/12, Hayward) reports Attorney General Sessions yesterday “said federal prosecutors will bring drug dealing charges against anyone suspected of dealing fentanyl and other synthetic opioids such as carfentanil in New Hampshire, one of 10 states targeted in a crackdown on the powerful, deadly drugs.” Sessions “said he will add an additional prosecutor to the office of US Attorney in New Hampshire as part of the nationwide effort, labeled Operation Synthetic Opioid Surge.” Said Sessions, “When it comes to fentanyl dealers, there is really no such thing as a small case.” The Washington Times (7/12, Howell) quotes Sessions as further stating, “We are not going to accept the status quo. We will not allow this to continue. ... President Trump has made clear that business as usual is over.”

FROM IACP

The Collaborative Reform Initiative Technical Assistance Center (CRI-TAC), supported by the COPS Office, provides customized technical assistance at no cost to state, local, tribal, and campus agencies to advance the practice of community policing. A variety of services are provided including resource referral, web-based training, in-person training, virtual mentoring, meeting facilitation, and on-site consultation. What does your community need?

Request assistance.

Connecticut Authorities Pioneering Use Of K-9s To Detect Hidden Devices That Store Child Porn.

WRC-TV Washington (7/12) reports, “Amid the increase in [child sex exploitation] cases, law enforcement officials are seeking new tools and techniques to catch predators. The FBI and law enforcement officials in Connecticut are pioneering the use of K-9s to help detect and locate hidden electronic devices during the searches of the homes of suspected predators. About two dozen K-9s are currently deployed by police nationwide. The I-Team was allowed access to one of those K-9s training at the FBI’s New York City field office.”

Continuing Coverage: Orlando PD To Resume Testing Of Amazon Rekognition.

Fox News (7/12, Raffa) reports in continuing coverage that the Orlando Police Department once again will test “Amazon’s controversial facial recognition software...despite widespread criticism and privacy concerns by civil rights groups after the first sixth-month trial period ended late last month.” Orlando Mayor Buddy Dyer explained, “I think we didn’t have enough time to finish the testing that we wanted to do to see if we could perfect, along with Amazon, the technology for facial recognition, using it in crowds.” He “said Rekognition will be used in Orlando to incorporate extra technology-based policing to get more criminals off the streets, stressing that the service will not be used for investigative purposes.” According to Fox News, civil rights organizations and more than “100 Amazon employees [have] demanded...that the company stop selling the facial-recognition software to law enforcement agencies.”

Hackers Are Selling Law Firms’ Network Info On The Dark Web.

CNBC (7/12, Schlesinger, Day) reports hackers are selling access to law firms’ networks and files, according to cybersecurity firm Q6 Cyber. CEO Eli Dominitz said, “If you’re a law firm that’s involved in major transactions, [mergers & acquisitions] of publicly traded companies, you’re going to have a lot of sensitive information, inside information before it becomes publicly available.” If hackers were able to access that, he said, “I can trade that and manipulate stocks and make a lot of money.”
