Sent: Thursday, November 02, 2017 10:31 AM
To: wschwarz@springfieldpolice.net
Subject: Did we miss you at the 2017 IACP Conference?

Dear William,

We hope you enjoyed your time at the IACP Conference in Philadelphia. If you weren't able to stop by, NEC's Advanced Recognition Systems team shared how our high-performance facial recognition solutions are improving identity recognition, investigations and intelligence analysis.

To learn about how we are innovating in the facial recognition sector, watch this [short video](#) and read about how the [Irving PD's Crime Information Center](#) is using NEC's NeoFace® Reveal to more quickly identify a suspect and get this intelligence information to officers on the street - increasing their job efficiency and leading to a quicker apprehension.

From city streets to mass transit to stadiums, NEC's NeoFace solutions [help you enhance safety, investigate events and prevent recurring incidents.](#)

Questions? Let us know, and someone from the NEC team will contact you immediately.

Best regards,
The NEC Advanced Recognition Systems Team

Subject: (REMINDER) Interested in solving crimes faster? See NEC's NeoFace® in action at the IACP Conference

Dear William,

With threats on the rise and criminals growing more sophisticated by the day, citizens trust law enforcement agencies to stay one-step ahead. The key to keeping communities safe is accuracy, reliability and speed.

This year, NEC's Advanced Recognition Systems is a platinum sponsor at the IACP Conference 2017. **Visit us in Independence Ballroom III** at the Marriott (connecting to the Convention Center) to learn how NEC's high-performance facial recognition solutions are improving identity recognition, investigations and intelligence analysis.

From city streets to mass transit to stadiums, NEC's NeoFace solutions **help you enhance safety, investigate events and prevent recurring incidents.**

We invite you to **schedule a personalized demo or solution overview** with one of our subject matter experts so you can learn about how we are innovating in the biometrics sector and what successes we've had supporting our law enforcement clients.

Schedule Now!

Also, please join John Dowden's ***Biometrics and Video Analytics Workshop*** on Monday, October 23 at 1pm in room 105AB. As part of this workshop, John will explain and demonstrate the latest biometric and video analytic technologies that can be utilized to render advanced recognition systems.

We look forward to seeing you in Philadelphia at the IACP Conference!

Best regards,
The NEC Advanced Recognition Systems Team

Subject: Narcotics Surveillance and Identity Matching Tools

Good Morning Sir,

Do you have any interest in meeting to discuss a couple of our law enforcement solutions? There is no obligation to buy anything. This is just an informative and brief meeting.

These tools can be invaluable to identifying people and performing surveillance of gangs or drug offenders.

- **NeoFace Reveal:** Facial forensic image processing & matching, with the ability to pull faces off video, highly scalable for large systems - link to Mugshots etc. It is the most resistant to variants in aging, race, and pose angle.
- **NeoFace Watch:** real-time video surveillance tool that plugs into existing CCTV or mobile camera systems to search for people of interest (using advanced facial recognition). This can work in dim light conditions and uncooperative environments.

Thank you for your consideration,

Respectfully,

Paul B. Nihill

Subject: Narcotics Surveillance and Identity Matching Tools

Good Morning Sir,

Do you have any interest in meeting to discuss a couple of our law enforcement solutions? There is no obligation to buy anything. This is just an informative and brief meeting.

These tools can be invaluable to identifying people and performing surveillance of gangs or drug offenders.

- **NeoFace Reveal:** Facial forensic image processing & matching, with the ability to pull faces off video, highly scalable for large systems - link to Mugshots etc. It is the most resistant to variants in aging, race, and pose angle.
- **NeoFace Watch:** real-time video surveillance tool that plugs into existing CCTV or mobile camera systems to search for people of interest (using advanced facial recognition). This can work in dim light conditions and uncooperative environments.

Thank you for your consideration,

Respectfully,

Paul B. Nihill
