UAS Missions:

November 11, UAS mapping with FBI Boston EOD and MSP EOD at EVOC Ayer- using drone to produce a scale diagram related to safe distances during activation of a high-powered EOD X-Ray device. This device is capable producing fatal injuries during activation and testing needed to be done on a closed course. Two UAS missions completed and diagrams will be created showing safe radius during full power activation and half power activation. 2021-IMT-131

November 11, mapped EVOC course using UAS for SPA staff in order to show footprint required to continue the current level of training and to measure dimensions of the EVOC skill courses. Four UAS missions completed using M2P UAS. Diagrams to be created and disseminated to EVOC Staff. 2021-IMT-132

UAS drone detection requests & investigations:

November 5, Assisted Special Agent Michael Kenah (NCIS) with Drone Detection for an ongoing investigation at the (f) investigatory .

MWRA security inquiry into drone operation over (f) investigatory

Invest continues. 2021-IMT-128

November 6, Logan drone detection alerts to improper drone operation in Winthrop within restricted airspace .

Operator located and educated. 2021-IMT-129

November 7, Logan drone detection alerts to improper drone operation in (f) investigatory

invest continues 2021-IMT-130
