Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for writ of habeas corpus, holding that the circuit court did not err in denying the petition. Appellant was found guilty of two counts of delivery of a controlled substance and one count of maintaining a drug premises. In his habeas petition, Appellant argued that he was actually innocent because his arrest and conviction was based on the false testimony of a witness who had a lengthy criminal history. Appellant further argued that the writ should issue because he was not afforded effective assistance of counsel. The circuit court denied the petition. The Supreme Court affirmed, holding (1) Appellant's claims regarding the witness's credibility do not constitute a valid assertion that he was being unlawfully detained; and (2) Appellant did not actually connect an allegation of ineffective assistance of counsel to his allegation that he was unlawfully detained.

Chatmon v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 355
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Criminal Law

The Supreme Court denied Appellant's appeal from the order of the circuit court denying his petition to proceed in forma pauperis on the grounds that Appellant failed to state a colorable cause of action in a petition for writ of habeas corpus, holding that the circuit court did not abuse its discretion by denying Appellant's in forma pauperis petition. In his habeas petition, Appellant alleged that the trial court lacked jurisdiction in his criminal case. Before this case was submitted to the Supreme Court, Appellant filed two

motions, including a "Judicial Notice of a Void Judgment" and a "Notice to the Court." The Supreme Court denied the motions, holding that neither motion was cognizable under the Court's rules. The Court then affirmed the Supreme Court's denial of Appellant's in forma pauperis petition, holding that the circuit court correctly found that Appellant did not assert a colorable cause of action.

McClinton v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 353
Opinion Date: April 23, 2020
Judge: Karen R. Baker
Areas of Law: Criminal Law

The Supreme Court denied Petitioner's second petition requesting permission to proceed in the trial court with a petition for writ of error coram nobis, holding that Petitioner's proposed attack on the judgment had no merit. Petitioner was convicted of raping a mentally handicapped sixteen-year-old girl and was sentenced to life imprisonment. In his first petition for writ of error coram nobis Petitioner alleged a number of errors in the trial procedure. The first petition was denied. In his second coram nobis petition, Petitioner alleged violations of Brady v. Maryland, 373 U.S. 83 (1963). The Supreme Court denied the writ, holding that Petitioner failed to meet his burden of demonstrating a fundamental error of fact extrinsic to the record.

Siegel v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 359
Opinion Date: April 23, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from the circuit court's orders denying her motions to declare Ark. Code Ann. 5-62-106 (disposition

of animal) and Ark. Code Ann. 5-62-111 (prevention of cruelty) unconstitutional and conditionally granting her motion for return of seized property, holding that there was no final, appealable order in this case. Appellant was convicted of thirty-one misdemeanor counts of cruelty to animals. The circuit court subsequently dismissed the charges on speedy-trial grounds. The State appealed, and the Supreme Court dismissed the appeal on the grounds that it was not authorized. Appellant had filed motions seeking a declaration that sections 5-62-106 and -111 are unconstitutional and seeking the return of her seized property. The circuit court denied the constitutional claims and entered a conditional order granting Appellant's motion for return of seized property. Appellant appealed. The Supreme Court dismissed the appeal, holding that because the conditional order did not make specific findings as to the return of the property or as to damages and because it expressly left open the possibility of further proceedings, there was no final, appealable order in this case.

Thomas v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 354
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Appellant's conviction of capital murder, holding that the evidence was sufficient to sustain the conviction and that the circuit court did not err in denying Appellant's motion to suppress tracking data generated by his cellphone. On appeal, Appellant argued that the trial court erred by denying his directed-verdict motion because the evidence supported the defense's theory of the case that he did not intend to shoot the victim. Further, Appellant argued that the court abused its discretion in denying his motion to suppress evidence obtained from the seizure of AT&T phone records. The Supreme Court disagreed, holding (1) the evidence was sufficient to support the capital murder conviction; and (2) the circuit court correctly denied the motion to suppress.

California v. Landowski

Court: California Courts of Appeal
Docket: C080210(Third Appellate District)
Opinion Date: April 23, 2020
Judge: Andrea Lynn Hoch
Areas of Law: Constitutional Law, Criminal Law

Defendant Michael Reyes, Jr., an active Norteno gang member (from the Broderick Boys subset), confronted a former Norteno gang member (from the Franklin Boys subset), "S.," about a physical altercation that occurred between S. and Reyes's stepfather over a debt. That earlier altercation had taken place in front of Reyes's autistic younger brother. Reyes pulled out a handgun and asked S. if he had a problem. S., who was riding his bicycle with his wife, "R.," when Reyes confronted him with the gun, stopped briefly, told Reyes to put the gun down if he wanted to fight, and then started to ride away. This angered Reyes, prompting him to fire six rounds at S. from behind. S. Was hit but survived. R. Was a short distance in front of S., but was not hit. Defendants Liberty Landowski and Lisa Humble were with Reyes at the time of the shooting and aided in his efforts to avoid being apprehended by law enforcement authorities. Reyes, Landowski, and Humble were tried together before the same jury. Reyes was convicted of one count of attempted murder (Count 1), two counts of assault with a semiautomatic firearm (Counts 2 and 4), one count of possession of a firearm by a convicted felon (Count 5), and one count of possession of ammunition by a convicted felon (Count 6). In addition to various firearm and other enhancements, the jury found Reyes committed the crimes for the benefit of, at the direction of, or in association with a criminal street gang with the specific intent to promote, further, or assist in criminal conduct by gang members. The jury convicted Landowski and Humble of being accessories to Reyes's criminal conduct (Count 9) and also found true gang enhancement allegations attached to that crime. Reyes challenged the sufficiency of the firearm evidence presented to support his conviction, and all defendants challenged the sufficiency of the evidence supporting their gang enhancements. The Court of Appeal determined Senate Bill 620 (2017-2018 Reg. Sess.) gave the trial court discretion to strike firearm enhancements in the interest of justice and applied retroactively; and Senate Bill 136 (2019-2020 Reg. Sess.) eliminated such enhancements,

and also applied retroactively. To these issues, the Court remanded for the trial court's consideration. The Court affirmed the trial court in all other respects.

California v. May

Court: California Courts of Appeal
Docket: C084302(Third Appellate District)
Opinion Date: April 20, 2020
Judge: Ronald B. Robie
Areas of Law: Constitutional Law, Criminal Law

Defendant Raymond May was found guilty by jury of possessing an assault weapon and a machine gun based on his possession of a single AK-47 assault rifle while guarding a marijuana plantation. He was sentenced to probation, which included an electronic search condition. On appeal, defendant argued there was a lack of sufficient evidence corroborating his accomplice's testimony and demonstrating he knew of the firearm's illegal character. He further alleged the trial court erred in instructing the jury: that the accomplice instruction should have included language specifying that the accomplice testimony needed to prove more than defendant's mere presence or access to the firearm. Furthermore, defendant argued the electronic search condition imposed as part of his probation failed under the standards announced in California v. Lent, 15 Cal.3d 481 (1975). The Court of Appeal agreed defendant's electronic search condition should have been stricken, but otherwise affirmed.

California v. Perez

Court: California Courts of Appeal
Docket: E072260(Fourth Appellate District)
Opinion Date: April 20, 2020
Judge: Miller
Areas of Law: Constitutional Law, Criminal Law

In 2009, defendant-appellant Rudy Perez pled guilty to active gang

participation under Penal Code section 186.22(a), and unlawful possession of a firearm under section 12025(b)(6). In 2010, defendant pled guilty to residential burglary under section 459, and active gang participation under section 186.22(a). In August of 2018, the State filed a new felony complaint, alleging one of the prior gang participation convictions as a strike prior. In 2018, defendant moved to vacate the two prior gang participation convictions based upon changes in the law that rendered them invalid. The trial court denied defendant's motion. In 2019, defendant asked for reconsideration, which was again denied. Thereafter, defendant filed a timely notice of appeal from the denial of his motion to vacate the convictions. The Court of Appeal found that defendant pled guilty to street terrorism under Penal Code section 186.22(a) in 2009 and 2010, and it was undisputed that while committing these offenses, defendant acted alone. However, subsequent to defendant's guilty pleas, in 2012, the California Supreme Court held that a defendant had to act in concert with a fellow gang member in order to be guilty of street terrorism. At that time, defendant could have filed a state habeas petition requesting relief, but failed to do so. "Defendants can lose remedies that are established by law when they fail to invoke such remedies in time." Section 1473.7 became effective in 2017. In defendant's motion filed in the trial court, defendant failed to state what new evidence was discovered, instead arguing that the trial court was allowed "to vacate a conviction where the defendant is innocent as a matter of law or where vacating the conviction is in the interest of justice, even though the defendant is no longer in custody or otherwise restrained by the conviction." The Court of Appeal concurred with the trial court's reason to deny relief, determining that "while the outcome in this case may be unfortunate for defendant, we are not here to rewrite legislation. The Legislature could amend section 1473.7 to address issues raised in this case. However, under the laws, as written, we must uphold the trial court's order."

In re S.R.

Court: California Courts of Appeal
Docket: B300214(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Bendix

Areas of Law: Criminal Law

Father appealed the juvenile court's dispositional ruling removing daughter from his custody, arguing that his mere possession of child pornography does not demonstrate that he poses a substantial risk of harm to his daughter. The Court of Appeal affirmed the order and held that there is substantial evidence of risk of great harm to daughter—no matter how low the probability— that father will sexually abuse his daughter if he is provided unfettered access to her.

People v. Bell

Court: California Courts of Appeal
Docket: B288528(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Stratton
Areas of Law: Criminal Law

Defendant was convicted of one count of attempted robbery, one count of second degree murder, and one count of hit and run driving. The jury found not true the allegation that a principal was armed in the commission of the attempted robbery. The trial court found true the allegations that defendant had served four prior prison terms within the meaning of Penal Code section 667.5, subdivision (b). Defendant raised 13 claims of error on appeal. The Court of Appeal held that the section 667.5, subdivision (b) enhancement terms must be stricken and the matter remanded to the trial court for resentencing. The court also held that defendant forfeited some of his substantive claims and other lack merit. Finally, the court held that, if there is instructional error, the errors are harmless under any standard of review. Accordingly, the court affirmed the judgment of conviction.

People v. Drayton

Court: California Courts of Appeal
Docket: H046928(Sixth Appellate District)

Opinion Date: April 17, 2020
Judge: Danner
Areas of Law: Criminal Law

In 1991, the Wards and their teenage daughter awoke and discovered four men, including Drayton, inside their house. Two were armed. One told the daughter he was going to rape her and placed a firearm inside her vagina. Drayton told the man not to do it. Drayton had a gun and held Mrs. Ward down during the robbery. Two others shot and killed Mr. Ward. Drayton and the others left without seeking help for the Wards. Drayton did not shoot Mr. Ward or threaten to rape the daughter. Drayton surrendered the next day. Drayton's sole prior conviction was a misdemeanor; he had no reported history of violence. Drayton was sentenced to 29 years to life imprisonment. In 2019, Drayton sought resentencing under Penal Code 1170.95, declaring that he "was not a major participant ... or did not act with reckless indifference to human life." Senate Bill 1437, effective January 1, 2019, restricted the circumstances under which a person can be liable for felony murder and enacted Penal Code 1170.95, which allows an individual, previously convicted of felony murder, to petition to have his murder conviction vacated and to be resentenced. The court of appeal directed the trial court to hold a hearing under section 1170.95(d) and to accept the assertions in the petition as true unless facts in the record conclusively refute them as a matter of law. If, accepting the petitioner's assertions as true, he meets section 1170.95(a)'s requirements for relief, the court must issue an order to show cause. In assessing the prima facie showing, the trial court should not weigh evidence or make credibility determinations.

People v. Robinson

Court: California Courts of Appeal
Docket: B293746(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Wiley
Areas of Law: Criminal Law

After defendant penetrated an unconscious woman with his fingers, he challenged evidentiary rulings and requests a presentence conduct credit. The Court of Appeal held that the trial court properly excluded cumulative

evidence about past times the woman was intoxicated at the relevant bar, and any error in allowing a drug recognition expert to testify about whether the woman was incapacitated was harmless. However, the court held that the trial court undercalculated defendant's presentence custody credit because he was not convicted of a violent felony under Penal Code section 2933.1, which would otherwise limit those credits. Accordingly, the court directed the trial court to award defendant 104 days of presentence custody credit and to amend the abstract of judgment, affirming in all other respects.

People v. Torres

Court: California Courts of Appeal
Docket: B292551(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Kenneth R. Yegan
Areas of Law: Criminal Law

Where, as here, the trial court factually finds that a self-represented defendant has engaged in an attempt to intimidate a witness, the constitutional right of self-representation can, in the exercise of the trial court's sound discretion, be revoked. The Court of Appeal affirmed defendant's conviction and sentence for two counts of battery on an ex-girlfriend. In this case, the trial court did not abuse its discretion in revoking defendant's pro se status after he asked his sister to contact the victim and have her say that she was coerced by the police detective to "press charges."

Colorado v. Lujan

Court: Colorado Supreme Court
Citation: 2020 CO 26
Opinion Date: April 20, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law

Abel Lujan was charged with first-degree murder for the death of his girlfriend after she was found beaten and strangled behind a friend's house. At trial, two women testified for the State about Lujan's prior violent behavior towards them. Prior to admitting this evidence, the trial court read a limiting instruction, telling the jury that it could only consider the evidence for the purposes of establishing Lujan's motive, intent, or common plan. A copy of this instruction was not given to the jury for deliberations; however, the jury did receive an instruction at the close of the evidence explaining that certain evidence could only be considered for the limited purposes for which it was admitted. While deliberating, the jury submitted a question seeking clarification about the limiting instruction. Over defense counsel's objection, the trial court cleared the courtroom of the public and parties, leaving only the judge, bailiff, and court reporter; the judge then brought in the jury and reread the limiting instruction that it had previously read twice in open court. The jury ultimately found Lujan guilty of second-degree murder. Lujan appealed, arguing that the court's actions when rereading the jury instruction constituted a courtroom closure that violated his Sixth Amendment right to a public trial. A division of the court of appeals agreed and reversed Lujan's conviction. The State argued on certiorari review that the Colorado Supreme Court adopt a triviality standard, under which a defendant's constitutional right to a public trial was not violated when the closure at issue was trivial. In so doing, the State argued that the brief courtroom closure here was trivial and therefore did not violate Lujan's public trial right. The Court concurred with the State, adopted the standard and reversed the appellate court's decision.

Archer v. State

Court: Florida Supreme Court
Docket: SC19-841
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's successive motion to vacate his sentence of death under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying the Rule

3.851 motion. Appellant was convicted of first-degree murder, armed robbery, and grand theft. Appellant was sentenced to death for the murder. The Supreme Court affirmed the convictions but reversed Appellant's death sentence and remanded the case for a new penalty phase. After a new penalty phase, Appellant was again sentenced to death. In his successive Rule 3.851 motion, Appellant raised three claims. The circuit court denied relief. The Supreme Court affirmed, holding that the circuit court (1) properly denied Appellant's claim that his death sentence violated the Sixth and Eighth Amendments in light of Hurst v. Florida, 136 S. Ct. 616 (2016), and Hurst v. State, 202 So. 3d 40 (Fla. 2016); (2) correctly denied Appellant's claim that his sentence violated the Eighth Amendment; and (3) did not err in denying Appellant's claim of newly discovered evidence.

Collins v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0158
Opinion Date: April 20, 2020
Judge: David E. Nahmias
Areas of Law: Constitutional Law, Criminal Law

Appellant Tommy Collins was convicted of felony murder in connection with the stabbing death of 14-year-old Rueben Hand. Friends gathered to watch the Peach Drop on New Year's Eve 2010; a disagreement ensued and Hand was stabbed near the Five Points MARTS station shortly after midnight. Appellant's only argument on appeal was that the trial court plainly erred when it gave the jury the State's requested instruction on "revenge for a prior wrong." Seeing no error, "much less plain error," the Georgia Supreme Court affirmed.

Heyward v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0399
Opinion Date: April 20, 2020

Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Larmell Heyward was convicted by jury of malice murder and possession of a firearm during the commission of a felony in connection with the 2007 shooting death of Ramon Rogers. Heyward argued on appeal of those convictions that the trial court erred in denying his request to charge the jury on voluntary manslaughter. After review, the Georgia Supreme Court determined the trial court's refusal to give the charge was harmless, since, in the Court's estimation, there was no realistic probability that the jury would have accepted the "slight" evidence of voluntary manslaughter in the light of the strong evidence of malice murder.

Rickman v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0127
Opinion Date: April 20, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Victoria Rickman was convicted by jury of malice murder and a related firearm offense in connection with the shooting death of William Carter, Jr. Rickman and Carter had a tumultuous on-again, off-again relationship with a history of verbal and physical abuse, false accusations of sexual assault, empty threats to obtain temporary protective orders, and numerous calls to

911. In the days leading up to Carter's death, the pair was talking and meeting again despite a recent break-up. On one such 911 call, officers went to Rickman's residence responding to claims shots were fired. Rickman responded holding her small dog, hair wet, and in pajamas. She did not appear to be injured, and nothing in the home looked disturbed or out of place. Rickman told the officers, "he raped me again and I shot him." Officers found Carter laying face up on the bed naked with multiple gunshot wounds to his body. An autopsy revealed that Carter was shot ten times – four times in the chest, three times in the back, once on the arm, and twice in the head. Rickman's examining physician testified that he found no injuries on Rickman consistent with her description of events, and no signs of trauma to her vaginal cavity. Rickman appealed her convictions, arguing she was denied effective assistance of counsel and that the trial court erred in admitting improper character evidence. Finding no reversible error, the Georgia Supreme Court affirmed.

Read Opinion Are you a lawyer? **Annotate this case**.

Robinson v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0265
Opinion Date: April 20, 2020
Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Herbert Robinson appealed his convictions for malice murder, armed robbery, and possession of a firearm during the commission of a felony in connection with the death of Michael Moore. On appeal, he argued the trial court erred by allowing the State to use two firearms for demonstrative purposes during trial, and by allowing body-camera footage to be shown at trial. He also argued his trial counsel was ineffective for failing to object to a letter written by Robinson's cellmate being available to the jury for review during deliberations, and for failing to object to a visual aid used by the State during closing arguments. Because Robinson failed to show ineffective assistance of counsel or reversible error by the trial court, the Georgia Supreme Court affirmed.

Turner v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0247
Opinion Date: April 20, 2020
Judge: Warren
Areas of Law: Constitutional Law, Criminal Law

Appellant Ronald Turner appeals from his conviction for malice murder stemming from the stabbing death of William King. The stabbing took place outside an apartment at which Turner had driven in order to trade food for drugs. Turner testified in his own defense at trial and claimed that King hit him in the head with a beer bottle because Turner owed money to King from a prior drug transaction. Turner testified that he tried to get away from King, but that King chased him down and grabbed his jacket. According to Turner, King was getting ready to hit him again when Turner stabbed King in self-defense. Appealing his ultimate conviction, Turner contended he was denied the effective assistance of counsel in three respects. Seeing no reversible error after a review of the trial court record, the Georgia Supreme Court affirmed Turner's conviction.

Valrie v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0380
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Reuben Valrie was tried by jury and convicted of murder and other crimes in connection with the death of his infant daughter Aliyana. Valrie appealed, claiming that he was denied the effective assistance of counsel. Aliyana died as a result of closed head trauma, with a blunt-force abdominal injury as a secondary cause of death, which investigators determined was consistent with being shaken or dropped. At trial, Valrie presented the testimony of four expert witnesses who testified that Aliyana died of natural causes and that the injuries to her brain and abdomen were caused by

events such as post-mortem CPR and the “rough” handling of her body by first responders. The jury rejected this defense and found Valrie guilty of murder and the other charges. Valrie contended that his trial lawyer should have raised a hearsay objection to the admission of recorded statements that his girlfriend (and Aliyana's mother) made to police investigators (as well as the testimony of one of those investigators about some of those statements). Alternatively, Valrie argued that his lawyer should have sought the redaction of certain portions of the recorded statements that impugned his character. The Georgia Supreme Court concluded Valrie failed to present evidence that his trial counsel was deficient, or that he was prejudiced by any alleged failures. According, the Court affirmed conviction.

Williams v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0241
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Richard Williams, II, was tried by jury and convicted of murder in connection with the strangulation death of Cory Robinson. Williams and Robinson were involved in a sexual relationship and had been living together at an extended-stay hotel. Kelvin Spencer was a close friend of both Williams and Robinson. When Spencer met Williams at the hotel room, Williams looked angry and had scratches on his neck. Spencer saw Robinson lying on the floor in a “praying position.” Spencer did not believe Robinson was dead, and he helped Williams move clothes and other things to a U-Haul truck parked outside, in preparation for a move. Williams did not testify or present any evidence. Based on his lawyer’s opening and closing arguments, the defense theory was that Spencer killed Robinson because he was jealous of Williams’s relationship with Robinson. Williams’s sole claim on appeal was that he was denied the effective assistance of counsel when his trial lawyer failed to present as a defense that Williams accidentally killed Robinson during consensual erotic asphyxiation. He argued that his lawyer's discomfort with the topic of homosexual BDSM activity, and his own problems with the Georgia State Bar, precluded presentation of the "true"

version of events, and that Williams acceded to the lawyer's defense strategy only "through ignorance and that he did not know that a defense based on consensual erotic asphyxiation was available." Finding no reversible error, the Georgia Supreme Court affirmed conviction.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 20, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming Defendant's conviction of sexual assault in the first degree on the complaining witness pursuant to Haw. Rev. Stat. 707-730(1)(b), holding that the ICA did not err in affirming the family court. Specifically, the Supreme Court held (1) the jury should have been instructed to determine jurisdictional facts, but the error was harmless beyond a reasonable doubt; and (2) the ICA did not err in finding that there was no rational basis in the record to support providing the jury instruction of the lesser included offense of sexual assault in the third degree.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 22, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming the judgment of the family court convicting Defendant on two counts of sexual assault in the first degree, holding that the ICA did not err in affirming the family court. At issue on appeal was the jurisdiction of the family court to try Defendant and the propriety of

instructing the jury on a lesser included offense. The ICA affirmed, concluding that the family court had subject matter jurisdiction pursuant to Haw. Rev. Stat. 571-14(a)(1) and that there was no rational basis to support an instruction of the lesser included offense of sexual assault in the third degree. The Supreme Court affirmed, holding (1) although the jury should have been instructed to determine jurisdictional facts, the error was harmless; and (2) the family court was not obligated to instruct the jury on the lesser included offense of sexual assault in the third degree.

Idaho v. Burke

Court: Idaho Supreme Court - Criminal
Docket: 46841
Opinion Date: April 22, 2020
Judge: Moeller
Areas of Law: Constitutional Law, Criminal Law

Prior to sentencing, defendant James Burke was committed to the state mental hospital for 56 days to restore him to competency. After being evaluated and deemed competent to proceed to trial, Burke was returned to the county jail and later pleaded guilty pursuant to a plea agreement. At the conclusion of his sentencing hearing, Burke sought credit for the 56 days of time spent in court-ordered commitment. The district court denied the motion, concluding that commitment to a state mental hospital did not fall under the definition of 'incarceration' in Idaho Code section 18-309. After reviewing this issue carefully, the Idaho Supreme Court disagreed with the district court's "thorough and thoughtful analysis," holding that court-ordered commitment to state custody pursuant to Idaho Code sections 18-210 and 18-211 met the functional and legal definition of "incarceration" under Idaho Code section 18-309. "The extent of the liberty interests restricted by Burke's court-ordered commitment to State Hospital North are just too similar to imprisonment to conclude otherwise." Accordingly, the Court reversed the district court's order denying Burke's request for credit for time served and remanded the case for the district court to enter an order crediting him with the fifty-six days he spent committed to State Hospital North while the State restored his competency to face criminal charges.

State v. Gibbs

Court: Iowa Supreme Court
Docket: 18-1298
Opinion Date: April 17, 2020
Judge: Edward M. Mansfield
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of murder in the second degree, holding that Defendant's Fifth Amendment rights were invaded when the trial judge instructed the jury that Defendant was required to notify law enforcement of his use of deadly force, but the error was harmless. During trial, Defendant asserted the defense of justification in his shooting of the victim. At issue on appeal was whether the district court abused its discretion by giving a jury instruction incorporating the terms of Iowa Code 704.2B. The instruction included a statement that a person using deadly force is required to notify law enforcement about his use of deadly force. Defendant argued before the Supreme Court that both section 704.2B and the jury instruction incorporating that section violated his Fifth Amendment rights. The Supreme Court affirmed, holding (1) instructing the jury that a homicide defendant is required to notify a law enforcement agency of his use of deadly force violates the defendant's Fifth Amendment rights; but (2) any error in this case was harmless beyond a reasonable doubt.

State v. Broxton

Court: Kansas Supreme Court
Docket: 114675
Opinion Date: April 17, 2020
Judge: Stegall
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions for second-degree murder, burglary, and theft but reversed Defendant's sentences, holding

that any error during the guilt phase was harmless but that the district court erred by scoring Defendant's prior Florida burglary conviction as a person felony instead of a nonperson felony. On appeal, the court of appeals concluded that a trial court may instruct the jury on felony murder even though the State only charged the defendant with premeditated first degree murder. The Supreme Court disagreed, holding (1) the court of appeals erred in concluding that a district court may elect to provide a felony-murder instruction when that crime was not charged, and the district court properly found that the felony-murder instruction was not legally appropriate in this case; (2) the district court erred by excluding from evidence an exculpatory document from a Florida homicide investigation on the ground it was not relevant, but the error was harmless; and (3) the district court improperly scored Defendant's prior Florida burglary conviction as a person felony.

State v. Corbin

Court: Kansas Supreme Court
Docket: 119665
Opinion Date: April 17, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed the ruling of the district court on remand resentencing Defendant to his original mandatory term of imprisonment after once again finding he was not a person with intellectual disability, holding that the district court did not abuse its discretion when it rejected Defendant's intellectual disability motion and imposed a mandatory term of imprisonment. Defendant pled no contest to first-degree premeditated murder. Before sentencing, Defendant filed a motion pursuant to Kan. Stat. Ann. 21-6622(b) asserting that he was a person with intellectual disability and was thus not subject to a mandatory minimum prison term. The district court denied the motion and sentenced Defendant to a hard twenty-five life sentence. While Defendant's appeal was pending, the Legislature amended Kan. Stat. Ann. 76-12b01(i), which provides new standards for deciding intellectual disability. The Supreme Court reversed and remanded for reconsideration of Defendant's motion using the new criteria. On remand, the district court reaffirmed its earlier ruling and again sentenced Defendant

to a hard twenty-five life sentence. The Supreme Court affirmed, holding that the district court's ruling was reasonably based on the law and was supported by substantial competent evidence.

State v. Frazier

Court: Kansas Supreme Court
Docket: 117456
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the district court affirming the judgment of the district court denying Defendant's motion to withdraw plea of no contest to one count of possession of heroin with intent to distribute, holding that the district court's decision in finding no good cause for Defendant to withdraw his plea was based on errors of fact and law, which were grounds for finding abuse of discretion. On appeal, Defendant argued that the district court abused its discretion in denying his motion to withdraw his plea of no contest based on misleading or false statements contained in the plea agreement. The court of appeals affirmed the district court. The Supreme Court reversed, holding (1) there was enough uncertainty in this case to indicate that Defendant's plea agreement was not understandingly made; and (2) therefore, Defendant must be allowed to withdraw his plea.

State v. Harris

Court: Kansas Supreme Court
Docket: 117362
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the judgment of the court of appeals affirming Defendant's conviction of possession fo marijuana, holding that Defendant's waiver of jury trial was legally insufficient. On appeal, Defendant argued that

he did not properly waive his right to a jury and asserted three other issues. The Supreme Court reversed the judgment of the court of appeals affirming Defendant's convictions without addressing the three remaining issues, holding that because the district court failed properly to apprise Defendant of his right to a jury trial and failed to ensure that Defendant understood the nature of the right he was giving up, Defendant's constitutional right to a jury trial was violated in this case.

State v. Uk

Court: Kansas Supreme Court
Docket: 119712
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree premeditated murder, holding that the district court did not err in its challenged instructions to the jury. Specifically, the Supreme Court held (1) the district court did not err in refusing to give the jury Defendant's requested instruction on voluntary manslaughter as a lesser included offense of first-degree murder because the instruction was not factually appropriate; and (2) the district court did not commit clear error in issuing an unmodified version of Instruction No. 11, which contained the definition of "premeditation" and mirrored PIK Crim. 4th 54.150(d) because the instruction was legally appropriate.

State v. Catruch

Court: Maine Supreme Judicial Court
Citation: 2020 ME 52
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgments of the trial court

terminating Appellant's participation in the Co-Occurring Disorders and Veterans Court (Veterans Court), holding that the court did not err or abuse its discretion in terminating Appellant's participation in the Veterans Court. The Veterans Court is a criminal docket that provides judicial monitoring, specialized treatment, and other services for military veterans who have disorders often attributable to their military service. Appellant was charged with leaving the scene of an accident and three other offenses. Appellant was admitted to the Veterans Court. Agreeing to sentencing outcomes in a plea agreement and entering into a bail contract, Appellant pleaded guilty to all charges against him. The court later terminated Appellant's participation in the Veterans Court, finding that Appellant had violated the conditions of his bail contract. The Supreme Judicial Court affirmed, holding (1) this matter was properly before the Court; and (2) given Appellant's failure to comply with the requirements for participation in the treatment court and his violations of the agreements, his termination from the Veterans Court was warranted.

State v. Paquin

Court: Maine Supreme Judicial Court
Citation: 2020 ME 53
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Constitutional Law, Criminal Law

In this appeal from Defendant's conviction for eleven counts of gross sexual misconduct, the Supreme Judicial Court vacated the judgment of conviction on one count, vacated the dismissal of other counts and remanded for entry of a judgment of acquittal on those counts, and affirmed in all other respects, holding that Defendant's convictions on both Counts 5 and 30 violated his double jeopardy protections and that the court erred in allowing the State to dismiss Counts 27, 28, and 29 during trial without Defendant's consent. The indictment charged Defendant with fifteen counts (Counts 1-13, 30-31) of gross sexual misconduct against the victim and sixteen counts (Counts 14-29) of gross sexual misconduct against a second alleged victim. During trial, the court granted Defendant's motion for a judgment of acquittal on Counts 10-13, and the State dismissed Counts 27-29. Defendant was

found guilty of Counts 1-9 and 30-31 and not guilty on the remaining counts. The court entered judgment in accordance with the verdict. The Supreme Judicial Court held that the trial court erred in failing to rule that the Double Jeopardy Clause barred convictions on both Counts 5 and 30 and allowing the State to dismiss Counts 27, 28, and 29 rather than entering a judgment of acquittal on those counts.

Watson v. State

Court: Maine Supreme Judicial Court
Citation: 2020 ME 51
Opinion Date: April 21, 2020
Judge: Joseph Jabar
Areas of Law: Criminal Law

The Supreme Judicial Court vacated the judgment of the unified criminal docket denying Appellant's petition for post-conviction review, holding that Appellant was deprived of the effective assistance of counsel when his trial attorney played a video of the ten-year-old victim's interview with police and that Appellant was adversely affected. Appellant was convicted of two counts of gross sexual assault, one count of unlawful sexual contact, and one count of visual sexual aggression against a child. The Supreme Court affirmed. Appellant later filed a petition for post-conviction review claiming that his trial attorney's representation was deficient because introducing the videotaped recording of the victim's entire interview with law enforcement was unnecessary to provide evidence supporting the victim's potential motive to fabricate the allegations. The post-conviction court denied denied the petition. The Supreme Court vacated the judgment below, holding that trial counsel's conduct was deficient and that counsel's actions rose to the level of comprising the reliability of Appellant's conviction and undermining confidence in it.

Commonwealth v. Mazza

Court: Massachusetts Supreme Judicial Court

Docket: SJC-11363
Opinion Date: April 21, 2020
Judge: Budd
Areas of Law: Criminal Law

The Supreme Judicial Court reversed the order of the superior court denying Defendant's motion for a new trial and set aside the jury's verdicts of first degree murder and robbery, holding that a recently discovered witness statement made to the police ago constituted newly discovered evidence that "would probably have been a real factor in the jury's deliberations." At issue was Defendant's sixth motion for a new trial, which was predicated on newly discovered evidence consisting of, among other things, a recently discovered statement made to the police in 1972. The superior court denied the motion. As to the police statement, the judge found that it did not constitute newly discovered evidence because Defendant failed to establish that defense counsel did not have possession of it at the time of trial. The Supreme Judicial Court reversed and remanded the case for a new trial, holding (1) Defendant sustained his burden of establishing that defense counsel did not have the 1972 police statement prior to or at trial, and therefore, the statement constituted newly discovered evidence; and (2) there was a substantial risk that the jury would have reached a different conclusion had the evidence been admitted at trial.

Docket: SJC-12750
Opinion Date: April 16, 2020
Judge: Gaziano
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed the judgment of the district court denying Defendant's motions to suppress, holding that the limited use of automatic license plate readers (ALPRs) in this case did not implicate constitutional protections against unreasonable searches. While police were investigating Defendant on suspicion of drug distribution they used ALPRs on two bridges to track Defendant's movements. The police accessed historical data via ALPR technology and received real-time alerts, the last of

which led to Defendant's arrest. Defendant filed motions to suppress the ALPR data and the fruits of the arrest. The superior court denied the motions. The Supreme Judicial Court affirmed, holding that while the widespread use of ALPRs in the Commonwealth could implicate a defendant's constitutional protected expectation of privacy in the whole of his public movements, that interest was not invaded by the limited extent and use of the ALPR data in the instant case.

Garden v. Commonwealth

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12821
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of a single justice of the court denying Petitioner's petition for extraordinary relief under Mass. Gen. Laws ch. 211, 3 seeking an order vacating Petitioner's plea to aggravated rape and dismissing the underlying indictment, holding that the single justice did not err or abuse his discretion in denying relief. The issues raised by Petitioner had all been raised and adjudicated through the normal appellate process. Petitioner then filed a motion to withdraw his guilty plea. The motion was denied, and the Appeals Court affirmed. In this petition for extraordinary relief, Petitioner sought an order vacating his plea to aggravated rape and dismissing the underlying indictment. The single justice denied relief. The Supreme Judicial Court affirmed, holding that the superintendence power was not available as an additional layer of appellate review once all other avenues had been exhausted.

In re Mitchell

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12910
Opinion Date: April 22, 2020

Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of the county court denying, without a hearing, Petitioner's petition for relief under Mass. Gen. Laws ch. 211, 3, holding that the single justice did not err or abuse his discretion in denying relief. Defendant was convicted of several offenses. The Appeals Court reversed the convictions and remanded the matter for a new trial. Thereafter, the Commonwealth filed a nolle prosequi as to all the charges. In his Mass. Gen. Laws ch. 211, 3 petition, Defendant alleged that no crime had been committed and that he was wrongfully prosecuted. The single justice denied relief. The Supreme Judicial Court affirmed, holding that Defendant did not demonstrate entitlement to the exercise of this Court's superintendence powers.

State v. Reek

Court: Minnesota Supreme Court
Docket: A19-0153
Opinion Date: April 22, 2020
Judge: G. Barry Anderson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree murder, holding that there was no error in the proceedings below. Specifically, the Supreme Court held (1) Appellant's right to a fair trial before an impartial tribunal was not violated when the district court stated that it might reconsider its prior Spreigl ruling if the defense presented certain witnesses; (2) the jury instructions on accomplice liability were plainly erroneous, but Appellant failed to establish that there was a reasonable likelihood that the error had a significant effect on the verdict; (3) the prosecutor did not commit misconduct in his closing arguments regarding the law of accomplice liability; (4) the district court did not abuse its discretion by granting the State’s motion to admit evidence of appellant’s past convictions for impeachment purposes, including by allowing the specific convictions to be disclosed to the jury; and (5) Appellant’s pro se arguments were without merit.

Huff v. Brown

Court: Nebraska Supreme Court
Citation: 305 Neb. 648
Opinion Date: April 23, 2020
Judge: Lindsey Miller-Lerman
Areas of Law: Communications Law, Criminal Law

The Supreme Court reversed the portion of the district court's order granting in part a writ of mandamus requiring Doug Brown, the sheriff of Furnas County, to provide records to Herchel Huff pursuant to the public records statutes, holding that the district court erred when it determined that Huff had shown that Brown had a clear duty to provide the requested records. Huff, an inmate, sought, among other documents, the criminal history

records of jurors who had convicted hims. Furnas County sheriff Kurt Kapperman required a deposit of $750 before fulfilling the request. Huff subsequently filed a petition for writ of mandamus naming Kapperman as the defendant and seeking an order compelling Kapperman to release all requested documents. The court permitted Huff to substitute Brown, the current sheriff, in the caption of the case in place of Kapperman and granted in part mandamus. The Supreme Court reversed in part, holding that the district court (1) did not err when it substituted Brown's name for Kapperman's; but (2) erred in issuing mandamus because Huff failed to demonstrate a prima facie case that he had been denied a request for public records that the sheriff had a clear duty to provide under Neb. Rev. Stat. 84-712.

State ex rel. Kendrick v. Parker

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1509
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals denying Appellant's request for a writ of prohibition and/or mandamus against Montgomery County Court of Common Pleas Judge E. Gerald Parker Jr., holding that the court of appeals correctly determined that Appellant's claim was barred by res judicata. Appellant sought a petition for writ of prohibition and/or mandamus against Judge Erik Blaine, the successor to the judge who sentenced Appellant, alleging that the sentencing court patently and unambiguously lacked jurisdiction to sentence him. Judge Parker, who had succeeded Judge Blaine, subsequently filed a motion for summary judgment. The court of appeals granted summary judgment for Judge

Parker, concluding that Appellant failed to demonstrate that the sentencing court patently and unambiguously lacked jurisdiction or that he lacked an adequate remedy at law and that res judicata barred Appellant's claim. The Supreme Court affirmed, holding that Appellant's claim was barred by res judicata.

State ex rel. Nelson v. Russo

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1541
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus seeking to compel Cuyahoga County Court of Common Pleas Judge Nancy Margaret Russo to vacate the consecutive prison sentences imposed on Appellant in 1987, holding that Appellant had an adequate remedy at law and was barred from asserting additional claims of sentencing error he could have raised in his previous mandamus action. In 1987, Appellant was convicted of four counts of rape and one count of kidnapping. Appellant was sentenced to prison terms of fifteen to twenty-five years for each of the five counts, to be served consecutively. In 2019, Appellant sought a writ of mandamus to compel Judge Russo to vacate his consecutive sentences. The court of appeals dismissed the writ action, concluding that res judicata barred Appellant's claim and that his prior appeals were an adequate remedy at law to address the alleged defect in his consecutive sentences. The Supreme Court affirmed, holding that Appellant was not entitled to a writ of mandamus in this case.

Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's original action seeking a writ of procedendo and/or mandamus to compel Hamilton County Court of Common Pleas Judge Melba Marsh to issue a corrected sentencing entry, holding that the court of appeals correctly dismissed the petition as moot. Appellant was convicted of murder with a repeat-violent-offender specification. Appellant later asked the trial court to correct his sentence, arguing that he had improperly been sentenced to postrelease control. On remand, Judge Marsh vacated the postrelease-control sentence. Appellant appealed that order. The court of appeals noted that the trial court had not set forth all the information required under Crim.R. 32(C) in a single document and dismissed the appeal for lack of a final, appealable order. Appellant then filed this original action seeking to compel Judge Marsh to issue a corrected sentencing entry that constitutes a final, appealable order. Judge Marsh issued a nunc pro tunc sentencing entry that constituted a final, appealable order. The court of appeals then dismissed the petition as moot. The Supreme Court affirmed, holding that because Judge Marsh performed the act Appellant requested, the court of appeals dismissed the petition as moot.

State ex rel. Steiner v. Rinfret

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1510
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus against Holmes County Court of Common Pleas Judge Robert D. Rinfret, holding that the court of appeals correctly determined that Appellant had an adequate remedy in the ordinary course of the law. Appellant, who was serving consecutive prison terms for five convictions, filed a petition for a writ of mandamus arguing that Judge Rinfret improperly sentenced him to a prison

term of nine years for his attempted rape conviction instead of the maximum term of eleven years. The court of appeals dismissed the petition, determining that Appellant had failed to file a mandatory affidavit of his prior civil actions and had an adequate remedy in the ordinary course of the law. The Supreme Court affirmed, holding that relief in mandamus was not available because Petitioner had an adequate remedy in the ordinary course of the law.

State v. Jeffries

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1539
Opinion Date: April 22, 2020
Judge: Donnelly
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals upholding Defendant's convictions of four counts related to two specific instances of sexual abuse of D.S., holding that the trial court and court of appeals correctly applied Ohio's rape-shield law and determined that evidence of D.S.'s prior nonconsensual sexual assault was inadmissible. On appeal, Defendant asserted that the trial court erred in prohibiting him from introducing evidence during trial that D.S. had previously been sexually assaulted by another person, arguing that the rape-shield law applies only to an accuser's prior consensual sexual activity. The lower court held that Ohio's rape-shield law addresses all sexual activity, not only consensual sexual activity. The court of appeals affirmed. The Supreme Court affirmed, holding (1) the plain meaning of the term "sexual activity" as used in the rape-shield law includes both consensual and nonconsensual sexual activity; and (2) therefore, all sexual activity is barred from admission into evidence by the rape-shield, absent certain exceptions listed in the law.

Pennsylvania v. Britton

Court: Supreme Court of Pennsylvania

Docket: 55 MAP 2018
Opinion Date: April 22, 2020
Judge: Max Baer
Areas of Law: Constitutional Law, Criminal Law

California law enforcement officers interviewed Appellant Stacy Britton in her California residence and, unbeknownst to her, recorded those interviews. Over Appellant's objection, Pennsylvania used those recordings as evidence to help convict Appellant of murder in Pennsylvania. The Pennsylvania Supreme Court granted allowance of appeal to examine whether the California law enforcement officers were acting as agents of the Pennsylvania State Police when they recorded the interviews with Appellant in her California home, and if so, whether Pennsylvania's constitutional and statutory protections were available to Appellant under those circumstances. The Court concluded the California law enforcement officers were not acting as agents of the Pennsylvania State Police when they interviewed Appellant, making analysis of whether any Pennsylvania-specific constitutional or statutory protections unwarranted. Because the Supreme Court concluded the Pennsylvania trial court reached the proper result in this matter, it affirmed that court's judgment.

Pennsylvania v. Copenhaver

Court: Supreme Court of Pennsylvania
Docket: 48 MAP 2019
Opinion Date: April 22, 2020
Judge: Thomas G. Saylor
Areas of Law: Constitutional Law, Criminal Law

In August 2015, a deputy sheriff conducted a vehicle stop of Appellant Victor Copenhaver's pickup truck. Upon approaching the truck, the deputy noticed an odor of alcohol and marijuana emanating from the passenger compartment. After administering field sobriety tests, he arrested Appellant for suspected driving under the influence of alcohol and controlled substances ("DUI"). Appellant was ultimately charged with DUI and other offenses. Appellant challenged the deputy's authority to conduct a traffic stop and sought suppression of all evidence obtained during the encounter. Rather than presenting testimony at a suppression hearing, the parties

stipulated that Appellant was driving the vehicle in question and that the deputy had training and qualifications equivalent to that of a police officer. The parties also agreed that the vehicle stop occurred as a result of the deputy observing the tailgate to the pickup truck being in a down position, which caught the deputy's attention. The deputy further observed the registration on the pickup truck was expired, and additionally, the registration number was identified as belonging to a vehicle other than the one on which it was attached. The issue this case presented for the Pennsylvania Supreme Court's review was whether the deputy could lawfully conduct the traffic stop based on the expired registration sticker, on a theory that such a violation amounts to a breach of the peace. The Supreme Court concluded driving a vehicle with an expired registration did not entail a breach of the peace. It vacated the superior court's order insofar as it held that the expired registration was a breach of the peace, thus alone authorizing the deputy to stop Appellant's vehicle. Notably, in light of its holding, the Supreme Court found the superior court did not proceed to consider other relevant questions, such as whether the parties' factual stipulation should have been read as indicating that the officer's understanding that the registration sticker was associated with a different vehicle arose in the pre-stop timeframe – consistent with the Commonwealth's position throughout this litigation. "These issues should be resolved in the first instance by the intermediate court on remand."

Pennsylvania v. Tedford

Court: Supreme Court of Pennsylvania
Docket: 773 CAP
Opinion Date: April 22, 2020
Judge: Donohue
Areas of Law: Constitutional Law, Criminal Law

Appellant Donald Tedford was convicted of first-degree murder and rape on February 6, 1987. He appealed the dismissal of his second petition for relief filed pursuant to the Post Conviction Relief Act ("PCRA"), on December 2, 2014, as amended by a counseled petition on May 5, 2015, and a supplemental petition filed on June 9, 2015. In connection with his initial filings, Tedford sought wholesale discovery of the prosecution's entire file,

but the PCRA court concluded that the petition (as amended) was not timely filed. Tedford also appealed the PCRA court's order denying his supplemental PCRA petition, in which he requested discovery, an evidentiary hearing, and/or a new trial based upon the admission of expert testimony presented at trial related to microscopic hair analysis. The PCRA court concluded that pursuant to PCRA Section 9545(b)(1)(ii), it had jurisdiction to consider the merits of Tedford's newly-discovered-facts claims, but ultimately it concluded Tedford had not asserted a meritorious claim in accordance with Section 9543(a)(2)(vi). Finding no reversible error in that analysis, the Pennsylvania Supreme Court affirmed dismissal of the petition for relief.

Pennsylvania v. Trahey

Court: Supreme Court of Pennsylvania
Docket: 38 EAP 2018
Opinion Date: April 22, 2020
Judge: Wecht
Areas of Law: Constitutional Law, Criminal Law

The trial court granted Timothy Trahey's motion to suppress the results of a blood test that revealed his blood alcohol concentration ("BAC"), finding no justification for the investigating officers' failure to obtain a search warrant before conducting the test. On the Commonwealth's appeal, the Superior Court reversed, opining that the Commonwealth's evidence sufficiently established the existence of exigent circumstances, thus excusing the absence of a warrant. The Pennsylvania Supreme Court reversed, finding that while the exigency analysis is an objective one, "even disregarding the officers' subjective motivations, or their candid acknowledgment that they would have obtained a search warrant if they thought it necessary, there was no time-sensitive need to conduct a warrantless blood test under the circumstances of this case. Accordingly, the Superior Court's conclusion that the test was justified by exigent circumstances was drawn in error."

In re Greg Abbott

Court: Supreme Court of Texas
Docket: 20-0291
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court conditionally granted mandamus relief to the State seeking review of a temporary restraining order (TRO) blocking enforcement of Executive Order GA-13, which changes the rules applicable to judges' decisions regarding pre-trial bail, against judges, holding that the trial court lacked jurisdiction to order the judges' requested relief, even temporarily. GA-13 suspends certain statutes authorizing trial judges to release jail inmates with violent histories during the state of disaster due to the threat of the novel coronavirus. Plaintiffs alleged that GA-13 is unconstitutional and exceeds the governor's statutory emergency powers. Sixteen of the plaintiffs were Texas trial judges alleging that GA-13 improperly interferes with their judicial authority to make individualized bail decisions, and the other plaintiffs were public interest organizations and lawyer associations. The trial court issued a TRO blocking enforcement of GA-13 against judges. The Supreme Court conditionally granted mandamus relief, holding that the alleged threat of a criminal prosecution in this case did not give the judges standing to seek the invalidation of GA-13, and therefore, the trial court lacked jurisdiction to order their requested relief.

Stahmann v. Texas

Court: Texas Court of Criminal Appeals
Docket: PD-0556-18
Opinion Date: April 22, 2020
Judge: Barbara Hervey
Areas of Law: Constitutional Law, Criminal Law

Appellant Karl Stahmann was involved in an automobile accident, after which he threw a bottle of promethazine, a controlled substance, over a nearby wire fence before law enforcement arrived. The bottle landed two to three feet past the fence in plain view. He was convicted of third-degree

felony tampering with physical evidence and was sentenced to 10 years' confinement and fined $5,000. The judge suspended his sentence and placed him on community supervision for 10 years. Stahmann appealed, arguing in part that the evidence was insufficient to prove that he destroyed, altered, or concealed the prescription bottle. The court of appeals agreed that the evidence was insufficient, but instead of rendering an acquittal, it reformed the judgment to show that Stahmann was convicted of the lesser-included offense of attempted tampering with physical evidence, a state-jail felony. After review of the evidence presented at trial, the Texas Court of Criminal Appeals concluded the evidence was indeed insufficient to prove that Appellant altered the prescription pill bottle when he threw it over the fence because the mere act of throwing the bottle did not change the bottle itself. "While a rational jury could have reasonably inferred that Stahmann intended to conceal the pill bottle when he threw it over the wire fence, the evidence shows that he failed to conceal it as he intended because the bottle landed short of the bush in plain view on top of some grass." The Court affirmed the trial court's judgment.

Blanke v. Board of Pardons & Parole

Court: Utah Supreme Court
Citation: 2020 UT 16
Opinion Date: April 16, 2020
Judge: Himonas
Areas of Law: Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the district court's denial of Appellant's petition for extraordinary relief, holding that, under the circumstances, the Utah Board of Pardons and Parole need not afford Appellant the due process protections explained in Neese v. Utah Board of Pardons and Parole, 416 P.3d 663 (2017), before it could determine that Appellant was a sex offender and condition his parole on sex offender treatment. Appellant was serving a prison sentence for his convictions of attempted child kidnapping and kidnapping. Because he was convicted of attempted child kidnapping Appellant was considered a sex offender under the sex offender registration statute. Further, Appellant admitted in his presentence report that he had sexual intercourse with a

fifteen-year-old. Appellant filed a petition for extraordinary relief alleging that the Parole Board had violated his due process rights by conditioning his parole on completion of sex offender treatment even though he had not committed a sex offense. Summary judgment was granted for the Parole Board. The Supreme Court affirmed, holding that the Parole Board owed Appellant no additional process before it considered unconnected sex offenses in its decision to require Appellant to undergo sex offender treatment.

Washington v. Escalante

Court: Washington Supreme Court
Docket: 97268-1
Opinion Date: April 23, 2020
Judge: Steven González
Areas of Law: Constitutional Law, Criminal Law

Alejandro Escalante was detained for hours in a secured area at a border crossing and, the State conceded, interrogated by federal agents without Miranda warnings. Statements he made during that interrogation were used by the State to convict him of drug possession. While a traveler briefly detained and questioned at the border was typically not "in custody" for Miranda purposes, "the government's power to detain and question people at the border without implicating Miranda has limits." Here, the Washington Supreme Court determined those limits were reached. "This border detention created the type of inherently coercive environment that demands Miranda warnings to ensure an individual's choice to speak is the product of free will." The Supreme Court held that Escalante was in custody when he was interrogated and reversed.

Washington v. Haggard

Court: Washington Supreme Court
Docket: 97375-0
Opinion Date: April 23, 2020

Judge: Barbara Madsen
Areas of Law: Constitutional Law, Criminal Law

A class C felony "washes out" and is omitted from a defendant's offender score as long as he or she is not convicted of any crime within five years of the last date of release from confinement. David Haggard was convicted of a misdemeanor offense within this five-year period, which was dismissed pursuant to RCW 3.66.067. When Haggard later pleaded guilty to burglary and arson, the trial court included prior class C felonies in his criminal history, finding that the dismissed misdemeanor conviction interrupted the washout period for those offenses. Haggard contended on appeal this was error. The Washington Supreme Court determined that because a dismissed conviction constituted a "conviction" under the Sentencing Reform Act of 1981 (SRA), and misdemeanor dismissal and vacation were distinct processes, so Haggard's offender score was properly calculated.

State v. Taylor

Court: Supreme Court of Appeals of West Virginia
Docket: 18-0502
Opinion Date: April 21, 2020
Judge: Walker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court giving Petitioner credit for twelve days of time served toward the sentence he received for his felony conviction although Petitioner spent additional time in confinement for other charges that were dismissed in the universal plea agreement, holding that to grant Petitioner additional credit for time served would do little more than reward Petitioner for habitual criminal behavior. Petitioner was charged with several crimes and agreed to resolve the pending charges against him in a universal plea agreement. Under the terms of the agreement, Petitioner agreed to plea guilty to the charge of felony carrying a concealed firearm by a prohibited person. In exchange, the State agreed to drop the remaining charges. After he was sentenced, Petitioner argued that, in addition to the twelve days of credit for time served he was granted, he was constitutionally entitled to credit for time served

while he was incarcerated for charges that were resolved in the universal plea agreement. The Supreme Court affirmed, holding that Petitioner's circumstances implicated neither double jeopardy nor equal protection of the law such that additional credit for time served was constitutionally mandated.

State v. Harrison

Court: Wisconsin Supreme Court
Dockets: 2017AP002441-CR, 2017AP002440-CR
Opinion Date: April 17, 2020
Judge: Patience D. Roggensack
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the decision of the court of appeals reversing an order of the circuit court that granted sentence credit to Defendant, holding that the court of appeals correctly found that Defendant was not entitled to sentence credit but erred by advancing the commencement of Defendant's terms of extended supervision for Defendant's 2007 and 2008 cases. Specifically, the Court held (1) Defendant was not entitled to sentence credit under Wis. Stat. 973.155(1)(a) because the days he spent in custody for which he sought sentence credit were not in connection with the courses of conduct for which those sentences were imposed; and (2) the court of appeals erred by advancing the commencement of Defendant's terms of extended supervision for his 2007 and 2008 cases to the date they would have begun but for Defendant's confinement for unrelated convictions that were later set aside, holding that whether to employ advancement is a public policy decision best left to the legislature.

Rethinking Retroactivity in Light of the Supreme Court's Jury Unanimity Requirement

MICHAEL C. DORF

verdict post

In light of the U.S. Supreme Court's decision Monday in *Ramos v. Louisiana*, in which it held that the federal Constitution forbids states from convicting defendants except by a unanimous jury, Cornell law professor Michael C. Dorf discusses the Court's jurisprudence on retroactivity. Dorf highlights some costs and benefits of retroactivity and argues that the Court's refusal to issue advisory opinions limits its ability to resolve retroactivity questions in a way that responds to all the relevant considerations.

Criminal Law Opinions

Ramos v. Louisiana

Court: US Supreme Court
Docket: 18-5924
Opinion Date: April 20, 2020
Judge: Neil M. Gorsuch
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 48 states and in federal court, a single juror's vote to acquit is enough to prevent a conviction; Louisiana and Oregon punish people based on 10-to-2 verdicts. Ramos was convicted in a Louisiana court by a 10-to-2 jury verdict and was sentenced to life without parole. The Supreme Court reversed. The Sixth Amendment right to a jury trial, as incorporated against the states by the Fourteenth Amendment, requires a unanimous verdict to convict a defendant of a serious offense. Juror unanimity is a vital common law right. The Court rejected an "invitation" to "perform a cost-benefit analysis on the historic features of common law jury trials and to conclude that unanimity does not make the cut." In overturning its 1972 "Apodaca" decision, the Court stated that the reasoning, in that case, was "gravely mistaken" and "sits uneasily with 120 years of preceding case law." The fact that Louisiana and Oregon may need to retry defendants convicted of felonies by non-unanimous verdicts whose cases are still pending on direct appeal "will surely impose a cost, but new rules of criminal procedure usually do."

United States v. Diaz-Rivera

Court: US Court of Appeals for the First Circuit
Docket: 18-1461
Opinion Date: April 20, 2020
Judge: Torruella
Areas of Law: Criminal Law

The First Circuit affirmed Defendant's upwardly variant sentence for one count of possession with intent to distribute cocaine and one count of using a firearm during and in relation to a drug-trafficking crime, holding that the sentence was neither procedurally nor substantively unreasonable. Pursuant to a plea agreement, Defendant pled guilty to drug-related crimes. After a sentencing hearing, the district court sentenced Defendant to an upwardly variant sentence of 180 months of imprisonment, thus declining to

impose the government's requested sentence. On appeal, Defendant challenged both the procedural and substantive reasonableness of his sentence. The First Circuit affirmed, holding that the 180-month sentence was neither procedurally nor substantively unreasonable.

United States v. Cotto

Court: US Court of Appeals for the Second Circuit
Docket: 18-2970
Opinion Date: April 20, 2020
Judge: Leval
Areas of Law: Criminal Law

A conviction for retaliating against a witness in violation of 18 U.S.C. 1513 does not require that the Government prove that defendant had knowledge of the federal nature of the proceeding. The Second Circuit rejected defendant's arguments to the contrary and affirmed his conviction for retaliating against a witness. The court remanded for revision of the provision of the sentence relating to the substance abuse treatment condition of supervised release; instructed the district court to consider on remand whether the court's forthcoming order in United States v. Traficante, No. 18-1962 (2d Cir., submitted Oct. 25, 2019) requires modification of the risk notification provision of supervised release; and granted the parties leave to reinstate this appeal to permit review of the district court's decision on remand as to the risk notification provision.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Rosa

Court: US Court of Appeals for the Second Circuit
Docket: 17-2004
Opinion Date: April 17, 2020
Judge: Nardini
Areas of Law: Criminal Law

Where a district court offers no explanation for its sentence, and where neither the adopted presentence report nor the statement of reasons

adequately demonstrates the court's reasoning, the court has committed plain error in violation of 18 U.S.C. 3553(c). The Second Circuit vacated defendant's sentence for conspiracy to commit wire fraud and aggravated identity theft. The court held that the district court failed to state its reasons for sentencing defendant as required under section 3553(c); the error is clear or obvious; and the error affected defendant's substantial rights. Accordingly, the court remanded for resentencing.

Fogle v. Sokol

Court: US Court of Appeals for the Third Circuit
Docket: 19-1066
Opinion Date: April 21, 2020
Judge: Matey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 1976, the body of 15-year-old “Kathy” was found near her Indiana County, Pennsylvania home. Kathy’s death involved a brutal assault, rape, and a gunshot to the head. Kathy's sisters, ages nine and 12, stated that she had gotten into a car with a man with blue eyes, black hair that came below his ears and curled at the ends, sideburns, heavy eyebrows, and a heavy mustache. Fogle had “straight reddish-blonde hair that dropped down his back and a matching, full beard that reached his waist.” After three years, Fogle became a suspect because a psychiatric patient described seeing Kathy get in a car with Fogle and his brother. The story was largely inconsistent with statements by Kathy’s sisters. Jailhouse informants were recruited and counseled by law enforcement with promises of leniency. The prosecutors “either knew about, encouraged, or permitted” this strategy. A jury found Fogle guilty of second-degree murder. In 2015, Fogle obtained DNA evidence excluding both himself and his brother as the source of semen collected from Kathy. His conviction was vacated. The Commonwealth declined to pursue new charges, describing the case as lacking “prosecutorial merit.” Fogle, having spent three decades in prison, sued the prosecutors and Indiana County under 42 U.S.C. 1983. The Third Circuit affirmed the denial of their motions to dismiss based on absolute immunity. Only truly prosecutorial functions, not investigative conduct, justify complete protection from suit. Fogle’s complaint alleges actions that fall

outside the narrow doctrine of absolute immunity.

James v. New Jersey State Police

Court: US Court of Appeals for the Third Circuit
Docket: 18-1432
Opinion Date: April 21, 2020
Judge: Porter
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Stephens called 911 and reported that Gibbons hit her and had a gun in his truck. The police responded. Stephens obtained a temporary restraining order, prohibiting Gibbons from possessing firearms and from returning to Stephens's house. The next day, Gibbons went to Stephens's house. Stephens was talking on the phone; the friend called the police. Gibbons left Stephens's house. Trooper Conza arrived. Stephens stated that Gibbons had waved a gun throughout their argument. Conza told Stephens to go to the police barracks and reported over the radio that Gibbons had brandished a firearm. Conza, with Troopers Bartelt and Korejko, visited the nearby home of Gibbons's mother, James. James stated that she did not know where Gibbons was and that he might be off his schizophrenia medication. While driving to the barracks, Stephens saw Gibbons walking alongside the road and called 911. The Troopers responded. Bartelt parked his car and, exiting, observed that Gibbons was pointing a gun at his own head. Bartelt drew his weapon, stood behind his car door, and twice told Gibbons to drop his weapon. Gibbons did not comply. Bartelt shot Gibbons twice within seconds of stopping his car. Gibbons died that night. In James' suit under 42 U.S.C. 1983, the Third Circuit held that Bartelt is entitled to qualified immunity because he did not violate Gibbons's clearly established rights. Bartelt's pre-standoff knowledge of Gibbons differs from that of officers involved in cited cases. Bartelt could reasonably conclude that Gibbons posed a threat to others.

Bazemore v. Best Buy

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-2196
Opinion Date: April 21, 2020
Judge: Quattlebaum
Areas of Law: Criminal Law

Plaintiff filed suit against her employer, Best Buy, claiming that she was harassed because of her race and gender and subjected to a hostile work environment in violation of Title VII of the Civil Rights Act of 1964. Plaintiff's complaint stemmed from an incident where a coworker made a racist and sexually charged joke to a small group of coworkers that included plaintiff. The Fourth Circuit affirmed the district court's motion to dismiss and held that, in the case of allegedly harassing comments by a co-worker, an employee must allege plausible facts that the employer knew, or should have known, about the harassment and failed to take action reasonably calculated to stop it. Because plaintiff failed to do this, the court affirmed the district court's judgment. In this case, the coworker's conduct was not imputable to Best Buy where Best Buy took steps that were not only reasonably calculated to end such behavior, but that it did in fact end it.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Akande

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-6833
Opinion Date: April 20, 2020
Judge: Diana Jane Gribbon Motz
Areas of Law: Criminal Law

After defendant moved under 28 U.S.C. 2255 to vacate his conviction based on the ineffective assistance of counsel, the district court denied the motion. The Fourth Circuit granted a certificate of appealability and reversed the district court's judgment. The court held that, given counsel's specific misadvice regarding defendant's rights to preserve his appellate rights, on which defendant understandably relied, the district court's general admonishments did not amount to the careful explanation that addresses the particular issue necessary to cure the error. In this case, the plea colloquy did not correct counsel's erroneous advice and the error prejudiced defendant. Accordingly, the court remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Chambers

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-7104
Opinion Date: April 23, 2020
Judge: Floyd
Areas of Law: Criminal Law

After defendant was erroneously sentenced as a career offender, he moved to reduce his sentence to time served under the First Step Act. The district court denied defendant's motion to reduce his custodial sentence, though it granted the motion as to his supervised release term. The Fourth Circuit held that the First Step Act does not constrain courts from recognizing Guidelines errors. The court explained that First Step Act motions fall under 18 U.S.C. 3582(c)(1)(B), a distinct exception to finality, and that section 404(b) of the First Step Act expressly allows a court to impose a reduced sentence in order to give retroactive effect to sections 2 and 3 of the Fair Sentencing Act. Furthermore, 18 U.S.C. 3553(a) sentencing factors apply in the section 404(b) resentencing context, and the resentencing court has discretion within the section 404(b) framework to vary from the Guidelines and, in doing so, to consider movants' post-sentencing conduct. In this case, the district court seemingly believed that it could not vary from the Guidelines range to reflect post-sentencing information. Therefore, the court vacated the district court's sentencing order. Finally, the court held that any Guidelines error deemed retroactive, such as the error in this case, must be corrected in a First Step Act resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Ferebee

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4266
Opinion Date: April 22, 2020
Judge: Traxler
Areas of Law: Criminal Law

The Fourth Circuit affirmed the denial of defendant's motion to suppress evidence recovered from a backpack, and the district court's conclusion that defendant abandoned the backpack and any legitimate expectation of privacy in its contents. The court rejected defendant's claim that the collective-knowledge doctrine has any bearing on the propriety of the district court's conclusion that defendant abandoned the backpack. The court also held that the district court is not precluded from finding abandonment in cases where the defendant, as here, has physical possession of the property he has disavowed. In this case, the record supported the district court's conclusion that defendant clearly and unequivocally disavowed ownership of the backpack. Even if the district court erred by finding that defendant abandoned the backpack, reversal would not be required because the search of the backpack was a proper search incident to arrest for which no warrant was required under the facts of this case.

United States v. Nance

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4585
Opinion Date: April 21, 2020
Judge: Pamela Harris
Areas of Law: Criminal Law

The Fourth Circuit affirmed defendant's above-Guidelines sentence imposed after he pleaded guilty to two federal drug- and firearm-related offenses. The court held that defendant's sentence was not procedurally unreasonable where the district court took into account defendant's extensive criminal history; his pattern of reoffending upon release; his disciplinary infractions in custody and inability to comply with the terms of his release; and the fact that the offenses of conviction occurred over the course of days, in which he was arrested once, released, and then arrested again just days later. The court also held that defendant's sentence was substantively reasonable where the district court conducted a thorough, individualized assessment of defendant and his offense conduct in light of the 18 U.S.C. 3553(a) factors, and did not abuse its discretion in formulating the sentence.

United States v. Johnson

Court: US Court of Appeals for the Fifth Circuit
Docket: 17-60852
Opinion Date: April 21, 2020
Judge: Priscilla R. Owen
Areas of Law: Criminal Law

The Fifth Circuit vacated defendant's sentence imposed after he pleaded guilty to violating 18 U.S.C. 922(g) and 924(e) by knowingly possessing a firearm after he had been convicted of a misdemeanor crime of domestic violence. The court held that the district court committing plain error by violating Federal Rule of Criminal Procedure 32 when it relied on factual allegations in the confidential sentencing recommendation that were not in the presentence report and that were not disclosed by defendant. The court explained that the use of undisclosed facts to justify an above-guidelines sentence seriously affects the fairness, integrity, and public reputation of judicial proceedings. Therefore, the court remanded for resentencing.

United States v. McGinnis

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-10197
Opinion Date: April 21, 2020
Judge: Stuart Kyle Duncan
Areas of Law: Criminal Law

18 U.S.C. 922(g)(8), which prohibits individuals subject to certain domestic violence protective orders from possessing firearms or ammunition for any purpose, is facially constitutional under the Fifth Circuit's two-step NRA framework. Even assuming arguendo that the conduct at issue -- the keeping and possessing of firearms by individuals subject to domestic protective orders -- falls within the Second Amendment right, defendant's facial challenge fails. The court applied intermediate scrutiny and held that section 922(g)(8) is reasonably adapted to the government interest of

reducing domestic gun abuse. The court also held that if the commonly understood definitions of terms in the protective order include acts involving "physical force," the protective order is sufficient to support a conviction under section 922(g)(8)(C)(ii). In this case, the jury plausibly found that the order satisfied the statute and the court declined to reverse defendant's conviction on this basis. However, the court remanded for the limited purpose of conforming defendant's written judgment to the district court's oral pronouncement.

Valentine v. Collier

Court: US Court of Appeals for the Fifth Circuit
Docket: 20-20207
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law, Government & Administrative Law, Health Law

Plaintiffs filed suit alleging that TDCJ's adoption and implementation of measures guided by changing CDC recommendations in regards to the COVID-19 pandemic do not go far enough. Plaintiffs filed a class action alleging violations of the Eighth Amendment's prohibition against cruel and unusual punishment, and the Americans with Disabilities Act, seeking a preliminary injunction. The Fifth Circuit granted TDCJ's motion to stay the district court's preliminary injunction, which regulates the cleaning intervals for common areas, the types of bleach-based disinfectants the prison must use, the alcohol content of hand sanitizer that inmates must receive, mask requirements for inmates, and inmates' access to tissues (amongst many other things). The court held that TDCJ is likely to prevail on the merits of its appeal because: (1) after accounting for the protective measures TDCJ has taken, plaintiffs have not shown a "substantial risk of serious harm" that amounts to "cruel and unusual punishment"; and (2) the district court committed legal error in its application of Farmer v. Brennan, by treating inadequate measures as dispositive of defendants' mental state. In this case, even assuming that there is a substantial risk of serious harm, plaintiffs lack evidence of defendants' subjective deliberate indifference to that harm. The court also held that TDCJ has shown that it will be

irreparably injured absent a stay, and that the balance of the harms and the public interest favor a stay. Finally, the court held that plaintiffs have not exhausted their administrative remedies as required in the Prison Litigation Reform Act (PLRA), and the district court's injunction goes well beyond the limits of what the PLRA would allow even if plaintiffs had properly exhausted their claims.

United States v. Dowl

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-2469
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

Dowl pleaded guilty to presenting false tax returns, 18 U.S.C. 286. He received a sentence of 30 months of imprisonment plus 24 months of supervised release. On supervised release, Dowl was charged with four new state crimes; failing to inform his probation officer that he had police contact; communicating with his co-defendant despite instructions to the contrary; failing to make payments on his restitution, fine, or special assessment; and failing to get a job. At a hearing, the court reviewed the evidence and allowed Dowl to tell his side of the story. The court deferred judgment on three of the four new state criminal law violations and dismissed the fourth and found Dowl gainfully employed. Dowl had failed to notify his probation officer about police contact, impermissibly communicated with his co-defendant, and did not pay his fines. After considering the 18 U.S.C. 3553(a) sentencing factors, the court returned Dowl to prison for 11 months, giving Dowl and his attorney the opportunity to raise any objections. Dowl had none. The Sixth Circuit affirmed, rejecting Dowl’s argument that the court committed reversible error by not directly addressing him to solicit an allocution. The court employed the “plain error” standard because Dowl did not raise any objection during his revocation hearing.

United States v. Fowler

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-3071, 19-3070
Opinion Date: April 21, 2020
Judge: Donald
Areas of Law: Criminal Law

In 2018, Fowler pled guilty to possession of child pornography and violations of the conditions of his supervised release from a previous conviction for the same. In addition to possessing child pornography, Fowler had failed drug testing, had threatened his parole officer, and had tried to harass his girlfriend to recant her testimony. The district court ordered Fowler to pay a $5,000 special assessment for possession of child pornography under the Justice for Victims of Trafficking Act, 18 U.S.C. 3014. The court also varied upward and sentenced Fowler to the maximum statutory penalty for violating the conditions of his supervised release, imposing a 120-month sentence for possessing child pornography and a consecutive 36-month sentence for violating the terms of his supervised release. The Sixth Circuit vacated as to the assessment and remanded for a determination of indigency. The district court committed plain error by failing to address Fowler's ability to pay; the parties did not contemplate the $5,000 special assessment as a part of the waiver provision in the plea agreement. The court affirmed the sentence. The district court did not consider an impermissible factor (whether Fowler had actually touched a child) and Fowler had no other challenge to the reasonableness of his sentence,

United States v. Sumlin

Court: US Court of Appeals for the Sixth Circuit
Docket: 18-3819
Opinion Date: April 21, 2020
Judge: Bush
Areas of Law: Criminal Law

Sumlin was convicted of the distribution of drugs that caused the 2015 death of Carrie Dobbins, 21 U.S.C. 841(a)(1) and (b)(1)(C), which carries enhanced penalty provisions. The Sixth Circuit affirmed his convictions and

his sentence to life in prison. The district court properly denied Sumlin's suppression motion, given that the affidavit established a sufficient nexus between his drug trafficking activity and residence that was searched. The court properly admitted testimony by the victim's sister, Kelly, who was Sumlin's former girlfriend and had purchased drugs from him. Kelly's testimony about Sumlin's drug-trafficking and that Sumlin was with Carrie on the day of her overdose was intrinsic proof that was relevant for providing background information and contextualizing the government's case against Sumlin. Sufficient evidence supported the jury's verdict that Sumlin distributed the drugs that caused Carrie's death.

United States v. Vance

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5160
Opinion Date: April 17, 2020
Judge: Bush
Areas of Law: Criminal Law, White Collar Crime

The Spriggs' bank account was established to receive social security checks. The Spriggs' great-grandson, Vance, filled out an application in Mr. Spriggs's name for a debit card to draw on the checking account. Mr. Spriggs had never used a debit card. The Spriggses did not authorize Vance to do so. Bank cameras photographed Vance using the card to withdraw cash. Vance also used the card for personal expenses. At another bank, Vance used Mr. Spriggs's social security number to establish an account and obtain a $15,000 cash advance. Vance made other, unsuccessful loan applications. Upon being notified by the banks about suspicious activities involving his identity, Mr. Spriggs filed a police report. The police arrested Vance. While searching Vance's car, the police located a large stash of personal and financial documents belonging to the Spriggses, including bank statements, tax return forms, property-tax bills, and a car title. The Sixth Circuit affirmed Vance's convictions for access-device fraud, 18 U.S.C. 1029(a)(5), and two counts of aggravated identity theft, 18 U.S.C. 1028A(a)(1), and his 65-month sentence. The court rejected arguments that the district court failed to make adequate findings of fact after the bench trial, improperly denied a motion for judgment of acquittal,

and failed to correctly calculate the loss amount connected to Vance's charges under Sentencing Guidelines 2B1.1.

Winburn v. Nagy

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-2399, 19-2398
Opinion Date: April 23, 2020
Judge: Jeffrey S. Sutton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Winburn represented himself at his trial for armed robbery, home invasion, and conspiracy. Based on Winburn's disruptive behavior, the judge removed him from the courtroom and revoked Winburn's permission to represent himself, then granted a competency evaluation and a mistrial. While Winburn awaited his second trial, the judge permitted Winburn's stand-by attorney to withdraw because Winburn had sued her and enjoined Winburn from filing complaints or grievances against his new attorney, except to discharge her. Although represented by a new attorney, Winburn moved pro se to dismiss his charges on double jeopardy grounds. The trial judge denied the motion because Winburn's attorney had not filed it. Winburn filed a habeas petition under 28 U.S.C. 2241 challenging his retrial and another section 2241 petition challenging the injunction. The district judges denied both and declined to issue certificates of appealability. Winburn filed a notice of appeal for one petition and sought a certificate of appealability for the other. The Sixth Circuit held that state pretrial detainees proceeding under section 2241 may not appeal without certificates of appealability and granted Winburn a certificate on the injunction claim. A reasonable jurist could conclude that the unusual order was constitutionally infirm. The court denied relief with respect to double jeopardy. Winburn failed to exhaust his state-court remedies by a motion to dismiss.

Lund v. City of Rockford

Court: US Court of Appeals for the Seventh Circuit

Docket: 19-1945
Opinion Date: April 20, 2020
Judge: ROVNER
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Lund, a reporter for the Rockford Scanner, heard, by police scanner, of multiple traffic stops in Midtown. He did not have a driver's license, so he rode a motorized bicycle to Midtown to take photographs. He suspected a prostitution sting operation. An officer noticed Lund and radioed the team. Officers Welsh and Campbell knew of Lund's previous anti-police speech. They directed Lund to "move on." Lund asked if he was breaking any laws. Campbell informed him that he was not, but that his continued presence would constitute obstruction of a police detail and result in arrest. Lund started his bicycle and called out, loudly, "goodbye officers." Concerned that Lund might post pictures on social media while the sting operation was ongoing and create a danger for unarmed undercover officers, the officers followed Lund and arrested him for driving the wrong way on a one-way street, operating a vehicle without insurance, obstructing a police officer, felony aggravated driving on a revoked license, and operating a motor vehicle without a valid drivers' license. News stories listed Lund's name as an arrestee in the prostitution sting. The charges against Lund were dismissed. Lund sued the officers and the city under 42 U.S.C. 1983. The Seventh Circuit affirmed summary judgment for the defendants on First Amendment retaliation and malicious prosecution under Illinois law, citing the Supreme Court's intervening "Nieves" (2019) holding, that, in most cases, probable cause to arrest defeats a claim of retaliatory arrest. There was probable cause to arrest Lund.

United States v. Perez

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3156
Opinion Date: April 23, 2020
Judge: KANNE
Areas of Law: Criminal Law

Beloit officers facilitated a recorded controlled buy of heroin from Perez, a suspected high-level drug dealer. Perez sold 98 grams of heroin to an

informant. Based on that transaction alone, Perez pled guilty to distributing heroin. At Perez's sentencing hearing, the judge expressed concern that the guidelines range of 33–41 months' imprisonment did not reflect the full scope of his drug trafficking. The PSR described conduct that suggested that Perez was responsible for distributing large quantities of heroin, methamphetamine, and cocaine. The judge continued the hearing, directing the government to file a memorandum, detailing which offense conduct it could support by a preponderance of the evidence. When the hearing reconvened, the government presented witness testimony that elaborated on conduct described in the PSR, including drug ledgers, Perez's post-arrest conversation with his girlfriend, large sums of cash, a money counter, cell phones, and Perez's passport. The judge calculated a higher guidelines range and imposed a 121-month sentence. The Seventh Circuit affirmed, rejecting an argument that the sentencing judge should have recused himself. Perez has not demonstrated that a reasonable observer would have questioned the judge's impartiality nor did he allege that the judge was biased based on events outside the proceedings. The judge's continuance was laudable, not prejudicial.

Jackson v. United States

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1131
Opinion Date: April 20, 2020
Judge: Lavenski R. Smith
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's denial of a 28 U.S.C. 2255 motion to vacate, set aside, or correct petitioner's sentence. The court held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that counsel was constitutionally ineffective for failing to conduct adequate pretrial investigations. In this case, petitioner failed to identify any specific witnesses or evidence that counsel failed to uncover. Furthermore, petitioner failed to show that counsel's representation prejudiced his case. The court also held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that his new counsel was ineffective for failing to subpoena witnesses, for convincing petitioner

not to testify, for failing to object to or appeal the district court's answer to a jury question, and for failing to object to the district court's designation of petitioner as a career offender.

United States v. Bolman

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2759
Opinion Date: April 21, 2020
Judge: Jane Louise Kelly
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for involuntary manslaughter after he struck and killed his nephew with his truck. The court held that the evidence was sufficient to support the conviction, because a reasonable jury could find defendant grossly negligent beyond a reasonable doubt. The court also held that the district court did not plainly err by failing to instruct the jury that actual knowledge is an essential element of the offense that is separate from gross negligence, because the instructions, viewed as a whole, accurately and adequately defined the essential elements of the offense.

United States v. Boyd

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3528
Opinion Date: April 17, 2020
Judge: Kobes
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's sentence imposed after he pleaded guilty to being a felon in possession of a firearm. The court held that the facts underlying defendant's prior arrests were part of his history and characteristics under 18 U.S.C. 3553(a), and thus the district court could consider defendant's arrest records and the circumstances of those arrests. The court explained that the arrests were listed in the presentence report

and gleaned from prior police reports. Furthermore, specific facts underlying the arrests may be considered for an upward departure and should be considered fair game for a variance where defendant did not object to them. The court also concluded that there is nothing here that suggested a corrected misstatement improperly influenced the district court's sentencing decision. Finally, the court held that the upward variance was not unreasonable in consideration of defendant's previous assaults, coupled with the facts underlying his arrest in this case.

United States v. Sanchez-Velasco

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3568
Opinion Date: April 17, 2020
Judge: James B. Loken
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit affirmed the district court's denial of defendant's motion to suppress his responses to an ICE agent's two questions at the Treasurer's Office, because he was not in custody at the time of questioning. Although defendant was in custody at the ICE facility, the court held that an agent's questions were not custodial interrogation because the agent could not have known his questions were likely to elicit incriminating information regarding the two criminal charges that were eventually brought against defendant. The court noted that the Attorney General's regulations carefully distinguish between the warrantless arrest of an alien for a criminal violation of the immigration laws, and what is called the "administrative arrest" of an alien who is reasonably believed to be illegally present in the United States. The court agreed with the district court that the agent's questioning was a request for routine information necessary for basic identification purposes that is not interrogation under Miranda, even if the information turns out to be incriminating.

Anthony v. TRAX International Corp.

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-15662
Opinion Date: April 17, 2020
Judge: Kim McLane Wardlaw
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's grant of summary judgment to TRAX in a disability discrimination action brought by plaintiff under Title I of the Americans with Disabilities Act (ADA). After TRAX terminated plaintiff from her position as a Technical Writer allegedly due to an inability or unwillingness to accommodate her disability, TRAX discovered during the course of litigation that plaintiff lacked the requisite bachelor's degree for her position. The panel held that, although McKennon v. Nashville Banner Publishing Co., 513 U.S. 352 (1995), held that after-acquired evidence cannot establish a superseding, non-discriminatory justification for an employer's challenged actions, after-acquired evidence remains available for other purposes, including to show that an individual is not qualified under the ADA. Because plaintiff did not satisfy one of the prerequisites for her

position, she is not "otherwise qualified," and TRAX was not obligated to engage in the interactive process.

City of Almaty v. Khrapunov

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-56451
Opinion Date: April 22, 2020
Judge: Marbley
Areas of Law: Criminal Law, International Law, White Collar Crime

The City of Almaty, in Kazakhstan, filed suit against defendant and his family under the Racketeer Influenced and Corrupt Organizations Act (RICO), alleging that they engaged in a scheme to defraud the city of millions of dollars. The City claimed that it was forced to spend money and resources in the United States to trace where its money was laundered. The district court dismissed the City's claim on the basis that it failed to state a domestic injury pursuant to the Supreme Court's recent decision in RJR Nabisco, Inc. v. European Community, 136 S. Ct. 2090 (2016). The Ninth Circuit held that the City failed to state any cognizable injury other than the foreign theft of its funds, and its voluntary expenditures were not proximately caused by defendants' acts of money laundering. In this case, the City's expenditure of funds to trace its allegedly stolen funds is a consequential damage of the initial theft suffered in Kazakhstan and is not causally connected to the predicate act of money laundering.

United States v. Baldon

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10411
Opinion Date: April 21, 2020
Judge: Bennett
Areas of Law: Criminal Law

After defendant pleaded guilty to possession with intent to distribute a controlled substance, the district court sentenced him to 184 months in

prison. The Ninth Circuit held that defendant's prior convictions for carjacking under section 215 of the California Penal Code are not categorical crimes of violence under USSG 4A1.1(e). Therefore, the district court incorrectly calculated defendant's criminal history by improperly including two points for his prior carjacking convictions. However, the panel held that the district court did not err in finding that defendant possessed a firearm under USSG 2D1.1(b)(1). Accordingly, the panel affirmed in part, vacated in part, and remanded for resentencing.

United States v. Manzanares

Court: US Court of Appeals for the Tenth Circuit
Docket: 18-2010
Opinion Date: April 17, 2020
Judge: Mary Beck Briscoe
Areas of Law: Constitutional Law, Criminal Law

Defendant-Appellant Archie Manzanares appealed a district court's denial of his 28 U.S.C. 2255 motion challenging his sentence under the Armed

Career Criminal Act (ACCA). Under the ACCA, an offense qualified as a violent felony by satisfying at least one of three definitions, which have come to be known as the Elements Clause, the Enumerated Clause, and the Residual Clause. Manzanares asserted that without the Residual Clause, his underlying New Mexico convictions (armed robbery, aggravated assault with a deadly weapon, and aggravated battery) no longer qualified as violent felonies. The district court denied the motion, concluding that all three underlying convictions satisfied the Elements Clause. Manzanares appealed the classification of the armed robbery conviction as a violent felony to the Tenth Circuit, and sought to expand the certificate of appealability to allow him to appeal the decision regarding the aggravated assault with a deadly weapon and aggravated battery convictions. After review, the Tenth Circuit affirmed the district court's denial of Manzanares's 2255 motion, and denied his motion to expand the COA.

United States v. Delaney

Court: US Court of Appeals for the District of Columbia Circuit
Docket: 18-3093
Opinion Date: April 17, 2020
Judge: David S. Tatel
Areas of Law: Criminal Law

The DC Circuit vacated the district court's denial of defendant's motion to suppress evidence. The court held that officers violated the Fourth Amendment when they seized defendant because they lacked reasonable suspicion to justify the stop. In this case, a seizure occurred when the officers pulled into the parking lot, partially blocked defendant's vehicle, and activated their take-down light. The court held that any inference of suspicion that the officers drew from encountering defendant soon after hearing the nearby gunshots were undermined by the government's failure to identify specific and articulable facts supporting the officers' estimation of where the various shots came from. Accordingly, the court remanded for further proceedings.

Antenor v. Alaska, Department of Corrections

Court: Alaska Supreme Court
Docket: S-17005
Opinion Date: April 17, 2020
Judge: Carney
Areas of Law: Civil Procedure, Criminal Law, Government & Administrative Law

Several Alaska Department of Corrections inmates challenged the DOC's policy to charge for local telephone calls, arguing the rates they and call recipients had to pay for calls violated their constitutional right to rehabilitation, their statutory right to reasonable telephone access, and DOC's contractual obligations under a prior settlement and consent decree. In addition, one of the prisoners challenged DOC officers' decision to deny him access to a computer programming book he ordered from outside the prison. He contended that DOC placed a content-specific restriction on the educational materials and publications prisoners were allowed, violating the Alaska Constitution's free speech provisions as well as prisoners' right to reformation. Each of these challenges reached the Alaska Supreme Court after inmates exhausted the administrative process from prison. Inmates then appealed to the superior court, which denied relief. The Alaska Supreme Court determined the superior court record did not provide enough evidence for it to meaningfully determine the reasonableness of the rates charged inmates for local telephone calls; therefore the Court reversed denial of relief and remanded for further fact-finding by the trial court. The Court concluded that the facility's restrictions on programming-related books were rationally related to a legitimate interest, and because they did not infringe on the right to rehabilitation, it affirmed denial of a prisoner's motion to enforce his claimed right to a particular text about computer programming.

Berger v. Bryant

Court: Arkansas Supreme Court
Citation: 2020 Ark. 357
Opinion Date: April 23, 2020
Judge: Rhonda K. Wood

Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's petition to proceed in forma pauperis on a petition for writ of mandamus and a motion for declaratory judgment, holding that Appellant failed to state a colorable cause of action. In 1998, Appellant was convicted of rape. In his petition for a writ of mandamus, Appellant asserted that he sought information pursuant to the Arkansas Freedom of Information Act regarding his rape conviction but received no response. The circuit court denied the petition. The Supreme Court affirmed, holding (1) even if Appellant had requested disclosable information, he would not be entitled to inspect it as an incarcerated person; and (2) Appellant did not demonstrate a legitimate claim given the facts presented and therefore failed to establish a colorable cause of action to support his request to proceed in forma pauperis.

Cave v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 356
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for writ of habeas corpus, holding that the circuit court did not err in denying the petition. Appellant was found guilty of two counts of delivery of a controlled substance and one count of maintaining a drug premises. In his habeas petition, Appellant argued that he was actually innocent because his arrest and conviction was based on the false testimony of a witness who had a lengthy criminal history. Appellant further argued that the writ should issue because he was not afforded effective assistance of counsel. The circuit court denied the petition. The Supreme Court affirmed, holding (1) Appellant's claims regarding the witness's credibility do not constitute a valid assertion that he was being unlawfully detained; and (2) Appellant did not actually connect an allegation of ineffective assistance of counsel to his allegation that he was unlawfully detained.

Chatmon v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 355
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Criminal Law

The Supreme Court denied Appellant's appeal from the order of the circuit court denying his petition to proceed in forma pauperis on the grounds that Appellant failed to state a colorable cause of action in a petition for writ of habeas corpus, holding that the circuit court did not abuse its discretion by denying Appellant's in forma pauperis petition. In his habeas petition, Appellant alleged that the trial court lacked jurisdiction in his criminal case. Before this case was submitted to the Supreme Court, Appellant filed two

motions, including a "Judicial Notice of a Void Judgment" and a "Notice to the Court." The Supreme Court denied the motions, holding that neither motion was cognizable under the Court's rules. The Court then affirmed the Supreme Court's denial of Appellant's in forma pauperis petition, holding that the circuit court correctly found that Appellant did not assert a colorable cause of action.

McClinton v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 353
Opinion Date: April 23, 2020
Judge: Karen R. Baker
Areas of Law: Criminal Law

The Supreme Court denied Petitioner's second petition requesting permission to proceed in the trial court with a petition for writ of error coram nobis, holding that Petitioner's proposed attack on the judgment had no merit. Petitioner was convicted of raping a mentally handicapped sixteen-year-old girl and was sentenced to life imprisonment. In his first petition for writ of error coram nobis Petitioner alleged a number of errors in the trial procedure. The first petition was denied. In his second coram nobis petition, Petitioner alleged violations of Brady v. Maryland, 373 U.S. 83 (1963). The Supreme Court denied the writ, holding that Petitioner failed to meet his burden of demonstrating a fundamental error of fact extrinsic to the record.

Siegel v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 359
Opinion Date: April 23, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from the circuit court's orders denying her motions to declare Ark. Code Ann. 5-62-106 (disposition

of animal) and Ark. Code Ann. 5-62-111 (prevention of cruelty) unconstitutional and conditionally granting her motion for return of seized property, holding that there was no final, appealable order in this case. Appellant was convicted of thirty-one misdemeanor counts of cruelty to animals. The circuit court subsequently dismissed the charges on speedy-trial grounds. The State appealed, and the Supreme Court dismissed the appeal on the grounds that it was not authorized. Appellant had filed motions seeking a declaration that sections 5-62-106 and -111 are unconstitutional and seeking the return of her seized property. The circuit court denied the constitutional claims and entered a conditional order granting Appellant's motion for return of seized property. Appellant appealed. The Supreme Court dismissed the appeal, holding that because the conditional order did not make specific findings as to the return of the property or as to damages and because it expressly left open the possibility of further proceedings, there was no final, appealable order in this case.

Thomas v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 354
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Appellant's conviction of capital murder, holding that the evidence was sufficient to sustain the conviction and that the circuit court did not err in denying Appellant's motion to suppress tracking data generated by his cellphone. On appeal, Appellant argued that the trial court erred by denying his directed-verdict motion because the evidence supported the defense's theory of the case that he did not intend to shoot the victim. Further, Appellant argued that the court abused its discretion in denying his motion to suppress evidence obtained from the seizure of AT&T phone records. The Supreme Court disagreed, holding (1) the evidence was sufficient to support the capital murder conviction; and (2) the circuit court correctly denied the motion to suppress.

California v. Landowski

Court: California Courts of Appeal
Docket: C080210(Third Appellate District)
Opinion Date: April 23, 2020
Judge: Andrea Lynn Hoch
Areas of Law: Constitutional Law, Criminal Law

Defendant Michael Reyes, Jr., an active Norteno gang member (from the Broderick Boys subset), confronted a former Norteno gang member (from the Franklin Boys subset), "S.," about a physical altercation that occurred between S. and Reyes's stepfather over a debt. That earlier altercation had taken place in front of Reyes's autistic younger brother. Reyes pulled out a handgun and asked S. if he had a problem. S., who was riding his bicycle with his wife, "R.," when Reyes confronted him with the gun, stopped briefly, told Reyes to put the gun down if he wanted to fight, and then started to ride away. This angered Reyes, prompting him to fire six rounds at S. from behind. S. Was hit but survived. R. Was a short distance in front of S., but was not hit. Defendants Liberty Landowski and Lisa Humble were with Reyes at the time of the shooting and aided in his efforts to avoid being apprehended by law enforcement authorities. Reyes, Landowski, and Humble were tried together before the same jury. Reyes was convicted of one count of attempted murder (Count 1), two counts of assault with a semiautomatic firearm (Counts 2 and 4), one count of possession of a firearm by a convicted felon (Count 5), and one count of possession of ammunition by a convicted felon (Count 6). In addition to various firearm and other enhancements, the jury found Reyes committed the crimes for the benefit of, at the direction of, or in association with a criminal street gang with the specific intent to promote, further, or assist in criminal conduct by gang members. The jury convicted Landowski and Humble of being accessories to Reyes's criminal conduct (Count 9) and also found true gang enhancement allegations attached to that crime. Reyes challenged the sufficiency of the firearm evidence presented to support his conviction, and all defendants challenged the sufficiency of the evidence supporting their gang enhancements. The Court of Appeal determined Senate Bill 620 (2017-2018 Reg. Sess.) gave the trial court discretion to strike firearm enhancements in the interest of justice and applied retroactively; and Senate Bill 136 (2019-2020 Reg. Sess.) eliminated such enhancements,

and also applied retroactively. To these issues, the Court remanded for the trial court's consideration. The Court affirmed the trial court in all other respects.

California v. May

Court: California Courts of Appeal
Docket: C084302(Third Appellate District)
Opinion Date: April 20, 2020
Judge: Ronald B. Robie
Areas of Law: Constitutional Law, Criminal Law

Defendant Raymond May was found guilty by jury of possessing an assault weapon and a machine gun based on his possession of a single AK-47 assault rifle while guarding a marijuana plantation. He was sentenced to probation, which included an electronic search condition. On appeal, defendant argued there was a lack of sufficient evidence corroborating his accomplice's testimony and demonstrating he knew of the firearm's illegal character. He further alleged the trial court erred in instructing the jury: that the accomplice instruction should have included language specifying that the accomplice testimony needed to prove more than defendant's mere presence or access to the firearm. Furthermore, defendant argued the electronic search condition imposed as part of his probation failed under the standards announced in California v. Lent, 15 Cal.3d 481 (1975). The Court of Appeal agreed defendant's electronic search condition should have been stricken, but otherwise affirmed.

California v. Perez

Court: California Courts of Appeal
Docket: E072260(Fourth Appellate District)
Opinion Date: April 20, 2020
Judge: Miller
Areas of Law: Constitutional Law, Criminal Law

In 2009, defendant-appellant Rudy Perez pled guilty to active gang

participation under Penal Code section 186.22(a), and unlawful possession of a firearm under section 12025(b)(6). In 2010, defendant pled guilty to residential burglary under section 459, and active gang participation under section 186.22(a). In August of 2018, the State filed a new felony complaint, alleging one of the prior gang participation convictions as a strike prior. In 2018, defendant moved to vacate the two prior gang participation convictions based upon changes in the law that rendered them invalid. The trial court denied defendant's motion. In 2019, defendant asked for reconsideration, which was again denied. Thereafter, defendant filed a timely notice of appeal from the denial of his motion to vacate the convictions. The Court of Appeal found that defendant pled guilty to street terrorism under Penal Code section 186.22(a) in 2009 and 2010, and it was undisputed that while committing these offenses, defendant acted alone. However, subsequent to defendant's guilty pleas, in 2012, the California Supreme Court held that a defendant had to act in concert with a fellow gang member in order to be guilty of street terrorism. At that time, defendant could have filed a state habeas petition requesting relief, but failed to do so. "Defendants can lose remedies that are established by law when they fail to invoke such remedies in time." Section 1473.7 became effective in 2017. In defendant's motion filed in the trial court, defendant failed to state what new evidence was discovered, instead arguing that the trial court was allowed "to vacate a conviction where the defendant is innocent as a matter of law or where vacating the conviction is in the interest of justice, even though the defendant is no longer in custody or otherwise restrained by the conviction." The Court of Appeal concurred with the trial court's reason to deny relief, determining that "while the outcome in this case may be unfortunate for defendant, we are not here to rewrite legislation. The Legislature could amend section 1473.7 to address issues raised in this case. However, under the laws, as written, we must uphold the trial court's order."

In re S.R.

Court: California Courts of Appeal
Docket: B300214(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Bendix

Areas of Law: Criminal Law

Father appealed the juvenile court's dispositional ruling removing daughter from his custody, arguing that his mere possession of child pornography does not demonstrate that he poses a substantial risk of harm to his daughter. The Court of Appeal affirmed the order and held that there is substantial evidence of risk of great harm to daughter—no matter how low the probability— that father will sexually abuse his daughter if he is provided unfettered access to her.

People v. Bell

Court: California Courts of Appeal
Docket: B288528(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Stratton
Areas of Law: Criminal Law

Defendant was convicted of one count of attempted robbery, one count of second degree murder, and one count of hit and run driving. The jury found not true the allegation that a principal was armed in the commission of the attempted robbery. The trial court found true the allegations that defendant had served four prior prison terms within the meaning of Penal Code section 667.5, subdivision (b). Defendant raised 13 claims of error on appeal. The Court of Appeal held that the section 667.5, subdivision (b) enhancement terms must be stricken and the matter remanded to the trial court for resentencing. The court also held that defendant forfeited some of his substantive claims and other lack merit. Finally, the court held that, if there is instructional error, the errors are harmless under any standard of review. Accordingly, the court affirmed the judgment of conviction.

Court: California Courts of Appeal
Docket: H046928(Sixth Appellate District)

Opinion Date: April 17, 2020
Judge: Danner
Areas of Law: Criminal Law

In 1991, the Wards and their teenage daughter awoke and discovered four men, including Drayton, inside their house. Two were armed. One told the daughter he was going to rape her and placed a firearm inside her vagina. Drayton told the man not to do it. Drayton had a gun and held Mrs. Ward down during the robbery. Two others shot and killed Mr. Ward. Drayton and the others left without seeking help for the Wards. Drayton did not shoot Mr. Ward or threaten to rape the daughter. Drayton surrendered the next day. Drayton's sole prior conviction was a misdemeanor; he had no reported history of violence. Drayton was sentenced to 29 years to life imprisonment. In 2019, Drayton sought resentencing under Penal Code 1170.95, declaring that he "was not a major participant ... or did not act with reckless indifference to human life." Senate Bill 1437, effective January 1, 2019, restricted the circumstances under which a person can be liable for felony murder and enacted Penal Code 1170.95, which allows an individual, previously convicted of felony murder, to petition to have his murder conviction vacated and to be resentenced. The court of appeal directed the trial court to hold a hearing under section 1170.95(d) and to accept the assertions in the petition as true unless facts in the record conclusively refute them as a matter of law. If, accepting the petitioner's assertions as true, he meets section 1170.95(a)'s requirements for relief, the court must issue an order to show cause. In assessing the prima facie showing, the trial court should not weigh evidence or make credibility determinations.

Opinion Date: April 20, 2020
Judge: Wiley
Areas of Law: Criminal Law

After defendant penetrated an unconscious woman with his fingers, he challenged evidentiary rulings and requests a presentence conduct credit. The Court of Appeal held that the trial court properly excluded cumulative

evidence about past times the woman was intoxicated at the relevant bar, and any error in allowing a drug recognition expert to testify about whether the woman was incapacitated was harmless. However, the court held that the trial court undercalculated defendant's presentence custody credit because he was not convicted of a violent felony under Penal Code section 2933.1, which would otherwise limit those credits. Accordingly, the court directed the trial court to award defendant 104 days of presentence custody credit and to amend the abstract of judgment, affirming in all other respects.

People v. Torres

Court: California Courts of Appeal
Docket: B292551(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Kenneth R. Yegan
Areas of Law: Criminal Law

Where, as here, the trial court factually finds that a self-represented defendant has engaged in an attempt to intimidate a witness, the constitutional right of self-representation can, in the exercise of the trial court's sound discretion, be revoked. The Court of Appeal affirmed defendant's conviction and sentence for two counts of battery on an ex-girlfriend. In this case, the trial court did not abuse its discretion in revoking defendant's pro se status after he asked his sister to contact the victim and have her say that she was coerced by the police detective to "press charges."

Colorado v. Lujan

Court: Colorado Supreme Court
Citation: 2020 CO 26
Opinion Date: April 20, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law

Abel Lujan was charged with first-degree murder for the death of his girlfriend after she was found beaten and strangled behind a friend's house. At trial, two women testified for the State about Lujan's prior violent behavior towards them. Prior to admitting this evidence, the trial court read a limiting instruction, telling the jury that it could only consider the evidence for the purposes of establishing Lujan's motive, intent, or common plan. A copy of this instruction was not given to the jury for deliberations; however, the jury did receive an instruction at the close of the evidence explaining that certain evidence could only be considered for the limited purposes for which it was admitted. While deliberating, the jury submitted a question seeking clarification about the limiting instruction. Over defense counsel's objection, the trial court cleared the courtroom of the public and parties, leaving only the judge, bailiff, and court reporter; the judge then brought in the jury and reread the limiting instruction that it had previously read twice in open court. The jury ultimately found Lujan guilty of second-degree murder. Lujan appealed, arguing that the court's actions when rereading the jury instruction constituted a courtroom closure that violated his Sixth Amendment right to a public trial. A division of the court of appeals agreed and reversed Lujan's conviction. The State argued on certiorari review that the Colorado Supreme Court adopt a triviality standard, under which a defendant's constitutional right to a public trial was not violated when the closure at issue was trivial. In so doing, the State argued that the brief courtroom closure here was trivial and therefore did not violate Lujan's public trial right. The Court concurred with the State, adopted the standard and reversed the appellate court's decision.

Archer v. State

Court: Florida Supreme Court
Docket: SC19-841
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's successive motion to vacate his sentence of death under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying the Rule

3.851 motion. Appellant was convicted of first-degree murder, armed robbery, and grand theft. Appellant was sentenced to death for the murder. The Supreme Court affirmed the convictions but reversed Appellant's death sentence and remanded the case for a new penalty phase. After a new penalty phase, Appellant was again sentenced to death. In his successive Rule 3.851 motion, Appellant raised three claims. The circuit court denied relief. The Supreme Court affirmed, holding that the circuit court (1) properly denied Appellant's claim that his death sentence violated the Sixth and Eighth Amendments in light of Hurst v. Florida, 136 S. Ct. 616 (2016), and Hurst v. State, 202 So. 3d 40 (Fla. 2016); (2) correctly denied Appellant's claim that his sentence violated the Eighth Amendment; and (3) did not err in denying Appellant's claim of newly discovered evidence.

Collins v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0158
Opinion Date: April 20, 2020
Judge: David E. Nahmias
Areas of Law: Constitutional Law, Criminal Law

Appellant Tommy Collins was convicted of felony murder in connection with the stabbing death of 14-year-old Rueben Hand. Friends gathered to watch the Peach Drop on New Year's Eve 2010; a disagreement ensued and Hand was stabbed near the Five Points MARTS station shortly after midnight. Appellant's only argument on appeal was that the trial court plainly erred when it gave the jury the State's requested instruction on "revenge for a prior wrong." Seeing no error, "much less plain error," the Georgia Supreme Court affirmed.

Heyward v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0399
Opinion Date: April 20, 2020

Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Larmell Heyward was convicted by jury of malice murder and possession of a firearm during the commission of a felony in connection with the 2007 shooting death of Ramon Rogers. Heyward argued on appeal of those convictions that the trial court erred in denying his request to charge the jury on voluntary manslaughter. After review, the Georgia Supreme Court determined the trial court's refusal to give the charge was harmless, since, in the Court's estimation, there was no realistic probability that the jury would have accepted the "slight" evidence of voluntary manslaughter in the light of the strong evidence of malice murder.

Morris v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0176
Opinion Date: April 20, 2020
Judge: Bethel
Areas of Law: Constitutional Law, Criminal Law

Darius Morris was found guilty by jury of malice murder and other offenses in connection with the shooting death of Jameson Bush. Morris appealed, arguing he was denied the right to a timely appeal, that the trial court erred in restricting voir dire as to the religious beliefs and connections of potential jurors, that the trial court erred by giving a confusing jury charge regarding statements of co-conspirators, that the trial court erred by violating his right to a public trial by ordering that the courtroom doors be closed and locked during the court's charge to the jury, and that his trial counsel provided ineffective assistance by not objecting to the closure of the courtroom. Finding no error, the Georgia Supreme Court affirmed.

Read Opinion Are you a lawyer? **Annotate this case**.

Rickman v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0127
Opinion Date: April 20, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Victoria Rickman was convicted by jury of malice murder and a related firearm offense in connection with the shooting death of William Carter, Jr. Rickman and Carter had a tumultuous on-again, off-again relationship with a history of verbal and physical abuse, false accusations of sexual assault, empty threats to obtain temporary protective orders, and numerous calls to

911. In the days leading up to Carter's death, the pair was talking and meeting again despite a recent break-up. On one such 911 call, officers went to Rickman's residence responding to claims shots were fired. Rickman responded holding her small dog, hair wet, and in pajamas. She did not appear to be injured, and nothing in the home looked disturbed or out of place. Rickman told the officers, "he raped me again and I shot him." Officers found Carter laying face up on the bed naked with multiple gunshot wounds to his body. An autopsy revealed that Carter was shot ten times – four times in the chest, three times in the back, once on the arm, and twice in the head. Rickman's examining physician testified that he found no injuries on Rickman consistent with her description of events, and no signs of trauma to her vaginal cavity. Rickman appealed her convictions, arguing she was denied effective assistance of counsel and that the trial court erred in admitting improper character evidence. Finding no reversible error, the Georgia Supreme Court affirmed.

Read Opinion Are you a lawyer? **Annotate this case**.

Robinson v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0265
Opinion Date: April 20, 2020
Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Herbert Robinson appealed his convictions for malice murder, armed robbery, and possession of a firearm during the commission of a felony in connection with the death of Michael Moore. On appeal, he argued the trial court erred by allowing the State to use two firearms for demonstrative purposes during trial, and by allowing body-camera footage to be shown at trial. He also argued his trial counsel was ineffective for failing to object to a letter written by Robinson's cellmate being available to the jury for review during deliberations, and for failing to object to a visual aid used by the State during closing arguments. Because Robinson failed to show ineffective assistance of counsel or reversible error by the trial court, the Georgia Supreme Court affirmed.

Turner v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0247
Opinion Date: April 20, 2020
Judge: Warren
Areas of Law: Constitutional Law, Criminal Law

Appellant Ronald Turner appeals from his conviction for malice murder stemming from the stabbing death of William King. The stabbing took place outside an apartment at which Turner had driven in order to trade food for drugs. Turner testified in his own defense at trial and claimed that King hit him in the head with a beer bottle because Turner owed money to King from a prior drug transaction. Turner testified that he tried to get away from King, but that King chased him down and grabbed his jacket. According to Turner, King was getting ready to hit him again when Turner stabbed King in self-defense. Appealing his ultimate conviction, Turner contended he was denied the effective assistance of counsel in three respects. Seeing no reversible error after a review of the trial court record, the Georgia Supreme Court affirmed Turner's conviction.

Valrie v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0380
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Reuben Valrie was tried by jury and convicted of murder and other crimes in connection with the death of his infant daughter Aliyana. Valrie appealed, claiming that he was denied the effective assistance of counsel. Aliyana died as a result of closed head trauma, with a blunt-force abdominal injury as a secondary cause of death, which investigators determined was consistent with being shaken or dropped. At trial, Valrie presented the testimony of four expert witnesses who testified that Aliyana died of natural causes and that the injuries to her brain and abdomen were caused by

events such as post-mortem CPR and the “rough” handling of her body by first responders. The jury rejected this defense and found Valrie guilty of murder and the other charges. Valrie contended that his trial lawyer should have raised a hearsay objection to the admission of recorded statements that his girlfriend (and Aliyana's mother) made to police investigators (as well as the testimony of one of those investigators about some of those statements). Alternatively, Valrie argued that his lawyer should have sought the redaction of certain portions of the recorded statements that impugned his character. The Georgia Supreme Court concluded Valrie failed to present evidence that his trial counsel was deficient, or that he was prejudiced by any alleged failures. According, the Court affirmed conviction.

Williams v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0241
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Richard Williams, II, was tried by jury and convicted of murder in connection with the strangulation death of Cory Robinson. Williams and Robinson were involved in a sexual relationship and had been living together at an extended-stay hotel. Kelvin Spencer was a close friend of both Williams and Robinson. When Spencer met Williams at the hotel room, Williams looked angry and had scratches on his neck. Spencer saw Robinson lying on the floor in a “praying position.” Spencer did not believe Robinson was dead, and he helped Williams move clothes and other things to a U-Haul truck parked outside, in preparation for a move. Williams did not testify or present any evidence. Based on his lawyer’s opening and closing arguments, the defense theory was that Spencer killed Robinson because he was jealous of Williams’s relationship with Robinson. Williams’s sole claim on appeal was that he was denied the effective assistance of counsel when his trial lawyer failed to present as a defense that Williams accidentally killed Robinson during consensual erotic asphyxiation. He argued that his lawyer's discomfort with the topic of homosexual BDSM activity, and his own problems with the Georgia State Bar, precluded presentation of the "true"

version of events, and that Williams acceded to the lawyer's defense strategy only "through ignorance and that he did not know that a defense based on consensual erotic asphyxiation was available." Finding no reversible error, the Georgia Supreme Court affirmed conviction.

Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming Defendant's conviction of sexual assault in the first degree on the complaining witness pursuant to Haw. Rev. Stat. 707-730(1)(b), holding that the ICA did not err in affirming the family court. Specifically, the Supreme Court held (1) the jury should have been instructed to determine jurisdictional facts, but the error was harmless beyond a reasonable doubt; and (2) the ICA did not err in finding that there was no rational basis in the record to support providing the jury instruction of the lesser included offense of sexual assault in the third degree.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 22, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming the judgment of the family court convicting Defendant on two counts of sexual assault in the first degree, holding that the ICA did not err in affirming the family court. At issue on appeal was the jurisdiction of the family court to try Defendant and the propriety of

instructing the jury on a lesser included offense. The ICA affirmed, concluding that the family court had subject matter jurisdiction pursuant to Haw. Rev. Stat. 571-14(a)(1) and that there was no rational basis to support an instruction of the lesser included offense of sexual assault in the third degree. The Supreme Court affirmed, holding (1) although the jury should have been instructed to determine jurisdictional facts, the error was harmless; and (2) the family court was not obligated to instruct the jury on the lesser included offense of sexual assault in the third degree.

Idaho v. Burke

Court: Idaho Supreme Court - Criminal
Docket: 46841
Opinion Date: April 22, 2020
Judge: Moeller
Areas of Law: Constitutional Law, Criminal Law

Prior to sentencing, defendant James Burke was committed to the state mental hospital for 56 days to restore him to competency. After being evaluated and deemed competent to proceed to trial, Burke was returned to the county jail and later pleaded guilty pursuant to a plea agreement. At the conclusion of his sentencing hearing, Burke sought credit for the 56 days of time spent in court-ordered commitment. The district court denied the motion, concluding that commitment to a state mental hospital did not fall under the definition of 'incarceration' in Idaho Code section 18-309. After reviewing this issue carefully, the Idaho Supreme Court disagreed with the district court's "thorough and thoughtful analysis," holding that court-ordered commitment to state custody pursuant to Idaho Code sections 18-210 and 18-211 met the functional and legal definition of "incarceration" under Idaho Code section 18-309. "The extent of the liberty interests restricted by Burke's court-ordered commitment to State Hospital North are just too similar to imprisonment to conclude otherwise." Accordingly, the Court reversed the district court's order denying Burke's request for credit for time served and remanded the case for the district court to enter an order crediting him with the fifty-six days he spent committed to State Hospital North while the State restored his competency to face criminal charges.

State v. Gibbs

Court: Iowa Supreme Court
Docket: 18-1298
Opinion Date: April 17, 2020
Judge: Edward M. Mansfield
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of murder in the second degree, holding that Defendant's Fifth Amendment rights were invaded when the trial judge instructed the jury that Defendant was required to notify law enforcement of his use of deadly force, but the error was harmless. During trial, Defendant asserted the defense of justification in his shooting of the victim. At issue on appeal was whether the district court abused its discretion by giving a jury instruction incorporating the terms of Iowa Code 704.2B. The instruction included a statement that a person using deadly force is required to notify law enforcement about his use of deadly force. Defendant argued before the Supreme Court that both section 704.2B and the jury instruction incorporating that section violated his Fifth Amendment rights. The Supreme Court affirmed, holding (1) instructing the jury that a homicide defendant is required to notify a law enforcement agency of his use of deadly force violates the defendant's Fifth Amendment rights; but (2) any error in this case was harmless beyond a reasonable doubt.

State v. Broxton

Court: Kansas Supreme Court
Docket: 114675
Opinion Date: April 17, 2020
Judge: Stegall
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions for second-degree murder, burglary, and theft but reversed Defendant's sentences, holding

that any error during the guilt phase was harmless but that the district court erred by scoring Defendant's prior Florida burglary conviction as a person felony instead of a nonperson felony. On appeal, the court of appeals concluded that a trial court may instruct the jury on felony murder even though the State only charged the defendant with premeditated first degree murder. The Supreme Court disagreed, holding (1) the court of appeals erred in concluding that a district court may elect to provide a felony-murder instruction when that crime was not charged, and the district court properly found that the felony-murder instruction was not legally appropriate in this case; (2) the district court erred by excluding from evidence an exculpatory document from a Florida homicide investigation on the ground it was not relevant, but the error was harmless; and (3) the district court improperly scored Defendant's prior Florida burglary conviction as a person felony.

State v. Corbin

Court: Kansas Supreme Court
Docket: 119665
Opinion Date: April 17, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed the ruling of the district court on remand resentencing Defendant to his original mandatory term of imprisonment after once again finding he was not a person with intellectual disability, holding that the district court did not abuse its discretion when it rejected Defendant's intellectual disability motion and imposed a mandatory term of imprisonment. Defendant pled no contest to first-degree premeditated murder. Before sentencing, Defendant filed a motion pursuant to Kan. Stat. Ann. 21-6622(b) asserting that he was a person with intellectual disability and was thus not subject to a mandatory minimum prison term. The district court denied the motion and sentenced Defendant to a hard twenty-five life sentence. While Defendant's appeal was pending, the Legislature amended Kan. Stat. Ann. 76-12b01(i), which provides new standards for deciding intellectual disability. The Supreme Court reversed and remanded for reconsideration of Defendant's motion using the new criteria. On remand, the district court reaffirmed its earlier ruling and again sentenced Defendant

to a hard twenty-five life sentence. The Supreme Court affirmed, holding that the district court's ruling was reasonably based on the law and was supported by substantial competent evidence.

State v. Frazier

Court: Kansas Supreme Court
Docket: 117456
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the district court affirming the judgment of the district court denying Defendant's motion to withdraw plea of no contest to one count of possession of heroin with intent to distribute, holding that the district court's decision in finding no good cause for Defendant to withdraw his plea was based on errors of fact and law, which were grounds for finding abuse of discretion. On appeal, Defendant argued that the district court abused its discretion in denying his motion to withdraw his plea of no contest based on misleading or false statements contained in the plea agreement. The court of appeals affirmed the district court. The Supreme Court reversed, holding (1) there was enough uncertainty in this case to indicate that Defendant's plea agreement was not understandingly made; and (2) therefore, Defendant must be allowed to withdraw his plea.

State v. Harris

Court: Kansas Supreme Court
Docket: 117362
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the judgment of the court of appeals affirming Defendant's conviction of possession fo marijuana, holding that Defendant's waiver of jury trial was legally insufficient. On appeal, Defendant argued that

he did not properly waive his right to a jury and asserted three other issues. The Supreme Court reversed the judgment of the court of appeals affirming Defendant's convictions without addressing the three remaining issues, holding that because the district court failed properly to apprise Defendant of his right to a jury trial and failed to ensure that Defendant understood the nature of the right he was giving up, Defendant's constitutional right to a jury trial was violated in this case.

State v. Uk

Court: Kansas Supreme Court
Docket: 119712
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree premeditated murder, holding that the district court did not err in its challenged instructions to the jury. Specifically, the Supreme Court held (1) the district court did not err in refusing to give the jury Defendant's requested instruction on voluntary manslaughter as a lesser included offense of first-degree murder because the instruction was not factually appropriate; and (2) the district court did not commit clear error in issuing an unmodified version of Instruction No. 11, which contained the definition of "premeditation" and mirrored PIK Crim. 4th 54.150(d) because the instruction was legally appropriate.

State v. Catruch

Court: Maine Supreme Judicial Court
Citation: 2020 ME 52
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgments of the trial court

terminating Appellant's participation in the Co-Occurring Disorders and Veterans Court (Veterans Court), holding that the court did not err or abuse its discretion in terminating Appellant's participation in the Veterans Court. The Veterans Court is a criminal docket that provides judicial monitoring, specialized treatment, and other services for military veterans who have disorders often attributable to their military service. Appellant was charged with leaving the scene of an accident and three other offenses. Appellant was admitted to the Veterans Court. Agreeing to sentencing outcomes in a plea agreement and entering into a bail contract, Appellant pleaded guilty to all charges against him. The court later terminated Appellant's participation in the Veterans Court, finding that Appellant had violated the conditions of his bail contract. The Supreme Judicial Court affirmed, holding (1) this matter was properly before the Court; and (2) given Appellant's failure to comply with the requirements for participation in the treatment court and his violations of the agreements, his termination from the Veterans Court was warranted.

State v. Paquin

Court: Maine Supreme Judicial Court
Citation: 2020 ME 53
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Constitutional Law, Criminal Law

In this appeal from Defendant's conviction for eleven counts of gross sexual misconduct, the Supreme Judicial Court vacated the judgment of conviction on one count, vacated the dismissal of other counts and remanded for entry of a judgment of acquittal on those counts, and affirmed in all other respects, holding that Defendant's convictions on both Counts 5 and 30 violated his double jeopardy protections and that the court erred in allowing the State to dismiss Counts 27, 28, and 29 during trial without Defendant's consent. The indictment charged Defendant with fifteen counts (Counts 1-13, 30-31) of gross sexual misconduct against the victim and sixteen counts (Counts 14-29) of gross sexual misconduct against a second alleged victim. During trial, the court granted Defendant's motion for a judgment of acquittal on Counts 10-13, and the State dismissed Counts 27-29. Defendant was

found guilty of Counts 1-9 and 30-31 and not guilty on the remaining counts. The court entered judgment in accordance with the verdict. The Supreme Judicial Court held that the trial court erred in failing to rule that the Double Jeopardy Clause barred convictions on both Counts 5 and 30 and allowing the State to dismiss Counts 27, 28, and 29 rather than entering a judgment of acquittal on those counts.

Watson v. State

Court: Maine Supreme Judicial Court
Citation: 2020 ME 51
Opinion Date: April 21, 2020
Judge: Joseph Jabar
Areas of Law: Criminal Law

The Supreme Judicial Court vacated the judgment of the unified criminal docket denying Appellant's petition for post-conviction review, holding that Appellant was deprived of the effective assistance of counsel when his trial attorney played a video of the ten-year-old victim's interview with police and that Appellant was adversely affected. Appellant was convicted of two counts of gross sexual assault, one count of unlawful sexual contact, and one count of visual sexual aggression against a child. The Supreme Court affirmed. Appellant later filed a petition for post-conviction review claiming that his trial attorney's representation was deficient because introducing the videotaped recording of the victim's entire interview with law enforcement was unnecessary to provide evidence supporting the victim's potential motive to fabricate the allegations. The post-conviction court denied denied the petition. The Supreme Court vacated the judgment below, holding that trial counsel's conduct was deficient and that counsel's actions rose to the level of comprising the reliability of Appellant's conviction and undermining confidence in it.

Commonwealth v. Mazza

Court: Massachusetts Supreme Judicial Court

Docket: SJC-11363
Opinion Date: April 21, 2020
Judge: Budd
Areas of Law: Criminal Law

The Supreme Judicial Court reversed the order of the superior court denying Defendant's motion for a new trial and set aside the jury's verdicts of first degree murder and robbery, holding that a recently discovered witness statement made to the police ago constituted newly discovered evidence that "would probably have been a real factor in the jury's deliberations." At issue was Defendant's sixth motion for a new trial, which was predicated on newly discovered evidence consisting of, among other things, a recently discovered statement made to the police in 1972. The superior court denied the motion. As to the police statement, the judge found that it did not constitute newly discovered evidence because Defendant failed to establish that defense counsel did not have possession of it at the time of trial. The Supreme Judicial Court reversed and remanded the case for a new trial, holding (1) Defendant sustained his burden of establishing that defense counsel did not have the 1972 police statement prior to or at trial, and therefore, the statement constituted newly discovered evidence; and (2) there was a substantial risk that the jury would have reached a different conclusion had the evidence been admitted at trial.

Docket: SJC-12750
Opinion Date: April 16, 2020
Judge: Gaziano
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed the judgment of the district court denying Defendant's motions to suppress, holding that the limited use of automatic license plate readers (ALPRs) in this case did not implicate constitutional protections against unreasonable searches. While police were investigating Defendant on suspicion of drug distribution they used ALPRs on two bridges to track Defendant's movements. The police accessed historical data via ALPR technology and received real-time alerts, the last of

which led to Defendant's arrest. Defendant filed motions to suppress the ALPR data and the fruits of the arrest. The superior court denied the motions. The Supreme Judicial Court affirmed, holding that while the widespread use of ALPRs in the Commonwealth could implicate a defendant's constitutional protected expectation of privacy in the whole of his public movements, that interest was not invaded by the limited extent and use of the ALPR data in the instant case.

Garden v. Commonwealth

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12821
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of a single justice of the court denying Petitioner's petition for extraordinary relief under Mass. Gen. Laws ch. 211, 3 seeking an order vacating Petitioner's plea to aggravated rape and dismissing the underlying indictment, holding that the single justice did not err or abuse his discretion in denying relief. The issues raised by Petitioner had all been raised and adjudicated through the normal appellate process. Petitioner then filed a motion to withdraw his guilty plea. The motion was denied, and the Appeals Court affirmed. In this petition for extraordinary relief, Petitioner sought an order vacating his plea to aggravated rape and dismissing the underlying indictment. The single justice denied relief. The Supreme Judicial Court affirmed, holding that the superintendence power was not available as an additional layer of appellate review once all other avenues had been exhausted.

In re Mitchell

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12910
Opinion Date: April 22, 2020

Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of the county court denying, without a hearing, Petitioner's petition for relief under Mass. Gen. Laws ch. 211, 3, holding that the single justice did not err or abuse his discretion in denying relief. Defendant was convicted of several offenses. The Appeals Court reversed the convictions and remanded the matter for a new trial. Thereafter, the Commonwealth filed a nolle prosequi as to all the charges. In his Mass. Gen. Laws ch. 211, 3 petition, Defendant alleged that no crime had been committed and that he was wrongfully prosecuted. The single justice denied relief. The Supreme Judicial Court affirmed, holding that Defendant did not demonstrate entitlement to the exercise of this Court's superintendence powers.

Opinion Date: April 22, 2020
Judge: G. Barry Anderson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree murder, holding that there was no error in the proceedings below. Specifically, the Supreme Court held (1) Appellant's right to a fair trial before an impartial tribunal was not violated when the district court stated that it might reconsider its prior Spreigl ruling if the defense presented certain witnesses; (2) the jury instructions on accomplice liability were plainly erroneous, but Appellant failed to establish that there was a reasonable likelihood that the error had a significant effect on the verdict; (3) the prosecutor did not commit misconduct in his closing arguments regarding the law of accomplice liability; (4) the district court did not abuse its discretion by granting the State's motion to admit evidence of appellant's past convictions for impeachment purposes, including by allowing the specific convictions to be disclosed to the jury; and (5) Appellant's pro se arguments were without merit.

Huff v. Brown

Court: Nebraska Supreme Court
Citation: 305 Neb. 648
Opinion Date: April 23, 2020
Judge: Lindsey Miller-Lerman
Areas of Law: Communications Law, Criminal Law

The Supreme Court reversed the portion of the district court's order granting in part a writ of mandamus requiring Doug Brown, the sheriff of Furnas County, to provide records to Herchel Huff pursuant to the public records statutes, holding that the district court erred when it determined that Huff had shown that Brown had a clear duty to provide the requested records. Huff, an inmate, sought, among other documents, the criminal history

records of jurors who had convicted hims. Furnas County sheriff Kurt Kapperman required a deposit of $750 before fulfilling the request. Huff subsequently filed a petition for writ of mandamus naming Kapperman as the defendant and seeking an order compelling Kapperman to release all requested documents. The court permitted Huff to substitute Brown, the current sheriff, in the caption of the case in place of Kapperman and granted in part mandamus. The Supreme Court reversed in part, holding that the district court (1) did not err when it substituted Brown's name for Kapperman's; but (2) erred in issuing mandamus because Huff failed to demonstrate a prima facie case that he had been denied a request for public records that the sheriff had a clear duty to provide under Neb. Rev. Stat. 84-712.

State ex rel. Kendrick v. Parker

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1509
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals denying Appellant's request for a writ of prohibition and/or mandamus against Montgomery County Court of Common Pleas Judge E. Gerald Parker Jr., holding that the court of appeals correctly determined that Appellant's claim was barred by res judicata. Appellant sought a petition for writ of prohibition and/or mandamus against Judge Erik Blaine, the successor to the judge who sentenced Appellant, alleging that the sentencing court patently and unambiguously lacked jurisdiction to sentence him. Judge Parker, who had succeeded Judge Blaine, subsequently filed a motion for summary judgment. The court of appeals granted summary judgment for Judge

Parker, concluding that Appellant failed to demonstrate that the sentencing court patently and unambiguously lacked jurisdiction or that he lacked an adequate remedy at law and that res judicata barred Appellant's claim. The Supreme Court affirmed, holding that Appellant's claim was barred by res judicata.

State ex rel. Nelson v. Russo

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1541
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus seeking to compel Cuyahoga County Court of Common Pleas Judge Nancy Margaret Russo to vacate the consecutive prison sentences imposed on Appellant in 1987, holding that Appellant had an adequate remedy at law and was barred from asserting additional claims of sentencing error he could have raised in his previous mandamus action. In 1987, Appellant was convicted of four counts of rape and one count of kidnapping. Appellant was sentenced to prison terms of fifteen to twenty-five years for each of the five counts, to be served consecutively. In 2019, Appellant sought a writ of mandamus to compel Judge Russo to vacate his consecutive sentences. The court of appeals dismissed the writ action, concluding that res judicata barred Appellant's claim and that his prior appeals were an adequate remedy at law to address the alleged defect in his consecutive sentences. The Supreme Court affirmed, holding that Appellant was not entitled to a writ of mandamus in this case.

State ex rel. Roberts v. Marsh

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1540

Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's original action seeking a writ of procedendo and/or mandamus to compel Hamilton County Court of Common Pleas Judge Melba Marsh to issue a corrected sentencing entry, holding that the court of appeals correctly dismissed the petition as moot. Appellant was convicted of murder with a repeat-violent-offender specification. Appellant later asked the trial court to correct his sentence, arguing that he had improperly been sentenced to postrelease control. On remand, Judge Marsh vacated the postrelease-control sentence. Appellant appealed that order. The court of appeals noted that the trial court had not set forth all the information required under Crim.R. 32(C) in a single document and dismissed the appeal for lack of a final, appealable order. Appellant then filed this original action seeking to compel Judge Marsh to issue a corrected sentencing entry that constitutes a final, appealable order. Judge Marsh issued a nunc pro tunc sentencing entry that constituted a final, appealable order. The court of appeals then dismissed the petition as moot. The Supreme Court affirmed, holding that because Judge Marsh performed the act Appellant requested, the court of appeals dismissed the petition as moot.

State ex rel. Steiner v. Rinfret

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1510
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus against Holmes County Court of Common Pleas Judge Robert D. Rinfret, holding that the court of appeals correctly determined that Appellant had an adequate remedy in the ordinary course of the law. Appellant, who was serving consecutive prison terms for five convictions, filed a petition for a writ of mandamus arguing that Judge Rinfret improperly sentenced him to a prison

term of nine years for his attempted rape conviction instead of the maximum term of eleven years. The court of appeals dismissed the petition, determining that Appellant had failed to file a mandatory affidavit of his prior civil actions and had an adequate remedy in the ordinary course of the law. The Supreme Court affirmed, holding that relief in mandamus was not available because Petitioner had an adequate remedy in the ordinary course of the law.

State v. Jeffries

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1539
Opinion Date: April 22, 2020
Judge: Donnelly
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals upholding Defendant's convictions of four counts related to two specific instances of sexual abuse of D.S., holding that the trial court and court of appeals correctly applied Ohio's rape-shield law and determined that evidence of D.S.'s prior nonconsensual sexual assault was inadmissible. On appeal, Defendant asserted that the trial court erred in prohibiting him from introducing evidence during trial that D.S. had previously been sexually assaulted by another person, arguing that the rape-shield law applies only to an accuser's prior consensual sexual activity. The lower court held that Ohio's rape-shield law addresses all sexual activity, not only consensual sexual activity. The court of appeals affirmed. The Supreme Court affirmed, holding (1) the plain meaning of the term "sexual activity" as used in the rape-shield law includes both consensual and nonconsensual sexual activity; and (2) therefore, all sexual activity is barred from admission into evidence by the rape-shield, absent certain exceptions listed in the law.

Pennsylvania v. Britton

Court: Supreme Court of Pennsylvania

Docket: 55 MAP 2018
Opinion Date: April 22, 2020
Judge: Max Baer
Areas of Law: Constitutional Law, Criminal Law

California law enforcement officers interviewed Appellant Stacy Britton in her California residence and, unbeknownst to her, recorded those interviews. Over Appellant's objection, Pennsylvania used those recordings as evidence to help convict Appellant of murder in Pennsylvania. The Pennsylvania Supreme Court granted allowance of appeal to examine whether the California law enforcement officers were acting as agents of the Pennsylvania State Police when they recorded the interviews with Appellant in her California home, and if so, whether Pennsylvania's constitutional and statutory protections were available to Appellant under those circumstances. The Court concluded the California law enforcement officers were not acting as agents of the Pennsylvania State Police when they interviewed Appellant, making analysis of whether any Pennsylvania-specific constitutional or statutory protections unwarranted. Because the Supreme Court concluded the Pennsylvania trial court reached the proper result in this matter, it affirmed that court's judgment.

Pennsylvania v. Copenhaver

Court: Supreme Court of Pennsylvania
Docket: 48 MAP 2019
Opinion Date: April 22, 2020
Judge: Thomas G. Saylor
Areas of Law: Constitutional Law, Criminal Law

In August 2015, a deputy sheriff conducted a vehicle stop of Appellant Victor Copenhaver's pickup truck. Upon approaching the truck, the deputy noticed an odor of alcohol and marijuana emanating from the passenger compartment. After administering field sobriety tests, he arrested Appellant for suspected driving under the influence of alcohol and controlled substances ("DUI"). Appellant was ultimately charged with DUI and other offenses. Appellant challenged the deputy's authority to conduct a traffic stop and sought suppression of all evidence obtained during the encounter. Rather than presenting testimony at a suppression hearing, the parties

stipulated that Appellant was driving the vehicle in question and that the deputy had training and qualifications equivalent to that of a police officer. The parties also agreed that the vehicle stop occurred as a result of the deputy observing the tailgate to the pickup truck being in a down position, which caught the deputy's attention. The deputy further observed the registration on the pickup truck was expired, and additionally, the registration number was identified as belonging to a vehicle other than the one on which it was attached. The issue this case presented for the Pennsylvania Supreme Court's review was whether the deputy could lawfully conduct the traffic stop based on the expired registration sticker, on a theory that such a violation amounts to a breach of the peace. The Supreme Court concluded driving a vehicle with an expired registration did not entail a breach of the peace. It vacated the superior court's order insofar as it held that the expired registration was a breach of the peace, thus alone authorizing the deputy to stop Appellant's vehicle. Notably, in light of its holding, the Supreme Court found the superior court did not proceed to consider other relevant questions, such as whether the parties' factual stipulation should have been read as indicating that the officer's understanding that the registration sticker was associated with a different vehicle arose in the pre-stop timeframe – consistent with the Commonwealth's position throughout this litigation. "These issues should be resolved in the first instance by the intermediate court on remand."

Pennsylvania v. Tedford

Court: Supreme Court of Pennsylvania
Docket: 773 CAP
Opinion Date: April 22, 2020
Judge: Donohue
Areas of Law: Constitutional Law, Criminal Law

Appellant Donald Tedford was convicted of first-degree murder and rape on February 6, 1987. He appealed the dismissal of his second petition for relief filed pursuant to the Post Conviction Relief Act ("PCRA"), on December 2, 2014, as amended by a counseled petition on May 5, 2015, and a supplemental petition filed on June 9, 2015. In connection with his initial filings, Tedford sought wholesale discovery of the prosecution's entire file,

but the PCRA court concluded that the petition (as amended) was not timely filed. Tedford also appealed the PCRA court's order denying his supplemental PCRA petition, in which he requested discovery, an evidentiary hearing, and/or a new trial based upon the admission of expert testimony presented at trial related to microscopic hair analysis. The PCRA court concluded that pursuant to PCRA Section 9545(b)(1)(ii), it had jurisdiction to consider the merits of Tedford's newly-discovered-facts claims, but ultimately it concluded Tedford had not asserted a meritorious claim in accordance with Section 9543(a)(2)(vi). Finding no reversible error in that analysis, the Pennsylvania Supreme Court affirmed dismissal of the petition for relief.

Pennsylvania v. Trahey

Court: Supreme Court of Pennsylvania
Docket: 38 EAP 2018
Opinion Date: April 22, 2020
Judge: Wecht
Areas of Law: Constitutional Law, Criminal Law

The trial court granted Timothy Trahey's motion to suppress the results of a blood test that revealed his blood alcohol concentration ("BAC"), finding no justification for the investigating officers' failure to obtain a search warrant before conducting the test. On the Commonwealth's appeal, the Superior Court reversed, opining that the Commonwealth's evidence sufficiently established the existence of exigent circumstances, thus excusing the absence of a warrant. The Pennsylvania Supreme Court reversed, finding that while the exigency analysis is an objective one, "even disregarding the officers' subjective motivations, or their candid acknowledgment that they would have obtained a search warrant if they thought it necessary, there was no time-sensitive need to conduct a warrantless blood test under the circumstances of this case. Accordingly, the Superior Court's conclusion that the test was justified by exigent circumstances was drawn in error."

In re Greg Abbott

Court: Supreme Court of Texas
Docket: 20-0291
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court conditionally granted mandamus relief to the State seeking review of a temporary restraining order (TRO) blocking enforcement of Executive Order GA-13, which changes the rules applicable to judges' decisions regarding pre-trial bail, against judges, holding that the trial court lacked jurisdiction to order the judges' requested relief, even temporarily. GA-13 suspends certain statutes authorizing trial judges to release jail inmates with violent histories during the state of disaster due to the threat of the novel coronavirus. Plaintiffs alleged that GA-13 is unconstitutional and exceeds the governor's statutory emergency powers. Sixteen of the plaintiffs were Texas trial judges alleging that GA-13 improperly interferes with their judicial authority to make individualized bail decisions, and the other plaintiffs were public interest organizations and lawyer associations. The trial court issued a TRO blocking enforcement of GA-13 against judges. The Supreme Court conditionally granted mandamus relief, holding that the alleged threat of a criminal prosecution in this case did not give the judges standing to seek the invalidation of GA-13, and therefore, the trial court lacked jurisdiction to order their requested relief.

Stahmann v. Texas

Court: Texas Court of Criminal Appeals
Docket: PD-0556-18
Opinion Date: April 22, 2020
Judge: Barbara Hervey
Areas of Law: Constitutional Law, Criminal Law

Appellant Karl Stahmann was involved in an automobile accident, after which he threw a bottle of promethazine, a controlled substance, over a nearby wire fence before law enforcement arrived. The bottle landed two to three feet past the fence in plain view. He was convicted of third-degree

felony tampering with physical evidence and was sentenced to 10 years' confinement and fined $5,000. The judge suspended his sentence and placed him on community supervision for 10 years. Stahmann appealed, arguing in part that the evidence was insufficient to prove that he destroyed, altered, or concealed the prescription bottle. The court of appeals agreed that the evidence was insufficient, but instead of rendering an acquittal, it reformed the judgment to show that Stahmann was convicted of the lesser-included offense of attempted tampering with physical evidence, a state-jail felony. After review of the evidence presented at trial, the Texas Court of Criminal Appeals concluded the evidence was indeed insufficient to prove that Appellant altered the prescription pill bottle when he threw it over the fence because the mere act of throwing the bottle did not change the bottle itself. "While a rational jury could have reasonably inferred that Stahmann intended to conceal the pill bottle when he threw it over the wire fence, the evidence shows that he failed to conceal it as he intended because the bottle landed short of the bush in plain view on top of some grass." The Court affirmed the trial court's judgment.

Blanke v. Board of Pardons & Parole

Court: Utah Supreme Court
Citation: 2020 UT 16
Opinion Date: April 16, 2020
Judge: Himonas
Areas of Law: Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the district court's denial of Appellant's petition for extraordinary relief, holding that, under the circumstances, the Utah Board of Pardons and Parole need not afford Appellant the due process protections explained in Neese v. Utah Board of Pardons and Parole, 416 P.3d 663 (2017), before it could determine that Appellant was a sex offender and condition his parole on sex offender treatment. Appellant was serving a prison sentence for his convictions of attempted child kidnapping and kidnapping. Because he was convicted of attempted child kidnapping Appellant was considered a sex offender under the sex offender registration statute. Further, Appellant admitted in his presentence report that he had sexual intercourse with a

fifteen-year-old. Appellant filed a petition for extraordinary relief alleging that the Parole Board had violated his due process rights by conditioning his parole on completion of sex offender treatment even though he had not committed a sex offense. Summary judgment was granted for the Parole Board. The Supreme Court affirmed, holding that the Parole Board owed Appellant no additional process before it considered unconnected sex offenses in its decision to require Appellant to undergo sex offender treatment.

Washington v. Escalante

Court: Washington Supreme Court
Docket: 97268-1
Opinion Date: April 23, 2020
Judge: Steven González
Areas of Law: Constitutional Law, Criminal Law

Alejandro Escalante was detained for hours in a secured area at a border crossing and, the State conceded, interrogated by federal agents without Miranda warnings. Statements he made during that interrogation were used by the State to convict him of drug possession. While a traveler briefly detained and questioned at the border was typically not "in custody" for Miranda purposes, "the government's power to detain and question people at the border without implicating Miranda has limits." Here, the Washington Supreme Court determined those limits were reached. "This border detention created the type of inherently coercive environment that demands Miranda warnings to ensure an individual's choice to speak is the product of free will." The Supreme Court held that Escalante was in custody when he was interrogated and reversed.

Washington v. Haggard

Court: Washington Supreme Court
Docket: 97375-0
Opinion Date: April 23, 2020

Judge: Barbara Madsen
Areas of Law: Constitutional Law, Criminal Law

A class C felony "washes out" and is omitted from a defendant's offender score as long as he or she is not convicted of any crime within five years of the last date of release from confinement. David Haggard was convicted of a misdemeanor offense within this five-year period, which was dismissed pursuant to RCW 3.66.067. When Haggard later pleaded guilty to burglary and arson, the trial court included prior class C felonies in his criminal history, finding that the dismissed misdemeanor conviction interrupted the washout period for those offenses. Haggard contended on appeal this was error. The Washington Supreme Court determined that because a dismissed conviction constituted a "conviction" under the Sentencing Reform Act of 1981 (SRA), and misdemeanor dismissal and vacation were distinct processes, so Haggard's offender score was properly calculated.

State v. Taylor

Court: Supreme Court of Appeals of West Virginia
Docket: 18-0502
Opinion Date: April 21, 2020
Judge: Walker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court giving Petitioner credit for twelve days of time served toward the sentence he received for his felony conviction although Petitioner spent additional time in confinement for other charges that were dismissed in the universal plea agreement, holding that to grant Petitioner additional credit for time served would do little more than reward Petitioner for habitual criminal behavior. Petitioner was charged with several crimes and agreed to resolve the pending charges against him in a universal plea agreement. Under the terms of the agreement, Petitioner agreed to plea guilty to the charge of felony carrying a concealed firearm by a prohibited person. In exchange, the State agreed to drop the remaining charges. After he was sentenced, Petitioner argued that, in addition to the twelve days of credit for time served he was granted, he was constitutionally entitled to credit for time served

while he was incarcerated for charges that were resolved in the universal plea agreement. The Supreme Court affirmed, holding that Petitioner's circumstances implicated neither double jeopardy nor equal protection of the law such that additional credit for time served was constitutionally mandated.

State v. Harrison

Court: Wisconsin Supreme Court
Dockets: 2017AP002441-CR, 2017AP002440-CR
Opinion Date: April 17, 2020
Judge: Patience D. Roggensack
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the decision of the court of appeals reversing an order of the circuit court that granted sentence credit to Defendant, holding that the court of appeals correctly found that Defendant was not entitled to sentence credit but erred by advancing the commencement of Defendant's terms of extended supervision for Defendant's 2007 and 2008 cases. Specifically, the Court held (1) Defendant was not entitled to sentence credit under Wis. Stat. 973.155(1)(a) because the days he spent in custody for which he sought sentence credit were not in connection with the courses of conduct for which those sentences were imposed; and (2) the court of appeals erred by advancing the commencement of Defendant's terms of extended supervision for his 2007 and 2008 cases to the date they would have begun but for Defendant's confinement for unrelated convictions that were later set aside, holding that whether to employ advancement is a public policy decision best left to the legislature.

Criminal Law Opinions

Ramos v. Louisiana

Court: US Supreme Court
Docket: 18-5924
Opinion Date: April 20, 2020
Judge: Neil M. Gorsuch
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 48 states and in federal court, a single juror's vote to acquit is enough to

prevent a conviction; Louisiana and Oregon punish people based on 10-to-2 verdicts. Ramos was convicted in a Louisiana court by a 10-to-2 jury verdict and was sentenced to life without parole. The Supreme Court reversed. The Sixth Amendment right to a jury trial, as incorporated against the states by the Fourteenth Amendment, requires a unanimous verdict to convict a defendant of a serious offense. Juror unanimity is a vital common law right. The Court rejected an "invitation" to "perform a cost-benefit analysis on the historic features of common law jury trials and to conclude that unanimity does not make the cut." In overturning its 1972 "Apodaca" decision, the Court stated that the reasoning, in that case, was "gravely mistaken" and "sits uneasily with 120 years of preceding case law." The fact that Louisiana and Oregon may need to retry defendants convicted of felonies by non-unanimous verdicts whose cases are still pending on direct appeal "will surely impose a cost, but new rules of criminal procedure usually do."

United States v. Diaz-Rivera

Court: US Court of Appeals for the First Circuit
Docket: 18-1461
Opinion Date: April 20, 2020
Judge: Torruella
Areas of Law: Criminal Law

The First Circuit affirmed Defendant's upwardly variant sentence for one count of possession with intent to distribute cocaine and one count of using a firearm during and in relation to a drug-trafficking crime, holding that the sentence was neither procedurally nor substantively unreasonable. Pursuant to a plea agreement, Defendant pled guilty to drug-related crimes. After a sentencing hearing, the district court sentenced Defendant to an upwardly variant sentence of 180 months of imprisonment, thus declining to impose the government's requested sentence. On appeal, Defendant challenged both the procedural and substantive reasonableness of his sentence. The First Circuit affirmed, holding that the 180-month sentence was neither procedurally nor substantively unreasonable.

United States v. Cotto

Court: US Court of Appeals for the Second Circuit
Docket: 18-2970
Opinion Date: April 20, 2020
Judge: Leval
Areas of Law: Criminal Law

A conviction for retaliating against a witness in violation of 18 U.S.C. 1513 does not require that the Government prove that defendant had knowledge of the federal nature of the proceeding. The Second Circuit rejected defendant's arguments to the contrary and affirmed his conviction for retaliating against a witness. The court remanded for revision of the provision of the sentence relating to the substance abuse treatment condition of supervised release; instructed the district court to consider on remand whether the court's forthcoming order in United States v. Traficante, No. 18-1962 (2d Cir., submitted Oct. 25, 2019) requires modification of the risk notification provision of supervised release; and granted the parties leave to reinstate this appeal to permit review of the district court's decision on remand as to the risk notification provision.

United States v. Rosa

Court: US Court of Appeals for the Second Circuit
Docket: 17-2004
Opinion Date: April 17, 2020
Judge: Nardini
Areas of Law: Criminal Law

Where a district court offers no explanation for its sentence, and where neither the adopted presentence report nor the statement of reasons adequately demonstrates the court's reasoning, the court has committed plain error in violation of 18 U.S.C. 3553(c). The Second Circuit vacated defendant's sentence for conspiracy to commit wire fraud and aggravated identity theft. The court held that the district court failed to state its reasons for sentencing defendant as required under section 3553(c); the error is clear or obvious; and the error affected defendant's substantial rights. Accordingly, the court remanded for resentencing.

Fogle v. Sokol

Court: US Court of Appeals for the Third Circuit
Docket: 19-1066
Opinion Date: April 21, 2020
Judge: Matey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 1976, the body of 15-year-old “Kathy” was found near her Indiana County, Pennsylvania home. Kathy’s death involved a brutal assault, rape, and a gunshot to the head. Kathy's sisters, ages nine and 12, stated that she had gotten into a car with a man with blue eyes, black hair that came below his ears and curled at the ends, sideburns, heavy eyebrows, and a heavy mustache. Fogle had “straight reddish-blonde hair that dropped down his back and a matching, full beard that reached his waist.” After three years, Fogle became a suspect because a psychiatric patient described seeing Kathy get in a car with Fogle and his brother. The story was largely inconsistent with statements by Kathy’s sisters. Jailhouse informants were recruited and counseled by law enforcement with promises of leniency. The prosecutors “either knew about, encouraged, or permitted” this strategy. A jury found Fogle guilty of second-degree murder. In 2015, Fogle obtained DNA evidence excluding both himself and his brother as the source of semen collected from Kathy. His conviction was vacated. The Commonwealth declined to pursue new charges, describing the case as lacking “prosecutorial merit.” Fogle, having spent three decades in prison, sued the prosecutors and Indiana County under 42 U.S.C. 1983. The Third Circuit affirmed the denial of their motions to dismiss based on absolute immunity. Only truly prosecutorial functions, not investigative conduct, justify complete protection from suit. Fogle’s complaint alleges actions that fall outside the narrow doctrine of absolute immunity.

James v. New Jersey State Police

Court: US Court of Appeals for the Third Circuit

Docket: 18-1432
Opinion Date: April 21, 2020
Judge: Porter
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Stephens called 911 and reported that Gibbons hit her and had a gun in his truck. The police responded. Stephens obtained a temporary restraining order, prohibiting Gibbons from possessing firearms and from returning to Stephens's house. The next day, Gibbons went to Stephens's house. Stephens was talking on the phone; the friend called the police. Gibbons left Stephens's house. Trooper Conza arrived. Stephens stated that Gibbons had waved a gun throughout their argument. Conza told Stephens to go to the police barracks and reported over the radio that Gibbons had brandished a firearm. Conza, with Troopers Bartelt and Korejko, visited the nearby home of Gibbons's mother, James. James stated that she did not know where Gibbons was and that he might be off his schizophrenia medication. While driving to the barracks, Stephens saw Gibbons walking alongside the road and called 911. The Troopers responded. Bartelt parked his car and, exiting, observed that Gibbons was pointing a gun at his own head. Bartelt drew his weapon, stood behind his car door, and twice told Gibbons to drop his weapon. Gibbons did not comply. Bartelt shot Gibbons twice within seconds of stopping his car. Gibbons died that night. In James' suit under 42 U.S.C. 1983, the Third Circuit held that Bartelt is entitled to qualified immunity because he did not violate Gibbons's clearly established rights. Bartelt's pre-standoff knowledge of Gibbons differs from that of officers involved in cited cases. Bartelt could reasonably conclude that Gibbons posed a threat to others.

Bazemore v. Best Buy

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-2196
Opinion Date: April 21, 2020
Judge: Quattlebaum
Areas of Law: Criminal Law

Plaintiff filed suit against her employer, Best Buy, claiming that she was harassed because of her race and gender and subjected to a hostile work

environment in violation of Title VII of the Civil Rights Act of 1964. Plaintiff's complaint stemmed from an incident where a coworker made a racist and sexually charged joke to a small group of coworkers that included plaintiff. The Fourth Circuit affirmed the district court's motion to dismiss and held that, in the case of allegedly harassing comments by a co-worker, an employee must allege plausible facts that the employer knew, or should have known, about the harassment and failed to take action reasonably calculated to stop it. Because plaintiff failed to do this, the court affirmed the district court's judgment. In this case, the coworker's conduct was not imputable to Best Buy where Best Buy took steps that were not only reasonably calculated to end such behavior, but that it did in fact end it.

United States v. Akande

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-6833
Opinion Date: April 20, 2020
Judge: Diana Jane Gribbon Motz
Areas of Law: Criminal Law

After defendant moved under 28 U.S.C. 2255 to vacate his conviction based on the ineffective assistance of counsel, the district court denied the motion. The Fourth Circuit granted a certificate of appealability and reversed the district court's judgment. The court held that, given counsel's specific misadvice regarding defendant's rights to preserve his appellate rights, on which defendant understandably relied, the district court's general admonishments did not amount to the careful explanation that addresses the particular issue necessary to cure the error. In this case, the plea colloquy did not correct counsel's erroneous advice and the error prejudiced defendant. Accordingly, the court remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Chambers

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-7104

Opinion Date: April 23, 2020
Judge: Floyd
Areas of Law: Criminal Law

After defendant was erroneously sentenced as a career offender, he moved to reduce his sentence to time served under the First Step Act. The district court denied defendant's motion to reduce his custodial sentence, though it granted the motion as to his supervised release term. The Fourth Circuit held that the First Step Act does not constrain courts from recognizing Guidelines errors. The court explained that First Step Act motions fall under 18 U.S.C. 3582(c)(1)(B), a distinct exception to finality, and that section 404(b) of the First Step Act expressly allows a court to impose a reduced sentence in order to give retroactive effect to sections 2 and 3 of the Fair Sentencing Act. Furthermore, 18 U.S.C. 3553(a) sentencing factors apply in the section 404(b) resentencing context, and the resentencing court has discretion within the section 404(b) framework to vary from the Guidelines and, in doing so, to consider movants' post-sentencing conduct. In this case, the district court seemingly believed that it could not vary from the Guidelines range to reflect post-sentencing information. Therefore, the court vacated the district court's sentencing order. Finally, the court held that any Guidelines error deemed retroactive, such as the error in this case, must be corrected in a First Step Act resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Ferebee

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4266
Opinion Date: April 22, 2020
Judge: Traxler
Areas of Law: Criminal Law

The Fourth Circuit affirmed the denial of defendant's motion to suppress evidence recovered from a backpack, and the district court's conclusion that defendant abandoned the backpack and any legitimate expectation of privacy in its contents. The court rejected defendant's claim that the collective-knowledge doctrine has any bearing on the propriety of the district court's conclusion that defendant abandoned the backpack. The court also held that the district court is not precluded from finding abandonment in

cases where the defendant, as here, has physical possession of the property he has disavowed. In this case, the record supported the district court's conclusion that defendant clearly and unequivocally disavowed ownership of the backpack. Even if the district court erred by finding that defendant abandoned the backpack, reversal would not be required because the search of the backpack was a proper search incident to arrest for which no warrant was required under the facts of this case.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Nance

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4585
Opinion Date: April 21, 2020
Judge: Pamela Harris
Areas of Law: Criminal Law

The Fourth Circuit affirmed defendant's above-Guidelines sentence imposed after he pleaded guilty to two federal drug- and firearm-related offenses. The court held that defendant's sentence was not procedurally unreasonable where the district court took into account defendant's extensive criminal history; his pattern of reoffending upon release; his disciplinary infractions in custody and inability to comply with the terms of his release; and the fact that the offenses of conviction occurred over the course of days, in which he was arrested once, released, and then arrested again just days later. The court also held that defendant's sentence was substantively reasonable where the district court conducted a thorough, individualized assessment of defendant and his offense conduct in light of the 18 U.S.C. 3553(a) factors, and did not abuse its discretion in formulating the sentence.

United States v. Johnson

Court: US Court of Appeals for the Fifth Circuit
Docket: 17-60852
Opinion Date: April 21, 2020

Judge: Priscilla R. Owen
Areas of Law: Criminal Law

The Fifth Circuit vacated defendant's sentence imposed after he pleaded guilty to violating 18 U.S.C. 922(g) and 924(e) by knowingly possessing a firearm after he had been convicted of a misdemeanor crime of domestic violence. The court held that the district court committing plain error by violating Federal Rule of Criminal Procedure 32 when it relied on factual allegations in the confidential sentencing recommendation that were not in the presentence report and that were not disclosed by defendant. The court explained that the use of undisclosed facts to justify an above-guidelines sentence seriously affects the fairness, integrity, and public reputation of judicial proceedings. Therefore, the court remanded for resentencing.

United States v. McGinnis

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-10197
Opinion Date: April 21, 2020
Judge: Stuart Kyle Duncan
Areas of Law: Criminal Law

18 U.S.C. 922(g)(8), which prohibits individuals subject to certain domestic violence protective orders from possessing firearms or ammunition for any purpose, is facially constitutional under the Fifth Circuit's two-step NRA framework. Even assuming arguendo that the conduct at issue -- the keeping and possessing of firearms by individuals subject to domestic protective orders -- falls within the Second Amendment right, defendant's facial challenge fails. The court applied intermediate scrutiny and held that section 922(g)(8) is reasonably adapted to the government interest of reducing domestic gun abuse. The court also held that if the commonly understood definitions of terms in the protective order include acts involving "physical force," the protective order is sufficient to support a conviction under section 922(g)(8)(C)(ii). In this case, the jury plausibly found that the order satisfied the statute and the court declined to reverse defendant's conviction on this basis. However, the court remanded for the limited purpose of conforming defendant's written judgment to the district court's

oral pronouncement.

Valentine v. Collier

Court: US Court of Appeals for the Fifth Circuit
Docket: 20-20207
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law, Government & Administrative Law, Health Law

Plaintiffs filed suit alleging that TDCJ's adoption and implementation of measures guided by changing CDC recommendations in regards to the COVID-19 pandemic do not go far enough. Plaintiffs filed a class action alleging violations of the Eighth Amendment's prohibition against cruel and unusual punishment, and the Americans with Disabilities Act, seeking a preliminary injunction. The Fifth Circuit granted TDCJ's motion to stay the district court's preliminary injunction, which regulates the cleaning intervals for common areas, the types of bleach-based disinfectants the prison must use, the alcohol content of hand sanitizer that inmates must receive, mask requirements for inmates, and inmates' access to tissues (amongst many other things). The court held that TDCJ is likely to prevail on the merits of its appeal because: (1) after accounting for the protective measures TDCJ has taken, plaintiffs have not shown a "substantial risk of serious harm" that amounts to "cruel and unusual punishment"; and (2) the district court committed legal error in its application of Farmer v. Brennan, by treating inadequate measures as dispositive of defendants' mental state. In this case, even assuming that there is a substantial risk of serious harm, plaintiffs lack evidence of defendants' subjective deliberate indifference to that harm. The court also held that TDCJ has shown that it will be irreparably injured absent a stay, and that the balance of the harms and the public interest favor a stay. Finally, the court held that plaintiffs have not exhausted their administrative remedies as required in the Prison Litigation Reform Act (PLRA), and the district court's injunction goes well beyond the limits of what the PLRA would allow even if plaintiffs had properly exhausted their claims.

United States v. Dowl

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-2469
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

Dowl pleaded guilty to presenting false tax returns, 18 U.S.C. 286. He received a sentence of 30 months of imprisonment plus 24 months of supervised release. On supervised release, Dowl was charged with four new state crimes; failing to inform his probation officer that he had police contact; communicating with his co-defendant despite instructions to the contrary; failing to make payments on his restitution, fine, or special assessment; and failing to get a job. At a hearing, the court reviewed the evidence and allowed Dowl to tell his side of the story. The court deferred judgment on three of the four new state criminal law violations and dismissed the fourth and found Dowl gainfully employed. Dowl had failed to notify his probation officer about police contact, impermissibly communicated with his co-defendant, and did not pay his fines. After considering the 18 U.S.C. 3553(a) sentencing factors, the court returned Dowl to prison for 11 months, giving Dowl and his attorney the opportunity to raise any objections. Dowl had none. The Sixth Circuit affirmed, rejecting Dowl's argument that the court committed reversible error by not directly addressing him to solicit an allocution. The court employed the "plain error" standard because Dowl did not raise any objection during his revocation hearing.

United States v. Fowler

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-3071, 19-3070
Opinion Date: April 21, 2020
Judge: Donald
Areas of Law: Criminal Law

In 2018, Fowler pled guilty to possession of child pornography and violations of the conditions of his supervised release from a previous conviction for the same. In addition to possessing child pornography, Fowler had failed drug testing, had threatened his parole officer, and had tried to harass his girlfriend to recant her testimony. The district court ordered Fowler to pay a $5,000 special assessment for possession of child pornography under the Justice for Victims of Trafficking Act, 18 U.S.C. 3014. The court also varied upward and sentenced Fowler to the maximum statutory penalty for violating the conditions of his supervised release, imposing a 120-month sentence for possessing child pornography and a consecutive 36-month sentence for violating the terms of his supervised release. The Sixth Circuit vacated as to the assessment and remanded for a determination of indigency. The district court committed plain error by failing to address Fowler's ability to pay; the parties did not contemplate the $5,000 special assessment as a part of the waiver provision in the plea agreement. The court affirmed the sentence. The district court did not consider an impermissible factor (whether Fowler had actually touched a child) and Fowler had no other challenge to the reasonableness of his sentence,

United States v. Sumlin

Court: US Court of Appeals for the Sixth Circuit
Docket: 18-3819
Opinion Date: April 21, 2020
Judge: Bush
Areas of Law: Criminal Law

Sumlin was convicted of the distribution of drugs that caused the 2015 death of Carrie Dobbins, 21 U.S.C. 841(a)(1) and (b)(1)(C), which carries enhanced penalty provisions. The Sixth Circuit affirmed his convictions and his sentence to life in prison. The district court properly denied Sumlin's suppression motion, given that the affidavit established a sufficient nexus between his drug trafficking activity and residence that was searched. The court properly admitted testimony by the victim's sister, Kelly, who was Sumlin's former girlfriend and had purchased drugs from him. Kelly's testimony about Sumlin's drug-trafficking and that Sumlin was with Carrie on

the day of her overdose was intrinsic proof that was relevant for providing background information and contextualizing the government's case against Sumlin. Sufficient evidence supported the jury's verdict that Sumlin distributed the drugs that caused Carrie's death.

United States v. Vance

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5160
Opinion Date: April 17, 2020
Judge: Bush
Areas of Law: Criminal Law, White Collar Crime

The Spriggs' bank account was established to receive social security checks. The Spriggs' great-grandson, Vance, filled out an application in Mr. Spriggs's name for a debit card to draw on the checking account. Mr. Spriggs had never used a debit card. The Spriggses did not authorize Vance to do so. Bank cameras photographed Vance using the card to withdraw cash. Vance also used the card for personal expenses. At another bank, Vance used Mr. Spriggs's social security number to establish an account and obtain a $15,000 cash advance. Vance made other, unsuccessful loan applications. Upon being notified by the banks about suspicious activities involving his identity, Mr. Spriggs filed a police report. The police arrested Vance. While searching Vance's car, the police located a large stash of personal and financial documents belonging to the Spriggses, including bank statements, tax return forms, property-tax bills, and a car title. The Sixth Circuit affirmed Vance's convictions for access-device fraud, 18 U.S.C. 1029(a)(5), and two counts of aggravated identity theft, 18 U.S.C. 1028A(a)(1), and his 65-month sentence. The court rejected arguments that the district court failed to make adequate findings of fact after the bench trial, improperly denied a motion for judgment of acquittal, and failed to correctly calculate the loss amount connected to Vance's charges under Sentencing Guidelines 2B1.1.

Winburn v. Nagy

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-2399, 19-2398
Opinion Date: April 23, 2020
Judge: Jeffrey S. Sutton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Winburn represented himself at his trial for armed robbery, home invasion, and conspiracy. Based on Winburn's disruptive behavior, the judge removed him from the courtroom and revoked Winburn's permission to represent himself, then granted a competency evaluation and a mistrial. While Winburn awaited his second trial, the judge permitted Winburn's stand-by attorney to withdraw because Winburn had sued her and enjoined Winburn from filing complaints or grievances against his new attorney, except to discharge her. Although represented by a new attorney, Winburn moved pro se to dismiss his charges on double jeopardy grounds. The trial judge denied the motion because Winburn's attorney had not filed it. Winburn filed a habeas petition under 28 U.S.C. 2241 challenging his retrial and another section 2241 petition challenging the injunction. The district judges denied both and declined to issue certificates of appealability. Winburn filed a notice of appeal for one petition and sought a certificate of appealability for the other. The Sixth Circuit held that state pretrial detainees proceeding under section 2241 may not appeal without certificates of appealability and granted Winburn a certificate on the injunction claim. A reasonable jurist could conclude that the unusual order was constitutionally infirm. The court denied relief with respect to double jeopardy. Winburn failed to exhaust his state-court remedies by a motion to dismiss.

Lund v. City of Rockford

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1945
Opinion Date: April 20, 2020
Judge: ROVNER
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Lund, a reporter for the Rockford Scanner, heard, by police scanner, of multiple traffic stops in Midtown. He did not have a driver's license, so he

rode a motorized bicycle to Midtown to take photographs. He suspected a prostitution sting operation. An officer noticed Lund and radioed the team. Officers Welsh and Campbell knew of Lund's previous anti-police speech. They directed Lund to “move on.” Lund asked if he was breaking any laws. Campbell informed him that he was not, but that his continued presence would constitute obstruction of a police detail and result in arrest. Lund started his bicycle and called out, loudly, “goodbye officers.” Concerned that Lund might post pictures on social media while the sting operation was ongoing and create a danger for unarmed undercover officers, the officers followed Lund and arrested him for driving the wrong way on a one-way street, operating a vehicle without insurance, obstructing a police officer, felony aggravated driving on a revoked license, and operating a motor vehicle without a valid drivers’ license. News stories listed Lund’s name as an arrestee in the prostitution sting. The charges against Lund were dismissed. Lund sued the officers and the city under 42 U.S.C. 1983. The Seventh Circuit affirmed summary judgment for the defendants on First Amendment retaliation and malicious prosecution under Illinois law, citing the Supreme Court’s intervening "Nieves" (2019) holding, that, in most cases, probable cause to arrest defeats a claim of retaliatory arrest. There was probable cause to arrest Lund.

United States v. Perez

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3156
Opinion Date: April 23, 2020
Judge: KANNE
Areas of Law: Criminal Law

Beloit officers facilitated a recorded controlled buy of heroin from Perez, a suspected high-level drug dealer. Perez sold 98 grams of heroin to an informant. Based on that transaction alone, Perez pled guilty to distributing heroin. At Perez’s sentencing hearing, the judge expressed concern that the guidelines range of 33–41 months’ imprisonment did not reflect the full scope of his drug trafficking. The PSR described conduct that suggested that Perez was responsible for distributing large quantities of heroin, methamphetamine, and cocaine. The judge continued the hearing, directing

the government to file a memorandum, detailing which offense conduct it could support by a preponderance of the evidence. When the hearing reconvened, the government presented witness testimony that elaborated on conduct described in the PSR, including drug ledgers, Perez's post-arrest conversation with his girlfriend, large sums of cash, a money counter, cell phones, and Perez's passport. The judge calculated a higher guidelines range and imposed a 121-month sentence. The Seventh Circuit affirmed, rejecting an argument that the sentencing judge should have recused himself. Perez has not demonstrated that a reasonable observer would have questioned the judge's impartiality nor did he allege that the judge was biased based on events outside the proceedings. The judge's continuance was laudable, not prejudicial.

Jackson v. United States

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1131
Opinion Date: April 20, 2020
Judge: Lavenski R. Smith
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's denial of a 28 U.S.C. 2255 motion to vacate, set aside, or correct petitioner's sentence. The court held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that counsel was constitutionally ineffective for failing to conduct adequate pretrial investigations. In this case, petitioner failed to identify any specific witnesses or evidence that counsel failed to uncover. Furthermore, petitioner failed to show that counsel's representation prejudiced his case. The court also held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that his new counsel was ineffective for failing to subpoena witnesses, for convincing petitioner not to testify, for failing to object to or appeal the district court's answer to a jury question, and for failing to object to the district court's designation of petitioner as a career offender.

United States v. Bolman

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2759
Opinion Date: April 21, 2020
Judge: Jane Louise Kelly
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for involuntary manslaughter after he struck and killed his nephew with his truck. The court held that the evidence was sufficient to support the conviction, because a reasonable jury could find defendant grossly negligent beyond a reasonable doubt. The court also held that the district court did not plainly err by failing to instruct the jury that actual knowledge is an essential element of the offense that is separate from gross negligence, because the instructions, viewed as a whole, accurately and adequately defined the essential elements of the offense.

United States v. Boyd

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3528
Opinion Date: April 17, 2020
Judge: Kobes
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's sentence imposed after he pleaded guilty to being a felon in possession of a firearm. The court held that the facts underlying defendant's prior arrests were part of his history and characteristics under 18 U.S.C. 3553(a), and thus the district court could consider defendant's arrest records and the circumstances of those arrests. The court explained that the arrests were listed in the presentence report and gleaned from prior police reports. Furthermore, specific facts underlying the arrests may be considered for an upward departure and should be considered fair game for a variance where defendant did not object to them. The court also concluded that there is nothing here that suggested a corrected misstatement improperly influenced the district court's sentencing decision. Finally, the court held that the upward variance was not

unreasonable in consideration of defendant's previous assaults, coupled with the facts underlying his arrest in this case.

United States v. Gonzalez-Esparsa

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1477
Opinion Date: April 22, 2020
Judge: Grasz
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for unlawful use of an identification document and misuse of a social security number. The court held that the evidence was sufficient to support defendant's convictions where a reasonable juror could conclude that defendant knew the permanent resident card bearing his name and photograph had been forged, counterfeited, falsely made, or unlawfully obtained when he used it to secure employment. Furthermore, a reasonable juror could conclude that defendant made the false representation regarding his purported social security number in order to deceive Midwest Concrete in order to obtain a job with the company.

United States v. Sanchez-Velasco

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3568
Opinion Date: April 17, 2020
Judge: James B. Loken
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit affirmed the district court's denial of defendant's motion to suppress his responses to an ICE agent's two questions at the Treasurer's Office, because he was not in custody at the time of questioning. Although defendant was in custody at the ICE facility, the court held that an agent's questions were not custodial interrogation because the agent could not have known his questions were likely to elicit incriminating information regarding

the two criminal charges that were eventually brought against defendant. The court noted that the Attorney General's regulations carefully distinguish between the warrantless arrest of an alien for a criminal violation of the immigration laws, and what is called the "administrative arrest" of an alien who is reasonably believed to be illegally present in the United States. The court agreed with the district court that the agent's questioning was a request for routine information necessary for basic identification purposes that is not interrogation under Miranda, even if the information turns out to be incriminating.

Anthony v. TRAX International Corp.

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-15662
Opinion Date: April 17, 2020
Judge: Kim McLane Wardlaw
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's grant of summary judgment to TRAX in a disability discrimination action brought by plaintiff under Title I of the Americans with Disabilities Act (ADA). After TRAX terminated plaintiff from her position as a Technical Writer allegedly due to an inability or unwillingness to accommodate her disability, TRAX discovered during the course of litigation that plaintiff lacked the requisite bachelor's degree for her position. The panel held that, although McKennon v. Nashville Banner Publishing Co., 513 U.S. 352 (1995), held that after-acquired evidence cannot establish a superseding, non-discriminatory justification for an employer's challenged actions, after-acquired evidence remains available for other purposes, including to show that an individual is not qualified under the ADA. Because plaintiff did not satisfy one of the prerequisites for her position, she is not "otherwise qualified," and TRAX was not obligated to engage in the interactive process.

City of Almaty v. Khrapunov

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-56451
Opinion Date: April 22, 2020
Judge: Marbley
Areas of Law: Criminal Law, International Law, White Collar Crime

The City of Almaty, in Kazakhstan, filed suit against defendant and his family under the Racketeer Influenced and Corrupt Organizations Act (RICO), alleging that they engaged in a scheme to defraud the city of millions of dollars. The City claimed that it was forced to spend money and resources in the United States to trace where its money was laundered. The district court dismissed the City's claim on the basis that it failed to state a domestic injury pursuant to the Supreme Court's recent decision in RJR Nabisco, Inc. v. European Community, 136 S. Ct. 2090 (2016). The Ninth Circuit held that the City failed to state any cognizable injury other than the foreign theft of its funds, and its voluntary expenditures were not proximately caused by defendants' acts of money laundering. In this case, the City's expenditure of funds to trace its allegedly stolen funds is a consequential damage of the initial theft suffered in Kazakhstan and is not causally connected to the predicate act of money laundering.

United States v. Baldon

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10411
Opinion Date: April 21, 2020
Judge: Bennett
Areas of Law: Criminal Law

After defendant pleaded guilty to possession with intent to distribute a controlled substance, the district court sentenced him to 184 months in prison. The Ninth Circuit held that defendant's prior convictions for carjacking under section 215 of the California Penal Code are not categorical crimes of violence under USSG 4A1.1(e). Therefore, the district court incorrectly calculated defendant's criminal history by improperly including two points for his prior carjacking convictions. However, the panel held that the district court did not err in finding that defendant possessed a

firearm under USSG 2D1.1(b)(1). Accordingly, the panel affirmed in part, vacated in part, and remanded for resentencing.

United States v. Manzanares

Court: US Court of Appeals for the Tenth Circuit
Docket: 18-2010
Opinion Date: April 17, 2020
Judge: Mary Beck Briscoe
Areas of Law: Constitutional Law, Criminal Law

Defendant-Appellant Archie Manzanares appealed a district court's denial of his 28 U.S.C. 2255 motion challenging his sentence under the Armed Career Criminal Act (ACCA). Under the ACCA, an offense qualified as a violent felony by satisfying at least one of three definitions, which have come to be known as the Elements Clause, the Enumerated Clause, and the Residual Clause. Manzanares asserted that without the Residual Clause, his underlying New Mexico convictions (armed robbery, aggravated assault with a deadly weapon, and aggravated battery) no longer qualified

as violent felonies. The district court denied the motion, concluding that all three underlying convictions satisfied the Elements Clause. Manzanares appealed the classification of the armed robbery conviction as a violent felony to the Tenth Circuit, and sought to expand the certificate of appealability to allow him to appeal the decision regarding the aggravated assault with a deadly weapon and aggravated battery convictions. After review, the Tenth Circuit affirmed the district court's denial of Manzanares's 2255 motion, and denied his motion to expand the COA.

United States v. Delaney

Court: US Court of Appeals for the District of Columbia Circuit
Docket: 18-3093
Opinion Date: April 17, 2020
Judge: David S. Tatel
Areas of Law: Criminal Law

The DC Circuit vacated the district court's denial of defendant's motion to suppress evidence. The court held that officers violated the Fourth Amendment when they seized defendant because they lacked reasonable suspicion to justify the stop. In this case, a seizure occurred when the officers pulled into the parking lot, partially blocked defendant's vehicle, and activated their take-down light. The court held that any inference of suspicion that the officers drew from encountering defendant soon after hearing the nearby gunshots were undermined by the government's failure to identify specific and articulable facts supporting the officers' estimation of where the various shots came from. Accordingly, the court remanded for further proceedings.

Antenor v. Alaska, Department of Corrections

Court: Alaska Supreme Court
Docket: S-17005
Opinion Date: April 17, 2020
Judge: Carney

Areas of Law: Civil Procedure, Criminal Law, Government & Administrative Law

Several Alaska Department of Corrections inmates challenged the DOC's policy to charge for local telephone calls, arguing the rates they and call recipients had to pay for calls violated their constitutional right to rehabilitation, their statutory right to reasonable telephone access, and DOC's contractual obligations under a prior settlement and consent decree. In addition, one of the prisoners challenged DOC officers' decision to deny him access to a computer programming book he ordered from outside the prison. He contended that DOC placed a content-specific restriction on the educational materials and publications prisoners were allowed, violating the Alaska Constitution's free speech provisions as well as prisoners' right to reformation. Each of these challenges reached the Alaska Supreme Court after inmates exhausted the administrative process from prison. Inmates then appealed to the superior court, which denied relief. The Alaska Supreme Court determined the superior court record did not provide enough evidence for it to meaningfully determine the reasonableness of the rates charged inmates for local telephone calls; therefore the Court reversed denial of relief and remanded for further fact-finding by the trial court. The Court concluded that the facility's restrictions on programming-related books were rationally related to a legitimate interest, and because they did not infringe on the right to rehabilitation, it affirmed denial of a prisoner's motion to enforce his claimed right to a particular text about computer programming.

Berger v. Bryant

Court: Arkansas Supreme Court
Citation: 2020 Ark. 357
Opinion Date: April 23, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's petition to proceed in forma pauperis on a petition for writ of mandamus and a motion for declaratory judgment, holding that Appellant failed to state a colorable cause of action. In 1998, Appellant was convicted

of rape. In his petition for a writ of mandamus, Appellant asserted that he sought information pursuant to the Arkansas Freedom of Information Act regarding his rape conviction but received no response. The circuit court denied the petition. The Supreme Court affirmed, holding (1) even if Appellant had requested disclosable information, he would not be entitled to inspect it as an incarcerated person; and (2) Appellant did not demonstrate a legitimate claim given the facts presented and therefore failed to establish a colorable cause of action to support his request to proceed in forma pauperis.

Cave v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 356
Opinion Date: April 23, 2020
Judge: Josephine L. Hart

Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for writ of habeas corpus, holding that the circuit court did not err in denying the petition. Appellant was found guilty of two counts of delivery of a controlled substance and one count of maintaining a drug premises. In his habeas petition, Appellant argued that he was actually innocent because his arrest and conviction was based on the false testimony of a witness who had a lengthy criminal history. Appellant further argued that the writ should issue because he was not afforded effective assistance of counsel. The circuit court denied the petition. The Supreme Court affirmed, holding (1) Appellant's claims regarding the witness's credibility do not constitute a valid assertion that he was being unlawfully detained; and (2) Appellant did not actually connect an allegation of ineffective assistance of counsel to his allegation that he was unlawfully detained.

Chatmon v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 355
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Criminal Law

The Supreme Court denied Appellant's appeal from the order of the circuit court denying his petition to proceed in forma pauperis on the grounds that Appellant failed to state a colorable cause of action in a petition for writ of habeas corpus, holding that the circuit court did not abuse its discretion by denying Appellant's in forma pauperis petition. In his habeas petition, Appellant alleged that the trial court lacked jurisdiction in his criminal case. Before this case was submitted to the Supreme Court, Appellant filed two motions, including a "Judicial Notice of a Void Judgment" and a "Notice to the Court." The Supreme Court denied the motions, holding that neither motion was cognizable under the Court's rules. The Court then affirmed the Supreme Court's denial of Appellant's in forma pauperis petition, holding that the circuit court correctly found that Appellant did not assert a colorable

cause of action.

Siegel v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 359
Opinion Date: April 23, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from the circuit court's orders denying her motions to declare Ark. Code Ann. 5-62-106 (disposition of animal) and Ark. Code Ann. 5-62-111 (prevention of cruelty) unconstitutional and conditionally granting her motion for return of seized property, holding that there was no final, appealable order in this case. Appellant was convicted of thirty-one misdemeanor counts of cruelty to animals. The circuit court subsequently dismissed the charges on speedy-

trial grounds. The State appealed, and the Supreme Court dismissed the appeal on the grounds that it was not authorized. Appellant had filed motions seeking a declaration that sections 5-62-106 and -111 are unconstitutional and seeking the return of her seized property. The circuit court denied the constitutional claims and entered a conditional order granting Appellant's motion for return of seized property. Appellant appealed. The Supreme Court dismissed the appeal, holding that because the conditional order did not make specific findings as to the return of the property or as to damages and because it expressly left open the possibility of further proceedings, there was no final, appealable order in this case.

Thomas v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 354
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Appellant's conviction of capital murder, holding that the evidence was sufficient to sustain the conviction and that the circuit court did not err in denying Appellant's motion to suppress tracking data generated by his cellphone. On appeal, Appellant argued that the trial court erred by denying his directed-verdict motion because the evidence supported the defense's theory of the case that he did not intend to shoot the victim. Further, Appellant argued that the court abused its discretion in denying his motion to suppress evidence obtained from the seizure of AT&T phone records. The Supreme Court disagreed, holding (1) the evidence was sufficient to support the capital murder conviction; and (2) the circuit court correctly denied the motion to suppress.

California v. Landowski

Court: California Courts of Appeal
Docket: C080210(Third Appellate District)

Opinion Date: April 23, 2020
Judge: Andrea Lynn Hoch
Areas of Law: Constitutional Law, Criminal Law

Defendant Michael Reyes, Jr., an active Norteno gang member (from the Broderick Boys subset), confronted a former Norteno gang member (from the Franklin Boys subset), "S.," about a physical altercation that occurred between S. and Reyes's stepfather over a debt. That earlier altercation had taken place in front of Reyes's autistic younger brother. Reyes pulled out a handgun and asked S. if he had a problem. S., who was riding his bicycle with his wife, "R.," when Reyes confronted him with the gun, stopped briefly, told Reyes to put the gun down if he wanted to fight, and then started to ride away. This angered Reyes, prompting him to fire six rounds at S. from behind. S. Was hit but survived. R. Was a short distance in front of S., but was not hit. Defendants Liberty Landowski and Lisa Humble were with Reyes at the time of the shooting and aided in his efforts to avoid being apprehended by law enforcement authorities. Reyes, Landowski, and Humble were tried together before the same jury. Reyes was convicted of one count of attempted murder (Count 1), two counts of assault with a semiautomatic firearm (Counts 2 and 4), one count of possession of a firearm by a convicted felon (Count 5), and one count of possession of ammunition by a convicted felon (Count 6). In addition to various firearm and other enhancements, the jury found Reyes committed the crimes for the benefit of, at the direction of, or in association with a criminal street gang with the specific intent to promote, further, or assist in criminal conduct by gang members. The jury convicted Landowski and Humble of being accessories to Reyes's criminal conduct (Count 9) and also found true gang enhancement allegations attached to that crime. Reyes challenged the sufficiency of the firearm evidence presented to support his conviction, and all defendants challenged the sufficiency of the evidence supporting their gang enhancements. The Court of Appeal determined Senate Bill 620 (2017-2018 Reg. Sess.) gave the trial court discretion to strike firearm enhancements in the interest of justice and applied retroactively; and Senate Bill 136 (2019-2020 Reg. Sess.) eliminated such enhancements, and also applied retroactively. To these issues, the Court remanded for the trial court's consideration. The Court affirmed the trial court in all other respects.

California v. May

Court: California Courts of Appeal
Docket: C084302(Third Appellate District)
Opinion Date: April 20, 2020
Judge: Ronald B. Robie
Areas of Law: Constitutional Law, Criminal Law

Defendant Raymond May was found guilty by jury of possessing an assault weapon and a machine gun based on his possession of a single AK-47 assault rifle while guarding a marijuana plantation. He was sentenced to probation, which included an electronic search condition. On appeal, defendant argued there was a lack of sufficient evidence corroborating his accomplice's testimony and demonstrating he knew of the firearm's illegal character. He further alleged the trial court erred in instructing the jury: that the accomplice instruction should have included language specifying that the accomplice testimony needed to prove more than defendant's mere presence or access to the firearm. Furthermore, defendant argued the electronic search condition imposed as part of his probation failed under the standards announced in California v. Lent, 15 Cal.3d 481 (1975). The Court of Appeal agreed defendant's electronic search condition should have been stricken, but otherwise affirmed.

California v. Perez

Court: California Courts of Appeal
Docket: E072260(Fourth Appellate District)
Opinion Date: April 20, 2020
Judge: Miller
Areas of Law: Constitutional Law, Criminal Law

In 2009, defendant-appellant Rudy Perez pled guilty to active gang participation under Penal Code section 186.22(a), and unlawful possession of a firearm under section 12025(b)(6). In 2010, defendant pled guilty to residential burglary under section 459, and active gang participation under section 186.22(a). In August of 2018, the State filed a new felony complaint, alleging one of the prior gang participation convictions as a strike prior. In

2018, defendant moved to vacate the two prior gang participation convictions based upon changes in the law that rendered them invalid. The trial court denied defendant's motion. In 2019, defendant asked for reconsideration, which was again denied. Thereafter, defendant filed a timely notice of appeal from the denial of his motion to vacate the convictions. The Court of Appeal found that defendant pled guilty to street terrorism under Penal Code section 186.22(a) in 2009 and 2010, and it was undisputed that while committing these offenses, defendant acted alone. However, subsequent to defendant's guilty pleas, in 2012, the California Supreme Court held that a defendant had to act in concert with a fellow gang member in order to be guilty of street terrorism. At that time, defendant could have filed a state habeas petition requesting relief, but failed to do so. "Defendants can lose remedies that are established by law when they fail to invoke such remedies in time." Section 1473.7 became effective in 2017. In defendant's motion filed in the trial court, defendant failed to state what new evidence was discovered, instead arguing that the trial court was allowed "to vacate a conviction where the defendant is innocent as a matter of law or where vacating the conviction is in the interest of justice, even though the defendant is no longer in custody or otherwise restrained by the conviction." The Court of Appeal concurred with the trial court's reason to deny relief, determining that "while the outcome in this case may be unfortunate for defendant, we are not here to rewrite legislation. The Legislature could amend section 1473.7 to address issues raised in this case. However, under the laws, as written, we must uphold the trial court's order."

In re S.R.

Court: California Courts of Appeal
Docket: B300214(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Bendix
Areas of Law: Criminal Law

Father appealed the juvenile court's dispositional ruling removing daughter from his custody, arguing that his mere possession of child pornography does not demonstrate that he poses a substantial risk of harm to his daughter. The Court of Appeal affirmed the order and held that there is

substantial evidence of risk of great harm to daughter—no matter how low the probability— that father will sexually abuse his daughter if he is provided unfettered access to her.

People v. Bell

Court: California Courts of Appeal
Docket: B288528(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Stratton
Areas of Law: Criminal Law

Defendant was convicted of one count of attempted robbery, one count of second degree murder, and one count of hit and run driving. The jury found not true the allegation that a principal was armed in the commission of the attempted robbery. The trial court found true the allegations that defendant had served four prior prison terms within the meaning of Penal Code section 667.5, subdivision (b). Defendant raised 13 claims of error on appeal. The Court of Appeal held that the section 667.5, subdivision (b) enhancement terms must be stricken and the matter remanded to the trial court for resentencing. The court also held that defendant forfeited some of his substantive claims and other lack merit. Finally, the court held that, if there is instructional error, the errors are harmless under any standard of review. Accordingly, the court affirmed the judgment of conviction.

People v. Drayton

Court: California Courts of Appeal
Docket: H046928(Sixth Appellate District)
Opinion Date: April 17, 2020
Judge: Danner
Areas of Law: Criminal Law

In 1991, the Wards and their teenage daughter awoke and discovered four men, including Drayton, inside their house. Two were armed. One told the daughter he was going to rape her and placed a firearm inside her vagina.

Drayton told the man not to do it. Drayton had a gun and held Mrs. Ward down during the robbery. Two others shot and killed Mr. Ward. Drayton and the others left without seeking help for the Wards. Drayton did not shoot Mr. Ward or threaten to rape the daughter. Drayton surrendered the next day. Drayton's sole prior conviction was a misdemeanor; he had no reported history of violence. Drayton was sentenced to 29 years to life imprisonment. In 2019, Drayton sought resentencing under Penal Code 1170.95, declaring that he "was not a major participant ... or did not act with reckless indifference to human life." Senate Bill 1437, effective January 1, 2019, restricted the circumstances under which a person can be liable for felony murder and enacted Penal Code 1170.95, which allows an individual, previously convicted of felony murder, to petition to have his murder conviction vacated and to be resentenced. The court of appeal directed the trial court to hold a hearing under section 1170.95(d) and to accept the assertions in the petition as true unless facts in the record conclusively refute them as a matter of law. If, accepting the petitioner's assertions as true, he meets section 1170.95(a)'s requirements for relief, the court must issue an order to show cause. In assessing the prima facie showing, the trial court should not weigh evidence or make credibility determinations.

People v. Robinson

Court: California Courts of Appeal
Docket: B293746(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Wiley
Areas of Law: Criminal Law

After defendant penetrated an unconscious woman with his fingers, he challenged evidentiary rulings and requests a presentence conduct credit. The Court of Appeal held that the trial court properly excluded cumulative evidence about past times the woman was intoxicated at the relevant bar, and any error in allowing a drug recognition expert to testify about whether the woman was incapacitated was harmless. However, the court held that the trial court undercalculated defendant's presentence custody credit because he was not convicted of a violent felony under Penal Code section 2933.1, which would otherwise limit those credits. Accordingly, the court

directed the trial court to award defendant 104 days of presentence custody credit and to amend the abstract of judgment, affirming in all other respects.

People v. Torres

Court: California Courts of Appeal
Docket: B292551(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Kenneth R. Yegan
Areas of Law: Criminal Law

Where, as here, the trial court factually finds that a self-represented defendant has engaged in an attempt to intimidate a witness, the constitutional right of self-representation can, in the exercise of the trial court's sound discretion, be revoked. The Court of Appeal affirmed defendant's conviction and sentence for two counts of battery on an ex-girlfriend. In this case, the trial court did not abuse its discretion in revoking defendant's pro se status after he asked his sister to contact the victim and have her say that she was coerced by the police detective to "press charges."

Colorado v. Lujan

Court: Colorado Supreme Court
Citation: 2020 CO 26
Opinion Date: April 20, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law

Abel Lujan was charged with first-degree murder for the death of his girlfriend after she was found beaten and strangled behind a friend's house. At trial, two women testified for the State about Lujan's prior violent behavior towards them. Prior to admitting this evidence, the trial court read a limiting instruction, telling the jury that it could only consider the evidence for the purposes of establishing Lujan's motive, intent, or common plan. A copy of

this instruction was not given to the jury for deliberations; however, the jury did receive an instruction at the close of the evidence explaining that certain evidence could only be considered for the limited purposes for which it was admitted. While deliberating, the jury submitted a question seeking clarification about the limiting instruction. Over defense counsel's objection, the trial court cleared the courtroom of the public and parties, leaving only the judge, bailiff, and court reporter; the judge then brought in the jury and reread the limiting instruction that it had previously read twice in open court. The jury ultimately found Lujan guilty of second-degree murder. Lujan appealed, arguing that the court's actions when rereading the jury instruction constituted a courtroom closure that violated his Sixth Amendment right to a public trial. A division of the court of appeals agreed and reversed Lujan's conviction. The State argued on certiorari review that the Colorado Supreme Court adopt a triviality standard, under which a defendant's constitutional right to a public trial was not violated when the closure at issue was trivial. In so doing, the State argued that the brief courtroom closure here was trivial and therefore did not violate Lujan's public trial right. The Court concurred with the State, adopted the standard and reversed the appellate court's decision.

Archer v. State

Court: Florida Supreme Court
Docket: SC19-841
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's successive motion to vacate his sentence of death under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying the Rule 3.851 motion. Appellant was convicted of first-degree murder, armed robbery, and grand theft. Appellant was sentenced to death for the murder. The Supreme Court affirmed the convictions but reversed Appellant's death sentence and remanded the case for a new penalty phase. After a new penalty phase, Appellant was again sentenced to death. In his successive Rule 3.851 motion, Appellant raised three claims. The circuit court denied

relief. The Supreme Court affirmed, holding that the circuit court (1) properly denied Appellant's claim that his death sentence violated the Sixth and Eighth Amendments in light of Hurst v. Florida, 136 S. Ct. 616 (2016), and Hurst v. State, 202 So. 3d 40 (Fla. 2016); (2) correctly denied Appellant's claim that his sentence violated the Eighth Amendment; and (3) did not err in denying Appellant's claim of newly discovered evidence.

Collins v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0158
Opinion Date: April 20, 2020
Judge: David E. Nahmias
Areas of Law: Constitutional Law, Criminal Law

Appellant Tommy Collins was convicted of felony murder in connection with the stabbing death of 14-year-old Rueben Hand. Friends gathered to watch the Peach Drop on New Year's Eve 2010; a disagreement ensued and Hand was stabbed near the Five Points MARTS station shortly after midnight. Appellant's only argument on appeal was that the trial court plainly erred when it gave the jury the State's requested instruction on "revenge for a prior wrong." Seeing no error, "much less plain error," the Georgia Supreme Court affirmed.

Heyward v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0399
Opinion Date: April 20, 2020
Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Larmell Heyward was convicted by jury of malice murder and possession of a firearm during the commission of a felony in connection with the 2007 shooting death of Ramon Rogers. Heyward argued on appeal of those convictions that the trial court erred in denying his request to charge the jury

on voluntary manslaughter. After review, the Georgia Supreme Court determined the trial court's refusal to give the charge was harmless, since, in the Court's estimation, there was no realistic probability that the jury would have accepted the "slight" evidence of voluntary manslaughter in the light of the strong evidence of malice murder.

Morris v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0176
Opinion Date: April 20, 2020
Judge: Bethel
Areas of Law: Constitutional Law, Criminal Law

Darius Morris was found guilty by jury of malice murder and other offenses in connection with the shooting death of Jameson Bush. Morris appealed, arguing he was denied the right to a timely appeal, that the trial court erred in restricting voir dire as to the religious beliefs and connections of potential jurors, that the trial court erred by giving a confusing jury charge regarding statements of co-conspirators, that the trial court erred by violating his right to a public trial by ordering that the courtroom doors be closed and locked during the court's charge to the jury, and that his trial counsel provided ineffective assistance by not objecting to the closure of the courtroom. Finding no error, the Georgia Supreme Court affirmed.

Read Opinion Are you a lawyer? **Annotate this case**.

Rickman v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0127
Opinion Date: April 20, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Victoria Rickman was convicted by jury of malice murder and a related firearm offense in connection with the shooting death of William Carter, Jr. Rickman and Carter had a tumultuous on-again, off-again relationship with a history of verbal and physical abuse, false accusations of sexual assault, empty threats to obtain temporary protective orders, and numerous calls to 911. In the days leading up to Carter's death, the pair was talking and meeting again despite a recent break-up. On one such 911 call, officers went to Rickman's residence responding to claims shots were fired. Rickman responded holding her small dog, hair wet, and in pajamas. She did not appear to be injured, and nothing in the home looked disturbed or out of place. Rickman told the officers, "he raped me again and I shot him."

Officers found Carter laying face up on the bed naked with multiple gunshot wounds to his body. An autopsy revealed that Carter was shot ten times – four times in the chest, three times in the back, once on the arm, and twice in the head. Rickman's examining physician testified that he found no injuries on Rickman consistent with her description of events, and no signs of trauma to her vaginal cavity. Rickman appealed her convictions, arguing she was denied effective assistance of counsel and that the trial court erred in admitting improper character evidence. Finding no reversible error, the Georgia Supreme Court affirmed.

Robinson v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0265
Opinion Date: April 20, 2020
Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Herbert Robinson appealed his convictions for malice murder, armed robbery, and possession of a firearm during the commission of a felony in connection with the death of Michael Moore. On appeal, he argued the trial court erred by allowing the State to use two firearms for demonstrative purposes during trial, and by allowing body-camera footage to be shown at trial. He also argued his trial counsel was ineffective for failing to object to a letter written by Robinson's cellmate being available to the jury for review during deliberations, and for failing to object to a visual aid used by the State during closing arguments. Because Robinson failed to show ineffective assistance of counsel or reversible error by the trial court, the Georgia Supreme Court affirmed.

Turner v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0247
Opinion Date: April 20, 2020
Judge: Warren

Areas of Law: Constitutional Law, Criminal Law

Appellant Ronald Turner appeals from his conviction for malice murder stemming from the stabbing death of William King. The stabbing took place outside an apartment at which Turner had driven in order to trade food for drugs. Turner testified in his own defense at trial and claimed that King hit him in the head with a beer bottle because Turner owed money to King from a prior drug transaction. Turner testified that he tried to get away from King, but that King chased him down and grabbed his jacket. According to Turner, King was getting ready to hit him again when Turner stabbed King in self-defense. Appealing his ultimate conviction, Turner contended he was denied the effective assistance of counsel in three respects. Seeing no reversible error after a review of the trial court record, the Georgia Supreme Court affirmed Turner's conviction.

Valrie v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0380
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Reuben Valrie was tried by jury and convicted of murder and other crimes in connection with the death of his infant daughter Aliyana. Valrie appealed, claiming that he was denied the effective assistance of counsel. Aliyana died as a result of closed head trauma, with a blunt-force abdominal injury as a secondary cause of death, which investigators determined was consistent with being shaken or dropped. At trial, Valrie presented the testimony of four expert witnesses who testified that Aliyana died of natural causes and that the injuries to her brain and abdomen were caused by events such as post-mortem CPR and the “rough” handling of her body by first responders. The jury rejected this defense and found Valrie guilty of murder and the other charges. Valrie contended that his trial lawyer should have raised a hearsay objection to the admission of recorded statements that his girlfriend (and Aliyana's mother) made to police investigators (as well as the testimony of one of those investigators about some of those

statements). Alternatively, Valrie argued that his lawyer should have sought the redaction of certain portions of the recorded statements that impugned his character. The Georgia Supreme Court concluded Valrie failed to present evidence that his trial counsel was deficient, or that he was prejudiced by any alleged failures. According, the Court affirmed conviction.

Williams v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0241
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Richard Williams, II, was tried by jury and convicted of murder in connection with the strangulation death of Cory Robinson. Williams and Robinson were involved in a sexual relationship and had been living together at an extended-stay hotel. Kelvin Spencer was a close friend of both Williams and Robinson. When Spencer met Williams at the hotel room, Williams looked angry and had scratches on his neck. Spencer saw Robinson lying on the floor in a “praying position.” Spencer did not believe Robinson was dead, and he helped Williams move clothes and other things to a U-Haul truck parked outside, in preparation for a move. Williams did not testify or present any evidence. Based on his lawyer’s opening and closing arguments, the defense theory was that Spencer killed Robinson because he was jealous of Williams’s relationship with Robinson. Williams’s sole claim on appeal was that he was denied the effective assistance of counsel when his trial lawyer failed to present as a defense that Williams accidentally killed Robinson during consensual erotic asphyxiation. He argued that his lawyer's discomfort with the topic of homosexual BDSM activity, and his own problems with the Georgia State Bar, precluded presentation of the "true" version of events, and that Williams acceded to the lawyer's defense strategy only "through ignorance and that he did not know that a defense based on consensual erotic asphyxiation was available." Finding no reversible error, the Georgia Supreme Court affirmed conviction.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 20, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming Defendant's conviction of sexual assault in the first degree on the complaining witness pursuant to Haw. Rev. Stat. 707-730(1)(b), holding that the ICA did not err in affirming the family court. Specifically, the Supreme Court held (1) the jury should have been instructed to determine jurisdictional facts, but the error was harmless beyond a reasonable doubt; and (2) the ICA did not err in finding that there was no rational basis in the record to support providing the jury instruction of the lesser included offense of sexual assault in the third degree.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 22, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming the judgment of the family court convicting Defendant on two counts of sexual assault in the first degree, holding that the ICA did not err in affirming the family court. At issue on appeal was the jurisdiction of the family court to try Defendant and the propriety of instructing the jury on a lesser included offense. The ICA affirmed, concluding that the family court had subject matter jurisdiction pursuant to Haw. Rev. Stat. 571-14(a)(1) and that there was no rational basis to support an instruction of the lesser included offense of sexual assault in the third degree. The Supreme Court affirmed, holding (1) although the jury should have been instructed to determine jurisdictional facts, the error was

harmless; and (2) the family court was not obligated to instruct the jury on the lesser included offense of sexual assault in the third degree.

Idaho v. Burke

Court: Idaho Supreme Court - Criminal
Docket: 46841
Opinion Date: April 22, 2020
Judge: Moeller
Areas of Law: Constitutional Law, Criminal Law

Prior to sentencing, defendant James Burke was committed to the state mental hospital for 56 days to restore him to competency. After being evaluated and deemed competent to proceed to trial, Burke was returned to the county jail and later pleaded guilty pursuant to a plea agreement. At the conclusion of his sentencing hearing, Burke sought credit for the 56 days of time spent in court-ordered commitment. The district court denied the motion, concluding that commitment to a state mental hospital did not fall under the definition of 'incarceration' in Idaho Code section 18-309. After reviewing this issue carefully, the Idaho Supreme Court disagreed with the district court's "thorough and thoughtful analysis," holding that court-ordered commitment to state custody pursuant to Idaho Code sections 18-210 and 18-211 met the functional and legal definition of "incarceration" under Idaho Code section 18-309. "The extent of the liberty interests restricted by Burke's court-ordered commitment to State Hospital North are just too similar to imprisonment to conclude otherwise." Accordingly, the Court reversed the district court's order denying Burke's request for credit for time served and remanded the case for the district court to enter an order crediting him with the fifty-six days he spent committed to State Hospital North while the State restored his competency to face criminal charges.

State v. Gibbs

Court: Iowa Supreme Court
Docket: 18-1298

Opinion Date: April 17, 2020
Judge: Edward M. Mansfield
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of murder in the second degree, holding that Defendant's Fifth Amendment rights were invaded when the trial judge instructed the jury that Defendant was required to notify law enforcement of his use of deadly force, but the error was harmless. During trial, Defendant asserted the defense of justification in his shooting of the victim. At issue on appeal was whether the district court abused its discretion by giving a jury instruction incorporating the terms of Iowa Code 704.2B. The instruction included a statement that a person using deadly force is required to notify law enforcement about his use of deadly force. Defendant argued before the Supreme Court that both section 704.2B and the jury instruction incorporating that section violated his Fifth Amendment rights. The Supreme Court affirmed, holding (1) instructing the jury that a homicide defendant is required to notify a law enforcement agency of his use of deadly force violates the defendant's Fifth Amendment rights; but (2) any error in this case was harmless beyond a reasonable doubt.

State v. Broxton

Court: Kansas Supreme Court
Docket: 114675
Opinion Date: April 17, 2020
Judge: Stegall
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions for second-degree murder, burglary, and theft but reversed Defendant's sentences, holding that any error during the guilt phase was harmless but that the district court erred by scoring Defendant's prior Florida burglary conviction as a person felony instead of a nonperson felony. On appeal, the court of appeals concluded that a trial court may instruct the jury on felony murder even though the State only charged the defendant with premeditated first degree murder. The Supreme Court disagreed, holding (1) the court of appeals erred in concluding that a district court may elect to provide a felony-murder

instruction when that crime was not charged, and the district court properly found that the felony-murder instruction was not legally appropriate in this case; (2) the district court erred by excluding from evidence an exculpatory document from a Florida homicide investigation on the ground it was not relevant, but the error was harmless; and (3) the district court improperly scored Defendant's prior Florida burglary conviction as a person felony.

State v. Corbin

Court: Kansas Supreme Court
Docket: 119665
Opinion Date: April 17, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed the ruling of the district court on remand resentencing Defendant to his original mandatory term of imprisonment after once again finding he was not a person with intellectual disability, holding that the district court did not abuse its discretion when it rejected Defendant's intellectual disability motion and imposed a mandatory term of imprisonment. Defendant pled no contest to first-degree premeditated murder. Before sentencing, Defendant filed a motion pursuant to Kan. Stat. Ann. 21-6622(b) asserting that he was a person with intellectual disability and was thus not subject to a mandatory minimum prison term. The district court denied the motion and sentenced Defendant to a hard twenty-five life sentence. While Defendant's appeal was pending, the Legislature amended Kan. Stat. Ann. 76-12b01(i), which provides new standards for deciding intellectual disability. The Supreme Court reversed and remanded for reconsideration of Defendant's motion using the new criteria. On remand, the district court reaffirmed its earlier ruling and again sentenced Defendant to a hard twenty-five life sentence. The Supreme Court affirmed, holding that the district court's ruling was reasonably based on the law and was supported by substantial competent evidence.

State v. Frazier

Court: Kansas Supreme Court
Docket: 117456
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the district court affirming the judgment of the district court denying Defendant's motion to withdraw plea of no contest to one count of possession of heroin with intent to distribute, holding that the district court's decision in finding no good cause for Defendant to withdraw his plea was based on errors of fact and law, which were grounds for finding abuse of discretion. On appeal, Defendant argued that the district court abused its discretion in denying his motion to withdraw his plea of no contest based on misleading or false statements contained in the plea agreement. The court of appeals affirmed the district court. The Supreme Court reversed, holding (1) there was enough uncertainty in this case to indicate that Defendant's plea agreement was not understandingly made; and (2) therefore, Defendant must be allowed to withdraw his plea.

State v. Harris

Court: Kansas Supreme Court
Docket: 117362
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the judgment of the court of appeals affirming Defendant's conviction of possession fo marijuana, holding that Defendant's waiver of jury trial was legally insufficient. On appeal, Defendant argued that he did not properly waive his right to a jury and asserted three other issues. The Supreme Court reversed the judgment of the court of appeals affirming Defendant's convictions without addressing the three remaining issues, holding that because the district court failed properly to apprise Defendant of his right to a jury trial and failed to ensure that Defendant understood the nature of the right he was giving up, Defendant's constitutional right to a jury trial was violated in this case.

State v. Uk

Court: Kansas Supreme Court
Docket: 119712
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree premeditated murder, holding that the district court did not err in its challenged instructions to the jury. Specifically, the Supreme Court held (1) the district court did not err in refusing to give the jury Defendant's requested instruction on voluntary manslaughter as a lesser included offense of first-degree murder because the instruction was not factually appropriate; and (2) the district court did not commit clear error in issuing an unmodified version of Instruction No. 11, which contained the definition of "premeditation" and mirrored PIK Crim. 4th 54.150(d) because the instruction was legally appropriate.

State v. Catruch

Court: Maine Supreme Judicial Court
Citation: 2020 ME 52
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgments of the trial court terminating Appellant's participation in the Co-Occurring Disorders and Veterans Court (Veterans Court), holding that the court did not err or abuse its discretion in terminating Appellant's participation in the Veterans Court. The Veterans Court is a criminal docket that provides judicial monitoring, specialized treatment, and other services for military veterans who have disorders often attributable to their military service. Appellant was charged

with leaving the scene of an accident and three other offenses. Appellant was admitted to the Veterans Court. Agreeing to sentencing outcomes in a plea agreement and entering into a bail contract, Appellant pleaded guilty to all charges against him. The court later terminated Appellant's participation in the Veterans Court, finding that Appellant had violated the conditions of his bail contract. The Supreme Judicial Court affirmed, holding (1) this matter was properly before the Court; and (2) given Appellant's failure to comply with the requirements for participation in the treatment court and his violations of the agreements, his termination from the Veterans Court was warranted.

State v. Paquin

Court: Maine Supreme Judicial Court
Citation: 2020 ME 53
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Constitutional Law, Criminal Law

In this appeal from Defendant's conviction for eleven counts of gross sexual misconduct, the Supreme Judicial Court vacated the judgment of conviction on one count, vacated the dismissal of other counts and remanded for entry of a judgment of acquittal on those counts, and affirmed in all other respects, holding that Defendant's convictions on both Counts 5 and 30 violated his double jeopardy protections and that the court erred in allowing the State to dismiss Counts 27, 28, and 29 during trial without Defendant's consent. The indictment charged Defendant with fifteen counts (Counts 1-13, 30-31) of gross sexual misconduct against the victim and sixteen counts (Counts 14-29) of gross sexual misconduct against a second alleged victim. During trial, the court granted Defendant's motion for a judgment of acquittal on Counts 10-13, and the State dismissed Counts 27-29. Defendant was found guilty of Counts 1-9 and 30-31 and not guilty on the remaining counts. The court entered judgment in accordance with the verdict. The Supreme Judicial Court held that the trial court erred in failing to rule that the Double Jeopardy Clause barred convictions on both Counts 5 and 30 and allowing the State to dismiss Counts 27, 28, and 29 rather than entering a judgment of acquittal on those counts.

Watson v. State

Court: Maine Supreme Judicial Court
Citation: 2020 ME 51
Opinion Date: April 21, 2020
Judge: Joseph Jabar
Areas of Law: Criminal Law

The Supreme Judicial Court vacated the judgment of the unified criminal docket denying Appellant's petition for post-conviction review, holding that Appellant was deprived of the effective assistance of counsel when his trial attorney played a video of the ten-year-old victim's interview with police and that Appellant was adversely affected. Appellant was convicted of two counts of gross sexual assault, one count of unlawful sexual contact, and one count of visual sexual aggression against a child. The Supreme Court affirmed. Appellant later filed a petition for post-conviction review claiming that his trial attorney's representation was deficient because introducing the videotaped recording of the victim's entire interview with law enforcement was unnecessary to provide evidence supporting the victim's potential motive to fabricate the allegations. The post-conviction court denied denied the petition. The Supreme Court vacated the judgment below, holding that trial counsel's conduct was deficient and that counsel's actions rose to the level of comprising the reliability of Appellant's conviction and undermining confidence in it.

Commonwealth v. Mazza

Court: Massachusetts Supreme Judicial Court
Docket: SJC-11363
Opinion Date: April 21, 2020
Judge: Budd
Areas of Law: Criminal Law

The Supreme Judicial Court reversed the order of the superior court denying Defendant's motion for a new trial and set aside the jury's verdicts

of first degree murder and robbery, holding that a recently discovered witness statement made to the police ago constituted newly discovered evidence that "would probably have been a real factor in the jury's deliberations." At issue was Defendant's sixth motion for a new trial, which was predicated on newly discovered evidence consisting of, among other things, a recently discovered statement made to the police in 1972. The superior court denied the motion. As to the police statement, the judge found that it did not constitute newly discovered evidence because Defendant failed to establish that defense counsel did not have possession of it at the time of trial. The Supreme Judicial Court reversed and remanded the case for a new trial, holding (1) Defendant sustained his burden of establishing that defense counsel did not have the 1972 police statement prior to or at trial, and therefore, the statement constituted newly discovered evidence; and (2) there was a substantial risk that the jury would have reached a different conclusion had the evidence been admitted at trial.

Commonwealth v. McCarthy

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12750
Opinion Date: April 16, 2020
Judge: Gaziano
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed the judgment of the district court denying Defendant's motions to suppress, holding that the limited use of automatic license plate readers (ALPRs) in this case did not implicate constitutional protections against unreasonable searches. While police were investigating Defendant on suspicion of drug distribution they used ALPRs on two bridges to track Defendant's movements. The police accessed historical data via ALPR technology and received real-time alerts, the last of which led to Defendant's arrest. Defendant filed motions to suppress the ALPR data and the fruits of the arrest. The superior court denied the motions. The Supreme Judicial Court affirmed, holding that while the widespread use of ALPRs in the Commonwealth could implicate a defendant's constitutional protected expectation of privacy in the whole of his public movements, that interest was not invaded by the limited extent

and use of the ALPR data in the instant case.

Garden v. Commonwealth

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12821
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of a single justice of the court denying Petitioner's petition for extraordinary relief under Mass. Gen. Laws ch. 211, 3 seeking an order vacating Petitioner's plea to aggravated rape and dismissing the underlying indictment, holding that the single justice did not err or abuse his discretion in denying relief. The issues raised by Petitioner had all been raised and adjudicated through the normal appellate process. Petitioner then filed a motion to withdraw his guilty plea. The motion was denied, and the Appeals Court affirmed. In this petition for extraordinary relief, Petitioner sought an order vacating his plea to aggravated rape and dismissing the underlying indictment. The single justice denied relief. The Supreme Judicial Court affirmed, holding that the superintendence power was not available as an additional layer of appellate review once all other avenues had been exhausted.

In re Mitchell

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12910
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of the county court denying, without a hearing, Petitioner's petition for relief under Mass. Gen. Laws ch. 211, 3, holding that the single justice did not err or abuse his discretion in denying relief. Defendant was convicted of several offenses.

The Appeals Court reversed the convictions and remanded the matter for a new trial. Thereafter, the Commonwealth filed a nolle prosequi as to all the charges. In his Mass. Gen. Laws ch. 211, 3 petition, Defendant alleged that no crime had been committed and that he was wrongfully prosecuted. The single justice denied relief. The Supreme Judicial Court affirmed, holding that Defendant did not demonstrate entitlement to the exercise of this Court's superintendence powers.

State v. Reek

Court: Minnesota Supreme Court
Docket: A19-0153
Opinion Date: April 22, 2020
Judge: G. Barry Anderson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree murder, holding that there was no error in the proceedings below. Specifically, the Supreme Court held (1) Appellant's right to a fair trial before an impartial tribunal was not violated when the district court stated that it might reconsider its prior Spreigl ruling if the defense presented certain witnesses; (2) the jury instructions on accomplice liability were plainly erroneous, but Appellant failed to establish that there was a reasonable likelihood that the error had a significant effect on the verdict; (3) the prosecutor did not commit misconduct in his closing arguments regarding the law of accomplice liability; (4) the district court did not abuse its discretion by granting the State's motion to admit evidence of appellant's past convictions for impeachment purposes, including by allowing the specific convictions to be disclosed to the jury; and (5) Appellant's pro se arguments were without merit.

State v. Woodard

Court: Minnesota Supreme Court
Docket: A18-1886

Opinion Date: April 22, 2020
Judge: Hudson
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the district court convicting Defendant of first-degree murder and sentencing him to life in prison without the possibility of release, holding that the district court did not err in denying Defendant's motion to present an alternative-perpetrator defense. Specifically, the Supreme Court held (1) the district court did not abuse its discretion in holding that Defendant's proffered evidence in support of his motion to present alternative-perpetrator evidence for lack of sufficient foundation; and (2) the district court committed an error that was plain in instructing the jury on the order in which to consider the charges against Defendant, but there was no reasonable likelihood that the instruction affected the jury's verdict and therefore did not affect Defendant's substantial rights.

Huff v. Brown

Court: Nebraska Supreme Court
Citation: 305 Neb. 648
Opinion Date: April 23, 2020
Judge: Lindsey Miller-Lerman
Areas of Law: Communications Law, Criminal Law

The Supreme Court reversed the portion of the district court's order granting in part a writ of mandamus requiring Doug Brown, the sheriff of Furnas County, to provide records to Herchel Huff pursuant to the public records statutes, holding that the district court erred when it determined that Huff had shown that Brown had a clear duty to provide the requested records. Huff, an inmate, sought, among other documents, the criminal history records of jurors who had convicted hims. Furnas County sheriff Kurt Kapperman required a deposit of $750 before fulfilling the request. Huff subsequently filed a petition for writ of mandamus naming Kapperman as the defendant and seeking an order compelling Kapperman to release all requested documents. The court permitted Huff to substitute Brown, the current sheriff, in the caption of the case in place of Kapperman and granted in part mandamus. The Supreme Court reversed in part, holding that the

district court (1) did not err when it substituted Brown's name for Kapperman's; but (2) erred in issuing mandamus because Huff failed to demonstrate a prima facie case that he had been denied a request for public records that the sheriff had a clear duty to provide under Neb. Rev. Stat. 84-712.

State ex rel. Kendrick v. Parker

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1509
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals denying Appellant's request for a writ of prohibition and/or mandamus against Montgomery County Court of Common Pleas Judge E. Gerald Parker Jr., holding that the court of appeals correctly determined that Appellant's claim was barred by res judicata. Appellant sought a petition for writ of prohibition and/or mandamus against Judge Erik Blaine, the successor to the judge who sentenced Appellant, alleging that the sentencing court patently and unambiguously lacked jurisdiction to sentence him. Judge Parker, who had succeeded Judge Blaine, subsequently filed a motion for summary judgment. The court of appeals granted summary judgment for Judge Parker, concluding that Appellant failed to demonstrate that the sentencing court patently and unambiguously lacked jurisdiction or that he lacked an adequate remedy at law and that res judicata barred Appellant's claim. The Supreme Court affirmed, holding that Appellant's claim was barred by res judicata.

State ex rel. Nelson v. Russo

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1541
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus seeking to compel Cuyahoga County Court of Common Pleas Judge Nancy Margaret Russo to vacate the consecutive prison sentences imposed on Appellant in 1987, holding that Appellant had an adequate remedy at law and was barred from asserting additional claims of sentencing error he could have raised in his previous mandamus action. In 1987, Appellant was convicted of four counts of rape and one count of kidnapping. Appellant was sentenced to prison terms of fifteen to twenty-five years for each of the five counts, to be served consecutively. In 2019, Appellant sought a writ of mandamus to compel Judge Russo to vacate his consecutive sentences. The court of appeals dismissed the writ action, concluding that res judicata barred Appellant's claim and that his prior appeals were an adequate remedy at law to address the alleged defect in his consecutive sentences. The Supreme Court affirmed, holding that Appellant was not entitled to a writ of mandamus in this case.

State ex rel. Roberts v. Marsh

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1540
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's original action seeking a writ of procedendo and/or

mandamus to compel Hamilton County Court of Common Pleas Judge Melba Marsh to issue a corrected sentencing entry, holding that the court of appeals correctly dismissed the petition as moot. Appellant was convicted of murder with a repeat-violent-offender specification. Appellant later asked the trial court to correct his sentence, arguing that he had improperly been sentenced to postrelease control. On remand, Judge Marsh vacated the postrelease-control sentence. Appellant appealed that order. The court of appeals noted that the trial court had not set forth all the information required under Crim.R. 32(C) in a single document and dismissed the appeal for lack of a final, appealable order. Appellant then filed this original action seeking to compel Judge Marsh to issue a corrected sentencing entry that constitutes a final, appealable order. Judge Marsh issued a nunc pro tunc sentencing entry that constituted a final, appealable order. The court of appeals then dismissed the petition as moot. The Supreme Court affirmed, holding that because Judge Marsh performed the act Appellant requested, the court of appeals dismissed the petition as moot.

State ex rel. Steiner v. Rinfret

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1510
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus against Holmes County Court of Common Pleas Judge Robert D. Rinfret, holding that the court of appeals correctly determined that Appellant had an adequate remedy in the ordinary course of the law. Appellant, who was serving consecutive prison terms for five convictions, filed a petition for a writ of mandamus arguing that Judge Rinfret improperly sentenced him to a prison term of nine years for his attempted rape conviction instead of the maximum term of eleven years. The court of appeals dismissed the petition, determining that Appellant had failed to file a mandatory affidavit of his prior civil actions and had an adequate remedy in the ordinary course of the law. The Supreme Court affirmed, holding that relief in mandamus was not

available because Petitioner had an adequate remedy in the ordinary course of the law.

State v. Jeffries

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1539
Opinion Date: April 22, 2020
Judge: Donnelly
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals upholding Defendant's convictions of four counts related to two specific instances of sexual abuse of D.S., holding that the trial court and court of appeals correctly applied Ohio's rape-shield law and determined that evidence of D.S.'s prior nonconsensual sexual assault was inadmissible. On appeal, Defendant asserted that the trial court erred in prohibiting him from introducing evidence during trial that D.S. had previously been sexually assaulted by another person, arguing that the rape-shield law applies only to an accuser's prior consensual sexual activity. The lower court held that Ohio's rape-shield law addresses all sexual activity, not only consensual sexual activity. The court of appeals affirmed. The Supreme Court affirmed, holding (1) the plain meaning of the term "sexual activity" as used in the rape-shield law includes both consensual and nonconsensual sexual activity; and (2) therefore, all sexual activity is barred from admission into evidence by the rape-shield, absent certain exceptions listed in the law.

Pennsylvania v. Britton

Court: Supreme Court of Pennsylvania
Docket: 55 MAP 2018
Opinion Date: April 22, 2020
Judge: Max Baer
Areas of Law: Constitutional Law, Criminal Law

California law enforcement officers interviewed Appellant Stacy Britton in

her California residence and, unbeknownst to her, recorded those interviews. Over Appellant's objection, Pennsylvania used those recordings as evidence to help convict Appellant of murder in Pennsylvania. The Pennsylvania Supreme Court granted allowance of appeal to examine whether the California law enforcement officers were acting as agents of the Pennsylvania State Police when they recorded the interviews with Appellant in her California home, and if so, whether Pennsylvania's constitutional and statutory protections were available to Appellant under those circumstances. The Court concluded the California law enforcement officers were not acting as agents of the Pennsylvania State Police when they interviewed Appellant, making analysis of whether any Pennsylvania-specific constitutional or statutory protections unwarranted. Because the Supreme Court concluded the Pennsylvania trial court reached the proper result in this matter, it affirmed that court's judgment.

Pennsylvania v. Copenhaver

Court: Supreme Court of Pennsylvania
Docket: 48 MAP 2019
Opinion Date: April 22, 2020
Judge: Thomas G. Saylor
Areas of Law: Constitutional Law, Criminal Law

In August 2015, a deputy sheriff conducted a vehicle stop of Appellant Victor Copenhaver's pickup truck. Upon approaching the truck, the deputy noticed an odor of alcohol and marijuana emanating from the passenger compartment. After administering field sobriety tests, he arrested Appellant for suspected driving under the influence of alcohol and controlled substances ("DUI"). Appellant was ultimately charged with DUI and other offenses. Appellant challenged the deputy's authority to conduct a traffic stop and sought suppression of all evidence obtained during the encounter. Rather than presenting testimony at a suppression hearing, the parties stipulated that Appellant was driving the vehicle in question and that the deputy had training and qualifications equivalent to that of a police officer. The parties also agreed that the vehicle stop occurred as a result of the deputy observing the tailgate to the pickup truck being in a down position, which caught the deputy's attention. The deputy further observed the

registration on the pickup truck was expired, and additionally, the registration number was identified as belonging to a vehicle other than the one on which it was attached. The issue this case presented for the Pennsylvania Supreme Court's review was whether the deputy could lawfully conduct the traffic stop based on the expired registration sticker, on a theory that such a violation amounts to a breach of the peace. The Supreme Court concluded driving a vehicle with an expired registration did not entail a breach of the peace. It vacated the superior court's order insofar as it held that the expired registration was a breach of the peace, thus alone authorizing the deputy to stop Appellant's vehicle. Notably, in light of its holding, the Supreme Court found the superior court did not proceed to consider other relevant questions, such as whether the parties' factual stipulation should have been read as indicating that the officer's understanding that the registration sticker was associated with a different vehicle arose in the pre-stop timeframe – consistent with the Commonwealth's position throughout this litigation. "These issues should be resolved in the first instance by the intermediate court on remand."

Pennsylvania v. Tedford

Court: Supreme Court of Pennsylvania
Docket: 773 CAP
Opinion Date: April 22, 2020
Judge: Donohue
Areas of Law: Constitutional Law, Criminal Law

Appellant Donald Tedford was convicted of first-degree murder and rape on February 6, 1987. He appealed the dismissal of his second petition for relief filed pursuant to the Post Conviction Relief Act ("PCRA"), on December 2, 2014, as amended by a counseled petition on May 5, 2015, and a supplemental petition filed on June 9, 2015. In connection with his initial filings, Tedford sought wholesale discovery of the prosecution's entire file, but the PCRA court concluded that the petition (as amended) was not timely filed. Tedford also appealed the PCRA court's order denying his supplemental PCRA petition, in which he requested discovery, an evidentiary hearing, and/or a new trial based upon the admission of expert testimony presented at trial related to microscopic hair analysis. The PCRA

court concluded that pursuant to PCRA Section 9545(b)(1)(ii), it had jurisdiction to consider the merits of Tedford's newly-discovered-facts claims, but ultimately it concluded Tedford had not asserted a meritorious claim in accordance with Section 9543(a)(2)(vi). Finding no reversible error in that analysis, the Pennsylvania Supreme Court affirmed dismissal of the petition for relief.

Pennsylvania v. Trahey

Court: Supreme Court of Pennsylvania
Docket: 38 EAP 2018
Opinion Date: April 22, 2020
Judge: Wecht
Areas of Law: Constitutional Law, Criminal Law

The trial court granted Timothy Trahey's motion to suppress the results of a blood test that revealed his blood alcohol concentration ("BAC"), finding no justification for the investigating officers' failure to obtain a search warrant before conducting the test. On the Commonwealth's appeal, the Superior Court reversed, opining that the Commonwealth's evidence sufficiently established the existence of exigent circumstances, thus excusing the absence of a warrant. The Pennsylvania Supreme Court reversed, finding that while the exigency analysis is an objective one, "even disregarding the officers' subjective motivations, or their candid acknowledgment that they would have obtained a search warrant if they thought it necessary, there was no time-sensitive need to conduct a warrantless blood test under the circumstances of this case. Accordingly, the Superior Court's conclusion that the test was justified by exigent circumstances was drawn in error."

In re Greg Abbott

Court: Supreme Court of Texas
Docket: 20-0291
Opinion Date: April 23, 2020
Judge: Per Curiam

Areas of Law: Constitutional Law, Criminal Law

The Supreme Court conditionally granted mandamus relief to the State seeking review of a temporary restraining order (TRO) blocking enforcement of Executive Order GA-13, which changes the rules applicable to judges' decisions regarding pre-trial bail, against judges, holding that the trial court lacked jurisdiction to order the judges' requested relief, even temporarily. GA-13 suspends certain statutes authorizing trial judges to release jail inmates with violent histories during the state of disaster due to the threat of the novel coronavirus. Plaintiffs alleged that GA-13 is unconstitutional and exceeds the governor's statutory emergency powers. Sixteen of the plaintiffs were Texas trial judges alleging that GA-13 improperly interferes with their judicial authority to make individualized bail decisions, and the other plaintiffs were public interest organizations and lawyer associations. The trial court issued a TRO blocking enforcement of GA-13 against judges. The Supreme Court conditionally granted mandamus relief, holding that the alleged threat of a criminal prosecution in this case did not give the judges standing to seek the invalidation of GA-13, and therefore, the trial court lacked jurisdiction to order their requested relief.

Stahmann v. Texas

Court: Texas Court of Criminal Appeals
Docket: PD-0556-18
Opinion Date: April 22, 2020
Judge: Barbara Hervey
Areas of Law: Constitutional Law, Criminal Law

Appellant Karl Stahmann was involved in an automobile accident, after which he threw a bottle of promethazine, a controlled substance, over a nearby wire fence before law enforcement arrived. The bottle landed two to three feet past the fence in plain view. He was convicted of third-degree felony tampering with physical evidence and was sentenced to 10 years' confinement and fined $5,000. The judge suspended his sentence and placed him on community supervision for 10 years. Stahmann appealed, arguing in part that the evidence was insufficient to prove that he destroyed, altered, or concealed the prescription bottle. The court of appeals agreed

that the evidence was insufficient, but instead of rendering an acquittal, it reformed the judgment to show that Stahmann was convicted of the lesser-included offense of attempted tampering with physical evidence, a state-jail felony. After review of the evidence presented at trial, the Texas Court of Criminal Appeals concluded the evidence was indeed insufficient to prove that Appellant altered the prescription pill bottle when he threw it over the fence because the mere act of throwing the bottle did not change the bottle itself. "While a rational jury could have reasonably inferred that Stahmann intended to conceal the pill bottle when he threw it over the wire fence, the evidence shows that he failed to conceal it as he intended because the bottle landed short of the bush in plain view on top of some grass." The Court affirmed the trial court's judgment.

Blanke v. Board of Pardons & Parole

Court: Utah Supreme Court
Citation: 2020 UT 16
Opinion Date: April 16, 2020
Judge: Himonas
Areas of Law: Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the district court's denial of Appellant's petition for extraordinary relief, holding that, under the circumstances, the Utah Board of Pardons and Parole need not afford Appellant the due process protections explained in Neese v. Utah Board of Pardons and Parole, 416 P.3d 663 (2017), before it could determine that Appellant was a sex offender and condition his parole on sex offender treatment. Appellant was serving a prison sentence for his convictions of attempted child kidnapping and kidnapping. Because he was convicted of attempted child kidnapping Appellant was considered a sex offender under the sex offender registration statute. Further, Appellant admitted in his presentence report that he had sexual intercourse with a fifteen-year-old. Appellant filed a petition for extraordinary relief alleging that the Parole Board had violated his due process rights by conditioning his parole on completion of sex offender treatment even though he had not committed a sex offense. Summary judgment was granted for the Parole Board. The Supreme Court affirmed, holding that the Parole Board owed

Appellant no additional process before it considered unconnected sex offenses in its decision to require Appellant to undergo sex offender treatment.

Washington v. Escalante

Court: Washington Supreme Court
Docket: 97268-1
Opinion Date: April 23, 2020
Judge: Steven González
Areas of Law: Constitutional Law, Criminal Law

Alejandro Escalante was detained for hours in a secured area at a border crossing and, the State conceded, interrogated by federal agents without Miranda warnings. Statements he made during that interrogation were used by the State to convict him of drug possession. While a traveler briefly detained and questioned at the border was typically not "in custody" for Miranda purposes, "the government's power to detain and question people at the border without implicating Miranda has limits." Here, the Washington Supreme Court determined those limits were reached. "This border detention created the type of inherently coercive environment that demands Miranda warnings to ensure an individual's choice to speak is the product of free will." The Supreme Court held that Escalante was in custody when he was interrogated and reversed.

Washington v. Haggard

Court: Washington Supreme Court
Docket: 97375-0
Opinion Date: April 23, 2020
Judge: Barbara Madsen
Areas of Law: Constitutional Law, Criminal Law

A class C felony "washes out" and is omitted from a defendant's offender score as long as he or she is not convicted of any crime within five years of the last date of release from confinement. David Haggard was convicted of

a misdemeanor offense within this five-year period, which was dismissed pursuant to RCW 3.66.067. When Haggard later pleaded guilty to burglary and arson, the trial court included prior class C felonies in his criminal history, finding that the dismissed misdemeanor conviction interrupted the washout period for those offenses. Haggard contended on appeal this was error. The Washington Supreme Court determined that because a dismissed conviction constituted a “conviction” under the Sentencing Reform Act of 1981 (SRA), and misdemeanor dismissal and vacation were distinct processes, so Haggard's offender score was properly calculated.

State v. Taylor

Court: Supreme Court of Appeals of West Virginia
Docket: 18-0502
Opinion Date: April 21, 2020
Judge: Walker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court giving Petitioner credit for twelve days of time served toward the sentence he received for his felony conviction although Petitioner spent additional time in confinement for other charges that were dismissed in the universal plea agreement, holding that to grant Petitioner additional credit for time served would do little more than reward Petitioner for habitual criminal behavior. Petitioner was charged with several crimes and agreed to resolve the pending charges against him in a universal plea agreement. Under the terms of the agreement, Petitioner agreed to plea guilty to the charge of felony carrying a concealed firearm by a prohibited person. In exchange, the State agreed to drop the remaining charges. After he was sentenced, Petitioner argued that, in addition to the twelve days of credit for time served he was granted, he was constitutionally entitled to credit for time served while he was incarcerated for charges that were resolved in the universal plea agreement. The Supreme Court affirmed, holding that Petitioner's circumstances implicated neither double jeopardy nor equal protection of the law such that additional credit for time served was constitutionally mandated.

State v. Harrison

Court: Wisconsin Supreme Court
Dockets: 2017AP002441-CR, 2017AP002440-CR
Opinion Date: April 17, 2020
Judge: Patience D. Roggensack
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the decision of the court of appeals reversing an order of the circuit court that granted sentence credit to Defendant, holding that the court of appeals correctly found that Defendant was not entitled to sentence credit but erred by advancing the commencement of Defendant's terms of extended supervision for Defendant's 2007 and 2008 cases. Specifically, the Court held (1) Defendant was not entitled to sentence credit under Wis. Stat. 973.155(1)(a) because the days he spent in custody for which he sought sentence credit were not in connection with the courses of conduct for which those sentences were imposed; and (2) the court of appeals erred by advancing the commencement of Defendant's terms of extended supervision for his 2007 and 2008 cases to the date they would have begun but for Defendant's confinement for unrelated convictions that were later set aside, holding that whether to employ advancement is a public policy decision best left to the legislature.

Rethinking Retroactivity in Light of the Supreme Court's Jury Unanimity Requirement

MICHAEL C. DORF

verdict post

In light of the U.S. Supreme Court's decision Monday in *Ramos v. Louisiana*, in which it held that the federal Constitution forbids states from convicting defendants except by a unanimous jury, Cornell law professor Michael C. Dorf discusses the Court's jurisprudence on retroactivity. Dorf highlights some costs and benefits of retroactivity and argues that the Court's refusal to issue advisory opinions limits its ability to resolve retroactivity questions in a way that responds to all the relevant considerations.

Criminal Law Opinions

Ramos v. Louisiana

Court: US Supreme Court
Docket: 18-5924
Opinion Date: April 20, 2020
Judge: Neil M. Gorsuch
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 48 states and in federal court, a single juror's vote to acquit is enough to prevent a conviction; Louisiana and Oregon punish people based on 10-to-2 verdicts. Ramos was convicted in a Louisiana court by a 10-to-2 jury verdict and was sentenced to life without parole. The Supreme Court reversed. The Sixth Amendment right to a jury trial, as incorporated against the states by the Fourteenth Amendment, requires a unanimous verdict to convict a defendant of a serious offense. Juror unanimity is a vital common law right. The Court rejected an "invitation" to "perform a cost-benefit analysis on the historic features of common law jury trials and to conclude that unanimity does not make the cut." In overturning its 1972 "Apodaca" decision, the Court stated that the reasoning, in that case, was "gravely mistaken" and "sits uneasily with 120 years of preceding case law." The fact that Louisiana and Oregon may need to retry defendants convicted of felonies by non-unanimous verdicts whose cases are still pending on direct appeal "will surely impose a cost, but new rules of criminal procedure usually do."

United States v. Diaz-Rivera

Court: US Court of Appeals for the First Circuit
Docket: 18-1461
Opinion Date: April 20, 2020
Judge: Torruella
Areas of Law: Criminal Law

The First Circuit affirmed Defendant's upwardly variant sentence for one count of possession with intent to distribute cocaine and one count of using a firearm during and in relation to a drug-trafficking crime, holding that the sentence was neither procedurally nor substantively unreasonable. Pursuant to a plea agreement, Defendant pled guilty to drug-related crimes. After a sentencing hearing, the district court sentenced Defendant to an upwardly variant sentence of 180 months of imprisonment, thus declining to

impose the government's requested sentence. On appeal, Defendant challenged both the procedural and substantive reasonableness of his sentence. The First Circuit affirmed, holding that the 180-month sentence was neither procedurally nor substantively unreasonable.

United States v. Cotto

Court: US Court of Appeals for the Second Circuit
Docket: 18-2970
Opinion Date: April 20, 2020
Judge: Leval
Areas of Law: Criminal Law

A conviction for retaliating against a witness in violation of 18 U.S.C. 1513 does not require that the Government prove that defendant had knowledge of the federal nature of the proceeding. The Second Circuit rejected defendant's arguments to the contrary and affirmed his conviction for retaliating against a witness. The court remanded for revision of the provision of the sentence relating to the substance abuse treatment condition of supervised release; instructed the district court to consider on remand whether the court's forthcoming order in United States v. Traficante, No. 18-1962 (2d Cir., submitted Oct. 25, 2019) requires modification of the risk notification provision of supervised release; and granted the parties leave to reinstate this appeal to permit review of the district court's decision on remand as to the risk notification provision.

United States v. Rosa

Court: US Court of Appeals for the Second Circuit
Docket: 17-2004
Opinion Date: April 17, 2020
Judge: Nardini
Areas of Law: Criminal Law

Where a district court offers no explanation for its sentence, and where neither the adopted presentence report nor the statement of reasons

adequately demonstrates the court's reasoning, the court has committed plain error in violation of 18 U.S.C. 3553(c). The Second Circuit vacated defendant's sentence for conspiracy to commit wire fraud and aggravated identity theft. The court held that the district court failed to state its reasons for sentencing defendant as required under section 3553(c); the error is clear or obvious; and the error affected defendant's substantial rights. Accordingly, the court remanded for resentencing.

Fogle v. Sokol

Court: US Court of Appeals for the Third Circuit
Docket: 19-1066
Opinion Date: April 21, 2020
Judge: Matey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 1976, the body of 15-year-old “Kathy” was found near her Indiana County, Pennsylvania home. Kathy’s death involved a brutal assault, rape, and a gunshot to the head. Kathy's sisters, ages nine and 12, stated that she had gotten into a car with a man with blue eyes, black hair that came below his ears and curled at the ends, sideburns, heavy eyebrows, and a heavy mustache. Fogle had “straight reddish-blonde hair that dropped down his back and a matching, full beard that reached his waist.” After three years, Fogle became a suspect because a psychiatric patient described seeing Kathy get in a car with Fogle and his brother. The story was largely inconsistent with statements by Kathy’s sisters. Jailhouse informants were recruited and counseled by law enforcement with promises of leniency. The prosecutors “either knew about, encouraged, or permitted” this strategy. A jury found Fogle guilty of second-degree murder. In 2015, Fogle obtained DNA evidence excluding both himself and his brother as the source of semen collected from Kathy. His conviction was vacated. The Commonwealth declined to pursue new charges, describing the case as lacking “prosecutorial merit.” Fogle, having spent three decades in prison, sued the prosecutors and Indiana County under 42 U.S.C. 1983. The Third Circuit affirmed the denial of their motions to dismiss based on absolute immunity. Only truly prosecutorial functions, not investigative conduct, justify complete protection from suit. Fogle’s complaint alleges actions that fall

outside the narrow doctrine of absolute immunity.

James v. New Jersey State Police

Court: US Court of Appeals for the Third Circuit
Docket: 18-1432
Opinion Date: April 21, 2020
Judge: Porter
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Stephens called 911 and reported that Gibbons hit her and had a gun in his truck. The police responded. Stephens obtained a temporary restraining order, prohibiting Gibbons from possessing firearms and from returning to Stephens's house. The next day, Gibbons went to Stephens's house. Stephens was talking on the phone; the friend called the police. Gibbons left Stephens's house. Trooper Conza arrived. Stephens stated that Gibbons had waved a gun throughout their argument. Conza told Stephens to go to the police barracks and reported over the radio that Gibbons had brandished a firearm. Conza, with Troopers Bartelt and Korejko, visited the nearby home of Gibbons's mother, James. James stated that she did not know where Gibbons was and that he might be off his schizophrenia medication. While driving to the barracks, Stephens saw Gibbons walking alongside the road and called 911. The Troopers responded. Bartelt parked his car and, exiting, observed that Gibbons was pointing a gun at his own head. Bartelt drew his weapon, stood behind his car door, and twice told Gibbons to drop his weapon. Gibbons did not comply. Bartelt shot Gibbons twice within seconds of stopping his car. Gibbons died that night. In James' suit under 42 U.S.C. 1983, the Third Circuit held that Bartelt is entitled to qualified immunity because he did not violate Gibbons's clearly established rights. Bartelt's pre-standoff knowledge of Gibbons differs from that of officers involved in cited cases. Bartelt could reasonably conclude that Gibbons posed a threat to others.

Bazemore v. Best Buy

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-2196
Opinion Date: April 21, 2020
Judge: Quattlebaum
Areas of Law: Criminal Law

Plaintiff filed suit against her employer, Best Buy, claiming that she was harassed because of her race and gender and subjected to a hostile work environment in violation of Title VII of the Civil Rights Act of 1964. Plaintiff's complaint stemmed from an incident where a coworker made a racist and sexually charged joke to a small group of coworkers that included plaintiff. The Fourth Circuit affirmed the district court's motion to dismiss and held that, in the case of allegedly harassing comments by a co-worker, an employee must allege plausible facts that the employer knew, or should have known, about the harassment and failed to take action reasonably calculated to stop it. Because plaintiff failed to do this, the court affirmed the district court's judgment. In this case, the coworker's conduct was not imputable to Best Buy where Best Buy took steps that were not only reasonably calculated to end such behavior, but that it did in fact end it.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Akande

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-6833
Opinion Date: April 20, 2020
Judge: Diana Jane Gribbon Motz
Areas of Law: Criminal Law

After defendant moved under 28 U.S.C. 2255 to vacate his conviction based on the ineffective assistance of counsel, the district court denied the motion. The Fourth Circuit granted a certificate of appealability and reversed the district court's judgment. The court held that, given counsel's specific misadvice regarding defendant's rights to preserve his appellate rights, on which defendant understandably relied, the district court's general admonishments did not amount to the careful explanation that addresses the particular issue necessary to cure the error. In this case, the plea colloquy did not correct counsel's erroneous advice and the error prejudiced defendant. Accordingly, the court remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Chambers

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-7104
Opinion Date: April 23, 2020
Judge: Floyd
Areas of Law: Criminal Law

After defendant was erroneously sentenced as a career offender, he moved to reduce his sentence to time served under the First Step Act. The district court denied defendant's motion to reduce his custodial sentence, though it granted the motion as to his supervised release term. The Fourth Circuit held that the First Step Act does not constrain courts from recognizing Guidelines errors. The court explained that First Step Act motions fall under 18 U.S.C. 3582(c)(1)(B), a distinct exception to finality, and that section 404(b) of the First Step Act expressly allows a court to impose a reduced sentence in order to give retroactive effect to sections 2 and 3 of the Fair Sentencing Act. Furthermore, 18 U.S.C. 3553(a) sentencing factors apply in the section 404(b) resentencing context, and the resentencing court has discretion within the section 404(b) framework to vary from the Guidelines and, in doing so, to consider movants' post-sentencing conduct. In this case, the district court seemingly believed that it could not vary from the Guidelines range to reflect post-sentencing information. Therefore, the court vacated the district court's sentencing order. Finally, the court held that any Guidelines error deemed retroactive, such as the error in this case, must be corrected in a First Step Act resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Ferebee

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4266
Opinion Date: April 22, 2020
Judge: Traxler
Areas of Law: Criminal Law

The Fourth Circuit affirmed the denial of defendant's motion to suppress evidence recovered from a backpack, and the district court's conclusion that defendant abandoned the backpack and any legitimate expectation of privacy in its contents. The court rejected defendant's claim that the collective-knowledge doctrine has any bearing on the propriety of the district court's conclusion that defendant abandoned the backpack. The court also held that the district court is not precluded from finding abandonment in cases where the defendant, as here, has physical possession of the property he has disavowed. In this case, the record supported the district court's conclusion that defendant clearly and unequivocally disavowed ownership of the backpack. Even if the district court erred by finding that defendant abandoned the backpack, reversal would not be required because the search of the backpack was a proper search incident to arrest for which no warrant was required under the facts of this case.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Nance

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4585
Opinion Date: April 21, 2020
Judge: Pamela Harris
Areas of Law: Criminal Law

The Fourth Circuit affirmed defendant's above-Guidelines sentence imposed after he pleaded guilty to two federal drug- and firearm-related offenses. The court held that defendant's sentence was not procedurally unreasonable where the district court took into account defendant's extensive criminal history; his pattern of reoffending upon release; his disciplinary infractions in custody and inability to comply with the terms of his release; and the fact that the offenses of conviction occurred over the course of days, in which he was arrested once, released, and then arrested again just days later. The court also held that defendant's sentence was substantively reasonable where the district court conducted a thorough, individualized assessment of defendant and his offense conduct in light of the 18 U.S.C. 3553(a) factors, and did not abuse its discretion in formulating the sentence.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Johnson

Court: US Court of Appeals for the Fifth Circuit
Docket: 17-60852
Opinion Date: April 21, 2020
Judge: Priscilla R. Owen
Areas of Law: Criminal Law

The Fifth Circuit vacated defendant's sentence imposed after he pleaded guilty to violating 18 U.S.C. 922(g) and 924(e) by knowingly possessing a firearm after he had been convicted of a misdemeanor crime of domestic violence. The court held that the district court committing plain error by violating Federal Rule of Criminal Procedure 32 when it relied on factual allegations in the confidential sentencing recommendation that were not in the presentence report and that were not disclosed by defendant. The court explained that the use of undisclosed facts to justify an above-guidelines sentence seriously affects the fairness, integrity, and public reputation of judicial proceedings. Therefore, the court remanded for resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. McGinnis

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-10197
Opinion Date: April 21, 2020
Judge: Stuart Kyle Duncan
Areas of Law: Criminal Law

18 U.S.C. 922(g)(8), which prohibits individuals subject to certain domestic violence protective orders from possessing firearms or ammunition for any purpose, is facially constitutional under the Fifth Circuit's two-step NRA framework. Even assuming arguendo that the conduct at issue -- the keeping and possessing of firearms by individuals subject to domestic protective orders -- falls within the Second Amendment right, defendant's facial challenge fails. The court applied intermediate scrutiny and held that section 922(g)(8) is reasonably adapted to the government interest of

reducing domestic gun abuse. The court also held that if the commonly understood definitions of terms in the protective order include acts involving "physical force," the protective order is sufficient to support a conviction under section 922(g)(8)(C)(ii). In this case, the jury plausibly found that the order satisfied the statute and the court declined to reverse defendant's conviction on this basis. However, the court remanded for the limited purpose of conforming defendant's written judgment to the district court's oral pronouncement.

Valentine v. Collier

Court: US Court of Appeals for the Fifth Circuit
Docket: 20-20207
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law, Government & Administrative Law, Health Law

Plaintiffs filed suit alleging that TDCJ's adoption and implementation of measures guided by changing CDC recommendations in regards to the COVID-19 pandemic do not go far enough. Plaintiffs filed a class action alleging violations of the Eighth Amendment's prohibition against cruel and unusual punishment, and the Americans with Disabilities Act, seeking a preliminary injunction. The Fifth Circuit granted TDCJ's motion to stay the district court's preliminary injunction, which regulates the cleaning intervals for common areas, the types of bleach-based disinfectants the prison must use, the alcohol content of hand sanitizer that inmates must receive, mask requirements for inmates, and inmates' access to tissues (amongst many other things). The court held that TDCJ is likely to prevail on the merits of its appeal because: (1) after accounting for the protective measures TDCJ has taken, plaintiffs have not shown a "substantial risk of serious harm" that amounts to "cruel and unusual punishment"; and (2) the district court committed legal error in its application of Farmer v. Brennan, by treating inadequate measures as dispositive of defendants' mental state. In this case, even assuming that there is a substantial risk of serious harm, plaintiffs lack evidence of defendants' subjective deliberate indifference to that harm. The court also held that TDCJ has shown that it will be

irreparably injured absent a stay, and that the balance of the harms and the public interest favor a stay. Finally, the court held that plaintiffs have not exhausted their administrative remedies as required in the Prison Litigation Reform Act (PLRA), and the district court's injunction goes well beyond the limits of what the PLRA would allow even if plaintiffs had properly exhausted their claims.

United States v. Dowl

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-2469
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

Dowl pleaded guilty to presenting false tax returns, 18 U.S.C. 286. He received a sentence of 30 months of imprisonment plus 24 months of supervised release. On supervised release, Dowl was charged with four new state crimes; failing to inform his probation officer that he had police contact; communicating with his co-defendant despite instructions to the contrary; failing to make payments on his restitution, fine, or special assessment; and failing to get a job. At a hearing, the court reviewed the evidence and allowed Dowl to tell his side of the story. The court deferred judgment on three of the four new state criminal law violations and dismissed the fourth and found Dowl gainfully employed. Dowl had failed to notify his probation officer about police contact, impermissibly communicated with his co-defendant, and did not pay his fines. After considering the 18 U.S.C. 3553(a) sentencing factors, the court returned Dowl to prison for 11 months, giving Dowl and his attorney the opportunity to raise any objections. Dowl had none. The Sixth Circuit affirmed, rejecting Dowl’s argument that the court committed reversible error by not directly addressing him to solicit an allocution. The court employed the “plain error” standard because Dowl did not raise any objection during his revocation hearing.

United States v. Fowler

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-3071, 19-3070
Opinion Date: April 21, 2020
Judge: Donald
Areas of Law: Criminal Law

In 2018, Fowler pled guilty to possession of child pornography and violations of the conditions of his supervised release from a previous conviction for the same. In addition to possessing child pornography, Fowler had failed drug testing, had threatened his parole officer, and had tried to harass his girlfriend to recant her testimony. The district court ordered Fowler to pay a $5,000 special assessment for possession of child pornography under the Justice for Victims of Trafficking Act, 18 U.S.C. 3014. The court also varied upward and sentenced Fowler to the maximum statutory penalty for violating the conditions of his supervised release, imposing a 120-month sentence for possessing child pornography and a consecutive 36-month sentence for violating the terms of his supervised release. The Sixth Circuit vacated as to the assessment and remanded for a determination of indigency. The district court committed plain error by failing to address Fowler's ability to pay; the parties did not contemplate the $5,000 special assessment as a part of the waiver provision in the plea agreement. The court affirmed the sentence. The district court did not consider an impermissible factor (whether Fowler had actually touched a child) and Fowler had no other challenge to the reasonableness of his sentence,

United States v. Sumlin

Court: US Court of Appeals for the Sixth Circuit
Docket: 18-3819
Opinion Date: April 21, 2020
Judge: Bush
Areas of Law: Criminal Law

Sumlin was convicted of the distribution of drugs that caused the 2015 death of Carrie Dobbins, 21 U.S.C. 841(a)(1) and (b)(1)(C), which carries enhanced penalty provisions. The Sixth Circuit affirmed his convictions and

his sentence to life in prison. The district court properly denied Sumlin's suppression motion, given that the affidavit established a sufficient nexus between his drug trafficking activity and residence that was searched. The court properly admitted testimony by the victim's sister, Kelly, who was Sumlin's former girlfriend and had purchased drugs from him. Kelly's testimony about Sumlin's drug-trafficking and that Sumlin was with Carrie on the day of her overdose was intrinsic proof that was relevant for providing background information and contextualizing the government's case against Sumlin. Sufficient evidence supported the jury's verdict that Sumlin distributed the drugs that caused Carrie's death.

United States v. Vance

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5160
Opinion Date: April 17, 2020
Judge: Bush
Areas of Law: Criminal Law, White Collar Crime

The Spriggs' bank account was established to receive social security checks. The Spriggs' great-grandson, Vance, filled out an application in Mr. Spriggs's name for a debit card to draw on the checking account. Mr. Spriggs had never used a debit card. The Spriggses did not authorize Vance to do so. Bank cameras photographed Vance using the card to withdraw cash. Vance also used the card for personal expenses. At another bank, Vance used Mr. Spriggs's social security number to establish an account and obtain a $15,000 cash advance. Vance made other, unsuccessful loan applications. Upon being notified by the banks about suspicious activities involving his identity, Mr. Spriggs filed a police report. The police arrested Vance. While searching Vance's car, the police located a large stash of personal and financial documents belonging to the Spriggses, including bank statements, tax return forms, property-tax bills, and a car title. The Sixth Circuit affirmed Vance's convictions for access-device fraud, 18 U.S.C. 1029(a)(5), and two counts of aggravated identity theft, 18 U.S.C. 1028A(a)(1), and his 65-month sentence. The court rejected arguments that the district court failed to make adequate findings of fact after the bench trial, improperly denied a motion for judgment of acquittal,

and failed to correctly calculate the loss amount connected to Vance's charges under Sentencing Guidelines 2B1.1.

Winburn v. Nagy

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-2399, 19-2398
Opinion Date: April 23, 2020
Judge: Jeffrey S. Sutton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Winburn represented himself at his trial for armed robbery, home invasion, and conspiracy. Based on Winburn's disruptive behavior, the judge removed him from the courtroom and revoked Winburn's permission to represent himself, then granted a competency evaluation and a mistrial. While Winburn awaited his second trial, the judge permitted Winburn's stand-by attorney to withdraw because Winburn had sued her and enjoined Winburn from filing complaints or grievances against his new attorney, except to discharge her. Although represented by a new attorney, Winburn moved pro se to dismiss his charges on double jeopardy grounds. The trial judge denied the motion because Winburn's attorney had not filed it. Winburn filed a habeas petition under 28 U.S.C. 2241 challenging his retrial and another section 2241 petition challenging the injunction. The district judges denied both and declined to issue certificates of appealability. Winburn filed a notice of appeal for one petition and sought a certificate of appealability for the other. The Sixth Circuit held that state pretrial detainees proceeding under section 2241 may not appeal without certificates of appealability and granted Winburn a certificate on the injunction claim. A reasonable jurist could conclude that the unusual order was constitutionally infirm. The court denied relief with respect to double jeopardy. Winburn failed to exhaust his state-court remedies by a motion to dismiss.

Lund v. City of Rockford

Court: US Court of Appeals for the Seventh Circuit

Docket: 19-1945
Opinion Date: April 20, 2020
Judge: ROVNER
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Lund, a reporter for the Rockford Scanner, heard, by police scanner, of multiple traffic stops in Midtown. He did not have a driver's license, so he rode a motorized bicycle to Midtown to take photographs. He suspected a prostitution sting operation. An officer noticed Lund and radioed the team. Officers Welsh and Campbell knew of Lund's previous anti-police speech. They directed Lund to "move on." Lund asked if he was breaking any laws. Campbell informed him that he was not, but that his continued presence would constitute obstruction of a police detail and result in arrest. Lund started his bicycle and called out, loudly, "goodbye officers." Concerned that Lund might post pictures on social media while the sting operation was ongoing and create a danger for unarmed undercover officers, the officers followed Lund and arrested him for driving the wrong way on a one-way street, operating a vehicle without insurance, obstructing a police officer, felony aggravated driving on a revoked license, and operating a motor vehicle without a valid drivers' license. News stories listed Lund's name as an arrestee in the prostitution sting. The charges against Lund were dismissed. Lund sued the officers and the city under 42 U.S.C. 1983. The Seventh Circuit affirmed summary judgment for the defendants on First Amendment retaliation and malicious prosecution under Illinois law, citing the Supreme Court's intervening "Nieves" (2019) holding, that, in most cases, probable cause to arrest defeats a claim of retaliatory arrest. There was probable cause to arrest Lund.

United States v. Perez

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3156
Opinion Date: April 23, 2020
Judge: KANNE
Areas of Law: Criminal Law

Beloit officers facilitated a recorded controlled buy of heroin from Perez, a suspected high-level drug dealer. Perez sold 98 grams of heroin to an

informant. Based on that transaction alone, Perez pled guilty to distributing heroin. At Perez's sentencing hearing, the judge expressed concern that the guidelines range of 33–41 months' imprisonment did not reflect the full scope of his drug trafficking. The PSR described conduct that suggested that Perez was responsible for distributing large quantities of heroin, methamphetamine, and cocaine. The judge continued the hearing, directing the government to file a memorandum, detailing which offense conduct it could support by a preponderance of the evidence. When the hearing reconvened, the government presented witness testimony that elaborated on conduct described in the PSR, including drug ledgers, Perez's post-arrest conversation with his girlfriend, large sums of cash, a money counter, cell phones, and Perez's passport. The judge calculated a higher guidelines range and imposed a 121-month sentence. The Seventh Circuit affirmed, rejecting an argument that the sentencing judge should have recused himself. Perez has not demonstrated that a reasonable observer would have questioned the judge's impartiality nor did he allege that the judge was biased based on events outside the proceedings. The judge's continuance was laudable, not prejudicial.

Jackson v. United States

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1131
Opinion Date: April 20, 2020
Judge: Lavenski R. Smith
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's denial of a 28 U.S.C. 2255 motion to vacate, set aside, or correct petitioner's sentence. The court held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that counsel was constitutionally ineffective for failing to conduct adequate pretrial investigations. In this case, petitioner failed to identify any specific witnesses or evidence that counsel failed to uncover. Furthermore, petitioner failed to show that counsel's representation prejudiced his case. The court also held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that his new counsel was ineffective for failing to subpoena witnesses, for convincing petitioner

not to testify, for failing to object to or appeal the district court's answer to a jury question, and for failing to object to the district court's designation of petitioner as a career offender.

United States v. Bolman

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2759
Opinion Date: April 21, 2020
Judge: Jane Louise Kelly
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for involuntary manslaughter after he struck and killed his nephew with his truck. The court held that the evidence was sufficient to support the conviction, because a reasonable jury could find defendant grossly negligent beyond a reasonable doubt. The court also held that the district court did not plainly err by failing to instruct the jury that actual knowledge is an essential element of the offense that is separate from gross negligence, because the instructions, viewed as a whole, accurately and adequately defined the essential elements of the offense.

United States v. Boyd

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3528
Opinion Date: April 17, 2020
Judge: Kobes
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's sentence imposed after he pleaded guilty to being a felon in possession of a firearm. The court held that the facts underlying defendant's prior arrests were part of his history and characteristics under 18 U.S.C. 3553(a), and thus the district court could consider defendant's arrest records and the circumstances of those arrests. The court explained that the arrests were listed in the presentence report

and gleaned from prior police reports. Furthermore, specific facts underlying the arrests may be considered for an upward departure and should be considered fair game for a variance where defendant did not object to them. The court also concluded that there is nothing here that suggested a corrected misstatement improperly influenced the district court's sentencing decision. Finally, the court held that the upward variance was not unreasonable in consideration of defendant's previous assaults, coupled with the facts underlying his arrest in this case.

United States v. Gonzalez-Esparsa

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1477
Opinion Date: April 22, 2020
Judge: Grasz
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for unlawful use of an identification document and misuse of a social security number. The court held that the evidence was sufficient to support defendant's convictions where a reasonable juror could conclude that defendant knew the permanent resident card bearing his name and photograph had been forged, counterfeited, falsely made, or unlawfully obtained when he used it to secure employment. Furthermore, a reasonable juror could conclude that defendant made the false representation regarding his purported social security number in order to deceive Midwest Concrete in order to obtain a job with the company.

United States v. Sanchez-Velasco

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3568
Opinion Date: April 17, 2020
Judge: James B. Loken
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit affirmed the district court's denial of defendant's motion to suppress his responses to an ICE agent's two questions at the Treasurer's Office, because he was not in custody at the time of questioning. Although defendant was in custody at the ICE facility, the court held that an agent's questions were not custodial interrogation because the agent could not have known his questions were likely to elicit incriminating information regarding the two criminal charges that were eventually brought against defendant. The court noted that the Attorney General's regulations carefully distinguish between the warrantless arrest of an alien for a criminal violation of the immigration laws, and what is called the "administrative arrest" of an alien who is reasonably believed to be illegally present in the United States. The court agreed with the district court that the agent's questioning was a request for routine information necessary for basic identification purposes that is not interrogation under Miranda, even if the information turns out to be incriminating.

Anthony v. TRAX International Corp.

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-15662
Opinion Date: April 17, 2020
Judge: Kim McLane Wardlaw
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's grant of summary judgment to TRAX in a disability discrimination action brought by plaintiff under Title I of the Americans with Disabilities Act (ADA). After TRAX terminated plaintiff from her position as a Technical Writer allegedly due to an inability or unwillingness to accommodate her disability, TRAX discovered during the course of litigation that plaintiff lacked the requisite bachelor's degree for her position. The panel held that, although McKennon v. Nashville Banner Publishing Co., 513 U.S. 352 (1995), held that after-acquired evidence cannot establish a superseding, non-discriminatory justification for an employer's challenged actions, after-acquired evidence remains available for other purposes, including to show that an individual is not qualified under the ADA. Because plaintiff did not satisfy one of the prerequisites for her

position, she is not "otherwise qualified," and TRAX was not obligated to engage in the interactive process.

City of Almaty v. Khrapunov

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-56451
Opinion Date: April 22, 2020
Judge: Marbley
Areas of Law: Criminal Law, International Law, White Collar Crime

The City of Almaty, in Kazakhstan, filed suit against defendant and his family under the Racketeer Influenced and Corrupt Organizations Act (RICO), alleging that they engaged in a scheme to defraud the city of millions of dollars. The City claimed that it was forced to spend money and resources in the United States to trace where its money was laundered. The district court dismissed the City's claim on the basis that it failed to state a domestic injury pursuant to the Supreme Court's recent decision in RJR Nabisco, Inc. v. European Community, 136 S. Ct. 2090 (2016). The Ninth Circuit held that the City failed to state any cognizable injury other than the foreign theft of its funds, and its voluntary expenditures were not proximately caused by defendants' acts of money laundering. In this case, the City's expenditure of funds to trace its allegedly stolen funds is a consequential damage of the initial theft suffered in Kazakhstan and is not causally connected to the predicate act of money laundering.

United States v. Baldon

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10411
Opinion Date: April 21, 2020
Judge: Bennett
Areas of Law: Criminal Law

After defendant pleaded guilty to possession with intent to distribute a controlled substance, the district court sentenced him to 184 months in

prison. The Ninth Circuit held that defendant's prior convictions for carjacking under section 215 of the California Penal Code are not categorical crimes of violence under USSG 4A1.1(e). Therefore, the district court incorrectly calculated defendant's criminal history by improperly including two points for his prior carjacking convictions. However, the panel held that the district court did not err in finding that defendant possessed a firearm under USSG 2D1.1(b)(1). Accordingly, the panel affirmed in part, vacated in part, and remanded for resentencing.

United States v. Manzanares

Court: US Court of Appeals for the Tenth Circuit
Docket: 18-2010
Opinion Date: April 17, 2020
Judge: Mary Beck Briscoe
Areas of Law: Constitutional Law, Criminal Law

Defendant-Appellant Archie Manzanares appealed a district court's denial of his 28 U.S.C. 2255 motion challenging his sentence under the Armed

Career Criminal Act (ACCA). Under the ACCA, an offense qualified as a violent felony by satisfying at least one of three definitions, which have come to be known as the Elements Clause, the Enumerated Clause, and the Residual Clause. Manzanares asserted that without the Residual Clause, his underlying New Mexico convictions (armed robbery, aggravated assault with a deadly weapon, and aggravated battery) no longer qualified as violent felonies. The district court denied the motion, concluding that all three underlying convictions satisfied the Elements Clause. Manzanares appealed the classification of the armed robbery conviction as a violent felony to the Tenth Circuit, and sought to expand the certificate of appealability to allow him to appeal the decision regarding the aggravated assault with a deadly weapon and aggravated battery convictions. After review, the Tenth Circuit affirmed the district court's denial of Manzanares's 2255 motion, and denied his motion to expand the COA.

United States v. Delaney

Court: US Court of Appeals for the District of Columbia Circuit
Docket: 18-3093
Opinion Date: April 17, 2020
Judge: David S. Tatel
Areas of Law: Criminal Law

The DC Circuit vacated the district court's denial of defendant's motion to suppress evidence. The court held that officers violated the Fourth Amendment when they seized defendant because they lacked reasonable suspicion to justify the stop. In this case, a seizure occurred when the officers pulled into the parking lot, partially blocked defendant's vehicle, and activated their take-down light. The court held that any inference of suspicion that the officers drew from encountering defendant soon after hearing the nearby gunshots were undermined by the government's failure to identify specific and articulable facts supporting the officers' estimation of where the various shots came from. Accordingly, the court remanded for further proceedings.

Antenor v. Alaska, Department of Corrections

Court: Alaska Supreme Court
Docket: S-17005
Opinion Date: April 17, 2020
Judge: Carney
Areas of Law: Civil Procedure, Criminal Law, Government & Administrative Law

Several Alaska Department of Corrections inmates challenged the DOC's policy to charge for local telephone calls, arguing the rates they and call recipients had to pay for calls violated their constitutional right to rehabilitation, their statutory right to reasonable telephone access, and DOC's contractual obligations under a prior settlement and consent decree. In addition, one of the prisoners challenged DOC officers' decision to deny him access to a computer programming book he ordered from outside the prison. He contended that DOC placed a content-specific restriction on the educational materials and publications prisoners were allowed, violating the Alaska Constitution's free speech provisions as well as prisoners' right to reformation. Each of these challenges reached the Alaska Supreme Court after inmates exhausted the administrative process from prison. Inmates then appealed to the superior court, which denied relief. The Alaska Supreme Court determined the superior court record did not provide enough evidence for it to meaningfully determine the reasonableness of the rates charged inmates for local telephone calls; therefore the Court reversed denial of relief and remanded for further fact-finding by the trial court. The Court concluded that the facility's restrictions on programming-related books were rationally related to a legitimate interest, and because they did not infringe on the right to rehabilitation, it affirmed denial of a prisoner's motion to enforce his claimed right to a particular text about computer programming.

Berger v. Bryant

Court: Arkansas Supreme Court
Citation: 2020 Ark. 357
Opinion Date: April 23, 2020
Judge: Rhonda K. Wood

Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's petition to proceed in forma pauperis on a petition for writ of mandamus and a motion for declaratory judgment, holding that Appellant failed to state a colorable cause of action. In 1998, Appellant was convicted of rape. In his petition for a writ of mandamus, Appellant asserted that he sought information pursuant to the Arkansas Freedom of Information Act regarding his rape conviction but received no response. The circuit court denied the petition. The Supreme Court affirmed, holding (1) even if Appellant had requested disclosable information, he would not be entitled to inspect it as an incarcerated person; and (2) Appellant did not demonstrate a legitimate claim given the facts presented and therefore failed to establish a colorable cause of action to support his request to proceed in forma pauperis.

Cave v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 356
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for writ of habeas corpus, holding that the circuit court did not err in denying the petition. Appellant was found guilty of two counts of delivery of a controlled substance and one count of maintaining a drug premises. In his habeas petition, Appellant argued that he was actually innocent because his arrest and conviction was based on the false testimony of a witness who had a lengthy criminal history. Appellant further argued that the writ should issue because he was not afforded effective assistance of counsel. The circuit court denied the petition. The Supreme Court affirmed, holding (1) Appellant's claims regarding the witness's credibility do not constitute a valid assertion that he was being unlawfully detained; and (2) Appellant did not actually connect an allegation of ineffective assistance of counsel to his allegation that he was unlawfully detained.

Chatmon v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 355
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Criminal Law

The Supreme Court denied Appellant's appeal from the order of the circuit court denying his petition to proceed in forma pauperis on the grounds that Appellant failed to state a colorable cause of action in a petition for writ of habeas corpus, holding that the circuit court did not abuse its discretion by denying Appellant's in forma pauperis petition. In his habeas petition, Appellant alleged that the trial court lacked jurisdiction in his criminal case. Before this case was submitted to the Supreme Court, Appellant filed two

motions, including a "Judicial Notice of a Void Judgment" and a "Notice to the Court." The Supreme Court denied the motions, holding that neither motion was cognizable under the Court's rules. The Court then affirmed the Supreme Court's denial of Appellant's in forma pauperis petition, holding that the circuit court correctly found that Appellant did not assert a colorable cause of action.

Opinion Date: April 23, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from the circuit court's orders denying her motions to declare Ark. Code Ann. 5-62-106 (disposition

of animal) and Ark. Code Ann. 5-62-111 (prevention of cruelty) unconstitutional and conditionally granting her motion for return of seized property, holding that there was no final, appealable order in this case. Appellant was convicted of thirty-one misdemeanor counts of cruelty to animals. The circuit court subsequently dismissed the charges on speedy-trial grounds. The State appealed, and the Supreme Court dismissed the appeal on the grounds that it was not authorized. Appellant had filed motions seeking a declaration that sections 5-62-106 and -111 are unconstitutional and seeking the return of her seized property. The circuit court denied the constitutional claims and entered a conditional order granting Appellant's motion for return of seized property. Appellant appealed. The Supreme Court dismissed the appeal, holding that because the conditional order did not make specific findings as to the return of the property or as to damages and because it expressly left open the possibility of further proceedings, there was no final, appealable order in this case.

Thomas v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 354
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Appellant's conviction of capital murder, holding that the evidence was sufficient to sustain the conviction and that the circuit court did not err in denying Appellant's motion to suppress tracking data generated by his cellphone. On appeal, Appellant argued that the trial court erred by denying his directed-verdict motion because the evidence supported the defense's theory of the case that he did not intend to shoot the victim. Further, Appellant argued that the court abused its discretion in denying his motion to suppress evidence obtained from the seizure of AT&T phone records. The Supreme Court disagreed, holding (1) the evidence was sufficient to support the capital murder conviction; and (2) the circuit court correctly denied the motion to suppress.

California v. Landowski

Court: California Courts of Appeal
Docket: C080210(Third Appellate District)
Opinion Date: April 23, 2020
Judge: Andrea Lynn Hoch
Areas of Law: Constitutional Law, Criminal Law

Defendant Michael Reyes, Jr., an active Norteno gang member (from the Broderick Boys subset), confronted a former Norteno gang member (from the Franklin Boys subset), "S.," about a physical altercation that occurred between S. and Reyes's stepfather over a debt. That earlier altercation had taken place in front of Reyes's autistic younger brother. Reyes pulled out a handgun and asked S. if he had a problem. S., who was riding his bicycle with his wife, "R.," when Reyes confronted him with the gun, stopped briefly, told Reyes to put the gun down if he wanted to fight, and then started to ride away. This angered Reyes, prompting him to fire six rounds at S. from behind. S. Was hit but survived. R. Was a short distance in front of S., but was not hit. Defendants Liberty Landowski and Lisa Humble were with Reyes at the time of the shooting and aided in his efforts to avoid being apprehended by law enforcement authorities. Reyes, Landowski, and Humble were tried together before the same jury. Reyes was convicted of one count of attempted murder (Count 1), two counts of assault with a semiautomatic firearm (Counts 2 and 4), one count of possession of a firearm by a convicted felon (Count 5), and one count of possession of ammunition by a convicted felon (Count 6). In addition to various firearm and other enhancements, the jury found Reyes committed the crimes for the benefit of, at the direction of, or in association with a criminal street gang with the specific intent to promote, further, or assist in criminal conduct by gang members. The jury convicted Landowski and Humble of being accessories to Reyes's criminal conduct (Count 9) and also found true gang enhancement allegations attached to that crime. Reyes challenged the sufficiency of the firearm evidence presented to support his conviction, and all defendants challenged the sufficiency of the evidence supporting their gang enhancements. The Court of Appeal determined Senate Bill 620 (2017-2018 Reg. Sess.) gave the trial court discretion to strike firearm enhancements in the interest of justice and applied retroactively; and Senate Bill 136 (2019-2020 Reg. Sess.) eliminated such enhancements,

and also applied retroactively. To these issues, the Court remanded for the trial court's consideration. The Court affirmed the trial court in all other respects.

California v. May

Court: California Courts of Appeal
Docket: C084302(Third Appellate District)
Opinion Date: April 20, 2020
Judge: Ronald B. Robie
Areas of Law: Constitutional Law, Criminal Law

Defendant Raymond May was found guilty by jury of possessing an assault weapon and a machine gun based on his possession of a single AK-47 assault rifle while guarding a marijuana plantation. He was sentenced to probation, which included an electronic search condition. On appeal, defendant argued there was a lack of sufficient evidence corroborating his accomplice's testimony and demonstrating he knew of the firearm's illegal character. He further alleged the trial court erred in instructing the jury: that the accomplice instruction should have included language specifying that the accomplice testimony needed to prove more than defendant's mere presence or access to the firearm. Furthermore, defendant argued the electronic search condition imposed as part of his probation failed under the standards announced in California v. Lent, 15 Cal.3d 481 (1975). The Court of Appeal agreed defendant's electronic search condition should have been stricken, but otherwise affirmed.

California v. Perez

Court: California Courts of Appeal
Docket: E072260(Fourth Appellate District)
Opinion Date: April 20, 2020
Judge: Miller
Areas of Law: Constitutional Law, Criminal Law

In 2009, defendant-appellant Rudy Perez pled guilty to active gang

participation under Penal Code section 186.22(a), and unlawful possession of a firearm under section 12025(b)(6). In 2010, defendant pled guilty to residential burglary under section 459, and active gang participation under section 186.22(a). In August of 2018, the State filed a new felony complaint, alleging one of the prior gang participation convictions as a strike prior. In 2018, defendant moved to vacate the two prior gang participation convictions based upon changes in the law that rendered them invalid. The trial court denied defendant's motion. In 2019, defendant asked for reconsideration, which was again denied. Thereafter, defendant filed a timely notice of appeal from the denial of his motion to vacate the convictions. The Court of Appeal found that defendant pled guilty to street terrorism under Penal Code section 186.22(a) in 2009 and 2010, and it was undisputed that while committing these offenses, defendant acted alone. However, subsequent to defendant's guilty pleas, in 2012, the California Supreme Court held that a defendant had to act in concert with a fellow gang member in order to be guilty of street terrorism. At that time, defendant could have filed a state habeas petition requesting relief, but failed to do so. "Defendants can lose remedies that are established by law when they fail to invoke such remedies in time." Section 1473.7 became effective in 2017. In defendant's motion filed in the trial court, defendant failed to state what new evidence was discovered, instead arguing that the trial court was allowed "to vacate a conviction where the defendant is innocent as a matter of law or where vacating the conviction is in the interest of justice, even though the defendant is no longer in custody or otherwise restrained by the conviction." The Court of Appeal concurred with the trial court's reason to deny relief, determining that "while the outcome in this case may be unfortunate for defendant, we are not here to rewrite legislation. The Legislature could amend section 1473.7 to address issues raised in this case. However, under the laws, as written, we must uphold the trial court's order."

In re S.R.

Court: California Courts of Appeal
Docket: B300214(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Bendix

Areas of Law: Criminal Law

Father appealed the juvenile court's dispositional ruling removing daughter from his custody, arguing that his mere possession of child pornography does not demonstrate that he poses a substantial risk of harm to his daughter. The Court of Appeal affirmed the order and held that there is substantial evidence of risk of great harm to daughter—no matter how low the probability— that father will sexually abuse his daughter if he is provided unfettered access to her.

People v. Bell

Court: California Courts of Appeal
Docket: B288528(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Stratton
Areas of Law: Criminal Law

Defendant was convicted of one count of attempted robbery, one count of second degree murder, and one count of hit and run driving. The jury found not true the allegation that a principal was armed in the commission of the attempted robbery. The trial court found true the allegations that defendant had served four prior prison terms within the meaning of Penal Code section 667.5, subdivision (b). Defendant raised 13 claims of error on appeal. The Court of Appeal held that the section 667.5, subdivision (b) enhancement terms must be stricken and the matter remanded to the trial court for resentencing. The court also held that defendant forfeited some of his substantive claims and other lack merit. Finally, the court held that, if there is instructional error, the errors are harmless under any standard of review. Accordingly, the court affirmed the judgment of conviction.

People v. Drayton

Court: California Courts of Appeal
Docket: H046928(Sixth Appellate District)

Opinion Date: April 17, 2020
Judge: Danner
Areas of Law: Criminal Law

In 1991, the Wards and their teenage daughter awoke and discovered four men, including Drayton, inside their house. Two were armed. One told the daughter he was going to rape her and placed a firearm inside her vagina. Drayton told the man not to do it. Drayton had a gun and held Mrs. Ward down during the robbery. Two others shot and killed Mr. Ward. Drayton and the others left without seeking help for the Wards. Drayton did not shoot Mr. Ward or threaten to rape the daughter. Drayton surrendered the next day. Drayton's sole prior conviction was a misdemeanor; he had no reported history of violence. Drayton was sentenced to 29 years to life imprisonment. In 2019, Drayton sought resentencing under Penal Code 1170.95, declaring that he "was not a major participant ... or did not act with reckless indifference to human life." Senate Bill 1437, effective January 1, 2019, restricted the circumstances under which a person can be liable for felony murder and enacted Penal Code 1170.95, which allows an individual, previously convicted of felony murder, to petition to have his murder conviction vacated and to be resentenced. The court of appeal directed the trial court to hold a hearing under section 1170.95(d) and to accept the assertions in the petition as true unless facts in the record conclusively refute them as a matter of law. If, accepting the petitioner's assertions as true, he meets section 1170.95(a)'s requirements for relief, the court must issue an order to show cause. In assessing the prima facie showing, the trial court should not weigh evidence or make credibility determinations.

People v. Robinson

Court: California Courts of Appeal
Docket: B293746(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Wiley
Areas of Law: Criminal Law

After defendant penetrated an unconscious woman with his fingers, he challenged evidentiary rulings and requests a presentence conduct credit. The Court of Appeal held that the trial court properly excluded cumulative

evidence about past times the woman was intoxicated at the relevant bar, and any error in allowing a drug recognition expert to testify about whether the woman was incapacitated was harmless. However, the court held that the trial court undercalculated defendant's presentence custody credit because he was not convicted of a violent felony under Penal Code section 2933.1, which would otherwise limit those credits. Accordingly, the court directed the trial court to award defendant 104 days of presentence custody credit and to amend the abstract of judgment, affirming in all other respects.

People v. Torres

Court: California Courts of Appeal
Docket: B292551(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Kenneth R. Yegan
Areas of Law: Criminal Law

Where, as here, the trial court factually finds that a self-represented defendant has engaged in an attempt to intimidate a witness, the constitutional right of self-representation can, in the exercise of the trial court's sound discretion, be revoked. The Court of Appeal affirmed defendant's conviction and sentence for two counts of battery on an ex-girlfriend. In this case, the trial court did not abuse its discretion in revoking defendant's pro se status after he asked his sister to contact the victim and have her say that she was coerced by the police detective to "press charges."

Colorado v. Lujan

Court: Colorado Supreme Court
Citation: 2020 CO 26
Opinion Date: April 20, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law

Abel Lujan was charged with first-degree murder for the death of his girlfriend after she was found beaten and strangled behind a friend's house. At trial, two women testified for the State about Lujan's prior violent behavior towards them. Prior to admitting this evidence, the trial court read a limiting instruction, telling the jury that it could only consider the evidence for the purposes of establishing Lujan's motive, intent, or common plan. A copy of this instruction was not given to the jury for deliberations; however, the jury did receive an instruction at the close of the evidence explaining that certain evidence could only be considered for the limited purposes for which it was admitted. While deliberating, the jury submitted a question seeking clarification about the limiting instruction. Over defense counsel's objection, the trial court cleared the courtroom of the public and parties, leaving only the judge, bailiff, and court reporter; the judge then brought in the jury and reread the limiting instruction that it had previously read twice in open court. The jury ultimately found Lujan guilty of second-degree murder. Lujan appealed, arguing that the court's actions when rereading the jury instruction constituted a courtroom closure that violated his Sixth Amendment right to a public trial. A division of the court of appeals agreed and reversed Lujan's conviction. The State argued on certiorari review that the Colorado Supreme Court adopt a triviality standard, under which a defendant's constitutional right to a public trial was not violated when the closure at issue was trivial. In so doing, the State argued that the brief courtroom closure here was trivial and therefore did not violate Lujan's public trial right. The Court concurred with the State, adopted the standard and reversed the appellate court's decision.

Archer v. State

Court: Florida Supreme Court
Docket: SC19-841
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's successive motion to vacate his sentence of death under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying the Rule

3.851 motion. Appellant was convicted of first-degree murder, armed robbery, and grand theft. Appellant was sentenced to death for the murder. The Supreme Court affirmed the convictions but reversed Appellant's death sentence and remanded the case for a new penalty phase. After a new penalty phase, Appellant was again sentenced to death. In his successive Rule 3.851 motion, Appellant raised three claims. The circuit court denied relief. The Supreme Court affirmed, holding that the circuit court (1) properly denied Appellant's claim that his death sentence violated the Sixth and Eighth Amendments in light of Hurst v. Florida, 136 S. Ct. 616 (2016), and Hurst v. State, 202 So. 3d 40 (Fla. 2016); (2) correctly denied Appellant's claim that his sentence violated the Eighth Amendment; and (3) did not err in denying Appellant's claim of newly discovered evidence.

Collins v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0158
Opinion Date: April 20, 2020
Judge: David E. Nahmias
Areas of Law: Constitutional Law, Criminal Law

Appellant Tommy Collins was convicted of felony murder in connection with the stabbing death of 14-year-old Rueben Hand. Friends gathered to watch the Peach Drop on New Year's Eve 2010; a disagreement ensued and Hand was stabbed near the Five Points MARTS station shortly after midnight. Appellant's only argument on appeal was that the trial court plainly erred when it gave the jury the State's requested instruction on "revenge for a prior wrong." Seeing no error, "much less plain error," the Georgia Supreme Court affirmed.

Heyward v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0399
Opinion Date: April 20, 2020

Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Larmell Heyward was convicted by jury of malice murder and possession of a firearm during the commission of a felony in connection with the 2007 shooting death of Ramon Rogers. Heyward argued on appeal of those convictions that the trial court erred in denying his request to charge the jury on voluntary manslaughter. After review, the Georgia Supreme Court determined the trial court's refusal to give the charge was harmless, since, in the Court's estimation, there was no realistic probability that the jury would have accepted the "slight" evidence of voluntary manslaughter in the light of the strong evidence of malice murder.

Moore v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0344
Opinion Date: April 20, 2020
Judge: David E. Nahmias
Areas of Law: Constitutional Law, Criminal Law

Appellant Carzell Moore, proceeding pro se, appealed a trial court's denial of his motion to set aside a September 2017 order denying his motion for an out-of-time appeal of his 2002 resentencing on his 1977 convictions for murder and rape. Moore contended the trial court abused its discretion by

denying his motion to set aside because he was not given proper notice of the September 2017 order. Finding that the record supported the trial court's ruling, the Georgia Supreme Court affirmed.

Rickman v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0127
Opinion Date: April 20, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Victoria Rickman was convicted by jury of malice murder and a related firearm offense in connection with the shooting death of William Carter, Jr. Rickman and Carter had a tumultuous on-again, off-again relationship with a history of verbal and physical abuse, false accusations of sexual assault, empty threats to obtain temporary protective orders, and numerous calls to

911. In the days leading up to Carter's death, the pair was talking and meeting again despite a recent break-up. On one such 911 call, officers went to Rickman's residence responding to claims shots were fired. Rickman responded holding her small dog, hair wet, and in pajamas. She did not appear to be injured, and nothing in the home looked disturbed or out of place. Rickman told the officers, "he raped me again and I shot him." Officers found Carter laying face up on the bed naked with multiple gunshot wounds to his body. An autopsy revealed that Carter was shot ten times – four times in the chest, three times in the back, once on the arm, and twice in the head. Rickman's examining physician testified that he found no injuries on Rickman consistent with her description of events, and no signs of trauma to her vaginal cavity. Rickman appealed her convictions, arguing she was denied effective assistance of counsel and that the trial court erred in admitting improper character evidence. Finding no reversible error, the Georgia Supreme Court affirmed.

Read Opinion Are you a lawyer? **Annotate this case**.

Robinson v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0265
Opinion Date: April 20, 2020
Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Herbert Robinson appealed his convictions for malice murder, armed robbery, and possession of a firearm during the commission of a felony in connection with the death of Michael Moore. On appeal, he argued the trial court erred by allowing the State to use two firearms for demonstrative purposes during trial, and by allowing body-camera footage to be shown at trial. He also argued his trial counsel was ineffective for failing to object to a letter written by Robinson's cellmate being available to the jury for review during deliberations, and for failing to object to a visual aid used by the State during closing arguments. Because Robinson failed to show ineffective assistance of counsel or reversible error by the trial court, the Georgia Supreme Court affirmed.

Sullivan v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0056
Opinion Date: April 20, 2020
Judge: Warren
Areas of Law: Constitutional Law, Criminal Law

A jury convicted Antonio Sullivan of malice murder and other crimes in connection with the shooting death of Wava Benton. On appeal, Sullivan contended his trial counsel was constitutionally ineffective by failing to present evidence at trial to corroborate Sullivan's testimony about prior difficulties between Sullivan and Benton, and by failing to procure expert testimony about Sullivan's mental health—specifically about post-traumatic stress disorder— to be presented to the jury. The Georgia Supreme Court determined Sullivan failed to establish that his trial counsel was deficient in either respect, and therefore affirmed his convictions.

Read Opinion Are you a lawyer? **Annotate this case**.

Turner v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0247
Opinion Date: April 20, 2020
Judge: Warren
Areas of Law: Constitutional Law, Criminal Law

Appellant Ronald Turner appeals from his conviction for malice murder stemming from the stabbing death of William King. The stabbing took place outside an apartment at which Turner had driven in order to trade food for drugs. Turner testified in his own defense at trial and claimed that King hit him in the head with a beer bottle because Turner owed money to King from a prior drug transaction. Turner testified that he tried to get away from King, but that King chased him down and grabbed his jacket. According to Turner, King was getting ready to hit him again when Turner stabbed King in self-defense. Appealing his ultimate conviction, Turner contended he was denied the effective assistance of counsel in three respects. Seeing no reversible error after a review of the trial court record, the Georgia Supreme Court affirmed Turner's conviction.

Valrie v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0380
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Reuben Valrie was tried by jury and convicted of murder and other crimes in connection with the death of his infant daughter Aliyana. Valrie appealed, claiming that he was denied the effective assistance of counsel. Aliyana died as a result of closed head trauma, with a blunt-force abdominal injury as a secondary cause of death, which investigators determined was consistent with being shaken or dropped. At trial, Valrie presented the testimony of four expert witnesses who testified that Aliyana died of natural causes and that the injuries to her brain and abdomen were caused by

events such as post-mortem CPR and the “rough” handling of her body by first responders. The jury rejected this defense and found Valrie guilty of murder and the other charges. Valrie contended that his trial lawyer should have raised a hearsay objection to the admission of recorded statements that his girlfriend (and Aliyana's mother) made to police investigators (as well as the testimony of one of those investigators about some of those statements). Alternatively, Valrie argued that his lawyer should have sought the redaction of certain portions of the recorded statements that impugned his character. The Georgia Supreme Court concluded Valrie failed to present evidence that his trial counsel was deficient, or that he was prejudiced by any alleged failures. According, the Court affirmed conviction.

Williams v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0241
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Richard Williams, II, was tried by jury and convicted of murder in connection with the strangulation death of Cory Robinson. Williams and Robinson were involved in a sexual relationship and had been living together at an extended-stay hotel. Kelvin Spencer was a close friend of both Williams and Robinson. When Spencer met Williams at the hotel room, Williams looked angry and had scratches on his neck. Spencer saw Robinson lying on the floor in a “praying position.” Spencer did not believe Robinson was dead, and he helped Williams move clothes and other things to a U-Haul truck parked outside, in preparation for a move. Williams did not testify or present any evidence. Based on his lawyer’s opening and closing arguments, the defense theory was that Spencer killed Robinson because he was jealous of Williams’s relationship with Robinson. Williams’s sole claim on appeal was that he was denied the effective assistance of counsel when his trial lawyer failed to present as a defense that Williams accidentally killed Robinson during consensual erotic asphyxiation. He argued that his lawyer's discomfort with the topic of homosexual BDSM activity, and his own problems with the Georgia State Bar, precluded presentation of the "true"

version of events, and that Williams acceded to the lawyer's defense strategy only "through ignorance and that he did not know that a defense based on consensual erotic asphyxiation was available." Finding no reversible error, the Georgia Supreme Court affirmed conviction.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 20, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming Defendant's conviction of sexual assault in the first degree on the complaining witness pursuant to Haw. Rev. Stat. 707-730(1)(b), holding that the ICA did not err in affirming the family court. Specifically, the Supreme Court held (1) the jury should have been instructed to determine jurisdictional facts, but the error was harmless beyond a reasonable doubt; and (2) the ICA did not err in finding that there was no rational basis in the record to support providing the jury instruction of the lesser included offense of sexual assault in the third degree.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 22, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming the judgment of the family court convicting Defendant on two counts of sexual assault in the first degree, holding that the ICA did not err in affirming the family court. At issue on appeal was the jurisdiction of the family court to try Defendant and the propriety of

instructing the jury on a lesser included offense. The ICA affirmed, concluding that the family court had subject matter jurisdiction pursuant to Haw. Rev. Stat. 571-14(a)(1) and that there was no rational basis to support an instruction of the lesser included offense of sexual assault in the third degree. The Supreme Court affirmed, holding (1) although the jury should have been instructed to determine jurisdictional facts, the error was harmless; and (2) the family court was not obligated to instruct the jury on the lesser included offense of sexual assault in the third degree.

Idaho v. Burke

Court: Idaho Supreme Court - Criminal
Docket: 46841
Opinion Date: April 22, 2020
Judge: Moeller
Areas of Law: Constitutional Law, Criminal Law

Prior to sentencing, defendant James Burke was committed to the state mental hospital for 56 days to restore him to competency. After being evaluated and deemed competent to proceed to trial, Burke was returned to the county jail and later pleaded guilty pursuant to a plea agreement. At the conclusion of his sentencing hearing, Burke sought credit for the 56 days of time spent in court-ordered commitment. The district court denied the motion, concluding that commitment to a state mental hospital did not fall under the definition of 'incarceration' in Idaho Code section 18-309. After reviewing this issue carefully, the Idaho Supreme Court disagreed with the district court's "thorough and thoughtful analysis," holding that court-ordered commitment to state custody pursuant to Idaho Code sections 18-210 and 18-211 met the functional and legal definition of "incarceration" under Idaho Code section 18-309. "The extent of the liberty interests restricted by Burke's court-ordered commitment to State Hospital North are just too similar to imprisonment to conclude otherwise." Accordingly, the Court reversed the district court's order denying Burke's request for credit for time served and remanded the case for the district court to enter an order crediting him with the fifty-six days he spent committed to State Hospital North while the State restored his competency to face criminal charges.

State v. Gibbs

Court: Iowa Supreme Court
Docket: 18-1298
Opinion Date: April 17, 2020
Judge: Edward M. Mansfield
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of murder in the second degree, holding that Defendant's Fifth Amendment rights were invaded when the trial judge instructed the jury that Defendant was required to notify law enforcement of his use of deadly force, but the error was harmless. During trial, Defendant asserted the defense of justification in his shooting of the victim. At issue on appeal was whether the district court abused its discretion by giving a jury instruction incorporating the terms of Iowa Code 704.2B. The instruction included a statement that a person using deadly force is required to notify law enforcement about his use of deadly force. Defendant argued before the Supreme Court that both section 704.2B and the jury instruction incorporating that section violated his Fifth Amendment rights. The Supreme Court affirmed, holding (1) instructing the jury that a homicide defendant is required to notify a law enforcement agency of his use of deadly force violates the defendant's Fifth Amendment rights; but (2) any error in this case was harmless beyond a reasonable doubt.

State v. Broxton

Court: Kansas Supreme Court
Docket: 114675
Opinion Date: April 17, 2020
Judge: Stegall
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions for second-degree murder, burglary, and theft but reversed Defendant's sentences, holding

that any error during the guilt phase was harmless but that the district court erred by scoring Defendant's prior Florida burglary conviction as a person felony instead of a nonperson felony. On appeal, the court of appeals concluded that a trial court may instruct the jury on felony murder even though the State only charged the defendant with premeditated first degree murder. The Supreme Court disagreed, holding (1) the court of appeals erred in concluding that a district court may elect to provide a felony-murder instruction when that crime was not charged, and the district court properly found that the felony-murder instruction was not legally appropriate in this case; (2) the district court erred by excluding from evidence an exculpatory document from a Florida homicide investigation on the ground it was not relevant, but the error was harmless; and (3) the district court improperly scored Defendant's prior Florida burglary conviction as a person felony.

State v. Corbin

Court: Kansas Supreme Court
Docket: 119665
Opinion Date: April 17, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed the ruling of the district court on remand resentencing Defendant to his original mandatory term of imprisonment after once again finding he was not a person with intellectual disability, holding that the district court did not abuse its discretion when it rejected Defendant's intellectual disability motion and imposed a mandatory term of imprisonment. Defendant pled no contest to first-degree premeditated murder. Before sentencing, Defendant filed a motion pursuant to Kan. Stat. Ann. 21-6622(b) asserting that he was a person with intellectual disability and was thus not subject to a mandatory minimum prison term. The district court denied the motion and sentenced Defendant to a hard twenty-five life sentence. While Defendant's appeal was pending, the Legislature amended Kan. Stat. Ann. 76-12b01(i), which provides new standards for deciding intellectual disability. The Supreme Court reversed and remanded for reconsideration of Defendant's motion using the new criteria. On remand, the district court reaffirmed its earlier ruling and again sentenced Defendant

to a hard twenty-five life sentence. The Supreme Court affirmed, holding that the district court's ruling was reasonably based on the law and was supported by substantial competent evidence.

State v. Frazier

Court: Kansas Supreme Court
Docket: 117456
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the district court affirming the judgment of the district court denying Defendant's motion to withdraw plea of no contest to one count of possession of heroin with intent to distribute, holding that the district court's decision in finding no good cause for Defendant to withdraw his plea was based on errors of fact and law, which were grounds for finding abuse of discretion. On appeal, Defendant argued that the district court abused its discretion in denying his motion to withdraw his plea of no contest based on misleading or false statements contained in the plea agreement. The court of appeals affirmed the district court. The Supreme Court reversed, holding (1) there was enough uncertainty in this case to indicate that Defendant's plea agreement was not understandingly made; and (2) therefore, Defendant must be allowed to withdraw his plea.

State v. Harris

Court: Kansas Supreme Court
Docket: 117362
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the judgment of the court of appeals affirming Defendant's conviction of possession fo marijuana, holding that Defendant's waiver of jury trial was legally insufficient. On appeal, Defendant argued that

he did not properly waive his right to a jury and asserted three other issues. The Supreme Court reversed the judgment of the court of appeals affirming Defendant's convictions without addressing the three remaining issues, holding that because the district court failed properly to apprise Defendant of his right to a jury trial and failed to ensure that Defendant understood the nature of the right he was giving up, Defendant's constitutional right to a jury trial was violated in this case.

State v. Uk

Court: Kansas Supreme Court
Docket: 119712
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree premeditated murder, holding that the district court did not err in its challenged instructions to the jury. Specifically, the Supreme Court held (1) the district court did not err in refusing to give the jury Defendant's requested instruction on voluntary manslaughter as a lesser included offense of first-degree murder because the instruction was not factually appropriate; and (2) the district court did not commit clear error in issuing an unmodified version of Instruction No. 11, which contained the definition of "premeditation" and mirrored PIK Crim. 4th 54.150(d) because the instruction was legally appropriate.

State v. Catruch

Court: Maine Supreme Judicial Court
Citation: 2020 ME 52
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgments of the trial court

terminating Appellant's participation in the Co-Occurring Disorders and Veterans Court (Veterans Court), holding that the court did not err or abuse its discretion in terminating Appellant's participation in the Veterans Court. The Veterans Court is a criminal docket that provides judicial monitoring, specialized treatment, and other services for military veterans who have disorders often attributable to their military service. Appellant was charged with leaving the scene of an accident and three other offenses. Appellant was admitted to the Veterans Court. Agreeing to sentencing outcomes in a plea agreement and entering into a bail contract, Appellant pleaded guilty to all charges against him. The court later terminated Appellant's participation in the Veterans Court, finding that Appellant had violated the conditions of his bail contract. The Supreme Judicial Court affirmed, holding (1) this matter was properly before the Court; and (2) given Appellant's failure to comply with the requirements for participation in the treatment court and his violations of the agreements, his termination from the Veterans Court was warranted.

State v. Paquin

Court: Maine Supreme Judicial Court
Citation: 2020 ME 53
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Constitutional Law, Criminal Law

In this appeal from Defendant's conviction for eleven counts of gross sexual misconduct, the Supreme Judicial Court vacated the judgment of conviction on one count, vacated the dismissal of other counts and remanded for entry of a judgment of acquittal on those counts, and affirmed in all other respects, holding that Defendant's convictions on both Counts 5 and 30 violated his double jeopardy protections and that the court erred in allowing the State to dismiss Counts 27, 28, and 29 during trial without Defendant's consent. The indictment charged Defendant with fifteen counts (Counts 1-13, 30-31) of gross sexual misconduct against the victim and sixteen counts (Counts 14-29) of gross sexual misconduct against a second alleged victim. During trial, the court granted Defendant's motion for a judgment of acquittal on Counts 10-13, and the State dismissed Counts 27-29. Defendant was

found guilty of Counts 1-9 and 30-31 and not guilty on the remaining counts. The court entered judgment in accordance with the verdict. The Supreme Judicial Court held that the trial court erred in failing to rule that the Double Jeopardy Clause barred convictions on both Counts 5 and 30 and allowing the State to dismiss Counts 27, 28, and 29 rather than entering a judgment of acquittal on those counts.

Watson v. State

Court: Maine Supreme Judicial Court
Citation: 2020 ME 51
Opinion Date: April 21, 2020
Judge: Joseph Jabar
Areas of Law: Criminal Law

The Supreme Judicial Court vacated the judgment of the unified criminal docket denying Appellant's petition for post-conviction review, holding that Appellant was deprived of the effective assistance of counsel when his trial attorney played a video of the ten-year-old victim's interview with police and that Appellant was adversely affected. Appellant was convicted of two counts of gross sexual assault, one count of unlawful sexual contact, and one count of visual sexual aggression against a child. The Supreme Court affirmed. Appellant later filed a petition for post-conviction review claiming that his trial attorney's representation was deficient because introducing the videotaped recording of the victim's entire interview with law enforcement was unnecessary to provide evidence supporting the victim's potential motive to fabricate the allegations. The post-conviction court denied denied the petition. The Supreme Court vacated the judgment below, holding that trial counsel's conduct was deficient and that counsel's actions rose to the level of comprising the reliability of Appellant's conviction and undermining confidence in it.

Commonwealth v. Mazza

Court: Massachusetts Supreme Judicial Court

Docket: SJC-11363
Opinion Date: April 21, 2020
Judge: Budd
Areas of Law: Criminal Law

The Supreme Judicial Court reversed the order of the superior court denying Defendant's motion for a new trial and set aside the jury's verdicts of first degree murder and robbery, holding that a recently discovered witness statement made to the police ago constituted newly discovered evidence that "would probably have been a real factor in the jury's deliberations." At issue was Defendant's sixth motion for a new trial, which was predicated on newly discovered evidence consisting of, among other things, a recently discovered statement made to the police in 1972. The superior court denied the motion. As to the police statement, the judge found that it did not constitute newly discovered evidence because Defendant failed to establish that defense counsel did not have possession of it at the time of trial. The Supreme Judicial Court reversed and remanded the case for a new trial, holding (1) Defendant sustained his burden of establishing that defense counsel did not have the 1972 police statement prior to or at trial, and therefore, the statement constituted newly discovered evidence; and (2) there was a substantial risk that the jury would have reached a different conclusion had the evidence been admitted at trial.

Commonwealth v. McCarthy

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12750
Opinion Date: April 16, 2020
Judge: Gaziano
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed the judgment of the district court denying Defendant's motions to suppress, holding that the limited use of automatic license plate readers (ALPRs) in this case did not implicate constitutional protections against unreasonable searches. While police were investigating Defendant on suspicion of drug distribution they used ALPRs on two bridges to track Defendant's movements. The police accessed historical data via ALPR technology and received real-time alerts, the last of

which led to Defendant's arrest. Defendant filed motions to suppress the ALPR data and the fruits of the arrest. The superior court denied the motions. The Supreme Judicial Court affirmed, holding that while the widespread use of ALPRs in the Commonwealth could implicate a defendant's constitutional protected expectation of privacy in the whole of his public movements, that interest was not invaded by the limited extent and use of the ALPR data in the instant case.

Garden v. Commonwealth

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12821
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of a single justice of the court denying Petitioner's petition for extraordinary relief under Mass. Gen. Laws ch. 211, 3 seeking an order vacating Petitioner's plea to aggravated rape and dismissing the underlying indictment, holding that the single justice did not err or abuse his discretion in denying relief. The issues raised by Petitioner had all been raised and adjudicated through the normal appellate process. Petitioner then filed a motion to withdraw his guilty plea. The motion was denied, and the Appeals Court affirmed. In this petition for extraordinary relief, Petitioner sought an order vacating his plea to aggravated rape and dismissing the underlying indictment. The single justice denied relief. The Supreme Judicial Court affirmed, holding that the superintendence power was not available as an additional layer of appellate review once all other avenues had been exhausted.

In re Mitchell

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12910
Opinion Date: April 22, 2020

Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of the county court denying, without a hearing, Petitioner's petition for relief under Mass. Gen. Laws ch. 211, 3, holding that the single justice did not err or abuse his discretion in denying relief. Defendant was convicted of several offenses. The Appeals Court reversed the convictions and remanded the matter for a new trial. Thereafter, the Commonwealth filed a nolle prosequi as to all the charges. In his Mass. Gen. Laws ch. 211, 3 petition, Defendant alleged that no crime had been committed and that he was wrongfully prosecuted. The single justice denied relief. The Supreme Judicial Court affirmed, holding that Defendant did not demonstrate entitlement to the exercise of this Court's superintendence powers.

Opinion Date: April 22, 2020
Judge: G. Barry Anderson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree murder, holding that there was no error in the proceedings below. Specifically, the Supreme Court held (1) Appellant's right to a fair trial before an impartial tribunal was not violated when the district court stated that it might reconsider its prior Spreigl ruling if the defense presented certain witnesses; (2) the jury instructions on accomplice liability were plainly erroneous, but Appellant failed to establish that there was a reasonable likelihood that the error had a significant effect on the verdict; (3) the prosecutor did not commit misconduct in his closing arguments regarding the law of accomplice liability; (4) the district court did not abuse its discretion by granting the State’s motion to admit evidence of appellant’s past convictions for impeachment purposes, including by allowing the specific convictions to be disclosed to the jury; and (5) Appellant’s pro se arguments were without merit.

Huff v. Brown

Court: Nebraska Supreme Court
Citation: 305 Neb. 648
Opinion Date: April 23, 2020
Judge: Lindsey Miller-Lerman
Areas of Law: Communications Law, Criminal Law

The Supreme Court reversed the portion of the district court's order granting in part a writ of mandamus requiring Doug Brown, the sheriff of Furnas County, to provide records to Herchel Huff pursuant to the public records statutes, holding that the district court erred when it determined that Huff had shown that Brown had a clear duty to provide the requested records. Huff, an inmate, sought, among other documents, the criminal history

records of jurors who had convicted hims. Furnas County sheriff Kurt Kapperman required a deposit of $750 before fulfilling the request. Huff subsequently filed a petition for writ of mandamus naming Kapperman as the defendant and seeking an order compelling Kapperman to release all requested documents. The court permitted Huff to substitute Brown, the current sheriff, in the caption of the case in place of Kapperman and granted in part mandamus. The Supreme Court reversed in part, holding that the district court (1) did not err when it substituted Brown's name for Kapperman's; but (2) erred in issuing mandamus because Huff failed to demonstrate a prima facie case that he had been denied a request for public records that the sheriff had a clear duty to provide under Neb. Rev. Stat. 84-712.

State ex rel. Kendrick v. Parker

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1509
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals denying Appellant's request for a writ of prohibition and/or mandamus against Montgomery County Court of Common Pleas Judge E. Gerald Parker Jr., holding that the court of appeals correctly determined that Appellant's claim was barred by res judicata. Appellant sought a petition for writ of prohibition and/or mandamus against Judge Erik Blaine, the successor to the judge who sentenced Appellant, alleging that the sentencing court patently and unambiguously lacked jurisdiction to sentence him. Judge Parker, who had succeeded Judge Blaine, subsequently filed a motion for summary judgment. The court of appeals granted summary judgment for Judge

Parker, concluding that Appellant failed to demonstrate that the sentencing court patently and unambiguously lacked jurisdiction or that he lacked an adequate remedy at law and that res judicata barred Appellant's claim. The Supreme Court affirmed, holding that Appellant's claim was barred by res judicata.

State ex rel. Nelson v. Russo

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1541
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus seeking to compel Cuyahoga County Court of Common Pleas Judge Nancy Margaret Russo to vacate the consecutive prison sentences imposed on Appellant in 1987, holding that Appellant had an adequate remedy at law and was barred from asserting additional claims of sentencing error he could have raised in his previous mandamus action. In 1987, Appellant was convicted of four counts of rape and one count of kidnapping. Appellant was sentenced to prison terms of fifteen to twenty-five years for each of the five counts, to be served consecutively. In 2019, Appellant sought a writ of mandamus to compel Judge Russo to vacate his consecutive sentences. The court of appeals dismissed the writ action, concluding that res judicata barred Appellant's claim and that his prior appeals were an adequate remedy at law to address the alleged defect in his consecutive sentences. The Supreme Court affirmed, holding that Appellant was not entitled to a writ of mandamus in this case.

Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's original action seeking a writ of procedendo and/or mandamus to compel Hamilton County Court of Common Pleas Judge Melba Marsh to issue a corrected sentencing entry, holding that the court of appeals correctly dismissed the petition as moot. Appellant was convicted of murder with a repeat-violent-offender specification. Appellant later asked the trial court to correct his sentence, arguing that he had improperly been sentenced to postrelease control. On remand, Judge Marsh vacated the postrelease-control sentence. Appellant appealed that order. The court of appeals noted that the trial court had not set forth all the information required under Crim.R. 32(C) in a single document and dismissed the appeal for lack of a final, appealable order. Appellant then filed this original action seeking to compel Judge Marsh to issue a corrected sentencing entry that constitutes a final, appealable order. Judge Marsh issued a nunc pro tunc sentencing entry that constituted a final, appealable order. The court of appeals then dismissed the petition as moot. The Supreme Court affirmed, holding that because Judge Marsh performed the act Appellant requested, the court of appeals dismissed the petition as moot.

State ex rel. Steiner v. Rinfret

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1510
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus against Holmes County Court of Common Pleas Judge Robert D. Rinfret, holding that the court of appeals correctly determined that Appellant had an adequate remedy in the ordinary course of the law. Appellant, who was serving consecutive prison terms for five convictions, filed a petition for a writ of mandamus arguing that Judge Rinfret improperly sentenced him to a prison

term of nine years for his attempted rape conviction instead of the maximum term of eleven years. The court of appeals dismissed the petition, determining that Appellant had failed to file a mandatory affidavit of his prior civil actions and had an adequate remedy in the ordinary course of the law. The Supreme Court affirmed, holding that relief in mandamus was not available because Petitioner had an adequate remedy in the ordinary course of the law.

State v. Jeffries

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1539
Opinion Date: April 22, 2020
Judge: Donnelly
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals upholding Defendant's convictions of four counts related to two specific instances of sexual abuse of D.S., holding that the trial court and court of appeals correctly applied Ohio's rape-shield law and determined that evidence of D.S.'s prior nonconsensual sexual assault was inadmissible. On appeal, Defendant asserted that the trial court erred in prohibiting him from introducing evidence during trial that D.S. had previously been sexually assaulted by another person, arguing that the rape-shield law applies only to an accuser's prior consensual sexual activity. The lower court held that Ohio's rape-shield law addresses all sexual activity, not only consensual sexual activity. The court of appeals affirmed. The Supreme Court affirmed, holding (1) the plain meaning of the term "sexual activity" as used in the rape-shield law includes both consensual and nonconsensual sexual activity; and (2) therefore, all sexual activity is barred from admission into evidence by the rape-shield, absent certain exceptions listed in the law.

Pennsylvania v. Britton

Court: Supreme Court of Pennsylvania

Docket: 55 MAP 2018
Opinion Date: April 22, 2020
Judge: Max Baer
Areas of Law: Constitutional Law, Criminal Law

California law enforcement officers interviewed Appellant Stacy Britton in her California residence and, unbeknownst to her, recorded those interviews. Over Appellant's objection, Pennsylvania used those recordings as evidence to help convict Appellant of murder in Pennsylvania. The Pennsylvania Supreme Court granted allowance of appeal to examine whether the California law enforcement officers were acting as agents of the Pennsylvania State Police when they recorded the interviews with Appellant in her California home, and if so, whether Pennsylvania's constitutional and statutory protections were available to Appellant under those circumstances. The Court concluded the California law enforcement officers were not acting as agents of the Pennsylvania State Police when they interviewed Appellant, making analysis of whether any Pennsylvania-specific constitutional or statutory protections unwarranted. Because the Supreme Court concluded the Pennsylvania trial court reached the proper result in this matter, it affirmed that court's judgment.

Pennsylvania v. Copenhaver

Court: Supreme Court of Pennsylvania
Docket: 48 MAP 2019
Opinion Date: April 22, 2020
Judge: Thomas G. Saylor
Areas of Law: Constitutional Law, Criminal Law

In August 2015, a deputy sheriff conducted a vehicle stop of Appellant Victor Copenhaver's pickup truck. Upon approaching the truck, the deputy noticed an odor of alcohol and marijuana emanating from the passenger compartment. After administering field sobriety tests, he arrested Appellant for suspected driving under the influence of alcohol and controlled substances ("DUI"). Appellant was ultimately charged with DUI and other offenses. Appellant challenged the deputy's authority to conduct a traffic stop and sought suppression of all evidence obtained during the encounter. Rather than presenting testimony at a suppression hearing, the parties

stipulated that Appellant was driving the vehicle in question and that the deputy had training and qualifications equivalent to that of a police officer. The parties also agreed that the vehicle stop occurred as a result of the deputy observing the tailgate to the pickup truck being in a down position, which caught the deputy's attention. The deputy further observed the registration on the pickup truck was expired, and additionally, the registration number was identified as belonging to a vehicle other than the one on which it was attached. The issue this case presented for the Pennsylvania Supreme Court's review was whether the deputy could lawfully conduct the traffic stop based on the expired registration sticker, on a theory that such a violation amounts to a breach of the peace. The Supreme Court concluded driving a vehicle with an expired registration did not entail a breach of the peace. It vacated the superior court's order insofar as it held that the expired registration was a breach of the peace, thus alone authorizing the deputy to stop Appellant's vehicle. Notably, in light of its holding, the Supreme Court found the superior court did not proceed to consider other relevant questions, such as whether the parties' factual stipulation should have been read as indicating that the officer's understanding that the registration sticker was associated with a different vehicle arose in the pre-stop timeframe – consistent with the Commonwealth's position throughout this litigation. "These issues should be resolved in the first instance by the intermediate court on remand."

Pennsylvania v. Tedford

Court: Supreme Court of Pennsylvania
Docket: 773 CAP
Opinion Date: April 22, 2020
Judge: Donohue
Areas of Law: Constitutional Law, Criminal Law

Appellant Donald Tedford was convicted of first-degree murder and rape on February 6, 1987. He appealed the dismissal of his second petition for relief filed pursuant to the Post Conviction Relief Act ("PCRA"), on December 2, 2014, as amended by a counseled petition on May 5, 2015, and a supplemental petition filed on June 9, 2015. In connection with his initial filings, Tedford sought wholesale discovery of the prosecution's entire file,

but the PCRA court concluded that the petition (as amended) was not timely filed. Tedford also appealed the PCRA court's order denying his supplemental PCRA petition, in which he requested discovery, an evidentiary hearing, and/or a new trial based upon the admission of expert testimony presented at trial related to microscopic hair analysis. The PCRA court concluded that pursuant to PCRA Section 9545(b)(1)(ii), it had jurisdiction to consider the merits of Tedford's newly-discovered-facts claims, but ultimately it concluded Tedford had not asserted a meritorious claim in accordance with Section 9543(a)(2)(vi). Finding no reversible error in that analysis, the Pennsylvania Supreme Court affirmed dismissal of the petition for relief.

Pennsylvania v. Trahey

Court: Supreme Court of Pennsylvania
Docket: 38 EAP 2018
Opinion Date: April 22, 2020
Judge: Wecht
Areas of Law: Constitutional Law, Criminal Law

The trial court granted Timothy Trahey's motion to suppress the results of a blood test that revealed his blood alcohol concentration ("BAC"), finding no justification for the investigating officers' failure to obtain a search warrant before conducting the test. On the Commonwealth's appeal, the Superior Court reversed, opining that the Commonwealth's evidence sufficiently established the existence of exigent circumstances, thus excusing the absence of a warrant. The Pennsylvania Supreme Court reversed, finding that while the exigency analysis is an objective one, "even disregarding the officers' subjective motivations, or their candid acknowledgment that they would have obtained a search warrant if they thought it necessary, there was no time-sensitive need to conduct a warrantless blood test under the circumstances of this case. Accordingly, the Superior Court's conclusion that the test was justified by exigent circumstances was drawn in error."

In re Greg Abbott

Court: Supreme Court of Texas
Docket: 20-0291
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court conditionally granted mandamus relief to the State seeking review of a temporary restraining order (TRO) blocking enforcement of Executive Order GA-13, which changes the rules applicable to judges' decisions regarding pre-trial bail, against judges, holding that the trial court lacked jurisdiction to order the judges' requested relief, even temporarily. GA-13 suspends certain statutes authorizing trial judges to release jail inmates with violent histories during the state of disaster due to the threat of the novel coronavirus. Plaintiffs alleged that GA-13 is unconstitutional and exceeds the governor's statutory emergency powers. Sixteen of the plaintiffs were Texas trial judges alleging that GA-13 improperly interferes with their judicial authority to make individualized bail decisions, and the other plaintiffs were public interest organizations and lawyer associations. The trial court issued a TRO blocking enforcement of GA-13 against judges. The Supreme Court conditionally granted mandamus relief, holding that the alleged threat of a criminal prosecution in this case did not give the judges standing to seek the invalidation of GA-13, and therefore, the trial court lacked jurisdiction to order their requested relief.

Stahmann v. Texas

Court: Texas Court of Criminal Appeals
Docket: PD-0556-18
Opinion Date: April 22, 2020
Judge: Barbara Hervey
Areas of Law: Constitutional Law, Criminal Law

Appellant Karl Stahmann was involved in an automobile accident, after which he threw a bottle of promethazine, a controlled substance, over a nearby wire fence before law enforcement arrived. The bottle landed two to three feet past the fence in plain view. He was convicted of third-degree

felony tampering with physical evidence and was sentenced to 10 years' confinement and fined $5,000. The judge suspended his sentence and placed him on community supervision for 10 years. Stahmann appealed, arguing in part that the evidence was insufficient to prove that he destroyed, altered, or concealed the prescription bottle. The court of appeals agreed that the evidence was insufficient, but instead of rendering an acquittal, it reformed the judgment to show that Stahmann was convicted of the lesser-included offense of attempted tampering with physical evidence, a state-jail felony. After review of the evidence presented at trial, the Texas Court of Criminal Appeals concluded the evidence was indeed insufficient to prove that Appellant altered the prescription pill bottle when he threw it over the fence because the mere act of throwing the bottle did not change the bottle itself. "While a rational jury could have reasonably inferred that Stahmann intended to conceal the pill bottle when he threw it over the wire fence, the evidence shows that he failed to conceal it as he intended because the bottle landed short of the bush in plain view on top of some grass." The Court affirmed the trial court's judgment.

Blanke v. Board of Pardons & Parole

Court: Utah Supreme Court
Citation: 2020 UT 16
Opinion Date: April 16, 2020
Judge: Himonas
Areas of Law: Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the district court's denial of Appellant's petition for extraordinary relief, holding that, under the circumstances, the Utah Board of Pardons and Parole need not afford Appellant the due process protections explained in Neese v. Utah Board of Pardons and Parole, 416 P.3d 663 (2017), before it could determine that Appellant was a sex offender and condition his parole on sex offender treatment. Appellant was serving a prison sentence for his convictions of attempted child kidnapping and kidnapping. Because he was convicted of attempted child kidnapping Appellant was considered a sex offender under the sex offender registration statute. Further, Appellant admitted in his presentence report that he had sexual intercourse with a

fifteen-year-old. Appellant filed a petition for extraordinary relief alleging that the Parole Board had violated his due process rights by conditioning his parole on completion of sex offender treatment even though he had not committed a sex offense. Summary judgment was granted for the Parole Board. The Supreme Court affirmed, holding that the Parole Board owed Appellant no additional process before it considered unconnected sex offenses in its decision to require Appellant to undergo sex offender treatment.

Washington v. Escalante

Court: Washington Supreme Court
Docket: 97268-1
Opinion Date: April 23, 2020
Judge: Steven González
Areas of Law: Constitutional Law, Criminal Law

Alejandro Escalante was detained for hours in a secured area at a border crossing and, the State conceded, interrogated by federal agents without Miranda warnings. Statements he made during that interrogation were used by the State to convict him of drug possession. While a traveler briefly detained and questioned at the border was typically not "in custody" for Miranda purposes, "the government's power to detain and question people at the border without implicating Miranda has limits." Here, the Washington Supreme Court determined those limits were reached. "This border detention created the type of inherently coercive environment that demands Miranda warnings to ensure an individual's choice to speak is the product of free will." The Supreme Court held that Escalante was in custody when he was interrogated and reversed.

Washington v. Haggard

Court: Washington Supreme Court
Docket: 97375-0
Opinion Date: April 23, 2020

Judge: Barbara Madsen
Areas of Law: Constitutional Law, Criminal Law

A class C felony "washes out" and is omitted from a defendant's offender score as long as he or she is not convicted of any crime within five years of the last date of release from confinement. David Haggard was convicted of a misdemeanor offense within this five-year period, which was dismissed pursuant to RCW 3.66.067. When Haggard later pleaded guilty to burglary and arson, the trial court included prior class C felonies in his criminal history, finding that the dismissed misdemeanor conviction interrupted the washout period for those offenses. Haggard contended on appeal this was error. The Washington Supreme Court determined that because a dismissed conviction constituted a "conviction" under the Sentencing Reform Act of 1981 (SRA), and misdemeanor dismissal and vacation were distinct processes, so Haggard's offender score was properly calculated.

State v. Taylor

Court: Supreme Court of Appeals of West Virginia
Docket: 18-0502
Opinion Date: April 21, 2020
Judge: Walker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court giving Petitioner credit for twelve days of time served toward the sentence he received for his felony conviction although Petitioner spent additional time in confinement for other charges that were dismissed in the universal plea agreement, holding that to grant Petitioner additional credit for time served would do little more than reward Petitioner for habitual criminal behavior. Petitioner was charged with several crimes and agreed to resolve the pending charges against him in a universal plea agreement. Under the terms of the agreement, Petitioner agreed to plea guilty to the charge of felony carrying a concealed firearm by a prohibited person. In exchange, the State agreed to drop the remaining charges. After he was sentenced, Petitioner argued that, in addition to the twelve days of credit for time served he was granted, he was constitutionally entitled to credit for time served

while he was incarcerated for charges that were resolved in the universal plea agreement. The Supreme Court affirmed, holding that Petitioner's circumstances implicated neither double jeopardy nor equal protection of the law such that additional credit for time served was constitutionally mandated.

State v. Harrison

Court: Wisconsin Supreme Court
Dockets: 2017AP002441-CR, 2017AP002440-CR
Opinion Date: April 17, 2020
Judge: Patience D. Roggensack
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the decision of the court of appeals reversing an order of the circuit court that granted sentence credit to Defendant, holding that the court of appeals correctly found that Defendant was not entitled to sentence credit but erred by advancing the commencement of Defendant's terms of extended supervision for Defendant's 2007 and 2008 cases. Specifically, the Court held (1) Defendant was not entitled to sentence credit under Wis. Stat. 973.155(1)(a) because the days he spent in custody for which he sought sentence credit were not in connection with the courses of conduct for which those sentences were imposed; and (2) the court of appeals erred by advancing the commencement of Defendant's terms of extended supervision for his 2007 and 2008 cases to the date they would have begun but for Defendant's confinement for unrelated convictions that were later set aside, holding that whether to employ advancement is a public policy decision best left to the legislature.

Criminal Law Opinions

Ramos v. Louisiana

Court: US Supreme Court
Docket: 18-5924
Opinion Date: April 20, 2020
Judge: Neil M. Gorsuch
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 48 states and in federal court, a single juror's vote to acquit is enough to

prevent a conviction; Louisiana and Oregon punish people based on 10-to-2 verdicts. Ramos was convicted in a Louisiana court by a 10-to-2 jury verdict and was sentenced to life without parole. The Supreme Court reversed. The Sixth Amendment right to a jury trial, as incorporated against the states by the Fourteenth Amendment, requires a unanimous verdict to convict a defendant of a serious offense. Juror unanimity is a vital common law right. The Court rejected an "invitation" to "perform a cost-benefit analysis on the historic features of common law jury trials and to conclude that unanimity does not make the cut." In overturning its 1972 "Apodaca" decision, the Court stated that the reasoning, in that case, was "gravely mistaken" and "sits uneasily with 120 years of preceding case law." The fact that Louisiana and Oregon may need to retry defendants convicted of felonies by non-unanimous verdicts whose cases are still pending on direct appeal "will surely impose a cost, but new rules of criminal procedure usually do."

United States v. Diaz-Rivera

Court: US Court of Appeals for the First Circuit
Docket: 18-1461
Opinion Date: April 20, 2020
Judge: Torruella
Areas of Law: Criminal Law

The First Circuit affirmed Defendant's upwardly variant sentence for one count of possession with intent to distribute cocaine and one count of using a firearm during and in relation to a drug-trafficking crime, holding that the sentence was neither procedurally nor substantively unreasonable. Pursuant to a plea agreement, Defendant pled guilty to drug-related crimes. After a sentencing hearing, the district court sentenced Defendant to an upwardly variant sentence of 180 months of imprisonment, thus declining to impose the government's requested sentence. On appeal, Defendant challenged both the procedural and substantive reasonableness of his sentence. The First Circuit affirmed, holding that the 180-month sentence was neither procedurally nor substantively unreasonable.

United States v. Cotto

Court: US Court of Appeals for the Second Circuit
Docket: 18-2970
Opinion Date: April 20, 2020
Judge: Leval
Areas of Law: Criminal Law

A conviction for retaliating against a witness in violation of 18 U.S.C. 1513 does not require that the Government prove that defendant had knowledge of the federal nature of the proceeding. The Second Circuit rejected defendant's arguments to the contrary and affirmed his conviction for retaliating against a witness. The court remanded for revision of the provision of the sentence relating to the substance abuse treatment condition of supervised release; instructed the district court to consider on remand whether the court's forthcoming order in United States v. Traficante, No. 18-1962 (2d Cir., submitted Oct. 25, 2019) requires modification of the risk notification provision of supervised release; and granted the parties leave to reinstate this appeal to permit review of the district court's decision on remand as to the risk notification provision.

United States v. Rosa

Court: US Court of Appeals for the Second Circuit
Docket: 17-2004
Opinion Date: April 17, 2020
Judge: Nardini
Areas of Law: Criminal Law

Where a district court offers no explanation for its sentence, and where neither the adopted presentence report nor the statement of reasons adequately demonstrates the court's reasoning, the court has committed plain error in violation of 18 U.S.C. 3553(c). The Second Circuit vacated defendant's sentence for conspiracy to commit wire fraud and aggravated identity theft. The court held that the district court failed to state its reasons for sentencing defendant as required under section 3553(c); the error is clear or obvious; and the error affected defendant's substantial rights. Accordingly, the court remanded for resentencing.

Fogle v. Sokol

Court: US Court of Appeals for the Third Circuit
Docket: 19-1066
Opinion Date: April 21, 2020
Judge: Matey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

In 1976, the body of 15-year-old “Kathy” was found near her Indiana County, Pennsylvania home. Kathy’s death involved a brutal assault, rape, and a gunshot to the head. Kathy's sisters, ages nine and 12, stated that she had gotten into a car with a man with blue eyes, black hair that came below his ears and curled at the ends, sideburns, heavy eyebrows, and a heavy mustache. Fogle had “straight reddish-blonde hair that dropped down his back and a matching, full beard that reached his waist.” After three years, Fogle became a suspect because a psychiatric patient described seeing Kathy get in a car with Fogle and his brother. The story was largely inconsistent with statements by Kathy’s sisters. Jailhouse informants were recruited and counseled by law enforcement with promises of leniency. The prosecutors “either knew about, encouraged, or permitted” this strategy. A jury found Fogle guilty of second-degree murder. In 2015, Fogle obtained DNA evidence excluding both himself and his brother as the source of semen collected from Kathy. His conviction was vacated. The Commonwealth declined to pursue new charges, describing the case as lacking “prosecutorial merit.” Fogle, having spent three decades in prison, sued the prosecutors and Indiana County under 42 U.S.C. 1983. The Third Circuit affirmed the denial of their motions to dismiss based on absolute immunity. Only truly prosecutorial functions, not investigative conduct, justify complete protection from suit. Fogle’s complaint alleges actions that fall outside the narrow doctrine of absolute immunity.

James v. New Jersey State Police

Court: US Court of Appeals for the Third Circuit

Docket: 18-1432
Opinion Date: April 21, 2020
Judge: Porter
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Stephens called 911 and reported that Gibbons hit her and had a gun in his truck. The police responded. Stephens obtained a temporary restraining order, prohibiting Gibbons from possessing firearms and from returning to Stephens's house. The next day, Gibbons went to Stephens's house. Stephens was talking on the phone; the friend called the police. Gibbons left Stephens's house. Trooper Conza arrived. Stephens stated that Gibbons had waved a gun throughout their argument. Conza told Stephens to go to the police barracks and reported over the radio that Gibbons had brandished a firearm. Conza, with Troopers Bartelt and Korejko, visited the nearby home of Gibbons's mother, James. James stated that she did not know where Gibbons was and that he might be off his schizophrenia medication. While driving to the barracks, Stephens saw Gibbons walking alongside the road and called 911. The Troopers responded. Bartelt parked his car and, exiting, observed that Gibbons was pointing a gun at his own head. Bartelt drew his weapon, stood behind his car door, and twice told Gibbons to drop his weapon. Gibbons did not comply. Bartelt shot Gibbons twice within seconds of stopping his car. Gibbons died that night. In James' suit under 42 U.S.C. 1983, the Third Circuit held that Bartelt is entitled to qualified immunity because he did not violate Gibbons's clearly established rights. Bartelt's pre-standoff knowledge of Gibbons differs from that of officers involved in cited cases. Bartelt could reasonably conclude that Gibbons posed a threat to others.

Bazemore v. Best Buy

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-2196
Opinion Date: April 21, 2020
Judge: Quattlebaum
Areas of Law: Criminal Law

Plaintiff filed suit against her employer, Best Buy, claiming that she was harassed because of her race and gender and subjected to a hostile work

environment in violation of Title VII of the Civil Rights Act of 1964. Plaintiff's complaint stemmed from an incident where a coworker made a racist and sexually charged joke to a small group of coworkers that included plaintiff. The Fourth Circuit affirmed the district court's motion to dismiss and held that, in the case of allegedly harassing comments by a co-worker, an employee must allege plausible facts that the employer knew, or should have known, about the harassment and failed to take action reasonably calculated to stop it. Because plaintiff failed to do this, the court affirmed the district court's judgment. In this case, the coworker's conduct was not imputable to Best Buy where Best Buy took steps that were not only reasonably calculated to end such behavior, but that it did in fact end it.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Akande

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-6833
Opinion Date: April 20, 2020
Judge: Diana Jane Gribbon Motz
Areas of Law: Criminal Law

After defendant moved under 28 U.S.C. 2255 to vacate his conviction based on the ineffective assistance of counsel, the district court denied the motion. The Fourth Circuit granted a certificate of appealability and reversed the district court's judgment. The court held that, given counsel's specific misadvice regarding defendant's rights to preserve his appellate rights, on which defendant understandably relied, the district court's general admonishments did not amount to the careful explanation that addresses the particular issue necessary to cure the error. In this case, the plea colloquy did not correct counsel's erroneous advice and the error prejudiced defendant. Accordingly, the court remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Chambers

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-7104

Opinion Date: April 23, 2020
Judge: Floyd
Areas of Law: Criminal Law

After defendant was erroneously sentenced as a career offender, he moved to reduce his sentence to time served under the First Step Act. The district court denied defendant's motion to reduce his custodial sentence, though it granted the motion as to his supervised release term. The Fourth Circuit held that the First Step Act does not constrain courts from recognizing Guidelines errors. The court explained that First Step Act motions fall under 18 U.S.C. 3582(c)(1)(B), a distinct exception to finality, and that section 404(b) of the First Step Act expressly allows a court to impose a reduced sentence in order to give retroactive effect to sections 2 and 3 of the Fair Sentencing Act. Furthermore, 18 U.S.C. 3553(a) sentencing factors apply in the section 404(b) resentencing context, and the resentencing court has discretion within the section 404(b) framework to vary from the Guidelines and, in doing so, to consider movants' post-sentencing conduct. In this case, the district court seemingly believed that it could not vary from the Guidelines range to reflect post-sentencing information. Therefore, the court vacated the district court's sentencing order. Finally, the court held that any Guidelines error deemed retroactive, such as the error in this case, must be corrected in a First Step Act resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Ferebee

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4266
Opinion Date: April 22, 2020
Judge: Traxler
Areas of Law: Criminal Law

The Fourth Circuit affirmed the denial of defendant's motion to suppress evidence recovered from a backpack, and the district court's conclusion that defendant abandoned the backpack and any legitimate expectation of privacy in its contents. The court rejected defendant's claim that the collective-knowledge doctrine has any bearing on the propriety of the district court's conclusion that defendant abandoned the backpack. The court also held that the district court is not precluded from finding abandonment in

cases where the defendant, as here, has physical possession of the property he has disavowed. In this case, the record supported the district court's conclusion that defendant clearly and unequivocally disavowed ownership of the backpack. Even if the district court erred by finding that defendant abandoned the backpack, reversal would not be required because the search of the backpack was a proper search incident to arrest for which no warrant was required under the facts of this case.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Nance

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4585
Opinion Date: April 21, 2020
Judge: Pamela Harris
Areas of Law: Criminal Law

The Fourth Circuit affirmed defendant's above-Guidelines sentence imposed after he pleaded guilty to two federal drug- and firearm-related offenses. The court held that defendant's sentence was not procedurally unreasonable where the district court took into account defendant's extensive criminal history; his pattern of reoffending upon release; his disciplinary infractions in custody and inability to comply with the terms of his release; and the fact that the offenses of conviction occurred over the course of days, in which he was arrested once, released, and then arrested again just days later. The court also held that defendant's sentence was substantively reasonable where the district court conducted a thorough, individualized assessment of defendant and his offense conduct in light of the 18 U.S.C. 3553(a) factors, and did not abuse its discretion in formulating the sentence.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Johnson

Court: US Court of Appeals for the Fifth Circuit
Docket: 17-60852
Opinion Date: April 21, 2020

Judge: Priscilla R. Owen
Areas of Law: Criminal Law

The Fifth Circuit vacated defendant's sentence imposed after he pleaded guilty to violating 18 U.S.C. 922(g) and 924(e) by knowingly possessing a firearm after he had been convicted of a misdemeanor crime of domestic violence. The court held that the district court committing plain error by violating Federal Rule of Criminal Procedure 32 when it relied on factual allegations in the confidential sentencing recommendation that were not in the presentence report and that were not disclosed by defendant. The court explained that the use of undisclosed facts to justify an above-guidelines sentence seriously affects the fairness, integrity, and public reputation of judicial proceedings. Therefore, the court remanded for resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. McGinnis

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-10197
Opinion Date: April 21, 2020
Judge: Stuart Kyle Duncan
Areas of Law: Criminal Law

18 U.S.C. 922(g)(8), which prohibits individuals subject to certain domestic violence protective orders from possessing firearms or ammunition for any purpose, is facially constitutional under the Fifth Circuit's two-step NRA framework. Even assuming arguendo that the conduct at issue -- the keeping and possessing of firearms by individuals subject to domestic protective orders -- falls within the Second Amendment right, defendant's facial challenge fails. The court applied intermediate scrutiny and held that section 922(g)(8) is reasonably adapted to the government interest of reducing domestic gun abuse. The court also held that if the commonly understood definitions of terms in the protective order include acts involving "physical force," the protective order is sufficient to support a conviction under section 922(g)(8)(C)(ii). In this case, the jury plausibly found that the order satisfied the statute and the court declined to reverse defendant's conviction on this basis. However, the court remanded for the limited purpose of conforming defendant's written judgment to the district court's

oral pronouncement.

Valentine v. Collier

Court: US Court of Appeals for the Fifth Circuit
Docket: 20-20207
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law, Government & Administrative Law, Health Law

Plaintiffs filed suit alleging that TDCJ's adoption and implementation of measures guided by changing CDC recommendations in regards to the COVID-19 pandemic do not go far enough. Plaintiffs filed a class action alleging violations of the Eighth Amendment's prohibition against cruel and unusual punishment, and the Americans with Disabilities Act, seeking a preliminary injunction. The Fifth Circuit granted TDCJ's motion to stay the district court's preliminary injunction, which regulates the cleaning intervals for common areas, the types of bleach-based disinfectants the prison must use, the alcohol content of hand sanitizer that inmates must receive, mask requirements for inmates, and inmates' access to tissues (amongst many other things). The court held that TDCJ is likely to prevail on the merits of its appeal because: (1) after accounting for the protective measures TDCJ has taken, plaintiffs have not shown a "substantial risk of serious harm" that amounts to "cruel and unusual punishment"; and (2) the district court committed legal error in its application of Farmer v. Brennan, by treating inadequate measures as dispositive of defendants' mental state. In this case, even assuming that there is a substantial risk of serious harm, plaintiffs lack evidence of defendants' subjective deliberate indifference to that harm. The court also held that TDCJ has shown that it will be irreparably injured absent a stay, and that the balance of the harms and the public interest favor a stay. Finally, the court held that plaintiffs have not exhausted their administrative remedies as required in the Prison Litigation Reform Act (PLRA), and the district court's injunction goes well beyond the limits of what the PLRA would allow even if plaintiffs had properly exhausted their claims.

Read Opinion Are you a lawyer? **Annotate this case**.

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-2469
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

Dowl pleaded guilty to presenting false tax returns, 18 U.S.C. 286. He received a sentence of 30 months of imprisonment plus 24 months of supervised release. On supervised release, Dowl was charged with four new state crimes; failing to inform his probation officer that he had police contact; communicating with his co-defendant despite instructions to the contrary; failing to make payments on his restitution, fine, or special assessment; and failing to get a job. At a hearing, the court reviewed the evidence and allowed Dowl to tell his side of the story. The court deferred judgment on three of the four new state criminal law violations and dismissed the fourth and found Dowl gainfully employed. Dowl had failed to notify his probation officer about police contact, impermissibly communicated with his co-defendant, and did not pay his fines. After considering the 18 U.S.C. 3553(a) sentencing factors, the court returned Dowl to prison for 11 months, giving Dowl and his attorney the opportunity to raise any objections. Dowl had none. The Sixth Circuit affirmed, rejecting Dowl's argument that the court committed reversible error by not directly addressing him to solicit an allocution. The court employed the "plain error" standard because Dowl did not raise any objection during his revocation hearing.

United States v. Fowler

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-3071, 19-3070
Opinion Date: April 21, 2020
Judge: Donald
Areas of Law: Criminal Law

In 2018, Fowler pled guilty to possession of child pornography and violations of the conditions of his supervised release from a previous conviction for the same. In addition to possessing child pornography, Fowler had failed drug testing, had threatened his parole officer, and had tried to harass his girlfriend to recant her testimony. The district court ordered Fowler to pay a $5,000 special assessment for possession of child pornography under the Justice for Victims of Trafficking Act, 18 U.S.C. 3014. The court also varied upward and sentenced Fowler to the maximum statutory penalty for violating the conditions of his supervised release, imposing a 120-month sentence for possessing child pornography and a consecutive 36-month sentence for violating the terms of his supervised release. The Sixth Circuit vacated as to the assessment and remanded for a determination of indigency. The district court committed plain error by failing to address Fowler's ability to pay; the parties did not contemplate the $5,000 special assessment as a part of the waiver provision in the plea agreement. The court affirmed the sentence. The district court did not consider an impermissible factor (whether Fowler had actually touched a child) and Fowler had no other challenge to the reasonableness of his sentence,

United States v. Sumlin

Court: US Court of Appeals for the Sixth Circuit
Docket: 18-3819
Opinion Date: April 21, 2020
Judge: Bush
Areas of Law: Criminal Law

Sumlin was convicted of the distribution of drugs that caused the 2015 death of Carrie Dobbins, 21 U.S.C. 841(a)(1) and (b)(1)(C), which carries enhanced penalty provisions. The Sixth Circuit affirmed his convictions and his sentence to life in prison. The district court properly denied Sumlin's suppression motion, given that the affidavit established a sufficient nexus between his drug trafficking activity and residence that was searched. The court properly admitted testimony by the victim's sister, Kelly, who was Sumlin's former girlfriend and had purchased drugs from him. Kelly's testimony about Sumlin's drug-trafficking and that Sumlin was with Carrie on

the day of her overdose was intrinsic proof that was relevant for providing background information and contextualizing the government's case against Sumlin. Sufficient evidence supported the jury's verdict that Sumlin distributed the drugs that caused Carrie's death.

United States v. Vance

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5160
Opinion Date: April 17, 2020
Judge: Bush
Areas of Law: Criminal Law, White Collar Crime

The Spriggs' bank account was established to receive social security checks. The Spriggs' great-grandson, Vance, filled out an application in Mr. Spriggs's name for a debit card to draw on the checking account. Mr. Spriggs had never used a debit card. The Spriggses did not authorize Vance to do so. Bank cameras photographed Vance using the card to withdraw cash. Vance also used the card for personal expenses. At another bank, Vance used Mr. Spriggs's social security number to establish an account and obtain a $15,000 cash advance. Vance made other, unsuccessful loan applications. Upon being notified by the banks about suspicious activities involving his identity, Mr. Spriggs filed a police report. The police arrested Vance. While searching Vance's car, the police located a large stash of personal and financial documents belonging to the Spriggses, including bank statements, tax return forms, property-tax bills, and a car title. The Sixth Circuit affirmed Vance's convictions for access-device fraud, 18 U.S.C. 1029(a)(5), and two counts of aggravated identity theft, 18 U.S.C. 1028A(a)(1), and his 65-month sentence. The court rejected arguments that the district court failed to make adequate findings of fact after the bench trial, improperly denied a motion for judgment of acquittal, and failed to correctly calculate the loss amount connected to Vance's charges under Sentencing Guidelines 2B1.1.

Winburn v. Nagy

Court: US Court of Appeals for the Sixth Circuit
Dockets: 19-2399, 19-2398
Opinion Date: April 23, 2020
Judge: Jeffrey S. Sutton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Winburn represented himself at his trial for armed robbery, home invasion, and conspiracy. Based on Winburn's disruptive behavior, the judge removed him from the courtroom and revoked Winburn's permission to represent himself, then granted a competency evaluation and a mistrial. While Winburn awaited his second trial, the judge permitted Winburn's stand-by attorney to withdraw because Winburn had sued her and enjoined Winburn from filing complaints or grievances against his new attorney, except to discharge her. Although represented by a new attorney, Winburn moved pro se to dismiss his charges on double jeopardy grounds. The trial judge denied the motion because Winburn's attorney had not filed it. Winburn filed a habeas petition under 28 U.S.C. 2241 challenging his retrial and another section 2241 petition challenging the injunction. The district judges denied both and declined to issue certificates of appealability. Winburn filed a notice of appeal for one petition and sought a certificate of appealability for the other. The Sixth Circuit held that state pretrial detainees proceeding under section 2241 may not appeal without certificates of appealability and granted Winburn a certificate on the injunction claim. A reasonable jurist could conclude that the unusual order was constitutionally infirm. The court denied relief with respect to double jeopardy. Winburn failed to exhaust his state-court remedies by a motion to dismiss.

Lund v. City of Rockford

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1945
Opinion Date: April 20, 2020
Judge: ROVNER
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Lund, a reporter for the Rockford Scanner, heard, by police scanner, of multiple traffic stops in Midtown. He did not have a driver's license, so he

rode a motorized bicycle to Midtown to take photographs. He suspected a prostitution sting operation. An officer noticed Lund and radioed the team. Officers Welsh and Campbell knew of Lund's previous anti-police speech. They directed Lund to “move on.” Lund asked if he was breaking any laws. Campbell informed him that he was not, but that his continued presence would constitute obstruction of a police detail and result in arrest. Lund started his bicycle and called out, loudly, “goodbye officers.” Concerned that Lund might post pictures on social media while the sting operation was ongoing and create a danger for unarmed undercover officers, the officers followed Lund and arrested him for driving the wrong way on a one-way street, operating a vehicle without insurance, obstructing a police officer, felony aggravated driving on a revoked license, and operating a motor vehicle without a valid drivers’ license. News stories listed Lund’s name as an arrestee in the prostitution sting. The charges against Lund were dismissed. Lund sued the officers and the city under 42 U.S.C. 1983. The Seventh Circuit affirmed summary judgment for the defendants on First Amendment retaliation and malicious prosecution under Illinois law, citing the Supreme Court’s intervening "Nieves" (2019) holding, that, in most cases, probable cause to arrest defeats a claim of retaliatory arrest. There was probable cause to arrest Lund.

United States v. Perez

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3156
Opinion Date: April 23, 2020
Judge: KANNE
Areas of Law: Criminal Law

Beloit officers facilitated a recorded controlled buy of heroin from Perez, a suspected high-level drug dealer. Perez sold 98 grams of heroin to an informant. Based on that transaction alone, Perez pled guilty to distributing heroin. At Perez’s sentencing hearing, the judge expressed concern that the guidelines range of 33–41 months’ imprisonment did not reflect the full scope of his drug trafficking. The PSR described conduct that suggested that Perez was responsible for distributing large quantities of heroin, methamphetamine, and cocaine. The judge continued the hearing, directing

the government to file a memorandum, detailing which offense conduct it could support by a preponderance of the evidence. When the hearing reconvened, the government presented witness testimony that elaborated on conduct described in the PSR, including drug ledgers, Perez's post-arrest conversation with his girlfriend, large sums of cash, a money counter, cell phones, and Perez's passport. The judge calculated a higher guidelines range and imposed a 121-month sentence. The Seventh Circuit affirmed, rejecting an argument that the sentencing judge should have recused himself. Perez has not demonstrated that a reasonable observer would have questioned the judge's impartiality nor did he allege that the judge was biased based on events outside the proceedings. The judge's continuance was laudable, not prejudicial.

Jackson v. United States

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1131
Opinion Date: April 20, 2020
Judge: Lavenski R. Smith
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's denial of a 28 U.S.C. 2255 motion to vacate, set aside, or correct petitioner's sentence. The court held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that counsel was constitutionally ineffective for failing to conduct adequate pretrial investigations. In this case, petitioner failed to identify any specific witnesses or evidence that counsel failed to uncover. Furthermore, petitioner failed to show that counsel's representation prejudiced his case. The court also held that the district court did not err in denying an evidentiary hearing as to petitioner's claim that his new counsel was ineffective for failing to subpoena witnesses, for convincing petitioner not to testify, for failing to object to or appeal the district court's answer to a jury question, and for failing to object to the district court's designation of petitioner as a career offender.

United States v. Bolman

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2759
Opinion Date: April 21, 2020
Judge: Jane Louise Kelly
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for involuntary manslaughter after he struck and killed his nephew with his truck. The court held that the evidence was sufficient to support the conviction, because a reasonable jury could find defendant grossly negligent beyond a reasonable doubt. The court also held that the district court did not plainly err by failing to instruct the jury that actual knowledge is an essential element of the offense that is separate from gross negligence, because the instructions, viewed as a whole, accurately and adequately defined the essential elements of the offense.

United States v. Boyd

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3528
Opinion Date: April 17, 2020
Judge: Kobes
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's sentence imposed after he pleaded guilty to being a felon in possession of a firearm. The court held that the facts underlying defendant's prior arrests were part of his history and characteristics under 18 U.S.C. 3553(a), and thus the district court could consider defendant's arrest records and the circumstances of those arrests. The court explained that the arrests were listed in the presentence report and gleaned from prior police reports. Furthermore, specific facts underlying the arrests may be considered for an upward departure and should be considered fair game for a variance where defendant did not object to them. The court also concluded that there is nothing here that suggested a corrected misstatement improperly influenced the district court's sentencing decision. Finally, the court held that the upward variance was not

unreasonable in consideration of defendant's previous assaults, coupled with the facts underlying his arrest in this case.

United States v. Gonzalez-Esparsa

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1477
Opinion Date: April 22, 2020
Judge: Grasz
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for unlawful use of an identification document and misuse of a social security number. The court held that the evidence was sufficient to support defendant's convictions where a reasonable juror could conclude that defendant knew the permanent resident card bearing his name and photograph had been forged, counterfeited, falsely made, or unlawfully obtained when he used it to secure employment. Furthermore, a reasonable juror could conclude that defendant made the false representation regarding his purported social security number in order to deceive Midwest Concrete in order to obtain a job with the company.

United States v. Sanchez-Velasco

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3568
Opinion Date: April 17, 2020
Judge: James B. Loken
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit affirmed the district court's denial of defendant's motion to suppress his responses to an ICE agent's two questions at the Treasurer's Office, because he was not in custody at the time of questioning. Although defendant was in custody at the ICE facility, the court held that an agent's questions were not custodial interrogation because the agent could not have known his questions were likely to elicit incriminating information regarding

the two criminal charges that were eventually brought against defendant. The court noted that the Attorney General's regulations carefully distinguish between the warrantless arrest of an alien for a criminal violation of the immigration laws, and what is called the "administrative arrest" of an alien who is reasonably believed to be illegally present in the United States. The court agreed with the district court that the agent's questioning was a request for routine information necessary for basic identification purposes that is not interrogation under Miranda, even if the information turns out to be incriminating.

Anthony v. TRAX International Corp.

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-15662
Opinion Date: April 17, 2020
Judge: Kim McLane Wardlaw
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's grant of summary judgment to TRAX in a disability discrimination action brought by plaintiff under Title I of the Americans with Disabilities Act (ADA). After TRAX terminated plaintiff from her position as a Technical Writer allegedly due to an inability or unwillingness to accommodate her disability, TRAX discovered during the course of litigation that plaintiff lacked the requisite bachelor's degree for her position. The panel held that, although McKennon v. Nashville Banner Publishing Co., 513 U.S. 352 (1995), held that after-acquired evidence cannot establish a superseding, non-discriminatory justification for an employer's challenged actions, after-acquired evidence remains available for other purposes, including to show that an individual is not qualified under the ADA. Because plaintiff did not satisfy one of the prerequisites for her position, she is not "otherwise qualified," and TRAX was not obligated to engage in the interactive process.

City of Almaty v. Khrapunov

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-56451
Opinion Date: April 22, 2020
Judge: Marbley
Areas of Law: Criminal Law, International Law, White Collar Crime

The City of Almaty, in Kazakhstan, filed suit against defendant and his family under the Racketeer Influenced and Corrupt Organizations Act (RICO), alleging that they engaged in a scheme to defraud the city of millions of dollars. The City claimed that it was forced to spend money and resources in the United States to trace where its money was laundered. The district court dismissed the City's claim on the basis that it failed to state a domestic injury pursuant to the Supreme Court's recent decision in RJR Nabisco, Inc. v. European Community, 136 S. Ct. 2090 (2016). The Ninth Circuit held that the City failed to state any cognizable injury other than the foreign theft of its funds, and its voluntary expenditures were not proximately caused by defendants' acts of money laundering. In this case, the City's expenditure of funds to trace its allegedly stolen funds is a consequential damage of the initial theft suffered in Kazakhstan and is not causally connected to the predicate act of money laundering.

United States v. Baldon

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10411
Opinion Date: April 21, 2020
Judge: Bennett
Areas of Law: Criminal Law

After defendant pleaded guilty to possession with intent to distribute a controlled substance, the district court sentenced him to 184 months in prison. The Ninth Circuit held that defendant's prior convictions for carjacking under section 215 of the California Penal Code are not categorical crimes of violence under USSG 4A1.1(e). Therefore, the district court incorrectly calculated defendant's criminal history by improperly including two points for his prior carjacking convictions. However, the panel held that the district court did not err in finding that defendant possessed a

firearm under USSG 2D1.1(b)(1). Accordingly, the panel affirmed in part, vacated in part, and remanded for resentencing.

United States v. Manzanares

Court: US Court of Appeals for the Tenth Circuit
Docket: 18-2010
Opinion Date: April 17, 2020
Judge: Mary Beck Briscoe
Areas of Law: Constitutional Law, Criminal Law

Defendant-Appellant Archie Manzanares appealed a district court's denial of his 28 U.S.C. 2255 motion challenging his sentence under the Armed Career Criminal Act (ACCA). Under the ACCA, an offense qualified as a violent felony by satisfying at least one of three definitions, which have come to be known as the Elements Clause, the Enumerated Clause, and the Residual Clause. Manzanares asserted that without the Residual Clause, his underlying New Mexico convictions (armed robbery, aggravated assault with a deadly weapon, and aggravated battery) no longer qualified

as violent felonies. The district court denied the motion, concluding that all three underlying convictions satisfied the Elements Clause. Manzanares appealed the classification of the armed robbery conviction as a violent felony to the Tenth Circuit, and sought to expand the certificate of appealability to allow him to appeal the decision regarding the aggravated assault with a deadly weapon and aggravated battery convictions. After review, the Tenth Circuit affirmed the district court's denial of Manzanares's 2255 motion, and denied his motion to expand the COA.

United States v. Delaney

Court: US Court of Appeals for the District of Columbia Circuit
Docket: 18-3093
Opinion Date: April 17, 2020
Judge: David S. Tatel
Areas of Law: Criminal Law

The DC Circuit vacated the district court's denial of defendant's motion to suppress evidence. The court held that officers violated the Fourth Amendment when they seized defendant because they lacked reasonable suspicion to justify the stop. In this case, a seizure occurred when the officers pulled into the parking lot, partially blocked defendant's vehicle, and activated their take-down light. The court held that any inference of suspicion that the officers drew from encountering defendant soon after hearing the nearby gunshots were undermined by the government's failure to identify specific and articulable facts supporting the officers' estimation of where the various shots came from. Accordingly, the court remanded for further proceedings.

Antenor v. Alaska, Department of Corrections

Court: Alaska Supreme Court
Docket: S-17005
Opinion Date: April 17, 2020
Judge: Carney

Areas of Law: Civil Procedure, Criminal Law, Government & Administrative Law

Several Alaska Department of Corrections inmates challenged the DOC's policy to charge for local telephone calls, arguing the rates they and call recipients had to pay for calls violated their constitutional right to rehabilitation, their statutory right to reasonable telephone access, and DOC's contractual obligations under a prior settlement and consent decree. In addition, one of the prisoners challenged DOC officers' decision to deny him access to a computer programming book he ordered from outside the prison. He contended that DOC placed a content-specific restriction on the educational materials and publications prisoners were allowed, violating the Alaska Constitution's free speech provisions as well as prisoners' right to reformation. Each of these challenges reached the Alaska Supreme Court after inmates exhausted the administrative process from prison. Inmates then appealed to the superior court, which denied relief. The Alaska Supreme Court determined the superior court record did not provide enough evidence for it to meaningfully determine the reasonableness of the rates charged inmates for local telephone calls; therefore the Court reversed denial of relief and remanded for further fact-finding by the trial court. The Court concluded that the facility's restrictions on programming-related books were rationally related to a legitimate interest, and because they did not infringe on the right to rehabilitation, it affirmed denial of a prisoner's motion to enforce his claimed right to a particular text about computer programming.

Berger v. Bryant

Court: Arkansas Supreme Court
Citation: 2020 Ark. 357
Opinion Date: April 23, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's petition to proceed in forma pauperis on a petition for writ of mandamus and a motion for declaratory judgment, holding that Appellant failed to state a colorable cause of action. In 1998, Appellant was convicted

of rape. In his petition for a writ of mandamus, Appellant asserted that he sought information pursuant to the Arkansas Freedom of Information Act regarding his rape conviction but received no response. The circuit court denied the petition. The Supreme Court affirmed, holding (1) even if Appellant had requested disclosable information, he would not be entitled to inspect it as an incarcerated person; and (2) Appellant did not demonstrate a legitimate claim given the facts presented and therefore failed to establish a colorable cause of action to support his request to proceed in forma pauperis.

Cave v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 356
Opinion Date: April 23, 2020
Judge: Josephine L. Hart

Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for writ of habeas corpus, holding that the circuit court did not err in denying the petition. Appellant was found guilty of two counts of delivery of a controlled substance and one count of maintaining a drug premises. In his habeas petition, Appellant argued that he was actually innocent because his arrest and conviction was based on the false testimony of a witness who had a lengthy criminal history. Appellant further argued that the writ should issue because he was not afforded effective assistance of counsel. The circuit court denied the petition. The Supreme Court affirmed, holding (1) Appellant's claims regarding the witness's credibility do not constitute a valid assertion that he was being unlawfully detained; and (2) Appellant did not actually connect an allegation of ineffective assistance of counsel to his allegation that he was unlawfully detained.

Chatmon v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 355
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Criminal Law

The Supreme Court denied Appellant's appeal from the order of the circuit court denying his petition to proceed in forma pauperis on the grounds that Appellant failed to state a colorable cause of action in a petition for writ of habeas corpus, holding that the circuit court did not abuse its discretion by denying Appellant's in forma pauperis petition. In his habeas petition, Appellant alleged that the trial court lacked jurisdiction in his criminal case. Before this case was submitted to the Supreme Court, Appellant filed two motions, including a "Judicial Notice of a Void Judgment" and a "Notice to the Court." The Supreme Court denied the motions, holding that neither motion was cognizable under the Court's rules. The Court then affirmed the Supreme Court's denial of Appellant's in forma pauperis petition, holding that the circuit court correctly found that Appellant did not assert a colorable

cause of action.

Siegel v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 359
Opinion Date: April 23, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from the circuit court's orders denying her motions to declare Ark. Code Ann. 5-62-106 (disposition of animal) and Ark. Code Ann. 5-62-111 (prevention of cruelty) unconstitutional and conditionally granting her motion for return of seized property, holding that there was no final, appealable order in this case. Appellant was convicted of thirty-one misdemeanor counts of cruelty to animals. The circuit court subsequently dismissed the charges on speedy-

trial grounds. The State appealed, and the Supreme Court dismissed the appeal on the grounds that it was not authorized. Appellant had filed motions seeking a declaration that sections 5-62-106 and -111 are unconstitutional and seeking the return of her seized property. The circuit court denied the constitutional claims and entered a conditional order granting Appellant's motion for return of seized property. Appellant appealed. The Supreme Court dismissed the appeal, holding that because the conditional order did not make specific findings as to the return of the property or as to damages and because it expressly left open the possibility of further proceedings, there was no final, appealable order in this case.

Thomas v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 354
Opinion Date: April 23, 2020
Judge: Josephine L. Hart
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Appellant's conviction of capital murder, holding that the evidence was sufficient to sustain the conviction and that the circuit court did not err in denying Appellant's motion to suppress tracking data generated by his cellphone. On appeal, Appellant argued that the trial court erred by denying his directed-verdict motion because the evidence supported the defense's theory of the case that he did not intend to shoot the victim. Further, Appellant argued that the court abused its discretion in denying his motion to suppress evidence obtained from the seizure of AT&T phone records. The Supreme Court disagreed, holding (1) the evidence was sufficient to support the capital murder conviction; and (2) the circuit court correctly denied the motion to suppress.

California v. Landowski

Court: California Courts of Appeal
Docket: C080210(Third Appellate District)

Opinion Date: April 23, 2020
Judge: Andrea Lynn Hoch
Areas of Law: Constitutional Law, Criminal Law

Defendant Michael Reyes, Jr., an active Norteno gang member (from the Broderick Boys subset), confronted a former Norteno gang member (from the Franklin Boys subset), "S.," about a physical altercation that occurred between S. and Reyes's stepfather over a debt. That earlier altercation had taken place in front of Reyes's autistic younger brother. Reyes pulled out a handgun and asked S. if he had a problem. S., who was riding his bicycle with his wife, "R.," when Reyes confronted him with the gun, stopped briefly, told Reyes to put the gun down if he wanted to fight, and then started to ride away. This angered Reyes, prompting him to fire six rounds at S. from behind. S. Was hit but survived. R. Was a short distance in front of S., but was not hit. Defendants Liberty Landowski and Lisa Humble were with Reyes at the time of the shooting and aided in his efforts to avoid being apprehended by law enforcement authorities. Reyes, Landowski, and Humble were tried together before the same jury. Reyes was convicted of one count of attempted murder (Count 1), two counts of assault with a semiautomatic firearm (Counts 2 and 4), one count of possession of a firearm by a convicted felon (Count 5), and one count of possession of ammunition by a convicted felon (Count 6). In addition to various firearm and other enhancements, the jury found Reyes committed the crimes for the benefit of, at the direction of, or in association with a criminal street gang with the specific intent to promote, further, or assist in criminal conduct by gang members. The jury convicted Landowski and Humble of being accessories to Reyes's criminal conduct (Count 9) and also found true gang enhancement allegations attached to that crime. Reyes challenged the sufficiency of the firearm evidence presented to support his conviction, and all defendants challenged the sufficiency of the evidence supporting their gang enhancements. The Court of Appeal determined Senate Bill 620 (2017-2018 Reg. Sess.) gave the trial court discretion to strike firearm enhancements in the interest of justice and applied retroactively; and Senate Bill 136 (2019-2020 Reg. Sess.) eliminated such enhancements, and also applied retroactively. To these issues, the Court remanded for the trial court's consideration. The Court affirmed the trial court in all other respects.

California v. May

Court: California Courts of Appeal
Docket: C084302(Third Appellate District)
Opinion Date: April 20, 2020
Judge: Ronald B. Robie
Areas of Law: Constitutional Law, Criminal Law

Defendant Raymond May was found guilty by jury of possessing an assault weapon and a machine gun based on his possession of a single AK-47 assault rifle while guarding a marijuana plantation. He was sentenced to probation, which included an electronic search condition. On appeal, defendant argued there was a lack of sufficient evidence corroborating his accomplice's testimony and demonstrating he knew of the firearm's illegal character. He further alleged the trial court erred in instructing the jury: that the accomplice instruction should have included language specifying that the accomplice testimony needed to prove more than defendant's mere presence or access to the firearm. Furthermore, defendant argued the electronic search condition imposed as part of his probation failed under the standards announced in California v. Lent, 15 Cal.3d 481 (1975). The Court of Appeal agreed defendant's electronic search condition should have been stricken, but otherwise affirmed.

California v. Perez

Court: California Courts of Appeal
Docket: E072260(Fourth Appellate District)
Opinion Date: April 20, 2020
Judge: Miller
Areas of Law: Constitutional Law, Criminal Law

In 2009, defendant-appellant Rudy Perez pled guilty to active gang participation under Penal Code section 186.22(a), and unlawful possession of a firearm under section 12025(b)(6). In 2010, defendant pled guilty to residential burglary under section 459, and active gang participation under section 186.22(a). In August of 2018, the State filed a new felony complaint, alleging one of the prior gang participation convictions as a strike prior. In

2018, defendant moved to vacate the two prior gang participation convictions based upon changes in the law that rendered them invalid. The trial court denied defendant's motion. In 2019, defendant asked for reconsideration, which was again denied. Thereafter, defendant filed a timely notice of appeal from the denial of his motion to vacate the convictions. The Court of Appeal found that defendant pled guilty to street terrorism under Penal Code section 186.22(a) in 2009 and 2010, and it was undisputed that while committing these offenses, defendant acted alone. However, subsequent to defendant's guilty pleas, in 2012, the California Supreme Court held that a defendant had to act in concert with a fellow gang member in order to be guilty of street terrorism. At that time, defendant could have filed a state habeas petition requesting relief, but failed to do so. "Defendants can lose remedies that are established by law when they fail to invoke such remedies in time." Section 1473.7 became effective in 2017. In defendant's motion filed in the trial court, defendant failed to state what new evidence was discovered, instead arguing that the trial court was allowed "to vacate a conviction where the defendant is innocent as a matter of law or where vacating the conviction is in the interest of justice, even though the defendant is no longer in custody or otherwise restrained by the conviction." The Court of Appeal concurred with the trial court's reason to deny relief, determining that "while the outcome in this case may be unfortunate for defendant, we are not here to rewrite legislation. The Legislature could amend section 1473.7 to address issues raised in this case. However, under the laws, as written, we must uphold the trial court's order."

In re S.R.

Court: California Courts of Appeal
Docket: B300214(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Bendix
Areas of Law: Criminal Law

Father appealed the juvenile court's dispositional ruling removing daughter from his custody, arguing that his mere possession of child pornography does not demonstrate that he poses a substantial risk of harm to his daughter. The Court of Appeal affirmed the order and held that there is

substantial evidence of risk of great harm to daughter—no matter how low the probability— that father will sexually abuse his daughter if he is provided unfettered access to her.

People v. Bell

Court: California Courts of Appeal
Docket: B288528(Second Appellate District)
Opinion Date: April 23, 2020
Judge: Stratton
Areas of Law: Criminal Law

Defendant was convicted of one count of attempted robbery, one count of second degree murder, and one count of hit and run driving. The jury found not true the allegation that a principal was armed in the commission of the attempted robbery. The trial court found true the allegations that defendant had served four prior prison terms within the meaning of Penal Code section 667.5, subdivision (b). Defendant raised 13 claims of error on appeal. The Court of Appeal held that the section 667.5, subdivision (b) enhancement terms must be stricken and the matter remanded to the trial court for resentencing. The court also held that defendant forfeited some of his substantive claims and other lack merit. Finally, the court held that, if there is instructional error, the errors are harmless under any standard of review. Accordingly, the court affirmed the judgment of conviction.

People v. Drayton

Court: California Courts of Appeal
Docket: H046928(Sixth Appellate District)
Opinion Date: April 17, 2020
Judge: Danner
Areas of Law: Criminal Law

In 1991, the Wards and their teenage daughter awoke and discovered four men, including Drayton, inside their house. Two were armed. One told the daughter he was going to rape her and placed a firearm inside her vagina.

Drayton told the man not to do it. Drayton had a gun and held Mrs. Ward down during the robbery. Two others shot and killed Mr. Ward. Drayton and the others left without seeking help for the Wards. Drayton did not shoot Mr. Ward or threaten to rape the daughter. Drayton surrendered the next day. Drayton's sole prior conviction was a misdemeanor; he had no reported history of violence. Drayton was sentenced to 29 years to life imprisonment. In 2019, Drayton sought resentencing under Penal Code 1170.95, declaring that he "was not a major participant ... or did not act with reckless indifference to human life." Senate Bill 1437, effective January 1, 2019, restricted the circumstances under which a person can be liable for felony murder and enacted Penal Code 1170.95, which allows an individual, previously convicted of felony murder, to petition to have his murder conviction vacated and to be resentenced. The court of appeal directed the trial court to hold a hearing under section 1170.95(d) and to accept the assertions in the petition as true unless facts in the record conclusively refute them as a matter of law. If, accepting the petitioner's assertions as true, he meets section 1170.95(a)'s requirements for relief, the court must issue an order to show cause. In assessing the prima facie showing, the trial court should not weigh evidence or make credibility determinations.

People v. Robinson

Court: California Courts of Appeal
Docket: B293746(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Wiley
Areas of Law: Criminal Law

After defendant penetrated an unconscious woman with his fingers, he challenged evidentiary rulings and requests a presentence conduct credit. The Court of Appeal held that the trial court properly excluded cumulative evidence about past times the woman was intoxicated at the relevant bar, and any error in allowing a drug recognition expert to testify about whether the woman was incapacitated was harmless. However, the court held that the trial court undercalculated defendant's presentence custody credit because he was not convicted of a violent felony under Penal Code section 2933.1, which would otherwise limit those credits. Accordingly, the court

directed the trial court to award defendant 104 days of presentence custody credit and to amend the abstract of judgment, affirming in all other respects.

People v. Torres

Court: California Courts of Appeal
Docket: B292551(Second Appellate District)
Opinion Date: April 20, 2020
Judge: Kenneth R. Yegan
Areas of Law: Criminal Law

Where, as here, the trial court factually finds that a self-represented defendant has engaged in an attempt to intimidate a witness, the constitutional right of self-representation can, in the exercise of the trial court's sound discretion, be revoked. The Court of Appeal affirmed defendant's conviction and sentence for two counts of battery on an ex-girlfriend. In this case, the trial court did not abuse its discretion in revoking defendant's pro se status after he asked his sister to contact the victim and have her say that she was coerced by the police detective to "press charges."

Colorado v. Lujan

Court: Colorado Supreme Court
Citation: 2020 CO 26
Opinion Date: April 20, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law

Abel Lujan was charged with first-degree murder for the death of his girlfriend after she was found beaten and strangled behind a friend’s house. At trial, two women testified for the State about Lujan’s prior violent behavior towards them. Prior to admitting this evidence, the trial court read a limiting instruction, telling the jury that it could only consider the evidence for the purposes of establishing Lujan’s motive, intent, or common plan. A copy of

this instruction was not given to the jury for deliberations; however, the jury did receive an instruction at the close of the evidence explaining that certain evidence could only be considered for the limited purposes for which it was admitted. While deliberating, the jury submitted a question seeking clarification about the limiting instruction. Over defense counsel's objection, the trial court cleared the courtroom of the public and parties, leaving only the judge, bailiff, and court reporter; the judge then brought in the jury and reread the limiting instruction that it had previously read twice in open court. The jury ultimately found Lujan guilty of second-degree murder. Lujan appealed, arguing that the court's actions when rereading the jury instruction constituted a courtroom closure that violated his Sixth Amendment right to a public trial. A division of the court of appeals agreed and reversed Lujan's conviction. The State argued on certiorari review that the Colorado Supreme Court adopt a triviality standard, under which a defendant's constitutional right to a public trial was not violated when the closure at issue was trivial. In so doing, the State argued that the brief courtroom closure here was trivial and therefore did not violate Lujan's public trial right. The Court concurred with the State, adopted the standard and reversed the appellate court's decision.

Archer v. State

Court: Florida Supreme Court
Docket: SC19-841
Opinion Date: April 23, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's successive motion to vacate his sentence of death under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying the Rule 3.851 motion. Appellant was convicted of first-degree murder, armed robbery, and grand theft. Appellant was sentenced to death for the murder. The Supreme Court affirmed the convictions but reversed Appellant's death sentence and remanded the case for a new penalty phase. After a new penalty phase, Appellant was again sentenced to death. In his successive Rule 3.851 motion, Appellant raised three claims. The circuit court denied

relief. The Supreme Court affirmed, holding that the circuit court (1) properly denied Appellant's claim that his death sentence violated the Sixth and Eighth Amendments in light of Hurst v. Florida, 136 S. Ct. 616 (2016), and Hurst v. State, 202 So. 3d 40 (Fla. 2016); (2) correctly denied Appellant's claim that his sentence violated the Eighth Amendment; and (3) did not err in denying Appellant's claim of newly discovered evidence.

Collins v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0158
Opinion Date: April 20, 2020
Judge: David E. Nahmias
Areas of Law: Constitutional Law, Criminal Law

Appellant Tommy Collins was convicted of felony murder in connection with the stabbing death of 14-year-old Rueben Hand. Friends gathered to watch the Peach Drop on New Year's Eve 2010; a disagreement ensued and Hand was stabbed near the Five Points MARTS station shortly after midnight. Appellant's only argument on appeal was that the trial court plainly erred when it gave the jury the State's requested instruction on "revenge for a prior wrong." Seeing no error, "much less plain error," the Georgia Supreme Court affirmed.

Heyward v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0399
Opinion Date: April 20, 2020
Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Larmell Heyward was convicted by jury of malice murder and possession of a firearm during the commission of a felony in connection with the 2007 shooting death of Ramon Rogers. Heyward argued on appeal of those convictions that the trial court erred in denying his request to charge the jury

on voluntary manslaughter. After review, the Georgia Supreme Court determined the trial court's refusal to give the charge was harmless, since, in the Court's estimation, there was no realistic probability that the jury would have accepted the "slight" evidence of voluntary manslaughter in the light of the strong evidence of malice murder.

Moore v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0344
Opinion Date: April 20, 2020
Judge: David E. Nahmias
Areas of Law: Constitutional Law, Criminal Law

Appellant Carzell Moore, proceeding pro se, appealed a trial court's denial of his motion to set aside a September 2017 order denying his motion for an out-of-time appeal of his 2002 resentencing on his 1977 convictions for murder and rape. Moore contended the trial court abused its discretion by denying his motion to set aside because he was not given proper notice of the September 2017 order. Finding that the record supported the trial court's ruling, the Georgia Supreme Court affirmed.

Rickman v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0127
Opinion Date: April 20, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Victoria Rickman was convicted by jury of malice murder and a related firearm offense in connection with the shooting death of William Carter, Jr. Rickman and Carter had a tumultuous on-again, off-again relationship with a history of verbal and physical abuse, false accusations of sexual assault, empty threats to obtain temporary protective orders, and numerous calls to 911. In the days leading up to Carter's death, the pair was talking and meeting again despite a recent break-up. On one such 911 call, officers went to Rickman's residence responding to claims shots were fired. Rickman responded holding her small dog, hair wet, and in pajamas. She did not appear to be injured, and nothing in the home looked disturbed or out of place. Rickman told the officers, "he raped me again and I shot him."

Officers found Carter laying face up on the bed naked with multiple gunshot wounds to his body. An autopsy revealed that Carter was shot ten times – four times in the chest, three times in the back, once on the arm, and twice in the head. Rickman's examining physician testified that he found no injuries on Rickman consistent with her description of events, and no signs of trauma to her vaginal cavity. Rickman appealed her convictions, arguing she was denied effective assistance of counsel and that the trial court erred in admitting improper character evidence. Finding no reversible error, the Georgia Supreme Court affirmed.

Robinson v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0265
Opinion Date: April 20, 2020
Judge: Peterson
Areas of Law: Constitutional Law, Criminal Law

Herbert Robinson appealed his convictions for malice murder, armed robbery, and possession of a firearm during the commission of a felony in connection with the death of Michael Moore. On appeal, he argued the trial court erred by allowing the State to use two firearms for demonstrative purposes during trial, and by allowing body-camera footage to be shown at trial. He also argued his trial counsel was ineffective for failing to object to a letter written by Robinson's cellmate being available to the jury for review during deliberations, and for failing to object to a visual aid used by the State during closing arguments. Because Robinson failed to show ineffective assistance of counsel or reversible error by the trial court, the Georgia Supreme Court affirmed.

Sullivan v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0056
Opinion Date: April 20, 2020
Judge: Warren
Areas of Law: Constitutional Law, Criminal Law

A jury convicted Antonio Sullivan of malice murder and other crimes in connection with the shooting death of Wava Benton. On appeal, Sullivan contended his trial counsel was constitutionally ineffective by failing to present evidence at trial to corroborate Sullivan's testimony about prior difficulties between Sullivan and Benton, and by failing to procure expert testimony about Sullivan's mental health—specifically about post-traumatic stress disorder— to be presented to the jury. The Georgia Supreme Court determined Sullivan failed to establish that his trial counsel was deficient in either respect, and therefore affirmed his convictions.

Read Opinion Are you a lawyer? **Annotate this case**.

Turner v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0247
Opinion Date: April 20, 2020
Judge: Warren

Areas of Law: Constitutional Law, Criminal Law

Appellant Ronald Turner appeals from his conviction for malice murder stemming from the stabbing death of William King. The stabbing took place outside an apartment at which Turner had driven in order to trade food for drugs. Turner testified in his own defense at trial and claimed that King hit him in the head with a beer bottle because Turner owed money to King from a prior drug transaction. Turner testified that he tried to get away from King, but that King chased him down and grabbed his jacket. According to Turner, King was getting ready to hit him again when Turner stabbed King in self-defense. Appealing his ultimate conviction, Turner contended he was denied the effective assistance of counsel in three respects. Seeing no reversible error after a review of the trial court record, the Georgia Supreme Court affirmed Turner's conviction.

Valrie v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0380
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Reuben Valrie was tried by jury and convicted of murder and other crimes in connection with the death of his infant daughter Aliyana. Valrie appealed, claiming that he was denied the effective assistance of counsel. Aliyana died as a result of closed head trauma, with a blunt-force abdominal injury as a secondary cause of death, which investigators determined was consistent with being shaken or dropped. At trial, Valrie presented the testimony of four expert witnesses who testified that Aliyana died of natural causes and that the injuries to her brain and abdomen were caused by events such as post-mortem CPR and the “rough” handling of her body by first responders. The jury rejected this defense and found Valrie guilty of murder and the other charges. Valrie contended that his trial lawyer should have raised a hearsay objection to the admission of recorded statements that his girlfriend (and Aliyana's mother) made to police investigators (as well as the testimony of one of those investigators about some of those

statements). Alternatively, Valrie argued that his lawyer should have sought the redaction of certain portions of the recorded statements that impugned his character. The Georgia Supreme Court concluded Valrie failed to present evidence that his trial counsel was deficient, or that he was prejudiced by any alleged failures. According, the Court affirmed conviction.

Williams v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0241
Opinion Date: April 20, 2020
Judge: Keith R. Blackwell
Areas of Law: Constitutional Law, Criminal Law

Richard Williams, II, was tried by jury and convicted of murder in connection with the strangulation death of Cory Robinson. Williams and Robinson were involved in a sexual relationship and had been living together at an extended-stay hotel. Kelvin Spencer was a close friend of both Williams and Robinson. When Spencer met Williams at the hotel room, Williams looked angry and had scratches on his neck. Spencer saw Robinson lying on the floor in a “praying position.” Spencer did not believe Robinson was dead, and he helped Williams move clothes and other things to a U-Haul truck parked outside, in preparation for a move. Williams did not testify or present any evidence. Based on his lawyer’s opening and closing arguments, the defense theory was that Spencer killed Robinson because he was jealous of Williams’s relationship with Robinson. Williams’s sole claim on appeal was that he was denied the effective assistance of counsel when his trial lawyer failed to present as a defense that Williams accidentally killed Robinson during consensual erotic asphyxiation. He argued that his lawyer's discomfort with the topic of homosexual BDSM activity, and his own problems with the Georgia State Bar, precluded presentation of the "true" version of events, and that Williams acceded to the lawyer's defense strategy only "through ignorance and that he did not know that a defense based on consensual erotic asphyxiation was available." Finding no reversible error, the Georgia Supreme Court affirmed conviction.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 20, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming Defendant's conviction of sexual assault in the first degree on the complaining witness pursuant to Haw. Rev. Stat. 707-730(1)(b), holding that the ICA did not err in affirming the family court. Specifically, the Supreme Court held (1) the jury should have been instructed to determine jurisdictional facts, but the error was harmless beyond a reasonable doubt; and (2) the ICA did not err in finding that there was no rational basis in the record to support providing the jury instruction of the lesser included offense of sexual assault in the third degree.

State v. Malave

Court: Supreme Court of Hawaii
Docket: SCWC-18-0000332
Opinion Date: April 22, 2020
Judge: Mark E. Recktenwald
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the intermediate court of appeals (ICA) affirming the judgment of the family court convicting Defendant on two counts of sexual assault in the first degree, holding that the ICA did not err in affirming the family court. At issue on appeal was the jurisdiction of the family court to try Defendant and the propriety of instructing the jury on a lesser included offense. The ICA affirmed, concluding that the family court had subject matter jurisdiction pursuant to Haw. Rev. Stat. 571-14(a)(1) and that there was no rational basis to support an instruction of the lesser included offense of sexual assault in the third degree. The Supreme Court affirmed, holding (1) although the jury should have been instructed to determine jurisdictional facts, the error was

harmless; and (2) the family court was not obligated to instruct the jury on the lesser included offense of sexual assault in the third degree.

Idaho v. Burke

Court: Idaho Supreme Court - Criminal
Docket: 46841
Opinion Date: April 22, 2020
Judge: Moeller
Areas of Law: Constitutional Law, Criminal Law

Prior to sentencing, defendant James Burke was committed to the state mental hospital for 56 days to restore him to competency. After being evaluated and deemed competent to proceed to trial, Burke was returned to the county jail and later pleaded guilty pursuant to a plea agreement. At the conclusion of his sentencing hearing, Burke sought credit for the 56 days of time spent in court-ordered commitment. The district court denied the motion, concluding that commitment to a state mental hospital did not fall under the definition of 'incarceration' in Idaho Code section 18-309. After reviewing this issue carefully, the Idaho Supreme Court disagreed with the district court's "thorough and thoughtful analysis," holding that court-ordered commitment to state custody pursuant to Idaho Code sections 18-210 and 18-211 met the functional and legal definition of "incarceration" under Idaho Code section 18-309. "The extent of the liberty interests restricted by Burke's court-ordered commitment to State Hospital North are just too similar to imprisonment to conclude otherwise." Accordingly, the Court reversed the district court's order denying Burke's request for credit for time served and remanded the case for the district court to enter an order crediting him with the fifty-six days he spent committed to State Hospital North while the State restored his competency to face criminal charges.

State v. Gibbs

Court: Iowa Supreme Court
Docket: 18-1298

Opinion Date: April 17, 2020
Judge: Edward M. Mansfield
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of murder in the second degree, holding that Defendant's Fifth Amendment rights were invaded when the trial judge instructed the jury that Defendant was required to notify law enforcement of his use of deadly force, but the error was harmless. During trial, Defendant asserted the defense of justification in his shooting of the victim. At issue on appeal was whether the district court abused its discretion by giving a jury instruction incorporating the terms of Iowa Code 704.2B. The instruction included a statement that a person using deadly force is required to notify law enforcement about his use of deadly force. Defendant argued before the Supreme Court that both section 704.2B and the jury instruction incorporating that section violated his Fifth Amendment rights. The Supreme Court affirmed, holding (1) instructing the jury that a homicide defendant is required to notify a law enforcement agency of his use of deadly force violates the defendant's Fifth Amendment rights; but (2) any error in this case was harmless beyond a reasonable doubt.

State v. Broxton

Court: Kansas Supreme Court
Docket: 114675
Opinion Date: April 17, 2020
Judge: Stegall
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions for second-degree murder, burglary, and theft but reversed Defendant's sentences, holding that any error during the guilt phase was harmless but that the district court erred by scoring Defendant's prior Florida burglary conviction as a person felony instead of a nonperson felony. On appeal, the court of appeals concluded that a trial court may instruct the jury on felony murder even though the State only charged the defendant with premeditated first degree murder. The Supreme Court disagreed, holding (1) the court of appeals erred in concluding that a district court may elect to provide a felony-murder

instruction when that crime was not charged, and the district court properly found that the felony-murder instruction was not legally appropriate in this case; (2) the district court erred by excluding from evidence an exculpatory document from a Florida homicide investigation on the ground it was not relevant, but the error was harmless; and (3) the district court improperly scored Defendant's prior Florida burglary conviction as a person felony.

State v. Corbin

Court: Kansas Supreme Court
Docket: 119665
Opinion Date: April 17, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed the ruling of the district court on remand resentencing Defendant to his original mandatory term of imprisonment after once again finding he was not a person with intellectual disability, holding that the district court did not abuse its discretion when it rejected Defendant's intellectual disability motion and imposed a mandatory term of imprisonment. Defendant pled no contest to first-degree premeditated murder. Before sentencing, Defendant filed a motion pursuant to Kan. Stat. Ann. 21-6622(b) asserting that he was a person with intellectual disability and was thus not subject to a mandatory minimum prison term. The district court denied the motion and sentenced Defendant to a hard twenty-five life sentence. While Defendant's appeal was pending, the Legislature amended Kan. Stat. Ann. 76-12b01(i), which provides new standards for deciding intellectual disability. The Supreme Court reversed and remanded for reconsideration of Defendant's motion using the new criteria. On remand, the district court reaffirmed its earlier ruling and again sentenced Defendant to a hard twenty-five life sentence. The Supreme Court affirmed, holding that the district court's ruling was reasonably based on the law and was supported by substantial competent evidence.

State v. Frazier

Court: Kansas Supreme Court
Docket: 117456
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the district court affirming the judgment of the district court denying Defendant's motion to withdraw plea of no contest to one count of possession of heroin with intent to distribute, holding that the district court's decision in finding no good cause for Defendant to withdraw his plea was based on errors of fact and law, which were grounds for finding abuse of discretion. On appeal, Defendant argued that the district court abused its discretion in denying his motion to withdraw his plea of no contest based on misleading or false statements contained in the plea agreement. The court of appeals affirmed the district court. The Supreme Court reversed, holding (1) there was enough uncertainty in this case to indicate that Defendant's plea agreement was not understandingly made; and (2) therefore, Defendant must be allowed to withdraw his plea.

State v. Harris

Court: Kansas Supreme Court
Docket: 117362
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the judgment of the court of appeals affirming Defendant's conviction of possession fo marijuana, holding that Defendant's waiver of jury trial was legally insufficient. On appeal, Defendant argued that he did not properly waive his right to a jury and asserted three other issues. The Supreme Court reversed the judgment of the court of appeals affirming Defendant's convictions without addressing the three remaining issues, holding that because the district court failed properly to apprise Defendant of his right to a jury trial and failed to ensure that Defendant understood the nature of the right he was giving up, Defendant's constitutional right to a jury trial was violated in this case.

State v. Uk

Court: Kansas Supreme Court
Docket: 119712
Opinion Date: April 17, 2020
Judge: Wilson
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree premeditated murder, holding that the district court did not err in its challenged instructions to the jury. Specifically, the Supreme Court held (1) the district court did not err in refusing to give the jury Defendant's requested instruction on voluntary manslaughter as a lesser included offense of first-degree murder because the instruction was not factually appropriate; and (2) the district court did not commit clear error in issuing an unmodified version of Instruction No. 11, which contained the definition of "premeditation" and mirrored PIK Crim. 4th 54.150(d) because the instruction was legally appropriate.

State v. Catruch

Court: Maine Supreme Judicial Court
Citation: 2020 ME 52
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgments of the trial court terminating Appellant's participation in the Co-Occurring Disorders and Veterans Court (Veterans Court), holding that the court did not err or abuse its discretion in terminating Appellant's participation in the Veterans Court. The Veterans Court is a criminal docket that provides judicial monitoring, specialized treatment, and other services for military veterans who have disorders often attributable to their military service. Appellant was charged

with leaving the scene of an accident and three other offenses. Appellant was admitted to the Veterans Court. Agreeing to sentencing outcomes in a plea agreement and entering into a bail contract, Appellant pleaded guilty to all charges against him. The court later terminated Appellant's participation in the Veterans Court, finding that Appellant had violated the conditions of his bail contract. The Supreme Judicial Court affirmed, holding (1) this matter was properly before the Court; and (2) given Appellant's failure to comply with the requirements for participation in the treatment court and his violations of the agreements, his termination from the Veterans Court was warranted.

State v. Paquin

Court: Maine Supreme Judicial Court
Citation: 2020 ME 53
Opinion Date: April 23, 2020
Judge: Andrew M. Mead
Areas of Law: Constitutional Law, Criminal Law

In this appeal from Defendant's conviction for eleven counts of gross sexual misconduct, the Supreme Judicial Court vacated the judgment of conviction on one count, vacated the dismissal of other counts and remanded for entry of a judgment of acquittal on those counts, and affirmed in all other respects, holding that Defendant's convictions on both Counts 5 and 30 violated his double jeopardy protections and that the court erred in allowing the State to dismiss Counts 27, 28, and 29 during trial without Defendant's consent. The indictment charged Defendant with fifteen counts (Counts 1-13, 30-31) of gross sexual misconduct against the victim and sixteen counts (Counts 14-29) of gross sexual misconduct against a second alleged victim. During trial, the court granted Defendant's motion for a judgment of acquittal on Counts 10-13, and the State dismissed Counts 27-29. Defendant was found guilty of Counts 1-9 and 30-31 and not guilty on the remaining counts. The court entered judgment in accordance with the verdict. The Supreme Judicial Court held that the trial court erred in failing to rule that the Double Jeopardy Clause barred convictions on both Counts 5 and 30 and allowing the State to dismiss Counts 27, 28, and 29 rather than entering a judgment of acquittal on those counts.

Watson v. State

Court: Maine Supreme Judicial Court
Citation: 2020 ME 51
Opinion Date: April 21, 2020
Judge: Joseph Jabar
Areas of Law: Criminal Law

The Supreme Judicial Court vacated the judgment of the unified criminal docket denying Appellant's petition for post-conviction review, holding that Appellant was deprived of the effective assistance of counsel when his trial attorney played a video of the ten-year-old victim's interview with police and that Appellant was adversely affected. Appellant was convicted of two counts of gross sexual assault, one count of unlawful sexual contact, and one count of visual sexual aggression against a child. The Supreme Court affirmed. Appellant later filed a petition for post-conviction review claiming that his trial attorney's representation was deficient because introducing the videotaped recording of the victim's entire interview with law enforcement was unnecessary to provide evidence supporting the victim's potential motive to fabricate the allegations. The post-conviction court denied denied the petition. The Supreme Court vacated the judgment below, holding that trial counsel's conduct was deficient and that counsel's actions rose to the level of comprising the reliability of Appellant's conviction and undermining confidence in it.

Commonwealth v. Mazza

Court: Massachusetts Supreme Judicial Court
Docket: SJC-11363
Opinion Date: April 21, 2020
Judge: Budd
Areas of Law: Criminal Law

The Supreme Judicial Court reversed the order of the superior court denying Defendant's motion for a new trial and set aside the jury's verdicts

of first degree murder and robbery, holding that a recently discovered witness statement made to the police ago constituted newly discovered evidence that "would probably have been a real factor in the jury's deliberations." At issue was Defendant's sixth motion for a new trial, which was predicated on newly discovered evidence consisting of, among other things, a recently discovered statement made to the police in 1972. The superior court denied the motion. As to the police statement, the judge found that it did not constitute newly discovered evidence because Defendant failed to establish that defense counsel did not have possession of it at the time of trial. The Supreme Judicial Court reversed and remanded the case for a new trial, holding (1) Defendant sustained his burden of establishing that defense counsel did not have the 1972 police statement prior to or at trial, and therefore, the statement constituted newly discovered evidence; and (2) there was a substantial risk that the jury would have reached a different conclusion had the evidence been admitted at trial.

Commonwealth v. McCarthy

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12750
Opinion Date: April 16, 2020
Judge: Gaziano
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed the judgment of the district court denying Defendant's motions to suppress, holding that the limited use of automatic license plate readers (ALPRs) in this case did not implicate constitutional protections against unreasonable searches. While police were investigating Defendant on suspicion of drug distribution they used ALPRs on two bridges to track Defendant's movements. The police accessed historical data via ALPR technology and received real-time alerts, the last of which led to Defendant's arrest. Defendant filed motions to suppress the ALPR data and the fruits of the arrest. The superior court denied the motions. The Supreme Judicial Court affirmed, holding that while the widespread use of ALPRs in the Commonwealth could implicate a defendant's constitutional protected expectation of privacy in the whole of his public movements, that interest was not invaded by the limited extent

and use of the ALPR data in the instant case.

Garden v. Commonwealth

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12821
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of a single justice of the court denying Petitioner's petition for extraordinary relief under Mass. Gen. Laws ch. 211, 3 seeking an order vacating Petitioner's plea to aggravated rape and dismissing the underlying indictment, holding that the single justice did not err or abuse his discretion in denying relief. The issues raised by Petitioner had all been raised and adjudicated through the normal appellate process. Petitioner then filed a motion to withdraw his guilty plea. The motion was denied, and the Appeals Court affirmed. In this petition for extraordinary relief, Petitioner sought an order vacating his plea to aggravated rape and dismissing the underlying indictment. The single justice denied relief. The Supreme Judicial Court affirmed, holding that the superintendence power was not available as an additional layer of appellate review once all other avenues had been exhausted.

In re Mitchell

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12910
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed the judgment of the county court denying, without a hearing, Petitioner's petition for relief under Mass. Gen. Laws ch. 211, 3, holding that the single justice did not err or abuse his discretion in denying relief. Defendant was convicted of several offenses.

The Appeals Court reversed the convictions and remanded the matter for a new trial. Thereafter, the Commonwealth filed a nolle prosequi as to all the charges. In his Mass. Gen. Laws ch. 211, 3 petition, Defendant alleged that no crime had been committed and that he was wrongfully prosecuted. The single justice denied relief. The Supreme Judicial Court affirmed, holding that Defendant did not demonstrate entitlement to the exercise of this Court's superintendence powers.

State v. Reek

Court: Minnesota Supreme Court
Docket: A19-0153
Opinion Date: April 22, 2020
Judge: G. Barry Anderson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for first-degree murder, holding that there was no error in the proceedings below. Specifically, the Supreme Court held (1) Appellant's right to a fair trial before an impartial tribunal was not violated when the district court stated that it might reconsider its prior Spreigl ruling if the defense presented certain witnesses; (2) the jury instructions on accomplice liability were plainly erroneous, but Appellant failed to establish that there was a reasonable likelihood that the error had a significant effect on the verdict; (3) the prosecutor did not commit misconduct in his closing arguments regarding the law of accomplice liability; (4) the district court did not abuse its discretion by granting the State's motion to admit evidence of appellant's past convictions for impeachment purposes, including by allowing the specific convictions to be disclosed to the jury; and (5) Appellant's pro se arguments were without merit.

State v. Woodard

Court: Minnesota Supreme Court
Docket: A18-1886

Opinion Date: April 22, 2020
Judge: Hudson
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the district court convicting Defendant of first-degree murder and sentencing him to life in prison without the possibility of release, holding that the district court did not err in denying Defendant's motion to present an alternative-perpetrator defense. Specifically, the Supreme Court held (1) the district court did not abuse its discretion in holding that Defendant's proffered evidence in support of his motion to present alternative-perpetrator evidence for lack of sufficient foundation; and (2) the district court committed an error that was plain in instructing the jury on the order in which to consider the charges against Defendant, but there was no reasonable likelihood that the instruction affected the jury's verdict and therefore did not affect Defendant's substantial rights.

Huff v. Brown

Court: Nebraska Supreme Court
Citation: 305 Neb. 648
Opinion Date: April 23, 2020
Judge: Lindsey Miller-Lerman
Areas of Law: Communications Law, Criminal Law

The Supreme Court reversed the portion of the district court's order granting in part a writ of mandamus requiring Doug Brown, the sheriff of Furnas County, to provide records to Herchel Huff pursuant to the public records statutes, holding that the district court erred when it determined that Huff had shown that Brown had a clear duty to provide the requested records. Huff, an inmate, sought, among other documents, the criminal history records of jurors who had convicted hims. Furnas County sheriff Kurt Kapperman required a deposit of $750 before fulfilling the request. Huff subsequently filed a petition for writ of mandamus naming Kapperman as the defendant and seeking an order compelling Kapperman to release all requested documents. The court permitted Huff to substitute Brown, the current sheriff, in the caption of the case in place of Kapperman and granted in part mandamus. The Supreme Court reversed in part, holding that the

district court (1) did not err when it substituted Brown's name for Kapperman's; but (2) erred in issuing mandamus because Huff failed to demonstrate a prima facie case that he had been denied a request for public records that the sheriff had a clear duty to provide under Neb. Rev. Stat. 84-712.

State ex rel. Kendrick v. Parker

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1509
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals denying Appellant's request for a writ of prohibition and/or mandamus against Montgomery County Court of Common Pleas Judge E. Gerald Parker Jr., holding that the court of appeals correctly determined that Appellant's claim was barred by res judicata. Appellant sought a petition for writ of prohibition and/or mandamus against Judge Erik Blaine, the successor to the judge who sentenced Appellant, alleging that the sentencing court patently and unambiguously lacked jurisdiction to sentence him. Judge Parker, who had succeeded Judge Blaine, subsequently filed a motion for summary judgment. The court of appeals granted summary judgment for Judge Parker, concluding that Appellant failed to demonstrate that the sentencing court patently and unambiguously lacked jurisdiction or that he lacked an adequate remedy at law and that res judicata barred Appellant's claim. The Supreme Court affirmed, holding that Appellant's claim was barred by res judicata.

State ex rel. Nelson v. Russo

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1541
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus seeking to compel Cuyahoga County Court of Common Pleas Judge Nancy Margaret Russo to vacate the consecutive prison sentences imposed on Appellant in 1987, holding that Appellant had an adequate remedy at law and was barred from asserting additional claims of sentencing error he could have raised in his previous mandamus action. In 1987, Appellant was convicted of four counts of rape and one count of kidnapping. Appellant was sentenced to prison terms of fifteen to twenty-five years for each of the five counts, to be served consecutively. In 2019, Appellant sought a writ of mandamus to compel Judge Russo to vacate his consecutive sentences. The court of appeals dismissed the writ action, concluding that res judicata barred Appellant's claim and that his prior appeals were an adequate remedy at law to address the alleged defect in his consecutive sentences. The Supreme Court affirmed, holding that Appellant was not entitled to a writ of mandamus in this case.

State ex rel. Roberts v. Marsh

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1540
Opinion Date: April 22, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's original action seeking a writ of procedendo and/or

mandamus to compel Hamilton County Court of Common Pleas Judge Melba Marsh to issue a corrected sentencing entry, holding that the court of appeals correctly dismissed the petition as moot. Appellant was convicted of murder with a repeat-violent-offender specification. Appellant later asked the trial court to correct his sentence, arguing that he had improperly been sentenced to postrelease control. On remand, Judge Marsh vacated the postrelease-control sentence. Appellant appealed that order. The court of appeals noted that the trial court had not set forth all the information required under Crim.R. 32(C) in a single document and dismissed the appeal for lack of a final, appealable order. Appellant then filed this original action seeking to compel Judge Marsh to issue a corrected sentencing entry that constitutes a final, appealable order. Judge Marsh issued a nunc pro tunc sentencing entry that constituted a final, appealable order. The court of appeals then dismissed the petition as moot. The Supreme Court affirmed, holding that because Judge Marsh performed the act Appellant requested, the court of appeals dismissed the petition as moot.

State ex rel. Steiner v. Rinfret

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1510
Opinion Date: April 21, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals dismissing Appellant's petition for a writ of mandamus against Holmes County Court of Common Pleas Judge Robert D. Rinfret, holding that the court of appeals correctly determined that Appellant had an adequate remedy in the ordinary course of the law. Appellant, who was serving consecutive prison terms for five convictions, filed a petition for a writ of mandamus arguing that Judge Rinfret improperly sentenced him to a prison term of nine years for his attempted rape conviction instead of the maximum term of eleven years. The court of appeals dismissed the petition, determining that Appellant had failed to file a mandatory affidavit of his prior civil actions and had an adequate remedy in the ordinary course of the law. The Supreme Court affirmed, holding that relief in mandamus was not

available because Petitioner had an adequate remedy in the ordinary course of the law.

State v. Jeffries

Court: Supreme Court of Ohio
Citation: 2020-Ohio-1539
Opinion Date: April 22, 2020
Judge: Donnelly
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the court of appeals upholding Defendant's convictions of four counts related to two specific instances of sexual abuse of D.S., holding that the trial court and court of appeals correctly applied Ohio's rape-shield law and determined that evidence of D.S.'s prior nonconsensual sexual assault was inadmissible. On appeal, Defendant asserted that the trial court erred in prohibiting him from introducing evidence during trial that D.S. had previously been sexually assaulted by another person, arguing that the rape-shield law applies only to an accuser's prior consensual sexual activity. The lower court held that Ohio's rape-shield law addresses all sexual activity, not only consensual sexual activity. The court of appeals affirmed. The Supreme Court affirmed, holding (1) the plain meaning of the term "sexual activity" as used in the rape-shield law includes both consensual and nonconsensual sexual activity; and (2) therefore, all sexual activity is barred from admission into evidence by the rape-shield, absent certain exceptions listed in the law.

Pennsylvania v. Britton

Court: Supreme Court of Pennsylvania
Docket: 55 MAP 2018
Opinion Date: April 22, 2020
Judge: Max Baer
Areas of Law: Constitutional Law, Criminal Law

California law enforcement officers interviewed Appellant Stacy Britton in

her California residence and, unbeknownst to her, recorded those interviews. Over Appellant's objection, Pennsylvania used those recordings as evidence to help convict Appellant of murder in Pennsylvania. The Pennsylvania Supreme Court granted allowance of appeal to examine whether the California law enforcement officers were acting as agents of the Pennsylvania State Police when they recorded the interviews with Appellant in her California home, and if so, whether Pennsylvania's constitutional and statutory protections were available to Appellant under those circumstances. The Court concluded the California law enforcement officers were not acting as agents of the Pennsylvania State Police when they interviewed Appellant, making analysis of whether any Pennsylvania-specific constitutional or statutory protections unwarranted. Because the Supreme Court concluded the Pennsylvania trial court reached the proper result in this matter, it affirmed that court's judgment.

Pennsylvania v. Copenhaver

Court: Supreme Court of Pennsylvania
Docket: 48 MAP 2019
Opinion Date: April 22, 2020
Judge: Thomas G. Saylor
Areas of Law: Constitutional Law, Criminal Law

In August 2015, a deputy sheriff conducted a vehicle stop of Appellant Victor Copenhaver's pickup truck. Upon approaching the truck, the deputy noticed an odor of alcohol and marijuana emanating from the passenger compartment. After administering field sobriety tests, he arrested Appellant for suspected driving under the influence of alcohol and controlled substances ("DUI"). Appellant was ultimately charged with DUI and other offenses. Appellant challenged the deputy's authority to conduct a traffic stop and sought suppression of all evidence obtained during the encounter. Rather than presenting testimony at a suppression hearing, the parties stipulated that Appellant was driving the vehicle in question and that the deputy had training and qualifications equivalent to that of a police officer. The parties also agreed that the vehicle stop occurred as a result of the deputy observing the tailgate to the pickup truck being in a down position, which caught the deputy's attention. The deputy further observed the

registration on the pickup truck was expired, and additionally, the registration number was identified as belonging to a vehicle other than the one on which it was attached. The issue this case presented for the Pennsylvania Supreme Court's review was whether the deputy could lawfully conduct the traffic stop based on the expired registration sticker, on a theory that such a violation amounts to a breach of the peace. The Supreme Court concluded driving a vehicle with an expired registration did not entail a breach of the peace. It vacated the superior court's order insofar as it held that the expired registration was a breach of the peace, thus alone authorizing the deputy to stop Appellant's vehicle. Notably, in light of its holding, the Supreme Court found the superior court did not proceed to consider other relevant questions, such as whether the parties' factual stipulation should have been read as indicating that the officer's understanding that the registration sticker was associated with a different vehicle arose in the pre-stop timeframe – consistent with the Commonwealth's position throughout this litigation. "These issues should be resolved in the first instance by the intermediate court on remand."

Pennsylvania v. Tedford

Court: Supreme Court of Pennsylvania
Docket: 773 CAP
Opinion Date: April 22, 2020
Judge: Donohue
Areas of Law: Constitutional Law, Criminal Law

Appellant Donald Tedford was convicted of first-degree murder and rape on February 6, 1987. He appealed the dismissal of his second petition for relief filed pursuant to the Post Conviction Relief Act ("PCRA"), on December 2, 2014, as amended by a counseled petition on May 5, 2015, and a supplemental petition filed on June 9, 2015. In connection with his initial filings, Tedford sought wholesale discovery of the prosecution's entire file, but the PCRA court concluded that the petition (as amended) was not timely filed. Tedford also appealed the PCRA court's order denying his supplemental PCRA petition, in which he requested discovery, an evidentiary hearing, and/or a new trial based upon the admission of expert testimony presented at trial related to microscopic hair analysis. The PCRA

court concluded that pursuant to PCRA Section 9545(b)(1)(ii), it had jurisdiction to consider the merits of Tedford's newly-discovered-facts claims, but ultimately it concluded Tedford had not asserted a meritorious claim in accordance with Section 9543(a)(2)(vi). Finding no reversible error in that analysis, the Pennsylvania Supreme Court affirmed dismissal of the petition for relief.

Pennsylvania v. Trahey

Court: Supreme Court of Pennsylvania
Docket: 38 EAP 2018
Opinion Date: April 22, 2020
Judge: Wecht
Areas of Law: Constitutional Law, Criminal Law

The trial court granted Timothy Trahey's motion to suppress the results of a blood test that revealed his blood alcohol concentration ("BAC"), finding no justification for the investigating officers' failure to obtain a search warrant before conducting the test. On the Commonwealth's appeal, the Superior Court reversed, opining that the Commonwealth's evidence sufficiently established the existence of exigent circumstances, thus excusing the absence of a warrant. The Pennsylvania Supreme Court reversed, finding that while the exigency analysis is an objective one, "even disregarding the officers' subjective motivations, or their candid acknowledgment that they would have obtained a search warrant if they thought it necessary, there was no time-sensitive need to conduct a warrantless blood test under the circumstances of this case. Accordingly, the Superior Court's conclusion that the test was justified by exigent circumstances was drawn in error."

In re Greg Abbott

Court: Supreme Court of Texas
Docket: 20-0291
Opinion Date: April 23, 2020
Judge: Per Curiam

Areas of Law: Constitutional Law, Criminal Law

The Supreme Court conditionally granted mandamus relief to the State seeking review of a temporary restraining order (TRO) blocking enforcement of Executive Order GA-13, which changes the rules applicable to judges' decisions regarding pre-trial bail, against judges, holding that the trial court lacked jurisdiction to order the judges' requested relief, even temporarily. GA-13 suspends certain statutes authorizing trial judges to release jail inmates with violent histories during the state of disaster due to the threat of the novel coronavirus. Plaintiffs alleged that GA-13 is unconstitutional and exceeds the governor's statutory emergency powers. Sixteen of the plaintiffs were Texas trial judges alleging that GA-13 improperly interferes with their judicial authority to make individualized bail decisions, and the other plaintiffs were public interest organizations and lawyer associations. The trial court issued a TRO blocking enforcement of GA-13 against judges. The Supreme Court conditionally granted mandamus relief, holding that the alleged threat of a criminal prosecution in this case did not give the judges standing to seek the invalidation of GA-13, and therefore, the trial court lacked jurisdiction to order their requested relief.

Stahmann v. Texas

Court: Texas Court of Criminal Appeals
Docket: PD-0556-18
Opinion Date: April 22, 2020
Judge: Barbara Hervey
Areas of Law: Constitutional Law, Criminal Law

Appellant Karl Stahmann was involved in an automobile accident, after which he threw a bottle of promethazine, a controlled substance, over a nearby wire fence before law enforcement arrived. The bottle landed two to three feet past the fence in plain view. He was convicted of third-degree felony tampering with physical evidence and was sentenced to 10 years' confinement and fined $5,000. The judge suspended his sentence and placed him on community supervision for 10 years. Stahmann appealed, arguing in part that the evidence was insufficient to prove that he destroyed, altered, or concealed the prescription bottle. The court of appeals agreed

that the evidence was insufficient, but instead of rendering an acquittal, it reformed the judgment to show that Stahmann was convicted of the lesser-included offense of attempted tampering with physical evidence, a state-jail felony. After review of the evidence presented at trial, the Texas Court of Criminal Appeals concluded the evidence was indeed insufficient to prove that Appellant altered the prescription pill bottle when he threw it over the fence because the mere act of throwing the bottle did not change the bottle itself. "While a rational jury could have reasonably inferred that Stahmann intended to conceal the pill bottle when he threw it over the wire fence, the evidence shows that he failed to conceal it as he intended because the bottle landed short of the bush in plain view on top of some grass." The Court affirmed the trial court's judgment.

Blanke v. Board of Pardons & Parole

Court: Utah Supreme Court
Citation: 2020 UT 16
Opinion Date: April 16, 2020
Judge: Himonas
Areas of Law: Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the district court's denial of Appellant's petition for extraordinary relief, holding that, under the circumstances, the Utah Board of Pardons and Parole need not afford Appellant the due process protections explained in Neese v. Utah Board of Pardons and Parole, 416 P.3d 663 (2017), before it could determine that Appellant was a sex offender and condition his parole on sex offender treatment. Appellant was serving a prison sentence for his convictions of attempted child kidnapping and kidnapping. Because he was convicted of attempted child kidnapping Appellant was considered a sex offender under the sex offender registration statute. Further, Appellant admitted in his presentence report that he had sexual intercourse with a fifteen-year-old. Appellant filed a petition for extraordinary relief alleging that the Parole Board had violated his due process rights by conditioning his parole on completion of sex offender treatment even though he had not committed a sex offense. Summary judgment was granted for the Parole Board. The Supreme Court affirmed, holding that the Parole Board owed

Appellant no additional process before it considered unconnected sex offenses in its decision to require Appellant to undergo sex offender treatment.

Washington v. Escalante

Court: Washington Supreme Court
Docket: 97268-1
Opinion Date: April 23, 2020
Judge: Steven González
Areas of Law: Constitutional Law, Criminal Law

Alejandro Escalante was detained for hours in a secured area at a border crossing and, the State conceded, interrogated by federal agents without Miranda warnings. Statements he made during that interrogation were used by the State to convict him of drug possession. While a traveler briefly detained and questioned at the border was typically not "in custody" for Miranda purposes, "the government's power to detain and question people at the border without implicating Miranda has limits." Here, the Washington Supreme Court determined those limits were reached. "This border detention created the type of inherently coercive environment that demands Miranda warnings to ensure an individual's choice to speak is the product of free will." The Supreme Court held that Escalante was in custody when he was interrogated and reversed.

Washington v. Haggard

Court: Washington Supreme Court
Docket: 97375-0
Opinion Date: April 23, 2020
Judge: Barbara Madsen
Areas of Law: Constitutional Law, Criminal Law

A class C felony "washes out" and is omitted from a defendant's offender score as long as he or she is not convicted of any crime within five years of the last date of release from confinement. David Haggard was convicted of

a misdemeanor offense within this five-year period, which was dismissed pursuant to RCW 3.66.067. When Haggard later pleaded guilty to burglary and arson, the trial court included prior class C felonies in his criminal history, finding that the dismissed misdemeanor conviction interrupted the washout period for those offenses. Haggard contended on appeal this was error. The Washington Supreme Court determined that because a dismissed conviction constituted a "conviction" under the Sentencing Reform Act of 1981 (SRA), and misdemeanor dismissal and vacation were distinct processes, so Haggard's offender score was properly calculated.

State v. Taylor

Court: Supreme Court of Appeals of West Virginia
Docket: 18-0502
Opinion Date: April 21, 2020
Judge: Walker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the judgment of the circuit court giving Petitioner credit for twelve days of time served toward the sentence he received for his felony conviction although Petitioner spent additional time in confinement for other charges that were dismissed in the universal plea agreement, holding that to grant Petitioner additional credit for time served would do little more than reward Petitioner for habitual criminal behavior. Petitioner was charged with several crimes and agreed to resolve the pending charges against him in a universal plea agreement. Under the terms of the agreement, Petitioner agreed to plea guilty to the charge of felony carrying a concealed firearm by a prohibited person. In exchange, the State agreed to drop the remaining charges. After he was sentenced, Petitioner argued that, in addition to the twelve days of credit for time served he was granted, he was constitutionally entitled to credit for time served while he was incarcerated for charges that were resolved in the universal plea agreement. The Supreme Court affirmed, holding that Petitioner's circumstances implicated neither double jeopardy nor equal protection of the law such that additional credit for time served was constitutionally mandated.

State v. Harrison

Court: Wisconsin Supreme Court
Dockets: 2017AP002441-CR, 2017AP002440-CR
Opinion Date: April 17, 2020
Judge: Patience D. Roggensack
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the decision of the court of appeals reversing an order of the circuit court that granted sentence credit to Defendant, holding that the court of appeals correctly found that Defendant was not entitled to sentence credit but erred by advancing the commencement of Defendant's terms of extended supervision for Defendant's 2007 and 2008 cases. Specifically, the Court held (1) Defendant was not entitled to sentence credit under Wis. Stat. 973.155(1)(a) because the days he spent in custody for which he sought sentence credit were not in connection with the courses of conduct for which those sentences were imposed; and (2) the court of appeals erred by advancing the commencement of Defendant's terms of extended supervision for his 2007 and 2008 cases to the date they would have begun but for Defendant's confinement for unrelated convictions that were later set aside, holding that whether to employ advancement is a public policy decision best left to the legislature.

Department of Justice Once Again Proves Its Loyalty to the President, Not the Rule of Law

AUSTIN SARAT

verdict post

Austin Sarat—Associate Provost, Associate Dean of the Faculty, and William Nelson Cromwell Professor of Jurisprudence and Political Science at Amherst College—comments on the recent news that the Justice Department will seek dismissal of charges against Michael Flynn. Sarat suggests that because the decision does not seem to advance the fair administration of justice in this case, the court should take the unusual step of refusing to grant the prosecutor's motion to dismiss.

Criminal Law Opinions

Kelly v. United States

Court: US Supreme Court
Docket: 18-1059
Opinion Date: May 7, 2020
Judge: Elena Kagan
Areas of Law: Criminal Law, Government & Administrative Law, White Collar Crime

During former New Jersey Governor Christie's 2013 reelection campaign, Fort Lee's mayor refused to endorse Christie. Kelly, Christie's Deputy Chief of Staff, Port Authority Deputy Executive Director, Baroni, and another official decided to reduce from three to one the number of lanes reserved at the George Washington Bridge's toll plaza for Fort Lee's commuters. To disguise the political retribution, the lane realignment was said to be for a traffic study. Port Authority traffic engineers were asked to collect some numbers. An extra toll collector was paid overtime. The lane realignment caused four days of gridlock, ending only when the Port Authority's Executive Director learned of the scheme. The Third Circuit affirmed the convictions of Baroni and Kelly for wire fraud, fraud on a federally funded program, and conspiracy to commit those crimes. The Supreme Court reversed. The scheme did not aim to obtain money or property. The wire fraud statute refers to "any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses," 18 U.S.C. 1343. The federal-program fraud statute bars "obtain[ing] by fraud" the "property" (including money) of a federally funded program or entity, section 666(a)(1)(A). The statutes are limited to the protection of property rights and do not authorize federal prosecutors to set standards of good government. The Court rejected arguments that the defendants sought to take control of the Bridge's physical lanes or to deprive the Port Authority of the costs of compensating employees. Their realignment of the access lanes was an exercise of regulatory power; a scheme to alter a regulatory choice is not one to take government property. The time and labor of the employees were an incidental byproduct of that regulatory object. Neither defendant sought to obtain the services that the employees provided.

Gomes v. Silva

Court: US Court of Appeals for the First Circuit
Docket: 19-1656

Opinion Date: May 1, 2020
Judge: Stahl
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed the judgment of the district court denying Appellant's petition for a writ of habeas corpus, holding that, under the highly deferential standard prescribed by the Antiterrorism and Effective Death Penalty Act for federal habeas review of state criminal convictions, Appellant's claims to habeas relief failed. Appellant was convicted in a Massachusetts superior court of murder in the first degree and related crimes. The Supreme Judicial Court (SJC) affirmed the convictions. Appellant subsequently petitioned the District Court for the District of Massachusetts for a writ of habeas corpus. The district court denied the petition but granted a certificate of appealability. The First Circuit affirmed, holding (1) sufficient evidence supported Appellant's conviction for first-degree murder as a joint venturer, and the SJC's sufficiency determination was not unreasonable; and (2) the SJC reasonably determined that the trial court's admission into evidence of certain items did not constitute error.

United States v. Perez-Couvertier

Court: US Court of Appeals for the First Circuit
Docket: 16-2186
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed Defendant's conviction of possessing with intent to distribute controlled substances in a protected area and conspiring to distribute controlled substances in a protected area, holding that the district court did not plainly err with respect to any of Defendant's challenges. Specifically, the First Circuit held (1) the district court did not commit plain error in admitting evidence of the conspiracy's activities occurring after he withdrew from the conspiracy or, alternatively, in not instructing the jury to ignore such evidence; (2) the district court did not plainly err in admitting evidence of a drug trafficking organization's violent acts; and (3) the delay between Defendant's indictment and arrest did not violate his Sixth Amendment right to a speedy trial.

United States v. Haverkamp

Court: US Court of Appeals for the Second Circuit
Docket: 18-3735
Opinion Date: May 4, 2020
Judge: Barrington D. Parker
Areas of Law: Criminal Law

Defendant pleaded guilty to one count of distribution and receipt of child pornography and one count of possession of child pornography. The district court sentenced him to 121 months of imprisonment, followed by five years of supervised release, and imposed a $200 mandatory special assessment under 18 U.S.C. 3013, as well as a $10,000 assessment under 18 U.S.C. 3014. The Second Circuit held that the district court did not abuse its discretion in sentencing defendant and his sentence was substantively reasonable. The court held that the text of the Justice for Victims of Trafficking Act (JVTA), 18 U.S.C. 3014, taken as a whole and in its context, is straightforwardly meant to be applied on a per-offender, not a per-count, basis. In this case, the district court erroneously applied the special assessment on a per-count, rather than per-offender, basis. Finally, the court held that the computer monitoring condition in question was reasonably related to the nature of defendant's offense. Accordingly, the court affirmed in part, vacated in part, and remanded for further proceedings.

United States v. Mladen

Court: US Court of Appeals for the Second Circuit
Docket: 18-0616
Opinion Date: May 6, 2020
Judge: Amalya Lyle Kearse
Areas of Law: Criminal Law, Trusts & Estates

After defendant died while his appeal was pending, counsel moved for

abatement of all incidents of the prosecution, requesting that the appeal be dismissed without a decision on the merits, that defendant's conviction be vacated, and that the matter be remanded to the district court with instructions to dismiss the indictment and order repayment to defendant's estate of the $20,000 fine and $100 special assessment. Because defendant was convicted upon his plea of guilty, and he neither did nor was permitted to challenge on appeal the merits of his conviction, the Second Circuit denied as without merit so much of the motion as seeks (1) vacatur of his conviction, (2) dismissal of the count of the indictment on which he was convicted, and (3) repayment of the mandatory $100 special assessment. The court granted so much of the motion as requests dismissal of this appeal and a remand to the district court for vacatur of the imposed terms of imprisonment and supervised release and for an order requiring that the paid fine of $20,000 be repaid to defendant's estate.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Richardson

Court: US Court of Appeals for the Second Circuit
Docket: 19-412
Opinion Date: May 5, 2020
Judge: Menashi
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for distribution and possession with intent to distribute a controlled substance. The court held that the district court did not procedurally err by applying the career offender sentencing enhancement pursuant to USSG 4B1.1 because defendant's prior convictions of conspiracy to distribute a controlled substance in violation of 21 U.S.C. 841(a)(1) and 846, and attempted criminal possession of a controlled substance in violation of N.Y. Penal Law 220.16(1), qualify as controlled substance offenses, as defined in USSG 4B1.2(b). The court also held that the district court did not substantively err in sentencing defendant, because it properly considered his criminal history and accounted for his need for mental health and substance abuse treatment.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Rosemond

Court: US Court of Appeals for the Second Circuit
Docket: 18-3561
Opinion Date: May 1, 2020
Judge: Chin
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for murder-for-hire, conspiracy to commit murder-for-hire, murder through use of a firearm, and possession of a firearm during a murder-for-hire conspiracy. Defendant owned Czar Entertainment, a music management company that represented hip-hop, rap and R&B artists such as Jayceon Taylor, also known as "The Game." Taylor was a member of G-Unit, a rap group run by Curtis Jackson, also known as "50 Cent." Defendant's crimes stemmed from a rivalry with Violator Records, the company that managed G-Unit. The court rejected defendant's contention that his attorney was ineffective because he conceded that defendant paid for the victim to be shot, even though he told counsel not to make this concession. The court held that defendant failed to show that this was objectively unreasonable or that he would have been found not guilty had a different argument been advanced. In this case, there was ample evidence supporting counsel's strategy to concede that defendant ordered a shooting where, among other things, the government's key witness, who participated in the conspiracy and lured the victim to be shot, testified that defendant agreed to pay the shooter. The court also held that the district court did not abuse its broad discretion by admitting prior bad-act evidence under Federal Rule of Evidence 404(b)(1).

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lacerda

Court: US Court of Appeals for the Third Circuit
Docket: 15-2812
Opinion Date: May 5, 2020
Judge: Porter
Areas of Law: Criminal Law, White Collar Crime

VOG billed itself as an advocacy group helping victims of timeshare fraud get out of their timeshare debts. A jury determined that VOG had actually

defrauded its customers and that three individual defendants (including Lacerda) were each knowing participants in that fraud. Lacerda was sentenced to 324 months' imprisonment for his leading role in the fraudulent enterprise. The Third Circuit affirmed the respective convictions and sentences. The court rejected a claim of impermissible "overview testimony" by an FBI agent; an officer who is familiar with an investigation or was personally involved may tell the story of that investigation—how the investigation began, who was involved, and what techniques were used, and, with a proper foundation, may offer lay opinion testimony and testify about matters within his personal knowledge. The district court did not abuse its discretion when it disqualified defense counsel based on a conflict of interest; when it denied replacement counsel's motion for a continuance; when it excluded from evidence, as hearsay, an email sent by Lacerda to VOG's former CFO; in exercising its sentencing discretion; or by ordering the forfeiture of all VOG's gross proceeds.

Cucalon v. Barr

Court: US Court of Appeals for the Fourth Circuit
Dockets: 18-1292, 18-2206
Opinion Date: May 7, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law, Immigration Law

The Fourth Circuit denied petitions for review of the BIA's final order of removal. Applying the modified categorical approach, the court held that defendant's prior conviction for distribution of cocaine under Virginia Code 18.2-248, including distribution of that substance as an accommodation under Virginia Code 18.2-248(D), satisfies the federal definitions of an "aggravated felony" and of a crime "relating to a controlled substance" pursuant to 8 U.S.C. 1227(a)(2)(A)(iii), 1227(a)(2)(B)(i). The court also held that the district court did not abuse its discretion in denying petitioner's motion to reconsider.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Doctor

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4874
Opinion Date: May 4, 2020
Judge: Roger L. Gregory
Areas of Law: Criminal Law

The Fourth Circuit affirmed the district court's revocation of defendant's supervised release and resulting sentence. The court held that the district court did not clearly err in finding the government proved he committed the assault underlying the supervised release violation; the district court did not commit plain error by adopting the violation report when announcing defendant committed Violation One; and, even if the district court erred in sentencing defendant for a Grade A violation, the error was harmless.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lewis

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-4028
Opinion Date: May 4, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law

Defendant was convicted for possessing a firearm as a felon and sentenced to 63 months' imprisonment and a three-year period of supervised release. The district court additionally recommended, without explanation, that defendant receive addiction treatment while incarcerated and ordered, as a special condition of his supervised release, that defendant participate in an addiction treatment program. The Fourth Circuit held that defendant's sentence is procedurally unreasonable because the district court failed to provide an adequate explanation for imposing as a special condition of supervised release the requirement of addiction treatment. The court also held that the district court failed to address defendant's nonfrivolous mitigation arguments. Therefore, the court remanded for resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Jordan

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-40499
Opinion Date: May 1, 2020
Judge: Jennifer Walker Elrod
Areas of Law: Criminal Law

The Fifth Circuit affirmed the district court's grant of defendants' motion for a new trial on the basis of prejudicial outside influence on the jury. The court held that the district court did not abuse its broad discretion in granting the motion for a new trial without holding an evidentiary hearing. To the extent there is a bright-line rule applicable to allegations of outside influence on the jury, the court held that it was not applicable to this case. Furthermore, the district court did not abuse its discretion in exercising its prerogative, within broadly defined parameters, to handle the allegation of outside influence in the least disruptive manner possible in this unusual case. Finally, the district court permissibly concluded that the evidence showed a sufficient likelihood of prejudice to shift the burden to the Government, and that the Government did not (and could not) show "no reasonable possibility that the jury's verdict was influenced by" the CSO's comments.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Longoria

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-20201
Opinion Date: May 5, 2020
Judge: Gregg Costa
Areas of Law: Criminal Law

The Fifth Circuit held that the base offense level of 20 was proper for defendant's felon-in-possession crime involving a semiautomatic firearm that is capable of accepting a large capacity magazine. In this case, defendant failed to show that the district court clearly erred in relying on the FBI's agent statement about what was found in the apartment. The court clarified any confusion and held that the 2013 amendment to the commentary on the acceptance-of-responsibility Guideline does not clearly overrule its caselaw allowing the government to withhold the third point for

acceptance of responsibility when it must litigate a suppression motion. The court held that Amendment 775 does not contain the unequivocal override needed to get past the court's precedent. Therefore, the court affirmed defendant's sentence.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. McNabb

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-50265
Opinion Date: May 1, 2020
Judge: Costa
Areas of Law: Criminal Law

The Fifth Circuit affirmed defendant's sentence imposed after he pleaded guilty to possessing a gun after having been convicted of a felony. The court held that defendant is not entitled to relief on his claim that the government breached the plea deal, and thus his appellate waiver remains enforceable. Accordingly, defendant's challenges to his sentence must be dismissed.

Read Opinion Are you a lawyer? **Annotate this case**.

Andrews v. Wayne County

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1992
Opinion Date: May 4, 2020
Judge: Suhrheinrich
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Canton Police received a 911 call from Andrews, who stated that his fiance, White, had physically attacked him. Officers arrested White. Andrews later took White's medications to the jail; a “KOP” policy allows inmates to keep certain drugs for self-administration. During an intake interview, White admitted to attempting to harm herself or commit suicide in the past but said she was not thinking of harming herself or having suicidal thoughts. An R.N. later evaluated White for nearly two hours, reported White’s chief complaints were “anxiety and depression,” and contacted a pharmacy to verify White’s prescriptions. The R.N. claims White did not exhibit any psychotic behavior,

suicidal ideation, or psychiatric distress but ordered further evaluation. The next day, White was found on the floor with vomit on her face. She stated repeatedly that she took too many pills. The next day, White died in the hospital. The cause of death was Verapamil toxicity. The Sixth Circuit affirmed the rejection of a suit under 42 U.S.C. 1983 on summary judgment. A pretrial detainee does not have an automatic right to a suicide screening. The court rejected an argument that the KOP Policy was deficient because it allows inmates in need of a psychological evaluation to participate before a psychiatrist's assessment of proper housing. The County had no history of suicides relative to the program, so any purported failure to train its employees in suicide risk assessment did not cause White's death.

Read Opinion Are you a lawyer? **Annotate this case**.

Hicks v. Scott

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-3410
Opinion Date: May 1, 2020
Judge: Gibbons
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Cincinnati officers Scott and Moore responded to a reported incident of menacing. Two people alleged that Quandavier had driven by their home that night and threatened to kill them and that Quandavier carried guns. Officer Loreaux identified a vehicle fitting the description. Officers Scott, Moore, Schneider, and Loreaux, standing where the vehicle was parked, heard a voice. Thinking that it was likely Quandavier, they knocked on the exterior door of the residence. It swung open. Three officers entered without a warrant or exigent circumstances. Loreaux remained outside. Neither Scott nor Moore recall announcing their presence or identifying themselves. Inside and upstairs, Scott knocked on a closed door. As it opened, Scott "saw the barrel of a rifle pointed at [her] face." Moore and Schneider also saw Quandavier "nonchalantly" panning the rifle from left to right. Moore reached for its barrel as Scott fired her weapon. Moore did not instruct Quandavier to drop his rifle nor did Scott issue any commands before firing. Quandavier collapsed. The officers immediately radioed for paramedics. Before the officers applied handcuffs or provided first aid, they heard another voice and conducted a sweep. Quandavier died at the scene

without receiving medical attention. In a suit under 42 U.S.C. 1983 for unlawful entry, excessive force, and deliberate indifference to a serious medical need, plus state claims, the district court granted the defendants summary judgment, citing qualified immunity. The Sixth Circuit reversed in part. The district court erred by granting qualified immunity to Scott, Moore, and Schneider on the unlawful entry claim. The court affirmed as to the excessive force, deliberate indifference, and state-law battery claims, and remanded for evaluation of municipal liability and wrongful death claims.

Moody v. United States

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5015
Opinion Date: May 6, 2020
Judge: Thapar
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

At Moody's trial, the government produced a video of Moody cooking crack on his stove and waving a handgun while he mused about life in "the game" (drug trafficking). The court ruled that most of the video was admissible. Moody then tried to persuade the jury that the video was filmed more than five years before his indictment, putting it outside the statute of limitations. The jury convicted Moody. Due to prior felony drug convictions, Moody received enhanced, mandatory-minimum life sentences on several counts. He appealed on evidentiary grounds relating to the video. The Sixth Circuit affirmed. Later, Moody raised new claims on collateral review, 28 U.S.C. 2255. The district court found each claim meritless; most were also procedurally defaulted. The court authorized Moody to appeal. The Sixth Circuit dismissed the appeal, stating that none of the claims should have been certified. Reasonable jurists could not doubt that the district court properly denied relief on Moody's claims that he was deprived of his statute-of-limitations defense (violating due process); that the past convictions for his sentencing enhancements were not charged in the indictment or found by the jury; and that his previous lawyers failed to raise the first two claims sooner, violating his right to effective assistance of counsel.

United States v. Foreman

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1827
Opinion Date: May 7, 2020
Judge: Gibbons
Areas of Law: Criminal Law

In 2006, Foreman pled guilty to possession with intent to distribute 50 or more grams of cocaine base, possession with intent to distribute cocaine powder, and possession of a firearm during and in furtherance of a drug trafficking crime. Foreman admitted that he was responsible for approximately 135 grams of crack cocaine and 250 grams of cocaine powder. Foreman had a final Guidelines range of 322-387 months; he was sentenced to 240 months' imprisonment with respect to each drug conviction, to run concurrently, and 60 months' imprisonment for the firearms conviction, to run consecutively. When the First Step Act of 2018 made the Fair Sentencing Act retroactive, Foreman sought relief. The district court held that Foreman was not entitled to a plenary resentencing and declined to revisit his career offender status or hold an in-person hearing, then weighed the new statutory range applicable to Foreman's drug offenses, his recalculated Guidelines range, and the 18 U.S.C. 3553(a) factors, and reduced Foreman's total sentence to 172 months on each drug offense, to run concurrently, plus the mandatory consecutive 60 months on the firearms offense. The Sixth Circuit affirmed. Nothing in the First Step Act entitles a defendant to a plenary resentencing. First Step Act resentencings are not shielded from review for reasonableness; the district court thoroughly explained its rationale, carefully examining Foreman's circumstances, the amended penalty provisions, and the resulting changes to Foreman's Guidelines range.

United States v. Smith

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1724
Opinion Date: May 6, 2020

Judge: Bush
Areas of Law: Criminal Law

In 2006, Smith was convicted of conspiracy to distribute and to possess with intent to distribute 500 grams or more of powder or 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 500 grams or more of cocaine powder; and being a felon in possession of a firearm. The court imposed a mandatory minimum life sentence. The Fair Sentencing Act subsequently lowered the penalty for cocaine-base offenses, made retroactive through the First Step Act. Smith moved for relief and received a reduced sentence of 360 months, the bottom of the new Guideline range for the counts impacted by the Fair Sentencing Act, to run concurrent to his existing 360-month sentence for his powder cocaine count that was not affected by the Fair Sentencing Act. The Sixth Circuit affirmed, rejecting an argument that the court should have imposed a below-Guideline sentence for all counts. The First Step Act is a limited grant of authority to impose a reduced sentence for certain offenses and does not require a plenary resentencing proceeding. Even assuming the court's obligation to explain its reasons for imposing the modified sentence was akin to that which applies in initial sentencing, the court's use of a modified AO 247 form order to explain its decision was not procedurally unreasonable.

Kirkman v. Thompson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1904
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Following a 1992 fight that involved Johnson, Herron, and Walker, two shooters shot the three men. Johnson survived. In the hospital, Johnson described a shooter by the street name "Duke," where Duke lived, and Duke's car. Johnson identified Duke and his accomplice from a photo array. Police pulled over a vehicle matching Johnson's description and arrested

the driver, Kirkman, and the passenger, who matched the general description of the second shooter. Kirkman had a tattoo of Duke on his arm. Police took additional photos and presented a second photo array to Johnson, who identified them as the shooters. At trial, Johnson identified Kirkman and his passenger as the shooters. There was disputed testimony about the cause of the fight. Convicted of murder and aggravated battery with a firearm, Kirkman was sentenced to life in prison. Johnson had a change of heart and submitted an affidavit, identifying Ford and an unknown man as the shooters. At Kirkman's post-conviction hearing, Johnson testified that he and his family had been threatened. Other testimony was inconsistent with Johnson's. Illinois courts denied post-conviction relief, finding that Johnson's recantation lacked credibility. Johnson later pleaded guilty for perjury but failed to specify which statement was false. The Seventh Circuit affirmed the denial of federal habeas relief. Illinois courts found Johnson's recantation lacked credibility. An evidentiary hearing satisfied Kirkman's due process rights. The Illinois trial court's determination defeated Kirkman's innocence and perjured testimony claims.

Tuduj v. Newbold

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1699
Opinion Date: May 1, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Illinois prisoner Tuduj, having received extensive dental treatment, filed a "deliberate indifference" suit under 42 U.S.C. 1983 against his dentists and prison officials. The court recruited counsel to assist Tuduj in filing an amended complaint that complied with the Federal Rules of Civil Procedure. Counsel defended against two summary judgment motions, one arguing that Tuduj had not exhausted his administrative remedies and another on the merits While the motions were pending, Tuduj moved "for leave to represent himself," stating that he was "concerned that his counsel has filed a structurally, technically and legally insufficient response doomed to be denied." He asked to file his own brief, except "in the event this Honorable Court deems counsel's response … legally sufficient and Grants same[,]

Plaintiff would be open to continued effective representation." A magistrate denied Tuduj's motion, stating that Tuduj "varie[d] between saying he would like to" represent himself and "indicating that he is happy with counsel's representation as long as he prevails." The district judge granted the motions for summary judgment, citing professional judgment and finding "no competent evidence" of any policy that unlawfully influenced dental-treatment decisions. The Seventh Circuit rejected Tuduj's argument that the court wrongly denied his "unqualified" right to proceed pro se under 28 U.S.C. 1654, the due process clause, the equal protection clause, and the Seventh Amendment. The district court permissibly denied his equivocal request.

United States v. Gibson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1402
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Constitutional Law, Criminal Law

Officer Garrison encountered Gibson, a suspected drug trafficker, walking with a companion. Although initially a consensual encounter, Garrison questioned Gibson and his companion and briefly detained Gibson. After Gibson and his companion departed, Garrison spotted a methamphetamine pipe under his patrol vehicle. Local law enforcement conducted a traffic stop of Gibson's vehicle in the curtilage of his driveway. A drug detection dog signaled the presence of a controlled substance in the vehicle, though nothing was found. Earlier that day, Gibson's wife had met with DEA agents to tell them about methamphetamine inside the home. Police used information Mrs. Gibson had provided to obtain a search warrant. The search of the home uncovered drugs, drug paraphernalia, currency, and AK-47 rifles, which led to Gibson's arrest. Gibson moved to suppress all evidence seized during the search, alleging he was detained without reasonable suspicion, unlawfully frisked, arrested without probable cause, stopped without probable cause or reasonable suspicion, and the traffic stop exceeded a permissible scope. Upon learning of his wife's cooperation, Gibson also argued her statement was insufficiently attenuated to justify the

search warrant. The Seventh Circuit affirmed the denial of the motion. Mrs. Gibson's voluntary statement with DEA agents was independently sufficient to sustain findings of probable cause and sufficiently attenuated from subsequent events to preclude suppression.

United States v. Howell

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3157
Opinion Date: May 4, 2020
Judge: Scudder
Areas of Law: Constitutional Law, Criminal Law

In December 2012, Chicago Police officers responded to an anonymous call reporting a Hispanic man in a black sweater and black hat, carrying a bag, and climbing under a warehouse fence. They found someone who matched the description. After stopping and frisking him, they determined he was not engaged in any crime. Howell, walking toward the police, was white and wearing a black jacket and dark hat. When an officer approached to speak to him, Howell did not answer, looked panicked, and put his hands in his pockets. The officer patted Howell down and found a gun in his jacket. A federal gun charge followed. Howell unsuccessfully moved to suppress the gun. The Seventh Circuit reversed the denial of his suppression motion and vacated his conviction for possessing that gun. The court noted that the facts in the pretrial record differed significantly from those presented at trial, where the arresting officer testified that he decided to proceed with the pat-down only after Howell ignored a directive to remove his hands from his pockets. Viewing the pretrial record as a whole, the police lacked reasonable suspicion to frisk Howell. The court did not reverse Howell's conviction on a second gun charge that resulted from the execution of a warrant to search Howell's apartment three months after the initial stop and the ensuing discovery of more guns and ammunition.

United States v. Lewis

Court: US Court of Appeals for the Seventh Circuit
Dockets: 19-1911, 19-1262
Opinion Date: May 7, 2020
Judge: Joel Martin Flaum
Areas of Law: Criminal Law

In 2016-2018, Draheim managed a conspiracy, responsible for at least 38 packages of methamphetamine sent from California to La Crosse, Wisconsin. Draheim supervised at least 11 associates who accepted shipments on her behalf, sent money transfers to California, distributed the meth, rented storage lockers, and collected money owed to her. Draheim provided vehicles. After agents placed a wiretap on her phone and seized several packages of meth en route to Draheim, her California supplier forced Draheim to find a new source. Draheim contacted Lewis, recently out of jail but still involved in the "meth scene." Lewis agreed to purchase meth from a new supplier. During the planned transaction, agents seized the package, which contained 28.6 grams of nearly pure meth. Police subsequently arrested Draheim after they found her daughter dead at home from an overdose; they took Lewis into custody for violating the terms of his state supervision. Both pleaded guilty to meth distribution offenses, 21 U.S.C. 841, 846. Draheim, facing a mandatory-minimum 10-year sentence, unsuccessfully argued that she qualified for "safety-valve relief." The court reasoned that she was the leader of her enterprise. Lewis unsuccessfully contended that he should be sentenced based only on his conviction, not other "relevant conduct." The Seventh Circuit affirmed Draheim's sentence but vacated as to Lewis. The fact that the defendant has engaged in other drug transactions is not, alone, sufficient to justify treating those transactions as relevant conduct for sentencing purposes.

Bakor v. Barr

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3011
Opinion Date: May 7, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit denied a petition for review of the BIA's determination

that defendant committed two crimes involving moral turpitude. The court held that the BIA did not err in determining that petitioner's conviction for the Minnesota crimes of Criminal Sexual Conduct in the Fifth Degree and knowing failure to comply with Minnesota's sex offender registration statute were crimes involving moral turpitude. The court also held that petitioner failed to exhaust his remaining arguments and therefore declined to consider them.

Opinion Date: May 5, 2020
Judge: Steven M. Colloton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eighth Circuit affirmed the district court's denial of habeas relief to petitioner based on his claim that the trial court violated his Sixth Amendment right to a public trial when it briefly closed the courtroom to spectators. The district court denied relief based on the ground that the Minnesota Supreme Court’s decision was neither contrary to, nor an unreasonable application of, clearly established federal law. The court agreed and held that it was not objectively unreasonable for the Minnesota Supreme Court to deem it constitutional under the Sixth Amendment for the trial court to explain the parameters of an earlier public order on evidentiary issues in a brief nonpublic proceeding before the jury was sworn.

United States v. Becerra

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2777
Opinion Date: May 7, 2020
Judge: Stras
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for two counts of being a

felon in possession of a firearm and ammunition. The court held that there was more than enough evidence for defendant's probation officer and other officers to believe defendant had a firearm on him. Therefore, the officers had probable cause to arrest him without a warrant. The court also held that defendant was in custody when he made both statements at issue. In this case, the "request for clarification" of defendant's statement that he had "something" in his car did not require Miranda warnings. Furthermore, because the bulge in defendant's pocket could have been a gun or other weapon that would have posed a danger to the officers and others, they could ask about it without the formality of Miranda warnings. The court joined its sister circuits in declining to recognize the innocent-possessor defense. The court held that the district court did not err in excluding defendant's proposed testimony that he had found the handgun in his car earlier in the day and was about to hand it over to his probation officer. The court reasoned that, even if defendant intended to turn over the gun (or the ammunition) to his probation officer, it is still a crime to knowingly possess it in the first place. Finally, the court held that the district court did not err in denying defendant a sentencing reduction for acceptance of responsibility; the district court considered defendant's mitigation arguments at sentencing; and the district court did not abuse its discretion by imposing a within-Guidelines sentence.

United States v. Haynes

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1607
Opinion Date: May 5, 2020
Judge: Raymond W. Gruender
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that the government did not violate the Speedy Trial Act, and defendant failed to offer any evidence showing that Iowa and federal prosecutors colluded. Furthermore, the district court did not abuse its discretion by failing to hold an evidentiary hearing regarding the existence of collusion. The court also held that the district court did not err in denying the motion to suppress where defendant

was not unlawfully seized. In this case, prior to producing the marijuana cigarette, the officer did not ask defendant any questions but merely ordered him off the bus, particularly as the smell of marijuana alerted the officer that evidence of a more serious crime than failure to use a turn signal might be uncovered during the stop. Finally, the court held that defendant was not unlawfully searched when the officer conducted a pat-down search incident to arrest; the evidence was sufficient to support defendant's conviction; defendant's Rehaif claim failed because there was sufficient evidence that he knew of his prohibited status; and defendant's sentence was not substantively unreasonable nor an abuse of the district court's discretion.

United States v. Roberts

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1176
Opinion Date: May 1, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law

The Eighth Circuit vacated defendant's sentence imposed after he pleaded guilty to unlawful possession of a firearm as a previously convicted felon. The court held that, although the district court properly applied a four-level increase for possession of a firearm "in connection with another felony offense" under USSG 2K2.1(b)(6)(B), but that a two-level increase for "using a minor to commit a crime" under USSG 3B1.4 should not have applied. In this case, the evidence showed only that defendant engaged in an arm's-length transaction with a minor. The court held that this mere joint participation in an offense as a partner, does not amount to "use" of a minor "to commit the offense" of unlawful possession of a firearm by a felon. Accordingly, the court remanded for resentencing.

United States v. Wright

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1081

Opinion Date: May 5, 2020
Judge: Erickson
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's restitution order and certain special conditions of defendant's supervised release imposed after he pleaded guilty to sex trafficking of a child. The court found no error in the district court's restitution amount of $20,000, holding that the evidence supported the amount in light of the aggregate harm to the victim. The court also held that the special conditions -- including a requirement that defendant participate in sex offender treatment including psychological testing and polygraph examinations, a prohibition against contact with any minors without pre-approval, and a requirement that defendant seek prior approval before using temporary commercial lodging, such as a hotel or motel -- where reasonably related to both the offense of conviction and to defendant's history of sexual contact with minor females.

Benson v. Chappell

Court: US Court of Appeals for the Ninth Circuit
Docket: 13-99004
Opinion Date: May 1, 2020
Judge: Consuelo Maria Callahan
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's denial of petitioner's habeas corpus petition challenging his California conviction and death sentence for murder and other crimes. Petitioner raised two certified claims and two uncertified claims. The panel held that petitioner failed to show that the California Supreme Court's denials of his claims were unreasonable determinations of the facts or contrary to clearly established federal law. In this case, the California Supreme Court reasonably determined that an officer's misstatement during petitioner's interrogation that there was no death penalty in California did not prompt petitioner's confessions. Furthermore, petitioner failed to show that his statements were not knowing, voluntary, and intelligent. Even if petitioner were able to show that trial counsel was ineffective in not fully investigating his abuse as a child or his alleged organic brain injury, the panel held that the state court could

reasonably have determined that any shortcoming in trial counsel's investigation was not prejudicial. Finally, the panel granted a certificate of appealability on petitioner's two uncertified claims and held that the state court reasonably rejected the claims that his trial counsel should have impeached the government's case and the prosecutor withheld material, exculpatory evidence.

Mero v. Barr

Court: US Court of Appeals for the Ninth Circuit
Docket: 17-70929
Opinion Date: May 1, 2020
Judge: Paul Jeffrey Watford
Areas of Law: Criminal Law, Immigration Law

The Ninth Circuit granted in part a petition for review of the BIA's finding that petitioner was removable based on his conviction for possession of visual presentation depicting sexual conduct of a person under 16 years of age, in violation of Nevada Revised Statutes (N.R.S.) 200.730. Applying the categorical approach, the panel compared the elements of N.R.S. 200.730 with the applicable definition of "sexual abuse of a minor," which requires proof of three elements. The panel held that N.R.S. 200.730 punishes a broader range of conduct because the Nevada statute does not require proof that the offender participated in sexual conduct with a minor. Therefore, petitioner's conviction did not qualify as sexual abuse of a minor. The panel explained that, with a possession-only offense such as N.R.S. 200.730, the minor depicted in the image is not the direct object of the offender's conduct, which is a necessary predicate for the offense to qualify as sexual abuse of a minor.

United States v. Yang

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10341
Opinion Date: May 4, 2020
Judge: Piersol
Areas of Law: Criminal Law

The Ninth Circuit affirmed the district court's denial of defendant's motion to suppress after he pleaded guilty to receipt of stolen mail and being a prohibited person in possession of a firearm. Defendant moved to suppress the evidence seized from his residence and the statements he made to law enforcement on the basis that the search warrant obtained by the Postal Inspection Service relied on evidence that was obtained illegally. The panel declined to address the potential Fourth Amendment privacy interests that may be implicated by the warrantless use of this Automatic License Plate Recognition (ALPR) technology, and held that defendant does not have a reasonable expectation of privacy in the historical location data of the Yukon under the facts of this case. The panel found no evidence in the record that Prestige Motors had a policy or practice of allowing lessees to keep cars beyond the rental period and Prestige had made affirmative attempts to repossess the vehicle by activating the GPS unit to locate and disable the vehicle. Therefore, defendant lacked standing to challenge the warrantless search of the database.

United States v. Neugin

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-7043
Opinion Date: May 1, 2020
Judge: Scott Milne Matheson, Jr.
Areas of Law: Constitutional Law, Criminal Law

Jack Neugin pled guilty to being a felon in possession of a firearm and ammunition on the condition that he could appeal the district court's denial of his motion to suppress evidence of the ammunition and firearm police found in the bed of his pickup truck. Officers responded to a reported verbal altercation between Neugin and his girlfriend. One of the officers saw ammunition in the back of the truck after he lifted the truck's camper lit do allow the girlfriend to retrieve her belongings. Neugin argued the officers discovered the evidence during an unconstitutional search; the district court concluded the officer was acting "in a lawful position" as "community caretaker," and found no Fourth Amendment violation. The Tenth Circuit reversed, finding that : (1) the officer conducted the without a warrant or probable cause, (2) the community caretaking exception to the warrant requirement does not apply, and (3) the inevitable discovery exception to the exclusionary rule does not apply. The evidence seized should have been suppressed.

United States v. Ramon

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-1221
Opinion Date: May 1, 2020
Judge: Gregory Alan Phillips
Areas of Law: Constitutional Law, Criminal Law

In 2016, after serving a federal prison sentence for having possessed a firearm after a felony conviction, Charles Ramon III began serving a mandatory term of supervised release. Before Ramon completed the term, his probation officer filed a petition, soon followed by two superseding petitions, to revoke Ramon’s supervised release. At the revocation hearing, the district court found three violations—two for possessing a controlled

substance and one for again illegally possessing a firearm. Of these, the most serious was Ramon's illegal possession of a firearm—a Grade B violation. For this, the court imposed the statutory maximum sentence of twenty-four months in prison. During the revocation hearing, the government mentioned that it might seek to indict Ramon for illegally possessing a firearm (the conduct in part underlying the revocation). Mindful of this, the district court ordered that Ramon's twenty-four-month sentence run "consecutively to any sentences imposed previously or prospectively in federal or state court." At the hearing, Ramon did not object to the district court's running his sentence consecutively to future federal sentences. On appeal, Ramon argued that the district court exceeded its sentencing authority under 18 U.S.C. 3584(a) by ordering that Ramon's sentence run consecutively to future federal sentences. By the terms of 18 U.S.C. 3584(a), the Tenth Circuit determined the district court did err. But Ramon failed to object to this at trial, and on appeal, failed to show that the error was plain, thus, judgment was affirmed.

United States v. Richards

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-8044
Opinion Date: May 6, 2020
Judge: Baldock
Areas of Law: Constitutional Law, Criminal Law

In 2018, the Wyoming Division of Criminal Investigation (DCI) obtained a search warrant to review the contents of Defendant–Appellant Joshua Richards' Tumblr account. During the search and subsequent investigation, DCI agents discovered Defendant had re-blogged videos and images of child pornography to his private Tumblr so he could later access and view the materials. Defendant ultimately pleaded guilty to one count of accessing with intent to view child pornography. He was sentenced to twenty-four months' imprisonment followed by five years of supervised release. The district court imposed several special conditions of supervised release, which, as relevant here, related to drugs and alcohol and required Defendant to submit to polygraph testing. On appeal, Defendant argued the district court erred in imposing these special conditions. He also challenged

the length of his prison sentence as substantively unreasonable. The Tenth Circuit determined the alcohol and drug conditions did not directly conflict with the relevant policy statement in the sentencing guidelines, so the district court's decision to impose the conditions was not manifestly unreasonable. And given the circumstances of the case, the Court determined the trial court did not abuse its discretion in imposing Defendant's twenty-four month sentence.

Knight v. Florida Department of Corrections

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-12488
Opinion Date: May 1, 2020
Judge: Newsom
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eleventh Circuit affirmed the district court's denial of a 28 U.S.C. 2254 petition for habeas relief. Petitioner alleged that his counsel rendered ineffective assistance under Strickland v. Washington, 466 U.S. 668 (1984), by failing to adequately investigate and present mitigating evidence during the sentencing phase of his capital-murder trial. The court held that, even assuming that counsel performed deficiently in failing to investigate and present the mitigation evidence that petitioner now raises—thus satisfying the first prong of the two-part Strickland standard that governs ineffective-assistance claims—petitioner failed to carry his burden of demonstrating resulting prejudice.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Evans

Court: US Court of Appeals for the Eleventh Circuit
Docket: 17-15323
Opinion Date: May 6, 2020
Judge: Grant
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that, given the totality of the circumstances, it was reasonable for officers, mistaking a dog's whimper for a person in distress, to enter defendant's home without a warrant.

Therefore, defendant's challenge to the district court's denial of his motion to suppress evidence failed. The court upheld the district court's imposition of a 22 offense level finding because defendant possessed a semiautomatic firearm capable of accepting a large capacity magazine under USSG 2K2.1(a)(3)(A)(i) (2016). The court also upheld defendant's sentencing enhancement under USSG 2K2.1(b)(4)(B) for possessing a rifle that had an obliterated serial number.

United States v. McLellan

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-13289
Opinion Date: May 6, 2020
Judge: Boggs
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm. The court held that the district court did not abuse its discretion in permitting one of his arresting officers to offer testimony at trial on the correlation between guns and drug activity and to suggest that defendant was selling drugs; the court declined to evaluate the applicability of the Armed Career Criminal Act (ACCA), because the district court would have imposed the same sentence regardless of whether the mandatory minimum applied; and the court rejected defendant's claim under Rehaif v. United States, 139 S. Ct. 2191 (2019), and held that there was no plain error in the district court's failure to instruct the jury of the knowledge-of-status element and any error from the lack of a knowledge-of-status element in defendant's plea colloquy did not affect his substantial rights. Finally, the court remanded for clarification of the judgment to reflect the sentence the district court said it would have imposed if the Armed Career Criminal Act did not apply.

United States v. Russell

Court: US Court of Appeals for the Eleventh Circuit

Docket: 18-11202
Opinion Date: May 4, 2020
Judge: Charles R. Wilson
Areas of Law: Criminal Law

Defendant was convicted of possessing a firearm and ammunition as an immigrant illegally or unlawfully in the United States. After defendant appealed his conviction and sentence, the Supreme Court issued its decision in Rehaif v. United States, 588 U.S. ___, 139 S. Ct. 2191 (2019), which reversed a decision from this court and held that under 18 U.S.C. 922(g), the government must prove that a defendant knew "his status as a person barred from possessing a firearm" when he knowingly possessed a firearm. The Eleventh Circuit held that defendant established the necessary prejudice under plain error review and vacated defendant's section 922(g) conviction, remanding for further proceedings. In this case, the district court committed an error that was made plain by the Supreme Court in Rehaif. Furthermore, defendant has sufficiently shown a reasonable probability that but for the error, the outcome of his trial would have been different.

Welch v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 14-15733
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's 28 U.S.C. 2255 motion to vacate his sentence. The court held that defendant's prior 1996 Florida convictions for robbery qualified as violent felonies under the Armed Career Criminal Act's (ACCA) elements clause, and rejected his contention that the court's decision in his direct appeal carved out a narrow exception to pre-1997 Florida robbery convictions obtained in Florida's Fourth District Court of Appeal. The court also held that petitioner's prior Florida felony battery conviction was a violent felony under the ACCA in light of the court's holding in United States v. Vail-Bailon, 868 F.3d 1293 (11th Cir. 2017) (en banc), cert. denied, 138 S. Ct. 2620 (2018).

State v. Trujillo

Court: Arizona Supreme Court
Docket: CR-18-0531-PR
Opinion Date: May 4, 2020
Judge: Gould
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court held that, for purposes of imposing mandatory sex offender registration under Ariz. Rev. Stat. 13-3821(A)(3), a judge has the authority to make the necessary factual finding that the victim is under the age of eighteen and that Arizona's sex offender registration statutes are civil regulatory statutes, not criminal penalties. Defendant was convicted by a jury of one count of sexual abuse. In reaching its verdict the jury determined that the victim was "fifteen or more years of age." At sentencing, the trial court ordered Defendant to register as a sex offender. Defendant objected, arguing that, pursuant to Apprendi v. New Jersey, 530 U.S. 466 (2000), a jury was required to find whether Defendant was under eighteen pursuant to section 13-3821(A)(3). The trial court denied the objection. The court of appeals affirmed. The Supreme Court affirmed, holding (1) Apprendi does not apply to factual findings that are necessary to impose registration because sex offender registration is a civil regulatory requirement, not a criminal penalty; and (2) the trial judge did not violate Apprendi by determining that the victim was under eighteen.

Barnett v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 181
Opinion Date: May 7, 2020
Judge: Hudson
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's "motion for credit for time spent in custody," holding that the

circuit court's findings were not clearly erroneous. In his motion, Appellant alleged that he was entitled to 312 days of jail-time credit and that the circuit court should enter a new sentencing order nunc pro tunc that reflected the correct amount of jail-time credit. The circuit court denied the motion. The Supreme Court affirmed, holding that the circuit court's denial of Appellant's motion was not clearly erroneous because Appellant failed to demonstrate a clerical error subject to correction.

Mason v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 182
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court dismissing Appellant's pro se petition for writ of habeas corpus, holding that Appellant stated no ground on which the writ could issue. Appellant was convicted of aggravated robbery, theft of property, and second-degree battery and sentenced as a habitual offender to an aggregate term of 660 months' imprisonment. The court of appeals affirmed. Appellant later petitioned for writ of habeas corpus, asserting that the trial court misapplied Arkansas's habitual-offender statutes. The circuit court dismissed the petition. The Supreme Court affirmed, holding that the issues Appellant raised in his petition for the writ should have been raised at trial, on direct appeal, or in a petition for postconviction relief.

Ray v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 184
Opinion Date: May 7, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from an order denying his pro se petition for permission to reinvest jurisdiction in the trial court to consider a petition for writ of error coram nobis, holding that the circuit court had no jurisdiction to consider the petition. Appellant entered negotiated guilty pleas to rape and other offenses. Appellant later filed a petition for writ of error coram nobis in the Chicot County Circuit Court, the court where he was incarcerated, setting out two grounds for coram nobis relief. The circuit court denied the petition. The Supreme Court dismissed Appellant's appeal, holding that jurisdiction lay in the trial court where Appellant was convicted, which in this case was the Ashley County Circuit Court. Therefore, the Chicot County Circuit Court was without jurisdiction to address Appellant's coram nobis petition.

Walker v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 183
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for declaratory judgment, holding that Appellant could not use a declaratory-judgment action to collaterally attack his criminal conviction. Appellant was convicted of first-degree murder and second-degree unlawful discharge of a firearm from a vehicle. The court of appeals affirmed. Years later, Appellant filed a petition for declaratory judgment alleging that he was denied due process in his criminal trial when the court admitted the prior testimony of an unavailable witness and that this admission violated the Confrontation Clause. The circuit court denied the petition. The Supreme Court affirmed, holding that a declaratory judgment action provided no relief on these grounds.

People v. Flores

Court: Supreme Court of California
Docket: S116307
Opinion Date: May 4, 2020
Judge: Kruger
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of three counts of first degree murder and his sentence of death, holding that the three or four minor errors at Defendant's trial were harmless and did not interfere with his due process right to a fair trial. Specifically, the Supreme Court held (1) no error occurred during jury selection; (2) Defendant was not prejudiced by any misstatements by the prosecutor; (3) assuming certain evidence was inadmissible, the court's admonition to the jury and the court's instruction cured the resultant harm; (4) the trial court erred in admitting testimony that the victim was afraid of Defendant, but the error was harmless; and (5) Defendant's remaining allegations of error were without merit.

California v. Law

Court: California Courts of Appeal
Docket: E072845(Fourth Appellate District)
Opinion Date: May 5, 2020
Judge: Slough
Areas of Law: Constitutional Law, Criminal Law

In 2001, appellant Terrell Law and his codefendant Brett May committed a home invasion robbery, during which one of them shot and killed one of the residents. They were tried jointly in 2006 before two separately empaneled juries who found them both guilty of first degree felony murder with the special circumstance described in Penal Code section 190.2(a)(17(A) and (d). Though Law's jury found he was not the shooter, they nonetheless concluded he was a "major participant" in the underlying robbery and acted "with reckless indifference to human life." In 2018, the Legislature enacted Senate Bill No. 1437 (2017-2018 Reg. Sess.) which, among other things, amended the definition of felony murder in Penal Code section 189. The legislation also added Penal Code section 1170.95, which established a procedure for vacating murder convictions predating the amendment that could not be sustained under the new definition of felony murder. Law

challenged the trial court's summary denial of his section 1170.95 petition to vacate his murder conviction, arguing the trial court erred by reviewing his record of conviction and determining the jury's true finding on the special circumstance rendered him ineligible for relief. The Court of Appeal concluded it was proper for a trial court to review the record of conviction when determining whether a section 1170.95 petitioner had stated a prima facie claim for relief. Additionally, the Court concluded Law "undoubtedly qualifies" as a major participant who acted with reckless indifference to human life, a conclusion that rendered him ineligible for relief under section 1170.95. The Court therefore affirmed the order denying his petition.

California v. Sanchez

Court: California Courts of Appeal
Docket: E072647(Fourth Appellate District)
Opinion Date: May 7, 2020
Judge: Menetrez
Areas of Law: Constitutional Law, Criminal Law

Victor Sanchez was charged with first degree murder, but pled guilty to voluntary manslaughter. He filed a petition under Penal Code section 1170.95 to vacate that conviction. The trial court denied the petition, concluding that Sanchez was ineligible for relief because he was not convicted of murder. After review, the Court of Appeal joined other courts that held section 1170.95 did not apply to defendants convicted of voluntary manslaughter. The Court also rejected Sanchez's argument that section 1170.95 violated equal protection.

Galeotti v. International Union of Operating Engineers

Court: California Courts of Appeal
Docket: A157785(First Appellate District)
Opinion Date: May 6, 2020
Judge: Henry E. Needham, Jr.
Areas of Law: Criminal Law, Labor & Employment Law, White Collar Crime

Galeotti, a former Union Local 3 employee, filed a complaint against Local 3 and three of individual union leaders, alleging that the individual defendants required union employees to pay them money to keep their jobs, lied about the reason for collecting the money, and caused Local 3 to terminate Galeotti's employment when he failed to pay the full amount demanded. The trial court dismissed his second amended complaint without leave to amend. The court of appeal reversed in part, reasoning that a threat to terminate employment can provide a basis for an extortion claim and that the allegations of the second amended complaint stated a cause of action for wrongful termination in violation of the public policy underlying the extortion statutes. The complaint stated a cause of action for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO; 18 U.S.C. 1961), based on the predicate acts of extortion, but did not state a cause of action for interference with prospective economic advantage.

In re I.A.

Court: California Courts of Appeal
Docket: B296549(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Tangeman
Areas of Law: Criminal Law, Juvenile Law

Where a juvenile court vacates its true finding on a generic murder allegation and redesignates it as a finding on an uncharged target offense, and does so before a minor has had the opportunity to contest the court's findings or orders, the minor may challenge the sufficiency of the evidence of the redesignated offense on appeal. The Court of Appeal held that there was insufficient evidence to support the juvenile court's decision sustaining the allegations that I.A. possessed a concealable firearm and committed vandalism. Therefore, the court reversed the juvenile court's findings, vacating the jurisdiction and disposition order and dismissing the Welfare and Institutions Code section 602 petition.

People v. Edwards

Court: California Courts of Appeal
Docket: A158055(First Appellate District)
Opinion Date: May 1, 2020
Judge: Petrou
Areas of Law: Criminal Law

In 2006, Edwards fired an assault weapon into an apartment, killing the victim. Edwards pled guilty to possession of a firearm as a felon and was convicted of second-degree murder and shooting into an inhabited dwelling. Following the enactment of Senate Bill 1437, Edwards filed a Penal Code 1170.95 resentencing petition, checking form boxes indicating that he was convicted under a theory of felony murder or murder under the natural and probable consequences doctrine and that he could not now be convicted of 1st or 2nd-degree murder because of changes to Penal Code 188 and 189. Edwards submitted the jury instructions and the transcript of the prosecutor's closing remarks that Edwards acted with "both express malice, specific intent to kill, as well as implied malice," described as "an intentional act, the natural consequences of which are dangerous to human life, and at the time that the individual acted, they knew of the danger, and they deliberately acted with conscious disregard." The court denied the petition, finding that Edwards was convicted on a valid theory of murder that survived the statutory changes. The court of appeal affirmed. The superior court did not err in considering the record of conviction. Edwards could not meet the statutory prerequisites for even filing a section 1170.95 petition because he was not charged or convicted of second-degree felony murder or murder under the natural or probable consequences doctrine directed at accomplice liability.

People v. Thomkins

Court: California Courts of Appeal
Docket: A141375(First Appellate District)
Opinion Date: May 1, 2020
Judge: Streeter
Areas of Law: Criminal Law

On Easter night in 2011, gunfire erupted at an Oakland bar-restaurant, leaving two people dead and five wounded. Thompkins and Fox were convicted of two counts of first-degree murder for the benefit of a criminal street gang, with firearm discharge enhancements, a multiple-murder special circumstance, and five counts of attempted murder with great bodily injury findings, gang enhancements, and firearm discharge enhancements. Thompkins was convicted as the shooter and Fox as an accomplice. Both were sentenced to life in prison without possibility of parole, plus 224 years to life. After Thompkins was sentenced, Fox stated under oath he was the actual shooter and Thompkins knew nothing about Fox's intentions. Thompkins claimed this new testimony, and his attorney's incompetent reaction entitled him to a new trial and submitted a declaration by another gang member who was present that night. The court of appeal concluded that Thompkins's attorney was not ineffective for failing to bring a motion to recall the sentence followed by a new trial motion because Thompkins failed to show prejudice. The attempted murder convictions and related enhancements must be reversed for both defendants based on the flawed kill zone instruction. Introducing evidence that defendants admitted their gang affiliation at jail intake violated the defendants' privilege against self-incrimination but was harmless. There was some evidentiary error that was harmless due to the wealth of admissible evidence establishing the gang enhancements. Arguments based on the statutory amendments to Penal Code 188 and 189 must be raised in the trial court (section 1170.95). The case must be remanded so the judge may exercise his discretion whether to impose or strike the firearm enhancements on under Penal Code 12022.53.

People v. Torres

Court: California Courts of Appeal
Docket: B295043(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Wiley
Areas of Law: Criminal Law

After the trial court admitted a witness's former testimony, the Court of Appeal applied People v. Roldan (2012) 205 Cal.App.4th 969, 975–985, and reversed. Roldan held that, before invoking the former testimony exception,

prosecutors should react appropriately to the impending deportation risk by following four steps: alert the defense to the risk; videotape the preliminary hearing testimony; use judicial measures to try to delay deportation; and consider an array of other specific measures. In this case, the prosecution conceded that prosecutors were simply unaware of Roldan and did not comply with it. The court held that Roldan controls the court's analysis because the facts about prosecutorial diligence are weaker here than they were in Roldan, where the appellate court held for the defense. In this case, the record before deportation is of prosecutorial inaction where the prosecution's brief in this court admits the investigating officer did not do anything to ensure that the witness would not be deported, nor is there other evidence of prosecutorial efforts to delay the witness's departure or to videotape his testimony at the preliminary hearing.

Colorado In Interest of G.S.S.

Court: Colorado Supreme Court
Citation: 2020 CO 32
Opinion Date: May 4, 2020
Judge: Brian D. Boatright

Areas of Law: Constitutional Law, Criminal Law, Juvenile Law

After being charged, fourteen-year-old G.S.S. was detained for more than three months without bail, even though he had not entered a plea and had not been tried on the charges against him. At that point, G.S.S.'s counsel filed a motion to dismiss, arguing that G.S.S.'s "right to a speedy trial" had been violated under section 19-2-509(4)(b), C.R.S. (2019). The trial court agreed and dismissed the case against G.S.S. with prejudice, and the court of appeals affirmed in Colorado in Interest of G.S.S., 2019 COA 4M, __ P.3d __. The Colorado Supreme Court then granted certiorari to determine the proper remedy for a violation of the sixty-day limit in section 19-2-509(4)(b). The Supreme Court determined the remedy for a section 19-2-509(4)(b) violation was for the trial court to immediately hold a bail hearing and order the juvenile's release. Accordingly, the judgment of the court of appeals was reversed.

Barringer v. Halkitis

Court: Florida Supreme Court
Docket: SC19-1071
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court held that Jay Barringer's quo warranto petition filed in this case was a frivolous proceeding brought before the Supreme Court by a state prisoner and sanctioned Barringer by barring him from filing any further pro se requests for relief related to his criminal case. Barringer was convicted of one count of attempted sexual battery of a victim less than twelve years old and sentenced to twenty-five-years' imprisonment. In 2011, Barringer began filing petitions in the Supreme Court. The Court did not grant the relief sought in any of Barringer's filings. In the instant quo warranto petition Barringer challenged his conviction on the ground that the information was defective, a claim Barringer previously raised by way of a habeas petition. The Supreme Court denied the petition and found that Barringer abused the Court's limited judicial resources. The Court sanctioned Barringer by directing the Clerk of Court to reject any future

pleadings or other requests for relief submitted by Barringer that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Franqui v. State

Court: Florida Supreme Court
Docket: SC19-203
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's claim of intellectual disability, raised in successive motions for postconviction relief under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying relief. Appellant was convicted of first-degree murder and sentenced to death in two separate cases. After the United States Supreme Court decided Hall v. Florida, 572 U.S. 701 (2014), Appellant filed successive motions for postconviction relief in both of his capital cases, asserting that the circuit court's denials of his previous claims of intellectual disability were based on the court's improper interpretation of Florida's intellectual disability statute. The circuit court summarily denied the motions. The Supreme Court reversed and remanded for an evidentiary hearing on the issue of intellectual disability. After a hearing, the circuit court denied the claim. The Supreme Court affirmed, holding (1) the circuit court did not err in denying Appellant's intellectual disability claim; and (2) Appellant was not entitled to relief under Hurst v. Florida, 136 S. Ct. 616 (2016), or Hurst v. State, 202 So. 3d 40 (Fla. 2016).

Hicks v. State

Court: Florida Supreme Court
Docket: SC19-1978
Opinion Date: May 7, 2020
Judge: Per Curiam

Areas of Law: Criminal Law

The Supreme Court denied the instant mandamus petition filed by Hicks and sanctioned Hicks by barring him from filing any further pro se requests for relief related to his criminal case. Hicks was convicted of one count of lewd and lascivious conduct by a person over eighteen years of age on a victim under sixteen years of age. Since 2016, Hicks filed thirteen pro se requests for relief in the Supreme Court related to his criminal case. The Court did not grant the relief sought in any of Hicks' filings. In the instant petition, Hicks sought a writ of mandamus compelling the circuit court to comply with the requirements of Fla. R. Crim. P. 3.850 by filing a copy of an order denying his second postconviction motion with the clerk of court. The Supreme Court dismissed the petition and found that Hicks abused this Court's limited judicial resources. The Court directed the Clerk of Court to reject any future pleadings or other requests for relief submitted by Hicks that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Court: Supreme Court of Georgia
Docket: S20A0171
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Javis Whitehead was convicted by jury of murder and other crimes in connection with the shooting death of Dominique Larry. On appeal, Whitehead challenged the sufficiency of the evidence presented to rebut his

claim of self-defense and to convict him for murder beyond a reasonable doubt. He also argued the trial court erred in denying his motion to suppress his custodial statement, and in refusing to excuse for cause the District Attorney from the panel of prospective jurors prior to the conclusion of voir dire. Finding no merit to these contentions, the Georgia Supreme Court affirmed conviction.

Idaho v. Blythe

Court: Idaho Supreme Court - Criminal
Docket: 46992
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Nicholas Blythe appealed after he was convicted of possessing a controlled substance. He conditionally pled guilty, reserving the right to challenge his sentence. On appeal, he argued the district court erred in denying his motion to suppress certain evidence found because the evidence presented at trial was found in violation of Blythe's Fourth Amendment rights. After review, the Idaho Supreme Court determined the search at issue took place before an arrest occurred, and because no rationale justifying a search incident to arrest was sufficiently present here, the search of Blythe's shoes was not a valid search incident to arrest. Therefore, the district court erred in holding that the search was reasonable under the Fourth Amendment. Blythe's conviction was vacated, the district court order denying Blythe's motion to suppress was reversed, and the matter remanded for further proceedings.

Idaho v. Glodowski

Court: Idaho Supreme Court - Criminal
Docket: 47131
Opinion Date: May 6, 2020
Judge: Roger S. Burdick

Areas of Law: Constitutional Law, Criminal Law

David Glodowski appealed after he was convicted for failing to update his sex-offender registration in violation of Idaho Code section 18-8309. He argued the district court erred by ruling that his prior conviction under a Wisconsin statute was "substantially equivalent" to Idaho statutes that required sex-offender registration in Idaho. After review, the Idaho Supreme Court determined the district court improperly allowed the State to seek a redetermination of the "substantially equivalent" element given that the Idaho Bureau of Criminal Identification made a final determination on that element. However, because the State put forth sufficient evidence to prove that element, and the district court's jury instruction accomplished the same purpose, the Supreme Court concluded the error was harmless. Accordingly, the Court found no reversible error in the district court's decision to grant the State's motion and provide the jury instruction. Therefore, judgment of conviction was affirmed.

Idaho v. Jones

Court: Idaho Supreme Court - Criminal
Docket: 45905
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Timothy Jones was convicted by jury of trafficking heroin and possession of drug paraphernalia. On appeal, he argued the trial court erred in admitting certain evidence regarding his probation status, a knife found in the initial police search of his person, and that the trial court abused its discretion in arriving at his sentence. Finding no reversible error, the Idaho Supreme Court affirmed Jones' conviction and sentence.

State v. Gordon

Court: Iowa Supreme Court

Docket: 18-1099
Opinion Date: May 1, 2020
Judge: Brent R. Appel
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for assault on a peace officer with a dangerous weapon, a felony, and several misdemeanors, holding that Defendant did not receive ineffective assistance of counsel. After Defendant pleaded guilty, he absconded. He was later returned to custody. On appeal, Defendant argued that he received ineffective assistance of counsel because the plea bargain contained an unlawful term. Specifically, Defendant argued that the plea bargain's provision that he would be released from jail for a forty-eight-hour furlough after pleading guilty was illegal and that his trial counsel committed ineffective assistance in obtaining the illegal benefit for him. The Supreme Court affirmed, holding that where Defendant entered into the plea agreement with the illegally lenient sentence, he could not benefit from that sentence and then attack the plea bargain.

State v. Craig

Court: Kansas Supreme Court
Docket: 119660
Opinion Date: May 1, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction and sentence for first-degree felony murder, holding that there was no error in the proceedings below. A jury found Defendant guilty of both first-degree felony murder and second-degree intentional murder. At sentencing, Defendant moved for a new trial and judgment notwithstanding the verdict, arguing that the jury must have had reasonable doubt on the first-degree felony murder theory because it convicted him of second-degree murder for the same killing. The district court dismissed the second-degree murder conviction and sentenced Defendant for the felony murder over his objection. The Supreme Court affirmed, holding (1) the district court did not err when it sentenced Defendant on felony murder instead of declaring a mistrial because

Defendant did not establish that the jury failed to find each element of the felony murder beyond a reasonable doubt or that the jury's first- and second-degree murder verdicts were so irreconcilable as to require a new trial; and (2) the district court did not err in declining to give an instruction on voluntary intoxication.

State v. Lemmie

Court: Kansas Supreme Court
Docket: 119439
Opinion Date: May 1, 2020
Judge: Carol A. Beier
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions of first-degree felony murder, aggravated robbery, conspiracy to commit aggravated robbery, criminal possession of a firearm, fleeing and eluding, and interference with law enforcement, holding that Defendant's arguments on appeal failed. Specifically, the Supreme Court held (1) any possible violation of Defendant's Fifth Amendment right in the admission of a witness's testimony about Defendant giving the witness phone passcodes was undoubtedly harmless; (2) the district court did not err by admitting hearsay statements as statements of a coconspirator and contemporaneous statements; (3) the State introduced sufficient evidence to convict Defendant of first-degree murder; and (4) the district judge did not abuse its discretion by admitting testimony that Defendant was upset over a meth pipe that went missing.

State v. Mullen

Court: Maine Supreme Judicial Court
Citation: 2020 ME 56
Opinion Date: May 5, 2020
Judge: Connors
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction for reckless

conduct and aggravated criminal mischief, holding that the trial court did not abuse its discretion by offering Defendant a continuance of the trial in lieu of excluding his medical records. On appeal, Defendant argued that the trial court abused its discretion by denying his motion to suppress his personal medical records as a sanction for the State's late seizure of the records. The Supreme Judicial Court agreed that the State's conduct undermined the purpose of Maine Rule of Unified Criminal Procedure 18(b) but that the court's offer of a continuance in lieu of the exclusion of the evidence constituted an appropriate response to the State's conduct.

Commonwealth v. Billingslea

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12715
Opinion Date: April 30, 2020
Judge: Cypher
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's convictions and the decision of the Appeals Court denying Defendant's motion to vacate the entry of his appeal from his convictions in that court and to have the case entered directly in the Supreme Judicial Court, holding that a direct appeal from the third conviction of a habitual offender pursuant to Mass. Gen. Laws ch. 279, 25(b) may be entered in the Appeals Court. Defendant was indicted for serious felonies arising from a brutal attack and rape. In addition to charging the specific felony, each indictment also alleged that the sentence for that felony should be enhanced pursuant to the habitual criminal provision Mass. Gen. Laws ch. 279, 25(a) or the habitual offender provision of section 25(b), or both. After he was convicted, Defendant moved to have the case entered directly in the Supreme Judicial Court. The Appeals Court denied the motion. The Supreme Judicial Court affirmed Defendant's convictions, holding (1) this direct appeal was entitled to the unique review prescribed by Mass Gen. Laws ch. 278, 33E, and the Appeals Court may conduct such section 33E review; (2) Defendant was not impermissibly allowed to waive his right to a jury trial on the sentencing enhancement provisions of the indictments; and (3) Defendant was not entitled to reversal of his convictions on any other ground.

Commonwealth v. Martin

Court: Massachusetts Supreme Judicial Court
Docket: SJC-08768
Opinion Date: May 5, 2020
Judge: Ralph D. Gants
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree and the denial of his motion for a new trial and declined to exercise its authority under Mass. Gen. Laws ch. 278E to reduce Defendant's conviction to murder in the second degree, holding that Defendant was not entitled to relief on any of his allegations of error. Defendant was convicted of murder in the first degree on the theory of felony-murder. Defendant filed a motion for a new trial, which was denied. The Supreme Judicial Court affirmed, holding (1) Defendant's motion for a new trial was correctly denied because Defendant was not prejudiced by counsel's ineffective assistance; (2) this Court declines to extend the reach of the Court's holding in Commonwealth v. Brown, 477 Mass. 805 (2017), to Defendant's case; and (3) trial judge erred when he declined Defendant's request that the jury be instructed on the elements of voluntary and involuntary manslaughter, but the error was not prejudicial in the context of the judge's other instructions.

Commonwealth v. Tavares

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12631
Opinion Date: May 6, 2020
Judge: Lowy
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree on theories of deliberate premeditation and extreme atrocity

or cruelty and declined to exercise its power pursuant to Mass. Gen. Laws ch. 278, 33E to reduce the conviction to manslaughter, holding that there was no reversible error in the proceedings below. Specifically, the Supreme Judicial Court held (1) the trial judge did not err by denying Defendant's requests for a jury instruction pursuant to Commonwealth v. Croft, 345 Mass. 143 (1962); (2) the trial judge did not err by denying Defendant's motions for a required finding of not guilty under Croft because a rational jury could have found that Defendant was guilty of murder in the first degree on both the theories of premeditation and extreme atrocity or cruelty; and (3) there was no basis for reducing Defendant's sentence or ordering a new trial.

State v. Branch

Court: Minnesota Supreme Court
Docket: A18-1055
Opinion Date: May 6, 2020
Judge: Lorie Skjerven Gildea
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's sentences for drive-by shooting at an occupied vehicle and second-degree assault, holding that Minn. Stat. 609.035 did not prohibit the sentences for both offenses when the crimes arose from a single behavioral incident. The district court sentenced Defendant to forty-eight months for drive-by shooting at an occupied vehicle and thirty-six months for second-degree assault and imposed the two sentences to run concurrently. The court of appeals affirmed. The Supreme Court affirmed, holding that, under this Court's analysis in State v. Ferguson, 808 N.W.2d 586 (Minn. 2012), the district court properly imposed multiple sentences in this case.

Galloway v. Mississippi

Court: Supreme Court of Mississippi
Citation: 2018-CA-01427-SCT

Opinion Date: May 7, 2020
Judge: Beam
Areas of Law: Constitutional Law, Criminal Law

Leslie Galloway appealed the denial of his 2015 petition for post-conviction relief (PCR) pertaining to his 2007 guilty plea to carjacking, a conviction that was used as an aggravating circumstance in Galloway's 2010 capital-murder trial at which Galloway received a death sentence. Galloway claimed in the petition that his defense counsel Wendy Martin had an actual conflict of interest because, before becoming his defense counsel, Martin had served as an assistant district attorney in the same case, unbeknownst to Galloway. The trial court ruled that Galloway's PCR claim was time barred under Mississippi's Uniform Post-Conviction Collateral Relief Act (UPCCRA), having been filed more than seven years after Galloway's conviction for carjacking. The trial court alternatively found no merit to Galloway's PCR claim, time bar notwithstanding. Accordingly, the trial court denied Galloway's PCR petition. The Mississippi Supreme Court agreed with the trial court that Galloway's PCR claim was time barred under the UPCCRA. The Court also agreed there was no merit to Galloway's PCR claim.

City of Missoula v. Zerbst

Court: Montana Supreme Court
Citation: 2020 MT 108
Opinion Date: May 5, 2020
Judge: Beth Baker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction for sexual assault, holding that the municipal court erred when it instructed the jury on a definition of "consent" from the 2017 sexual assault statute and not the applicable 2015 statute, and the erroneous jury instruction prejudicially affected Defendant's substantial rights. At trial, the court instructed the jury, over Defendant's objection, on the definition of consent contained in recent amendments to the sexual assault statute. On appeal, Defendant argued that the municipal court failed to apply the correct law when instructing the jury on the elements of the claimed offense. The district court denied the

appeal. The Supreme Court reversed, holding (1) the instructions, as a whole, did not fully and fairly instruct the jury on the law applicable to the case; and (2) Defendant's substantial due process right was prejudiced by the erroneous jury instruction.

State v. Degarmo

Court: Nebraska Supreme Court
Citation: 305 Neb. 680
Opinion Date: May 1, 2020
Judge: Stacy
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of driving under the influence, holding that Defendant consented to a chemical test of his urine and, therefore, the results of the urine test were admissible. A law enforcement officer stopped Defendant for an expired registration. Based on his observations, the officer, a certified drug recognition evaluation expert, administered field sobriety tests. The officer concluded that Defendant was under the influence of marijuana arrested Defendant for driving under the influence and then took him to a detoxification center. Thereafter, a chemical test of Defendant's urine confirmed the presence of marijuana. On appeal, Defendant challenged the admission of the results of the urine test. The Supreme Court affirmed, holding that Defendant voluntarily consented to the warrantless search of his urine, and therefore, the search fell within a recognized exception to the warrant requirement.

People v. Holz

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02682
Opinion Date: May 7, 2020
Judge: Fahey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals held that N.Y. Crim. Proc. Law (CPL) 710.70(2) grants a defendant the right to review of a suppression decision when the order related exclusively to a count that was satisfied by a guilty plea but was not one to which the defendant pleaded guilty. Defendant was charged with two counts of burglary in the second degree. The first count related to a laptop computer, and the second count related to jewelry. Defendant moved to suppress the jewelry, but Supreme Court denied the motion. Defendant then pleaded guilty to one count of burglary in the second degree as charged in the count pertaining to the theft of the laptop computer, in satisfaction of the count charging the burglary of jewelry. On appeal, Defendant argued that Supreme Court erred in denying his motion to suppress the jewelry. The Appellate Division affirmed, concluding that it was jurisdictionally precluded from reviewing the suppression order. The Court of Appeals reversed, holding (1) Defendant's right to appellate review of Supreme Court's suppression order was secured by CPL 710.70(2); and (2) because the Appellate Division did not reach the underlying suppression question the case must be remitted to the Appellate Division for further proceedings.

People v. Maffei

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02680
Opinion Date: May 7, 2020
Judge: DiFiore
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals affirmed the order of the Appellate Division concluding on direct appeal that Defendant was not entitled to relief on his ineffective assistance of counsel claim, holding that Defendant, on this record, did not sustain his burden to establish that counsel was constitutionally ineffective. After a jury trial, Defendant was convicted of second-degree murder. On appeal, Defendant argued that his trial counsel's failure to challenge a prospective juror constituted ineffective assistance of counsel. The Appellate Division affirmed. The Court of Appeals affirmed, holding (1) the record was inadequate to review Defendant's ineffective assistance of counsel claim; and (2) the appropriate procedure for the litigation of Defendant's challenge to his counsel's performance was a N.Y. Crim. Proc.

Law 440.10 motion.

State v. Bailey

Court: North Carolina Supreme Court
Docket: 360A19
Opinion Date: May 1, 2020
Judge: Davis
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the order of the trial court denying Defendant's motion to suppress evidence seized during the execution of a search warrant, holding that the warrant supported by probable cause. Defendant pled guilty to the offense of trafficking in cocaine while preserving his right to appeal the denial of his motion to suppress. On appeal, Defendant argued that the trial court erred in denying his motion to suppress because the facts contained in the affidavit were insufficient to establish probable cause to search his residence. The court of appeals affirmed. The Supreme Court affirmed, holding that the affidavit contained facts that were sufficient to provide a nexus between the residence and suspected criminal activity, and therefore, the warrant was supported by probable cause.

State v. Ellis

Court: North Carolina Supreme Court
Docket: 340A19
Opinion Date: May 1, 2020
Judge: Robin E. Hudson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the decision of the Court of Appeals affirming the trial court's denial of Defendant's motion to suppress evidence, holding that there was no reasonable suspicion to justify the law enforcement officer's stop when Defendant signaled with his middle finger from the passenger side window of a moving vehicle. While assisting a stranded

motorist, the officer turned his attention to another car traveling on the roadway, a white SUV. Defendant had his arm outside the passenger window and gestured with his middle finger, making an up-and-down motion. Believing that Defendant was committing the crime of disorderly conduct, the officer pursued and then stopped the SUV. At trial, Defendant moved to suppress the officer's testimony, arguing that there was no reasonable suspicion to justify the stop. The trial court denied the motion. Defendant pleaded guilty to resisting, delaying, or obstructing a public officer. The court of appeals affirmed the trial court's denial of Defendant's motion to suppress. The Supreme Court reversed, holding that the specific, articulable facts did not establish reasonable suspicion of the crime of disorderly conduct.

State v. Hobbs

Court: North Carolina Supreme Court
Docket: 263PA18
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction, holding that the trial court clearly erred in ruling that Defendant failed to prove purposeful discrimination with respect to the State's use of peremptory challenges to strike three jurors without considering all of the evidence presented by Defendant. Defendant was found guilty of one count of first-degree murder and other crimes. On appeal, Defendant argued that the trial court erred by failing to grant three objections that he made under Batson v. Kentucky, 476 U.S. 79 (1986). The court of appeals affirmed Defendant's convictions. The Supreme Court reversed, holding (1) the court of appeals erred in its analysis of Defendant's Batson claims with respect to the three jurors; and (2) as to all three jurors, remand was required for reconsideration of whether Defendant proved purposeful discrimination in each case.

State v. Mylett

Court: North Carolina Supreme Court
Docket: 6A19
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the court of appeals affirming the trial court's judgment convicting Defendant for conspiracy to commit harassment of a juror, holding that the trial court erred in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. Defendant was convicted of conspiracy to commit harassment of a juror because of his actions at a courthouse following his twin brother's conviction for assault on a government official. On appeal, the court of appeals concluded that the trial court did not err in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. The Supreme Court reversed, holding that the evidence in Defendant's trial was insufficient to raise anything more than mere conjecture that he had made an agreement with another person to threaten or intimidate a juror.

Dodge v. North Dakota

Court: North Dakota Supreme Court
Citation: 2020 ND 100
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

Richard Dodge appealed from a district court order denying his application for post-conviction relief. Dodge was charged with five felonies and a misdemeanor in December 2015. Dodge was appointed counsel. In April 2016, Dodge's counsel moved the court to withdraw because the attorney-client relationship was "irreparably broken and rendered unreasonably difficult." The court granted the motion, and Dodge was appointed substitute counsel in May 2016. In July 2016, Dodge himself filed a "motion to dismiss counsel." The court denied Dodge's motion. Five months after the deadline for motions and plea agreements, Dodge's counsel sought to have Dodge submit to a psychiatric examination. This request was denied, the trial court

found no evidence, and the the court itself made no observations, that Dodge was incompetent to stand trial. After this denial, Dodge himself again moved to dismiss his trial counsel, and due to the allegations Dodge made in his motion, counsel moved to withdraw. The trial court denied both motions, and instead, required the attorney to appear as standby counsel and assist Dodge during trial if requested, but relieved him of any further obligations to consult with Dodge. The case proceeded to trial. At the beginning of trial, the court gave Dodge the option of representing himself or having his attorney represent him. Dodge chose to have his attorney represent him. Because his attorney had not prepared for trial and had no communication with Dodge since he moved to withdraw, Dodge's attorney asked for a brief recess to consult with Dodge. During the recess, a settlement was reached. Dodge agreed to enter Alford pleas on all counts, waived a presentence investigation, and agreed to be sentenced immediately after entering his pleas. Dodge was immediately sentenced following his guilty pleas, and thereafter sought post-conviction relief on grounds he was not competent to enter his pleas, and that he received ineffective assistance of trial counsel. After review, the North Dakota Supreme Court concluded the district court's finding that Dodge was competent when he entered his pleas was not clearly erroneous, and disposed of his claim of ineffective assistance of counsel.

North Dakota v. Dahl

Court: North Dakota Supreme Court
Citation: 2020 ND 87
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

The State of North Dakota appealed a district court order denying its motion to resume prosecution against Matthew Dahl and dismissing the case. In December 2014, the State charged Dahl with two counts of theft. Dahl did not appear on the charges until he was arrested on a bench warrant in February 2017. In mid-April 2017, the State mailed Dahl a pretrial diversion agreement. Dahl signed and returned the notarized agreement dated May 3, 2017. On May 9, 2017, the state's attorney signed and filed the agreement with the district court, and the court approved the agreement the same day. Under the agreement, the State agreed to suspend prosecution for "two

years from the date of execution" conditioned on Dahl's timely payment of restitution. Dahl failed to make minimum monthly restitution payments. On June 6, 2019, the State moved to resume prosecution, alleging Dahl violated the pretrial diversion agreement by his non-payment. The district court held a hearing on the State's motion in August 2019. The court concluded the pretrial agreement was executed when Dahl signed it on May 3, 2017. The court then denied the State's motion to resume prosecution as untimely under N.D.R.Crim.P. 32.2(d)(2), and dismissed the complaint against Dahl. After review, the North Dakota Supreme Court reversed, concluding the district court erred in determining the State's motion was untimely, and remanded for further proceedings.

North Dakota v. Foster

Court: North Dakota Supreme Court
Citation: 2020 ND 85
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Akeem Foster was convicted by jury of Terrorizing and Carrying a Concealed Weapon. Foster contended on appeal he was denied a fair trial because he was asked during cross-examination if other witnesses were lying and because the prosecutor expressed personal beliefs about the evidence during closing arguments. Foster also argued there was insufficient evidence to convict him of either charge. After review, the North Dakota Supreme Court affirmed Foster's conviction for Carrying a Concealed Weapon, but reversed his conviction for Terrorizing. The Court found Foster was improperly asked to provide an opinion on the veracity and credibility of the State's witnesses. The improper questioning was prejudicial and denied Foster a fair trial on the terrorizing charge.

North Dakota v. Kolstad

Court: North Dakota Supreme Court

Citation: 2020 ND 97
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

In December 2018, Officer Nelson of the University of North Dakota Police Department conducted a traffic stop of Stanley Kolstad for suspicion of driving under the influence. Kolstad performed field sobriety tests and a preliminary breath test (PBT). Prior to performing the PBT, Kolstad informed Nelson that he had asthma. Nelson testified he was unable to obtain a PBT result because Kolstad was filling his cheeks with air while performing the test. Kolstad was arrested for DUI and refusing to submit to a chemical test. Kolstad was transported to the UND police station to be given an Intoxilyzer breath test. Prior to the Intoxilyzer test, Nelson read Kolstad the implied consent advisory. But, because Nelson was not a certified operator of the Intoxilyzer machine, Officer Waltz conducted the test. Prior to the test, Kolstad informed Waltz he had asthma. The Intoxilyzer test results were deficient. Waltz testified Kolstad was not providing enough air for the test machine to provide a valid result. Kolstad was charged with driving under the influence and refusing to submit to a chemical test. Kolstad's counsel made a discovery request to the State seeking copies of any audio or video recordings taken by police officers. Kolstad's counsel also requested the State inform him whether any sound or video recordings taken of Kolstad were subsequently "altered, edited, destroyed, or discarded." The State provided Kolstad's counsel with dash camera footage from Nelson's police car that had been taken at the scene of the arrest, but the State did not provide any body camera footage from either Nelson or Waltz. Upon learning that Waltz's body camera footage was successfully uploaded to UND servers, Kolstad's counsel moved to dismiss the case because the State did not provide any body camera footage in discovery as requested. The district court ultimately dismissed the refusal to submit to a chemical breath test charge as a sanction for failing to provide the body camera footage. The State appealed, arguing the alleged discovery violation did not rise to a constitutional violation of Kolstad's due process rights, and the district court abused its discretion in dismissing the refusal charge. Kolstad argued the district court's order dismissing the refusal charge was not appealable, and if it was, the court did not abuse its discretion in dismissing the charge. The North Dakota Supreme Court concluded there was nothing in the record to indicate the district court adequately considered an

alternative or less severe sanction to dismissal, and by not considering a less severe sanction, the trial court erred. The district court's order dismissing the refusal charge was reversed, and the matter remanded for further proceedings.

North Dakota v. Michel

Court: North Dakota Supreme Court
Citation: 2020 ND 101
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

Kevin Michel was convicted by jury of knowingly receiving stolen property. Jamestown Police began investigating theft of tires from Northwest Tire in October 2017. About ten months later, Thomas Melland and Andrew Heckelsmiller became suspects in the investigation. Heckelsmiller told police he had sold stolen tires to Michel. In August 2018, Detective LeRoy Gross spoke with Michel about the stolen tires. Michel acknowledged he had bought tires from Heckelsmiller and Melland. Michel also told Detective Gross he stopped buying tires from Heckelsmiller and Melland after seeing a Facebook post from Northwest Tire offering a $500 reward for information regarding stolen tires. Detective Gross told Michel, "There's going to be a lot of restitution these two boys are going to have to come up with unless we can get some tires back." Michel said he had sold several of the tires but still had some of them. Michel turned over seven new tires to Detective Gross. Representatives from Northwest Tire and J&L Service identified the tires as some of those stolen from their shops. During the jury's deliberations, the jury submitted a note with written questions to the court. Michel argued on appeal the district court erred by not specifically answering the jury's questions and instead referring them to the existing jury instructions. After review, the North Dakota Supreme Court affirmed the criminal judgment, except as to the award of restitution. The award was reversed because the district court awarded more than what was required to make the victims whole. The matter was remanded for a redetermination of restitution.

North Dakota v. Wayland

Court: North Dakota Supreme Court
Citation: 2020 ND 106
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Joey Wayland appealed after he was convicted by jury of Theft of Property and Possession of Drug Paraphernalia. Wayland contended his case should have been dismissed because his right to a speedy trial was violated by a continuance of his trial from March 11, 2019 to April 8, 2019. Wayland also contended the district court violated his right to remain silent by ordering him to submit to a mental health evaluation. Finding no reversible error, the North Dakota Supreme Court affirmed.

Schwindt v. Sorel

Court: North Dakota Supreme Court
Citation: 2020 ND 92
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Constitutional Law, Criminal Law, Government & Administrative Law

Gregory Schwindt appealed a district court judgment affirming a Department of Transportation hearing officer's revocation of his driving privileges for 180 days. Schwindt argued North Dakota's implied consent and refusal laws were unconstitutional, the hearing officer erred by considering the results of the horizontal gaze nystagmus (HGN) test, and the hearing officer erred in finding he refused to take a chemical test. After review, the North Dakota Supreme Court concluded the hearing officer's findings of fact were supported by a preponderance of the evidence, the conclusions of law were sustained by the findings of fact, and the decision to revoke Schwindt's driving privileges was in accordance with the law.

State ex rel. McDougald v. Greene

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2782
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied a writ of mandamus sought by Relator to compel Respondent, the public-records custodian at the Southern Ohio Correctional Facility (SOCF), to provide Relator with three public records and to pay Relator statutory damages and court costs associated with this litigation, holding that Relator was not entitled to either a writ of mandamus nor statutory damages. When Relator was an inmate at SOCF he submitted a public-records request to Respondent seeking three documents. Respondent provided one of the three documents. Relator then filed a complaint for a writ of mandamus seeking an order compelling Respondent to provide the two documents and to pay statutory damages and court costs associated with this litigation. The Supreme Court denied the writ of mandamus on the merits, holding that Respondent's response to Relator fully satisfied Respondent's obligations under Ohio Rev. Code 149.43, and therefore, Relator was not entitled a writ of mandamus, and there was no basis to award statutory damages.

State ex rel. Parker Bey v. Byrd

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2766
Opinion Date: May 5, 2020
Judge: Maureen O'Connor
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the judgment of the court of appeals denying Appellant's complaint for a writ of mandamus to compel the Cuyahoga County Clerk of Courts to produce various court records and denying the clerk's request that Appellant be declared a vexatious litigator, holding that the court of appeals erred in denying Appellant's complaint on the grounds that he did not invoke the Rules of

Superintendence as the basis for his request. Appellant sought copies of journal entries from his criminal case and a copy of the clerk of courts' records-retention schedule. The clerk largely denied the request. Appellant then filed a complaint for a writ of mandamus. The court of appeals denied Appellant's request for mandamus relief, concluding that the clerk had no clear legal duty to provide the requested records. The Supreme Court reversed, holding (1) this action to compel the production of journal entries from a 1995 case was properly brought under the Public Records Act; and (2) this Court declines to impose sanctions on Appellant or to declare him a vexatious litigator.

State v. Dangler

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2765
Opinion Date: May 5, 2020
Judge: DeWine
Areas of Law: Criminal Law

The Supreme Court reversed the judgment of the court of appeals vacating Defendant's conviction and sentence and reinstated the trial court's acceptance of Defendant's plea of no contest to sexual battery, holding that the trial court did not completely fail to comply with Crim.R.11(C)(2)(a), and there was nothing in the record to support a conclusion that Defendant would not have entered his plea had the trial court been more detailed in its explanation. On appeal, Defendant sought to vacate his plea of no contest, arguing that his plea was invalid because the trial court erred by not explaining more fully the obligations and restrictions that went with his status as a sex offender, in violation of Crim. R. 11(C)(2)(a). The court of appeals vacated the conviction without requiring Defendant to show prejudice, concluding that the trial court had completely failed to comply with Crim. R. 11(C)(2)(a). The Supreme Court reversed, holding (1) the trial court did not completely failed to comply with Crim R. 11(C)(2)(a)'s maximum-penalty-advisement requirement; and (2) because Defendant did not establish prejudice, he was not entitled to have his no-contest plea vacated for a failure to comply with Crim.R. 11(C).

Oregon v. Haji

Court: Oregon Supreme Court
Docket: S066254
Opinion Date: May 7, 2020
Judge: Nakamoto
Areas of Law: Constitutional Law, Criminal Law

After a grand jury issued an indictment charging defendant Hanad Ali Haji with multiple offenses, the district attorney determined that the indictment could be challenged by demurrer because the basis for joining those offenses was not expressly alleged. Instead of seeking another indictment from the grand jury, the district attorney obtained leave from the trial court to amend the indictment by adding allegations specifying the statutory basis for joinder, without adding factual allegations about the crimes. Defendant was convicted on some of the charges at trial, and the Court of Appeals affirmed. The issue this case presented for the Oregon Supreme Court's review centered on whether the district attorney could add allegations specifying the statutory basis for joinder of multiple offenses to an indictment instead of resubmitting the case to the grand jury. The Supreme Court determined that neither the statute permitting joinder of multiple offenses in a single indictment nor Article VII (Amended), section 5(6), of the Oregon Constitution precluded a district attorney, with approval of the trial court, from amending an indictment to add allegations specifying the statutory basis for joinder of multiple offenses. The Supreme Court affirmed the decision of the Court of Appeals, based in part on different reasoning, and affirmed the judgment of the circuit court.

South Carolina v. Durant

Court: South Carolina Supreme Court
Docket: 27964
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law

Appellant Larry Durant was convicted of second-degree criminal sexual conduct (CSC) for sexually abusing a teenage girl in his church office where he served as the pastor. Durant contended the trial court improperly permitted the State to introduce evidence of prior sexual abuse allegations as evidence of a common scheme or plan under Rule 404(b), SCRE, and that the State committed a "Brady" violation by failing to accurately disclose the criminal history of its witness. After review, the South Carolina Supreme Court affirmed the admissibility of the girls' testimony. "[W]hile the State failed to disclose the criminal background information of its witness, we find this information was not material." The Court found Durant exercised his position of trust, authority, and spiritual leadership to hold private prayer meetings with teen girls who had grown up in his church. He told them he was praying for their health and good fortune, and represented that part of this process was touching them sexually and having intercourse. Durant then warned the girls of misfortune if they refused or told anyone. Moreover, he used scripture as a means of grooming the children into performing sex acts. "These facts demonstrate the requisite logical connection between the prior acts of sexual abuse and the one forming the basis of the crime charged." The Court therefore affirmed Durant's conviction.

South Carolina v. Perry

Court: South Carolina Supreme Court
Docket: 27963
Opinion Date: May 6, 2020
Judge: Few
Areas of Law: Constitutional Law, Criminal Law

Petitioner Wallace Perry was convicted on two counts of criminal sexual conduct (CSC) with a minor in the first degree and two counts of CSC with a minor in the second degree for sexually assaulting two of his biological daughters. Prior to Perry's trial, the State made a motion to admit the testimony of Perry's stepdaughter from an earlier marriage that Perry sexually assaulted her twenty-two to twenty-seven years earlier. The State argued the trial court should not exclude the stepdaughter's testimony under Rule 404(b) of the South Carolina Rules of Evidence because it fit the

"common scheme or plan" exception. Perry objected to this testimony. The trial court initially reserved ruling on the issue, but later indicated it was inclined to allow the stepdaughter to testify. The jury convicted Perry on all counts, and the trial court sentenced him to thirty years in prison. The court of appeals affirmed. The South Carolina Supreme Court determined it was not enough to meet the "logical connection" standard for admission of other crimes under the common scheme or plan exception to Rule 404(b) that the defendant previously committed the same crime. "When evidence of other crimes is admitted based solely on the similarity of a previous crime, the evidence serves only the purpose prohibited by Rule 404(b), and allows the jury to convict the defendant on the improper inference of propensity that because he did it before, he must have done it again. ...The common scheme or plan exception demands more." The Supreme Court held State must show a logical connection between the other crime and the crime charged such that the evidence of other crimes "reasonably tends to prove a material fact in issue." The State must also convince the trial court that the probative force of the evidence when used for this legitimate purpose is not substantially outweighed by the danger of unfair prejudice from the inherent tendency of the evidence to show the defendant's propensity to commit similar crimes. In this case, the State did not meet its burden. Conviction was reversed and the matter remanded for a new trial.

South Carolina v. Quinn

Court: South Carolina Supreme Court
Docket: 27966
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law, White Collar Crime

Respondent Rick Quinn, Jr. was a former member of the South Carolina House of Representatives, representing constituents in Richland and Lexington counties from 1989-2004 and 2010-2017 and serving as House Majority Leader from 1999- 2004. He owned and operated a mail business called Mail Marketing Strategies (MMS) in Columbia, while his father owned and operated a political consulting firm, Richard Quinn & Associates (RQ&A). In 2014, Attorney General Alan Wilson designated First Circuit

Solicitor David Pascoe as special prosecutor to conduct a State grand jury investigation into alleged public corruption committed by current and former members of the South Carolina General Assembly. This case arose from a prior state grand jury investigation of former House Speaker Bobby Harrell, which resulted in six counts of misusing campaign funds, to which he pleaded guilty. During the course of the investigation into Speaker Harrell, SLED uncovered potentially criminal conduct by Representative Jimmy Merrill and Representative Rick Quinn, and a second grand jury investigation was initiated to investigate the conduct of these individuals. The investigation focused on Quinn's practice of using his office as House Majority Leader and leader of the House Republican Caucus to direct mailing and political services to his family's businesses. Quinn only admitted to a limited set of facts supporting the indictment. Believing the plea lacked a sufficient basis, the State moved to vacate Quinn's guilty plea, reconsider the sentence, and for the trial court's recusal. The State appealed the order denying its motions. After review, the South Carolina Supreme Court determined that the State could not appeal the guilty plea, the trial court did not abuse its discretion in sentencing, and there was no evidence of judicial bias or prejudice requiring the court to recuse itself. Therefore, the Court dismissed the State's appeal of the guilty plea, and affirmed as to all other issues.

Texas v. Arellano

Court: Texas Court of Criminal Appeals
Docket: PD-0287-19
Opinion Date: May 6, 2020
Judge: Slaughter
Areas of Law: Constitutional Law, Criminal Law

After Appellee Cesar Ramiro Arellano was arrested for driving while intoxicated, the arresting officer, Phillip Garcia, prepared a probable cause affidavit to support a search warrant for a blood draw. Officer Garcia submitted his sworn affidavit to the on-duty magistrate. Using a cursive signature, the magistrate signed the blank signature line of a form search warrant authorizing the search and seizure of Appellee's blood. Below the signature line appeared the words, "Magistrate, Victoria County, Texas."

Aside from the cursive signature, the magistrate's name was not typed or handwritten anywhere on the warrant. Upon execution of the search warrant, Appellee was charged with DWI. In the trial court, Appellee filed a motion to suppress all evidence stemming from the blood draw. At the pretrial suppression hearing, Appellee argued that the search warrant to obtain the blood specimen was facially invalid because the magistrate's signature was illegible in violation of the requirements of Code of Criminal Procedure Article 18.04(5). The trial court agreed, the court of appeals concurred, and the evidence was suppressed because of the illegible signature. The Texas Court of Criminal Appeals disagreed with both lower courts, finding the court of appeals erred in holding that reliance on the statutory good-faith exception was automatically precluded based on an illegible magistrate's signature in violation of Code of Criminal Procedure Article 18.04(5). Because the remaining issues in the case were not properly addressed by the court of appeals, judgment was vacated and the matter remanded for further proceedings.

Criminal Law Opinions

Kelly v. United States

Court: US Supreme Court
Docket: 18-1059
Opinion Date: May 7, 2020
Judge: Elena Kagan
Areas of Law: Criminal Law, Government & Administrative Law, White Collar Crime

During former New Jersey Governor Christie's 2013 reelection campaign,

Fort Lee's mayor refused to endorse Christie. Kelly, Christie's Deputy Chief of Staff, Port Authority Deputy Executive Director, Baroni, and another official decided to reduce from three to one the number of lanes reserved at the George Washington Bridge's toll plaza for Fort Lee's commuters. To disguise the political retribution, the lane realignment was said to be for a traffic study. Port Authority traffic engineers were asked to collect some numbers. An extra toll collector was paid overtime. The lane realignment caused four days of gridlock, ending only when the Port Authority's Executive Director learned of the scheme. The Third Circuit affirmed the convictions of Baroni and Kelly for wire fraud, fraud on a federally funded program, and conspiracy to commit those crimes. The Supreme Court reversed. The scheme did not aim to obtain money or property. The wire fraud statute refers to "any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses," 18 U.S.C. 1343. The federal-program fraud statute bars "obtain[ing] by fraud" the "property" (including money) of a federally funded program or entity, section 666(a)(1)(A). The statutes are limited to the protection of property rights and do not authorize federal prosecutors to set standards of good government. The Court rejected arguments that the defendants sought to take control of the Bridge's physical lanes or to deprive the Port Authority of the costs of compensating employees. Their realignment of the access lanes was an exercise of regulatory power; a scheme to alter a regulatory choice is not one to take government property. The time and labor of the employees were an incidental byproduct of that regulatory object. Neither defendant sought to obtain the services that the employees provided.

Gomes v. Silva

Court: US Court of Appeals for the First Circuit
Docket: 19-1656
Opinion Date: May 1, 2020
Judge: Stahl
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed the judgment of the district court denying Appellant's petition for a writ of habeas corpus, holding that, under the highly deferential standard prescribed by the Antiterrorism and Effective

Death Penalty Act for federal habeas review of state criminal convictions, Appellant's claims to habeas relief failed. Appellant was convicted in a Massachusetts superior court of murder in the first degree and related crimes. The Supreme Judicial Court (SJC) affirmed the convictions. Appellant subsequently petitioned the District Court for the District of Massachusetts for a writ of habeas corpus. The district court denied the petition but granted a certificate of appealability. The First Circuit affirmed, holding (1) sufficient evidence supported Appellant's conviction for first-degree murder as a joint venturer, and the SJC's sufficiency determination was not unreasonable; and (2) the SJC reasonably determined that the trial court's admission into evidence of certain items did not constitute error.

United States v. Perez-Couvertier

Court: US Court of Appeals for the First Circuit
Docket: 16-2186
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed Defendant's conviction of possessing with intent to distribute controlled substances in a protected area and conspiring to distribute controlled substances in a protected area, holding that the district court did not plainly err with respect to any of Defendant's challenges. Specifically, the First Circuit held (1) the district court did not commit plain error in admitting evidence of the conspiracy's activities occurring after he withdrew from the conspiracy or, alternatively, in not instructing the jury to ignore such evidence; (2) the district court did not plainly err in admitting evidence of a drug trafficking organization's violent acts; and (3) the delay between Defendant's indictment and arrest did not violate his Sixth Amendment right to a speedy trial.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Haverkamp

Court: US Court of Appeals for the Second Circuit

Docket: 18-3735
Opinion Date: May 4, 2020
Judge: Barrington D. Parker
Areas of Law: Criminal Law

Defendant pleaded guilty to one count of distribution and receipt of child pornography and one count of possession of child pornography. The district court sentenced him to 121 months of imprisonment, followed by five years of supervised release, and imposed a $200 mandatory special assessment under 18 U.S.C. 3013, as well as a $10,000 assessment under 18 U.S.C. 3014. The Second Circuit held that the district court did not abuse its discretion in sentencing defendant and his sentence was substantively reasonable. The court held that the text of the Justice for Victims of Trafficking Act (JVTA), 18 U.S.C. 3014, taken as a whole and in its context, is straightforwardly meant to be applied on a per-offender, not a per-count, basis. In this case, the district court erroneously applied the special assessment on a per-count, rather than per-offender, basis. Finally, the court held that the computer monitoring condition in question was reasonably related to the nature of defendant's offense. Accordingly, the court affirmed in part, vacated in part, and remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Mladen

Court: US Court of Appeals for the Second Circuit
Docket: 18-0616
Opinion Date: May 6, 2020
Judge: Amalya Lyle Kearse
Areas of Law: Criminal Law, Trusts & Estates

After defendant died while his appeal was pending, counsel moved for abatement of all incidents of the prosecution, requesting that the appeal be dismissed without a decision on the merits, that defendant's conviction be vacated, and that the matter be remanded to the district court with instructions to dismiss the indictment and order repayment to defendant's estate of the $20,000 fine and $100 special assessment. Because defendant was convicted upon his plea of guilty, and he neither did nor was permitted to challenge on appeal the merits of his conviction, the Second

Circuit denied as without merit so much of the motion as seeks (1) vacatur of his conviction, (2) dismissal of the count of the indictment on which he was convicted, and (3) repayment of the mandatory $100 special assessment. The court granted so much of the motion as requests dismissal of this appeal and a remand to the district court for vacatur of the imposed terms of imprisonment and supervised release and for an order requiring that the paid fine of $20,000 be repaid to defendant's estate.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Richardson

Court: US Court of Appeals for the Second Circuit
Docket: 19-412
Opinion Date: May 5, 2020
Judge: Menashi
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for distribution and possession with intent to distribute a controlled substance. The court held that the district court did not procedurally err by applying the career offender sentencing enhancement pursuant to USSG 4B1.1 because defendant's prior convictions of conspiracy to distribute a controlled substance in violation of 21 U.S.C. 841(a)(1) and 846, and attempted criminal possession of a controlled substance in violation of N.Y. Penal Law 220.16(1), qualify as controlled substance offenses, as defined in USSG 4B1.2(b). The court also held that the district court did not substantively err in sentencing defendant, because it properly considered his criminal history and accounted for his need for mental health and substance abuse treatment.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Rosemond

Court: US Court of Appeals for the Second Circuit
Docket: 18-3561
Opinion Date: May 1, 2020
Judge: Chin
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for murder-for-hire, conspiracy to commit murder-for-hire, murder through use of a firearm, and possession of a firearm during a murder-for-hire conspiracy. Defendant owned Czar Entertainment, a music management company that represented hip-hop, rap and R&B artists such as Jayceon Taylor, also known as "The Game." Taylor was a member of G-Unit, a rap group run by Curtis Jackson, also known as "50 Cent." Defendant's crimes stemmed from a rivalry with Violator Records, the company that managed G-Unit. The court rejected defendant's contention that his attorney was ineffective because he conceded that defendant paid for the victim to be shot, even though he told counsel not to make this concession. The court held that defendant failed to show that this was objectively unreasonable or that he would have been found not guilty had a different argument been advanced. In this case, there was ample evidence supporting counsel's strategy to concede that defendant ordered a shooting where, among other things, the government's key witness, who participated in the conspiracy and lured the victim to be shot, testified that defendant agreed to pay the shooter. The court also held that the district court did not abuse its broad discretion by admitting prior bad-act evidence under Federal Rule of Evidence 404(b)(1).

United States v. Lacerda

Court: US Court of Appeals for the Third Circuit
Docket: 15-2812
Opinion Date: May 5, 2020
Judge: Porter
Areas of Law: Criminal Law, White Collar Crime

VOG billed itself as an advocacy group helping victims of timeshare fraud get out of their timeshare debts. A jury determined that VOG had actually defrauded its customers and that three individual defendants (including Lacerda) were each knowing participants in that fraud. Lacerda was sentenced to 324 months' imprisonment for his leading role in the fraudulent enterprise. The Third Circuit affirmed the respective convictions and sentences. The court rejected a claim of impermissible "overview testimony" by an FBI agent; an officer who is familiar with an investigation or was personally involved may tell the story of that investigation—how the

investigation began, who was involved, and what techniques were used, and, with a proper foundation, may offer lay opinion testimony and testify about matters within his personal knowledge. The district court did not abuse its discretion when it disqualified defense counsel based on a conflict of interest; when it denied replacement counsel's motion for a continuance; when it excluded from evidence, as hearsay, an email sent by Lacerda to VOG's former CFO; in exercising its sentencing discretion; or by ordering the forfeiture of all VOG's gross proceeds.

Cucalon v. Barr

Court: US Court of Appeals for the Fourth Circuit
Dockets: 18-1292, 18-2206
Opinion Date: May 7, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law, Immigration Law

The Fourth Circuit denied petitions for review of the BIA's final order of removal. Applying the modified categorical approach, the court held that defendant's prior conviction for distribution of cocaine under Virginia Code 18.2-248, including distribution of that substance as an accommodation under Virginia Code 18.2-248(D), satisfies the federal definitions of an "aggravated felony" and of a crime "relating to a controlled substance" pursuant to 8 U.S.C. 1227(a)(2)(A)(iii), 1227(a)(2)(B)(i). The court also held that the district court did not abuse its discretion in denying petitioner's motion to reconsider.

United States v. Doctor

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4874
Opinion Date: May 4, 2020
Judge: Roger L. Gregory
Areas of Law: Criminal Law

The Fourth Circuit affirmed the district court's revocation of defendant's

supervised release and resulting sentence. The court held that the district court did not clearly err in finding the government proved he committed the assault underlying the supervised release violation; the district court did not commit plain error by adopting the violation report when announcing defendant committed Violation One; and, even if the district court erred in sentencing defendant for a Grade A violation, the error was harmless.

United States v. Lewis

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-4028
Opinion Date: May 4, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law

Defendant was convicted for possessing a firearm as a felon and sentenced to 63 months' imprisonment and a three-year period of supervised release. The district court additionally recommended, without explanation, that defendant receive addiction treatment while incarcerated and ordered, as a special condition of his supervised release, that defendant participate in an addiction treatment program. The Fourth Circuit held that defendant's sentence is procedurally unreasonable because the district court failed to provide an adequate explanation for imposing as a special condition of supervised release the requirement of addiction treatment. The court also held that the district court failed to address defendant's nonfrivolous mitigation arguments. Therefore, the court remanded for resentencing.

United States v. Jordan

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-40499
Opinion Date: May 1, 2020
Judge: Jennifer Walker Elrod
Areas of Law: Criminal Law

The Fifth Circuit affirmed the district court's grant of defendants' motion for a new trial on the basis of prejudicial outside influence on the jury. The court held that the district court did not abuse its broad discretion in granting the motion for a new trial without holding an evidentiary hearing. To the extent there is a bright-line rule applicable to allegations of outside influence on the jury, the court held that it was not applicable to this case. Furthermore, the district court did not abuse its discretion in exercising its prerogative, within broadly defined parameters, to handle the allegation of outside influence in the least disruptive manner possible in this unusual case. Finally, the district court permissibly concluded that the evidence showed a sufficient likelihood of prejudice to shift the burden to the Government, and that the Government did not (and could not) show "no reasonable possibility that the jury's verdict was influenced by" the CSO's comments.

United States v. Longoria

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-20201
Opinion Date: May 5, 2020
Judge: Gregg Costa
Areas of Law: Criminal Law

The Fifth Circuit held that the base offense level of 20 was proper for defendant's felon-in-possession crime involving a semiautomatic firearm that is capable of accepting a large capacity magazine. In this case, defendant failed to show that the district court clearly erred in relying on the FBI's agent statement about what was found in the apartment. The court clarified any confusion and held that the 2013 amendment to the commentary on the acceptance-of-responsibility Guideline does not clearly overrule its caselaw allowing the government to withhold the third point for acceptance of responsibility when it must litigate a suppression motion. The court held that Amendment 775 does not contain the unequivocal override needed to get past the court's precedent. Therefore, the court affirmed defendant's sentence.

Andrews v. Wayne County

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1992
Opinion Date: May 4, 2020
Judge: Suhrheinrich
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Canton Police received a 911 call from Andrews, who stated that his fiance, White, had physically attacked him. Officers arrested White. Andrews later took White's medications to the jail; a “KOP” policy allows inmates to keep certain drugs for self-administration. During an intake interview, White admitted to attempting to harm herself or commit suicide in the past but said she was not thinking of harming herself or having suicidal thoughts. An R.N. later evaluated White for nearly two hours, reported White’s chief complaints were “anxiety and depression,” and contacted a pharmacy to verify White’s prescriptions. The R.N. claims White did not exhibit any psychotic behavior, suicidal ideation, or psychiatric distress but ordered further evaluation. The next day, White was found on the floor with vomit on her face. She stated repeatedly that she took too many pills. The next day, White died in the hospital. The cause of death was Verapamil toxicity. The Sixth Circuit affirmed the rejection of a suit under 42 U.S.C. 1983 on summary judgment. A pretrial detainee does not have an automatic right to a suicide screening. The court rejected an argument that the KOP Policy was deficient because

it allows inmates in need of a psychological evaluation to participate before a psychiatrist's assessment of proper housing. The County had no history of suicides relative to the program, so any purported failure to train its employees in suicide risk assessment did not cause White's death.

Hicks v. Scott

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-3410
Opinion Date: May 1, 2020
Judge: Gibbons
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Cincinnati officers Scott and Moore responded to a reported incident of menacing. Two people alleged that Quandavier had driven by their home that night and threatened to kill them and that Quandavier carried guns. Officer Loreaux identified a vehicle fitting the description. Officers Scott, Moore, Schneider, and Loreaux, standing where the vehicle was parked, heard a voice. Thinking that it was likely Quandavier, they knocked on the exterior door of the residence. It swung open. Three officers entered without a warrant or exigent circumstances. Loreaux remained outside. Neither Scott nor Moore recall announcing their presence or identifying themselves. Inside and upstairs, Scott knocked on a closed door. As it opened, Scott "saw the barrel of a rifle pointed at [her] face." Moore and Schneider also saw Quandavier "nonchalantly" panning the rifle from left to right. Moore reached for its barrel as Scott fired her weapon. Moore did not instruct Quandavier to drop his rifle nor did Scott issue any commands before firing. Quandavier collapsed. The officers immediately radioed for paramedics. Before the officers applied handcuffs or provided first aid, they heard another voice and conducted a sweep. Quandavier died at the scene without receiving medical attention. In a suit under 42 U.S.C. 1983 for unlawful entry, excessive force, and deliberate indifference to a serious medical need, plus state claims, the district court granted the defendants summary judgment, citing qualified immunity. The Sixth Circuit reversed in part. The district court erred by granting qualified immunity to Scott, Moore, and Schneider on the unlawful entry claim. The court affirmed as to the excessive force, deliberate indifference, and state-law battery claims, and

remanded for evaluation of municipal liability and wrongful death claims.

Moody v. United States

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5015
Opinion Date: May 6, 2020
Judge: Thapar
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

At Moody's trial, the government produced a video of Moody cooking crack on his stove and waving a handgun while he mused about life in "the game" (drug trafficking). The court ruled that most of the video was admissible. Moody then tried to persuade the jury that the video was filmed more than five years before his indictment, putting it outside the statute of limitations. The jury convicted Moody. Due to prior felony drug convictions, Moody received enhanced, mandatory-minimum life sentences on several counts. He appealed on evidentiary grounds relating to the video. The Sixth Circuit affirmed. Later, Moody raised new claims on collateral review, 28 U.S.C. 2255. The district court found each claim meritless; most were also procedurally defaulted. The court authorized Moody to appeal. The Sixth Circuit dismissed the appeal, stating that none of the claims should have been certified. Reasonable jurists could not doubt that the district court properly denied relief on Moody's claims that he was deprived of his statute-of-limitations defense (violating due process); that the past convictions for his sentencing enhancements were not charged in the indictment or found by the jury; and that his previous lawyers failed to raise the first two claims sooner, violating his right to effective assistance of counsel.

United States v. Foreman

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1827
Opinion Date: May 7, 2020
Judge: Gibbons

Areas of Law: Criminal Law

In 2006, Foreman pled guilty to possession with intent to distribute 50 or more grams of cocaine base, possession with intent to distribute cocaine powder, and possession of a firearm during and in furtherance of a drug trafficking crime. Foreman admitted that he was responsible for approximately 135 grams of crack cocaine and 250 grams of cocaine powder. Foreman had a final Guidelines range of 322-387 months; he was sentenced to 240 months' imprisonment with respect to each drug conviction, to run concurrently, and 60 months' imprisonment for the firearms conviction, to run consecutively. When the First Step Act of 2018 made the Fair Sentencing Act retroactive, Foreman sought relief. The district court held that Foreman was not entitled to a plenary resentencing and declined to revisit his career offender status or hold an in-person hearing, then weighed the new statutory range applicable to Foreman's drug offenses, his recalculated Guidelines range, and the 18 U.S.C. 3553(a) factors, and reduced Foreman's total sentence to 172 months on each drug offense, to run concurrently, plus the mandatory consecutive 60 months on the firearms offense. The Sixth Circuit affirmed. Nothing in the First Step Act entitles a defendant to a plenary resentencing. First Step Act resentencings are not shielded from review for reasonableness; the district court thoroughly explained its rationale, carefully examining Foreman's circumstances, the amended penalty provisions, and the resulting changes to Foreman's Guidelines range.

United States v. Smith

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1724
Opinion Date: May 6, 2020
Judge: Bush
Areas of Law: Criminal Law

In 2006, Smith was convicted of conspiracy to distribute and to possess with intent to distribute 500 grams or more of powder or 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute

500 grams or more of cocaine powder; and being a felon in possession of a firearm. The court imposed a mandatory minimum life sentence. The Fair Sentencing Act subsequently lowered the penalty for cocaine-base offenses, made retroactive through the First Step Act. Smith moved for relief and received a reduced sentence of 360 months, the bottom of the new Guideline range for the counts impacted by the Fair Sentencing Act, to run concurrent to his existing 360-month sentence for his powder cocaine count that was not affected by the Fair Sentencing Act. The Sixth Circuit affirmed, rejecting an argument that the court should have imposed a below-Guideline sentence for all counts. The First Step Act is a limited grant of authority to impose a reduced sentence for certain offenses and does not require a plenary resentencing proceeding. Even assuming the court's obligation to explain its reasons for imposing the modified sentence was akin to that which applies in initial sentencing, the court's use of a modified AO 247 form order to explain its decision was not procedurally unreasonable.

Kirkman v. Thompson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1904
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Following a 1992 fight that involved Johnson, Herron, and Walker, two shooters shot the three men. Johnson survived. In the hospital, Johnson described a shooter by the street name "Duke," where Duke lived, and Duke's car. Johnson identified Duke and his accomplice from a photo array. Police pulled over a vehicle matching Johnson's description and arrested the driver, Kirkman, and the passenger, who matched the general description of the second shooter. Kirkman had a tattoo of Duke on his arm. Police took additional photos and presented a second photo array to Johnson, who identified them as the shooters. At trial, Johnson identified Kirkman and his passenger as the shooters. There was disputed testimony about the cause of the fight. Convicted of murder and aggravated battery with a firearm, Kirkman was sentenced to life in prison. Johnson had a

change of heart and submitted an affidavit, identifying Ford and an unknown man as the shooters. At Kirkman's post-conviction hearing, Johnson testified that he and his family had been threatened. Other testimony was inconsistent with Johnson's. Illinois courts denied post-conviction relief, finding that Johnson's recantation lacked credibility. Johnson later pleaded guilty for perjury but failed to specify which statement was false. The Seventh Circuit affirmed the denial of federal habeas relief. Illinois courts found Johnson's recantation lacked credibility. An evidentiary hearing satisfied Kirkman's due process rights. The Illinois trial court's determination defeated Kirkman's innocence and perjured testimony claims.

Tuduj v. Newbold

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1699
Opinion Date: May 1, 2020

Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Illinois prisoner Tuduj, having received extensive dental treatment, filed a "deliberate indifference" suit under 42 U.S.C. 1983 against his dentists and prison officials. The court recruited counsel to assist Tuduj in filing an amended complaint that complied with the Federal Rules of Civil Procedure. Counsel defended against two summary judgment motions, one arguing that Tuduj had not exhausted his administrative remedies and another on the merits While the motions were pending, Tuduj moved "for leave to represent himself," stating that he was "concerned that his counsel has filed a structurally, technically and legally insufficient response doomed to be denied." He asked to file his own brief, except "in the event this Honorable Court deems counsel's response … legally sufficient and Grants same[,] Plaintiff would be open to continued effective representation." A magistrate denied Tuduj's motion, stating that Tuduj "varie[d] between saying he would like to" represent himself and "indicating that he is happy with counsel's representation as long as he prevails." The district judge granted the motions for summary judgment, citing professional judgment and finding "no competent evidence" of any policy that unlawfully influenced dental-treatment decisions. The Seventh Circuit rejected Tuduj's argument

that the court wrongly denied his “unqualified” right to proceed pro se under 28 U.S.C. 1654, the due process clause, the equal protection clause, and the Seventh Amendment. The district court permissibly denied his equivocal request.

United States v. Gibson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1402
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Constitutional Law, Criminal Law

Officer Garrison encountered Gibson, a suspected drug trafficker, walking with a companion. Although initially a consensual encounter, Garrison questioned Gibson and his companion and briefly detained Gibson. After Gibson and his companion departed, Garrison spotted a methamphetamine pipe under his patrol vehicle. Local law enforcement conducted a traffic stop of Gibson’s vehicle in the curtilage of his driveway. A drug detection dog signaled the presence of a controlled substance in the vehicle, though nothing was found. Earlier that day, Gibson’s wife had met with DEA agents to tell them about methamphetamine inside the home. Police used information Mrs. Gibson had provided to obtain a search warrant. The search of the home uncovered drugs, drug paraphernalia, currency, and AK-47 rifles, which led to Gibson’s arrest. Gibson moved to suppress all evidence seized during the search, alleging he was detained without reasonable suspicion, unlawfully frisked, arrested without probable cause, stopped without probable cause or reasonable suspicion, and the traffic stop exceeded a permissible scope. Upon learning of his wife’s cooperation, Gibson also argued her statement was insufficiently attenuated to justify the search warrant. The Seventh Circuit affirmed the denial of the motion. Mrs. Gibson’s voluntary statement with DEA agents was independently sufficient to sustain findings of probable cause and sufficiently attenuated from subsequent events to preclude suppression.

United States v. Howell

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3157
Opinion Date: May 4, 2020
Judge: Scudder
Areas of Law: Constitutional Law, Criminal Law

In December 2012, Chicago Police officers responded to an anonymous call reporting a Hispanic man in a black sweater and black hat, carrying a bag, and climbing under a warehouse fence. They found someone who matched the description. After stopping and frisking him, they determined he was not engaged in any crime. Howell, walking toward the police, was white and wearing a black jacket and dark hat. When an officer approached to speak to him, Howell did not answer, looked panicked, and put his hands in his pockets. The officer patted Howell down and found a gun in his jacket. A federal gun charge followed. Howell unsuccessfully moved to suppress the gun. The Seventh Circuit reversed the denial of his suppression motion and vacated his conviction for possessing that gun. The court noted that the facts in the pretrial record differed significantly from those presented at trial, where the arresting officer testified that he decided to proceed with the pat-down only after Howell ignored a directive to remove his hands from his pockets. Viewing the pretrial record as a whole, the police lacked reasonable suspicion to frisk Howell. The court did not reverse Howell's conviction on a second gun charge that resulted from the execution of a warrant to search Howell's apartment three months after the initial stop and the ensuing discovery of more guns and ammunition.

United States v. Lewis

Court: US Court of Appeals for the Seventh Circuit
Dockets: 19-1911, 19-1262
Opinion Date: May 7, 2020
Judge: Joel Martin Flaum
Areas of Law: Criminal Law

In 2016-2018, Draheim managed a conspiracy, responsible for at least 38 packages of methamphetamine sent from California to La Crosse,

Wisconsin. Draheim supervised at least 11 associates who accepted shipments on her behalf, sent money transfers to California, distributed the meth, rented storage lockers, and collected money owed to her. Draheim provided vehicles. After agents placed a wiretap on her phone and seized several packages of meth en route to Draheim, her California supplier forced Draheim to find a new source. Draheim contacted Lewis, recently out of jail but still involved in the "meth scene." Lewis agreed to purchase meth from a new supplier. During the planned transaction, agents seized the package, which contained 28.6 grams of nearly pure meth. Police subsequently arrested Draheim after they found her daughter dead at home from an overdose; they took Lewis into custody for violating the terms of his state supervision. Both pleaded guilty to meth distribution offenses, 21 U.S.C. 841, 846. Draheim, facing a mandatory-minimum 10-year sentence, unsuccessfully argued that she qualified for "safety-valve relief." The court reasoned that she was the leader of her enterprise. Lewis unsuccessfully contended that he should be sentenced based only on his conviction, not other "relevant conduct." The Seventh Circuit affirmed Draheim's sentence but vacated as to Lewis. The fact that the defendant has engaged in other drug transactions is not, alone, sufficient to justify treating those transactions as relevant conduct for sentencing purposes.

Bakor v. Barr

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3011
Opinion Date: May 7, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit denied a petition for review of the BIA's determination that defendant committed two crimes involving moral turpitude. The court held that the BIA did not err in determining that petitioner's conviction for the Minnesota crimes of Criminal Sexual Conduct in the Fifth Degree and knowing failure to comply with Minnesota's sex offender registration statute were crimes involving moral turpitude. The court also held that petitioner failed to exhaust his remaining arguments and therefore declined to consider them.

Smith v. Titus

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2915
Opinion Date: May 5, 2020
Judge: Steven M. Colloton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eighth Circuit affirmed the district court's denial of habeas relief to petitioner based on his claim that the trial court violated his Sixth Amendment right to a public trial when it briefly closed the courtroom to spectators. The district court denied relief based on the ground that the Minnesota Supreme Court's decision was neither contrary to, nor an unreasonable application of, clearly established federal law. The court agreed and held that it was not objectively unreasonable for the Minnesota Supreme Court to deem it constitutional under the Sixth Amendment for the trial court to explain the parameters of an earlier public order on evidentiary issues in a brief nonpublic proceeding before the jury was sworn.

United States v. Becerra

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2777
Opinion Date: May 7, 2020
Judge: Stras
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm and ammunition. The court held that there was more than enough evidence for defendant's probation officer and other officers to believe defendant had a firearm on him. Therefore, the officers had probable cause to arrest him without a warrant. The court also held that defendant was in custody when he made both statements at issue. In this case, the "request for clarification" of defendant's statement that he had "something" in his car did not require Miranda warnings. Furthermore,

because the bulge in defendant's pocket could have been a gun or other weapon that would have posed a danger to the officers and others, they could ask about it without the formality of Miranda warnings. The court joined its sister circuits in declining to recognize the innocent-possessor defense. The court held that the district court did not err in excluding defendant's proposed testimony that he had found the handgun in his car earlier in the day and was about to hand it over to his probation officer. The court reasoned that, even if defendant intended to turn over the gun (or the ammunition) to his probation officer, it is still a crime to knowingly possess it in the first place. Finally, the court held that the district court did not err in denying defendant a sentencing reduction for acceptance of responsibility; the district court considered defendant's mitigation arguments at sentencing; and the district court did not abuse its discretion by imposing a within-Guidelines sentence.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Haynes

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1607
Opinion Date: May 5, 2020
Judge: Raymond W. Gruender
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that the government did not violate the Speedy Trial Act, and defendant failed to offer any evidence showing that Iowa and federal prosecutors colluded. Furthermore, the district court did not abuse its discretion by failing to hold an evidentiary hearing regarding the existence of collusion. The court also held that the district court did not err in denying the motion to suppress where defendant was not unlawfully seized. In this case, prior to producing the marijuana cigarette, the officer did not ask defendant any questions but merely ordered him off the bus, particularly as the smell of marijuana alerted the officer that evidence of a more serious crime than failure to use a turn signal might be uncovered during the stop. Finally, the court held that defendant was not unlawfully searched when the officer conducted a pat-down search incident to arrest; the evidence was sufficient to support defendant's conviction;

defendant's Rehaif claim failed because there was sufficient evidence that he knew of his prohibited status; and defendant's sentence was not substantively unreasonable nor an abuse of the district court's discretion.

United States v. Roberts

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1176
Opinion Date: May 1, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law

The Eighth Circuit vacated defendant's sentence imposed after he pleaded guilty to unlawful possession of a firearm as a previously convicted felon. The court held that, although the district court properly applied a four-level increase for possession of a firearm "in connection with another felony offense" under USSG 2K2.1(b)(6)(B), but that a two-level increase for "using a minor to commit a crime" under USSG 3B1.4 should not have applied. In this case, the evidence showed only that defendant engaged in an arm's-length transaction with a minor. The court held that this mere joint participation in an offense as a partner, does not amount to "use" of a minor "to commit the offense" of unlawful possession of a firearm by a felon. Accordingly, the court remanded for resentencing.

United States v. Wright

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1081
Opinion Date: May 5, 2020
Judge: Erickson
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's restitution order and certain special conditions of defendant's supervised release imposed after he pleaded guilty to sex trafficking of a child. The court found no error in the district court's restitution amount of $20,000, holding that the evidence

supported the amount in light of the aggregate harm to the victim. The court also held that the special conditions -- including a requirement that defendant participate in sex offender treatment including psychological testing and polygraph examinations, a prohibition against contact with any minors without pre-approval, and a requirement that defendant seek prior approval before using temporary commercial lodging, such as a hotel or motel -- where reasonably related to both the offense of conviction and to defendant's history of sexual contact with minor females.

Read Opinion Are you a lawyer? **Annotate this case**.

Benson v. Chappell

Court: US Court of Appeals for the Ninth Circuit
Docket: 13-99004
Opinion Date: May 1, 2020
Judge: Consuelo Maria Callahan
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's denial of petitioner's habeas corpus petition challenging his California conviction and death sentence for murder and other crimes. Petitioner raised two certified claims and two uncertified claims. The panel held that petitioner failed to show that the California Supreme Court's denials of his claims were unreasonable determinations of the facts or contrary to clearly established federal law. In this case, the California Supreme Court reasonably determined that an officer's misstatement during petitioner's interrogation that there was no death penalty in California did not prompt petitioner's confessions. Furthermore, petitioner failed to show that his statements were not knowing, voluntary, and intelligent. Even if petitioner were able to show that trial counsel was ineffective in not fully investigating his abuse as a child or his alleged organic brain injury, the panel held that the state court could reasonably have determined that any shortcoming in trial counsel's investigation was not prejudicial. Finally, the panel granted a certificate of appealability on petitioner's two uncertified claims and held that the state court reasonably rejected the claims that his trial counsel should have impeached the government's case and the prosecutor withheld material, exculpatory evidence.

Mero v. Barr

Court: US Court of Appeals for the Ninth Circuit
Docket: 17-70929
Opinion Date: May 1, 2020
Judge: Paul Jeffrey Watford
Areas of Law: Criminal Law, Immigration Law

The Ninth Circuit granted in part a petition for review of the BIA's finding that petitioner was removable based on his conviction for possession of visual presentation depicting sexual conduct of a person under 16 years of age, in violation of Nevada Revised Statutes (N.R.S.) 200.730. Applying the categorical approach, the panel compared the elements of N.R.S. 200.730 with the applicable definition of "sexual abuse of a minor," which requires proof of three elements. The panel held that N.R.S. 200.730 punishes a broader range of conduct because the Nevada statute does not require proof that the offender participated in sexual conduct with a minor. Therefore, petitioner's conviction did not qualify as sexual abuse of a minor. The panel explained that, with a possession-only offense such as N.R.S. 200.730, the minor depicted in the image is not the direct object of the offender's conduct, which is a necessary predicate for the offense to qualify as sexual abuse of a minor.

Romero-Millan v. Barr

Court: US Court of Appeals for the Ninth Circuit
Dockets: 16-73915, 17-72893, 18-71555
Opinion Date: May 4, 2020
Areas of Law: Criminal Law

The Ninth Circuit certified the following questions of state law to the Arizona Supreme Court: 1. Is Arizona's possession of drug paraphernalia statute, A.R.S. 13-3415, divisible as to drug type? 2. Is Arizona's drug possession statute, A.R.S. 13-3408, divisible as to drug type? 3. Put another way, is jury unanimity (or concurrence) required as to which drug or drugs listed in

A.R.S. 13-3401(6), (19), (20), or (23) was involved in an offense under either statute?

United States v. Yang

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10341
Opinion Date: May 4, 2020
Judge: Piersol
Areas of Law: Criminal Law

The Ninth Circuit affirmed the district court's denial of defendant's motion to suppress after he pleaded guilty to receipt of stolen mail and being a prohibited person in possession of a firearm. Defendant moved to suppress the evidence seized from his residence and the statements he made to law enforcement on the basis that the search warrant obtained by the Postal Inspection Service relied on evidence that was obtained illegally. The panel declined to address the potential Fourth Amendment privacy interests that may be implicated by the warrantless use of this Automatic License Plate Recognition (ALPR) technology, and held that defendant does not have a reasonable expectation of privacy in the historical location data of the Yukon under the facts of this case. The panel found no evidence in the record that Prestige Motors had a policy or practice of allowing lessees to keep cars beyond the rental period and Prestige had made affirmative attempts to repossess the vehicle by activating the GPS unit to locate and disable the vehicle. Therefore, defendant lacked standing to challenge the warrantless search of the database.

United States v. Neugin

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-7043
Opinion Date: May 1, 2020
Judge: Scott Milne Matheson, Jr.
Areas of Law: Constitutional Law, Criminal Law

Jack Neugin pled guilty to being a felon in possession of a firearm and ammunition on the condition that he could appeal the district court's denial of his motion to suppress evidence of the ammunition and firearm police found in the bed of his pickup truck. Officers responded to a reported verbal altercation between Neugin and his girlfriend. One of the officers saw ammunition in the back of the truck after he lifted the truck's camper lit do allow the girlfriend to retrieve her belongings. Neugin argued the officers discovered the evidence during an unconstitutional search; the district court concluded the officer was acting "in a lawful position" as "community caretaker," and found no Fourth Amendment violation. The Tenth Circuit reversed, finding that : (1) the officer conducted the without a warrant or probable cause, (2) the community caretaking exception to the warrant requirement does not apply, and (3) the inevitable discovery exception to the exclusionary rule does not apply. The evidence seized should have been suppressed.

United States v. Ramon

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-1221
Opinion Date: May 1, 2020
Judge: Gregory Alan Phillips
Areas of Law: Constitutional Law, Criminal Law

In 2016, after serving a federal prison sentence for having possessed a firearm after a felony conviction, Charles Ramon III began serving a mandatory term of supervised release. Before Ramon completed the term, his probation officer filed a petition, soon followed by two superseding petitions, to revoke Ramon's supervised release. At the revocation hearing, the district court found three violations—two for possessing a controlled substance and one for again illegally possessing a firearm. Of these, the most serious was Ramon's illegal possession of a firearm—a Grade B violation. For this, the court imposed the statutory maximum sentence of twenty-four months in prison. During the revocation hearing, the government mentioned that it might seek to indict Ramon for illegally possessing a firearm (the conduct in part underlying the revocation). Mindful of this, the district court ordered that Ramon's twenty-four-month sentence run

"consecutively to any sentences imposed previously or prospectively in federal or state court." At the hearing, Ramon did not object to the district court's running his sentence consecutively to future federal sentences. On appeal, Ramon argued that the district court exceeded its sentencing authority under 18 U.S.C. 3584(a) by ordering that Ramon's sentence run consecutively to future federal sentences. By the terms of 18 U.S.C. 3584(a), the Tenth Circuit determined the district court did err. But Ramon failed to object to this at trial, and on appeal, failed to show that the error was plain, thus, judgment was affirmed.

United States v. Richards

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-8044
Opinion Date: May 6, 2020
Judge: Baldock
Areas of Law: Constitutional Law, Criminal Law

In 2018, the Wyoming Division of Criminal Investigation (DCI) obtained a search warrant to review the contents of Defendant–Appellant Joshua Richards' Tumblr account. During the search and subsequent investigation, DCI agents discovered Defendant had re-blogged videos and images of child pornography to his private Tumblr so he could later access and view the materials. Defendant ultimately pleaded guilty to one count of accessing with intent to view child pornography. He was sentenced to twenty-four months' imprisonment followed by five years of supervised release. The district court imposed several special conditions of supervised release, which, as relevant here, related to drugs and alcohol and required Defendant to submit to polygraph testing. On appeal, Defendant argued the district court erred in imposing these special conditions. He also challenged the length of his prison sentence as substantively unreasonable. The Tenth Circuit determined the alcohol and drug conditions did not directly conflict with the relevant policy statement in the sentencing guidelines, so the district court's decision to impose the conditions was not manifestly unreasonable. And given the circumstances of the case, the Court determined the trial court did not abuse its discretion in imposing Defendant's twenty-four month sentence.

Andrews v. Warden

Court: US Court of Appeals for the Eleventh Circuit
Docket: 19-12443
Opinion Date: May 5, 2020
Judge: William Holcombe Pryor, Jr.
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of habeas relief under 28 U.S.C. 2241. Plaintiff alleged that President Obama commuted his "total sentence" of imprisonment, which included the 37 months of imprisonment that he served as part of his 2003 sentence. Based on the terms of the commutation order, the Constitution, and Supreme Court precedent, the court could not say that the Bureau erred in excluding the 37-month term of imprisonment from its recalculation.

Hollis v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 19-11323
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's motion to vacate his sentence under 28 U.S.C. 2255. The court held that petitioner cannot prove that his counsel rendered ineffective assistance, because petitioner's prior convictions in Alabama categorically qualify as predicate offenses under both the Armed Career Criminal Act and the career-offender provision of the Guidelines, and his prior conviction in Georgia qualifies as a predicate offense under the Act. Therefore, counsel did not perform deficiently by failing to raise a meritless objection.

Knight v. Florida Department of Corrections

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-12488
Opinion Date: May 1, 2020
Judge: Newsom
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eleventh Circuit affirmed the district court's denial of a 28 U.S.C. 2254 petition for habeas relief. Petitioner alleged that his counsel rendered ineffective assistance under Strickland v. Washington, 466 U.S. 668 (1984), by failing to adequately investigate and present mitigating evidence during the sentencing phase of his capital-murder trial. The court held that, even assuming that counsel performed deficiently in failing to investigate and present the mitigation evidence that petitioner now raises—thus satisfying the first prong of the two-part Strickland standard that governs ineffective-assistance claims—petitioner failed to carry his burden of demonstrating resulting prejudice.

United States v. Evans

Court: US Court of Appeals for the Eleventh Circuit
Docket: 17-15323
Opinion Date: May 6, 2020
Judge: Grant
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that, given the totality of the circumstances, it was reasonable for officers, mistaking a dog's whimper for a person in distress, to enter defendant's home without a warrant. Therefore, defendant's challenge to the district court's denial of his motion to suppress evidence failed. The court upheld the district court's imposition of a 22 offense level finding because defendant possessed a semiautomatic firearm capable of accepting a large capacity magazine under USSG 2K2.1(a)(3)(A)(i) (2016). The court also upheld defendant's sentencing enhancement under USSG 2K2.1(b)(4)(B) for possessing a rifle that had an

obliterated serial number.

United States v. McLellan

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-13289
Opinion Date: May 6, 2020
Judge: Boggs
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm. The court held that the district court did not abuse its discretion in permitting one of his arresting officers to offer testimony at trial on the correlation between guns and drug activity and to suggest that defendant was selling drugs; the court declined to evaluate the applicability of the Armed Career Criminal Act (ACCA), because the district court would have imposed the same sentence regardless of whether the mandatory minimum applied; and the court rejected defendant's claim under Rehaif v. United States, 139 S. Ct. 2191 (2019), and held that there was no plain error in the district court's failure to instruct the jury of the knowledge-of-status element and any error from the lack of a knowledge-of-status element in defendant's plea colloquy did not affect his substantial rights. Finally, the court remanded for clarification of the judgment to reflect the sentence the district court said it would have imposed if the Armed Career Criminal Act did not apply.

United States v. Russell

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-11202
Opinion Date: May 4, 2020
Judge: Charles R. Wilson
Areas of Law: Criminal Law

Defendant was convicted of possessing a firearm and ammunition as an immigrant illegally or unlawfully in the United States. After defendant

appealed his conviction and sentence, the Supreme Court issued its decision in Rehaif v. United States, 588 U.S. ___, 139 S. Ct. 2191 (2019), which reversed a decision from this court and held that under 18 U.S.C. 922(g), the government must prove that a defendant knew "his status as a person barred from possessing a firearm" when he knowingly possessed a firearm. The Eleventh Circuit held that defendant established the necessary prejudice under plain error review and vacated defendant's section 922(g) conviction, remanding for further proceedings. In this case, the district court committed an error that was made plain by the Supreme Court in Rehaif. Furthermore, defendant has sufficiently shown a reasonable probability that but for the error, the outcome of his trial would have been different.

Welch v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 14-15733
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's 28 U.S.C. 2255 motion to vacate his sentence. The court held that defendant's prior 1996 Florida convictions for robbery qualified as violent felonies under the Armed Career Criminal Act's (ACCA) elements clause, and rejected his contention that the court's decision in his direct appeal carved out a narrow exception to pre-1997 Florida robbery convictions obtained in Florida's Fourth District Court of Appeal. The court also held that petitioner's prior Florida felony battery conviction was a violent felony under the ACCA in light of the court's holding in United States v. Vail-Bailon, 868 F.3d 1293 (11th Cir. 2017) (en banc), cert. denied, 138 S. Ct. 2620 (2018).

State v. Trujillo

Court: Arizona Supreme Court
Docket: CR-18-0531-PR

Opinion Date: May 4, 2020
Judge: Gould
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court held that, for purposes of imposing mandatory sex offender registration under Ariz. Rev. Stat. 13-3821(A)(3), a judge has the authority to make the necessary factual finding that the victim is under the age of eighteen and that Arizona's sex offender registration statutes are civil regulatory statutes, not criminal penalties. Defendant was convicted by a jury of one count of sexual abuse. In reaching its verdict the jury determined that the victim was "fifteen or more years of age." At sentencing, the trial court ordered Defendant to register as a sex offender. Defendant objected, arguing that, pursuant to Apprendi v. New Jersey, 530 U.S. 466 (2000), a jury was required to find whether Defendant was under eighteen pursuant to section 13-3821(A)(3). The trial court denied the objection. The court of appeals affirmed. The Supreme Court affirmed, holding (1) Apprendi does not apply to factual findings that are necessary to impose registration because sex offender registration is a civil regulatory requirement, not a criminal penalty; and (2) the trial judge did not violate Apprendi by determining that the victim was under eighteen.

Walker v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 183
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for declaratory judgment, holding that Appellant could not use a declaratory-judgment action to collaterally attack his criminal conviction. Appellant was convicted of first-degree murder and second-degree unlawful discharge of a firearm from a vehicle. The court of appeals affirmed. Years later, Appellant filed a petition for declaratory judgment alleging that he was denied due process in his criminal trial when the court admitted the prior testimony of an unavailable witness and that this admission violated the Confrontation Clause. The circuit court denied the petition. The Supreme Court affirmed, holding that a declaratory judgment action provided no relief on these grounds.

Specifically, the Supreme Court held (1) no error occurred during jury selection; (2) Defendant was not prejudiced by any misstatements by the prosecutor; (3) assuming certain evidence was inadmissible, the court's admonition to the jury and the court's instruction cured the resultant harm; (4) the trial court erred in admitting testimony that the victim was afraid of Defendant, but the error was harmless; and (5) Defendant's remaining allegations of error were without merit.

California v. Law

Court: California Courts of Appeal
Docket: E072845(Fourth Appellate District)
Opinion Date: May 5, 2020
Judge: Slough
Areas of Law: Constitutional Law, Criminal Law

In 2001, appellant Terrell Law and his codefendant Brett May committed a home invasion robbery, during which one of them shot and killed one of the residents. They were tried jointly in 2006 before two separately empaneled juries who found them both guilty of first degree felony murder with the special circumstance described in Penal Code section 190.2(a)(17(A) and (d). Though Law's jury found he was not the shooter, they nonetheless concluded he was a "major participant" in the underlying robbery and acted "with reckless indifference to human life." In 2018, the Legislature enacted Senate Bill No. 1437 (2017-2018 Reg. Sess.) which, among other things, amended the definition of felony murder in Penal Code section 189. The legislation also added Penal Code section 1170.95, which established a procedure for vacating murder convictions predating the amendment that could not be sustained under the new definition of felony murder. Law challenged the trial court's summary denial of his section 1170.95 petition to vacate his murder conviction, arguing the trial court erred by reviewing his record of conviction and determining the jury's true finding on the special circumstance rendered him ineligible for relief. The Court of Appeal concluded it was proper for a trial court to review the record of conviction when determining whether a section 1170.95 petitioner had stated a prima

facie claim for relief. Additionally, the Court concluded Law "undoubtedly qualifies" as a major participant who acted with reckless indifference to human life, a conclusion that rendered him ineligible for relief under section 1170.95. The Court therefore affirmed the order denying his petition.

California v. Sanchez

Court: California Courts of Appeal
Docket: E072647(Fourth Appellate District)
Opinion Date: May 7, 2020
Judge: Menetrez
Areas of Law: Constitutional Law, Criminal Law

Victor Sanchez was charged with first degree murder, but pled guilty to voluntary manslaughter. He filed a petition under Penal Code section 1170.95 to vacate that conviction. The trial court denied the petition, concluding that Sanchez was ineligible for relief because he was not convicted of murder. After review, the Court of Appeal joined other courts that held section 1170.95 did not apply to defendants convicted of voluntary manslaughter. The Court also rejected Sanchez's argument that section 1170.95 violated equal protection.

Galeotti v. International Union of Operating Engineers

Court: California Courts of Appeal
Docket: A157785(First Appellate District)
Opinion Date: May 6, 2020
Judge: Henry E. Needham, Jr.
Areas of Law: Criminal Law, Labor & Employment Law, White Collar Crime

Galeotti, a former Union Local 3 employee, filed a complaint against Local 3 and three of individual union leaders, alleging that the individual defendants required union employees to pay them money to keep their jobs, lied about the reason for collecting the money, and caused Local 3 to terminate Galeotti's employment when he failed to pay the full amount demanded. The trial court dismissed his second amended complaint without leave to amend.

The court of appeal reversed in part, reasoning that a threat to terminate employment can provide a basis for an extortion claim and that the allegations of the second amended complaint stated a cause of action for wrongful termination in violation of the public policy underlying the extortion statutes. The complaint stated a cause of action for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO; 18 U.S.C. 1961), based on the predicate acts of extortion, but did not state a cause of action for interference with prospective economic advantage.

In re I.A.

Court: California Courts of Appeal
Docket: B296549(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Tangeman
Areas of Law: Criminal Law, Juvenile Law

Where a juvenile court vacates its true finding on a generic murder allegation and redesignates it as a finding on an uncharged target offense, and does so before a minor has had the opportunity to contest the court's findings or orders, the minor may challenge the sufficiency of the evidence of the redesignated offense on appeal. The Court of Appeal held that there was insufficient evidence to support the juvenile court's decision sustaining the allegations that I.A. possessed a concealable firearm and committed vandalism. Therefore, the court reversed the juvenile court's findings, vacating the jurisdiction and disposition order and dismissing the Welfare and Institutions Code section 602 petition.

People v. Edwards

Court: California Courts of Appeal
Docket: A158055(First Appellate District)
Opinion Date: May 1, 2020
Judge: Petrou
Areas of Law: Criminal Law

In 2006, Edwards fired an assault weapon into an apartment, killing the victim. Edwards pled guilty to possession of a firearm as a felon and was convicted of second-degree murder and shooting into an inhabited dwelling. Following the enactment of Senate Bill 1437, Edwards filed a Penal Code 1170.95 resentencing petition, checking form boxes indicating that he was convicted under a theory of felony murder or murder under the natural and probable consequences doctrine and that he could not now be convicted of 1st or 2nd-degree murder because of changes to Penal Code 188 and 189. Edwards submitted the jury instructions and the transcript of the prosecutor's closing remarks that Edwards acted with "both express malice, specific intent to kill, as well as implied malice," described as "an intentional act, the natural consequences of which are dangerous to human life, and at the time that the individual acted, they knew of the danger, and they deliberately acted with conscious disregard." The court denied the petition, finding that Edwards was convicted on a valid theory of murder that survived the statutory changes. The court of appeal affirmed. The superior court did not err in considering the record of conviction. Edwards could not meet the statutory prerequisites for even filing a section 1170.95 petition because he was not charged or convicted of second-degree felony murder or murder under the natural or probable consequences doctrine directed at accomplice liability.

Read Opinion Are you a lawyer? **Annotate this case**.

People v. Thomkins

Court: California Courts of Appeal
Docket: A141375(First Appellate District)
Opinion Date: May 1, 2020
Judge: Streeter
Areas of Law: Criminal Law

On Easter night in 2011, gunfire erupted at an Oakland bar-restaurant, leaving two people dead and five wounded. Thompkins and Fox were convicted of two counts of first-degree murder for the benefit of a criminal street gang, with firearm discharge enhancements, a multiple-murder special circumstance, and five counts of attempted murder with great bodily injury findings, gang enhancements, and firearm discharge enhancements.

Thompkins was convicted as the shooter and Fox as an accomplice. Both were sentenced to life in prison without possibility of parole, plus 224 years to life. After Thompkins was sentenced, Fox stated under oath he was the actual shooter and Thompkins knew nothing about Fox's intentions. Thompkins claimed this new testimony, and his attorney's incompetent reaction entitled him to a new trial and submitted a declaration by another gang member who was present that night. The court of appeal concluded that Thompkins's attorney was not ineffective for failing to bring a motion to recall the sentence followed by a new trial motion because Thompkins failed to show prejudice. The attempted murder convictions and related enhancements must be reversed for both defendants based on the flawed kill zone instruction. Introducing evidence that defendants admitted their gang affiliation at jail intake violated the defendants' privilege against self-incrimination but was harmless. There was some evidentiary error that was harmless due to the wealth of admissible evidence establishing the gang enhancements. Arguments based on the statutory amendments to Penal Code 188 and 189 must be raised in the trial court (section 1170.95). The case must be remanded so the judge may exercise his discretion whether to impose or strike the firearm enhancements on under Penal Code 12022.53.

People v. Torres

Court: California Courts of Appeal
Docket: B295043(Second Appellate District)
Opinion Date: May 4, 2020

Areas of Law: Criminal Law

After the trial court admitted a witness's former testimony, the Court of Appeal applied People v. Roldan (2012) 205 Cal.App.4th 969, 975–985, and reversed. Roldan held that, before invoking the former testimony exception, prosecutors should react appropriately to the impending deportation risk by following four steps: alert the defense to the risk; videotape the preliminary hearing testimony; use judicial measures to try to delay deportation; and consider an array of other specific measures. In this case, the prosecution conceded that prosecutors were simply unaware of Roldan and did not comply with it. The court held that Roldan controls the court's analysis

because the facts about prosecutorial diligence are weaker here than they were in Roldan, where the appellate court held for the defense. In this case, the record before deportation is of prosecutorial inaction where the prosecution's brief in this court admits the investigating officer did not do anything to ensure that the witness would not be deported, nor is there other evidence of prosecutorial efforts to delay the witness's departure or to videotape his testimony at the preliminary hearing.

Colorado In Interest of G.S.S.

Court: Colorado Supreme Court
Citation: 2020 CO 32
Opinion Date: May 4, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law, Juvenile Law

After being charged, fourteen-year-old G.S.S. was detained for more than three months without bail, even though he had not entered a plea and had not been tried on the charges against him. At that point, G.S.S.'s counsel filed a motion to dismiss, arguing that G.S.S.'s "right to a speedy trial" had been violated under section 19-2-509(4)(b), C.R.S. (2019). The trial court

agreed and dismissed the case against G.S.S. with prejudice, and the court of appeals affirmed in Colorado in Interest of G.S.S., 2019 COA 4M, __ P.3d __. The Colorado Supreme Court then granted certiorari to determine the proper remedy for a violation of the sixty-day limit in section 19-2-509(4)(b). The Supreme Court determined the remedy for a section 19-2-509(4)(b) violation was for the trial court to immediately hold a bail hearing and order the juvenile's release. Accordingly, the judgment of the court of appeals was reversed.

Barringer v. Halkitis

Court: Florida Supreme Court
Docket: SC19-1071
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court held that Jay Barringer's quo warranto petition filed in this case was a frivolous proceeding brought before the Supreme Court by a state prisoner and sanctioned Barringer by barring him from filing any further pro se requests for relief related to his criminal case. Barringer was convicted of one count of attempted sexual battery of a victim less than twelve years old and sentenced to twenty-five-years' imprisonment. In 2011, Barringer began filing petitions in the Supreme Court. The Court did not grant the relief sought in any of Barringer's filings. In the instant quo warranto petition Barringer challenged his conviction on the ground that the information was defective, a claim Barringer previously raised by way of a habeas petition. The Supreme Court denied the petition and found that Barringer abused the Court's limited judicial resources. The Court sanctioned Barringer by directing the Clerk of Court to reject any future pleadings or other requests for relief submitted by Barringer that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Franqui v. State

Court: Florida Supreme Court
Docket: SC19-203
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's claim of intellectual disability, raised in successive motions for postconviction relief under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying relief. Appellant was convicted of first-degree murder and sentenced to death in two separate cases. After the United States Supreme Court decided Hall v. Florida, 572 U.S. 701 (2014), Appellant filed successive motions for postconviction relief in both of his capital cases, asserting that the circuit court's denials of his previous claims of intellectual disability were based on the court's improper interpretation of Florida's intellectual disability statute. The circuit court summarily denied the motions. The Supreme Court reversed and remanded for an evidentiary hearing on the issue of intellectual disability. After a hearing, the circuit court denied the claim. The Supreme Court affirmed, holding (1) the circuit court did not err in denying Appellant's intellectual disability claim; and (2) Appellant was not entitled to relief under Hurst v. Florida, 136 S. Ct. 616 (2016), or Hurst v. State, 202 So. 3d 40 (Fla. 2016).

Hicks v. State

Court: Florida Supreme Court
Docket: SC19-1978
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied the instant mandamus petition filed by Hicks and sanctioned Hicks by barring him from filing any further pro se requests for relief related to his criminal case. Hicks was convicted of one count of lewd and lascivious conduct by a person over eighteen years of age on a victim under sixteen years of age. Since 2016, Hicks filed thirteen pro se requests for relief in the Supreme Court related to his criminal case. The

Court did not grant the relief sought in any of Hicks' filings. In the instant petition, Hicks sought a writ of mandamus compelling the circuit court to comply with the requirements of Fla. R. Crim. P. 3.850 by filing a copy of an order denying his second postconviction motion with the clerk of court. The Supreme Court dismissed the petition and found that Hicks abused this Court's limited judicial resources. The Court directed the Clerk of Court to reject any future pleadings or other requests for relief submitted by Hicks that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Burley v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0356
Opinion Date: May 4, 2020
Judge: Boggs
Areas of Law: Constitutional Law, Criminal Law

In 1992, Douglas Burley pled guilty to malice murder. He moved for an out-of-time appeal in 2019, claiming that his right to appeal was frustrated by his plea counsel's erroneous advice that he could not appeal his conviction because it was the product of a guilty plea. The trial court denied Burley's motion. After review, the Georgia Supreme Court vacated the trial court's judgment and remanded the case with direction to hold a hearing to determine whether ineffective assistance of counsel frustrated Burley's right to appeal.

Carter v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0022
Opinion Date: May 4, 2020
Judge: David E. Nahmias
Areas of Law: Construction Law, Criminal Law

Brandon Carter was convicted by jury of malice murder and two firearm offenses in connection with the shooting death of Terrance Baker. On appeal, Carter contended the trial court erred by admitting certain hearsay statements into evidence and by violating his constitutional right to be present during his trial. Finding no reversible error, the Georgia Supreme Court affirmed conviction.

Clarke v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0258
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Rupert Clark was convicted by jury for the malice murder of his wife, Rosemarie Lebert-Clark. He was also convicted of possession of a firearm during the commission of a felony. On appeal, he argued he received ineffective assistance of trial counsel, and that the trial court erred in admitting certain evidence, violated the continuing witness rule by sending out with the deliberating jury printouts of text messages, and by failing to instruct the jury that a defendant's uncorroborated confession was not alone sufficient to warrant a conviction. Finding no reversible error after reviewing the trial court record, the Georgia Supreme Court affirmed conviction.

Collins v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0195
Opinion Date: May 4, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Renita Collins was tried for murder along with co-defendant Michael Stallworth. Collins appealed her convictions for murder and possession of a firearm while in commission of a felony in connection with the shooting

death of Keith Jacobs. On appeal. Collins contended she was denied a fair trial due to juror misconduct, the trial court abused its discretion by not allowing her to subpoena juror testimony to show that misconduct had occurred, and the trial court abused its discretion when it failed to excuse a prospective juror for cause. Finding no reversible error, the Georgia Supreme Court affirmed conviction.

Dawson v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0217
Opinion Date: May 4, 2020
Judge: Warren
Areas of Law: Constitutional Law, Criminal Law

Lavaris Dawson was convicted by jury of felony murder and other crimes in connection with the shooting death of Mamadou Camara. On appeal, Dawson challenged the sufficiency of the evidence supporting his convictions, and argued the trial court erred in admitting Dawson's statements to a detective during an interview because those statements were impermissibly induced by a hope of benefit, and that Dawson was denied his due process right to a timely appeal. After review, the Georgia Supreme Court disagreed and affirmed Dawson's convictions.

Evans v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0007
Opinion Date: May 4, 2020
Judge: McMillan
Areas of Law: Constitutional Law, Criminal Law

Jimmy Evans was convicted by jury for murder and other crimes relating to the 2006 deaths of Tavoris Calhoun and Dezmon Thomas. On appeal, Evans argued that because he was visibly intoxicated at the time he made statements to law enforcement and consented to a search of his home and

person, the statements and consent were involuntarily given and the trial court should have granted his motion for new trial on this ground. Furthermore, Evans argued that his trial counsel was ineffective for failing to file a motion to suppress at trial on the same basis. Because Evans failed to show error or ineffective assistance of counsel, the Georgia Supreme Court affirmed his conviction.

Hill v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0285
Opinion Date: May 4, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Esco Hill was convicted by jury of malice murder and other crimes relating to the stabbing death of Alford Morris in 2014. On appeal, Hill argued the trial court committed reversible error by requiring him to be visibly shackled for the duration of his six-day trial. After review of the trial court record, the Georgia Supreme Court concurred this was reversible error, consequently, reversed judgment of conviction. Because the Court concluded the evidence at trial was sufficient to sustain Hill's conviction, the State could re-try him. The Court did not address Hill's remaining enumerations of error, "as they are not likely to recur in the event of a retrial."

Whitehead v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0171
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Javis Whitehead was convicted by jury of murder and other crimes in connection with the shooting death of Dominique Larry. On appeal, Whitehead challenged the sufficiency of the evidence presented to rebut his claim of self-defense and to convict him for murder beyond a reasonable doubt. He also argued the trial court erred in denying his motion to suppress his custodial statement, and in refusing to excuse for cause the District Attorney from the panel of prospective jurors prior to the conclusion of voir dire. Finding no merit to these contentions, the Georgia Supreme Court affirmed conviction.

Read Opinion Are you a lawyer? **Annotate this case**.

Idaho v. Blythe

Court: Idaho Supreme Court - Criminal
Docket: 46992
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Nicholas Blythe appealed after he was convicted of possessing a controlled substance. He conditionally pled guilty, reserving the right to challenge his sentence. On appeal, he argued the district court erred in denying his motion to suppress certain evidence found because the evidence presented at trial was found in violation of Blythe's Fourth Amendment rights. After review, the Idaho Supreme Court determined the search at issue took place before an arrest occurred, and because no rationale justifying a search incident to arrest was sufficiently present here, the search of Blythe's shoes was not a valid search incident to arrest. Therefore, the district court erred in holding that the search was reasonable under the Fourth Amendment. Blythe's conviction was vacated, the district court order denying Blythe's motion to suppress was reversed, and the matter remanded for further proceedings.

Idaho v. Glodowski

Court: Idaho Supreme Court - Criminal
Docket: 47131
Opinion Date: May 6, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

David Glodowski appealed after he was convicted for failing to update his sex-offender registration in violation of Idaho Code section 18-8309. He argued the district court erred by ruling that his prior conviction under a Wisconsin statute was "substantially equivalent" to Idaho statutes that required sex-offender registration in Idaho. After review, the Idaho Supreme Court determined the district court improperly allowed the State to seek a

redetermination of the “substantially equivalent” element given that the Idaho Bureau of Criminal Identification made a final determination on that element. However, because the State put forth sufficient evidence to prove that element, and the district court’s jury instruction accomplished the same purpose, the Supreme Court concluded the error was harmless. Accordingly, the Court found no reversible error in the district court’s decision to grant the State’s motion and provide the jury instruction. Therefore, judgment of conviction was affirmed.

State v. Gordon

Court: Iowa Supreme Court
Docket: 18-1099
Opinion Date: May 1, 2020
Judge: Brent R. Appel
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for assault on a peace officer with a dangerous weapon, a felony, and several misdemeanors, holding that Defendant did not receive ineffective assistance of counsel. After Defendant pleaded guilty, he absconded. He was later returned to

custody. On appeal, Defendant argued that he received ineffective assistance of counsel because the plea bargain contained an unlawful term. Specifically, Defendant argued that the plea bargain's provision that he would be released from jail for a forty-eight-hour furlough after pleading guilty was illegal and that his trial counsel committed ineffective assistance in obtaining the illegal benefit for him. The Supreme Court affirmed, holding that where Defendant entered into the plea agreement with the illegally lenient sentence, he could not benefit from that sentence and then attack the plea bargain.

State v. Craig

Court: Kansas Supreme Court
Docket: 119660
Opinion Date: May 1, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction and sentence for first-degree felony murder, holding that there was no error in the proceedings below. A jury found Defendant guilty of both first-degree felony murder and second-degree intentional murder. At sentencing, Defendant moved for a new trial and judgment notwithstanding the verdict, arguing that the jury must have had reasonable doubt on the first-degree felony murder theory because it convicted him of second-degree murder for the same killing. The district court dismissed the second-degree murder conviction and sentenced Defendant for the felony murder over his objection. The Supreme Court affirmed, holding (1) the district court did not err when it sentenced Defendant on felony murder instead of declaring a mistrial because Defendant did not establish that the jury failed to find each element of the felony murder beyond a reasonable doubt or that the jury's first- and second-degree murder verdicts were so irreconcilable as to require a new trial; and (2) the district court did not err in declining to give an instruction on voluntary intoxication.

State v. Lemmie

Court: Kansas Supreme Court
Docket: 119439
Opinion Date: May 1, 2020
Judge: Carol A. Beier
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions of first-degree felony murder, aggravated robbery, conspiracy to commit aggravated robbery, criminal possession of a firearm, fleeing and eluding, and interference with law enforcement, holding that Defendant's arguments on appeal failed. Specifically, the Supreme Court held (1) any possible violation of Defendant's Fifth Amendment right in the admission of a witness's testimony about Defendant giving the witness phone passcodes was undoubtedly harmless; (2) the district court did not err by admitting hearsay statements as statements of a coconspirator and contemporaneous statements; (3) the State introduced sufficient evidence to convict Defendant of first-degree murder; and (4) the district judge did not abuse its discretion by admitting testimony that Defendant was upset over a meth pipe that went missing.

State v. Mullen

Court: Maine Supreme Judicial Court
Citation: 2020 ME 56
Opinion Date: May 5, 2020
Judge: Connors
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction for reckless conduct and aggravated criminal mischief, holding that the trial court did not abuse its discretion by offering Defendant a continuance of the trial in lieu of excluding his medical records. On appeal, Defendant argued that the trial court abused its discretion by denying his motion to suppress his personal medical records as a sanction for the State's late seizure of the records. The Supreme Judicial Court agreed that the State's conduct undermined the purpose of Maine Rule of Unified Criminal Procedure 18(b) but that the court's offer of a continuance in lieu of the exclusion of the evidence

constituted an appropriate response to the State's conduct.

Commonwealth v. Billingslea

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12715
Opinion Date: April 30, 2020
Judge: Cypher
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's convictions and the decision of the Appeals Court denying Defendant's motion to vacate the entry of his appeal from his convictions in that court and to have the case entered directly in the Supreme Judicial Court, holding that a direct appeal from the third conviction of a habitual offender pursuant to Mass. Gen. Laws ch. 279, 25(b) may be entered in the Appeals Court. Defendant was indicted for serious felonies arising from a brutal attack and rape. In addition to charging the specific felony, each indictment also alleged that the sentence for that felony should be enhanced pursuant to the habitual criminal provision Mass. Gen. Laws ch. 279, 25(a) or the habitual offender provision of section 25(b), or both. After he was convicted, Defendant moved to have the case entered directly in the Supreme Judicial Court. The Appeals Court denied the motion. The Supreme Judicial Court affirmed Defendant's convictions, holding (1) this direct appeal was entitled to the unique review prescribed by Mass Gen. Laws ch. 278, 33E, and the Appeals Court may conduct such section 33E review; (2) Defendant was not impermissibly allowed to waive his right to a jury trial on the sentencing enhancement provisions of the indictments; and (3) Defendant was not entitled to reversal of his convictions on any other ground.

Commonwealth v. Martin

Court: Massachusetts Supreme Judicial Court
Docket: SJC-08768
Opinion Date: May 5, 2020

Judge: Ralph D. Gants
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree and the denial of his motion for a new trial and declined to exercise its authority under Mass. Gen. Laws ch. 278E to reduce Defendant's conviction to murder in the second degree, holding that Defendant was not entitled to relief on any of his allegations of error. Defendant was convicted of murder in the first degree on the theory of felony-murder. Defendant filed a motion for a new trial, which was denied. The Supreme Judicial Court affirmed, holding (1) Defendant's motion for a new trial was correctly denied because Defendant was not prejudiced by counsel's ineffective assistance; (2) this Court declines to extend the reach of the Court's holding in Commonwealth v. Brown, 477 Mass. 805 (2017), to Defendant's case; and (3) trial judge erred when he declined Defendant's request that the jury be instructed on the elements of voluntary and involuntary manslaughter, but the error was not prejudicial in the context of the judge's other instructions.

State v. Branch

Court: Minnesota Supreme Court
Docket: A18-1055
Opinion Date: May 6, 2020
Judge: Lorie Skjerven Gildea
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's sentences for drive-by shooting at an occupied vehicle and second-degree assault, holding that Minn. Stat. 609.035 did not prohibit the sentences for both offenses when the crimes arose from a single behavioral incident. The district court sentenced Defendant to forty-eight months for drive-by shooting at an occupied vehicle and thirty-six months for second-degree assault and imposed the two sentences to run concurrently. The court of appeals affirmed. The Supreme Court affirmed, holding that, under this Court's analysis in State v. Ferguson, 808 N.W.2d 586 (Minn. 2012), the district court properly imposed multiple sentences in this case.

Galloway v. Mississippi

Court: Supreme Court of Mississippi
Citation: 2018-CA-01427-SCT
Opinion Date: May 7, 2020
Judge: Beam
Areas of Law: Constitutional Law, Criminal Law

Leslie Galloway appealed the denial of his 2015 petition for post-conviction relief (PCR) pertaining to his 2007 guilty plea to carjacking, a conviction that was used as an aggravating circumstance in Galloway's 2010 capital-murder trial at which Galloway received a death sentence. Galloway claimed in the petition that his defense counsel Wendy Martin had an actual

conflict of interest because, before becoming his defense counsel, Martin had served as an assistant district attorney in the same case, unbeknownst to Galloway. The trial court ruled that Galloway's PCR claim was time barred under Mississippi's Uniform Post-Conviction Collateral Relief Act (UPCCRA), having been filed more than seven years after Galloway's conviction for carjacking. The trial court alternatively found no merit to Galloway's PCR claim, time bar notwithstanding. Accordingly, the trial court denied Galloway's PCR petition. The Mississippi Supreme Court agreed with the trial court that Galloway's PCR claim was time barred under the UPCCRA. The Court also agreed there was no merit to Galloway's PCR claim.

City of Missoula v. Zerbst

Court: Montana Supreme Court
Citation: 2020 MT 108
Opinion Date: May 5, 2020
Judge: Beth Baker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction for sexual assault, holding that the municipal court erred when it instructed the jury on a definition of "consent" from the 2017 sexual assault statute and not the applicable 2015 statute, and the erroneous jury instruction prejudicially affected Defendant's substantial rights. At trial, the court instructed the jury, over Defendant's objection, on the definition of consent contained in recent amendments to the sexual assault statute. On appeal, Defendant argued that the municipal court failed to apply the correct law when instructing the jury on the elements of the claimed offense. The district court denied the appeal. The Supreme Court reversed, holding (1) the instructions, as a whole, did not fully and fairly instruct the jury on the law applicable to the case; and (2) Defendant's substantial due process right was prejudiced by the erroneous jury instruction.

State v. Degarmo

Court: Nebraska Supreme Court
Citation: 305 Neb. 680
Opinion Date: May 1, 2020
Judge: Stacy
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of driving under the influence, holding that Defendant consented to a chemical test of his urine and, therefore, the results of the urine test were admissible. A law enforcement officer stopped Defendant for an expired registration. Based on his observations, the officer, a certified drug recognition evaluation expert, administered field sobriety tests. The officer concluded that Defendant was under the influence of marijuana arrested Defendant for driving under the influence and then took him to a detoxification center. Thereafter, a chemical test of Defendant's urine confirmed the presence of marijuana. On appeal, Defendant challenged the admission of the results of the urine test. The Supreme Court affirmed, holding that Defendant voluntarily consented to the warrantless search of his urine, and therefore, the search fell within a recognized exception to the warrant requirement.

People v. Holz

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02682
Opinion Date: May 7, 2020
Judge: Fahey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals held that N.Y. Crim. Proc. Law (CPL) 710.70(2) grants a defendant the right to review of a suppression decision when the order related exclusively to a count that was satisfied by a guilty plea but was not one to which the defendant pleaded guilty. Defendant was charged with two counts of burglary in the second degree. The first count related to a laptop computer, and the second count related to jewelry. Defendant moved to suppress the jewelry, but Supreme Court denied the motion. Defendant then pleaded guilty to one count of burglary in the second degree as charged in the count pertaining to the theft of the laptop computer, in satisfaction of the

count charging the burglary of jewelry. On appeal, Defendant argued that Supreme Court erred in denying his motion to suppress the jewelry. The Appellate Division affirmed, concluding that it was jurisdictionally precluded from reviewing the suppression order. The Court of Appeals reversed, holding (1) Defendant's right to appellate review of Supreme Court's suppression order was secured by CPL 710.70(2); and (2) because the Appellate Division did not reach the underlying suppression question the case must be remitted to the Appellate Division for further proceedings.

People v. Maffei

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02680
Opinion Date: May 7, 2020
Judge: DiFiore
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals affirmed the order of the Appellate Division concluding on direct appeal that Defendant was not entitled to relief on his ineffective assistance of counsel claim, holding that Defendant, on this record, did not sustain his burden to establish that counsel was constitutionally ineffective. After a jury trial, Defendant was convicted of second-degree murder. On appeal, Defendant argued that his trial counsel's failure to challenge a prospective juror constituted ineffective assistance of counsel. The Appellate Division affirmed. The Court of Appeals affirmed, holding (1) the record was inadequate to review Defendant's ineffective assistance of counsel claim; and (2) the appropriate procedure for the litigation of Defendant's challenge to his counsel's performance was a N.Y. Crim. Proc. Law 440.10 motion.

State v. Bailey

Court: North Carolina Supreme Court
Docket: 360A19
Opinion Date: May 1, 2020

Judge: Davis
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the order of the trial court denying Defendant's motion to suppress evidence seized during the execution of a search warrant, holding that the warrant supported by probable cause. Defendant pled guilty to the offense of trafficking in cocaine while preserving his right to appeal the denial of his motion to suppress. On appeal, Defendant argued that the trial court erred in denying his motion to suppress because the facts contained in the affidavit were insufficient to establish probable cause to search his residence. The court of appeals affirmed. The Supreme Court affirmed, holding that the affidavit contained facts that were sufficient to provide a nexus between the residence and suspected criminal activity, and therefore, the warrant was supported by probable cause.

State v. Ellis

Court: North Carolina Supreme Court
Docket: 340A19
Opinion Date: May 1, 2020
Judge: Robin E. Hudson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the decision of the Court of Appeals affirming the trial court's denial of Defendant's motion to suppress evidence, holding that there was no reasonable suspicion to justify the law enforcement officer's stop when Defendant signaled with his middle finger from the passenger side window of a moving vehicle. While assisting a stranded motorist, the officer turned his attention to another car traveling on the roadway, a white SUV. Defendant had his arm outside the passenger window and gestured with his middle finger, making an up-and-down motion. Believing that Defendant was committing the crime of disorderly conduct, the officer pursued and then stopped the SUV. At trial, Defendant moved to suppress the officer's testimony, arguing that there was no reasonable suspicion to justify the stop. The trial court denied the motion. Defendant pleaded guilty to resisting, delaying, or obstructing a public

officer. The court of appeals affirmed the trial court's denial of Defendant's motion to suppress. The Supreme Court reversed, holding that the specific, articulable facts did not establish reasonable suspicion of the crime of disorderly conduct.

State v. Hobbs

Court: North Carolina Supreme Court
Docket: 263PA18
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction, holding that the trial court clearly erred in ruling that Defendant failed to prove purposeful discrimination with respect to the State's use of peremptory challenges to strike three jurors without considering all of the evidence presented by Defendant. Defendant was found guilty of one count of first-degree murder and other crimes. On appeal, Defendant argued that the trial court erred by failing to grant three objections that he made under Batson v. Kentucky, 476 U.S. 79 (1986). The court of appeals affirmed Defendant's convictions. The Supreme Court reversed, holding (1) the court of appeals erred in its analysis of Defendant's Batson claims with respect to the three jurors; and (2) as to all three jurors, remand was required for reconsideration of whether Defendant proved purposeful discrimination in each case.

Dodge v. North Dakota

Court: North Dakota Supreme Court
Citation: 2020 ND 100
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

Richard Dodge appealed from a district court order denying his application for post-conviction relief. Dodge was charged with five felonies and a misdemeanor in December 2015. Dodge was appointed counsel. In April 2016, Dodge's counsel moved the court to withdraw because the attorney-client relationship was "irreparably broken and rendered unreasonably difficult." The court granted the motion, and Dodge was appointed substitute counsel in May 2016. In July 2016, Dodge himself filed a "motion to dismiss counsel." The court denied Dodge's motion. Five months after the deadline for motions and plea agreements, Dodge's counsel sought to have Dodge submit to a psychiatric examination. This request was denied, the trial court found no evidence, and the the court itself made no observations, that Dodge was incompetent to stand trial. After this denial, Dodge himself again moved to dismiss his trial counsel, and due to the allegations Dodge made in his motion, counsel moved to withdraw. The trial court denied both motions, and instead, required the attorney to appear as standby counsel and assist Dodge during trial if requested, but relieved him of any further obligations to consult with Dodge. The case proceeded to trial. At the beginning of trial, the court gave Dodge the option of representing himself or

having his attorney represent him. Dodge chose to have his attorney represent him. Because his attorney had not prepared for trial and had no communication with Dodge since he moved to withdraw, Dodge's attorney asked for a brief recess to consult with Dodge. During the recess, a settlement was reached. Dodge agreed to enter Alford pleas on all counts, waived a presentence investigation, and agreed to be sentenced immediately after entering his pleas. Dodge was immediately sentenced following his guilty pleas, and thereafter sought post-conviction relief on grounds he was not competent to enter his pleas, and that he received ineffective assistance of trial counsel. After review, the North Dakota Supreme Court concluded the district court's finding that Dodge was competent when he entered his pleas was not clearly erroneous, and disposed of his claim of ineffective assistance of counsel.

Hewitt v. NDDOT

Court: North Dakota Supreme Court
Citation: 2020 ND 102
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Criminal Law, Government & Administrative Law

Larry Hewitt appealed a district court judgment affirming the North Dakota Department of Transportation's revocation of his driving privileges. Hewitt claimed the Department's hearing file was improperly admitted at the administrative hearing. After review, the North Dakota Supreme Court affirmed, concluding the hearing file was properly admitted as a self-authenticating copy of an official record.

Kastet v. NDDOT

Court: North Dakota Supreme Court
Citation: 2020 ND 91
Opinion Date: May 7, 2020
Judge: Daniel J. Crothers

Areas of Law: Criminal Law, Government & Administrative Law

The North Dakota Department of Transportation (Department) appealed the district court's reversing a hearing officer's decision suspending Holden Kastet's driving privileges for 365 days. The Department argued the hearing officer did not abuse his discretion in admitting the chemical breath test, and State Highway Patrol Trooper King scrupulously complied with the approved method for testing Kastet's breath on the Intoxilyzer 8000. After review, the North Dakota Supreme Court concurred with the Department and reversed the district court judgment. The matter was remanded with instructions to reinstate the hearing officer's decision.

North Dakota v. Dahl

Court: North Dakota Supreme Court
Citation: 2020 ND 87
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

The State of North Dakota appealed a district court order denying its motion to resume prosecution against Matthew Dahl and dismissing the case. In December 2014, the State charged Dahl with two counts of theft. Dahl did not appear on the charges until he was arrested on a bench warrant in February 2017. In mid-April 2017, the State mailed Dahl a pretrial diversion agreement. Dahl signed and returned the notarized agreement dated May 3, 2017. On May 9, 2017, the state's attorney signed and filed the agreement with the district court, and the court approved the agreement the same day. Under the agreement, the State agreed to suspend prosecution for "two years from the date of execution" conditioned on Dahl's timely payment of restitution. Dahl failed to make minimum monthly restitution payments. On June 6, 2019, the State moved to resume prosecution, alleging Dahl violated the pretrial diversion agreement by his non-payment. The district court held a hearing on the State's motion in August 2019. The court concluded the pretrial agreement was executed when Dahl signed it on May 3, 2017. The court then denied the State's motion to resume prosecution as untimely under N.D.R.Crim.P. 32.2(d)(2), and dismissed the complaint

against Dahl. After review, the North Dakota Supreme Court reversed, concluding the district court erred in determining the State's motion was untimely, and remanded for further proceedings.

North Dakota v. Foster

Court: North Dakota Supreme Court
Citation: 2020 ND 85
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Akeem Foster was convicted by jury of Terrorizing and Carrying a Concealed Weapon. Foster contended on appeal he was denied a fair trial because he was asked during cross-examination if other witnesses were lying and because the prosecutor expressed personal beliefs about the evidence during closing arguments. Foster also argued there was insufficient evidence to convict him of either charge. After review, the North Dakota Supreme Court affirmed Foster's conviction for Carrying a Concealed Weapon, but reversed his conviction for Terrorizing. The Court found Foster was improperly asked to provide an opinion on the veracity and credibility of the State's witnesses. The improper questioning was prejudicial and denied Foster a fair trial on the terrorizing charge.

North Dakota v. Kolstad

Court: North Dakota Supreme Court
Citation: 2020 ND 97
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

In December 2018, Officer Nelson of the University of North Dakota Police Department conducted a traffic stop of Stanley Kolstad for suspicion of driving under the influence. Kolstad performed field sobriety tests and a preliminary breath test (PBT). Prior to performing the PBT, Kolstad informed

Nelson that he had asthma. Nelson testified he was unable to obtain a PBT result because Kolstad was filling his cheeks with air while performing the test. Kolstad was arrested for DUI and refusing to submit to a chemical test. Kolstad was transported to the UND police station to be given an Intoxilyzer breath test. Prior to the Intoxilyzer test, Nelson read Kolstad the implied consent advisory. But, because Nelson was not a certified operator of the Intoxilyzer machine, Officer Waltz conducted the test. Prior to the test, Kolstad informed Waltz he had asthma. The Intoxilyzer test results were deficient. Waltz testified Kolstad was not providing enough air for the test machine to provide a valid result. Kolstad was charged with driving under the influence and refusing to submit to a chemical test. Kolstad's counsel made a discovery request to the State seeking copies of any audio or video recordings taken by police officers. Kolstad's counsel also requested the State inform him whether any sound or video recordings taken of Kolstad were subsequently "altered, edited, destroyed, or discarded." The State provided Kolstad's counsel with dash camera footage from Nelson's police car that had been taken at the scene of the arrest, but the State did not provide any body camera footage from either Nelson or Waltz. Upon learning that Waltz's body camera footage was successfully uploaded to UND servers, Kolstad's counsel moved to dismiss the case because the State did not provide any body camera footage in discovery as requested. The district court ultimately dismissed the refusal to submit to a chemical breath test charge as a sanction for failing to provide the body camera footage. The State appealed, arguing the alleged discovery violation did not rise to a constitutional violation of Kolstad's due process rights, and the district court abused its discretion in dismissing the refusal charge. Kolstad argued the district court's order dismissing the refusal charge was not appealable, and if it was, the court did not abuse its discretion in dismissing the charge. The North Dakota Supreme Court concluded there was nothing in the record to indicate the district court adequately considered an alternative or less severe sanction to dismissal, and by not considering a less severe sanction, the trial court erred. The district court's order dismissing the refusal charge was reversed, and the matter remanded for further proceedings.

North Dakota v. Michel

Court: North Dakota Supreme Court
Citation: 2020 ND 101
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

Kevin Michel was convicted by jury of knowingly receiving stolen property. Jamestown Police began investigating theft of tires from Northwest Tire in October 2017. About ten months later, Thomas Melland and Andrew Heckelsmiller became suspects in the investigation. Heckelsmiller told police he had sold stolen tires to Michel. In August 2018, Detective LeRoy Gross spoke with Michel about the stolen tires. Michel acknowledged he had bought tires from Heckelsmiller and Melland. Michel also told Detective Gross he stopped buying tires from Heckelsmiller and Melland after seeing a Facebook post from Northwest Tire offering a $500 reward for information regarding stolen tires. Detective Gross told Michel, "There's going to be a lot of restitution these two boys are going to have to come up with unless we can get some tires back." Michel said he had sold several of the tires but still had some of them. Michel turned over seven new tires to Detective Gross. Representatives from Northwest Tire and J&L Service identified the tires as some of those stolen from their shops. During the jury's deliberations, the jury submitted a note with written questions to the court. Michel argued on appeal the district court erred by not specifically answering the jury's questions and instead referring them to the existing jury instructions. After review, the North Dakota Supreme Court affirmed the criminal judgment, except as to the award of restitution. The award was reversed because the district court awarded more than what was required to make the victims whole. The matter was remanded for a redetermination of restitution.

North Dakota v. Wayland

Court: North Dakota Supreme Court
Citation: 2020 ND 106
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Joey Wayland appealed after he was convicted by jury of Theft of Property and Possession of Drug Paraphernalia. Wayland contended his case should have been dismissed because his right to a speedy trial was violated by a continuance of his trial from March 11, 2019 to April 8, 2019. Wayland also contended the district court violated his right to remain silent by ordering him to submit to a mental health evaluation. Finding no reversible error, the North Dakota Supreme Court affirmed.

Schwindt v. Sorel

Court: North Dakota Supreme Court
Citation: 2020 ND 92
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Constitutional Law, Criminal Law, Government & Administrative Law

Gregory Schwindt appealed a district court judgment affirming a Department of Transportation hearing officer's revocation of his driving privileges for 180 days. Schwindt argued North Dakota's implied consent and refusal laws were unconstitutional, the hearing officer erred by considering the results of the horizontal gaze nystagmus (HGN) test, and the hearing officer erred in finding he refused to take a chemical test. After review, the North Dakota Supreme Court concluded the hearing officer's findings of fact were supported by a preponderance of the evidence, the conclusions of law were sustained by the findings of fact, and the decision to revoke Schwindt's driving privileges was in accordance with the law.

State ex rel. McDougald v. Greene

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2782
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied a writ of mandamus sought by Relator to

compel Respondent, the public-records custodian at the Southern Ohio Correctional Facility (SOCF), to provide Relator with three public records and to pay Relator statutory damages and court costs associated with this litigation, holding that Relator was not entitled to either a writ of mandamus nor statutory damages. When Relator was an inmate at SOCF he submitted a public-records request to Respondent seeking three documents. Respondent provided one of the three documents. Relator then filed a complaint for a writ of mandamus seeking an order compelling Respondent to provide the two documents and to pay statutory damages and court costs associated with this litigation. The Supreme Court denied the writ of mandamus on the merits, holding that Respondent's response to Relator fully satisfied Respondent's obligations under Ohio Rev. Code 149.43, and therefore, Relator was not entitled a writ of mandamus, and there was no basis to award statutory damages.

State ex rel. Parker Bey v. Byrd

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2766
Opinion Date: May 5, 2020
Judge: Maureen O'Connor
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the judgment of the court of appeals denying Appellant's complaint for a writ of mandamus to compel the Cuyahoga County Clerk of Courts to produce various court records and denying the clerk's request that Appellant be declared a vexatious litigator, holding that the court of appeals erred in denying Appellant's complaint on the grounds that he did not invoke the Rules of Superintendence as the basis for his request. Appellant sought copies of journal entries from his criminal case and a copy of the clerk of courts' records-retention schedule. The clerk largely denied the request. Appellant then filed a complaint for a writ of mandamus. The court of appeals denied Appellant's request for mandamus relief, concluding that the clerk had no clear legal duty to provide the requested records. The Supreme Court reversed, holding (1) this action to compel the production of journal entries from a 1995 case was properly brought under the Public Records Act; and

(2) this Court declines to impose sanctions on Appellant or to declare him a vexatious litigator.

State v. Dangler

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2765
Opinion Date: May 5, 2020
Judge: DeWine
Areas of Law: Criminal Law

The Supreme Court reversed the judgment of the court of appeals vacating Defendant's conviction and sentence and reinstated the trial court's acceptance of Defendant's plea of no contest to sexual battery, holding that the trial court did not completely fail to comply with Crim.R.11(C)(2)(a), and there was nothing in the record to support a conclusion that Defendant would not have entered his plea had the trial court been more detailed in its explanation. On appeal, Defendant sought to vacate his plea of no contest, arguing that his plea was invalid because the trial court erred by not explaining more fully the obligations and restrictions that went with his status as a sex offender, in violation of Crim. R. 11(C)(2)(a). The court of appeals vacated the conviction without requiring Defendant to show prejudice, concluding that the trial court had completely failed to comply with Crim. R. 11(C)(2)(a). The Supreme Court reversed, holding (1) the trial court did not completely failed to comply with Crim R. 11(C)(2)(a)'s maximum-penalty-advisement requirement; and (2) because Defendant did not establish prejudice, he was not entitled to have his no-contest plea vacated for a failure to comply with Crim.R. 11(C).

Oregon v. Haji

Court: Oregon Supreme Court
Docket: S066254
Opinion Date: May 7, 2020
Judge: Nakamoto

Areas of Law: Constitutional Law, Criminal Law

After a grand jury issued an indictment charging defendant Hanad Ali Haji with multiple offenses, the district attorney determined that the indictment could be challenged by demurrer because the basis for joining those offenses was not expressly alleged. Instead of seeking another indictment from the grand jury, the district attorney obtained leave from the trial court to amend the indictment by adding allegations specifying the statutory basis for joinder, without adding factual allegations about the crimes. Defendant was convicted on some of the charges at trial, and the Court of Appeals affirmed. The issue this case presented for the Oregon Supreme Court's review centered on whether the district attorney could add allegations specifying the statutory basis for joinder of multiple offenses to an indictment instead of resubmitting the case to the grand jury. The Supreme Court determined that neither the statute permitting joinder of multiple offenses in a single indictment nor Article VII (Amended), section 5(6), of the Oregon Constitution precluded a district attorney, with approval of the trial court, from amending an indictment to add allegations specifying the statutory basis for joinder of multiple offenses. The Supreme Court affirmed the decision of the Court of Appeals, based in part on different reasoning, and affirmed the judgment of the circuit court.

South Carolina v. Durant

Court: South Carolina Supreme Court
Docket: 27964
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law

Appellant Larry Durant was convicted of second-degree criminal sexual conduct (CSC) for sexually abusing a teenage girl in his church office where he served as the pastor. Durant contended the trial court improperly permitted the State to introduce evidence of prior sexual abuse allegations as evidence of a common scheme or plan under Rule 404(b), SCRE, and that the State committed a "Brady" violation by failing to accurately disclose the criminal history of its witness. After review, the South Carolina Supreme

Court affirmed the admissibility of the girls' testimony. "[W]hile the State failed to disclose the criminal background information of its witness, we find this information was not material." The Court found Durant exercised his position of trust, authority, and spiritual leadership to hold private prayer meetings with teen girls who had grown up in his church. He told them he was praying for their health and good fortune, and represented that part of this process was touching them sexually and having intercourse. Durant then warned the girls of misfortune if they refused or told anyone. Moreover, he used scripture as a means of grooming the children into performing sex acts. "These facts demonstrate the requisite logical connection between the prior acts of sexual abuse and the one forming the basis of the crime charged." The Court therefore affirmed Durant's conviction.

South Carolina v. Perry

Court: South Carolina Supreme Court
Docket: 27963
Opinion Date: May 6, 2020
Judge: Few
Areas of Law: Constitutional Law, Criminal Law

Petitioner Wallace Perry was convicted on two counts of criminal sexual conduct (CSC) with a minor in the first degree and two counts of CSC with a minor in the second degree for sexually assaulting two of his biological daughters. Prior to Perry's trial, the State made a motion to admit the testimony of Perry's stepdaughter from an earlier marriage that Perry sexually assaulted her twenty-two to twenty-seven years earlier. The State argued the trial court should not exclude the stepdaughter's testimony under Rule 404(b) of the South Carolina Rules of Evidence because it fit the "common scheme or plan" exception. Perry objected to this testimony. The trial court initially reserved ruling on the issue, but later indicated it was inclined to allow the stepdaughter to testify. The jury convicted Perry on all counts, and the trial court sentenced him to thirty years in prison. The court of appeals affirmed. The South Carolina Supreme Court determined it was not enough to meet the "logical connection" standard for admission of other crimes under the common scheme or plan exception to Rule 404(b) that the defendant previously committed the same crime. "When evidence of other

crimes is admitted based solely on the similarity of a previous crime, the evidence serves only the purpose prohibited by Rule 404(b), and allows the jury to convict the defendant on the improper inference of propensity that because he did it before, he must have done it again. ...The common scheme or plan exception demands more." The Supreme Court held State must show a logical connection between the other crime and the crime charged such that the evidence of other crimes "reasonably tends to prove a material fact in issue." The State must also convince the trial court that the probative force of the evidence when used for this legitimate purpose is not substantially outweighed by the danger of unfair prejudice from the inherent tendency of the evidence to show the defendant's propensity to commit similar crimes. In this case, the State did not meet its burden. Conviction was reversed and the matter remanded for a new trial.

South Carolina v. Quinn

Court: South Carolina Supreme Court
Docket: 27966
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law, White Collar Crime

Respondent Rick Quinn, Jr. was a former member of the South Carolina House of Representatives, representing constituents in Richland and Lexington counties from 1989-2004 and 2010-2017 and serving as House Majority Leader from 1999- 2004. He owned and operated a mail business called Mail Marketing Strategies (MMS) in Columbia, while his father owned and operated a political consulting firm, Richard Quinn & Associates (RQ&A). In 2014, Attorney General Alan Wilson designated First Circuit Solicitor David Pascoe as special prosecutor to conduct a State grand jury investigation into alleged public corruption committed by current and former members of the South Carolina General Assembly. This case arose from a prior state grand jury investigation of former House Speaker Bobby Harrell, which resulted in six counts of misusing campaign funds, to which he pleaded guilty. During the course of the investigation into Speaker Harrell, SLED uncovered potentially criminal conduct by Representative Jimmy Merrill and Representative Rick Quinn, and a second grand jury

investigation was initiated to investigate the conduct of these individuals. The investigation focused on Quinn's practice of using his office as House Majority Leader and leader of the House Republican Caucus to direct mailing and political services to his family's businesses. Quinn only admitted to a limited set of facts supporting the indictment. Believing the plea lacked a sufficient basis, the State moved to vacate Quinn's guilty plea, reconsider the sentence, and for the trial court's recusal. The State appealed the order denying its motions. After review, the South Carolina Supreme Court determined that the State could not appeal the guilty plea, the trial court did not abuse its discretion in sentencing, and there was no evidence of judicial bias or prejudice requiring the court to recuse itself. Therefore, the Court dismissed the State's appeal of the guilty plea, and affirmed as to all other issues.

Texas v. Arellano

Court: Texas Court of Criminal Appeals
Docket: PD-0287-19
Opinion Date: May 6, 2020
Judge: Slaughter
Areas of Law: Constitutional Law, Criminal Law

After Appellee Cesar Ramiro Arellano was arrested for driving while intoxicated, the arresting officer, Phillip Garcia, prepared a probable cause affidavit to support a search warrant for a blood draw. Officer Garcia submitted his sworn affidavit to the on-duty magistrate. Using a cursive signature, the magistrate signed the blank signature line of a form search warrant authorizing the search and seizure of Appellee's blood. Below the signature line appeared the words, "Magistrate, Victoria County, Texas." Aside from the cursive signature, the magistrate's name was not typed or handwritten anywhere on the warrant. Upon execution of the search warrant, Appellee was charged with DWI. In the trial court, Appellee filed a motion to suppress all evidence stemming from the blood draw. At the pretrial suppression hearing, Appellee argued that the search warrant to obtain the blood specimen was facially invalid because the magistrate's signature was illegible in violation of the requirements of Code of Criminal Procedure Article 18.04(5). The trial court agreed, the court of appeals

concurred, and the evidence was suppressed because of the illegible signature. The Texas Court of Criminal Appeals disagreed with both lower courts, finding the court of appeals erred in holding that reliance on the statutory good-faith exception was automatically precluded based on an illegible magistrate's signature in violation of Code of Criminal Procedure Article 18.04(5). Because the remaining issues in the case were not properly addressed by the court of appeals, judgment was vacated and the matter remanded for further proceedings.

Department of Justice Once Again Proves Its Loyalty to the President, Not the Rule of Law

AUSTIN SARAT

verdict post

Austin Sarat—Associate Provost, Associate Dean of the Faculty, and William Nelson Cromwell Professor of Jurisprudence and Political Science at Amherst College—comments on the recent news that the Justice Department will seek dismissal of charges against Michael Flynn. Sarat suggests that because the decision does not seem to advance the fair administration of justice in this case, the court should take the unusual step of refusing to grant the prosecutor's motion to dismiss.

Criminal Law Opinions

Kelly v. United States

Court: US Supreme Court
Docket: 18-1059
Opinion Date: May 7, 2020
Judge: Elena Kagan
Areas of Law: Criminal Law, Government & Administrative Law, White Collar Crime

During former New Jersey Governor Christie's 2013 reelection campaign, Fort Lee's mayor refused to endorse Christie. Kelly, Christie's Deputy Chief of Staff, Port Authority Deputy Executive Director, Baroni, and another official decided to reduce from three to one the number of lanes reserved at the George Washington Bridge's toll plaza for Fort Lee's commuters. To disguise the political retribution, the lane realignment was said to be for a traffic study. Port Authority traffic engineers were asked to collect some numbers. An extra toll collector was paid overtime. The lane realignment caused four days of gridlock, ending only when the Port Authority's Executive Director learned of the scheme. The Third Circuit affirmed the convictions of Baroni and Kelly for wire fraud, fraud on a federally funded program, and conspiracy to commit those crimes. The Supreme Court reversed. The scheme did not aim to obtain money or property. The wire fraud statute refers to "any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses," 18 U.S.C. 1343. The federal-program fraud statute bars "obtain[ing] by fraud" the "property" (including money) of a federally funded program or entity, section 666(a)(1)(A). The statutes are limited to the protection of property rights and do not authorize federal prosecutors to set standards of good government. The Court rejected arguments that the defendants sought to take control of the Bridge's physical lanes or to deprive the Port Authority of the costs of compensating employees. Their realignment of the access lanes was an exercise of regulatory power; a scheme to alter a regulatory choice is not one to take government property. The time and labor of the employees were an incidental byproduct of that regulatory object. Neither defendant sought to obtain the services that the employees provided.

Gomes v. Silva

Court: US Court of Appeals for the First Circuit
Docket: 19-1656

Opinion Date: May 1, 2020
Judge: Stahl
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed the judgment of the district court denying Appellant's petition for a writ of habeas corpus, holding that, under the highly deferential standard prescribed by the Antiterrorism and Effective Death Penalty Act for federal habeas review of state criminal convictions, Appellant's claims to habeas relief failed. Appellant was convicted in a Massachusetts superior court of murder in the first degree and related crimes. The Supreme Judicial Court (SJC) affirmed the convictions. Appellant subsequently petitioned the District Court for the District of Massachusetts for a writ of habeas corpus. The district court denied the petition but granted a certificate of appealability. The First Circuit affirmed, holding (1) sufficient evidence supported Appellant's conviction for first-degree murder as a joint venturer, and the SJC's sufficiency determination was not unreasonable; and (2) the SJC reasonably determined that the trial court's admission into evidence of certain items did not constitute error.

United States v. Perez-Couvertier

Court: US Court of Appeals for the First Circuit
Docket: 16-2186
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed Defendant's conviction of possessing with intent to distribute controlled substances in a protected area and conspiring to distribute controlled substances in a protected area, holding that the district court did not plainly err with respect to any of Defendant's challenges. Specifically, the First Circuit held (1) the district court did not commit plain error in admitting evidence of the conspiracy's activities occurring after he withdrew from the conspiracy or, alternatively, in not instructing the jury to ignore such evidence; (2) the district court did not plainly err in admitting evidence of a drug trafficking organization's violent acts; and (3) the delay between Defendant's indictment and arrest did not violate his Sixth Amendment right to a speedy trial.

United States v. Haverkamp

Court: US Court of Appeals for the Second Circuit
Docket: 18-3735
Opinion Date: May 4, 2020
Judge: Barrington D. Parker
Areas of Law: Criminal Law

Defendant pleaded guilty to one count of distribution and receipt of child pornography and one count of possession of child pornography. The district court sentenced him to 121 months of imprisonment, followed by five years of supervised release, and imposed a $200 mandatory special assessment under 18 U.S.C. 3013, as well as a $10,000 assessment under 18 U.S.C. 3014. The Second Circuit held that the district court did not abuse its discretion in sentencing defendant and his sentence was substantively reasonable. The court held that the text of the Justice for Victims of Trafficking Act (JVTA), 18 U.S.C. 3014, taken as a whole and in its context, is straightforwardly meant to be applied on a per-offender, not a per-count, basis. In this case, the district court erroneously applied the special assessment on a per-count, rather than per-offender, basis. Finally, the court held that the computer monitoring condition in question was reasonably related to the nature of defendant's offense. Accordingly, the court affirmed in part, vacated in part, and remanded for further proceedings.

United States v. Mladen

Court: US Court of Appeals for the Second Circuit
Docket: 18-0616
Opinion Date: May 6, 2020
Judge: Amalya Lyle Kearse
Areas of Law: Criminal Law, Trusts & Estates

After defendant died while his appeal was pending, counsel moved for

abatement of all incidents of the prosecution, requesting that the appeal be dismissed without a decision on the merits, that defendant's conviction be vacated, and that the matter be remanded to the district court with instructions to dismiss the indictment and order repayment to defendant's estate of the $20,000 fine and $100 special assessment. Because defendant was convicted upon his plea of guilty, and he neither did nor was permitted to challenge on appeal the merits of his conviction, the Second Circuit denied as without merit so much of the motion as seeks (1) vacatur of his conviction, (2) dismissal of the count of the indictment on which he was convicted, and (3) repayment of the mandatory $100 special assessment. The court granted so much of the motion as requests dismissal of this appeal and a remand to the district court for vacatur of the imposed terms of imprisonment and supervised release and for an order requiring that the paid fine of $20,000 be repaid to defendant's estate.

United States v. Richardson

Court: US Court of Appeals for the Second Circuit
Docket: 19-412
Opinion Date: May 5, 2020
Judge: Menashi
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for distribution and possession with intent to distribute a controlled substance. The court held that the district court did not procedurally err by applying the career offender sentencing enhancement pursuant to USSG 4B1.1 because defendant's prior convictions of conspiracy to distribute a controlled substance in violation of 21 U.S.C. 841(a)(1) and 846, and attempted criminal possession of a controlled substance in violation of N.Y. Penal Law 220.16(1), qualify as controlled substance offenses, as defined in USSG 4B1.2(b). The court also held that the district court did not substantively err in sentencing defendant, because it properly considered his criminal history and accounted for his need for mental health and substance abuse treatment.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Rosemond

Court: US Court of Appeals for the Second Circuit
Docket: 18-3561
Opinion Date: May 1, 2020
Judge: Chin
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for murder-for-hire, conspiracy to commit murder-for-hire, murder through use of a firearm, and possession of a firearm during a murder-for-hire conspiracy. Defendant owned Czar Entertainment, a music management company that represented hip-hop, rap and R&B artists such as Jayceon Taylor, also known as "The Game." Taylor was a member of G-Unit, a rap group run by Curtis Jackson, also known as "50 Cent." Defendant's crimes stemmed from a rivalry with Violator Records, the company that managed G-Unit. The court rejected defendant's contention that his attorney was ineffective because he conceded that defendant paid for the victim to be shot, even though he told counsel not to make this concession. The court held that defendant failed to show that this was objectively unreasonable or that he would have been found not guilty had a different argument been advanced. In this case, there was ample evidence supporting counsel's strategy to concede that defendant ordered a shooting where, among other things, the government's key witness, who participated in the conspiracy and lured the victim to be shot, testified that defendant agreed to pay the shooter. The court also held that the district court did not abuse its broad discretion by admitting prior bad-act evidence under Federal Rule of Evidence 404(b)(1).

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lacerda

Court: US Court of Appeals for the Third Circuit
Docket: 15-2812
Opinion Date: May 5, 2020
Judge: Porter
Areas of Law: Criminal Law, White Collar Crime

VOG billed itself as an advocacy group helping victims of timeshare fraud get out of their timeshare debts. A jury determined that VOG had actually

defrauded its customers and that three individual defendants (including Lacerda) were each knowing participants in that fraud. Lacerda was sentenced to 324 months' imprisonment for his leading role in the fraudulent enterprise. The Third Circuit affirmed the respective convictions and sentences. The court rejected a claim of impermissible "overview testimony" by an FBI agent; an officer who is familiar with an investigation or was personally involved may tell the story of that investigation—how the investigation began, who was involved, and what techniques were used, and, with a proper foundation, may offer lay opinion testimony and testify about matters within his personal knowledge. The district court did not abuse its discretion when it disqualified defense counsel based on a conflict of interest; when it denied replacement counsel's motion for a continuance; when it excluded from evidence, as hearsay, an email sent by Lacerda to VOG's former CFO; in exercising its sentencing discretion; or by ordering the forfeiture of all VOG's gross proceeds.

Cucalon v. Barr

Court: US Court of Appeals for the Fourth Circuit
Dockets: 18-1292, 18-2206
Opinion Date: May 7, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law, Immigration Law

The Fourth Circuit denied petitions for review of the BIA's final order of removal. Applying the modified categorical approach, the court held that defendant's prior conviction for distribution of cocaine under Virginia Code 18.2-248, including distribution of that substance as an accommodation under Virginia Code 18.2-248(D), satisfies the federal definitions of an "aggravated felony" and of a crime "relating to a controlled substance" pursuant to 8 U.S.C. 1227(a)(2)(A)(iii), 1227(a)(2)(B)(i). The court also held that the district court did not abuse its discretion in denying petitioner's motion to reconsider.

United States v. Doctor

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4874
Opinion Date: May 4, 2020
Judge: Roger L. Gregory
Areas of Law: Criminal Law

The Fourth Circuit affirmed the district court's revocation of defendant's supervised release and resulting sentence. The court held that the district court did not clearly err in finding the government proved he committed the assault underlying the supervised release violation; the district court did not commit plain error by adopting the violation report when announcing defendant committed Violation One; and, even if the district court erred in sentencing defendant for a Grade A violation, the error was harmless.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lewis

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-4028
Opinion Date: May 4, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law

Defendant was convicted for possessing a firearm as a felon and sentenced to 63 months' imprisonment and a three-year period of supervised release. The district court additionally recommended, without explanation, that defendant receive addiction treatment while incarcerated and ordered, as a special condition of his supervised release, that defendant participate in an addiction treatment program. The Fourth Circuit held that defendant's sentence is procedurally unreasonable because the district court failed to provide an adequate explanation for imposing as a special condition of supervised release the requirement of addiction treatment. The court also held that the district court failed to address defendant's nonfrivolous mitigation arguments. Therefore, the court remanded for resentencing.

United States v. Jordan

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-40499
Opinion Date: May 1, 2020
Judge: Jennifer Walker Elrod
Areas of Law: Criminal Law

The Fifth Circuit affirmed the district court's grant of defendants' motion for a new trial on the basis of prejudicial outside influence on the jury. The court held that the district court did not abuse its broad discretion in granting the motion for a new trial without holding an evidentiary hearing. To the extent there is a bright-line rule applicable to allegations of outside influence on the jury, the court held that it was not applicable to this case. Furthermore, the district court did not abuse its discretion in exercising its prerogative, within broadly defined parameters, to handle the allegation of outside influence in the least disruptive manner possible in this unusual case. Finally, the district court permissibly concluded that the evidence showed a sufficient likelihood of prejudice to shift the burden to the Government, and that the Government did not (and could not) show "no reasonable possibility that the jury's verdict was influenced by" the CSO's comments.

United States v. Longoria

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-20201
Opinion Date: May 5, 2020
Judge: Gregg Costa
Areas of Law: Criminal Law

The Fifth Circuit held that the base offense level of 20 was proper for defendant's felon-in-possession crime involving a semiautomatic firearm that is capable of accepting a large capacity magazine. In this case, defendant failed to show that the district court clearly erred in relying on the FBI's agent statement about what was found in the apartment. The court clarified any confusion and held that the 2013 amendment to the commentary on the acceptance-of-responsibility Guideline does not clearly overrule its caselaw allowing the government to withhold the third point for

acceptance of responsibility when it must litigate a suppression motion. The court held that Amendment 775 does not contain the unequivocal override needed to get past the court's precedent. Therefore, the court affirmed defendant's sentence.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. McNabb

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-50265
Opinion Date: May 1, 2020
Judge: Costa
Areas of Law: Criminal Law

The Fifth Circuit affirmed defendant's sentence imposed after he pleaded guilty to possessing a gun after having been convicted of a felony. The court held that defendant is not entitled to relief on his claim that the government breached the plea deal, and thus his appellate waiver remains enforceable. Accordingly, defendant's challenges to his sentence must be dismissed.

Read Opinion Are you a lawyer? **Annotate this case**.

Andrews v. Wayne County

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1992
Opinion Date: May 4, 2020
Judge: Suhrheinrich
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Canton Police received a 911 call from Andrews, who stated that his fiance, White, had physically attacked him. Officers arrested White. Andrews later took White's medications to the jail; a “KOP” policy allows inmates to keep certain drugs for self-administration. During an intake interview, White admitted to attempting to harm herself or commit suicide in the past but said she was not thinking of harming herself or having suicidal thoughts. An R.N. later evaluated White for nearly two hours, reported White’s chief complaints were “anxiety and depression,” and contacted a pharmacy to verify White’s prescriptions. The R.N. claims White did not exhibit any psychotic behavior,

suicidal ideation, or psychiatric distress but ordered further evaluation. The next day, White was found on the floor with vomit on her face. She stated repeatedly that she took too many pills. The next day, White died in the hospital. The cause of death was Verapamil toxicity. The Sixth Circuit affirmed the rejection of a suit under 42 U.S.C. 1983 on summary judgment. A pretrial detainee does not have an automatic right to a suicide screening. The court rejected an argument that the KOP Policy was deficient because it allows inmates in need of a psychological evaluation to participate before a psychiatrist's assessment of proper housing. The County had no history of suicides relative to the program, so any purported failure to train its employees in suicide risk assessment did not cause White's death.

Hicks v. Scott

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-3410
Opinion Date: May 1, 2020
Judge: Gibbons
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Cincinnati officers Scott and Moore responded to a reported incident of menacing. Two people alleged that Quandavier had driven by their home that night and threatened to kill them and that Quandavier carried guns. Officer Loreaux identified a vehicle fitting the description. Officers Scott, Moore, Schneider, and Loreaux, standing where the vehicle was parked, heard a voice. Thinking that it was likely Quandavier, they knocked on the exterior door of the residence. It swung open. Three officers entered without a warrant or exigent circumstances. Loreaux remained outside. Neither Scott nor Moore recall announcing their presence or identifying themselves. Inside and upstairs, Scott knocked on a closed door. As it opened, Scott "saw the barrel of a rifle pointed at [her] face." Moore and Schneider also saw Quandavier "nonchalantly" panning the rifle from left to right. Moore reached for its barrel as Scott fired her weapon. Moore did not instruct Quandavier to drop his rifle nor did Scott issue any commands before firing. Quandavier collapsed. The officers immediately radioed for paramedics. Before the officers applied handcuffs or provided first aid, they heard another voice and conducted a sweep. Quandavier died at the scene

without receiving medical attention. In a suit under 42 U.S.C. 1983 for unlawful entry, excessive force, and deliberate indifference to a serious medical need, plus state claims, the district court granted the defendants summary judgment, citing qualified immunity. The Sixth Circuit reversed in part. The district court erred by granting qualified immunity to Scott, Moore, and Schneider on the unlawful entry claim. The court affirmed as to the excessive force, deliberate indifference, and state-law battery claims, and remanded for evaluation of municipal liability and wrongful death claims.

Read Opinion Are you a lawyer? **Annotate this case**.

Moody v. United States

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5015
Opinion Date: May 6, 2020
Judge: Thapar
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

At Moody's trial, the government produced a video of Moody cooking crack on his stove and waving a handgun while he mused about life in "the game" (drug trafficking). The court ruled that most of the video was admissible. Moody then tried to persuade the jury that the video was filmed more than five years before his indictment, putting it outside the statute of limitations. The jury convicted Moody. Due to prior felony drug convictions, Moody received enhanced, mandatory-minimum life sentences on several counts. He appealed on evidentiary grounds relating to the video. The Sixth Circuit affirmed. Later, Moody raised new claims on collateral review, 28 U.S.C. 2255. The district court found each claim meritless; most were also procedurally defaulted. The court authorized Moody to appeal. The Sixth Circuit dismissed the appeal, stating that none of the claims should have been certified. Reasonable jurists could not doubt that the district court properly denied relief on Moody's claims that he was deprived of his statute-of-limitations defense (violating due process); that the past convictions for his sentencing enhancements were not charged in the indictment or found by the jury; and that his previous lawyers failed to raise the first two claims sooner, violating his right to effective assistance of counsel.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Foreman

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1827
Opinion Date: May 7, 2020
Judge: Gibbons
Areas of Law: Criminal Law

In 2006, Foreman pled guilty to possession with intent to distribute 50 or more grams of cocaine base, possession with intent to distribute cocaine powder, and possession of a firearm during and in furtherance of a drug trafficking crime. Foreman admitted that he was responsible for approximately 135 grams of crack cocaine and 250 grams of cocaine powder. Foreman had a final Guidelines range of 322-387 months; he was sentenced to 240 months' imprisonment with respect to each drug conviction, to run concurrently, and 60 months' imprisonment for the firearms conviction, to run consecutively. When the First Step Act of 2018 made the Fair Sentencing Act retroactive, Foreman sought relief. The district court held that Foreman was not entitled to a plenary resentencing and declined to revisit his career offender status or hold an in-person hearing, then weighed the new statutory range applicable to Foreman's drug offenses, his recalculated Guidelines range, and the 18 U.S.C. 3553(a) factors, and reduced Foreman's total sentence to 172 months on each drug offense, to run concurrently, plus the mandatory consecutive 60 months on the firearms offense. The Sixth Circuit affirmed. Nothing in the First Step Act entitles a defendant to a plenary resentencing. First Step Act resentencings are not shielded from review for reasonableness; the district court thoroughly explained its rationale, carefully examining Foreman's circumstances, the amended penalty provisions, and the resulting changes to Foreman's Guidelines range.

United States v. Smith

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1724
Opinion Date: May 6, 2020

Judge: Bush
Areas of Law: Criminal Law

In 2006, Smith was convicted of conspiracy to distribute and to possess with intent to distribute 500 grams or more of powder or 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 500 grams or more of cocaine powder; and being a felon in possession of a firearm. The court imposed a mandatory minimum life sentence. The Fair Sentencing Act subsequently lowered the penalty for cocaine-base offenses, made retroactive through the First Step Act. Smith moved for relief and received a reduced sentence of 360 months, the bottom of the new Guideline range for the counts impacted by the Fair Sentencing Act, to run concurrent to his existing 360-month sentence for his powder cocaine count that was not affected by the Fair Sentencing Act. The Sixth Circuit affirmed, rejecting an argument that the court should have imposed a below-Guideline sentence for all counts. The First Step Act is a limited grant of authority to impose a reduced sentence for certain offenses and does not require a plenary resentencing proceeding. Even assuming the court's obligation to explain its reasons for imposing the modified sentence was akin to that which applies in initial sentencing, the court's use of a modified AO 247 form order to explain its decision was not procedurally unreasonable.

Kirkman v. Thompson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1904
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Following a 1992 fight that involved Johnson, Herron, and Walker, two shooters shot the three men. Johnson survived. In the hospital, Johnson described a shooter by the street name "Duke," where Duke lived, and Duke's car. Johnson identified Duke and his accomplice from a photo array. Police pulled over a vehicle matching Johnson's description and arrested

the driver, Kirkman, and the passenger, who matched the general description of the second shooter. Kirkman had a tattoo of Duke on his arm. Police took additional photos and presented a second photo array to Johnson, who identified them as the shooters. At trial, Johnson identified Kirkman and his passenger as the shooters. There was disputed testimony about the cause of the fight. Convicted of murder and aggravated battery with a firearm, Kirkman was sentenced to life in prison. Johnson had a change of heart and submitted an affidavit, identifying Ford and an unknown man as the shooters. At Kirkman's post-conviction hearing, Johnson testified that he and his family had been threatened. Other testimony was inconsistent with Johnson's. Illinois courts denied post-conviction relief, finding that Johnson's recantation lacked credibility. Johnson later pleaded guilty for perjury but failed to specify which statement was false. The Seventh Circuit affirmed the denial of federal habeas relief. Illinois courts found Johnson's recantation lacked credibility. An evidentiary hearing satisfied Kirkman's due process rights. The Illinois trial court's determination defeated Kirkman's innocence and perjured testimony claims.

Tuduj v. Newbold

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1699
Opinion Date: May 1, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Illinois prisoner Tuduj, having received extensive dental treatment, filed a "deliberate indifference" suit under 42 U.S.C. 1983 against his dentists and prison officials. The court recruited counsel to assist Tuduj in filing an amended complaint that complied with the Federal Rules of Civil Procedure. Counsel defended against two summary judgment motions, one arguing that Tuduj had not exhausted his administrative remedies and another on the merits While the motions were pending, Tuduj moved "for leave to represent himself," stating that he was "concerned that his counsel has filed a structurally, technically and legally insufficient response doomed to be denied." He asked to file his own brief, except "in the event this Honorable Court deems counsel's response … legally sufficient and Grants same[,]

Plaintiff would be open to continued effective representation." A magistrate denied Tuduj's motion, stating that Tuduj "varie[d] between saying he would like to" represent himself and "indicating that he is happy with counsel's representation as long as he prevails." The district judge granted the motions for summary judgment, citing professional judgment and finding "no competent evidence" of any policy that unlawfully influenced dental-treatment decisions. The Seventh Circuit rejected Tuduj's argument that the court wrongly denied his "unqualified" right to proceed pro se under 28 U.S.C. 1654, the due process clause, the equal protection clause, and the Seventh Amendment. The district court permissibly denied his equivocal request.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Gibson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1402
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Constitutional Law, Criminal Law

Officer Garrison encountered Gibson, a suspected drug trafficker, walking with a companion. Although initially a consensual encounter, Garrison questioned Gibson and his companion and briefly detained Gibson. After Gibson and his companion departed, Garrison spotted a methamphetamine pipe under his patrol vehicle. Local law enforcement conducted a traffic stop of Gibson's vehicle in the curtilage of his driveway. A drug detection dog signaled the presence of a controlled substance in the vehicle, though nothing was found. Earlier that day, Gibson's wife had met with DEA agents to tell them about methamphetamine inside the home. Police used information Mrs. Gibson had provided to obtain a search warrant. The search of the home uncovered drugs, drug paraphernalia, currency, and AK-47 rifles, which led to Gibson's arrest. Gibson moved to suppress all evidence seized during the search, alleging he was detained without reasonable suspicion, unlawfully frisked, arrested without probable cause, stopped without probable cause or reasonable suspicion, and the traffic stop exceeded a permissible scope. Upon learning of his wife's cooperation, Gibson also argued her statement was insufficiently attenuated to justify the

search warrant. The Seventh Circuit affirmed the denial of the motion. Mrs. Gibson's voluntary statement with DEA agents was independently sufficient to sustain findings of probable cause and sufficiently attenuated from subsequent events to preclude suppression.

United States v. Howell

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3157
Opinion Date: May 4, 2020
Judge: Scudder
Areas of Law: Constitutional Law, Criminal Law

In December 2012, Chicago Police officers responded to an anonymous call reporting a Hispanic man in a black sweater and black hat, carrying a bag, and climbing under a warehouse fence. They found someone who matched the description. After stopping and frisking him, they determined he was not engaged in any crime. Howell, walking toward the police, was white and wearing a black jacket and dark hat. When an officer approached to speak to him, Howell did not answer, looked panicked, and put his hands in his pockets. The officer patted Howell down and found a gun in his jacket. A federal gun charge followed. Howell unsuccessfully moved to suppress the gun. The Seventh Circuit reversed the denial of his suppression motion and vacated his conviction for possessing that gun. The court noted that the facts in the pretrial record differed significantly from those presented at trial, where the arresting officer testified that he decided to proceed with the pat-down only after Howell ignored a directive to remove his hands from his pockets. Viewing the pretrial record as a whole, the police lacked reasonable suspicion to frisk Howell. The court did not reverse Howell's conviction on a second gun charge that resulted from the execution of a warrant to search Howell's apartment three months after the initial stop and the ensuing discovery of more guns and ammunition.

United States v. Lewis

Court: US Court of Appeals for the Seventh Circuit
Dockets: 19-1911, 19-1262
Opinion Date: May 7, 2020
Judge: Joel Martin Flaum
Areas of Law: Criminal Law

In 2016-2018, Draheim managed a conspiracy, responsible for at least 38 packages of methamphetamine sent from California to La Crosse, Wisconsin. Draheim supervised at least 11 associates who accepted shipments on her behalf, sent money transfers to California, distributed the meth, rented storage lockers, and collected money owed to her. Draheim provided vehicles. After agents placed a wiretap on her phone and seized several packages of meth en route to Draheim, her California supplier forced Draheim to find a new source. Draheim contacted Lewis, recently out of jail but still involved in the "meth scene." Lewis agreed to purchase meth from a new supplier. During the planned transaction, agents seized the package, which contained 28.6 grams of nearly pure meth. Police subsequently arrested Draheim after they found her daughter dead at home from an overdose; they took Lewis into custody for violating the terms of his state supervision. Both pleaded guilty to meth distribution offenses, 21 U.S.C. 841, 846. Draheim, facing a mandatory-minimum 10-year sentence, unsuccessfully argued that she qualified for "safety-valve relief." The court reasoned that she was the leader of her enterprise. Lewis unsuccessfully contended that he should be sentenced based only on his conviction, not other "relevant conduct." The Seventh Circuit affirmed Draheim's sentence but vacated as to Lewis. The fact that the defendant has engaged in other drug transactions is not, alone, sufficient to justify treating those transactions as relevant conduct for sentencing purposes.

Bakor v. Barr

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3011
Opinion Date: May 7, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit denied a petition for review of the BIA's determination

that defendant committed two crimes involving moral turpitude. The court held that the BIA did not err in determining that petitioner's conviction for the Minnesota crimes of Criminal Sexual Conduct in the Fifth Degree and knowing failure to comply with Minnesota's sex offender registration statute were crimes involving moral turpitude. The court also held that petitioner failed to exhaust his remaining arguments and therefore declined to consider them.

Smith v. Titus

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2915
Opinion Date: May 5, 2020
Judge: Steven M. Colloton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eighth Circuit affirmed the district court's denial of habeas relief to petitioner based on his claim that the trial court violated his Sixth Amendment right to a public trial when it briefly closed the courtroom to spectators. The district court denied relief based on the ground that the Minnesota Supreme Court’s decision was neither contrary to, nor an unreasonable application of, clearly established federal law. The court agreed and held that it was not objectively unreasonable for the Minnesota Supreme Court to deem it constitutional under the Sixth Amendment for the trial court to explain the parameters of an earlier public order on evidentiary issues in a brief nonpublic proceeding before the jury was sworn.

United States v. Becerra

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2777
Opinion Date: May 7, 2020
Judge: Stras
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for two counts of being a

felon in possession of a firearm and ammunition. The court held that there was more than enough evidence for defendant's probation officer and other officers to believe defendant had a firearm on him. Therefore, the officers had probable cause to arrest him without a warrant. The court also held that defendant was in custody when he made both statements at issue. In this case, the "request for clarification" of defendant's statement that he had "something" in his car did not require Miranda warnings. Furthermore, because the bulge in defendant's pocket could have been a gun or other weapon that would have posed a danger to the officers and others, they could ask about it without the formality of Miranda warnings. The court joined its sister circuits in declining to recognize the innocent-possessor defense. The court held that the district court did not err in excluding defendant's proposed testimony that he had found the handgun in his car earlier in the day and was about to hand it over to his probation officer. The court reasoned that, even if defendant intended to turn over the gun (or the ammunition) to his probation officer, it is still a crime to knowingly possess it in the first place. Finally, the court held that the district court did not err in denying defendant a sentencing reduction for acceptance of responsibility; the district court considered defendant's mitigation arguments at sentencing; and the district court did not abuse its discretion by imposing a within-Guidelines sentence.

United States v. Haynes

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1607
Opinion Date: May 5, 2020
Judge: Raymond W. Gruender
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that the government did not violate the Speedy Trial Act, and defendant failed to offer any evidence showing that Iowa and federal prosecutors colluded. Furthermore, the district court did not abuse its discretion by failing to hold an evidentiary hearing regarding the existence of collusion. The court also held that the district court did not err in denying the motion to suppress where defendant

was not unlawfully seized. In this case, prior to producing the marijuana cigarette, the officer did not ask defendant any questions but merely ordered him off the bus, particularly as the smell of marijuana alerted the officer that evidence of a more serious crime than failure to use a turn signal might be uncovered during the stop. Finally, the court held that defendant was not unlawfully searched when the officer conducted a pat-down search incident to arrest; the evidence was sufficient to support defendant's conviction; defendant's Rehaif claim failed because there was sufficient evidence that he knew of his prohibited status; and defendant's sentence was not substantively unreasonable nor an abuse of the district court's discretion.

United States v. Roberts

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1176
Opinion Date: May 1, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law

The Eighth Circuit vacated defendant's sentence imposed after he pleaded guilty to unlawful possession of a firearm as a previously convicted felon. The court held that, although the district court properly applied a four-level increase for possession of a firearm "in connection with another felony offense" under USSG 2K2.1(b)(6)(B), but that a two-level increase for "using a minor to commit a crime" under USSG 3B1.4 should not have applied. In this case, the evidence showed only that defendant engaged in an arm's-length transaction with a minor. The court held that this mere joint participation in an offense as a partner, does not amount to "use" of a minor "to commit the offense" of unlawful possession of a firearm by a felon. Accordingly, the court remanded for resentencing.

United States v. Wright

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1081

Opinion Date: May 5, 2020
Judge: Erickson
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's restitution order and certain special conditions of defendant's supervised release imposed after he pleaded guilty to sex trafficking of a child. The court found no error in the district court's restitution amount of $20,000, holding that the evidence supported the amount in light of the aggregate harm to the victim. The court also held that the special conditions -- including a requirement that defendant participate in sex offender treatment including psychological testing and polygraph examinations, a prohibition against contact with any minors without pre-approval, and a requirement that defendant seek prior approval before using temporary commercial lodging, such as a hotel or motel -- where reasonably related to both the offense of conviction and to defendant's history of sexual contact with minor females.

Benson v. Chappell

Court: US Court of Appeals for the Ninth Circuit
Docket: 13-99004
Opinion Date: May 1, 2020
Judge: Consuelo Maria Callahan
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's denial of petitioner's habeas corpus petition challenging his California conviction and death sentence for murder and other crimes. Petitioner raised two certified claims and two uncertified claims. The panel held that petitioner failed to show that the California Supreme Court's denials of his claims were unreasonable determinations of the facts or contrary to clearly established federal law. In this case, the California Supreme Court reasonably determined that an officer's misstatement during petitioner's interrogation that there was no death penalty in California did not prompt petitioner's confessions. Furthermore, petitioner failed to show that his statements were not knowing, voluntary, and intelligent. Even if petitioner were able to show that trial counsel was ineffective in not fully investigating his abuse as a child or his alleged organic brain injury, the panel held that the state court could

reasonably have determined that any shortcoming in trial counsel's investigation was not prejudicial. Finally, the panel granted a certificate of appealability on petitioner's two uncertified claims and held that the state court reasonably rejected the claims that his trial counsel should have impeached the government's case and the prosecutor withheld material, exculpatory evidence.

Mero v. Barr

Court: US Court of Appeals for the Ninth Circuit
Docket: 17-70929
Opinion Date: May 1, 2020
Judge: Paul Jeffrey Watford
Areas of Law: Criminal Law, Immigration Law

The Ninth Circuit granted in part a petition for review of the BIA's finding that petitioner was removable based on his conviction for possession of visual presentation depicting sexual conduct of a person under 16 years of age, in violation of Nevada Revised Statutes (N.R.S.) 200.730. Applying the categorical approach, the panel compared the elements of N.R.S. 200.730 with the applicable definition of "sexual abuse of a minor," which requires proof of three elements. The panel held that N.R.S. 200.730 punishes a broader range of conduct because the Nevada statute does not require proof that the offender participated in sexual conduct with a minor. Therefore, petitioner's conviction did not qualify as sexual abuse of a minor. The panel explained that, with a possession-only offense such as N.R.S. 200.730, the minor depicted in the image is not the direct object of the offender's conduct, which is a necessary predicate for the offense to qualify as sexual abuse of a minor.

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10341
Opinion Date: May 4, 2020
Judge: Piersol
Areas of Law: Criminal Law

The Ninth Circuit affirmed the district court's denial of defendant's motion to suppress after he pleaded guilty to receipt of stolen mail and being a prohibited person in possession of a firearm. Defendant moved to suppress the evidence seized from his residence and the statements he made to law enforcement on the basis that the search warrant obtained by the Postal Inspection Service relied on evidence that was obtained illegally. The panel declined to address the potential Fourth Amendment privacy interests that may be implicated by the warrantless use of this Automatic License Plate Recognition (ALPR) technology, and held that defendant does not have a reasonable expectation of privacy in the historical location data of the Yukon under the facts of this case. The panel found no evidence in the record that Prestige Motors had a policy or practice of allowing lessees to keep cars beyond the rental period and Prestige had made affirmative attempts to repossess the vehicle by activating the GPS unit to locate and disable the vehicle. Therefore, defendant lacked standing to challenge the warrantless search of the database.

United States v. Neugin

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-7043
Opinion Date: May 1, 2020
Judge: Scott Milne Matheson, Jr.
Areas of Law: Constitutional Law, Criminal Law

Jack Neugin pled guilty to being a felon in possession of a firearm and ammunition on the condition that he could appeal the district court's denial of his motion to suppress evidence of the ammunition and firearm police found in the bed of his pickup truck. Officers responded to a reported verbal altercation between Neugin and his girlfriend. One of the officers saw ammunition in the back of the truck after he lifted the truck's camper lit do allow the girlfriend to retrieve her belongings. Neugin argued the officers discovered the evidence during an unconstitutional search; the district court concluded the officer was acting "in a lawful position" as "community caretaker," and found no Fourth Amendment violation. The Tenth Circuit reversed, finding that : (1) the officer conducted the without a warrant or probable cause, (2) the community caretaking exception to the warrant requirement does not apply, and (3) the inevitable discovery exception to the exclusionary rule does not apply. The evidence seized should have been suppressed.

United States v. Ramon

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-1221
Opinion Date: May 1, 2020
Judge: Gregory Alan Phillips
Areas of Law: Constitutional Law, Criminal Law

In 2016, after serving a federal prison sentence for having possessed a firearm after a felony conviction, Charles Ramon III began serving a mandatory term of supervised release. Before Ramon completed the term, his probation officer filed a petition, soon followed by two superseding petitions, to revoke Ramon’s supervised release. At the revocation hearing, the district court found three violations—two for possessing a controlled

substance and one for again illegally possessing a firearm. Of these, the most serious was Ramon's illegal possession of a firearm—a Grade B violation. For this, the court imposed the statutory maximum sentence of twenty-four months in prison. During the revocation hearing, the government mentioned that it might seek to indict Ramon for illegally possessing a firearm (the conduct in part underlying the revocation). Mindful of this, the district court ordered that Ramon's twenty-four-month sentence run "consecutively to any sentences imposed previously or prospectively in federal or state court." At the hearing, Ramon did not object to the district court's running his sentence consecutively to future federal sentences. On appeal, Ramon argued that the district court exceeded its sentencing authority under 18 U.S.C. 3584(a) by ordering that Ramon's sentence run consecutively to future federal sentences. By the terms of 18 U.S.C. 3584(a), the Tenth Circuit determined the district court did err. But Ramon failed to object to this at trial, and on appeal, failed to show that the error was plain, thus, judgment was affirmed.

United States v. Richards

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-8044
Opinion Date: May 6, 2020
Judge: Baldock
Areas of Law: Constitutional Law, Criminal Law

In 2018, the Wyoming Division of Criminal Investigation (DCI) obtained a search warrant to review the contents of Defendant–Appellant Joshua Richards' Tumblr account. During the search and subsequent investigation, DCI agents discovered Defendant had re-blogged videos and images of child pornography to his private Tumblr so he could later access and view the materials. Defendant ultimately pleaded guilty to one count of accessing with intent to view child pornography. He was sentenced to twenty-four months' imprisonment followed by five years of supervised release. The district court imposed several special conditions of supervised release, which, as relevant here, related to drugs and alcohol and required Defendant to submit to polygraph testing. On appeal, Defendant argued the district court erred in imposing these special conditions. He also challenged

the length of his prison sentence as substantively unreasonable. The Tenth Circuit determined the alcohol and drug conditions did not directly conflict with the relevant policy statement in the sentencing guidelines, so the district court's decision to impose the conditions was not manifestly unreasonable. And given the circumstances of the case, the Court determined the trial court did not abuse its discretion in imposing Defendant's twenty-four month sentence.

Andrews v. Warden

Court: US Court of Appeals for the Eleventh Circuit
Docket: 19-12443
Opinion Date: May 5, 2020
Judge: William Holcombe Pryor, Jr.
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of habeas relief under 28 U.S.C. 2241. Plaintiff alleged that President Obama commuted his "total sentence" of imprisonment, which included the 37 months of imprisonment that he served as part of his 2003 sentence. Based on the terms of the commutation order, the Constitution, and Supreme Court precedent, the court could not say that the Bureau erred in excluding the 37-month term of imprisonment from its recalculation.

Knight v. Florida Department of Corrections

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-12488
Opinion Date: May 1, 2020
Judge: Newsom
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eleventh Circuit affirmed the district court's denial of a 28 U.S.C. 2254 petition for habeas relief. Petitioner alleged that his counsel rendered ineffective assistance under Strickland v. Washington, 466 U.S. 668 (1984), by failing to adequately investigate and present mitigating evidence during the sentencing phase of his capital-murder trial. The court held that, even assuming that counsel performed deficiently in failing to investigate and present the mitigation evidence that petitioner now raises—thus satisfying the first prong of the two-part Strickland standard that governs ineffective-assistance claims—petitioner failed to carry his burden of demonstrating resulting prejudice.

United States v. Evans

Court: US Court of Appeals for the Eleventh Circuit
Docket: 17-15323
Opinion Date: May 6, 2020
Judge: Grant
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that, given the totality of the circumstances, it was reasonable for officers, mistaking a dog's whimper for a person in distress, to enter defendant's home without a warrant.

Therefore, defendant's challenge to the district court's denial of his motion to suppress evidence failed. The court upheld the district court's imposition of a 22 offense level finding because defendant possessed a semiautomatic firearm capable of accepting a large capacity magazine under USSG 2K2.1(a)(3)(A)(i) (2016). The court also upheld defendant's sentencing enhancement under USSG 2K2.1(b)(4)(B) for possessing a rifle that had an obliterated serial number.

United States v. McLellan

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-13289
Opinion Date: May 6, 2020
Judge: Boggs
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm. The court held that the district court did not abuse its discretion in permitting one of his arresting officers to offer testimony at trial on the correlation between guns and drug activity and to suggest that defendant was selling drugs; the court declined to evaluate the applicability of the Armed Career Criminal Act (ACCA), because the district court would have imposed the same sentence regardless of whether the mandatory minimum applied; and the court rejected defendant's claim under Rehaif v. United States, 139 S. Ct. 2191 (2019), and held that there was no plain error in the district court's failure to instruct the jury of the knowledge-of-status element and any error from the lack of a knowledge-of-status element in defendant's plea colloquy did not affect his substantial rights. Finally, the court remanded for clarification of the judgment to reflect the sentence the district court said it would have imposed if the Armed Career Criminal Act did not apply.

United States v. Russell

Court: US Court of Appeals for the Eleventh Circuit

Docket: 18-11202
Opinion Date: May 4, 2020
Judge: Charles R. Wilson
Areas of Law: Criminal Law

Defendant was convicted of possessing a firearm and ammunition as an immigrant illegally or unlawfully in the United States. After defendant appealed his conviction and sentence, the Supreme Court issued its decision in Rehaif v. United States, 588 U.S. ___, 139 S. Ct. 2191 (2019), which reversed a decision from this court and held that under 18 U.S.C. 922(g), the government must prove that a defendant knew "his status as a person barred from possessing a firearm" when he knowingly possessed a firearm. The Eleventh Circuit held that defendant established the necessary prejudice under plain error review and vacated defendant's section 922(g) conviction, remanding for further proceedings. In this case, the district court committed an error that was made plain by the Supreme Court in Rehaif. Furthermore, defendant has sufficiently shown a reasonable probability that but for the error, the outcome of his trial would have been different.

Welch v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 14-15733
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's 28 U.S.C. 2255 motion to vacate his sentence. The court held that defendant's prior 1996 Florida convictions for robbery qualified as violent felonies under the Armed Career Criminal Act's (ACCA) elements clause, and rejected his contention that the court's decision in his direct appeal carved out a narrow exception to pre-1997 Florida robbery convictions obtained in Florida's Fourth District Court of Appeal. The court also held that petitioner's prior Florida felony battery conviction was a violent felony under the ACCA in light of the court's holding in United States v. Vail-Bailon, 868 F.3d 1293 (11th Cir. 2017) (en banc), cert. denied, 138 S. Ct. 2620 (2018).

State v. Trujillo

Court: Arizona Supreme Court
Docket: CR-18-0531-PR
Opinion Date: May 4, 2020
Judge: Gould
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court held that, for purposes of imposing mandatory sex offender registration under Ariz. Rev. Stat. 13-3821(A)(3), a judge has the authority to make the necessary factual finding that the victim is under the age of eighteen and that Arizona's sex offender registration statutes are civil regulatory statutes, not criminal penalties. Defendant was convicted by a jury of one count of sexual abuse. In reaching its verdict the jury determined that the victim was "fifteen or more years of age." At sentencing, the trial court ordered Defendant to register as a sex offender. Defendant objected, arguing that, pursuant to Apprendi v. New Jersey, 530 U.S. 466 (2000), a jury was required to find whether Defendant was under eighteen pursuant to section 13-3821(A)(3). The trial court denied the objection. The court of appeals affirmed. The Supreme Court affirmed, holding (1) Apprendi does not apply to factual findings that are necessary to impose registration because sex offender registration is a civil regulatory requirement, not a criminal penalty; and (2) the trial judge did not violate Apprendi by determining that the victim was under eighteen.

Ray v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 184
Opinion Date: May 7, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from an order denying his pro se petition for permission to reinvest jurisdiction in the trial court to consider a petition for writ of error coram nobis, holding that the circuit court had no jurisdiction to consider the petition. Appellant entered negotiated guilty pleas to rape and other offenses. Appellant later filed a petition for writ of error coram nobis in the Chicot County Circuit Court, the court where he was incarcerated, setting out two grounds for coram nobis relief. The circuit court denied the petition. The Supreme Court dismissed Appellant's appeal, holding that jurisdiction lay in the trial court where Appellant was convicted, which in this case was the Ashley County Circuit Court. Therefore, the Chicot County Circuit Court was without jurisdiction to address Appellant's coram nobis petition.

California v. Law

Court: California Courts of Appeal
Docket: E072845(Fourth Appellate District)
Opinion Date: May 5, 2020
Judge: Slough
Areas of Law: Constitutional Law, Criminal Law

In 2001, appellant Terrell Law and his codefendant Brett May committed a home invasion robbery, during which one of them shot and killed one of the residents. They were tried jointly in 2006 before two separately empaneled juries who found them both guilty of first degree felony murder with the special circumstance described in Penal Code section 190.2(a)(17(A) and (d). Though Law's jury found he was not the shooter, they nonetheless concluded he was a "major participant" in the underlying robbery and acted "with reckless indifference to human life." In 2018, the Legislature enacted Senate Bill No. 1437 (2017-2018 Reg. Sess.) which, among other things, amended the definition of felony murder in Penal Code section 189. The legislation also added Penal Code section 1170.95, which established a procedure for vacating murder convictions predating the amendment that could not be sustained under the new definition of felony murder. Law

challenged the trial court's summary denial of his section 1170.95 petition to vacate his murder conviction, arguing the trial court erred by reviewing his record of conviction and determining the jury's true finding on the special circumstance rendered him ineligible for relief. The Court of Appeal concluded it was proper for a trial court to review the record of conviction when determining whether a section 1170.95 petitioner had stated a prima facie claim for relief. Additionally, the Court concluded Law "undoubtedly qualifies" as a major participant who acted with reckless indifference to human life, a conclusion that rendered him ineligible for relief under section 1170.95. The Court therefore affirmed the order denying his petition.

Judge: Henry E. Needham, Jr.
Areas of Law: Criminal Law, Labor & Employment Law, White Collar Crime

Galeotti, a former Union Local 3 employee, filed a complaint against Local 3 and three of individual union leaders, alleging that the individual defendants required union employees to pay them money to keep their jobs, lied about the reason for collecting the money, and caused Local 3 to terminate Galeotti's employment when he failed to pay the full amount demanded. The trial court dismissed his second amended complaint without leave to amend. The court of appeal reversed in part, reasoning that a threat to terminate employment can provide a basis for an extortion claim and that the allegations of the second amended complaint stated a cause of action for wrongful termination in violation of the public policy underlying the extortion statutes. The complaint stated a cause of action for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO; 18 U.S.C. 1961), based on the predicate acts of extortion, but did not state a cause of action for interference with prospective economic advantage.

In re I.A.

Court: California Courts of Appeal
Docket: B296549(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Tangeman
Areas of Law: Criminal Law, Juvenile Law

Where a juvenile court vacates its true finding on a generic murder allegation and redesignates it as a finding on an uncharged target offense, and does so before a minor has had the opportunity to contest the court's findings or orders, the minor may challenge the sufficiency of the evidence of the redesignated offense on appeal. The Court of Appeal held that there was insufficient evidence to support the juvenile court's decision sustaining the allegations that I.A. possessed a concealable firearm and committed vandalism. Therefore, the court reversed the juvenile court's findings, vacating the jurisdiction and disposition order and dismissing the Welfare and Institutions Code section 602 petition.

People v. Edwards

Court: California Courts of Appeal
Docket: A158055(First Appellate District)
Opinion Date: May 1, 2020
Judge: Petrou
Areas of Law: Criminal Law

In 2006, Edwards fired an assault weapon into an apartment, killing the victim. Edwards pled guilty to possession of a firearm as a felon and was convicted of second-degree murder and shooting into an inhabited dwelling. Following the enactment of Senate Bill 1437, Edwards filed a Penal Code 1170.95 resentencing petition, checking form boxes indicating that he was convicted under a theory of felony murder or murder under the natural and probable consequences doctrine and that he could not now be convicted of 1st or 2nd-degree murder because of changes to Penal Code 188 and 189. Edwards submitted the jury instructions and the transcript of the prosecutor's closing remarks that Edwards acted with "both express malice, specific intent to kill, as well as implied malice," described as "an intentional act, the natural consequences of which are dangerous to human life, and at the time that the individual acted, they knew of the danger, and they deliberately acted with conscious disregard." The court denied the petition, finding that Edwards was convicted on a valid theory of murder that survived the statutory changes. The court of appeal affirmed. The superior court did not err in considering the record of conviction. Edwards could not meet the statutory prerequisites for even filing a section 1170.95 petition because he was not charged or convicted of second-degree felony murder or murder under the natural or probable consequences doctrine directed at accomplice liability.

People v. Thomkins

Court: California Courts of Appeal
Docket: A141375(First Appellate District)
Opinion Date: May 1, 2020
Judge: Streeter
Areas of Law: Criminal Law

On Easter night in 2011, gunfire erupted at an Oakland bar-restaurant, leaving two people dead and five wounded. Thompkins and Fox were convicted of two counts of first-degree murder for the benefit of a criminal street gang, with firearm discharge enhancements, a multiple-murder special circumstance, and five counts of attempted murder with great bodily injury findings, gang enhancements, and firearm discharge enhancements. Thompkins was convicted as the shooter and Fox as an accomplice. Both were sentenced to life in prison without possibility of parole, plus 224 years to life. After Thompkins was sentenced, Fox stated under oath he was the actual shooter and Thompkins knew nothing about Fox's intentions. Thompkins claimed this new testimony, and his attorney's incompetent reaction entitled him to a new trial and submitted a declaration by another gang member who was present that night. The court of appeal concluded that Thompkins's attorney was not ineffective for failing to bring a motion to recall the sentence followed by a new trial motion because Thompkins failed to show prejudice. The attempted murder convictions and related enhancements must be reversed for both defendants based on the flawed kill zone instruction. Introducing evidence that defendants admitted their gang affiliation at jail intake violated the defendants' privilege against self-incrimination but was harmless. There was some evidentiary error that was harmless due to the wealth of admissible evidence establishing the gang enhancements. Arguments based on the statutory amendments to Penal Code 188 and 189 must be raised in the trial court (section 1170.95). The case must be remanded so the judge may exercise his discretion whether to impose or strike the firearm enhancements on under Penal Code 12022.53.

People v. Torres

Court: California Courts of Appeal
Docket: B295043(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Wiley
Areas of Law: Criminal Law

After the trial court admitted a witness's former testimony, the Court of Appeal applied People v. Roldan (2012) 205 Cal.App.4th 969, 975–985, and reversed. Roldan held that, before invoking the former testimony exception,

prosecutors should react appropriately to the impending deportation risk by following four steps: alert the defense to the risk; videotape the preliminary hearing testimony; use judicial measures to try to delay deportation; and consider an array of other specific measures. In this case, the prosecution conceded that prosecutors were simply unaware of Roldan and did not comply with it. The court held that Roldan controls the court's analysis because the facts about prosecutorial diligence are weaker here than they were in Roldan, where the appellate court held for the defense. In this case, the record before deportation is of prosecutorial inaction where the prosecution's brief in this court admits the investigating officer did not do anything to ensure that the witness would not be deported, nor is there other evidence of prosecutorial efforts to delay the witness's departure or to videotape his testimony at the preliminary hearing.

People v. Triplett

Court: California Courts of Appeal
Docket: B298914(Second Appellate District)
Opinion Date: May 1, 2020
Judge: Frances Rothschild
Areas of Law: Criminal Law

Defendant was convicted of assault with a deadly weapon, carjacking, and attempted murder. In the published portion of the opinion, the Court of Appeal held that the trial court erred by denying defense counsel's request to inform the jurors that they could have testimony of certain witnesses read back to them. The court also held that, under the circumstances in this case, the error was harmless.

Colorado In Interest of G.S.S.

Court: Colorado Supreme Court
Citation: 2020 CO 32
Opinion Date: May 4, 2020
Judge: Brian D. Boatright

Areas of Law: Constitutional Law, Criminal Law, Juvenile Law

After being charged, fourteen-year-old G.S.S. was detained for more than three months without bail, even though he had not entered a plea and had not been tried on the charges against him. At that point, G.S.S.'s counsel filed a motion to dismiss, arguing that G.S.S.'s "right to a speedy trial" had been violated under section 19-2-509(4)(b), C.R.S. (2019). The trial court agreed and dismissed the case against G.S.S. with prejudice, and the court of appeals affirmed in Colorado in Interest of G.S.S., 2019 COA 4M, __ P.3d __. The Colorado Supreme Court then granted certiorari to determine the proper remedy for a violation of the sixty-day limit in section 19-2-509(4)(b). The Supreme Court determined the remedy for a section 19-2-509(4)(b) violation was for the trial court to immediately hold a bail hearing and order the juvenile's release. Accordingly, the judgment of the court of appeals was reversed.

Barringer v. Halkitis

Court: Florida Supreme Court
Docket: SC19-1071
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court held that Jay Barringer's quo warranto petition filed in this case was a frivolous proceeding brought before the Supreme Court by a state prisoner and sanctioned Barringer by barring him from filing any further pro se requests for relief related to his criminal case. Barringer was convicted of one count of attempted sexual battery of a victim less than twelve years old and sentenced to twenty-five-years' imprisonment. In 2011, Barringer began filing petitions in the Supreme Court. The Court did not grant the relief sought in any of Barringer's filings. In the instant quo warranto petition Barringer challenged his conviction on the ground that the information was defective, a claim Barringer previously raised by way of a habeas petition. The Supreme Court denied the petition and found that Barringer abused the Court's limited judicial resources. The Court sanctioned Barringer by directing the Clerk of Court to reject any future

pleadings or other requests for relief submitted by Barringer that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Franqui v. State

Court: Florida Supreme Court
Docket: SC19-203
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's claim of intellectual disability, raised in successive motions for postconviction relief under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying relief. Appellant was convicted of first-degree murder and sentenced to death in two separate cases. After the United States Supreme Court decided Hall v. Florida, 572 U.S. 701 (2014), Appellant filed successive motions for postconviction relief in both of his capital cases, asserting that the circuit court's denials of his previous claims of intellectual disability were based on the court's improper interpretation of Florida's intellectual disability statute. The circuit court summarily denied the motions. The Supreme Court reversed and remanded for an evidentiary hearing on the issue of intellectual disability. After a hearing, the circuit court denied the claim. The Supreme Court affirmed, holding (1) the circuit court did not err in denying Appellant's intellectual disability claim; and (2) Appellant was not entitled to relief under Hurst v. Florida, 136 S. Ct. 616 (2016), or Hurst v. State, 202 So. 3d 40 (Fla. 2016).

Hicks v. State

Court: Florida Supreme Court
Docket: SC19-1978
Opinion Date: May 7, 2020
Judge: Per Curiam

Areas of Law: Criminal Law

The Supreme Court denied the instant mandamus petition filed by Hicks and sanctioned Hicks by barring him from filing any further pro se requests for relief related to his criminal case. Hicks was convicted of one count of lewd and lascivious conduct by a person over eighteen years of age on a victim under sixteen years of age. Since 2016, Hicks filed thirteen pro se requests for relief in the Supreme Court related to his criminal case. The Court did not grant the relief sought in any of Hicks' filings. In the instant petition, Hicks sought a writ of mandamus compelling the circuit court to comply with the requirements of Fla. R. Crim. P. 3.850 by filing a copy of an order denying his second postconviction motion with the clerk of court. The Supreme Court dismissed the petition and found that Hicks abused this Court's limited judicial resources. The Court directed the Clerk of Court to reject any future pleadings or other requests for relief submitted by Hicks that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Burley v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0356
Opinion Date: May 4, 2020
Judge: Boggs
Areas of Law: Constitutional Law, Criminal Law

In 1992, Douglas Burley pled guilty to malice murder. He moved for an out-of-time appeal in 2019, claiming that his right to appeal was frustrated by his plea counsel's erroneous advice that he could not appeal his conviction because it was the product of a guilty plea. The trial court denied Burley's motion. After review, the Georgia Supreme Court vacated the trial court's judgment and remanded the case with direction to hold a hearing to determine whether ineffective assistance of counsel frustrated Burley's right to appeal.

Evans v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0007

Opinion Date: May 4, 2020
Judge: McMillan
Areas of Law: Constitutional Law, Criminal Law

Jimmy Evans was convicted by jury for murder and other crimes relating to the 2006 deaths of Tavoris Calhoun and Dezmon Thomas. On appeal, Evans argued that because he was visibly intoxicated at the time he made statements to law enforcement and consented to a search of his home and person, the statements and consent were involuntarily given and the trial court should have granted his motion for new trial on this ground. Furthermore, Evans argued that his trial counsel was ineffective for failing to file a motion to suppress at trial on the same basis. Because Evans failed to show error or ineffective assistance of counsel, the Georgia Supreme Court affirmed his conviction.

Hill v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0285
Opinion Date: May 4, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Esco Hill was convicted by jury of malice murder and other crimes relating to the stabbing death of Alford Morris in 2014. On appeal, Hill argued the trial court committed reversible error by requiring him to be visibly shackled for the duration of his six-day trial. After review of the trial court record, the Georgia Supreme Court concurred this was reversible error, consequently, reversed judgment of conviction. Because the Court concluded the evidence at trial was sufficient to sustain Hill's conviction, the State could re-try him. The Court did not address Hill's remaining enumerations of error, "as they are not likely to recur in the event of a retrial."

Whitehead v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0171
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Javis Whitehead was convicted by jury of murder and other crimes in connection with the shooting death of Dominique Larry. On appeal, Whitehead challenged the sufficiency of the evidence presented to rebut his

claim of self-defense and to convict him for murder beyond a reasonable doubt. He also argued the trial court erred in denying his motion to suppress his custodial statement, and in refusing to excuse for cause the District Attorney from the panel of prospective jurors prior to the conclusion of voir dire. Finding no merit to these contentions, the Georgia Supreme Court affirmed conviction.

Read Opinion Are you a lawyer? **Annotate this case**.

Idaho v. Blythe

Court: Idaho Supreme Court - Criminal
Docket: 46992
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Nicholas Blythe appealed after he was convicted of possessing a controlled substance. He conditionally pled guilty, reserving the right to challenge his sentence. On appeal, he argued the district court erred in denying his motion to suppress certain evidence found because the evidence presented at trial was found in violation of Blythe's Fourth Amendment rights. After review, the Idaho Supreme Court determined the search at issue took place before an arrest occurred, and because no rationale justifying a search incident to arrest was sufficiently present here, the search of Blythe's shoes was not a valid search incident to arrest. Therefore, the district court erred in holding that the search was reasonable under the Fourth Amendment. Blythe's conviction was vacated, the district court order denying Blythe's motion to suppress was reversed, and the matter remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

Idaho v. Glodowski

Court: Idaho Supreme Court - Criminal
Docket: 47131
Opinion Date: May 6, 2020
Judge: Roger S. Burdick

Areas of Law: Constitutional Law, Criminal Law

David Glodowski appealed after he was convicted for failing to update his sex-offender registration in violation of Idaho Code section 18-8309. He argued the district court erred by ruling that his prior conviction under a Wisconsin statute was "substantially equivalent" to Idaho statutes that required sex-offender registration in Idaho. After review, the Idaho Supreme Court determined the district court improperly allowed the State to seek a redetermination of the "substantially equivalent" element given that the Idaho Bureau of Criminal Identification made a final determination on that element. However, because the State put forth sufficient evidence to prove that element, and the district court's jury instruction accomplished the same purpose, the Supreme Court concluded the error was harmless. Accordingly, the Court found no reversible error in the district court's decision to grant the State's motion and provide the jury instruction. Therefore, judgment of conviction was affirmed.

State v. Gordon

Court: Iowa Supreme Court

Docket: 18-1099
Opinion Date: May 1, 2020
Judge: Brent R. Appel
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for assault on a peace officer with a dangerous weapon, a felony, and several misdemeanors, holding that Defendant did not receive ineffective assistance of counsel. After Defendant pleaded guilty, he absconded. He was later returned to custody. On appeal, Defendant argued that he received ineffective assistance of counsel because the plea bargain contained an unlawful term. Specifically, Defendant argued that the plea bargain's provision that he would be released from jail for a forty-eight-hour furlough after pleading guilty was illegal and that his trial counsel committed ineffective assistance in obtaining the illegal benefit for him. The Supreme Court affirmed, holding that where Defendant entered into the plea agreement with the illegally lenient sentence, he could not benefit from that sentence and then attack the plea bargain.

Read Opinion Are you a lawyer? **Annotate this case**.

State v. Craig

Court: Kansas Supreme Court
Docket: 119660
Opinion Date: May 1, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction and sentence for first-degree felony murder, holding that there was no error in the proceedings below. A jury found Defendant guilty of both first-degree felony murder and second-degree intentional murder. At sentencing, Defendant moved for a new trial and judgment notwithstanding the verdict, arguing that the jury must have had reasonable doubt on the first-degree felony murder theory because it convicted him of second-degree murder for the same killing. The district court dismissed the second-degree murder conviction and sentenced Defendant for the felony murder over his objection. The Supreme Court affirmed, holding (1) the district court did not err when it sentenced Defendant on felony murder instead of declaring a mistrial because

Defendant did not establish that the jury failed to find each element of the felony murder beyond a reasonable doubt or that the jury's first- and second-degree murder verdicts were so irreconcilable as to require a new trial; and (2) the district court did not err in declining to give an instruction on voluntary intoxication.

Commonwealth v. Billingslea

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12715
Opinion Date: April 30, 2020
Judge: Cypher
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's convictions and the decision of the Appeals Court denying Defendant's motion to vacate the entry of his appeal from his convictions in that court and to have the case entered directly in the Supreme Judicial Court, holding that a direct appeal from the third conviction of a habitual offender pursuant to Mass. Gen. Laws ch. 279, 25(b) may be entered in the Appeals Court. Defendant was indicted for serious felonies arising from a brutal attack and rape. In addition to charging the specific felony, each indictment also alleged that the sentence for that felony should be enhanced pursuant to the habitual criminal provision Mass. Gen. Laws ch. 279, 25(a) or the habitual offender provision of section 25(b), or both. After he was convicted, Defendant moved to have the case entered directly in the Supreme Judicial Court. The Appeals Court denied the motion. The Supreme Judicial Court affirmed Defendant's convictions, holding (1) this direct appeal was entitled to the unique review prescribed by Mass Gen. Laws ch. 278, 33E, and the Appeals Court may conduct such section 33E review; (2) Defendant was not impermissibly allowed to waive his right to a jury trial on the sentencing enhancement provisions of the indictments; and (3) Defendant was not entitled to reversal of his convictions on any other ground.

Commonwealth v. Martin

Court: Massachusetts Supreme Judicial Court
Docket: SJC-08768
Opinion Date: May 5, 2020
Judge: Ralph D. Gants
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree and the denial of his motion for a new trial and declined to exercise its authority under Mass. Gen. Laws ch. 278E to reduce Defendant's conviction to murder in the second degree, holding that Defendant was not entitled to relief on any of his allegations of error. Defendant was convicted of murder in the first degree on the theory of felony-murder. Defendant filed a motion for a new trial, which was denied. The Supreme Judicial Court affirmed, holding (1) Defendant's motion for a new trial was correctly denied because Defendant was not prejudiced by counsel's ineffective assistance; (2) this Court declines to extend the reach of the Court's holding in Commonwealth v. Brown, 477 Mass. 805 (2017), to Defendant's case; and (3) trial judge erred when he declined Defendant's request that the jury be instructed on the elements of voluntary and involuntary manslaughter, but the error was not prejudicial in the context of the judge's other instructions.

Opinion Date: May 7, 2020
Judge: Beam
Areas of Law: Constitutional Law, Criminal Law

Leslie Galloway appealed the denial of his 2015 petition for post-conviction relief (PCR) pertaining to his 2007 guilty plea to carjacking, a conviction that was used as an aggravating circumstance in Galloway's 2010 capital-murder trial at which Galloway received a death sentence. Galloway claimed in the petition that his defense counsel Wendy Martin had an actual conflict of interest because, before becoming his defense counsel, Martin had served as an assistant district attorney in the same case, unbeknownst to Galloway. The trial court ruled that Galloway's PCR claim was time barred under Mississippi's Uniform Post-Conviction Collateral Relief Act (UPCCRA), having been filed more than seven years after Galloway's conviction for carjacking. The trial court alternatively found no merit to Galloway's PCR claim, time bar notwithstanding. Accordingly, the trial court denied Galloway's PCR petition. The Mississippi Supreme Court agreed with the trial court that Galloway's PCR claim was time barred under the UPCCRA. The Court also agreed there was no merit to Galloway's PCR claim.

City of Missoula v. Zerbst

Court: Montana Supreme Court
Citation: 2020 MT 108
Opinion Date: May 5, 2020
Judge: Beth Baker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction for sexual assault, holding that the municipal court erred when it instructed the jury on a definition of "consent" from the 2017 sexual assault statute and not the applicable 2015 statute, and the erroneous jury instruction prejudicially affected Defendant's substantial rights. At trial, the court instructed the jury, over Defendant's objection, on the definition of consent contained in recent amendments to the sexual assault statute. On appeal, Defendant argued that the municipal court failed to apply the correct law when instructing the jury on the elements of the claimed offense. The district court denied the

appeal. The Supreme Court reversed, holding (1) the instructions, as a whole, did not fully and fairly instruct the jury on the law applicable to the case; and (2) Defendant's substantial due process right was prejudiced by the erroneous jury instruction.

State v. Degarmo

Court: Nebraska Supreme Court
Citation: 305 Neb. 680
Opinion Date: May 1, 2020
Judge: Stacy
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of driving under the influence, holding that Defendant consented to a chemical test of his urine and, therefore, the results of the urine test were admissible. A law enforcement officer stopped Defendant for an expired registration. Based on his observations, the officer, a certified drug recognition evaluation expert, administered field sobriety tests. The officer concluded that Defendant was under the influence of marijuana arrested Defendant for driving under the influence and then took him to a detoxification center. Thereafter, a chemical test of Defendant's urine confirmed the presence of marijuana. On appeal, Defendant challenged the admission of the results of the urine test. The Supreme Court affirmed, holding that Defendant voluntarily consented to the warrantless search of his urine, and therefore, the search fell within a recognized exception to the warrant requirement.

People v. Holz

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02682
Opinion Date: May 7, 2020
Judge: Fahey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals held that N.Y. Crim. Proc. Law (CPL) 710.70(2) grants a defendant the right to review of a suppression decision when the order related exclusively to a count that was satisfied by a guilty plea but was not one to which the defendant pleaded guilty. Defendant was charged with two counts of burglary in the second degree. The first count related to a laptop computer, and the second count related to jewelry. Defendant moved to suppress the jewelry, but Supreme Court denied the motion. Defendant then pleaded guilty to one count of burglary in the second degree as charged in the count pertaining to the theft of the laptop computer, in satisfaction of the count charging the burglary of jewelry. On appeal, Defendant argued that Supreme Court erred in denying his motion to suppress the jewelry. The Appellate Division affirmed, concluding that it was jurisdictionally precluded from reviewing the suppression order. The Court of Appeals reversed, holding (1) Defendant's right to appellate review of Supreme Court's suppression order was secured by CPL 710.70(2); and (2) because the Appellate Division did not reach the underlying suppression question the case must be remitted to the Appellate Division for further proceedings.

People v. Maffei

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02680
Opinion Date: May 7, 2020
Judge: DiFiore
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals affirmed the order of the Appellate Division concluding on direct appeal that Defendant was not entitled to relief on his ineffective assistance of counsel claim, holding that Defendant, on this record, did not sustain his burden to establish that counsel was constitutionally ineffective. After a jury trial, Defendant was convicted of second-degree murder. On appeal, Defendant argued that his trial counsel's failure to challenge a prospective juror constituted ineffective assistance of counsel. The Appellate Division affirmed. The Court of Appeals affirmed, holding (1) the record was inadequate to review Defendant's ineffective assistance of counsel claim; and (2) the appropriate procedure for the litigation of Defendant's challenge to his counsel's performance was a N.Y. Crim. Proc.

Law 440.10 motion.

State v. Bailey

Court: North Carolina Supreme Court
Docket: 360A19
Opinion Date: May 1, 2020
Judge: Davis
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the order of the trial court denying Defendant's motion to suppress evidence seized during the execution of a search warrant, holding that the warrant supported by probable cause. Defendant pled guilty to the offense of trafficking in cocaine while preserving his right to appeal the denial of his motion to suppress. On appeal, Defendant argued that the trial court erred in denying his motion to suppress because the facts contained in the affidavit were insufficient to establish probable cause to search his residence. The court of appeals affirmed. The Supreme Court affirmed, holding that the affidavit contained facts that were sufficient to provide a nexus between the residence and suspected criminal activity, and therefore, the warrant was supported by probable cause.

State v. Ellis

Court: North Carolina Supreme Court
Docket: 340A19
Opinion Date: May 1, 2020
Judge: Robin E. Hudson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the decision of the Court of Appeals affirming the trial court's denial of Defendant's motion to suppress evidence, holding that there was no reasonable suspicion to justify the law enforcement officer's stop when Defendant signaled with his middle finger from the passenger side window of a moving vehicle. While assisting a stranded

motorist, the officer turned his attention to another car traveling on the roadway, a white SUV. Defendant had his arm outside the passenger window and gestured with his middle finger, making an up-and-down motion. Believing that Defendant was committing the crime of disorderly conduct, the officer pursued and then stopped the SUV. At trial, Defendant moved to suppress the officer's testimony, arguing that there was no reasonable suspicion to justify the stop. The trial court denied the motion. Defendant pleaded guilty to resisting, delaying, or obstructing a public officer. The court of appeals affirmed the trial court's denial of Defendant's motion to suppress. The Supreme Court reversed, holding that the specific, articulable facts did not establish reasonable suspicion of the crime of disorderly conduct.

State v. Hobbs
Court: North Carolina Supreme Court
Docket: 263PA18
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction, holding that the trial court clearly erred in ruling that Defendant failed to prove purposeful discrimination with respect to the State's use of peremptory challenges to strike three jurors without considering all of the evidence presented by Defendant. Defendant was found guilty of one count of first-degree murder and other crimes. On appeal, Defendant argued that the trial court erred by failing to grant three objections that he made under Batson v. Kentucky, 476 U.S. 79 (1986). The court of appeals affirmed Defendant's convictions. The Supreme Court reversed, holding (1) the court of appeals erred in its analysis of Defendant's Batson claims with respect to the three jurors; and (2) as to all three jurors, remand was required for reconsideration of whether Defendant proved purposeful discrimination in each case.

State v. Mylett

Court: North Carolina Supreme Court
Docket: 6A19
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the court of appeals affirming the trial court's judgment convicting Defendant for conspiracy to commit harassment of a juror, holding that the trial court erred in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. Defendant was convicted of conspiracy to commit harassment of a juror because of his actions at a courthouse following his twin brother's conviction for assault on a government official. On appeal, the court of appeals concluded that the trial court did not err in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. The Supreme Court reversed, holding that the evidence in Defendant's trial was insufficient to raise anything more than mere conjecture that he had made an agreement with another person to threaten or intimidate a juror.

Dodge v. North Dakota

Court: North Dakota Supreme Court
Citation: 2020 ND 100
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

Richard Dodge appealed from a district court order denying his application for post-conviction relief. Dodge was charged with five felonies and a misdemeanor in December 2015. Dodge was appointed counsel. In April 2016, Dodge's counsel moved the court to withdraw because the attorney-client relationship was "irreparably broken and rendered unreasonably difficult." The court granted the motion, and Dodge was appointed substitute counsel in May 2016. In July 2016, Dodge himself filed a "motion to dismiss counsel." The court denied Dodge's motion. Five months after the deadline for motions and plea agreements, Dodge's counsel sought to have Dodge submit to a psychiatric examination. This request was denied, the trial court

found no evidence, and the the court itself made no observations, that Dodge was incompetent to stand trial. After this denial, Dodge himself again moved to dismiss his trial counsel, and due to the allegations Dodge made in his motion, counsel moved to withdraw. The trial court denied both motions, and instead, required the attorney to appear as standby counsel and assist Dodge during trial if requested, but relieved him of any further obligations to consult with Dodge. The case proceeded to trial. At the beginning of trial, the court gave Dodge the option of representing himself or having his attorney represent him. Dodge chose to have his attorney represent him. Because his attorney had not prepared for trial and had no communication with Dodge since he moved to withdraw, Dodge's attorney asked for a brief recess to consult with Dodge. During the recess, a settlement was reached. Dodge agreed to enter Alford pleas on all counts, waived a presentence investigation, and agreed to be sentenced immediately after entering his pleas. Dodge was immediately sentenced following his guilty pleas, and thereafter sought post-conviction relief on grounds he was not competent to enter his pleas, and that he received ineffective assistance of trial counsel. After review, the North Dakota Supreme Court concluded the district court's finding that Dodge was competent when he entered his pleas was not clearly erroneous, and disposed of his claim of ineffective assistance of counsel.

Kastet v. NDDOT

Court: North Dakota Supreme Court
Citation: 2020 ND 91
Opinion Date: May 7, 2020
Judge: Daniel J. Crothers
Areas of Law: Criminal Law, Government & Administrative Law

The North Dakota Department of Transportation (Department) appealed the district court's reversing a hearing officer's decision suspending Holden Kastet's driving privileges for 365 days. The Department argued the hearing officer did not abuse his discretion in admitting the chemical breath test, and State Highway Patrol Trooper King scrupulously complied with the approved method for testing Kastet's breath on the Intoxilyzer 8000. After review, the North Dakota Supreme Court concurred with the Department and reversed the district court judgment. The matter was remanded with instructions to reinstate the hearing officer's decision.

North Dakota v. Dahl

Court: North Dakota Supreme Court
Citation: 2020 ND 87
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

The State of North Dakota appealed a district court order denying its motion to resume prosecution against Matthew Dahl and dismissing the case. In December 2014, the State charged Dahl with two counts of theft. Dahl did not appear on the charges until he was arrested on a bench warrant in February 2017. In mid-April 2017, the State mailed Dahl a pretrial diversion agreement. Dahl signed and returned the notarized agreement dated May 3, 2017. On May 9, 2017, the state's attorney signed and filed the agreement with the district court, and the court approved the agreement the same day. Under the agreement, the State agreed to suspend prosecution for "two

years from the date of execution" conditioned on Dahl's timely payment of restitution. Dahl failed to make minimum monthly restitution payments. On June 6, 2019, the State moved to resume prosecution, alleging Dahl violated the pretrial diversion agreement by his non-payment. The district court held a hearing on the State's motion in August 2019. The court concluded the pretrial agreement was executed when Dahl signed it on May 3, 2017. The court then denied the State's motion to resume prosecution as untimely under N.D.R.Crim.P. 32.2(d)(2), and dismissed the complaint against Dahl. After review, the North Dakota Supreme Court reversed, concluding the district court erred in determining the State's motion was untimely, and remanded for further proceedings.

North Dakota v. Foster

Court: North Dakota Supreme Court
Citation: 2020 ND 85
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Akeem Foster was convicted by jury of Terrorizing and Carrying a Concealed Weapon. Foster contended on appeal he was denied a fair trial because he was asked during cross-examination if other witnesses were lying and because the prosecutor expressed personal beliefs about the evidence during closing arguments. Foster also argued there was insufficient evidence to convict him of either charge. After review, the North Dakota Supreme Court affirmed Foster's conviction for Carrying a Concealed Weapon, but reversed his conviction for Terrorizing. The Court found Foster was improperly asked to provide an opinion on the veracity and credibility of the State's witnesses. The improper questioning was prejudicial and denied Foster a fair trial on the terrorizing charge.

North Dakota v. Kolstad

Court: North Dakota Supreme Court

Citation: 2020 ND 97
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

In December 2018, Officer Nelson of the University of North Dakota Police Department conducted a traffic stop of Stanley Kolstad for suspicion of driving under the influence. Kolstad performed field sobriety tests and a preliminary breath test (PBT). Prior to performing the PBT, Kolstad informed Nelson that he had asthma. Nelson testified he was unable to obtain a PBT result because Kolstad was filling his cheeks with air while performing the test. Kolstad was arrested for DUI and refusing to submit to a chemical test. Kolstad was transported to the UND police station to be given an Intoxilyzer breath test. Prior to the Intoxilyzer test, Nelson read Kolstad the implied consent advisory. But, because Nelson was not a certified operator of the Intoxilyzer machine, Officer Waltz conducted the test. Prior to the test, Kolstad informed Waltz he had asthma. The Intoxilyzer test results were deficient. Waltz testified Kolstad was not providing enough air for the test machine to provide a valid result. Kolstad was charged with driving under the influence and refusing to submit to a chemical test. Kolstad's counsel made a discovery request to the State seeking copies of any audio or video recordings taken by police officers. Kolstad's counsel also requested the State inform him whether any sound or video recordings taken of Kolstad were subsequently "altered, edited, destroyed, or discarded." The State provided Kolstad's counsel with dash camera footage from Nelson's police car that had been taken at the scene of the arrest, but the State did not provide any body camera footage from either Nelson or Waltz. Upon learning that Waltz's body camera footage was successfully uploaded to UND servers, Kolstad's counsel moved to dismiss the case because the State did not provide any body camera footage in discovery as requested. The district court ultimately dismissed the refusal to submit to a chemical breath test charge as a sanction for failing to provide the body camera footage. The State appealed, arguing the alleged discovery violation did not rise to a constitutional violation of Kolstad's due process rights, and the district court abused its discretion in dismissing the refusal charge. Kolstad argued the district court's order dismissing the refusal charge was not appealable, and if it was, the court did not abuse its discretion in dismissing the charge. The North Dakota Supreme Court concluded there was nothing in the record to indicate the district court adequately considered an

alternative or less severe sanction to dismissal, and by not considering a less severe sanction, the trial court erred. The district court's order dismissing the refusal charge was reversed, and the matter remanded for further proceedings.

North Dakota v. Michel

Court: North Dakota Supreme Court
Citation: 2020 ND 101
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

Kevin Michel was convicted by jury of knowingly receiving stolen property. Jamestown Police began investigating theft of tires from Northwest Tire in October 2017. About ten months later, Thomas Melland and Andrew Heckelsmiller became suspects in the investigation. Heckelsmiller told police he had sold stolen tires to Michel. In August 2018, Detective LeRoy Gross spoke with Michel about the stolen tires. Michel acknowledged he had bought tires from Heckelsmiller and Melland. Michel also told Detective Gross he stopped buying tires from Heckelsmiller and Melland after seeing a Facebook post from Northwest Tire offering a $500 reward for information regarding stolen tires. Detective Gross told Michel, "There's going to be a lot of restitution these two boys are going to have to come up with unless we can get some tires back." Michel said he had sold several of the tires but still had some of them. Michel turned over seven new tires to Detective Gross. Representatives from Northwest Tire and J&L Service identified the tires as some of those stolen from their shops. During the jury's deliberations, the jury submitted a note with written questions to the court. Michel argued on appeal the district court erred by not specifically answering the jury's questions and instead referring them to the existing jury instructions. After review, the North Dakota Supreme Court affirmed the criminal judgment, except as to the award of restitution. The award was reversed because the district court awarded more than what was required to make the victims whole. The matter was remanded for a redetermination of restitution.

North Dakota v. Wayland

Court: North Dakota Supreme Court
Citation: 2020 ND 106
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Joey Wayland appealed after he was convicted by jury of Theft of Property and Possession of Drug Paraphernalia. Wayland contended his case should have been dismissed because his right to a speedy trial was violated by a continuance of his trial from March 11, 2019 to April 8, 2019. Wayland also contended the district court violated his right to remain silent by ordering him to submit to a mental health evaluation. Finding no reversible error, the North Dakota Supreme Court affirmed.

Schwindt v. Sorel

Court: North Dakota Supreme Court
Citation: 2020 ND 92
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Constitutional Law, Criminal Law, Government & Administrative Law

Gregory Schwindt appealed a district court judgment affirming a Department of Transportation hearing officer's revocation of his driving privileges for 180 days. Schwindt argued North Dakota's implied consent and refusal laws were unconstitutional, the hearing officer erred by considering the results of the horizontal gaze nystagmus (HGN) test, and the hearing officer erred in finding he refused to take a chemical test. After review, the North Dakota Supreme Court concluded the hearing officer's findings of fact were supported by a preponderance of the evidence, the conclusions of law were sustained by the findings of fact, and the decision to revoke Schwindt's driving privileges was in accordance with the law.

State ex rel. McDougald v. Greene

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2782
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied a writ of mandamus sought by Relator to compel Respondent, the public-records custodian at the Southern Ohio Correctional Facility (SOCF), to provide Relator with three public records and to pay Relator statutory damages and court costs associated with this litigation, holding that Relator was not entitled to either a writ of mandamus nor statutory damages. When Relator was an inmate at SOCF he submitted a public-records request to Respondent seeking three documents. Respondent provided one of the three documents. Relator then filed a complaint for a writ of mandamus seeking an order compelling Respondent to provide the two documents and to pay statutory damages and court costs associated with this litigation. The Supreme Court denied the writ of mandamus on the merits, holding that Respondent's response to Relator fully satisfied Respondent's obligations under Ohio Rev. Code 149.43, and therefore, Relator was not entitled a writ of mandamus, and there was no basis to award statutory damages.

State ex rel. Parker Bey v. Byrd

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2766
Opinion Date: May 5, 2020
Judge: Maureen O'Connor
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the judgment of the court of appeals denying Appellant's complaint for a writ of mandamus to compel the Cuyahoga County Clerk of Courts to produce various court records and denying the clerk's request that Appellant be declared a vexatious litigator, holding that the court of appeals erred in denying Appellant's complaint on the grounds that he did not invoke the Rules of

Superintendence as the basis for his request. Appellant sought copies of journal entries from his criminal case and a copy of the clerk of courts' records-retention schedule. The clerk largely denied the request. Appellant then filed a complaint for a writ of mandamus. The court of appeals denied Appellant's request for mandamus relief, concluding that the clerk had no clear legal duty to provide the requested records. The Supreme Court reversed, holding (1) this action to compel the production of journal entries from a 1995 case was properly brought under the Public Records Act; and (2) this Court declines to impose sanctions on Appellant or to declare him a vexatious litigator.

State v. Dangler

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2765
Opinion Date: May 5, 2020
Judge: DeWine
Areas of Law: Criminal Law

The Supreme Court reversed the judgment of the court of appeals vacating Defendant's conviction and sentence and reinstated the trial court's acceptance of Defendant's plea of no contest to sexual battery, holding that the trial court did not completely fail to comply with Crim.R.11(C)(2)(a), and there was nothing in the record to support a conclusion that Defendant would not have entered his plea had the trial court been more detailed in its explanation. On appeal, Defendant sought to vacate his plea of no contest, arguing that his plea was invalid because the trial court erred by not explaining more fully the obligations and restrictions that went with his status as a sex offender, in violation of Crim. R. 11(C)(2)(a). The court of appeals vacated the conviction without requiring Defendant to show prejudice, concluding that the trial court had completely failed to comply with Crim. R. 11(C)(2)(a). The Supreme Court reversed, holding (1) the trial court did not completely failed to comply with Crim R. 11(C)(2)(a)'s maximum-penalty-advisement requirement; and (2) because Defendant did not establish prejudice, he was not entitled to have his no-contest plea vacated for a failure to comply with Crim.R. 11(C).

Oregon v. Haji

Court: Oregon Supreme Court
Docket: S066254
Opinion Date: May 7, 2020
Judge: Nakamoto
Areas of Law: Constitutional Law, Criminal Law

After a grand jury issued an indictment charging defendant Hanad Ali Haji with multiple offenses, the district attorney determined that the indictment could be challenged by demurrer because the basis for joining those offenses was not expressly alleged. Instead of seeking another indictment from the grand jury, the district attorney obtained leave from the trial court to amend the indictment by adding allegations specifying the statutory basis for joinder, without adding factual allegations about the crimes. Defendant was convicted on some of the charges at trial, and the Court of Appeals affirmed. The issue this case presented for the Oregon Supreme Court's review centered on whether the district attorney could add allegations specifying the statutory basis for joinder of multiple offenses to an indictment instead of resubmitting the case to the grand jury. The Supreme Court determined that neither the statute permitting joinder of multiple offenses in a single indictment nor Article VII (Amended), section 5(6), of the Oregon Constitution precluded a district attorney, with approval of the trial court, from amending an indictment to add allegations specifying the statutory basis for joinder of multiple offenses. The Supreme Court affirmed the decision of the Court of Appeals, based in part on different reasoning, and affirmed the judgment of the circuit court.

South Carolina v. Durant

Court: South Carolina Supreme Court
Docket: 27964
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law

Appellant Larry Durant was convicted of second-degree criminal sexual conduct (CSC) for sexually abusing a teenage girl in his church office where he served as the pastor. Durant contended the trial court improperly permitted the State to introduce evidence of prior sexual abuse allegations as evidence of a common scheme or plan under Rule 404(b), SCRE, and that the State committed a "Brady" violation by failing to accurately disclose the criminal history of its witness. After review, the South Carolina Supreme Court affirmed the admissibility of the girls' testimony. "[W]hile the State failed to disclose the criminal background information of its witness, we find this information was not material." The Court found Durant exercised his position of trust, authority, and spiritual leadership to hold private prayer meetings with teen girls who had grown up in his church. He told them he was praying for their health and good fortune, and represented that part of this process was touching them sexually and having intercourse. Durant then warned the girls of misfortune if they refused or told anyone. Moreover, he used scripture as a means of grooming the children into performing sex acts. "These facts demonstrate the requisite logical connection between the prior acts of sexual abuse and the one forming the basis of the crime charged." The Court therefore affirmed Durant's conviction.

South Carolina v. Perry

Court: South Carolina Supreme Court
Docket: 27963
Opinion Date: May 6, 2020
Judge: Few
Areas of Law: Constitutional Law, Criminal Law

Petitioner Wallace Perry was convicted on two counts of criminal sexual conduct (CSC) with a minor in the first degree and two counts of CSC with a minor in the second degree for sexually assaulting two of his biological daughters. Prior to Perry's trial, the State made a motion to admit the testimony of Perry's stepdaughter from an earlier marriage that Perry sexually assaulted her twenty-two to twenty-seven years earlier. The State argued the trial court should not exclude the stepdaughter's testimony under Rule 404(b) of the South Carolina Rules of Evidence because it fit the

"common scheme or plan" exception. Perry objected to this testimony. The trial court initially reserved ruling on the issue, but later indicated it was inclined to allow the stepdaughter to testify. The jury convicted Perry on all counts, and the trial court sentenced him to thirty years in prison. The court of appeals affirmed. The South Carolina Supreme Court determined it was not enough to meet the "logical connection" standard for admission of other crimes under the common scheme or plan exception to Rule 404(b) that the defendant previously committed the same crime. "When evidence of other crimes is admitted based solely on the similarity of a previous crime, the evidence serves only the purpose prohibited by Rule 404(b), and allows the jury to convict the defendant on the improper inference of propensity that because he did it before, he must have done it again. ...The common scheme or plan exception demands more." The Supreme Court held State must show a logical connection between the other crime and the crime charged such that the evidence of other crimes "reasonably tends to prove a material fact in issue." The State must also convince the trial court that the probative force of the evidence when used for this legitimate purpose is not substantially outweighed by the danger of unfair prejudice from the inherent tendency of the evidence to show the defendant's propensity to commit similar crimes. In this case, the State did not meet its burden. Conviction was reversed and the matter remanded for a new trial.

South Carolina v. Quinn

Court: South Carolina Supreme Court
Docket: 27966
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law, White Collar Crime

Respondent Rick Quinn, Jr. was a former member of the South Carolina House of Representatives, representing constituents in Richland and Lexington counties from 1989-2004 and 2010-2017 and serving as House Majority Leader from 1999- 2004. He owned and operated a mail business called Mail Marketing Strategies (MMS) in Columbia, while his father owned and operated a political consulting firm, Richard Quinn & Associates (RQ&A). In 2014, Attorney General Alan Wilson designated First Circuit

Solicitor David Pascoe as special prosecutor to conduct a State grand jury investigation into alleged public corruption committed by current and former members of the South Carolina General Assembly. This case arose from a prior state grand jury investigation of former House Speaker Bobby Harrell, which resulted in six counts of misusing campaign funds, to which he pleaded guilty. During the course of the investigation into Speaker Harrell, SLED uncovered potentially criminal conduct by Representative Jimmy Merrill and Representative Rick Quinn, and a second grand jury investigation was initiated to investigate the conduct of these individuals. The investigation focused on Quinn's practice of using his office as House Majority Leader and leader of the House Republican Caucus to direct mailing and political services to his family's businesses. Quinn only admitted to a limited set of facts supporting the indictment. Believing the plea lacked a sufficient basis, the State moved to vacate Quinn's guilty plea, reconsider the sentence, and for the trial court's recusal. The State appealed the order denying its motions. After review, the South Carolina Supreme Court determined that the State could not appeal the guilty plea, the trial court did not abuse its discretion in sentencing, and there was no evidence of judicial bias or prejudice requiring the court to recuse itself. Therefore, the Court dismissed the State's appeal of the guilty plea, and affirmed as to all other issues.

Texas v. Arellano

Court: Texas Court of Criminal Appeals
Docket: PD-0287-19
Opinion Date: May 6, 2020
Judge: Slaughter
Areas of Law: Constitutional Law, Criminal Law

After Appellee Cesar Ramiro Arellano was arrested for driving while intoxicated, the arresting officer, Phillip Garcia, prepared a probable cause affidavit to support a search warrant for a blood draw. Officer Garcia submitted his sworn affidavit to the on-duty magistrate. Using a cursive signature, the magistrate signed the blank signature line of a form search warrant authorizing the search and seizure of Appellee's blood. Below the signature line appeared the words, "Magistrate, Victoria County, Texas."

Aside from the cursive signature, the magistrate's name was not typed or handwritten anywhere on the warrant. Upon execution of the search warrant, Appellee was charged with DWI. In the trial court, Appellee filed a motion to suppress all evidence stemming from the blood draw. At the pretrial suppression hearing, Appellee argued that the search warrant to obtain the blood specimen was facially invalid because the magistrate's signature was illegible in violation of the requirements of Code of Criminal Procedure Article 18.04(5). The trial court agreed, the court of appeals concurred, and the evidence was suppressed because of the illegible signature. The Texas Court of Criminal Appeals disagreed with both lower courts, finding the court of appeals erred in holding that reliance on the statutory good-faith exception was automatically precluded based on an illegible magistrate's signature in violation of Code of Criminal Procedure Article 18.04(5). Because the remaining issues in the case were not properly addressed by the court of appeals, judgment was vacated and the matter remanded for further proceedings.

Department of Justice Once Again Proves Its Loyalty to the President, Not the Rule of Law

AUSTIN SARAT

verdict post

Austin Sarat—Associate Provost, Associate Dean of the Faculty, and William Nelson Cromwell Professor of Jurisprudence and Political Science at Amherst College—comments on the recent news that the Justice Department will seek dismissal of charges against Michael Flynn. Sarat suggests that because the decision does not seem to advance the fair administration of justice in this case, the court should take the unusual step of refusing to grant the prosecutor's motion to dismiss.

Criminal Law Opinions

Kelly v. United States

Court: US Supreme Court
Docket: 18-1059
Opinion Date: May 7, 2020
Judge: Elena Kagan
Areas of Law: Criminal Law, Government & Administrative Law, White Collar Crime

During former New Jersey Governor Christie's 2013 reelection campaign, Fort Lee's mayor refused to endorse Christie. Kelly, Christie's Deputy Chief of Staff, Port Authority Deputy Executive Director, Baroni, and another official decided to reduce from three to one the number of lanes reserved at the George Washington Bridge's toll plaza for Fort Lee's commuters. To disguise the political retribution, the lane realignment was said to be for a traffic study. Port Authority traffic engineers were asked to collect some numbers. An extra toll collector was paid overtime. The lane realignment caused four days of gridlock, ending only when the Port Authority's Executive Director learned of the scheme. The Third Circuit affirmed the convictions of Baroni and Kelly for wire fraud, fraud on a federally funded program, and conspiracy to commit those crimes. The Supreme Court reversed. The scheme did not aim to obtain money or property. The wire fraud statute refers to "any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses," 18 U.S.C. 1343. The federal-program fraud statute bars "obtain[ing] by fraud" the "property" (including money) of a federally funded program or entity, section 666(a)(1)(A). The statutes are limited to the protection of property rights and do not authorize federal prosecutors to set standards of good government. The Court rejected arguments that the defendants sought to take control of the Bridge's physical lanes or to deprive the Port Authority of the costs of compensating employees. Their realignment of the access lanes was an exercise of regulatory power; a scheme to alter a regulatory choice is not one to take government property. The time and labor of the employees were an incidental byproduct of that regulatory object. Neither defendant sought to obtain the services that the employees provided.

Gomes v. Silva

Court: US Court of Appeals for the First Circuit
Docket: 19-1656

Opinion Date: May 1, 2020
Judge: Stahl
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed the judgment of the district court denying Appellant's petition for a writ of habeas corpus, holding that, under the highly deferential standard prescribed by the Antiterrorism and Effective Death Penalty Act for federal habeas review of state criminal convictions, Appellant's claims to habeas relief failed. Appellant was convicted in a Massachusetts superior court of murder in the first degree and related crimes. The Supreme Judicial Court (SJC) affirmed the convictions. Appellant subsequently petitioned the District Court for the District of Massachusetts for a writ of habeas corpus. The district court denied the petition but granted a certificate of appealability. The First Circuit affirmed, holding (1) sufficient evidence supported Appellant's conviction for first-degree murder as a joint venturer, and the SJC's sufficiency determination was not unreasonable; and (2) the SJC reasonably determined that the trial court's admission into evidence of certain items did not constitute error.

United States v. Perez-Couvertier

Court: US Court of Appeals for the First Circuit
Docket: 16-2186
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed Defendant's conviction of possessing with intent to distribute controlled substances in a protected area and conspiring to distribute controlled substances in a protected area, holding that the district court did not plainly err with respect to any of Defendant's challenges. Specifically, the First Circuit held (1) the district court did not commit plain error in admitting evidence of the conspiracy's activities occurring after he withdrew from the conspiracy or, alternatively, in not instructing the jury to ignore such evidence; (2) the district court did not plainly err in admitting evidence of a drug trafficking organization's violent acts; and (3) the delay between Defendant's indictment and arrest did not violate his Sixth Amendment right to a speedy trial.

United States v. Haverkamp

Court: US Court of Appeals for the Second Circuit
Docket: 18-3735
Opinion Date: May 4, 2020
Judge: Barrington D. Parker
Areas of Law: Criminal Law

Defendant pleaded guilty to one count of distribution and receipt of child pornography and one count of possession of child pornography. The district court sentenced him to 121 months of imprisonment, followed by five years of supervised release, and imposed a $200 mandatory special assessment under 18 U.S.C. 3013, as well as a $10,000 assessment under 18 U.S.C. 3014. The Second Circuit held that the district court did not abuse its discretion in sentencing defendant and his sentence was substantively reasonable. The court held that the text of the Justice for Victims of Trafficking Act (JVTA), 18 U.S.C. 3014, taken as a whole and in its context, is straightforwardly meant to be applied on a per-offender, not a per-count, basis. In this case, the district court erroneously applied the special assessment on a per-count, rather than per-offender, basis. Finally, the court held that the computer monitoring condition in question was reasonably related to the nature of defendant's offense. Accordingly, the court affirmed in part, vacated in part, and remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Mladen

Court: US Court of Appeals for the Second Circuit
Docket: 18-0616
Opinion Date: May 6, 2020
Judge: Amalya Lyle Kearse
Areas of Law: Criminal Law, Trusts & Estates

After defendant died while his appeal was pending, counsel moved for

abatement of all incidents of the prosecution, requesting that the appeal be dismissed without a decision on the merits, that defendant's conviction be vacated, and that the matter be remanded to the district court with instructions to dismiss the indictment and order repayment to defendant's estate of the $20,000 fine and $100 special assessment. Because defendant was convicted upon his plea of guilty, and he neither did nor was permitted to challenge on appeal the merits of his conviction, the Second Circuit denied as without merit so much of the motion as seeks (1) vacatur of his conviction, (2) dismissal of the count of the indictment on which he was convicted, and (3) repayment of the mandatory $100 special assessment. The court granted so much of the motion as requests dismissal of this appeal and a remand to the district court for vacatur of the imposed terms of imprisonment and supervised release and for an order requiring that the paid fine of $20,000 be repaid to defendant's estate.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Richardson

Court: US Court of Appeals for the Second Circuit
Docket: 19-412
Opinion Date: May 5, 2020
Judge: Menashi
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for distribution and possession with intent to distribute a controlled substance. The court held that the district court did not procedurally err by applying the career offender sentencing enhancement pursuant to USSG 4B1.1 because defendant's prior convictions of conspiracy to distribute a controlled substance in violation of 21 U.S.C. 841(a)(1) and 846, and attempted criminal possession of a controlled substance in violation of N.Y. Penal Law 220.16(1), qualify as controlled substance offenses, as defined in USSG 4B1.2(b). The court also held that the district court did not substantively err in sentencing defendant, because it properly considered his criminal history and accounted for his need for mental health and substance abuse treatment.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Rosemond

Court: US Court of Appeals for the Second Circuit
Docket: 18-3561
Opinion Date: May 1, 2020
Judge: Chin
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for murder-for-hire, conspiracy to commit murder-for-hire, murder through use of a firearm, and possession of a firearm during a murder-for-hire conspiracy. Defendant owned Czar Entertainment, a music management company that represented hip-hop, rap and R&B artists such as Jayceon Taylor, also known as "The Game." Taylor was a member of G-Unit, a rap group run by Curtis Jackson, also known as "50 Cent." Defendant's crimes stemmed from a rivalry with Violator Records, the company that managed G-Unit. The court rejected defendant's contention that his attorney was ineffective because he conceded that defendant paid for the victim to be shot, even though he told counsel not to make this concession. The court held that defendant failed to show that this was objectively unreasonable or that he would have been found not guilty had a different argument been advanced. In this case, there was ample evidence supporting counsel's strategy to concede that defendant ordered a shooting where, among other things, the government's key witness, who participated in the conspiracy and lured the victim to be shot, testified that defendant agreed to pay the shooter. The court also held that the district court did not abuse its broad discretion by admitting prior bad-act evidence under Federal Rule of Evidence 404(b)(1).

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lacerda

Court: US Court of Appeals for the Third Circuit
Docket: 15-2812
Opinion Date: May 5, 2020
Judge: Porter
Areas of Law: Criminal Law, White Collar Crime

VOG billed itself as an advocacy group helping victims of timeshare fraud get out of their timeshare debts. A jury determined that VOG had actually

defrauded its customers and that three individual defendants (including Lacerda) were each knowing participants in that fraud. Lacerda was sentenced to 324 months' imprisonment for his leading role in the fraudulent enterprise. The Third Circuit affirmed the respective convictions and sentences. The court rejected a claim of impermissible "overview testimony" by an FBI agent; an officer who is familiar with an investigation or was personally involved may tell the story of that investigation—how the investigation began, who was involved, and what techniques were used, and, with a proper foundation, may offer lay opinion testimony and testify about matters within his personal knowledge. The district court did not abuse its discretion when it disqualified defense counsel based on a conflict of interest; when it denied replacement counsel's motion for a continuance; when it excluded from evidence, as hearsay, an email sent by Lacerda to VOG's former CFO; in exercising its sentencing discretion; or by ordering the forfeiture of all VOG's gross proceeds.

Read Opinion Are you a lawyer? **Annotate this case**.

Cucalon v. Barr

Court: US Court of Appeals for the Fourth Circuit
Dockets: 18-1292, 18-2206
Opinion Date: May 7, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law, Immigration Law

The Fourth Circuit denied petitions for review of the BIA's final order of removal. Applying the modified categorical approach, the court held that defendant's prior conviction for distribution of cocaine under Virginia Code 18.2-248, including distribution of that substance as an accommodation under Virginia Code 18.2-248(D), satisfies the federal definitions of an "aggravated felony" and of a crime "relating to a controlled substance" pursuant to 8 U.S.C. 1227(a)(2)(A)(iii), 1227(a)(2)(B)(i). The court also held that the district court did not abuse its discretion in denying petitioner's motion to reconsider.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Doctor

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4874
Opinion Date: May 4, 2020
Judge: Roger L. Gregory
Areas of Law: Criminal Law

The Fourth Circuit affirmed the district court's revocation of defendant's supervised release and resulting sentence. The court held that the district court did not clearly err in finding the government proved he committed the assault underlying the supervised release violation; the district court did not commit plain error by adopting the violation report when announcing defendant committed Violation One; and, even if the district court erred in sentencing defendant for a Grade A violation, the error was harmless.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lewis

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-4028
Opinion Date: May 4, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law

Defendant was convicted for possessing a firearm as a felon and sentenced to 63 months' imprisonment and a three-year period of supervised release. The district court additionally recommended, without explanation, that defendant receive addiction treatment while incarcerated and ordered, as a special condition of his supervised release, that defendant participate in an addiction treatment program. The Fourth Circuit held that defendant's sentence is procedurally unreasonable because the district court failed to provide an adequate explanation for imposing as a special condition of supervised release the requirement of addiction treatment. The court also held that the district court failed to address defendant's nonfrivolous mitigation arguments. Therefore, the court remanded for resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Jordan

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-40499
Opinion Date: May 1, 2020
Judge: Jennifer Walker Elrod
Areas of Law: Criminal Law

The Fifth Circuit affirmed the district court's grant of defendants' motion for a new trial on the basis of prejudicial outside influence on the jury. The court held that the district court did not abuse its broad discretion in granting the motion for a new trial without holding an evidentiary hearing. To the extent there is a bright-line rule applicable to allegations of outside influence on the jury, the court held that it was not applicable to this case. Furthermore, the district court did not abuse its discretion in exercising its prerogative, within broadly defined parameters, to handle the allegation of outside influence in the least disruptive manner possible in this unusual case. Finally, the district court permissibly concluded that the evidence showed a sufficient likelihood of prejudice to shift the burden to the Government, and that the Government did not (and could not) show "no reasonable possibility that the jury's verdict was influenced by" the CSO's comments.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Longoria

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-20201
Opinion Date: May 5, 2020
Judge: Gregg Costa
Areas of Law: Criminal Law

The Fifth Circuit held that the base offense level of 20 was proper for defendant's felon-in-possession crime involving a semiautomatic firearm that is capable of accepting a large capacity magazine. In this case, defendant failed to show that the district court clearly erred in relying on the FBI's agent statement about what was found in the apartment. The court clarified any confusion and held that the 2013 amendment to the commentary on the acceptance-of-responsibility Guideline does not clearly overrule its caselaw allowing the government to withhold the third point for

acceptance of responsibility when it must litigate a suppression motion. The court held that Amendment 775 does not contain the unequivocal override needed to get past the court's precedent. Therefore, the court affirmed defendant's sentence.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. McNabb

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-50265
Opinion Date: May 1, 2020
Judge: Costa
Areas of Law: Criminal Law

The Fifth Circuit affirmed defendant's sentence imposed after he pleaded guilty to possessing a gun after having been convicted of a felony. The court held that defendant is not entitled to relief on his claim that the government breached the plea deal, and thus his appellate waiver remains enforceable. Accordingly, defendant's challenges to his sentence must be dismissed.

Read Opinion Are you a lawyer? **Annotate this case**.

Andrews v. Wayne County

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1992
Opinion Date: May 4, 2020
Judge: Suhrheinrich
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Canton Police received a 911 call from Andrews, who stated that his fiance, White, had physically attacked him. Officers arrested White. Andrews later took White's medications to the jail; a “KOP” policy allows inmates to keep certain drugs for self-administration. During an intake interview, White admitted to attempting to harm herself or commit suicide in the past but said she was not thinking of harming herself or having suicidal thoughts. An R.N. later evaluated White for nearly two hours, reported White’s chief complaints were “anxiety and depression,” and contacted a pharmacy to verify White’s prescriptions. The R.N. claims White did not exhibit any psychotic behavior,

suicidal ideation, or psychiatric distress but ordered further evaluation. The next day, White was found on the floor with vomit on her face. She stated repeatedly that she took too many pills. The next day, White died in the hospital. The cause of death was Verapamil toxicity. The Sixth Circuit affirmed the rejection of a suit under 42 U.S.C. 1983 on summary judgment. A pretrial detainee does not have an automatic right to a suicide screening. The court rejected an argument that the KOP Policy was deficient because it allows inmates in need of a psychological evaluation to participate before a psychiatrist's assessment of proper housing. The County had no history of suicides relative to the program, so any purported failure to train its employees in suicide risk assessment did not cause White's death.

Read Opinion Are you a lawyer? **Annotate this case**.

Hicks v. Scott

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-3410
Opinion Date: May 1, 2020
Judge: Gibbons
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Cincinnati officers Scott and Moore responded to a reported incident of menacing. Two people alleged that Quandavier had driven by their home that night and threatened to kill them and that Quandavier carried guns. Officer Loreaux identified a vehicle fitting the description. Officers Scott, Moore, Schneider, and Loreaux, standing where the vehicle was parked, heard a voice. Thinking that it was likely Quandavier, they knocked on the exterior door of the residence. It swung open. Three officers entered without a warrant or exigent circumstances. Loreaux remained outside. Neither Scott nor Moore recall announcing their presence or identifying themselves. Inside and upstairs, Scott knocked on a closed door. As it opened, Scott "saw the barrel of a rifle pointed at [her] face." Moore and Schneider also saw Quandavier "nonchalantly" panning the rifle from left to right. Moore reached for its barrel as Scott fired her weapon. Moore did not instruct Quandavier to drop his rifle nor did Scott issue any commands before firing. Quandavier collapsed. The officers immediately radioed for paramedics. Before the officers applied handcuffs or provided first aid, they heard another voice and conducted a sweep. Quandavier died at the scene

without receiving medical attention. In a suit under 42 U.S.C. 1983 for unlawful entry, excessive force, and deliberate indifference to a serious medical need, plus state claims, the district court granted the defendants summary judgment, citing qualified immunity. The Sixth Circuit reversed in part. The district court erred by granting qualified immunity to Scott, Moore, and Schneider on the unlawful entry claim. The court affirmed as to the excessive force, deliberate indifference, and state-law battery claims, and remanded for evaluation of municipal liability and wrongful death claims.

Read Opinion Are you a lawyer? **Annotate this case**.

Moody v. United States

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5015
Opinion Date: May 6, 2020
Judge: Thapar
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

At Moody's trial, the government produced a video of Moody cooking crack on his stove and waving a handgun while he mused about life in "the game" (drug trafficking). The court ruled that most of the video was admissible. Moody then tried to persuade the jury that the video was filmed more than five years before his indictment, putting it outside the statute of limitations. The jury convicted Moody. Due to prior felony drug convictions, Moody received enhanced, mandatory-minimum life sentences on several counts. He appealed on evidentiary grounds relating to the video. The Sixth Circuit affirmed. Later, Moody raised new claims on collateral review, 28 U.S.C. 2255. The district court found each claim meritless; most were also procedurally defaulted. The court authorized Moody to appeal. The Sixth Circuit dismissed the appeal, stating that none of the claims should have been certified. Reasonable jurists could not doubt that the district court properly denied relief on Moody's claims that he was deprived of his statute-of-limitations defense (violating due process); that the past convictions for his sentencing enhancements were not charged in the indictment or found by the jury; and that his previous lawyers failed to raise the first two claims sooner, violating his right to effective assistance of counsel.

United States v. Foreman

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1827
Opinion Date: May 7, 2020
Judge: Gibbons
Areas of Law: Criminal Law

In 2006, Foreman pled guilty to possession with intent to distribute 50 or more grams of cocaine base, possession with intent to distribute cocaine powder, and possession of a firearm during and in furtherance of a drug trafficking crime. Foreman admitted that he was responsible for approximately 135 grams of crack cocaine and 250 grams of cocaine powder. Foreman had a final Guidelines range of 322-387 months; he was sentenced to 240 months' imprisonment with respect to each drug conviction, to run concurrently, and 60 months' imprisonment for the firearms conviction, to run consecutively. When the First Step Act of 2018 made the Fair Sentencing Act retroactive, Foreman sought relief. The district court held that Foreman was not entitled to a plenary resentencing and declined to revisit his career offender status or hold an in-person hearing, then weighed the new statutory range applicable to Foreman's drug offenses, his recalculated Guidelines range, and the 18 U.S.C. 3553(a) factors, and reduced Foreman's total sentence to 172 months on each drug offense, to run concurrently, plus the mandatory consecutive 60 months on the firearms offense. The Sixth Circuit affirmed. Nothing in the First Step Act entitles a defendant to a plenary resentencing. First Step Act resentencings are not shielded from review for reasonableness; the district court thoroughly explained its rationale, carefully examining Foreman's circumstances, the amended penalty provisions, and the resulting changes to Foreman's Guidelines range.

United States v. Smith

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1724
Opinion Date: May 6, 2020

Judge: Bush
Areas of Law: Criminal Law

In 2006, Smith was convicted of conspiracy to distribute and to possess with intent to distribute 500 grams or more of powder or 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 500 grams or more of cocaine powder; and being a felon in possession of a firearm. The court imposed a mandatory minimum life sentence. The Fair Sentencing Act subsequently lowered the penalty for cocaine-base offenses, made retroactive through the First Step Act. Smith moved for relief and received a reduced sentence of 360 months, the bottom of the new Guideline range for the counts impacted by the Fair Sentencing Act, to run concurrent to his existing 360-month sentence for his powder cocaine count that was not affected by the Fair Sentencing Act. The Sixth Circuit affirmed, rejecting an argument that the court should have imposed a below-Guideline sentence for all counts. The First Step Act is a limited grant of authority to impose a reduced sentence for certain offenses and does not require a plenary resentencing proceeding. Even assuming the court's obligation to explain its reasons for imposing the modified sentence was akin to that which applies in initial sentencing, the court's use of a modified AO 247 form order to explain its decision was not procedurally unreasonable.

Kirkman v. Thompson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1904
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Following a 1992 fight that involved Johnson, Herron, and Walker, two shooters shot the three men. Johnson survived. In the hospital, Johnson described a shooter by the street name "Duke," where Duke lived, and Duke's car. Johnson identified Duke and his accomplice from a photo array. Police pulled over a vehicle matching Johnson's description and arrested

the driver, Kirkman, and the passenger, who matched the general description of the second shooter. Kirkman had a tattoo of Duke on his arm. Police took additional photos and presented a second photo array to Johnson, who identified them as the shooters. At trial, Johnson identified Kirkman and his passenger as the shooters. There was disputed testimony about the cause of the fight. Convicted of murder and aggravated battery with a firearm, Kirkman was sentenced to life in prison. Johnson had a change of heart and submitted an affidavit, identifying Ford and an unknown man as the shooters. At Kirkman's post-conviction hearing, Johnson testified that he and his family had been threatened. Other testimony was inconsistent with Johnson's. Illinois courts denied post-conviction relief, finding that Johnson's recantation lacked credibility. Johnson later pleaded guilty for perjury but failed to specify which statement was false. The Seventh Circuit affirmed the denial of federal habeas relief. Illinois courts found Johnson's recantation lacked credibility. An evidentiary hearing satisfied Kirkman's due process rights. The Illinois trial court's determination defeated Kirkman's innocence and perjured testimony claims.

Tuduj v. Newbold

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1699
Opinion Date: May 1, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Illinois prisoner Tuduj, having received extensive dental treatment, filed a "deliberate indifference" suit under 42 U.S.C. 1983 against his dentists and prison officials. The court recruited counsel to assist Tuduj in filing an amended complaint that complied with the Federal Rules of Civil Procedure. Counsel defended against two summary judgment motions, one arguing that Tuduj had not exhausted his administrative remedies and another on the merits While the motions were pending, Tuduj moved "for leave to represent himself," stating that he was "concerned that his counsel has filed a structurally, technically and legally insufficient response doomed to be denied." He asked to file his own brief, except "in the event this Honorable Court deems counsel's response … legally sufficient and Grants same[,]

Plaintiff would be open to continued effective representation." A magistrate denied Tuduj's motion, stating that Tuduj "varie[d] between saying he would like to" represent himself and "indicating that he is happy with counsel's representation as long as he prevails." The district judge granted the motions for summary judgment, citing professional judgment and finding "no competent evidence" of any policy that unlawfully influenced dental-treatment decisions. The Seventh Circuit rejected Tuduj's argument that the court wrongly denied his "unqualified" right to proceed pro se under 28 U.S.C. 1654, the due process clause, the equal protection clause, and the Seventh Amendment. The district court permissibly denied his equivocal request.

United States v. Gibson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1402
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Constitutional Law, Criminal Law

Officer Garrison encountered Gibson, a suspected drug trafficker, walking with a companion. Although initially a consensual encounter, Garrison questioned Gibson and his companion and briefly detained Gibson. After Gibson and his companion departed, Garrison spotted a methamphetamine pipe under his patrol vehicle. Local law enforcement conducted a traffic stop of Gibson's vehicle in the curtilage of his driveway. A drug detection dog signaled the presence of a controlled substance in the vehicle, though nothing was found. Earlier that day, Gibson's wife had met with DEA agents to tell them about methamphetamine inside the home. Police used information Mrs. Gibson had provided to obtain a search warrant. The search of the home uncovered drugs, drug paraphernalia, currency, and AK-47 rifles, which led to Gibson's arrest. Gibson moved to suppress all evidence seized during the search, alleging he was detained without reasonable suspicion, unlawfully frisked, arrested without probable cause, stopped without probable cause or reasonable suspicion, and the traffic stop exceeded a permissible scope. Upon learning of his wife's cooperation, Gibson also argued her statement was insufficiently attenuated to justify the

search warrant. The Seventh Circuit affirmed the denial of the motion. Mrs. Gibson's voluntary statement with DEA agents was independently sufficient to sustain findings of probable cause and sufficiently attenuated from subsequent events to preclude suppression.

United States v. Howell

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3157
Opinion Date: May 4, 2020
Judge: Scudder
Areas of Law: Constitutional Law, Criminal Law

In December 2012, Chicago Police officers responded to an anonymous call reporting a Hispanic man in a black sweater and black hat, carrying a bag, and climbing under a warehouse fence. They found someone who matched the description. After stopping and frisking him, they determined he was not engaged in any crime. Howell, walking toward the police, was white and wearing a black jacket and dark hat. When an officer approached to speak to him, Howell did not answer, looked panicked, and put his hands in his pockets. The officer patted Howell down and found a gun in his jacket. A federal gun charge followed. Howell unsuccessfully moved to suppress the gun. The Seventh Circuit reversed the denial of his suppression motion and vacated his conviction for possessing that gun. The court noted that the facts in the pretrial record differed significantly from those presented at trial, where the arresting officer testified that he decided to proceed with the pat-down only after Howell ignored a directive to remove his hands from his pockets. Viewing the pretrial record as a whole, the police lacked reasonable suspicion to frisk Howell. The court did not reverse Howell's conviction on a second gun charge that resulted from the execution of a warrant to search Howell's apartment three months after the initial stop and the ensuing discovery of more guns and ammunition.

United States v. Lewis

Court: US Court of Appeals for the Seventh Circuit
Dockets: 19-1911, 19-1262
Opinion Date: May 7, 2020
Judge: Joel Martin Flaum
Areas of Law: Criminal Law

In 2016-2018, Draheim managed a conspiracy, responsible for at least 38 packages of methamphetamine sent from California to La Crosse, Wisconsin. Draheim supervised at least 11 associates who accepted shipments on her behalf, sent money transfers to California, distributed the meth, rented storage lockers, and collected money owed to her. Draheim provided vehicles. After agents placed a wiretap on her phone and seized several packages of meth en route to Draheim, her California supplier forced Draheim to find a new source. Draheim contacted Lewis, recently out of jail but still involved in the "meth scene." Lewis agreed to purchase meth from a new supplier. During the planned transaction, agents seized the package, which contained 28.6 grams of nearly pure meth. Police subsequently arrested Draheim after they found her daughter dead at home from an overdose; they took Lewis into custody for violating the terms of his state supervision. Both pleaded guilty to meth distribution offenses, 21 U.S.C. 841, 846. Draheim, facing a mandatory-minimum 10-year sentence, unsuccessfully argued that she qualified for "safety-valve relief." The court reasoned that she was the leader of her enterprise. Lewis unsuccessfully contended that he should be sentenced based only on his conviction, not other "relevant conduct." The Seventh Circuit affirmed Draheim's sentence but vacated as to Lewis. The fact that the defendant has engaged in other drug transactions is not, alone, sufficient to justify treating those transactions as relevant conduct for sentencing purposes.

Bakor v. Barr

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3011
Opinion Date: May 7, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit denied a petition for review of the BIA's determination

that defendant committed two crimes involving moral turpitude. The court held that the BIA did not err in determining that petitioner's conviction for the Minnesota crimes of Criminal Sexual Conduct in the Fifth Degree and knowing failure to comply with Minnesota's sex offender registration statute were crimes involving moral turpitude. The court also held that petitioner failed to exhaust his remaining arguments and therefore declined to consider them.

Smith v. Titus

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2915
Opinion Date: May 5, 2020
Judge: Steven M. Colloton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eighth Circuit affirmed the district court's denial of habeas relief to petitioner based on his claim that the trial court violated his Sixth Amendment right to a public trial when it briefly closed the courtroom to spectators. The district court denied relief based on the ground that the Minnesota Supreme Court’s decision was neither contrary to, nor an unreasonable application of, clearly established federal law. The court agreed and held that it was not objectively unreasonable for the Minnesota Supreme Court to deem it constitutional under the Sixth Amendment for the trial court to explain the parameters of an earlier public order on evidentiary issues in a brief nonpublic proceeding before the jury was sworn.

United States v. Becerra

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2777
Opinion Date: May 7, 2020
Judge: Stras
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for two counts of being a

felon in possession of a firearm and ammunition. The court held that there was more than enough evidence for defendant's probation officer and other officers to believe defendant had a firearm on him. Therefore, the officers had probable cause to arrest him without a warrant. The court also held that defendant was in custody when he made both statements at issue. In this case, the "request for clarification" of defendant's statement that he had "something" in his car did not require Miranda warnings. Furthermore, because the bulge in defendant's pocket could have been a gun or other weapon that would have posed a danger to the officers and others, they could ask about it without the formality of Miranda warnings. The court joined its sister circuits in declining to recognize the innocent-possessor defense. The court held that the district court did not err in excluding defendant's proposed testimony that he had found the handgun in his car earlier in the day and was about to hand it over to his probation officer. The court reasoned that, even if defendant intended to turn over the gun (or the ammunition) to his probation officer, it is still a crime to knowingly possess it in the first place. Finally, the court held that the district court did not err in denying defendant a sentencing reduction for acceptance of responsibility; the district court considered defendant's mitigation arguments at sentencing; and the district court did not abuse its discretion by imposing a within-Guidelines sentence.

United States v. Haynes

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1607
Opinion Date: May 5, 2020
Judge: Raymond W. Gruender
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that the government did not violate the Speedy Trial Act, and defendant failed to offer any evidence showing that Iowa and federal prosecutors colluded. Furthermore, the district court did not abuse its discretion by failing to hold an evidentiary hearing regarding the existence of collusion. The court also held that the district court did not err in denying the motion to suppress where defendant

was not unlawfully seized. In this case, prior to producing the marijuana cigarette, the officer did not ask defendant any questions but merely ordered him off the bus, particularly as the smell of marijuana alerted the officer that evidence of a more serious crime than failure to use a turn signal might be uncovered during the stop. Finally, the court held that defendant was not unlawfully searched when the officer conducted a pat-down search incident to arrest; the evidence was sufficient to support defendant's conviction; defendant's Rehaif claim failed because there was sufficient evidence that he knew of his prohibited status; and defendant's sentence was not substantively unreasonable nor an abuse of the district court's discretion.

United States v. Roberts

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1176
Opinion Date: May 1, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law

The Eighth Circuit vacated defendant's sentence imposed after he pleaded guilty to unlawful possession of a firearm as a previously convicted felon. The court held that, although the district court properly applied a four-level increase for possession of a firearm "in connection with another felony offense" under USSG 2K2.1(b)(6)(B), but that a two-level increase for "using a minor to commit a crime" under USSG 3B1.4 should not have applied. In this case, the evidence showed only that defendant engaged in an arm's-length transaction with a minor. The court held that this mere joint participation in an offense as a partner, does not amount to "use" of a minor "to commit the offense" of unlawful possession of a firearm by a felon. Accordingly, the court remanded for resentencing.

United States v. Wright

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1081

Opinion Date: May 5, 2020
Judge: Erickson
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's restitution order and certain special conditions of defendant's supervised release imposed after he pleaded guilty to sex trafficking of a child. The court found no error in the district court's restitution amount of $20,000, holding that the evidence supported the amount in light of the aggregate harm to the victim. The court also held that the special conditions -- including a requirement that defendant participate in sex offender treatment including psychological testing and polygraph examinations, a prohibition against contact with any minors without pre-approval, and a requirement that defendant seek prior approval before using temporary commercial lodging, such as a hotel or motel -- where reasonably related to both the offense of conviction and to defendant's history of sexual contact with minor females.

Benson v. Chappell

Court: US Court of Appeals for the Ninth Circuit
Docket: 13-99004
Opinion Date: May 1, 2020
Judge: Consuelo Maria Callahan
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's denial of petitioner's habeas corpus petition challenging his California conviction and death sentence for murder and other crimes. Petitioner raised two certified claims and two uncertified claims. The panel held that petitioner failed to show that the California Supreme Court's denials of his claims were unreasonable determinations of the facts or contrary to clearly established federal law. In this case, the California Supreme Court reasonably determined that an officer's misstatement during petitioner's interrogation that there was no death penalty in California did not prompt petitioner's confessions. Furthermore, petitioner failed to show that his statements were not knowing, voluntary, and intelligent. Even if petitioner were able to show that trial counsel was ineffective in not fully investigating his abuse as a child or his alleged organic brain injury, the panel held that the state court could

reasonably have determined that any shortcoming in trial counsel's investigation was not prejudicial. Finally, the panel granted a certificate of appealability on petitioner's two uncertified claims and held that the state court reasonably rejected the claims that his trial counsel should have impeached the government's case and the prosecutor withheld material, exculpatory evidence.

Mero v. Barr

Court: US Court of Appeals for the Ninth Circuit
Docket: 17-70929
Opinion Date: May 1, 2020
Judge: Paul Jeffrey Watford
Areas of Law: Criminal Law, Immigration Law

The Ninth Circuit granted in part a petition for review of the BIA's finding that petitioner was removable based on his conviction for possession of visual presentation depicting sexual conduct of a person under 16 years of age, in violation of Nevada Revised Statutes (N.R.S.) 200.730. Applying the categorical approach, the panel compared the elements of N.R.S. 200.730 with the applicable definition of "sexual abuse of a minor," which requires proof of three elements. The panel held that N.R.S. 200.730 punishes a broader range of conduct because the Nevada statute does not require proof that the offender participated in sexual conduct with a minor. Therefore, petitioner's conviction did not qualify as sexual abuse of a minor. The panel explained that, with a possession-only offense such as N.R.S. 200.730, the minor depicted in the image is not the direct object of the offender's conduct, which is a necessary predicate for the offense to qualify as sexual abuse of a minor.

United States v. Yang

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10341
Opinion Date: May 4, 2020
Judge: Piersol
Areas of Law: Criminal Law

The Ninth Circuit affirmed the district court's denial of defendant's motion to suppress after he pleaded guilty to receipt of stolen mail and being a prohibited person in possession of a firearm. Defendant moved to suppress the evidence seized from his residence and the statements he made to law enforcement on the basis that the search warrant obtained by the Postal Inspection Service relied on evidence that was obtained illegally. The panel declined to address the potential Fourth Amendment privacy interests that may be implicated by the warrantless use of this Automatic License Plate Recognition (ALPR) technology, and held that defendant does not have a reasonable expectation of privacy in the historical location data of the Yukon under the facts of this case. The panel found no evidence in the record that Prestige Motors had a policy or practice of allowing lessees to keep cars beyond the rental period and Prestige had made affirmative attempts to repossess the vehicle by activating the GPS unit to locate and disable the vehicle. Therefore, defendant lacked standing to challenge the warrantless search of the database.

United States v. Neugin

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-7043
Opinion Date: May 1, 2020
Judge: Scott Milne Matheson, Jr.
Areas of Law: Constitutional Law, Criminal Law

Jack Neugin pled guilty to being a felon in possession of a firearm and ammunition on the condition that he could appeal the district court's denial of his motion to suppress evidence of the ammunition and firearm police found in the bed of his pickup truck. Officers responded to a reported verbal altercation between Neugin and his girlfriend. One of the officers saw ammunition in the back of the truck after he lifted the truck's camper lit do allow the girlfriend to retrieve her belongings. Neugin argued the officers discovered the evidence during an unconstitutional search; the district court concluded the officer was acting "in a lawful position" as "community caretaker," and found no Fourth Amendment violation. The Tenth Circuit reversed, finding that : (1) the officer conducted the without a warrant or probable cause, (2) the community caretaking exception to the warrant requirement does not apply, and (3) the inevitable discovery exception to the exclusionary rule does not apply. The evidence seized should have been suppressed.

United States v. Ramon

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-1221
Opinion Date: May 1, 2020
Judge: Gregory Alan Phillips
Areas of Law: Constitutional Law, Criminal Law

In 2016, after serving a federal prison sentence for having possessed a firearm after a felony conviction, Charles Ramon III began serving a mandatory term of supervised release. Before Ramon completed the term, his probation officer filed a petition, soon followed by two superseding petitions, to revoke Ramon’s supervised release. At the revocation hearing, the district court found three violations—two for possessing a controlled

substance and one for again illegally possessing a firearm. Of these, the most serious was Ramon's illegal possession of a firearm—a Grade B violation. For this, the court imposed the statutory maximum sentence of twenty-four months in prison. During the revocation hearing, the government mentioned that it might seek to indict Ramon for illegally possessing a firearm (the conduct in part underlying the revocation). Mindful of this, the district court ordered that Ramon's twenty-four-month sentence run "consecutively to any sentences imposed previously or prospectively in federal or state court." At the hearing, Ramon did not object to the district court's running his sentence consecutively to future federal sentences. On appeal, Ramon argued that the district court exceeded its sentencing authority under 18 U.S.C. 3584(a) by ordering that Ramon's sentence run consecutively to future federal sentences. By the terms of 18 U.S.C. 3584(a), the Tenth Circuit determined the district court did err. But Ramon failed to object to this at trial, and on appeal, failed to show that the error was plain, thus, judgment was affirmed.

United States v. Richards

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-8044
Opinion Date: May 6, 2020
Judge: Baldock
Areas of Law: Constitutional Law, Criminal Law

In 2018, the Wyoming Division of Criminal Investigation (DCI) obtained a search warrant to review the contents of Defendant–Appellant Joshua Richards' Tumblr account. During the search and subsequent investigation, DCI agents discovered Defendant had re-blogged videos and images of child pornography to his private Tumblr so he could later access and view the materials. Defendant ultimately pleaded guilty to one count of accessing with intent to view child pornography. He was sentenced to twenty-four months' imprisonment followed by five years of supervised release. The district court imposed several special conditions of supervised release, which, as relevant here, related to drugs and alcohol and required Defendant to submit to polygraph testing. On appeal, Defendant argued the district court erred in imposing these special conditions. He also challenged

the length of his prison sentence as substantively unreasonable. The Tenth Circuit determined the alcohol and drug conditions did not directly conflict with the relevant policy statement in the sentencing guidelines, so the district court's decision to impose the conditions was not manifestly unreasonable. And given the circumstances of the case, the Court determined the trial court did not abuse its discretion in imposing Defendant's twenty-four month sentence.

Knight v. Florida Department of Corrections

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-12488
Opinion Date: May 1, 2020
Judge: Newsom
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eleventh Circuit affirmed the district court's denial of a 28 U.S.C. 2254 petition for habeas relief. Petitioner alleged that his counsel rendered ineffective assistance under Strickland v. Washington, 466 U.S. 668 (1984), by failing to adequately investigate and present mitigating evidence during the sentencing phase of his capital-murder trial. The court held that, even assuming that counsel performed deficiently in failing to investigate and present the mitigation evidence that petitioner now raises—thus satisfying the first prong of the two-part Strickland standard that governs ineffective-assistance claims—petitioner failed to carry his burden of demonstrating resulting prejudice.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Evans

Court: US Court of Appeals for the Eleventh Circuit
Docket: 17-15323
Opinion Date: May 6, 2020
Judge: Grant
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that, given the totality of the circumstances, it was reasonable for officers, mistaking a dog's whimper for a person in distress, to enter defendant's home without a warrant.

Therefore, defendant's challenge to the district court's denial of his motion to suppress evidence failed. The court upheld the district court's imposition of a 22 offense level finding because defendant possessed a semiautomatic firearm capable of accepting a large capacity magazine under USSG 2K2.1(a)(3)(A)(i) (2016). The court also upheld defendant's sentencing enhancement under USSG 2K2.1(b)(4)(B) for possessing a rifle that had an obliterated serial number.

United States v. McLellan

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-13289
Opinion Date: May 6, 2020
Judge: Boggs
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm. The court held that the district court did not abuse its discretion in permitting one of his arresting officers to offer testimony at trial on the correlation between guns and drug activity and to suggest that defendant was selling drugs; the court declined to evaluate the applicability of the Armed Career Criminal Act (ACCA), because the district court would have imposed the same sentence regardless of whether the mandatory minimum applied; and the court rejected defendant's claim under Rehaif v. United States, 139 S. Ct. 2191 (2019), and held that there was no plain error in the district court's failure to instruct the jury of the knowledge-of-status element and any error from the lack of a knowledge-of-status element in defendant's plea colloquy did not affect his substantial rights. Finally, the court remanded for clarification of the judgment to reflect the sentence the district court said it would have imposed if the Armed Career Criminal Act did not apply.

Docket: 18-11202
Opinion Date: May 4, 2020
Judge: Charles R. Wilson
Areas of Law: Criminal Law

Defendant was convicted of possessing a firearm and ammunition as an immigrant illegally or unlawfully in the United States. After defendant appealed his conviction and sentence, the Supreme Court issued its decision in Rehaif v. United States, 588 U.S. ___, 139 S. Ct. 2191 (2019), which reversed a decision from this court and held that under 18 U.S.C. 922(g), the government must prove that a defendant knew "his status as a person barred from possessing a firearm" when he knowingly possessed a firearm. The Eleventh Circuit held that defendant established the necessary prejudice under plain error review and vacated defendant's section 922(g) conviction, remanding for further proceedings. In this case, the district court committed an error that was made plain by the Supreme Court in Rehaif. Furthermore, defendant has sufficiently shown a reasonable probability that but for the error, the outcome of his trial would have been different.

Welch v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 14-15733
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's 28 U.S.C. 2255 motion to vacate his sentence. The court held that defendant's prior 1996 Florida convictions for robbery qualified as violent felonies under the Armed Career Criminal Act's (ACCA) elements clause, and rejected his contention that the court's decision in his direct appeal carved out a narrow exception to pre-1997 Florida robbery convictions obtained in Florida's Fourth District Court of Appeal. The court also held that petitioner's prior Florida felony battery conviction was a violent felony under the ACCA in light of the court's holding in United States v. Vail-Bailon, 868 F.3d 1293 (11th Cir. 2017) (en banc), cert. denied, 138 S. Ct. 2620 (2018).

State v. Trujillo

Court: Arizona Supreme Court
Docket: CR-18-0531-PR
Opinion Date: May 4, 2020
Judge: Gould
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court held that, for purposes of imposing mandatory sex offender registration under Ariz. Rev. Stat. 13-3821(A)(3), a judge has the authority to make the necessary factual finding that the victim is under the age of eighteen and that Arizona's sex offender registration statutes are civil regulatory statutes, not criminal penalties. Defendant was convicted by a jury of one count of sexual abuse. In reaching its verdict the jury determined that the victim was "fifteen or more years of age." At sentencing, the trial court ordered Defendant to register as a sex offender. Defendant objected, arguing that, pursuant to Apprendi v. New Jersey, 530 U.S. 466 (2000), a jury was required to find whether Defendant was under eighteen pursuant to section 13-3821(A)(3). The trial court denied the objection. The court of appeals affirmed. The Supreme Court affirmed, holding (1) Apprendi does not apply to factual findings that are necessary to impose registration because sex offender registration is a civil regulatory requirement, not a criminal penalty; and (2) the trial judge did not violate Apprendi by determining that the victim was under eighteen.

Barnett v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 181
Opinion Date: May 7, 2020
Judge: Hudson
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's "motion for credit for time spent in custody," holding that the

circuit court's findings were not clearly erroneous. In his motion, Appellant alleged that he was entitled to 312 days of jail-time credit and that the circuit court should enter a new sentencing order nunc pro tunc that reflected the correct amount of jail-time credit. The circuit court denied the motion. The Supreme Court affirmed, holding that the circuit court's denial of Appellant's motion was not clearly erroneous because Appellant failed to demonstrate a clerical error subject to correction.

Mason v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 182
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court dismissing Appellant's pro se petition for writ of habeas corpus, holding that Appellant stated no ground on which the writ could issue. Appellant was convicted of aggravated robbery, theft of property, and second-degree battery and sentenced as a habitual offender to an aggregate term of 660 months' imprisonment. The court of appeals affirmed. Appellant later petitioned for writ of habeas corpus, asserting that the trial court misapplied Arkansas's habitual-offender statutes. The circuit court dismissed the petition. The Supreme Court affirmed, holding that the issues Appellant raised in his petition for the writ should have been raised at trial, on direct appeal, or in a petition for postconviction relief.

Ray v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 184
Opinion Date: May 7, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from an order denying his pro se petition for permission to reinvest jurisdiction in the trial court to consider a petition for writ of error coram nobis, holding that the circuit court had no jurisdiction to consider the petition. Appellant entered negotiated guilty pleas to rape and other offenses. Appellant later filed a petition for writ of error coram nobis in the Chicot County Circuit Court, the court where he was incarcerated, setting out two grounds for coram nobis relief. The circuit court denied the petition. The Supreme Court dismissed Appellant's appeal, holding that jurisdiction lay in the trial court where Appellant was convicted, which in this case was the Ashley County Circuit Court. Therefore, the Chicot County Circuit Court was without jurisdiction to address Appellant's coram nobis petition.

Walker v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 183
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for declaratory judgment, holding that Appellant could not use a declaratory-judgment action to collaterally attack his criminal conviction. Appellant was convicted of first-degree murder and second-degree unlawful discharge of a firearm from a vehicle. The court of appeals affirmed. Years later, Appellant filed a petition for declaratory judgment alleging that he was denied due process in his criminal trial when the court admitted the prior testimony of an unavailable witness and that this admission violated the Confrontation Clause. The circuit court denied the petition. The Supreme Court affirmed, holding that a declaratory judgment action provided no relief on these grounds.

People v. Flores

Court: Supreme Court of California
Docket: S116307
Opinion Date: May 4, 2020
Judge: Kruger
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of three counts of first degree murder and his sentence of death, holding that the three or four minor errors at Defendant's trial were harmless and did not interfere with his due process right to a fair trial. Specifically, the Supreme Court held (1) no error occurred during jury selection; (2) Defendant was not prejudiced by any misstatements by the prosecutor; (3) assuming certain evidence was inadmissible, the court's admonition to the jury and the court's instruction cured the resultant harm; (4) the trial court erred in admitting testimony that the victim was afraid of Defendant, but the error was harmless; and (5) Defendant's remaining allegations of error were without merit.

California v. Law

Court: California Courts of Appeal
Docket: E072845(Fourth Appellate District)
Opinion Date: May 5, 2020
Judge: Slough
Areas of Law: Constitutional Law, Criminal Law

In 2001, appellant Terrell Law and his codefendant Brett May committed a home invasion robbery, during which one of them shot and killed one of the residents. They were tried jointly in 2006 before two separately empaneled juries who found them both guilty of first degree felony murder with the special circumstance described in Penal Code section 190.2(a)(17(A) and (d). Though Law's jury found he was not the shooter, they nonetheless concluded he was a "major participant" in the underlying robbery and acted "with reckless indifference to human life." In 2018, the Legislature enacted Senate Bill No. 1437 (2017-2018 Reg. Sess.) which, among other things, amended the definition of felony murder in Penal Code section 189. The legislation also added Penal Code section 1170.95, which established a procedure for vacating murder convictions predating the amendment that could not be sustained under the new definition of felony murder. Law

challenged the trial court's summary denial of his section 1170.95 petition to vacate his murder conviction, arguing the trial court erred by reviewing his record of conviction and determining the jury's true finding on the special circumstance rendered him ineligible for relief. The Court of Appeal concluded it was proper for a trial court to review the record of conviction when determining whether a section 1170.95 petitioner had stated a prima facie claim for relief. Additionally, the Court concluded Law "undoubtedly qualifies" as a major participant who acted with reckless indifference to human life, a conclusion that rendered him ineligible for relief under section 1170.95. The Court therefore affirmed the order denying his petition.

California v. Sanchez

Court: California Courts of Appeal
Docket: E072647(Fourth Appellate District)
Opinion Date: May 7, 2020
Judge: Menetrez
Areas of Law: Constitutional Law, Criminal Law

Victor Sanchez was charged with first degree murder, but pled guilty to voluntary manslaughter. He filed a petition under Penal Code section 1170.95 to vacate that conviction. The trial court denied the petition, concluding that Sanchez was ineligible for relief because he was not convicted of murder. After review, the Court of Appeal joined other courts that held section 1170.95 did not apply to defendants convicted of voluntary manslaughter. The Court also rejected Sanchez's argument that section 1170.95 violated equal protection.

Galeotti v. International Union of Operating Engineers

Court: California Courts of Appeal
Docket: A157785(First Appellate District)
Opinion Date: May 6, 2020
Judge: Henry E. Needham, Jr.
Areas of Law: Criminal Law, Labor & Employment Law, White Collar Crime

Galeotti, a former Union Local 3 employee, filed a complaint against Local 3 and three of individual union leaders, alleging that the individual defendants required union employees to pay them money to keep their jobs, lied about the reason for collecting the money, and caused Local 3 to terminate Galeotti's employment when he failed to pay the full amount demanded. The trial court dismissed his second amended complaint without leave to amend. The court of appeal reversed in part, reasoning that a threat to terminate employment can provide a basis for an extortion claim and that the allegations of the second amended complaint stated a cause of action for wrongful termination in violation of the public policy underlying the extortion statutes. The complaint stated a cause of action for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO; 18 U.S.C. 1961), based on the predicate acts of extortion, but did not state a cause of action for interference with prospective economic advantage.

In re I.A.

Court: California Courts of Appeal
Docket: B296549(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Tangeman
Areas of Law: Criminal Law, Juvenile Law

Where a juvenile court vacates its true finding on a generic murder allegation and redesignates it as a finding on an uncharged target offense, and does so before a minor has had the opportunity to contest the court's findings or orders, the minor may challenge the sufficiency of the evidence of the redesignated offense on appeal. The Court of Appeal held that there was insufficient evidence to support the juvenile court's decision sustaining the allegations that I.A. possessed a concealable firearm and committed vandalism. Therefore, the court reversed the juvenile court's findings, vacating the jurisdiction and disposition order and dismissing the Welfare and Institutions Code section 602 petition.

People v. Edwards

Court: California Courts of Appeal
Docket: A158055(First Appellate District)
Opinion Date: May 1, 2020
Judge: Petrou
Areas of Law: Criminal Law

In 2006, Edwards fired an assault weapon into an apartment, killing the victim. Edwards pled guilty to possession of a firearm as a felon and was convicted of second-degree murder and shooting into an inhabited dwelling. Following the enactment of Senate Bill 1437, Edwards filed a Penal Code 1170.95 resentencing petition, checking form boxes indicating that he was convicted under a theory of felony murder or murder under the natural and probable consequences doctrine and that he could not now be convicted of 1st or 2nd-degree murder because of changes to Penal Code 188 and 189. Edwards submitted the jury instructions and the transcript of the prosecutor's closing remarks that Edwards acted with "both express malice, specific intent to kill, as well as implied malice," described as "an intentional act, the natural consequences of which are dangerous to human life, and at the time that the individual acted, they knew of the danger, and they deliberately acted with conscious disregard." The court denied the petition, finding that Edwards was convicted on a valid theory of murder that survived the statutory changes. The court of appeal affirmed. The superior court did not err in considering the record of conviction. Edwards could not meet the statutory prerequisites for even filing a section 1170.95 petition because he was not charged or convicted of second-degree felony murder or murder under the natural or probable consequences doctrine directed at accomplice liability.

People v. Thomkins

Court: California Courts of Appeal
Docket: A141375(First Appellate District)
Opinion Date: May 1, 2020
Judge: Streeter
Areas of Law: Criminal Law

On Easter night in 2011, gunfire erupted at an Oakland bar-restaurant, leaving two people dead and five wounded. Thompkins and Fox were convicted of two counts of first-degree murder for the benefit of a criminal street gang, with firearm discharge enhancements, a multiple-murder special circumstance, and five counts of attempted murder with great bodily injury findings, gang enhancements, and firearm discharge enhancements. Thompkins was convicted as the shooter and Fox as an accomplice. Both were sentenced to life in prison without possibility of parole, plus 224 years to life. After Thompkins was sentenced, Fox stated under oath he was the actual shooter and Thompkins knew nothing about Fox's intentions. Thompkins claimed this new testimony, and his attorney's incompetent reaction entitled him to a new trial and submitted a declaration by another gang member who was present that night. The court of appeal concluded that Thompkins's attorney was not ineffective for failing to bring a motion to recall the sentence followed by a new trial motion because Thompkins failed to show prejudice. The attempted murder convictions and related enhancements must be reversed for both defendants based on the flawed kill zone instruction. Introducing evidence that defendants admitted their gang affiliation at jail intake violated the defendants' privilege against self-incrimination but was harmless. There was some evidentiary error that was harmless due to the wealth of admissible evidence establishing the gang enhancements. Arguments based on the statutory amendments to Penal Code 188 and 189 must be raised in the trial court (section 1170.95). The case must be remanded so the judge may exercise his discretion whether to impose or strike the firearm enhancements on under Penal Code 12022.53.

People v. Torres

Court: California Courts of Appeal
Docket: B295043(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Wiley
Areas of Law: Criminal Law

After the trial court admitted a witness's former testimony, the Court of Appeal applied People v. Roldan (2012) 205 Cal.App.4th 969, 975–985, and reversed. Roldan held that, before invoking the former testimony exception,

prosecutors should react appropriately to the impending deportation risk by following four steps: alert the defense to the risk; videotape the preliminary hearing testimony; use judicial measures to try to delay deportation; and consider an array of other specific measures. In this case, the prosecution conceded that prosecutors were simply unaware of Roldan and did not comply with it. The court held that Roldan controls the court's analysis because the facts about prosecutorial diligence are weaker here than they were in Roldan, where the appellate court held for the defense. In this case, the record before deportation is of prosecutorial inaction where the prosecution's brief in this court admits the investigating officer did not do anything to ensure that the witness would not be deported, nor is there other evidence of prosecutorial efforts to delay the witness's departure or to videotape his testimony at the preliminary hearing.

Colorado In Interest of G.S.S.

Court: Colorado Supreme Court
Citation: 2020 CO 32
Opinion Date: May 4, 2020
Judge: Brian D. Boatright

Areas of Law: Constitutional Law, Criminal Law, Juvenile Law

After being charged, fourteen-year-old G.S.S. was detained for more than three months without bail, even though he had not entered a plea and had not been tried on the charges against him. At that point, G.S.S.'s counsel filed a motion to dismiss, arguing that G.S.S.'s "right to a speedy trial" had been violated under section 19-2-509(4)(b), C.R.S. (2019). The trial court agreed and dismissed the case against G.S.S. with prejudice, and the court of appeals affirmed in Colorado in Interest of G.S.S., 2019 COA 4M, __ P.3d __. The Colorado Supreme Court then granted certiorari to determine the proper remedy for a violation of the sixty-day limit in section 19-2-509(4)(b). The Supreme Court determined the remedy for a section 19-2-509(4)(b) violation was for the trial court to immediately hold a bail hearing and order the juvenile's release. Accordingly, the judgment of the court of appeals was reversed.

Barringer v. Halkitis

Court: Florida Supreme Court
Docket: SC19-1071
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court held that Jay Barringer's quo warranto petition filed in this case was a frivolous proceeding brought before the Supreme Court by a state prisoner and sanctioned Barringer by barring him from filing any further pro se requests for relief related to his criminal case. Barringer was convicted of one count of attempted sexual battery of a victim less than twelve years old and sentenced to twenty-five-years' imprisonment. In 2011, Barringer began filing petitions in the Supreme Court. The Court did not grant the relief sought in any of Barringer's filings. In the instant quo warranto petition Barringer challenged his conviction on the ground that the information was defective, a claim Barringer previously raised by way of a habeas petition. The Supreme Court denied the petition and found that Barringer abused the Court's limited judicial resources. The Court sanctioned Barringer by directing the Clerk of Court to reject any future

pleadings or other requests for relief submitted by Barringer that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Franqui v. State

Court: Florida Supreme Court
Docket: SC19-203
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's claim of intellectual disability, raised in successive motions for postconviction relief under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying relief. Appellant was convicted of first-degree murder and sentenced to death in two separate cases. After the United States Supreme Court decided Hall v. Florida, 572 U.S. 701 (2014), Appellant filed successive motions for postconviction relief in both of his capital cases, asserting that the circuit court's denials of his previous claims of intellectual disability were based on the court's improper interpretation of Florida's intellectual disability statute. The circuit court summarily denied the motions. The Supreme Court reversed and remanded for an evidentiary hearing on the issue of intellectual disability. After a hearing, the circuit court denied the claim. The Supreme Court affirmed, holding (1) the circuit court did not err in denying Appellant's intellectual disability claim; and (2) Appellant was not entitled to relief under Hurst v. Florida, 136 S. Ct. 616 (2016), or Hurst v. State, 202 So. 3d 40 (Fla. 2016).

Hicks v. State

Court: Florida Supreme Court
Docket: SC19-1978
Opinion Date: May 7, 2020
Judge: Per Curiam

Areas of Law: Criminal Law

The Supreme Court denied the instant mandamus petition filed by Hicks and sanctioned Hicks by barring him from filing any further pro se requests for relief related to his criminal case. Hicks was convicted of one count of lewd and lascivious conduct by a person over eighteen years of age on a victim under sixteen years of age. Since 2016, Hicks filed thirteen pro se requests for relief in the Supreme Court related to his criminal case. The Court did not grant the relief sought in any of Hicks' filings. In the instant petition, Hicks sought a writ of mandamus compelling the circuit court to comply with the requirements of Fla. R. Crim. P. 3.850 by filing a copy of an order denying his second postconviction motion with the clerk of court. The Supreme Court dismissed the petition and found that Hicks abused this Court's limited judicial resources. The Court directed the Clerk of Court to reject any future pleadings or other requests for relief submitted by Hicks that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Whitehead v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0171
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Javis Whitehead was convicted by jury of murder and other crimes in connection with the shooting death of Dominique Larry. On appeal, Whitehead challenged the sufficiency of the evidence presented to rebut his

claim of self-defense and to convict him for murder beyond a reasonable doubt. He also argued the trial court erred in denying his motion to suppress his custodial statement, and in refusing to excuse for cause the District Attorney from the panel of prospective jurors prior to the conclusion of voir dire. Finding no merit to these contentions, the Georgia Supreme Court affirmed conviction.

Read Opinion Are you a lawyer? **Annotate this case**.

Idaho v. Blythe

Court: Idaho Supreme Court - Criminal
Docket: 46992
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Nicholas Blythe appealed after he was convicted of possessing a controlled substance. He conditionally pled guilty, reserving the right to challenge his sentence. On appeal, he argued the district court erred in denying his motion to suppress certain evidence found because the evidence presented at trial was found in violation of Blythe's Fourth Amendment rights. After review, the Idaho Supreme Court determined the search at issue took place before an arrest occurred, and because no rationale justifying a search incident to arrest was sufficiently present here, the search of Blythe's shoes was not a valid search incident to arrest. Therefore, the district court erred in holding that the search was reasonable under the Fourth Amendment. Blythe's conviction was vacated, the district court order denying Blythe's motion to suppress was reversed, and the matter remanded for further proceedings.

Idaho v. Glodowski

Court: Idaho Supreme Court - Criminal
Docket: 47131
Opinion Date: May 6, 2020
Judge: Roger S. Burdick

Areas of Law: Constitutional Law, Criminal Law

David Glodowski appealed after he was convicted for failing to update his sex-offender registration in violation of Idaho Code section 18-8309. He argued the district court erred by ruling that his prior conviction under a Wisconsin statute was "substantially equivalent" to Idaho statutes that required sex-offender registration in Idaho. After review, the Idaho Supreme Court determined the district court improperly allowed the State to seek a redetermination of the "substantially equivalent" element given that the Idaho Bureau of Criminal Identification made a final determination on that element. However, because the State put forth sufficient evidence to prove that element, and the district court's jury instruction accomplished the same purpose, the Supreme Court concluded the error was harmless. Accordingly, the Court found no reversible error in the district court's decision to grant the State's motion and provide the jury instruction. Therefore, judgment of conviction was affirmed.

Idaho v. Jones

Court: Idaho Supreme Court - Criminal
Docket: 45905
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Timothy Jones was convicted by jury of trafficking heroin and possession of drug paraphernalia. On appeal, he argued the trial court erred in admitting certain evidence regarding his probation status, a knife found in the initial police search of his person, and that the trial court abused its discretion in arriving at his sentence. Finding no reversible error, the Idaho Supreme Court affirmed Jones' conviction and sentence.

State v. Gordon

Court: Iowa Supreme Court

Docket: 18-1099
Opinion Date: May 1, 2020
Judge: Brent R. Appel
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for assault on a peace officer with a dangerous weapon, a felony, and several misdemeanors, holding that Defendant did not receive ineffective assistance of counsel. After Defendant pleaded guilty, he absconded. He was later returned to custody. On appeal, Defendant argued that he received ineffective assistance of counsel because the plea bargain contained an unlawful term. Specifically, Defendant argued that the plea bargain's provision that he would be released from jail for a forty-eight-hour furlough after pleading guilty was illegal and that his trial counsel committed ineffective assistance in obtaining the illegal benefit for him. The Supreme Court affirmed, holding that where Defendant entered into the plea agreement with the illegally lenient sentence, he could not benefit from that sentence and then attack the plea bargain.

State v. Craig

Court: Kansas Supreme Court
Docket: 119660
Opinion Date: May 1, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction and sentence for first-degree felony murder, holding that there was no error in the proceedings below. A jury found Defendant guilty of both first-degree felony murder and second-degree intentional murder. At sentencing, Defendant moved for a new trial and judgment notwithstanding the verdict, arguing that the jury must have had reasonable doubt on the first-degree felony murder theory because it convicted him of second-degree murder for the same killing. The district court dismissed the second-degree murder conviction and sentenced Defendant for the felony murder over his objection. The Supreme Court affirmed, holding (1) the district court did not err when it sentenced Defendant on felony murder instead of declaring a mistrial because

Defendant did not establish that the jury failed to find each element of the felony murder beyond a reasonable doubt or that the jury's first- and second-degree murder verdicts were so irreconcilable as to require a new trial; and (2) the district court did not err in declining to give an instruction on voluntary intoxication.

State v. Lemmie

Court: Kansas Supreme Court
Docket: 119439
Opinion Date: May 1, 2020
Judge: Carol A. Beier
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions of first-degree felony murder, aggravated robbery, conspiracy to commit aggravated robbery, criminal possession of a firearm, fleeing and eluding, and interference with law enforcement, holding that Defendant's arguments on appeal failed. Specifically, the Supreme Court held (1) any possible violation of Defendant's Fifth Amendment right in the admission of a witness's testimony about Defendant giving the witness phone passcodes was undoubtedly harmless; (2) the district court did not err by admitting hearsay statements as statements of a coconspirator and contemporaneous statements; (3) the State introduced sufficient evidence to convict Defendant of first-degree murder; and (4) the district judge did not abuse its discretion by admitting testimony that Defendant was upset over a meth pipe that went missing.

State v. Mullen

Court: Maine Supreme Judicial Court
Citation: 2020 ME 56
Opinion Date: May 5, 2020
Judge: Connors
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction for reckless

conduct and aggravated criminal mischief, holding that the trial court did not abuse its discretion by offering Defendant a continuance of the trial in lieu of excluding his medical records. On appeal, Defendant argued that the trial court abused its discretion by denying his motion to suppress his personal medical records as a sanction for the State's late seizure of the records. The Supreme Judicial Court agreed that the State's conduct undermined the purpose of Maine Rule of Unified Criminal Procedure 18(b) but that the court's offer of a continuance in lieu of the exclusion of the evidence constituted an appropriate response to the State's conduct.

Commonwealth v. Billingslea

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12715
Opinion Date: April 30, 2020
Judge: Cypher
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's convictions and the decision of the Appeals Court denying Defendant's motion to vacate the entry of his appeal from his convictions in that court and to have the case entered directly in the Supreme Judicial Court, holding that a direct appeal from the third conviction of a habitual offender pursuant to Mass. Gen. Laws ch. 279, 25(b) may be entered in the Appeals Court. Defendant was indicted for serious felonies arising from a brutal attack and rape. In addition to charging the specific felony, each indictment also alleged that the sentence for that felony should be enhanced pursuant to the habitual criminal provision Mass. Gen. Laws ch. 279, 25(a) or the habitual offender provision of section 25(b), or both. After he was convicted, Defendant moved to have the case entered directly in the Supreme Judicial Court. The Appeals Court denied the motion. The Supreme Judicial Court affirmed Defendant's convictions, holding (1) this direct appeal was entitled to the unique review prescribed by Mass Gen. Laws ch. 278, 33E, and the Appeals Court may conduct such section 33E review; (2) Defendant was not impermissibly allowed to waive his right to a jury trial on the sentencing enhancement provisions of the indictments; and (3) Defendant was not entitled to reversal of his convictions on any other ground.

Commonwealth v. Martin

Court: Massachusetts Supreme Judicial Court
Docket: SJC-08768
Opinion Date: May 5, 2020
Judge: Ralph D. Gants
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree and the denial of his motion for a new trial and declined to exercise its authority under Mass. Gen. Laws ch. 278E to reduce Defendant's conviction to murder in the second degree, holding that Defendant was not entitled to relief on any of his allegations of error. Defendant was convicted of murder in the first degree on the theory of felony-murder. Defendant filed a motion for a new trial, which was denied. The Supreme Judicial Court affirmed, holding (1) Defendant's motion for a new trial was correctly denied because Defendant was not prejudiced by counsel's ineffective assistance; (2) this Court declines to extend the reach of the Court's holding in Commonwealth v. Brown, 477 Mass. 805 (2017), to Defendant's case; and (3) trial judge erred when he declined Defendant's request that the jury be instructed on the elements of voluntary and involuntary manslaughter, but the error was not prejudicial in the context of the judge's other instructions.

Commonwealth v. Tavares

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12631
Opinion Date: May 6, 2020
Judge: Lowy
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree on theories of deliberate premeditation and extreme atrocity

or cruelty and declined to exercise its power pursuant to Mass. Gen. Laws ch. 278, 33E to reduce the conviction to manslaughter, holding that there was no reversible error in the proceedings below. Specifically, the Supreme Judicial Court held (1) the trial judge did not err by denying Defendant's requests for a jury instruction pursuant to Commonwealth v. Croft, 345 Mass. 143 (1962); (2) the trial judge did not err by denying Defendant's motions for a required finding of not guilty under Croft because a rational jury could have found that Defendant was guilty of murder in the first degree on both the theories of premeditation and extreme atrocity or cruelty; and (3) there was no basis for reducing Defendant's sentence or ordering a new trial.

State v. Branch

Court: Minnesota Supreme Court
Docket: A18-1055
Opinion Date: May 6, 2020
Judge: Lorie Skjerven Gildea
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's sentences for drive-by shooting at an occupied vehicle and second-degree assault, holding that Minn. Stat. 609.035 did not prohibit the sentences for both offenses when the crimes arose from a single behavioral incident. The district court sentenced Defendant to forty-eight months for drive-by shooting at an occupied vehicle and thirty-six months for second-degree assault and imposed the two sentences to run concurrently. The court of appeals affirmed. The Supreme Court affirmed, holding that, under this Court's analysis in State v. Ferguson, 808 N.W.2d 586 (Minn. 2012), the district court properly imposed multiple sentences in this case.

Galloway v. Mississippi

Court: Supreme Court of Mississippi
Citation: 2018-CA-01427-SCT

Opinion Date: May 7, 2020
Judge: Beam
Areas of Law: Constitutional Law, Criminal Law

Leslie Galloway appealed the denial of his 2015 petition for post-conviction relief (PCR) pertaining to his 2007 guilty plea to carjacking, a conviction that was used as an aggravating circumstance in Galloway's 2010 capital-murder trial at which Galloway received a death sentence. Galloway claimed in the petition that his defense counsel Wendy Martin had an actual conflict of interest because, before becoming his defense counsel, Martin had served as an assistant district attorney in the same case, unbeknownst to Galloway. The trial court ruled that Galloway's PCR claim was time barred under Mississippi's Uniform Post-Conviction Collateral Relief Act (UPCCRA), having been filed more than seven years after Galloway's conviction for carjacking. The trial court alternatively found no merit to Galloway's PCR claim, time bar notwithstanding. Accordingly, the trial court denied Galloway's PCR petition. The Mississippi Supreme Court agreed with the trial court that Galloway's PCR claim was time barred under the UPCCRA. The Court also agreed there was no merit to Galloway's PCR claim.

City of Missoula v. Zerbst

Court: Montana Supreme Court
Citation: 2020 MT 108
Opinion Date: May 5, 2020
Judge: Beth Baker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction for sexual assault, holding that the municipal court erred when it instructed the jury on a definition of "consent" from the 2017 sexual assault statute and not the applicable 2015 statute, and the erroneous jury instruction prejudicially affected Defendant's substantial rights. At trial, the court instructed the jury, over Defendant's objection, on the definition of consent contained in recent amendments to the sexual assault statute. On appeal, Defendant argued that the municipal court failed to apply the correct law when instructing the jury on the elements of the claimed offense. The district court denied the

appeal. The Supreme Court reversed, holding (1) the instructions, as a whole, did not fully and fairly instruct the jury on the law applicable to the case; and (2) Defendant's substantial due process right was prejudiced by the erroneous jury instruction.

State v. Degarmo

Court: Nebraska Supreme Court
Citation: 305 Neb. 680
Opinion Date: May 1, 2020
Judge: Stacy
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of driving under the influence, holding that Defendant consented to a chemical test of his urine and, therefore, the results of the urine test were admissible. A law enforcement officer stopped Defendant for an expired registration. Based on his observations, the officer, a certified drug recognition evaluation expert, administered field sobriety tests. The officer concluded that Defendant was under the influence of marijuana arrested Defendant for driving under the influence and then took him to a detoxification center. Thereafter, a chemical test of Defendant's urine confirmed the presence of marijuana. On appeal, Defendant challenged the admission of the results of the urine test. The Supreme Court affirmed, holding that Defendant voluntarily consented to the warrantless search of his urine, and therefore, the search fell within a recognized exception to the warrant requirement.

People v. Holz

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02682
Opinion Date: May 7, 2020
Judge: Fahey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals held that N.Y. Crim. Proc. Law (CPL) 710.70(2) grants a defendant the right to review of a suppression decision when the order related exclusively to a count that was satisfied by a guilty plea but was not one to which the defendant pleaded guilty. Defendant was charged with two counts of burglary in the second degree. The first count related to a laptop computer, and the second count related to jewelry. Defendant moved to suppress the jewelry, but Supreme Court denied the motion. Defendant then pleaded guilty to one count of burglary in the second degree as charged in the count pertaining to the theft of the laptop computer, in satisfaction of the count charging the burglary of jewelry. On appeal, Defendant argued that Supreme Court erred in denying his motion to suppress the jewelry. The Appellate Division affirmed, concluding that it was jurisdictionally precluded from reviewing the suppression order. The Court of Appeals reversed, holding (1) Defendant's right to appellate review of Supreme Court's suppression order was secured by CPL 710.70(2); and (2) because the Appellate Division did not reach the underlying suppression question the case must be remitted to the Appellate Division for further proceedings.

People v. Maffei
Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02680
Opinion Date: May 7, 2020
Judge: DiFiore
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals affirmed the order of the Appellate Division concluding on direct appeal that Defendant was not entitled to relief on his ineffective assistance of counsel claim, holding that Defendant, on this record, did not sustain his burden to establish that counsel was constitutionally ineffective. After a jury trial, Defendant was convicted of second-degree murder. On appeal, Defendant argued that his trial counsel's failure to challenge a prospective juror constituted ineffective assistance of counsel. The Appellate Division affirmed. The Court of Appeals affirmed, holding (1) the record was inadequate to review Defendant's ineffective assistance of counsel claim; and (2) the appropriate procedure for the litigation of Defendant's challenge to his counsel's performance was a N.Y. Crim. Proc.

Law 440.10 motion.

State v. Bailey

Court: North Carolina Supreme Court
Docket: 360A19
Opinion Date: May 1, 2020
Judge: Davis
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the order of the trial court denying Defendant's motion to suppress evidence seized during the execution of a search warrant, holding that the warrant supported by probable cause. Defendant pled guilty to the offense of trafficking in cocaine while preserving his right to appeal the denial of his motion to suppress. On appeal, Defendant argued that the trial court erred in denying his motion to suppress because the facts contained in the affidavit were insufficient to establish probable cause to search his residence. The court of appeals affirmed. The Supreme Court affirmed, holding that the affidavit contained facts that were sufficient to provide a nexus between the residence and suspected criminal activity, and therefore, the warrant was supported by probable cause.

State v. Ellis

Court: North Carolina Supreme Court
Docket: 340A19
Opinion Date: May 1, 2020
Judge: Robin E. Hudson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the decision of the Court of Appeals affirming the trial court's denial of Defendant's motion to suppress evidence, holding that there was no reasonable suspicion to justify the law enforcement officer's stop when Defendant signaled with his middle finger from the passenger side window of a moving vehicle. While assisting a stranded

motorist, the officer turned his attention to another car traveling on the roadway, a white SUV. Defendant had his arm outside the passenger window and gestured with his middle finger, making an up-and-down motion. Believing that Defendant was committing the crime of disorderly conduct, the officer pursued and then stopped the SUV. At trial, Defendant moved to suppress the officer's testimony, arguing that there was no reasonable suspicion to justify the stop. The trial court denied the motion. Defendant pleaded guilty to resisting, delaying, or obstructing a public officer. The court of appeals affirmed the trial court's denial of Defendant's motion to suppress. The Supreme Court reversed, holding that the specific, articulable facts did not establish reasonable suspicion of the crime of disorderly conduct.

State v. Hobbs

Court: North Carolina Supreme Court
Docket: 263PA18
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction, holding that the trial court clearly erred in ruling that Defendant failed to prove purposeful discrimination with respect to the State's use of peremptory challenges to strike three jurors without considering all of the evidence presented by Defendant. Defendant was found guilty of one count of first-degree murder and other crimes. On appeal, Defendant argued that the trial court erred by failing to grant three objections that he made under Batson v. Kentucky, 476 U.S. 79 (1986). The court of appeals affirmed Defendant's convictions. The Supreme Court reversed, holding (1) the court of appeals erred in its analysis of Defendant's Batson claims with respect to the three jurors; and (2) as to all three jurors, remand was required for reconsideration of whether Defendant proved purposeful discrimination in each case.

State v. Mylett

Court: North Carolina Supreme Court
Docket: 6A19
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the court of appeals affirming the trial court's judgment convicting Defendant for conspiracy to commit harassment of a juror, holding that the trial court erred in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. Defendant was convicted of conspiracy to commit harassment of a juror because of his actions at a courthouse following his twin brother's conviction for assault on a government official. On appeal, the court of appeals concluded that the trial court did not err in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. The Supreme Court reversed, holding that the evidence in Defendant's trial was insufficient to raise anything more than mere conjecture that he had made an agreement with another person to threaten or intimidate a juror.

Dodge v. North Dakota

Court: North Dakota Supreme Court
Citation: 2020 ND 100
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

Richard Dodge appealed from a district court order denying his application for post-conviction relief. Dodge was charged with five felonies and a misdemeanor in December 2015. Dodge was appointed counsel. In April 2016, Dodge’s counsel moved the court to withdraw because the attorney-client relationship was “irreparably broken and rendered unreasonably difficult.” The court granted the motion, and Dodge was appointed substitute counsel in May 2016. In July 2016, Dodge himself filed a “motion to dismiss counsel.” The court denied Dodge’s motion. Five months after the deadline for motions and plea agreements, Dodge's counsel sought to have Dodge submit to a psychiatric examination. This request was denied, the trial court

found no evidence, and the the court itself made no observations, that Dodge was incompetent to stand trial. After this denial, Dodge himself again moved to dismiss his trial counsel, and due to the allegations Dodge made in his motion, counsel moved to withdraw. The trial court denied both motions, and instead, required the attorney to appear as standby counsel and assist Dodge during trial if requested, but relieved him of any further obligations to consult with Dodge. The case proceeded to trial. At the beginning of trial, the court gave Dodge the option of representing himself or having his attorney represent him. Dodge chose to have his attorney represent him. Because his attorney had not prepared for trial and had no communication with Dodge since he moved to withdraw, Dodge's attorney asked for a brief recess to consult with Dodge. During the recess, a settlement was reached. Dodge agreed to enter Alford pleas on all counts, waived a presentence investigation, and agreed to be sentenced immediately after entering his pleas. Dodge was immediately sentenced following his guilty pleas, and thereafter sought post-conviction relief on grounds he was not competent to enter his pleas, and that he received ineffective assistance of trial counsel. After review, the North Dakota Supreme Court concluded the district court's finding that Dodge was competent when he entered his pleas was not clearly erroneous, and disposed of his claim of ineffective assistance of counsel.

North Dakota v. Dahl

Court: North Dakota Supreme Court
Citation: 2020 ND 87
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

The State of North Dakota appealed a district court order denying its motion to resume prosecution against Matthew Dahl and dismissing the case. In December 2014, the State charged Dahl with two counts of theft. Dahl did not appear on the charges until he was arrested on a bench warrant in February 2017. In mid-April 2017, the State mailed Dahl a pretrial diversion agreement. Dahl signed and returned the notarized agreement dated May 3, 2017. On May 9, 2017, the state's attorney signed and filed the agreement with the district court, and the court approved the agreement the same day. Under the agreement, the State agreed to suspend prosecution for "two

years from the date of execution" conditioned on Dahl's timely payment of restitution. Dahl failed to make minimum monthly restitution payments. On June 6, 2019, the State moved to resume prosecution, alleging Dahl violated the pretrial diversion agreement by his non-payment. The district court held a hearing on the State's motion in August 2019. The court concluded the pretrial agreement was executed when Dahl signed it on May 3, 2017. The court then denied the State's motion to resume prosecution as untimely under N.D.R.Crim.P. 32.2(d)(2), and dismissed the complaint against Dahl. After review, the North Dakota Supreme Court reversed, concluding the district court erred in determining the State's motion was untimely, and remanded for further proceedings.

North Dakota v. Foster

Court: North Dakota Supreme Court
Citation: 2020 ND 85
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Akeem Foster was convicted by jury of Terrorizing and Carrying a Concealed Weapon. Foster contended on appeal he was denied a fair trial because he was asked during cross-examination if other witnesses were lying and because the prosecutor expressed personal beliefs about the evidence during closing arguments. Foster also argued there was insufficient evidence to convict him of either charge. After review, the North Dakota Supreme Court affirmed Foster's conviction for Carrying a Concealed Weapon, but reversed his conviction for Terrorizing. The Court found Foster was improperly asked to provide an opinion on the veracity and credibility of the State's witnesses. The improper questioning was prejudicial and denied Foster a fair trial on the terrorizing charge.

North Dakota v. Kolstad

Court: North Dakota Supreme Court

Citation: 2020 ND 97
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

In December 2018, Officer Nelson of the University of North Dakota Police Department conducted a traffic stop of Stanley Kolstad for suspicion of driving under the influence. Kolstad performed field sobriety tests and a preliminary breath test (PBT). Prior to performing the PBT, Kolstad informed Nelson that he had asthma. Nelson testified he was unable to obtain a PBT result because Kolstad was filling his cheeks with air while performing the test. Kolstad was arrested for DUI and refusing to submit to a chemical test. Kolstad was transported to the UND police station to be given an Intoxilyzer breath test. Prior to the Intoxilyzer test, Nelson read Kolstad the implied consent advisory. But, because Nelson was not a certified operator of the Intoxilyzer machine, Officer Waltz conducted the test. Prior to the test, Kolstad informed Waltz he had asthma. The Intoxilyzer test results were deficient. Waltz testified Kolstad was not providing enough air for the test machine to provide a valid result. Kolstad was charged with driving under the influence and refusing to submit to a chemical test. Kolstad's counsel made a discovery request to the State seeking copies of any audio or video recordings taken by police officers. Kolstad's counsel also requested the State inform him whether any sound or video recordings taken of Kolstad were subsequently "altered, edited, destroyed, or discarded." The State provided Kolstad's counsel with dash camera footage from Nelson's police car that had been taken at the scene of the arrest, but the State did not provide any body camera footage from either Nelson or Waltz. Upon learning that Waltz's body camera footage was successfully uploaded to UND servers, Kolstad's counsel moved to dismiss the case because the State did not provide any body camera footage in discovery as requested. The district court ultimately dismissed the refusal to submit to a chemical breath test charge as a sanction for failing to provide the body camera footage. The State appealed, arguing the alleged discovery violation did not rise to a constitutional violation of Kolstad's due process rights, and the district court abused its discretion in dismissing the refusal charge. Kolstad argued the district court's order dismissing the refusal charge was not appealable, and if it was, the court did not abuse its discretion in dismissing the charge. The North Dakota Supreme Court concluded there was nothing in the record to indicate the district court adequately considered an

alternative or less severe sanction to dismissal, and by not considering a less severe sanction, the trial court erred. The district court's order dismissing the refusal charge was reversed, and the matter remanded for further proceedings.

North Dakota v. Michel

Court: North Dakota Supreme Court
Citation: 2020 ND 101
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

Kevin Michel was convicted by jury of knowingly receiving stolen property. Jamestown Police began investigating theft of tires from Northwest Tire in October 2017. About ten months later, Thomas Melland and Andrew Heckelsmiller became suspects in the investigation. Heckelsmiller told police he had sold stolen tires to Michel. In August 2018, Detective LeRoy Gross spoke with Michel about the stolen tires. Michel acknowledged he had bought tires from Heckelsmiller and Melland. Michel also told Detective Gross he stopped buying tires from Heckelsmiller and Melland after seeing a Facebook post from Northwest Tire offering a $500 reward for information regarding stolen tires. Detective Gross told Michel, "There's going to be a lot of restitution these two boys are going to have to come up with unless we can get some tires back." Michel said he had sold several of the tires but still had some of them. Michel turned over seven new tires to Detective Gross. Representatives from Northwest Tire and J&L Service identified the tires as some of those stolen from their shops. During the jury's deliberations, the jury submitted a note with written questions to the court. Michel argued on appeal the district court erred by not specifically answering the jury's questions and instead referring them to the existing jury instructions. After review, the North Dakota Supreme Court affirmed the criminal judgment, except as to the award of restitution. The award was reversed because the district court awarded more than what was required to make the victims whole. The matter was remanded for a redetermination of restitution.

State ex rel. McDougald v. Greene

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2782
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied a writ of mandamus sought by Relator to compel Respondent, the public-records custodian at the Southern Ohio Correctional Facility (SOCF), to provide Relator with three public records and to pay Relator statutory damages and court costs associated with this litigation, holding that Relator was not entitled to either a writ of mandamus nor statutory damages. When Relator was an inmate at SOCF he submitted a public-records request to Respondent seeking three documents. Respondent provided one of the three documents. Relator then filed a complaint for a writ of mandamus seeking an order compelling Respondent to provide the two documents and to pay statutory damages and court costs associated with this litigation. The Supreme Court denied the writ of mandamus on the merits, holding that Respondent's response to Relator fully satisfied Respondent's obligations under Ohio Rev. Code 149.43, and therefore, Relator was not entitled a writ of mandamus, and there was no basis to award statutory damages.

State ex rel. Parker Bey v. Byrd

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2766
Opinion Date: May 5, 2020
Judge: Maureen O'Connor
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the judgment of the court of appeals denying Appellant's complaint for a writ of mandamus to compel the Cuyahoga County Clerk of Courts to produce various court records and denying the clerk's request that Appellant be declared a vexatious litigator, holding that the court of appeals erred in denying Appellant's complaint on the grounds that he did not invoke the Rules of

Superintendence as the basis for his request. Appellant sought copies of journal entries from his criminal case and a copy of the clerk of courts' records-retention schedule. The clerk largely denied the request. Appellant then filed a complaint for a writ of mandamus. The court of appeals denied Appellant's request for mandamus relief, concluding that the clerk had no clear legal duty to provide the requested records. The Supreme Court reversed, holding (1) this action to compel the production of journal entries from a 1995 case was properly brought under the Public Records Act; and (2) this Court declines to impose sanctions on Appellant or to declare him a vexatious litigator.

State v. Dangler

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2765
Opinion Date: May 5, 2020
Judge: DeWine
Areas of Law: Criminal Law

The Supreme Court reversed the judgment of the court of appeals vacating Defendant's conviction and sentence and reinstated the trial court's acceptance of Defendant's plea of no contest to sexual battery, holding that the trial court did not completely fail to comply with Crim.R.11(C)(2)(a), and there was nothing in the record to support a conclusion that Defendant would not have entered his plea had the trial court been more detailed in its explanation. On appeal, Defendant sought to vacate his plea of no contest, arguing that his plea was invalid because the trial court erred by not explaining more fully the obligations and restrictions that went with his status as a sex offender, in violation of Crim. R. 11(C)(2)(a). The court of appeals vacated the conviction without requiring Defendant to show prejudice, concluding that the trial court had completely failed to comply with Crim. R. 11(C)(2)(a). The Supreme Court reversed, holding (1) the trial court did not completely failed to comply with Crim R. 11(C)(2)(a)'s maximum-penalty-advisement requirement; and (2) because Defendant did not establish prejudice, he was not entitled to have his no-contest plea vacated for a failure to comply with Crim.R. 11(C).

Oregon v. Haji

Court: Oregon Supreme Court
Docket: S066254
Opinion Date: May 7, 2020
Judge: Nakamoto
Areas of Law: Constitutional Law, Criminal Law

After a grand jury issued an indictment charging defendant Hanad Ali Haji with multiple offenses, the district attorney determined that the indictment could be challenged by demurrer because the basis for joining those offenses was not expressly alleged. Instead of seeking another indictment from the grand jury, the district attorney obtained leave from the trial court to amend the indictment by adding allegations specifying the statutory basis for joinder, without adding factual allegations about the crimes. Defendant was convicted on some of the charges at trial, and the Court of Appeals affirmed. The issue this case presented for the Oregon Supreme Court's review centered on whether the district attorney could add allegations specifying the statutory basis for joinder of multiple offenses to an indictment instead of resubmitting the case to the grand jury. The Supreme Court determined that neither the statute permitting joinder of multiple offenses in a single indictment nor Article VII (Amended), section 5(6), of the Oregon Constitution precluded a district attorney, with approval of the trial court, from amending an indictment to add allegations specifying the statutory basis for joinder of multiple offenses. The Supreme Court affirmed the decision of the Court of Appeals, based in part on different reasoning, and affirmed the judgment of the circuit court.

South Carolina v. Durant

Court: South Carolina Supreme Court
Docket: 27964
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law

Appellant Larry Durant was convicted of second-degree criminal sexual conduct (CSC) for sexually abusing a teenage girl in his church office where he served as the pastor. Durant contended the trial court improperly permitted the State to introduce evidence of prior sexual abuse allegations as evidence of a common scheme or plan under Rule 404(b), SCRE, and that the State committed a "Brady" violation by failing to accurately disclose the criminal history of its witness. After review, the South Carolina Supreme Court affirmed the admissibility of the girls' testimony. "[W]hile the State failed to disclose the criminal background information of its witness, we find this information was not material." The Court found Durant exercised his position of trust, authority, and spiritual leadership to hold private prayer meetings with teen girls who had grown up in his church. He told them he was praying for their health and good fortune, and represented that part of this process was touching them sexually and having intercourse. Durant then warned the girls of misfortune if they refused or told anyone. Moreover, he used scripture as a means of grooming the children into performing sex acts. "These facts demonstrate the requisite logical connection between the prior acts of sexual abuse and the one forming the basis of the crime charged." The Court therefore affirmed Durant's conviction.

South Carolina v. Perry

Court: South Carolina Supreme Court
Docket: 27963
Opinion Date: May 6, 2020
Judge: Few
Areas of Law: Constitutional Law, Criminal Law

Petitioner Wallace Perry was convicted on two counts of criminal sexual conduct (CSC) with a minor in the first degree and two counts of CSC with a minor in the second degree for sexually assaulting two of his biological daughters. Prior to Perry's trial, the State made a motion to admit the testimony of Perry's stepdaughter from an earlier marriage that Perry sexually assaulted her twenty-two to twenty-seven years earlier. The State argued the trial court should not exclude the stepdaughter's testimony under Rule 404(b) of the South Carolina Rules of Evidence because it fit the

"common scheme or plan" exception. Perry objected to this testimony. The trial court initially reserved ruling on the issue, but later indicated it was inclined to allow the stepdaughter to testify. The jury convicted Perry on all counts, and the trial court sentenced him to thirty years in prison. The court of appeals affirmed. The South Carolina Supreme Court determined it was not enough to meet the "logical connection" standard for admission of other crimes under the common scheme or plan exception to Rule 404(b) that the defendant previously committed the same crime. "When evidence of other crimes is admitted based solely on the similarity of a previous crime, the evidence serves only the purpose prohibited by Rule 404(b), and allows the jury to convict the defendant on the improper inference of propensity that because he did it before, he must have done it again. ...The common scheme or plan exception demands more." The Supreme Court held State must show a logical connection between the other crime and the crime charged such that the evidence of other crimes "reasonably tends to prove a material fact in issue." The State must also convince the trial court that the probative force of the evidence when used for this legitimate purpose is not substantially outweighed by the danger of unfair prejudice from the inherent tendency of the evidence to show the defendant's propensity to commit similar crimes. In this case, the State did not meet its burden. Conviction was reversed and the matter remanded for a new trial.

South Carolina v. Quinn

Court: South Carolina Supreme Court
Docket: 27966
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law, White Collar Crime

Respondent Rick Quinn, Jr. was a former member of the South Carolina House of Representatives, representing constituents in Richland and Lexington counties from 1989-2004 and 2010-2017 and serving as House Majority Leader from 1999- 2004. He owned and operated a mail business called Mail Marketing Strategies (MMS) in Columbia, while his father owned and operated a political consulting firm, Richard Quinn & Associates (RQ&A). In 2014, Attorney General Alan Wilson designated First Circuit

Solicitor David Pascoe as special prosecutor to conduct a State grand jury investigation into alleged public corruption committed by current and former members of the South Carolina General Assembly. This case arose from a prior state grand jury investigation of former House Speaker Bobby Harrell, which resulted in six counts of misusing campaign funds, to which he pleaded guilty. During the course of the investigation into Speaker Harrell, SLED uncovered potentially criminal conduct by Representative Jimmy Merrill and Representative Rick Quinn, and a second grand jury investigation was initiated to investigate the conduct of these individuals. The investigation focused on Quinn's practice of using his office as House Majority Leader and leader of the House Republican Caucus to direct mailing and political services to his family's businesses. Quinn only admitted to a limited set of facts supporting the indictment. Believing the plea lacked a sufficient basis, the State moved to vacate Quinn's guilty plea, reconsider the sentence, and for the trial court's recusal. The State appealed the order denying its motions. After review, the South Carolina Supreme Court determined that the State could not appeal the guilty plea, the trial court did not abuse its discretion in sentencing, and there was no evidence of judicial bias or prejudice requiring the court to recuse itself. Therefore, the Court dismissed the State's appeal of the guilty plea, and affirmed as to all other issues.

Texas v. Arellano

Court: Texas Court of Criminal Appeals
Docket: PD-0287-19
Opinion Date: May 6, 2020
Judge: Slaughter
Areas of Law: Constitutional Law, Criminal Law

After Appellee Cesar Ramiro Arellano was arrested for driving while intoxicated, the arresting officer, Phillip Garcia, prepared a probable cause affidavit to support a search warrant for a blood draw. Officer Garcia submitted his sworn affidavit to the on-duty magistrate. Using a cursive signature, the magistrate signed the blank signature line of a form search warrant authorizing the search and seizure of Appellee's blood. Below the signature line appeared the words, "Magistrate, Victoria County, Texas."

Aside from the cursive signature, the magistrate's name was not typed or handwritten anywhere on the warrant. Upon execution of the search warrant, Appellee was charged with DWI. In the trial court, Appellee filed a motion to suppress all evidence stemming from the blood draw. At the pretrial suppression hearing, Appellee argued that the search warrant to obtain the blood specimen was facially invalid because the magistrate's signature was illegible in violation of the requirements of Code of Criminal Procedure Article 18.04(5). The trial court agreed, the court of appeals concurred, and the evidence was suppressed because of the illegible signature. The Texas Court of Criminal Appeals disagreed with both lower courts, finding the court of appeals erred in holding that reliance on the statutory good-faith exception was automatically precluded based on an illegible magistrate's signature in violation of Code of Criminal Procedure Article 18.04(5). Because the remaining issues in the case were not properly addressed by the court of appeals, judgment was vacated and the matter remanded for further proceedings.

Criminal Law Opinions

Kelly v. United States

Court: US Supreme Court
Docket: 18-1059
Opinion Date: May 7, 2020
Judge: Elena Kagan
Areas of Law: Criminal Law, Government & Administrative Law, White Collar Crime

During former New Jersey Governor Christie's 2013 reelection campaign,

Fort Lee's mayor refused to endorse Christie. Kelly, Christie's Deputy Chief of Staff, Port Authority Deputy Executive Director, Baroni, and another official decided to reduce from three to one the number of lanes reserved at the George Washington Bridge's toll plaza for Fort Lee's commuters. To disguise the political retribution, the lane realignment was said to be for a traffic study. Port Authority traffic engineers were asked to collect some numbers. An extra toll collector was paid overtime. The lane realignment caused four days of gridlock, ending only when the Port Authority's Executive Director learned of the scheme. The Third Circuit affirmed the convictions of Baroni and Kelly for wire fraud, fraud on a federally funded program, and conspiracy to commit those crimes. The Supreme Court reversed. The scheme did not aim to obtain money or property. The wire fraud statute refers to "any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses," 18 U.S.C. 1343. The federal-program fraud statute bars "obtain[ing] by fraud" the "property" (including money) of a federally funded program or entity, section 666(a)(1)(A). The statutes are limited to the protection of property rights and do not authorize federal prosecutors to set standards of good government. The Court rejected arguments that the defendants sought to take control of the Bridge's physical lanes or to deprive the Port Authority of the costs of compensating employees. Their realignment of the access lanes was an exercise of regulatory power; a scheme to alter a regulatory choice is not one to take government property. The time and labor of the employees were an incidental byproduct of that regulatory object. Neither defendant sought to obtain the services that the employees provided.

Gomes v. Silva

Court: US Court of Appeals for the First Circuit
Docket: 19-1656
Opinion Date: May 1, 2020
Judge: Stahl
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed the judgment of the district court denying Appellant's petition for a writ of habeas corpus, holding that, under the highly deferential standard prescribed by the Antiterrorism and Effective

Death Penalty Act for federal habeas review of state criminal convictions, Appellant's claims to habeas relief failed. Appellant was convicted in a Massachusetts superior court of murder in the first degree and related crimes. The Supreme Judicial Court (SJC) affirmed the convictions. Appellant subsequently petitioned the District Court for the District of Massachusetts for a writ of habeas corpus. The district court denied the petition but granted a certificate of appealability. The First Circuit affirmed, holding (1) sufficient evidence supported Appellant's conviction for first-degree murder as a joint venturer, and the SJC's sufficiency determination was not unreasonable; and (2) the SJC reasonably determined that the trial court's admission into evidence of certain items did not constitute error.

United States v. Perez-Couvertier

Court: US Court of Appeals for the First Circuit
Docket: 16-2186
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed Defendant's conviction of possessing with intent to distribute controlled substances in a protected area and conspiring to distribute controlled substances in a protected area, holding that the district court did not plainly err with respect to any of Defendant's challenges. Specifically, the First Circuit held (1) the district court did not commit plain error in admitting evidence of the conspiracy's activities occurring after he withdrew from the conspiracy or, alternatively, in not instructing the jury to ignore such evidence; (2) the district court did not plainly err in admitting evidence of a drug trafficking organization's violent acts; and (3) the delay between Defendant's indictment and arrest did not violate his Sixth Amendment right to a speedy trial.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Haverkamp

Court: US Court of Appeals for the Second Circuit

Docket: 18-3735
Opinion Date: May 4, 2020
Judge: Barrington D. Parker
Areas of Law: Criminal Law

Defendant pleaded guilty to one count of distribution and receipt of child pornography and one count of possession of child pornography. The district court sentenced him to 121 months of imprisonment, followed by five years of supervised release, and imposed a $200 mandatory special assessment under 18 U.S.C. 3013, as well as a $10,000 assessment under 18 U.S.C. 3014. The Second Circuit held that the district court did not abuse its discretion in sentencing defendant and his sentence was substantively reasonable. The court held that the text of the Justice for Victims of Trafficking Act (JVTA), 18 U.S.C. 3014, taken as a whole and in its context, is straightforwardly meant to be applied on a per-offender, not a per-count, basis. In this case, the district court erroneously applied the special assessment on a per-count, rather than per-offender, basis. Finally, the court held that the computer monitoring condition in question was reasonably related to the nature of defendant's offense. Accordingly, the court affirmed in part, vacated in part, and remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Mladen

Court: US Court of Appeals for the Second Circuit
Docket: 18-0616
Opinion Date: May 6, 2020
Judge: Amalya Lyle Kearse
Areas of Law: Criminal Law, Trusts & Estates

After defendant died while his appeal was pending, counsel moved for abatement of all incidents of the prosecution, requesting that the appeal be dismissed without a decision on the merits, that defendant's conviction be vacated, and that the matter be remanded to the district court with instructions to dismiss the indictment and order repayment to defendant's estate of the $20,000 fine and $100 special assessment. Because defendant was convicted upon his plea of guilty, and he neither did nor was permitted to challenge on appeal the merits of his conviction, the Second

Circuit denied as without merit so much of the motion as seeks (1) vacatur of his conviction, (2) dismissal of the count of the indictment on which he was convicted, and (3) repayment of the mandatory $100 special assessment. The court granted so much of the motion as requests dismissal of this appeal and a remand to the district court for vacatur of the imposed terms of imprisonment and supervised release and for an order requiring that the paid fine of $20,000 be repaid to defendant's estate.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Richardson

Court: US Court of Appeals for the Second Circuit
Docket: 19-412
Opinion Date: May 5, 2020
Judge: Menashi
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for distribution and possession with intent to distribute a controlled substance. The court held that the district court did not procedurally err by applying the career offender sentencing enhancement pursuant to USSG 4B1.1 because defendant's prior convictions of conspiracy to distribute a controlled substance in violation of 21 U.S.C. 841(a)(1) and 846, and attempted criminal possession of a controlled substance in violation of N.Y. Penal Law 220.16(1), qualify as controlled substance offenses, as defined in USSG 4B1.2(b). The court also held that the district court did not substantively err in sentencing defendant, because it properly considered his criminal history and accounted for his need for mental health and substance abuse treatment.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Rosemond

Court: US Court of Appeals for the Second Circuit
Docket: 18-3561
Opinion Date: May 1, 2020
Judge: Chin
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for murder-for-hire, conspiracy to commit murder-for-hire, murder through use of a firearm, and possession of a firearm during a murder-for-hire conspiracy. Defendant owned Czar Entertainment, a music management company that represented hip-hop, rap and R&B artists such as Jayceon Taylor, also known as "The Game." Taylor was a member of G-Unit, a rap group run by Curtis Jackson, also known as "50 Cent." Defendant's crimes stemmed from a rivalry with Violator Records, the company that managed G-Unit. The court rejected defendant's contention that his attorney was ineffective because he conceded that defendant paid for the victim to be shot, even though he told counsel not to make this concession. The court held that defendant failed to show that this was objectively unreasonable or that he would have been found not guilty had a different argument been advanced. In this case, there was ample evidence supporting counsel's strategy to concede that defendant ordered a shooting where, among other things, the government's key witness, who participated in the conspiracy and lured the victim to be shot, testified that defendant agreed to pay the shooter. The court also held that the district court did not abuse its broad discretion by admitting prior bad-act evidence under Federal Rule of Evidence 404(b)(1).

United States v. Lacerda

Court: US Court of Appeals for the Third Circuit
Docket: 15-2812
Opinion Date: May 5, 2020
Judge: Porter
Areas of Law: Criminal Law, White Collar Crime

VOG billed itself as an advocacy group helping victims of timeshare fraud get out of their timeshare debts. A jury determined that VOG had actually defrauded its customers and that three individual defendants (including Lacerda) were each knowing participants in that fraud. Lacerda was sentenced to 324 months' imprisonment for his leading role in the fraudulent enterprise. The Third Circuit affirmed the respective convictions and sentences. The court rejected a claim of impermissible "overview testimony" by an FBI agent; an officer who is familiar with an investigation or was personally involved may tell the story of that investigation—how the

investigation began, who was involved, and what techniques were used, and, with a proper foundation, may offer lay opinion testimony and testify about matters within his personal knowledge. The district court did not abuse its discretion when it disqualified defense counsel based on a conflict of interest; when it denied replacement counsel's motion for a continuance; when it excluded from evidence, as hearsay, an email sent by Lacerda to VOG's former CFO; in exercising its sentencing discretion; or by ordering the forfeiture of all VOG's gross proceeds.

Cucalon v. Barr

Court: US Court of Appeals for the Fourth Circuit
Dockets: 18-1292, 18-2206
Opinion Date: May 7, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law, Immigration Law

The Fourth Circuit denied petitions for review of the BIA's final order of removal. Applying the modified categorical approach, the court held that defendant's prior conviction for distribution of cocaine under Virginia Code 18.2-248, including distribution of that substance as an accommodation under Virginia Code 18.2-248(D), satisfies the federal definitions of an "aggravated felony" and of a crime "relating to a controlled substance" pursuant to 8 U.S.C. 1227(a)(2)(A)(iii), 1227(a)(2)(B)(i). The court also held that the district court did not abuse its discretion in denying petitioner's motion to reconsider.

United States v. Doctor

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4874
Opinion Date: May 4, 2020
Judge: Roger L. Gregory
Areas of Law: Criminal Law

The Fourth Circuit affirmed the district court's revocation of defendant's

supervised release and resulting sentence. The court held that the district court did not clearly err in finding the government proved he committed the assault underlying the supervised release violation; the district court did not commit plain error by adopting the violation report when announcing defendant committed Violation One; and, even if the district court erred in sentencing defendant for a Grade A violation, the error was harmless.

United States v. Lewis

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-4028
Opinion Date: May 4, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law

Defendant was convicted for possessing a firearm as a felon and sentenced to 63 months' imprisonment and a three-year period of supervised release. The district court additionally recommended, without explanation, that defendant receive addiction treatment while incarcerated and ordered, as a special condition of his supervised release, that defendant participate in an addiction treatment program. The Fourth Circuit held that defendant's sentence is procedurally unreasonable because the district court failed to provide an adequate explanation for imposing as a special condition of supervised release the requirement of addiction treatment. The court also held that the district court failed to address defendant's nonfrivolous mitigation arguments. Therefore, the court remanded for resentencing.

United States v. Jordan

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-40499
Opinion Date: May 1, 2020
Judge: Jennifer Walker Elrod
Areas of Law: Criminal Law

The Fifth Circuit affirmed the district court's grant of defendants' motion for a new trial on the basis of prejudicial outside influence on the jury. The court held that the district court did not abuse its broad discretion in granting the motion for a new trial without holding an evidentiary hearing. To the extent there is a bright-line rule applicable to allegations of outside influence on the jury, the court held that it was not applicable to this case. Furthermore, the district court did not abuse its discretion in exercising its prerogative, within broadly defined parameters, to handle the allegation of outside influence in the least disruptive manner possible in this unusual case. Finally, the district court permissibly concluded that the evidence showed a sufficient likelihood of prejudice to shift the burden to the Government, and that the Government did not (and could not) show "no reasonable possibility that the jury's verdict was influenced by" the CSO's comments.

United States v. Longoria

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-20201
Opinion Date: May 5, 2020
Judge: Gregg Costa
Areas of Law: Criminal Law

The Fifth Circuit held that the base offense level of 20 was proper for defendant's felon-in-possession crime involving a semiautomatic firearm that is capable of accepting a large capacity magazine. In this case, defendant failed to show that the district court clearly erred in relying on the FBI's agent statement about what was found in the apartment. The court clarified any confusion and held that the 2013 amendment to the commentary on the acceptance-of-responsibility Guideline does not clearly overrule its caselaw allowing the government to withhold the third point for acceptance of responsibility when it must litigate a suppression motion. The court held that Amendment 775 does not contain the unequivocal override needed to get past the court's precedent. Therefore, the court affirmed defendant's sentence.

United States v. McNabb

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-50265
Opinion Date: May 1, 2020
Judge: Costa
Areas of Law: Criminal Law

The Fifth Circuit affirmed defendant's sentence imposed after he pleaded guilty to possessing a gun after having been convicted of a felony. The court held that defendant is not entitled to relief on his claim that the government breached the plea deal, and thus his appellate waiver remains enforceable. Accordingly, defendant's challenges to his sentence must be dismissed.

Andrews v. Wayne County

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1992
Opinion Date: May 4, 2020
Judge: Suhrheinrich
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Canton Police received a 911 call from Andrews, who stated that his fiance, White, had physically attacked him. Officers arrested White. Andrews later took White's medications to the jail; a “KOP” policy allows inmates to keep certain drugs for self-administration. During an intake interview, White admitted to attempting to harm herself or commit suicide in the past but said she was not thinking of harming herself or having suicidal thoughts. An R.N. later evaluated White for nearly two hours, reported White’s chief complaints were “anxiety and depression,” and contacted a pharmacy to verify White’s prescriptions. The R.N. claims White did not exhibit any psychotic behavior, suicidal ideation, or psychiatric distress but ordered further evaluation. The next day, White was found on the floor with vomit on her face. She stated repeatedly that she took too many pills. The next day, White died in the hospital. The cause of death was Verapamil toxicity. The Sixth Circuit affirmed the rejection of a suit under 42 U.S.C. 1983 on summary judgment. A pretrial detainee does not have an automatic right to a suicide screening. The court rejected an argument that the KOP Policy was deficient because

it allows inmates in need of a psychological evaluation to participate before a psychiatrist's assessment of proper housing. The County had no history of suicides relative to the program, so any purported failure to train its employees in suicide risk assessment did not cause White's death.

Hicks v. Scott

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-3410
Opinion Date: May 1, 2020
Judge: Gibbons
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Cincinnati officers Scott and Moore responded to a reported incident of menacing. Two people alleged that Quandavier had driven by their home that night and threatened to kill them and that Quandavier carried guns. Officer Loreaux identified a vehicle fitting the description. Officers Scott, Moore, Schneider, and Loreaux, standing where the vehicle was parked, heard a voice. Thinking that it was likely Quandavier, they knocked on the exterior door of the residence. It swung open. Three officers entered without a warrant or exigent circumstances. Loreaux remained outside. Neither Scott nor Moore recall announcing their presence or identifying themselves. Inside and upstairs, Scott knocked on a closed door. As it opened, Scott "saw the barrel of a rifle pointed at [her] face." Moore and Schneider also saw Quandavier "nonchalantly" panning the rifle from left to right. Moore reached for its barrel as Scott fired her weapon. Moore did not instruct Quandavier to drop his rifle nor did Scott issue any commands before firing. Quandavier collapsed. The officers immediately radioed for paramedics. Before the officers applied handcuffs or provided first aid, they heard another voice and conducted a sweep. Quandavier died at the scene without receiving medical attention. In a suit under 42 U.S.C. 1983 for unlawful entry, excessive force, and deliberate indifference to a serious medical need, plus state claims, the district court granted the defendants summary judgment, citing qualified immunity. The Sixth Circuit reversed in part. The district court erred by granting qualified immunity to Scott, Moore, and Schneider on the unlawful entry claim. The court affirmed as to the excessive force, deliberate indifference, and state-law battery claims, and

remanded for evaluation of municipal liability and wrongful death claims.

Moody v. United States

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5015
Opinion Date: May 6, 2020
Judge: Thapar
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

At Moody's trial, the government produced a video of Moody cooking crack on his stove and waving a handgun while he mused about life in "the game" (drug trafficking). The court ruled that most of the video was admissible. Moody then tried to persuade the jury that the video was filmed more than five years before his indictment, putting it outside the statute of limitations. The jury convicted Moody. Due to prior felony drug convictions, Moody received enhanced, mandatory-minimum life sentences on several counts. He appealed on evidentiary grounds relating to the video. The Sixth Circuit affirmed. Later, Moody raised new claims on collateral review, 28 U.S.C. 2255. The district court found each claim meritless; most were also procedurally defaulted. The court authorized Moody to appeal. The Sixth Circuit dismissed the appeal, stating that none of the claims should have been certified. Reasonable jurists could not doubt that the district court properly denied relief on Moody's claims that he was deprived of his statute-of-limitations defense (violating due process); that the past convictions for his sentencing enhancements were not charged in the indictment or found by the jury; and that his previous lawyers failed to raise the first two claims sooner, violating his right to effective assistance of counsel.

United States v. Foreman

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1827
Opinion Date: May 7, 2020
Judge: Gibbons

Areas of Law: Criminal Law

In 2006, Foreman pled guilty to possession with intent to distribute 50 or more grams of cocaine base, possession with intent to distribute cocaine powder, and possession of a firearm during and in furtherance of a drug trafficking crime. Foreman admitted that he was responsible for approximately 135 grams of crack cocaine and 250 grams of cocaine powder. Foreman had a final Guidelines range of 322-387 months; he was sentenced to 240 months' imprisonment with respect to each drug conviction, to run concurrently, and 60 months' imprisonment for the firearms conviction, to run consecutively. When the First Step Act of 2018 made the Fair Sentencing Act retroactive, Foreman sought relief. The district court held that Foreman was not entitled to a plenary resentencing and declined to revisit his career offender status or hold an in-person hearing, then weighed the new statutory range applicable to Foreman's drug offenses, his recalculated Guidelines range, and the 18 U.S.C. 3553(a) factors, and reduced Foreman's total sentence to 172 months on each drug offense, to run concurrently, plus the mandatory consecutive 60 months on the firearms offense. The Sixth Circuit affirmed. Nothing in the First Step Act entitles a defendant to a plenary resentencing. First Step Act resentencings are not shielded from review for reasonableness; the district court thoroughly explained its rationale, carefully examining Foreman's circumstances, the amended penalty provisions, and the resulting changes to Foreman's Guidelines range.

United States v. Smith

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1724
Opinion Date: May 6, 2020
Judge: Bush
Areas of Law: Criminal Law

In 2006, Smith was convicted of conspiracy to distribute and to possess with intent to distribute 500 grams or more of powder or 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute

500 grams or more of cocaine powder; and being a felon in possession of a firearm. The court imposed a mandatory minimum life sentence. The Fair Sentencing Act subsequently lowered the penalty for cocaine-base offenses, made retroactive through the First Step Act. Smith moved for relief and received a reduced sentence of 360 months, the bottom of the new Guideline range for the counts impacted by the Fair Sentencing Act, to run concurrent to his existing 360-month sentence for his powder cocaine count that was not affected by the Fair Sentencing Act. The Sixth Circuit affirmed, rejecting an argument that the court should have imposed a below-Guideline sentence for all counts. The First Step Act is a limited grant of authority to impose a reduced sentence for certain offenses and does not require a plenary resentencing proceeding. Even assuming the court's obligation to explain its reasons for imposing the modified sentence was akin to that which applies in initial sentencing, the court's use of a modified AO 247 form order to explain its decision was not procedurally unreasonable.

Kirkman v. Thompson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1904
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Following a 1992 fight that involved Johnson, Herron, and Walker, two shooters shot the three men. Johnson survived. In the hospital, Johnson described a shooter by the street name "Duke," where Duke lived, and Duke's car. Johnson identified Duke and his accomplice from a photo array. Police pulled over a vehicle matching Johnson's description and arrested the driver, Kirkman, and the passenger, who matched the general description of the second shooter. Kirkman had a tattoo of Duke on his arm. Police took additional photos and presented a second photo array to Johnson, who identified them as the shooters. At trial, Johnson identified Kirkman and his passenger as the shooters. There was disputed testimony about the cause of the fight. Convicted of murder and aggravated battery with a firearm, Kirkman was sentenced to life in prison. Johnson had a

change of heart and submitted an affidavit, identifying Ford and an unknown man as the shooters. At Kirkman's post-conviction hearing, Johnson testified that he and his family had been threatened. Other testimony was inconsistent with Johnson's. Illinois courts denied post-conviction relief, finding that Johnson's recantation lacked credibility. Johnson later pleaded guilty for perjury but failed to specify which statement was false. The Seventh Circuit affirmed the denial of federal habeas relief. Illinois courts found Johnson's recantation lacked credibility. An evidentiary hearing satisfied Kirkman's due process rights. The Illinois trial court's determination defeated Kirkman's innocence and perjured testimony claims.

Tuduj v. Newbold

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1699
Opinion Date: May 1, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Illinois prisoner Tuduj, having received extensive dental treatment, filed a "deliberate indifference" suit under 42 U.S.C. 1983 against his dentists and prison officials. The court recruited counsel to assist Tuduj in filing an amended complaint that complied with the Federal Rules of Civil Procedure. Counsel defended against two summary judgment motions, one arguing that Tuduj had not exhausted his administrative remedies and another on the merits While the motions were pending, Tuduj moved "for leave to represent himself," stating that he was "concerned that his counsel has filed a structurally, technically and legally insufficient response doomed to be denied." He asked to file his own brief, except "in the event this Honorable Court deems counsel's response … legally sufficient and Grants same[,] Plaintiff would be open to continued effective representation." A magistrate denied Tuduj's motion, stating that Tuduj "varie[d] between saying he would like to" represent himself and "indicating that he is happy with counsel's representation as long as he prevails." The district judge granted the motions for summary judgment, citing professional judgment and finding "no competent evidence" of any policy that unlawfully influenced dental-treatment decisions. The Seventh Circuit rejected Tuduj's argument

that the court wrongly denied his “unqualified” right to proceed pro se under 28 U.S.C. 1654, the due process clause, the equal protection clause, and the Seventh Amendment. The district court permissibly denied his equivocal request.

United States v. Gibson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1402
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Constitutional Law, Criminal Law

Officer Garrison encountered Gibson, a suspected drug trafficker, walking with a companion. Although initially a consensual encounter, Garrison questioned Gibson and his companion and briefly detained Gibson. After Gibson and his companion departed, Garrison spotted a methamphetamine pipe under his patrol vehicle. Local law enforcement conducted a traffic stop of Gibson’s vehicle in the curtilage of his driveway. A drug detection dog signaled the presence of a controlled substance in the vehicle, though nothing was found. Earlier that day, Gibson’s wife had met with DEA agents to tell them about methamphetamine inside the home. Police used information Mrs. Gibson had provided to obtain a search warrant. The search of the home uncovered drugs, drug paraphernalia, currency, and AK-47 rifles, which led to Gibson’s arrest. Gibson moved to suppress all evidence seized during the search, alleging he was detained without reasonable suspicion, unlawfully frisked, arrested without probable cause, stopped without probable cause or reasonable suspicion, and the traffic stop exceeded a permissible scope. Upon learning of his wife’s cooperation, Gibson also argued her statement was insufficiently attenuated to justify the search warrant. The Seventh Circuit affirmed the denial of the motion. Mrs. Gibson’s voluntary statement with DEA agents was independently sufficient to sustain findings of probable cause and sufficiently attenuated from subsequent events to preclude suppression.

United States v. Howell

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3157
Opinion Date: May 4, 2020
Judge: Scudder
Areas of Law: Constitutional Law, Criminal Law

In December 2012, Chicago Police officers responded to an anonymous call reporting a Hispanic man in a black sweater and black hat, carrying a bag, and climbing under a warehouse fence. They found someone who matched the description. After stopping and frisking him, they determined he was not engaged in any crime. Howell, walking toward the police, was white and wearing a black jacket and dark hat. When an officer approached to speak to him, Howell did not answer, looked panicked, and put his hands in his pockets. The officer patted Howell down and found a gun in his jacket. A federal gun charge followed. Howell unsuccessfully moved to suppress the gun. The Seventh Circuit reversed the denial of his suppression motion and vacated his conviction for possessing that gun. The court noted that the facts in the pretrial record differed significantly from those presented at trial, where the arresting officer testified that he decided to proceed with the pat-down only after Howell ignored a directive to remove his hands from his pockets. Viewing the pretrial record as a whole, the police lacked reasonable suspicion to frisk Howell. The court did not reverse Howell's conviction on a second gun charge that resulted from the execution of a warrant to search Howell's apartment three months after the initial stop and the ensuing discovery of more guns and ammunition.

United States v. Lewis

Court: US Court of Appeals for the Seventh Circuit
Dockets: 19-1911, 19-1262
Opinion Date: May 7, 2020
Judge: Joel Martin Flaum
Areas of Law: Criminal Law

In 2016-2018, Draheim managed a conspiracy, responsible for at least 38 packages of methamphetamine sent from California to La Crosse,

Wisconsin. Draheim supervised at least 11 associates who accepted shipments on her behalf, sent money transfers to California, distributed the meth, rented storage lockers, and collected money owed to her. Draheim provided vehicles. After agents placed a wiretap on her phone and seized several packages of meth en route to Draheim, her California supplier forced Draheim to find a new source. Draheim contacted Lewis, recently out of jail but still involved in the "meth scene." Lewis agreed to purchase meth from a new supplier. During the planned transaction, agents seized the package, which contained 28.6 grams of nearly pure meth. Police subsequently arrested Draheim after they found her daughter dead at home from an overdose; they took Lewis into custody for violating the terms of his state supervision. Both pleaded guilty to meth distribution offenses, 21 U.S.C. 841, 846. Draheim, facing a mandatory-minimum 10-year sentence, unsuccessfully argued that she qualified for "safety-valve relief." The court reasoned that she was the leader of her enterprise. Lewis unsuccessfully contended that he should be sentenced based only on his conviction, not other "relevant conduct." The Seventh Circuit affirmed Draheim's sentence but vacated as to Lewis. The fact that the defendant has engaged in other drug transactions is not, alone, sufficient to justify treating those transactions as relevant conduct for sentencing purposes.

Bakor v. Barr

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3011
Opinion Date: May 7, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit denied a petition for review of the BIA's determination that defendant committed two crimes involving moral turpitude. The court held that the BIA did not err in determining that petitioner's conviction for the Minnesota crimes of Criminal Sexual Conduct in the Fifth Degree and knowing failure to comply with Minnesota's sex offender registration statute were crimes involving moral turpitude. The court also held that petitioner failed to exhaust his remaining arguments and therefore declined to consider them.

Smith v. Titus

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2915
Opinion Date: May 5, 2020
Judge: Steven M. Colloton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eighth Circuit affirmed the district court's denial of habeas relief to petitioner based on his claim that the trial court violated his Sixth Amendment right to a public trial when it briefly closed the courtroom to spectators. The district court denied relief based on the ground that the Minnesota Supreme Court's decision was neither contrary to, nor an unreasonable application of, clearly established federal law. The court agreed and held that it was not objectively unreasonable for the Minnesota Supreme Court to deem it constitutional under the Sixth Amendment for the trial court to explain the parameters of an earlier public order on evidentiary issues in a brief nonpublic proceeding before the jury was sworn.

United States v. Becerra

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2777
Opinion Date: May 7, 2020
Judge: Stras
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm and ammunition. The court held that there was more than enough evidence for defendant's probation officer and other officers to believe defendant had a firearm on him. Therefore, the officers had probable cause to arrest him without a warrant. The court also held that defendant was in custody when he made both statements at issue. In this case, the "request for clarification" of defendant's statement that he had "something" in his car did not require Miranda warnings. Furthermore,

because the bulge in defendant's pocket could have been a gun or other weapon that would have posed a danger to the officers and others, they could ask about it without the formality of Miranda warnings. The court joined its sister circuits in declining to recognize the innocent-possessor defense. The court held that the district court did not err in excluding defendant's proposed testimony that he had found the handgun in his car earlier in the day and was about to hand it over to his probation officer. The court reasoned that, even if defendant intended to turn over the gun (or the ammunition) to his probation officer, it is still a crime to knowingly possess it in the first place. Finally, the court held that the district court did not err in denying defendant a sentencing reduction for acceptance of responsibility; the district court considered defendant's mitigation arguments at sentencing; and the district court did not abuse its discretion by imposing a within-Guidelines sentence.

United States v. Haynes

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1607
Opinion Date: May 5, 2020
Judge: Raymond W. Gruender
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that the government did not violate the Speedy Trial Act, and defendant failed to offer any evidence showing that Iowa and federal prosecutors colluded. Furthermore, the district court did not abuse its discretion by failing to hold an evidentiary hearing regarding the existence of collusion. The court also held that the district court did not err in denying the motion to suppress where defendant was not unlawfully seized. In this case, prior to producing the marijuana cigarette, the officer did not ask defendant any questions but merely ordered him off the bus, particularly as the smell of marijuana alerted the officer that evidence of a more serious crime than failure to use a turn signal might be uncovered during the stop. Finally, the court held that defendant was not unlawfully searched when the officer conducted a pat-down search incident to arrest; the evidence was sufficient to support defendant's conviction;

defendant's Rehaif claim failed because there was sufficient evidence that he knew of his prohibited status; and defendant's sentence was not substantively unreasonable nor an abuse of the district court's discretion.

United States v. Roberts

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1176
Opinion Date: May 1, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law

The Eighth Circuit vacated defendant's sentence imposed after he pleaded guilty to unlawful possession of a firearm as a previously convicted felon. The court held that, although the district court properly applied a four-level increase for possession of a firearm "in connection with another felony offense" under USSG 2K2.1(b)(6)(B), but that a two-level increase for "using a minor to commit a crime" under USSG 3B1.4 should not have applied. In this case, the evidence showed only that defendant engaged in an arm's-length transaction with a minor. The court held that this mere joint participation in an offense as a partner, does not amount to "use" of a minor "to commit the offense" of unlawful possession of a firearm by a felon. Accordingly, the court remanded for resentencing.

United States v. Wright

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1081
Opinion Date: May 5, 2020
Judge: Erickson
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's restitution order and certain special conditions of defendant's supervised release imposed after he pleaded guilty to sex trafficking of a child. The court found no error in the district court's restitution amount of $20,000, holding that the evidence

supported the amount in light of the aggregate harm to the victim. The court also held that the special conditions -- including a requirement that defendant participate in sex offender treatment including psychological testing and polygraph examinations, a prohibition against contact with any minors without pre-approval, and a requirement that defendant seek prior approval before using temporary commercial lodging, such as a hotel or motel -- where reasonably related to both the offense of conviction and to defendant's history of sexual contact with minor females.

Benson v. Chappell

Court: US Court of Appeals for the Ninth Circuit
Docket: 13-99004
Opinion Date: May 1, 2020
Judge: Consuelo Maria Callahan
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's denial of petitioner's habeas corpus petition challenging his California conviction and death sentence for murder and other crimes. Petitioner raised two certified claims and two uncertified claims. The panel held that petitioner failed to show that the California Supreme Court's denials of his claims were unreasonable determinations of the facts or contrary to clearly established federal law. In this case, the California Supreme Court reasonably determined that an officer's misstatement during petitioner's interrogation that there was no death penalty in California did not prompt petitioner's confessions. Furthermore, petitioner failed to show that his statements were not knowing, voluntary, and intelligent. Even if petitioner were able to show that trial counsel was ineffective in not fully investigating his abuse as a child or his alleged organic brain injury, the panel held that the state court could reasonably have determined that any shortcoming in trial counsel's investigation was not prejudicial. Finally, the panel granted a certificate of appealability on petitioner's two uncertified claims and held that the state court reasonably rejected the claims that his trial counsel should have impeached the government's case and the prosecutor withheld material, exculpatory evidence.

Mero v. Barr

Court: US Court of Appeals for the Ninth Circuit
Docket: 17-70929
Opinion Date: May 1, 2020
Judge: Paul Jeffrey Watford
Areas of Law: Criminal Law, Immigration Law

The Ninth Circuit granted in part a petition for review of the BIA's finding that petitioner was removable based on his conviction for possession of visual presentation depicting sexual conduct of a person under 16 years of age, in violation of Nevada Revised Statutes (N.R.S.) 200.730. Applying the categorical approach, the panel compared the elements of N.R.S. 200.730 with the applicable definition of "sexual abuse of a minor," which requires proof of three elements. The panel held that N.R.S. 200.730 punishes a broader range of conduct because the Nevada statute does not require proof that the offender participated in sexual conduct with a minor. Therefore, petitioner's conviction did not qualify as sexual abuse of a minor. The panel explained that, with a possession-only offense such as N.R.S. 200.730, the minor depicted in the image is not the direct object of the offender's conduct, which is a necessary predicate for the offense to qualify as sexual abuse of a minor.

United States v. Yang

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10341
Opinion Date: May 4, 2020
Judge: Piersol
Areas of Law: Criminal Law

The Ninth Circuit affirmed the district court's denial of defendant's motion to suppress after he pleaded guilty to receipt of stolen mail and being a prohibited person in possession of a firearm. Defendant moved to suppress the evidence seized from his residence and the statements he made to law enforcement on the basis that the search warrant obtained by the Postal Inspection Service relied on evidence that was obtained illegally. The panel declined to address the potential Fourth Amendment privacy interests that may be implicated by the warrantless use of this Automatic License Plate Recognition (ALPR) technology, and held that defendant does not have a reasonable expectation of privacy in the historical location data of the Yukon under the facts of this case. The panel found no evidence in the record that Prestige Motors had a policy or practice of allowing lessees to keep cars beyond the rental period and Prestige had made affirmative attempts to repossess the vehicle by activating the GPS unit to locate and disable the vehicle. Therefore, defendant lacked standing to challenge the warrantless search of the database.

United States v. Neugin

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-7043
Opinion Date: May 1, 2020
Judge: Scott Milne Matheson, Jr.
Areas of Law: Constitutional Law, Criminal Law

Jack Neugin pled guilty to being a felon in possession of a firearm and ammunition on the condition that he could appeal the district court's denial of his motion to suppress evidence of the ammunition and firearm police found in the bed of his pickup truck. Officers responded to a reported verbal altercation between Neugin and his girlfriend. One of the officers saw ammunition in the back of the truck after he lifted the truck's camper lit do allow the girlfriend to retrieve her belongings. Neugin argued the officers discovered the evidence during an unconstitutional search; the district court concluded the officer was acting "in a lawful position" as "community caretaker," and found no Fourth Amendment violation. The Tenth Circuit reversed, finding that : (1) the officer conducted the without a warrant or probable cause, (2) the community caretaking exception to the warrant requirement does not apply, and (3) the inevitable discovery exception to the exclusionary rule does not apply. The evidence seized should have been suppressed.

United States v. Ramon

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-1221
Opinion Date: May 1, 2020
Judge: Gregory Alan Phillips
Areas of Law: Constitutional Law, Criminal Law

In 2016, after serving a federal prison sentence for having possessed a firearm after a felony conviction, Charles Ramon III began serving a mandatory term of supervised release. Before Ramon completed the term, his probation officer filed a petition, soon followed by two superseding petitions, to revoke Ramon's supervised release. At the revocation hearing, the district court found three violations—two for possessing a controlled substance and one for again illegally possessing a firearm. Of these, the most serious was Ramon's illegal possession of a firearm—a Grade B violation. For this, the court imposed the statutory maximum sentence of twenty-four months in prison. During the revocation hearing, the government mentioned that it might seek to indict Ramon for illegally possessing a firearm (the conduct in part underlying the revocation). Mindful of this, the district court ordered that Ramon's twenty-four-month sentence run

"consecutively to any sentences imposed previously or prospectively in federal or state court." At the hearing, Ramon did not object to the district court's running his sentence consecutively to future federal sentences. On appeal, Ramon argued that the district court exceeded its sentencing authority under 18 U.S.C. 3584(a) by ordering that Ramon's sentence run consecutively to future federal sentences. By the terms of 18 U.S.C. 3584(a), the Tenth Circuit determined the district court did err. But Ramon failed to object to this at trial, and on appeal, failed to show that the error was plain, thus, judgment was affirmed.

United States v. Richards

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-8044
Opinion Date: May 6, 2020
Judge: Baldock
Areas of Law: Constitutional Law, Criminal Law

In 2018, the Wyoming Division of Criminal Investigation (DCI) obtained a search warrant to review the contents of Defendant–Appellant Joshua Richards' Tumblr account. During the search and subsequent investigation, DCI agents discovered Defendant had re-blogged videos and images of child pornography to his private Tumblr so he could later access and view the materials. Defendant ultimately pleaded guilty to one count of accessing with intent to view child pornography. He was sentenced to twenty-four months' imprisonment followed by five years of supervised release. The district court imposed several special conditions of supervised release, which, as relevant here, related to drugs and alcohol and required Defendant to submit to polygraph testing. On appeal, Defendant argued the district court erred in imposing these special conditions. He also challenged the length of his prison sentence as substantively unreasonable. The Tenth Circuit determined the alcohol and drug conditions did not directly conflict with the relevant policy statement in the sentencing guidelines, so the district court's decision to impose the conditions was not manifestly unreasonable. And given the circumstances of the case, the Court determined the trial court did not abuse its discretion in imposing Defendant's twenty-four month sentence.

Andrews v. Warden

Court: US Court of Appeals for the Eleventh Circuit
Docket: 19-12443
Opinion Date: May 5, 2020
Judge: William Holcombe Pryor, Jr.
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of habeas relief under 28 U.S.C. 2241. Plaintiff alleged that President Obama commuted his "total sentence" of imprisonment, which included the 37 months of imprisonment that he served as part of his 2003 sentence. Based on the terms of the commutation order, the Constitution, and Supreme Court precedent, the court could not say that the Bureau erred in excluding the 37-month term of imprisonment from its recalculation.

Hollis v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 19-11323
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's motion to vacate his sentence under 28 U.S.C. 2255. The court held that petitioner cannot prove that his counsel rendered ineffective assistance, because petitioner's prior convictions in Alabama categorically qualify as predicate offenses under both the Armed Career Criminal Act and the career-offender provision of the Guidelines, and his prior conviction in Georgia qualifies as a predicate offense under the Act. Therefore, counsel did not perform deficiently by failing to raise a meritless objection.

Knight v. Florida Department of Corrections

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-12488
Opinion Date: May 1, 2020
Judge: Newsom
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eleventh Circuit affirmed the district court's denial of a 28 U.S.C. 2254 petition for habeas relief. Petitioner alleged that his counsel rendered ineffective assistance under Strickland v. Washington, 466 U.S. 668 (1984), by failing to adequately investigate and present mitigating evidence during the sentencing phase of his capital-murder trial. The court held that, even assuming that counsel performed deficiently in failing to investigate and present the mitigation evidence that petitioner now raises—thus satisfying the first prong of the two-part Strickland standard that governs ineffective-assistance claims—petitioner failed to carry his burden of demonstrating resulting prejudice.

United States v. Evans

Court: US Court of Appeals for the Eleventh Circuit
Docket: 17-15323
Opinion Date: May 6, 2020
Judge: Grant
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that, given the totality of the circumstances, it was reasonable for officers, mistaking a dog's whimper for a person in distress, to enter defendant's home without a warrant. Therefore, defendant's challenge to the district court's denial of his motion to suppress evidence failed. The court upheld the district court's imposition of a 22 offense level finding because defendant possessed a semiautomatic firearm capable of accepting a large capacity magazine under USSG 2K2.1(a)(3)(A)(i) (2016). The court also upheld defendant's sentencing enhancement under USSG 2K2.1(b)(4)(B) for possessing a rifle that had an

obliterated serial number.

United States v. McLellan

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-13289
Opinion Date: May 6, 2020
Judge: Boggs
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm. The court held that the district court did not abuse its discretion in permitting one of his arresting officers to offer testimony at trial on the correlation between guns and drug activity and to suggest that defendant was selling drugs; the court declined to evaluate the applicability of the Armed Career Criminal Act (ACCA), because the district court would have imposed the same sentence regardless of whether the mandatory minimum applied; and the court rejected defendant's claim under Rehaif v. United States, 139 S. Ct. 2191 (2019), and held that there was no plain error in the district court's failure to instruct the jury of the knowledge-of-status element and any error from the lack of a knowledge-of-status element in defendant's plea colloquy did not affect his substantial rights. Finally, the court remanded for clarification of the judgment to reflect the sentence the district court said it would have imposed if the Armed Career Criminal Act did not apply.

United States v. Russell

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-11202
Opinion Date: May 4, 2020
Judge: Charles R. Wilson
Areas of Law: Criminal Law

Defendant was convicted of possessing a firearm and ammunition as an immigrant illegally or unlawfully in the United States. After defendant

appealed his conviction and sentence, the Supreme Court issued its decision in Rehaif v. United States, 588 U.S. ___, 139 S. Ct. 2191 (2019), which reversed a decision from this court and held that under 18 U.S.C. 922(g), the government must prove that a defendant knew "his status as a person barred from possessing a firearm" when he knowingly possessed a firearm. The Eleventh Circuit held that defendant established the necessary prejudice under plain error review and vacated defendant's section 922(g) conviction, remanding for further proceedings. In this case, the district court committed an error that was made plain by the Supreme Court in Rehaif. Furthermore, defendant has sufficiently shown a reasonable probability that but for the error, the outcome of his trial would have been different.

Welch v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 14-15733
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's 28 U.S.C. 2255 motion to vacate his sentence. The court held that defendant's prior 1996 Florida convictions for robbery qualified as violent felonies under the Armed Career Criminal Act's (ACCA) elements clause, and rejected his contention that the court's decision in his direct appeal carved out a narrow exception to pre-1997 Florida robbery convictions obtained in Florida's Fourth District Court of Appeal. The court also held that petitioner's prior Florida felony battery conviction was a violent felony under the ACCA in light of the court's holding in United States v. Vail-Bailon, 868 F.3d 1293 (11th Cir. 2017) (en banc), cert. denied, 138 S. Ct. 2620 (2018).

State v. Trujillo

Court: Arizona Supreme Court
Docket: CR-18-0531-PR

Opinion Date: May 4, 2020
Judge: Gould
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court held that, for purposes of imposing mandatory sex offender registration under Ariz. Rev. Stat. 13-3821(A)(3), a judge has the authority to make the necessary factual finding that the victim is under the age of eighteen and that Arizona's sex offender registration statutes are civil regulatory statutes, not criminal penalties. Defendant was convicted by a jury of one count of sexual abuse. In reaching its verdict the jury determined that the victim was "fifteen or more years of age." At sentencing, the trial court ordered Defendant to register as a sex offender. Defendant objected, arguing that, pursuant to Apprendi v. New Jersey, 530 U.S. 466 (2000), a jury was required to find whether Defendant was under eighteen pursuant to section 13-3821(A)(3). The trial court denied the objection. The court of appeals affirmed. The Supreme Court affirmed, holding (1) Apprendi does not apply to factual findings that are necessary to impose registration because sex offender registration is a civil regulatory requirement, not a criminal penalty; and (2) the trial judge did not violate Apprendi by determining that the victim was under eighteen.

Mason v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 182
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court dismissing Appellant's pro se petition for writ of habeas corpus, holding that Appellant stated no ground on which the writ could issue. Appellant was convicted of aggravated robbery, theft of property, and second-degree battery and sentenced as a habitual offender to an aggregate term of 660 months' imprisonment. The court of appeals affirmed. Appellant later petitioned for writ of habeas corpus, asserting that the trial court misapplied Arkansas's habitual-offender statutes. The circuit court dismissed the petition. The Supreme Court affirmed, holding that the issues Appellant raised in his petition for the writ should have been raised at trial, on direct appeal, or in a petition for postconviction relief.

Walker v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 183
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for declaratory judgment, holding that Appellant could not use a declaratory-judgment action to collaterally attack his criminal conviction. Appellant was convicted of first-degree murder and second-degree unlawful discharge of a firearm from a vehicle. The court of appeals affirmed. Years later, Appellant filed a petition for declaratory judgment alleging that he was denied due process in his criminal trial when the court admitted the prior testimony of an unavailable witness and that this admission violated the Confrontation Clause. The circuit court denied the petition. The Supreme Court affirmed, holding that a declaratory judgment action provided no relief on these grounds.

Specifically, the Supreme Court held (1) no error occurred during jury selection; (2) Defendant was not prejudiced by any misstatements by the prosecutor; (3) assuming certain evidence was inadmissible, the court's admonition to the jury and the court's instruction cured the resultant harm; (4) the trial court erred in admitting testimony that the victim was afraid of Defendant, but the error was harmless; and (5) Defendant's remaining allegations of error were without merit.

California v. Law

Court: California Courts of Appeal
Docket: E072845(Fourth Appellate District)
Opinion Date: May 5, 2020
Judge: Slough
Areas of Law: Constitutional Law, Criminal Law

In 2001, appellant Terrell Law and his codefendant Brett May committed a home invasion robbery, during which one of them shot and killed one of the residents. They were tried jointly in 2006 before two separately empaneled juries who found them both guilty of first degree felony murder with the special circumstance described in Penal Code section 190.2(a)(17(A) and (d). Though Law's jury found he was not the shooter, they nonetheless concluded he was a "major participant" in the underlying robbery and acted "with reckless indifference to human life." In 2018, the Legislature enacted Senate Bill No. 1437 (2017-2018 Reg. Sess.) which, among other things, amended the definition of felony murder in Penal Code section 189. The legislation also added Penal Code section 1170.95, which established a procedure for vacating murder convictions predating the amendment that could not be sustained under the new definition of felony murder. Law challenged the trial court's summary denial of his section 1170.95 petition to vacate his murder conviction, arguing the trial court erred by reviewing his record of conviction and determining the jury's true finding on the special circumstance rendered him ineligible for relief. The Court of Appeal concluded it was proper for a trial court to review the record of conviction when determining whether a section 1170.95 petitioner had stated a prima

facie claim for relief. Additionally, the Court concluded Law "undoubtedly qualifies" as a major participant who acted with reckless indifference to human life, a conclusion that rendered him ineligible for relief under section 1170.95. The Court therefore affirmed the order denying his petition.

California v. Sanchez

Court: California Courts of Appeal
Docket: E072647(Fourth Appellate District)
Opinion Date: May 7, 2020
Judge: Menetrez
Areas of Law: Constitutional Law, Criminal Law

Victor Sanchez was charged with first degree murder, but pled guilty to voluntary manslaughter. He filed a petition under Penal Code section 1170.95 to vacate that conviction. The trial court denied the petition, concluding that Sanchez was ineligible for relief because he was not convicted of murder. After review, the Court of Appeal joined other courts that held section 1170.95 did not apply to defendants convicted of voluntary manslaughter. The Court also rejected Sanchez's argument that section 1170.95 violated equal protection.

Galeotti v. International Union of Operating Engineers

Court: California Courts of Appeal
Docket: A157785(First Appellate District)
Opinion Date: May 6, 2020
Judge: Henry E. Needham, Jr.
Areas of Law: Criminal Law, Labor & Employment Law, White Collar Crime

Galeotti, a former Union Local 3 employee, filed a complaint against Local 3 and three of individual union leaders, alleging that the individual defendants required union employees to pay them money to keep their jobs, lied about the reason for collecting the money, and caused Local 3 to terminate Galeotti's employment when he failed to pay the full amount demanded. The trial court dismissed his second amended complaint without leave to amend.

The court of appeal reversed in part, reasoning that a threat to terminate employment can provide a basis for an extortion claim and that the allegations of the second amended complaint stated a cause of action for wrongful termination in violation of the public policy underlying the extortion statutes. The complaint stated a cause of action for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO; 18 U.S.C. 1961), based on the predicate acts of extortion, but did not state a cause of action for interference with prospective economic advantage.

In re I.A.

Court: California Courts of Appeal
Docket: B296549(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Tangeman
Areas of Law: Criminal Law, Juvenile Law

Where a juvenile court vacates its true finding on a generic murder allegation and redesignates it as a finding on an uncharged target offense, and does so before a minor has had the opportunity to contest the court's findings or orders, the minor may challenge the sufficiency of the evidence of the redesignated offense on appeal. The Court of Appeal held that there was insufficient evidence to support the juvenile court's decision sustaining the allegations that I.A. possessed a concealable firearm and committed vandalism. Therefore, the court reversed the juvenile court's findings, vacating the jurisdiction and disposition order and dismissing the Welfare and Institutions Code section 602 petition.

People v. Edwards

Court: California Courts of Appeal
Docket: A158055(First Appellate District)
Opinion Date: May 1, 2020
Judge: Petrou
Areas of Law: Criminal Law

In 2006, Edwards fired an assault weapon into an apartment, killing the victim. Edwards pled guilty to possession of a firearm as a felon and was convicted of second-degree murder and shooting into an inhabited dwelling. Following the enactment of Senate Bill 1437, Edwards filed a Penal Code 1170.95 resentencing petition, checking form boxes indicating that he was convicted under a theory of felony murder or murder under the natural and probable consequences doctrine and that he could not now be convicted of 1st or 2nd-degree murder because of changes to Penal Code 188 and 189. Edwards submitted the jury instructions and the transcript of the prosecutor's closing remarks that Edwards acted with "both express malice, specific intent to kill, as well as implied malice," described as "an intentional act, the natural consequences of which are dangerous to human life, and at the time that the individual acted, they knew of the danger, and they deliberately acted with conscious disregard." The court denied the petition, finding that Edwards was convicted on a valid theory of murder that survived the statutory changes. The court of appeal affirmed. The superior court did not err in considering the record of conviction. Edwards could not meet the statutory prerequisites for even filing a section 1170.95 petition because he was not charged or convicted of second-degree felony murder or murder under the natural or probable consequences doctrine directed at accomplice liability.

Read Opinion Are you a lawyer? **Annotate this case**.

People v. Thomkins

Court: California Courts of Appeal
Docket: A141375(First Appellate District)
Opinion Date: May 1, 2020
Judge: Streeter
Areas of Law: Criminal Law

On Easter night in 2011, gunfire erupted at an Oakland bar-restaurant, leaving two people dead and five wounded. Thompkins and Fox were convicted of two counts of first-degree murder for the benefit of a criminal street gang, with firearm discharge enhancements, a multiple-murder special circumstance, and five counts of attempted murder with great bodily injury findings, gang enhancements, and firearm discharge enhancements.

Thompkins was convicted as the shooter and Fox as an accomplice. Both were sentenced to life in prison without possibility of parole, plus 224 years to life. After Thompkins was sentenced, Fox stated under oath he was the actual shooter and Thompkins knew nothing about Fox's intentions. Thompkins claimed this new testimony, and his attorney's incompetent reaction entitled him to a new trial and submitted a declaration by another gang member who was present that night. The court of appeal concluded that Thompkins's attorney was not ineffective for failing to bring a motion to recall the sentence followed by a new trial motion because Thompkins failed to show prejudice. The attempted murder convictions and related enhancements must be reversed for both defendants based on the flawed kill zone instruction. Introducing evidence that defendants admitted their gang affiliation at jail intake violated the defendants' privilege against self-incrimination but was harmless. There was some evidentiary error that was harmless due to the wealth of admissible evidence establishing the gang enhancements. Arguments based on the statutory amendments to Penal Code 188 and 189 must be raised in the trial court (section 1170.95). The case must be remanded so the judge may exercise his discretion whether to impose or strike the firearm enhancements on under Penal Code 12022.53.

People v. Torres

Court: California Courts of Appeal
Docket: B295043(Second Appellate District)
Opinion Date: May 4, 2020

Areas of Law: Criminal Law

After the trial court admitted a witness's former testimony, the Court of Appeal applied People v. Roldan (2012) 205 Cal.App.4th 969, 975–985, and reversed. Roldan held that, before invoking the former testimony exception, prosecutors should react appropriately to the impending deportation risk by following four steps: alert the defense to the risk; videotape the preliminary hearing testimony; use judicial measures to try to delay deportation; and consider an array of other specific measures. In this case, the prosecution conceded that prosecutors were simply unaware of Roldan and did not comply with it. The court held that Roldan controls the court's analysis

because the facts about prosecutorial diligence are weaker here than they were in Roldan, where the appellate court held for the defense. In this case, the record before deportation is of prosecutorial inaction where the prosecution's brief in this court admits the investigating officer did not do anything to ensure that the witness would not be deported, nor is there other evidence of prosecutorial efforts to delay the witness's departure or to videotape his testimony at the preliminary hearing.

Colorado In Interest of G.S.S.

Court: Colorado Supreme Court
Citation: 2020 CO 32
Opinion Date: May 4, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law, Juvenile Law

After being charged, fourteen-year-old G.S.S. was detained for more than three months without bail, even though he had not entered a plea and had not been tried on the charges against him. At that point, G.S.S.'s counsel filed a motion to dismiss, arguing that G.S.S.'s "right to a speedy trial" had been violated under section 19-2-509(4)(b), C.R.S. (2019). The trial court

agreed and dismissed the case against G.S.S. with prejudice, and the court of appeals affirmed in Colorado in Interest of G.S.S., 2019 COA 4M, __ P.3d __. The Colorado Supreme Court then granted certiorari to determine the proper remedy for a violation of the sixty-day limit in section 19-2-509(4)(b). The Supreme Court determined the remedy for a section 19-2-509(4)(b) violation was for the trial court to immediately hold a bail hearing and order the juvenile's release. Accordingly, the judgment of the court of appeals was reversed.

Barringer v. Halkitis

Court: Florida Supreme Court
Docket: SC19-1071
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court held that Jay Barringer's quo warranto petition filed in this case was a frivolous proceeding brought before the Supreme Court by a state prisoner and sanctioned Barringer by barring him from filing any further pro se requests for relief related to his criminal case. Barringer was convicted of one count of attempted sexual battery of a victim less than twelve years old and sentenced to twenty-five-years' imprisonment. In 2011, Barringer began filing petitions in the Supreme Court. The Court did not grant the relief sought in any of Barringer's filings. In the instant quo warranto petition Barringer challenged his conviction on the ground that the information was defective, a claim Barringer previously raised by way of a habeas petition. The Supreme Court denied the petition and found that Barringer abused the Court's limited judicial resources. The Court sanctioned Barringer by directing the Clerk of Court to reject any future pleadings or other requests for relief submitted by Barringer that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Franqui v. State

Court: Florida Supreme Court
Docket: SC19-203
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's claim of intellectual disability, raised in successive motions for postconviction relief under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying relief. Appellant was convicted of first-degree murder and sentenced to death in two separate cases. After the United States Supreme Court decided Hall v. Florida, 572 U.S. 701 (2014), Appellant filed successive motions for postconviction relief in both of his capital cases, asserting that the circuit court's denials of his previous claims of intellectual disability were based on the court's improper interpretation of Florida's intellectual disability statute. The circuit court summarily denied the motions. The Supreme Court reversed and remanded for an evidentiary hearing on the issue of intellectual disability. After a hearing, the circuit court denied the claim. The Supreme Court affirmed, holding (1) the circuit court did not err in denying Appellant's intellectual disability claim; and (2) Appellant was not entitled to relief under Hurst v. Florida, 136 S. Ct. 616 (2016), or Hurst v. State, 202 So. 3d 40 (Fla. 2016).

Hicks v. State

Court: Florida Supreme Court
Docket: SC19-1978
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied the instant mandamus petition filed by Hicks and sanctioned Hicks by barring him from filing any further pro se requests for relief related to his criminal case. Hicks was convicted of one count of lewd and lascivious conduct by a person over eighteen years of age on a victim under sixteen years of age. Since 2016, Hicks filed thirteen pro se requests for relief in the Supreme Court related to his criminal case. The

Court did not grant the relief sought in any of Hicks' filings. In the instant petition, Hicks sought a writ of mandamus compelling the circuit court to comply with the requirements of Fla. R. Crim. P. 3.850 by filing a copy of an order denying his second postconviction motion with the clerk of court. The Supreme Court dismissed the petition and found that Hicks abused this Court's limited judicial resources. The Court directed the Clerk of Court to reject any future pleadings or other requests for relief submitted by Hicks that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Burley v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0356
Opinion Date: May 4, 2020
Judge: Boggs
Areas of Law: Constitutional Law, Criminal Law

In 1992, Douglas Burley pled guilty to malice murder. He moved for an out-of-time appeal in 2019, claiming that his right to appeal was frustrated by his plea counsel's erroneous advice that he could not appeal his conviction because it was the product of a guilty plea. The trial court denied Burley's motion. After review, the Georgia Supreme Court vacated the trial court's judgment and remanded the case with direction to hold a hearing to determine whether ineffective assistance of counsel frustrated Burley's right to appeal.

Carter v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0022
Opinion Date: May 4, 2020
Judge: David E. Nahmias
Areas of Law: Construction Law, Criminal Law

Brandon Carter was convicted by jury of malice murder and two firearm offenses in connection with the shooting death of Terrance Baker. On appeal, Carter contended the trial court erred by admitting certain hearsay statements into evidence and by violating his constitutional right to be present during his trial. Finding no reversible error, the Georgia Supreme Court affirmed conviction.

Clarke v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0258
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Rupert Clark was convicted by jury for the malice murder of his wife, Rosemarie Lebert-Clark. He was also convicted of possession of a firearm during the commission of a felony. On appeal, he argued he received ineffective assistance of trial counsel, and that the trial court erred in admitting certain evidence, violated the continuing witness rule by sending out with the deliberating jury printouts of text messages, and by failing to instruct the jury that a defendant's uncorroborated confession was not alone sufficient to warrant a conviction. Finding no reversible error after reviewing the trial court record, the Georgia Supreme Court affirmed conviction.

Collins v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0195
Opinion Date: May 4, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Renita Collins was tried for murder along with co-defendant Michael Stallworth. Collins appealed her convictions for murder and possession of a firearm while in commission of a felony in connection with the shooting

death of Keith Jacobs. On appeal. Collins contended she was denied a fair trial due to juror misconduct, the trial court abused its discretion by not allowing her to subpoena juror testimony to show that misconduct had occurred, and the trial court abused its discretion when it failed to excuse a prospective juror for cause. Finding no reversible error, the Georgia Supreme Court affirmed conviction.

Dawson v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0217
Opinion Date: May 4, 2020
Judge: Warren
Areas of Law: Constitutional Law, Criminal Law

Lavaris Dawson was convicted by jury of felony murder and other crimes in connection with the shooting death of Mamadou Camara. On appeal, Dawson challenged the sufficiency of the evidence supporting his convictions, and argued the trial court erred in admitting Dawson's statements to a detective during an interview because those statements were impermissibly induced by a hope of benefit, and that Dawson was denied his due process right to a timely appeal. After review, the Georgia Supreme Court disagreed and affirmed Dawson's convictions.

Evans v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0007
Opinion Date: May 4, 2020
Judge: McMillan
Areas of Law: Constitutional Law, Criminal Law

Jimmy Evans was convicted by jury for murder and other crimes relating to the 2006 deaths of Tavoris Calhoun and Dezmon Thomas. On appeal, Evans argued that because he was visibly intoxicated at the time he made statements to law enforcement and consented to a search of his home and

person, the statements and consent were involuntarily given and the trial court should have granted his motion for new trial on this ground. Furthermore, Evans argued that his trial counsel was ineffective for failing to file a motion to suppress at trial on the same basis. Because Evans failed to show error or ineffective assistance of counsel, the Georgia Supreme Court affirmed his conviction.

Hill v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0285
Opinion Date: May 4, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Esco Hill was convicted by jury of malice murder and other crimes relating to the stabbing death of Alford Morris in 2014. On appeal, Hill argued the trial court committed reversible error by requiring him to be visibly shackled for the duration of his six-day trial. After review of the trial court record, the Georgia Supreme Court concurred this was reversible error, consequently, reversed judgment of conviction. Because the Court concluded the evidence at trial was sufficient to sustain Hill's conviction, the State could re-try him. The Court did not address Hill's remaining enumerations of error, "as they are not likely to recur in the event of a retrial."

Whitehead v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0171
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Javis Whitehead was convicted by jury of murder and other crimes in connection with the shooting death of Dominique Larry. On appeal, Whitehead challenged the sufficiency of the evidence presented to rebut his claim of self-defense and to convict him for murder beyond a reasonable doubt. He also argued the trial court erred in denying his motion to suppress his custodial statement, and in refusing to excuse for cause the District Attorney from the panel of prospective jurors prior to the conclusion of voir dire. Finding no merit to these contentions, the Georgia Supreme Court affirmed conviction.

Read Opinion Are you a lawyer? **Annotate this case**.

Idaho v. Blythe

Court: Idaho Supreme Court - Criminal
Docket: 46992
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Nicholas Blythe appealed after he was convicted of possessing a controlled substance. He conditionally pled guilty, reserving the right to challenge his sentence. On appeal, he argued the district court erred in denying his motion to suppress certain evidence found because the evidence presented at trial was found in violation of Blythe's Fourth Amendment rights. After review, the Idaho Supreme Court determined the search at issue took place before an arrest occurred, and because no rationale justifying a search incident to arrest was sufficiently present here, the search of Blythe's shoes was not a valid search incident to arrest. Therefore, the district court erred in holding that the search was reasonable under the Fourth Amendment. Blythe's conviction was vacated, the district court order denying Blythe's motion to suppress was reversed, and the matter remanded for further proceedings.

Idaho v. Glodowski

Court: Idaho Supreme Court - Criminal
Docket: 47131
Opinion Date: May 6, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

David Glodowski appealed after he was convicted for failing to update his sex-offender registration in violation of Idaho Code section 18-8309. He argued the district court erred by ruling that his prior conviction under a Wisconsin statute was "substantially equivalent" to Idaho statutes that required sex-offender registration in Idaho. After review, the Idaho Supreme Court determined the district court improperly allowed the State to seek a

redetermination of the “substantially equivalent” element given that the Idaho Bureau of Criminal Identification made a final determination on that element. However, because the State put forth sufficient evidence to prove that element, and the district court’s jury instruction accomplished the same purpose, the Supreme Court concluded the error was harmless. Accordingly, the Court found no reversible error in the district court’s decision to grant the State’s motion and provide the jury instruction. Therefore, judgment of conviction was affirmed.

State v. Gordon

Court: Iowa Supreme Court
Docket: 18-1099
Opinion Date: May 1, 2020
Judge: Brent R. Appel
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for assault on a peace officer with a dangerous weapon, a felony, and several misdemeanors, holding that Defendant did not receive ineffective assistance of counsel. After Defendant pleaded guilty, he absconded. He was later returned to

custody. On appeal, Defendant argued that he received ineffective assistance of counsel because the plea bargain contained an unlawful term. Specifically, Defendant argued that the plea bargain's provision that he would be released from jail for a forty-eight-hour furlough after pleading guilty was illegal and that his trial counsel committed ineffective assistance in obtaining the illegal benefit for him. The Supreme Court affirmed, holding that where Defendant entered into the plea agreement with the illegally lenient sentence, he could not benefit from that sentence and then attack the plea bargain.

State v. Craig

Court: Kansas Supreme Court
Docket: 119660
Opinion Date: May 1, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction and sentence for first-degree felony murder, holding that there was no error in the proceedings below. A jury found Defendant guilty of both first-degree felony murder and second-degree intentional murder. At sentencing, Defendant moved for a new trial and judgment notwithstanding the verdict, arguing that the jury must have had reasonable doubt on the first-degree felony murder theory because it convicted him of second-degree murder for the same killing. The district court dismissed the second-degree murder conviction and sentenced Defendant for the felony murder over his objection. The Supreme Court affirmed, holding (1) the district court did not err when it sentenced Defendant on felony murder instead of declaring a mistrial because Defendant did not establish that the jury failed to find each element of the felony murder beyond a reasonable doubt or that the jury's first- and second-degree murder verdicts were so irreconcilable as to require a new trial; and (2) the district court did not err in declining to give an instruction on voluntary intoxication.

State v. Lemmie

Court: Kansas Supreme Court
Docket: 119439
Opinion Date: May 1, 2020
Judge: Carol A. Beier
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions of first-degree felony murder, aggravated robbery, conspiracy to commit aggravated robbery, criminal possession of a firearm, fleeing and eluding, and interference with law enforcement, holding that Defendant's arguments on appeal failed. Specifically, the Supreme Court held (1) any possible violation of Defendant's Fifth Amendment right in the admission of a witness's testimony about Defendant giving the witness phone passcodes was undoubtedly harmless; (2) the district court did not err by admitting hearsay statements as statements of a coconspirator and contemporaneous statements; (3) the State introduced sufficient evidence to convict Defendant of first-degree murder; and (4) the district judge did not abuse its discretion by admitting testimony that Defendant was upset over a meth pipe that went missing.

State v. Mullen

Court: Maine Supreme Judicial Court
Citation: 2020 ME 56
Opinion Date: May 5, 2020
Judge: Connors
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction for reckless conduct and aggravated criminal mischief, holding that the trial court did not abuse its discretion by offering Defendant a continuance of the trial in lieu of excluding his medical records. On appeal, Defendant argued that the trial court abused its discretion by denying his motion to suppress his personal medical records as a sanction for the State's late seizure of the records. The Supreme Judicial Court agreed that the State's conduct undermined the purpose of Maine Rule of Unified Criminal Procedure 18(b) but that the court's offer of a continuance in lieu of the exclusion of the evidence

constituted an appropriate response to the State's conduct.

Commonwealth v. Billingslea

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12715
Opinion Date: April 30, 2020
Judge: Cypher
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's convictions and the decision of the Appeals Court denying Defendant's motion to vacate the entry of his appeal from his convictions in that court and to have the case entered directly in the Supreme Judicial Court, holding that a direct appeal from the third conviction of a habitual offender pursuant to Mass. Gen. Laws ch. 279, 25(b) may be entered in the Appeals Court. Defendant was indicted for serious felonies arising from a brutal attack and rape. In addition to charging the specific felony, each indictment also alleged that the sentence for that felony should be enhanced pursuant to the habitual criminal provision Mass. Gen. Laws ch. 279, 25(a) or the habitual offender provision of section 25(b), or both. After he was convicted, Defendant moved to have the case entered directly in the Supreme Judicial Court. The Appeals Court denied the motion. The Supreme Judicial Court affirmed Defendant's convictions, holding (1) this direct appeal was entitled to the unique review prescribed by Mass Gen. Laws ch. 278, 33E, and the Appeals Court may conduct such section 33E review; (2) Defendant was not impermissibly allowed to waive his right to a jury trial on the sentencing enhancement provisions of the indictments; and (3) Defendant was not entitled to reversal of his convictions on any other ground.

Commonwealth v. Martin

Court: Massachusetts Supreme Judicial Court
Docket: SJC-08768
Opinion Date: May 5, 2020

Judge: Ralph D. Gants
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree and the denial of his motion for a new trial and declined to exercise its authority under Mass. Gen. Laws ch. 278E to reduce Defendant's conviction to murder in the second degree, holding that Defendant was not entitled to relief on any of his allegations of error. Defendant was convicted of murder in the first degree on the theory of felony-murder. Defendant filed a motion for a new trial, which was denied. The Supreme Judicial Court affirmed, holding (1) Defendant's motion for a new trial was correctly denied because Defendant was not prejudiced by counsel's ineffective assistance; (2) this Court declines to extend the reach of the Court's holding in Commonwealth v. Brown, 477 Mass. 805 (2017), to Defendant's case; and (3) trial judge erred when he declined Defendant's request that the jury be instructed on the elements of voluntary and involuntary manslaughter, but the error was not prejudicial in the context of the judge's other instructions.

State v. Branch

Court: Minnesota Supreme Court
Docket: A18-1055
Opinion Date: May 6, 2020
Judge: Lorie Skjerven Gildea
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's sentences for drive-by shooting at an occupied vehicle and second-degree assault, holding that Minn. Stat. 609.035 did not prohibit the sentences for both offenses when the crimes arose from a single behavioral incident. The district court sentenced Defendant to forty-eight months for drive-by shooting at an occupied vehicle and thirty-six months for second-degree assault and imposed the two sentences to run concurrently. The court of appeals affirmed. The Supreme Court affirmed, holding that, under this Court's analysis in State v. Ferguson, 808 N.W.2d 586 (Minn. 2012), the district court properly imposed multiple sentences in this case.

Galloway v. Mississippi

Court: Supreme Court of Mississippi
Citation: 2018-CA-01427-SCT
Opinion Date: May 7, 2020
Judge: Beam
Areas of Law: Constitutional Law, Criminal Law

Leslie Galloway appealed the denial of his 2015 petition for post-conviction relief (PCR) pertaining to his 2007 guilty plea to carjacking, a conviction that was used as an aggravating circumstance in Galloway's 2010 capital-murder trial at which Galloway received a death sentence. Galloway claimed in the petition that his defense counsel Wendy Martin had an actual

conflict of interest because, before becoming his defense counsel, Martin had served as an assistant district attorney in the same case, unbeknownst to Galloway. The trial court ruled that Galloway's PCR claim was time barred under Mississippi's Uniform Post-Conviction Collateral Relief Act (UPCCRA), having been filed more than seven years after Galloway's conviction for carjacking. The trial court alternatively found no merit to Galloway's PCR claim, time bar notwithstanding. Accordingly, the trial court denied Galloway's PCR petition. The Mississippi Supreme Court agreed with the trial court that Galloway's PCR claim was time barred under the UPCCRA. The Court also agreed there was no merit to Galloway's PCR claim.

City of Missoula v. Zerbst

Court: Montana Supreme Court
Citation: 2020 MT 108
Opinion Date: May 5, 2020
Judge: Beth Baker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction for sexual assault, holding that the municipal court erred when it instructed the jury on a definition of "consent" from the 2017 sexual assault statute and not the applicable 2015 statute, and the erroneous jury instruction prejudicially affected Defendant's substantial rights. At trial, the court instructed the jury, over Defendant's objection, on the definition of consent contained in recent amendments to the sexual assault statute. On appeal, Defendant argued that the municipal court failed to apply the correct law when instructing the jury on the elements of the claimed offense. The district court denied the appeal. The Supreme Court reversed, holding (1) the instructions, as a whole, did not fully and fairly instruct the jury on the law applicable to the case; and (2) Defendant's substantial due process right was prejudiced by the erroneous jury instruction.

State v. Degarmo

Court: Nebraska Supreme Court
Citation: 305 Neb. 680
Opinion Date: May 1, 2020
Judge: Stacy
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of driving under the influence, holding that Defendant consented to a chemical test of his urine and, therefore, the results of the urine test were admissible. A law enforcement officer stopped Defendant for an expired registration. Based on his observations, the officer, a certified drug recognition evaluation expert, administered field sobriety tests. The officer concluded that Defendant was under the influence of marijuana arrested Defendant for driving under the influence and then took him to a detoxification center. Thereafter, a chemical test of Defendant's urine confirmed the presence of marijuana. On appeal, Defendant challenged the admission of the results of the urine test. The Supreme Court affirmed, holding that Defendant voluntarily consented to the warrantless search of his urine, and therefore, the search fell within a recognized exception to the warrant requirement.

People v. Holz

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02682
Opinion Date: May 7, 2020
Judge: Fahey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals held that N.Y. Crim. Proc. Law (CPL) 710.70(2) grants a defendant the right to review of a suppression decision when the order related exclusively to a count that was satisfied by a guilty plea but was not one to which the defendant pleaded guilty. Defendant was charged with two counts of burglary in the second degree. The first count related to a laptop computer, and the second count related to jewelry. Defendant moved to suppress the jewelry, but Supreme Court denied the motion. Defendant then pleaded guilty to one count of burglary in the second degree as charged in the count pertaining to the theft of the laptop computer, in satisfaction of the

count charging the burglary of jewelry. On appeal, Defendant argued that Supreme Court erred in denying his motion to suppress the jewelry. The Appellate Division affirmed, concluding that it was jurisdictionally precluded from reviewing the suppression order. The Court of Appeals reversed, holding (1) Defendant's right to appellate review of Supreme Court's suppression order was secured by CPL 710.70(2); and (2) because the Appellate Division did not reach the underlying suppression question the case must be remitted to the Appellate Division for further proceedings.

People v. Maffei

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02680
Opinion Date: May 7, 2020
Judge: DiFiore
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals affirmed the order of the Appellate Division concluding on direct appeal that Defendant was not entitled to relief on his ineffective assistance of counsel claim, holding that Defendant, on this record, did not sustain his burden to establish that counsel was constitutionally ineffective. After a jury trial, Defendant was convicted of second-degree murder. On appeal, Defendant argued that his trial counsel's failure to challenge a prospective juror constituted ineffective assistance of counsel. The Appellate Division affirmed. The Court of Appeals affirmed, holding (1) the record was inadequate to review Defendant's ineffective assistance of counsel claim; and (2) the appropriate procedure for the litigation of Defendant's challenge to his counsel's performance was a N.Y. Crim. Proc. Law 440.10 motion.

State v. Bailey

Court: North Carolina Supreme Court
Docket: 360A19
Opinion Date: May 1, 2020

Judge: Davis
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the order of the trial court denying Defendant's motion to suppress evidence seized during the execution of a search warrant, holding that the warrant supported by probable cause. Defendant pled guilty to the offense of trafficking in cocaine while preserving his right to appeal the denial of his motion to suppress. On appeal, Defendant argued that the trial court erred in denying his motion to suppress because the facts contained in the affidavit were insufficient to establish probable cause to search his residence. The court of appeals affirmed. The Supreme Court affirmed, holding that the affidavit contained facts that were sufficient to provide a nexus between the residence and suspected criminal activity, and therefore, the warrant was supported by probable cause.

State v. Ellis

Court: North Carolina Supreme Court
Docket: 340A19
Opinion Date: May 1, 2020
Judge: Robin E. Hudson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the decision of the Court of Appeals affirming the trial court's denial of Defendant's motion to suppress evidence, holding that there was no reasonable suspicion to justify the law enforcement officer's stop when Defendant signaled with his middle finger from the passenger side window of a moving vehicle. While assisting a stranded motorist, the officer turned his attention to another car traveling on the roadway, a white SUV. Defendant had his arm outside the passenger window and gestured with his middle finger, making an up-and-down motion. Believing that Defendant was committing the crime of disorderly conduct, the officer pursued and then stopped the SUV. At trial, Defendant moved to suppress the officer's testimony, arguing that there was no reasonable suspicion to justify the stop. The trial court denied the motion. Defendant pleaded guilty to resisting, delaying, or obstructing a public

officer. The court of appeals affirmed the trial court's denial of Defendant's motion to suppress. The Supreme Court reversed, holding that the specific, articulable facts did not establish reasonable suspicion of the crime of disorderly conduct.

State v. Hobbs

Court: North Carolina Supreme Court
Docket: 263PA18
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction, holding that the trial court clearly erred in ruling that Defendant failed to prove purposeful discrimination with respect to the State's use of peremptory challenges to strike three jurors without considering all of the evidence presented by Defendant. Defendant was found guilty of one count of first-degree murder and other crimes. On appeal, Defendant argued that the trial court erred by failing to grant three objections that he made under Batson v. Kentucky, 476 U.S. 79 (1986). The court of appeals affirmed Defendant's convictions. The Supreme Court reversed, holding (1) the court of appeals erred in its analysis of Defendant's Batson claims with respect to the three jurors; and (2) as to all three jurors, remand was required for reconsideration of whether Defendant proved purposeful discrimination in each case.

Dodge v. North Dakota

Court: North Dakota Supreme Court
Citation: 2020 ND 100
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

Richard Dodge appealed from a district court order denying his application for post-conviction relief. Dodge was charged with five felonies and a misdemeanor in December 2015. Dodge was appointed counsel. In April 2016, Dodge's counsel moved the court to withdraw because the attorney-client relationship was "irreparably broken and rendered unreasonably difficult." The court granted the motion, and Dodge was appointed substitute counsel in May 2016. In July 2016, Dodge himself filed a "motion to dismiss counsel." The court denied Dodge's motion. Five months after the deadline for motions and plea agreements, Dodge's counsel sought to have Dodge submit to a psychiatric examination. This request was denied, the trial court found no evidence, and the the court itself made no observations, that Dodge was incompetent to stand trial. After this denial, Dodge himself again moved to dismiss his trial counsel, and due to the allegations Dodge made in his motion, counsel moved to withdraw. The trial court denied both motions, and instead, required the attorney to appear as standby counsel and assist Dodge during trial if requested, but relieved him of any further obligations to consult with Dodge. The case proceeded to trial. At the beginning of trial, the court gave Dodge the option of representing himself or

having his attorney represent him. Dodge chose to have his attorney represent him. Because his attorney had not prepared for trial and had no communication with Dodge since he moved to withdraw, Dodge's attorney asked for a brief recess to consult with Dodge. During the recess, a settlement was reached. Dodge agreed to enter Alford pleas on all counts, waived a presentence investigation, and agreed to be sentenced immediately after entering his pleas. Dodge was immediately sentenced following his guilty pleas, and thereafter sought post-conviction relief on grounds he was not competent to enter his pleas, and that he received ineffective assistance of trial counsel. After review, the North Dakota Supreme Court concluded the district court's finding that Dodge was competent when he entered his pleas was not clearly erroneous, and disposed of his claim of ineffective assistance of counsel.

Hewitt v. NDDOT

Court: North Dakota Supreme Court
Citation: 2020 ND 102
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Criminal Law, Government & Administrative Law

Larry Hewitt appealed a district court judgment affirming the North Dakota Department of Transportation's revocation of his driving privileges. Hewitt claimed the Department's hearing file was improperly admitted at the administrative hearing. After review, the North Dakota Supreme Court affirmed, concluding the hearing file was properly admitted as a self-authenticating copy of an official record.

Kastet v. NDDOT

Court: North Dakota Supreme Court
Citation: 2020 ND 91
Opinion Date: May 7, 2020
Judge: Daniel J. Crothers

Areas of Law: Criminal Law, Government & Administrative Law

The North Dakota Department of Transportation (Department) appealed the district court's reversing a hearing officer's decision suspending Holden Kastet's driving privileges for 365 days. The Department argued the hearing officer did not abuse his discretion in admitting the chemical breath test, and State Highway Patrol Trooper King scrupulously complied with the approved method for testing Kastet's breath on the Intoxilyzer 8000. After review, the North Dakota Supreme Court concurred with the Department and reversed the district court judgment. The matter was remanded with instructions to reinstate the hearing officer's decision.

North Dakota v. Dahl

Court: North Dakota Supreme Court
Citation: 2020 ND 87
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

The State of North Dakota appealed a district court order denying its motion to resume prosecution against Matthew Dahl and dismissing the case. In December 2014, the State charged Dahl with two counts of theft. Dahl did not appear on the charges until he was arrested on a bench warrant in February 2017. In mid-April 2017, the State mailed Dahl a pretrial diversion agreement. Dahl signed and returned the notarized agreement dated May 3, 2017. On May 9, 2017, the state's attorney signed and filed the agreement with the district court, and the court approved the agreement the same day. Under the agreement, the State agreed to suspend prosecution for "two years from the date of execution" conditioned on Dahl's timely payment of restitution. Dahl failed to make minimum monthly restitution payments. On June 6, 2019, the State moved to resume prosecution, alleging Dahl violated the pretrial diversion agreement by his non-payment. The district court held a hearing on the State's motion in August 2019. The court concluded the pretrial agreement was executed when Dahl signed it on May 3, 2017. The court then denied the State's motion to resume prosecution as untimely under N.D.R.Crim.P. 32.2(d)(2), and dismissed the complaint

against Dahl. After review, the North Dakota Supreme Court reversed, concluding the district court erred in determining the State's motion was untimely, and remanded for further proceedings.

North Dakota v. Foster

Court: North Dakota Supreme Court
Citation: 2020 ND 85
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Akeem Foster was convicted by jury of Terrorizing and Carrying a Concealed Weapon. Foster contended on appeal he was denied a fair trial because he was asked during cross-examination if other witnesses were lying and because the prosecutor expressed personal beliefs about the evidence during closing arguments. Foster also argued there was insufficient evidence to convict him of either charge. After review, the North Dakota Supreme Court affirmed Foster's conviction for Carrying a Concealed Weapon, but reversed his conviction for Terrorizing. The Court found Foster was improperly asked to provide an opinion on the veracity and credibility of the State's witnesses. The improper questioning was prejudicial and denied Foster a fair trial on the terrorizing charge.

North Dakota v. Kolstad

Court: North Dakota Supreme Court
Citation: 2020 ND 97
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

In December 2018, Officer Nelson of the University of North Dakota Police Department conducted a traffic stop of Stanley Kolstad for suspicion of driving under the influence. Kolstad performed field sobriety tests and a preliminary breath test (PBT). Prior to performing the PBT, Kolstad informed

Nelson that he had asthma. Nelson testified he was unable to obtain a PBT result because Kolstad was filling his cheeks with air while performing the test. Kolstad was arrested for DUI and refusing to submit to a chemical test. Kolstad was transported to the UND police station to be given an Intoxilyzer breath test. Prior to the Intoxilyzer test, Nelson read Kolstad the implied consent advisory. But, because Nelson was not a certified operator of the Intoxilyzer machine, Officer Waltz conducted the test. Prior to the test, Kolstad informed Waltz he had asthma. The Intoxilyzer test results were deficient. Waltz testified Kolstad was not providing enough air for the test machine to provide a valid result. Kolstad was charged with driving under the influence and refusing to submit to a chemical test. Kolstad's counsel made a discovery request to the State seeking copies of any audio or video recordings taken by police officers. Kolstad's counsel also requested the State inform him whether any sound or video recordings taken of Kolstad were subsequently "altered, edited, destroyed, or discarded." The State provided Kolstad's counsel with dash camera footage from Nelson's police car that had been taken at the scene of the arrest, but the State did not provide any body camera footage from either Nelson or Waltz. Upon learning that Waltz's body camera footage was successfully uploaded to UND servers, Kolstad's counsel moved to dismiss the case because the State did not provide any body camera footage in discovery as requested. The district court ultimately dismissed the refusal to submit to a chemical breath test charge as a sanction for failing to provide the body camera footage. The State appealed, arguing the alleged discovery violation did not rise to a constitutional violation of Kolstad's due process rights, and the district court abused its discretion in dismissing the refusal charge. Kolstad argued the district court's order dismissing the refusal charge was not appealable, and if it was, the court did not abuse its discretion in dismissing the charge. The North Dakota Supreme Court concluded there was nothing in the record to indicate the district court adequately considered an alternative or less severe sanction to dismissal, and by not considering a less severe sanction, the trial court erred. The district court's order dismissing the refusal charge was reversed, and the matter remanded for further proceedings.

North Dakota v. Michel

Court: North Dakota Supreme Court
Citation: 2020 ND 101
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

Kevin Michel was convicted by jury of knowingly receiving stolen property. Jamestown Police began investigating theft of tires from Northwest Tire in October 2017. About ten months later, Thomas Melland and Andrew Heckelsmiller became suspects in the investigation. Heckelsmiller told police he had sold stolen tires to Michel. In August 2018, Detective LeRoy Gross spoke with Michel about the stolen tires. Michel acknowledged he had bought tires from Heckelsmiller and Melland. Michel also told Detective Gross he stopped buying tires from Heckelsmiller and Melland after seeing a Facebook post from Northwest Tire offering a $500 reward for information regarding stolen tires. Detective Gross told Michel, "There's going to be a lot of restitution these two boys are going to have to come up with unless we can get some tires back." Michel said he had sold several of the tires but still had some of them. Michel turned over seven new tires to Detective Gross. Representatives from Northwest Tire and J&L Service identified the tires as some of those stolen from their shops. During the jury's deliberations, the jury submitted a note with written questions to the court. Michel argued on appeal the district court erred by not specifically answering the jury's questions and instead referring them to the existing jury instructions. After review, the North Dakota Supreme Court affirmed the criminal judgment, except as to the award of restitution. The award was reversed because the district court awarded more than what was required to make the victims whole. The matter was remanded for a redetermination of restitution.

North Dakota v. Wayland

Court: North Dakota Supreme Court
Citation: 2020 ND 106
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Joey Wayland appealed after he was convicted by jury of Theft of Property and Possession of Drug Paraphernalia. Wayland contended his case should have been dismissed because his right to a speedy trial was violated by a continuance of his trial from March 11, 2019 to April 8, 2019. Wayland also contended the district court violated his right to remain silent by ordering him to submit to a mental health evaluation. Finding no reversible error, the North Dakota Supreme Court affirmed.

Schwindt v. Sorel

Court: North Dakota Supreme Court
Citation: 2020 ND 92
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Constitutional Law, Criminal Law, Government & Administrative Law

Gregory Schwindt appealed a district court judgment affirming a Department of Transportation hearing officer's revocation of his driving privileges for 180 days. Schwindt argued North Dakota's implied consent and refusal laws were unconstitutional, the hearing officer erred by considering the results of the horizontal gaze nystagmus (HGN) test, and the hearing officer erred in finding he refused to take a chemical test. After review, the North Dakota Supreme Court concluded the hearing officer's findings of fact were supported by a preponderance of the evidence, the conclusions of law were sustained by the findings of fact, and the decision to revoke Schwindt's driving privileges was in accordance with the law.

State ex rel. McDougald v. Greene

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2782
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied a writ of mandamus sought by Relator to

compel Respondent, the public-records custodian at the Southern Ohio Correctional Facility (SOCF), to provide Relator with three public records and to pay Relator statutory damages and court costs associated with this litigation, holding that Relator was not entitled to either a writ of mandamus nor statutory damages. When Relator was an inmate at SOCF he submitted a public-records request to Respondent seeking three documents. Respondent provided one of the three documents. Relator then filed a complaint for a writ of mandamus seeking an order compelling Respondent to provide the two documents and to pay statutory damages and court costs associated with this litigation. The Supreme Court denied the writ of mandamus on the merits, holding that Respondent's response to Relator fully satisfied Respondent's obligations under Ohio Rev. Code 149.43, and therefore, Relator was not entitled a writ of mandamus, and there was no basis to award statutory damages.

State ex rel. Parker Bey v. Byrd

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2766
Opinion Date: May 5, 2020
Judge: Maureen O'Connor
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the judgment of the court of appeals denying Appellant's complaint for a writ of mandamus to compel the Cuyahoga County Clerk of Courts to produce various court records and denying the clerk's request that Appellant be declared a vexatious litigator, holding that the court of appeals erred in denying Appellant's complaint on the grounds that he did not invoke the Rules of Superintendence as the basis for his request. Appellant sought copies of journal entries from his criminal case and a copy of the clerk of courts' records-retention schedule. The clerk largely denied the request. Appellant then filed a complaint for a writ of mandamus. The court of appeals denied Appellant's request for mandamus relief, concluding that the clerk had no clear legal duty to provide the requested records. The Supreme Court reversed, holding (1) this action to compel the production of journal entries from a 1995 case was properly brought under the Public Records Act; and

(2) this Court declines to impose sanctions on Appellant or to declare him a vexatious litigator.

State v. Dangler

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2765
Opinion Date: May 5, 2020
Judge: DeWine
Areas of Law: Criminal Law

The Supreme Court reversed the judgment of the court of appeals vacating Defendant's conviction and sentence and reinstated the trial court's acceptance of Defendant's plea of no contest to sexual battery, holding that the trial court did not completely fail to comply with Crim.R.11(C)(2)(a), and there was nothing in the record to support a conclusion that Defendant would not have entered his plea had the trial court been more detailed in its explanation. On appeal, Defendant sought to vacate his plea of no contest, arguing that his plea was invalid because the trial court erred by not explaining more fully the obligations and restrictions that went with his status as a sex offender, in violation of Crim. R. 11(C)(2)(a). The court of appeals vacated the conviction without requiring Defendant to show prejudice, concluding that the trial court had completely failed to comply with Crim. R. 11(C)(2)(a). The Supreme Court reversed, holding (1) the trial court did not completely failed to comply with Crim R. 11(C)(2)(a)'s maximum-penalty-advisement requirement; and (2) because Defendant did not establish prejudice, he was not entitled to have his no-contest plea vacated for a failure to comply with Crim.R. 11(C).

Oregon v. Haji

Court: Oregon Supreme Court
Docket: S066254
Opinion Date: May 7, 2020
Judge: Nakamoto

Areas of Law: Constitutional Law, Criminal Law

After a grand jury issued an indictment charging defendant Hanad Ali Haji with multiple offenses, the district attorney determined that the indictment could be challenged by demurrer because the basis for joining those offenses was not expressly alleged. Instead of seeking another indictment from the grand jury, the district attorney obtained leave from the trial court to amend the indictment by adding allegations specifying the statutory basis for joinder, without adding factual allegations about the crimes. Defendant was convicted on some of the charges at trial, and the Court of Appeals affirmed. The issue this case presented for the Oregon Supreme Court's review centered on whether the district attorney could add allegations specifying the statutory basis for joinder of multiple offenses to an indictment instead of resubmitting the case to the grand jury. The Supreme Court determined that neither the statute permitting joinder of multiple offenses in a single indictment nor Article VII (Amended), section 5(6), of the Oregon Constitution precluded a district attorney, with approval of the trial court, from amending an indictment to add allegations specifying the statutory basis for joinder of multiple offenses. The Supreme Court affirmed the decision of the Court of Appeals, based in part on different reasoning, and affirmed the judgment of the circuit court.

South Carolina v. Durant

Court: South Carolina Supreme Court
Docket: 27964
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law

Appellant Larry Durant was convicted of second-degree criminal sexual conduct (CSC) for sexually abusing a teenage girl in his church office where he served as the pastor. Durant contended the trial court improperly permitted the State to introduce evidence of prior sexual abuse allegations as evidence of a common scheme or plan under Rule 404(b), SCRE, and that the State committed a "Brady" violation by failing to accurately disclose the criminal history of its witness. After review, the South Carolina Supreme

Court affirmed the admissibility of the girls' testimony. "[W]hile the State failed to disclose the criminal background information of its witness, we find this information was not material." The Court found Durant exercised his position of trust, authority, and spiritual leadership to hold private prayer meetings with teen girls who had grown up in his church. He told them he was praying for their health and good fortune, and represented that part of this process was touching them sexually and having intercourse. Durant then warned the girls of misfortune if they refused or told anyone. Moreover, he used scripture as a means of grooming the children into performing sex acts. "These facts demonstrate the requisite logical connection between the prior acts of sexual abuse and the one forming the basis of the crime charged." The Court therefore affirmed Durant's conviction.

South Carolina v. Perry

Court: South Carolina Supreme Court
Docket: 27963
Opinion Date: May 6, 2020
Judge: Few
Areas of Law: Constitutional Law, Criminal Law

Petitioner Wallace Perry was convicted on two counts of criminal sexual conduct (CSC) with a minor in the first degree and two counts of CSC with a minor in the second degree for sexually assaulting two of his biological daughters. Prior to Perry's trial, the State made a motion to admit the testimony of Perry's stepdaughter from an earlier marriage that Perry sexually assaulted her twenty-two to twenty-seven years earlier. The State argued the trial court should not exclude the stepdaughter's testimony under Rule 404(b) of the South Carolina Rules of Evidence because it fit the "common scheme or plan" exception. Perry objected to this testimony. The trial court initially reserved ruling on the issue, but later indicated it was inclined to allow the stepdaughter to testify. The jury convicted Perry on all counts, and the trial court sentenced him to thirty years in prison. The court of appeals affirmed. The South Carolina Supreme Court determined it was not enough to meet the "logical connection" standard for admission of other crimes under the common scheme or plan exception to Rule 404(b) that the defendant previously committed the same crime. "When evidence of other

crimes is admitted based solely on the similarity of a previous crime, the evidence serves only the purpose prohibited by Rule 404(b), and allows the jury to convict the defendant on the improper inference of propensity that because he did it before, he must have done it again. ...The common scheme or plan exception demands more." The Supreme Court held State must show a logical connection between the other crime and the crime charged such that the evidence of other crimes "reasonably tends to prove a material fact in issue." The State must also convince the trial court that the probative force of the evidence when used for this legitimate purpose is not substantially outweighed by the danger of unfair prejudice from the inherent tendency of the evidence to show the defendant's propensity to commit similar crimes. In this case, the State did not meet its burden. Conviction was reversed and the matter remanded for a new trial.

South Carolina v. Quinn

Court: South Carolina Supreme Court
Docket: 27966
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law, White Collar Crime

Respondent Rick Quinn, Jr. was a former member of the South Carolina House of Representatives, representing constituents in Richland and Lexington counties from 1989-2004 and 2010-2017 and serving as House Majority Leader from 1999- 2004. He owned and operated a mail business called Mail Marketing Strategies (MMS) in Columbia, while his father owned and operated a political consulting firm, Richard Quinn & Associates (RQ&A). In 2014, Attorney General Alan Wilson designated First Circuit Solicitor David Pascoe as special prosecutor to conduct a State grand jury investigation into alleged public corruption committed by current and former members of the South Carolina General Assembly. This case arose from a prior state grand jury investigation of former House Speaker Bobby Harrell, which resulted in six counts of misusing campaign funds, to which he pleaded guilty. During the course of the investigation into Speaker Harrell, SLED uncovered potentially criminal conduct by Representative Jimmy Merrill and Representative Rick Quinn, and a second grand jury

investigation was initiated to investigate the conduct of these individuals. The investigation focused on Quinn's practice of using his office as House Majority Leader and leader of the House Republican Caucus to direct mailing and political services to his family's businesses. Quinn only admitted to a limited set of facts supporting the indictment. Believing the plea lacked a sufficient basis, the State moved to vacate Quinn's guilty plea, reconsider the sentence, and for the trial court's recusal. The State appealed the order denying its motions. After review, the South Carolina Supreme Court determined that the State could not appeal the guilty plea, the trial court did not abuse its discretion in sentencing, and there was no evidence of judicial bias or prejudice requiring the court to recuse itself. Therefore, the Court dismissed the State's appeal of the guilty plea, and affirmed as to all other issues.

Texas v. Arellano

Court: Texas Court of Criminal Appeals
Docket: PD-0287-19
Opinion Date: May 6, 2020
Judge: Slaughter
Areas of Law: Constitutional Law, Criminal Law

After Appellee Cesar Ramiro Arellano was arrested for driving while intoxicated, the arresting officer, Phillip Garcia, prepared a probable cause affidavit to support a search warrant for a blood draw. Officer Garcia submitted his sworn affidavit to the on-duty magistrate. Using a cursive signature, the magistrate signed the blank signature line of a form search warrant authorizing the search and seizure of Appellee's blood. Below the signature line appeared the words, "Magistrate, Victoria County, Texas." Aside from the cursive signature, the magistrate's name was not typed or handwritten anywhere on the warrant. Upon execution of the search warrant, Appellee was charged with DWI. In the trial court, Appellee filed a motion to suppress all evidence stemming from the blood draw. At the pretrial suppression hearing, Appellee argued that the search warrant to obtain the blood specimen was facially invalid because the magistrate's signature was illegible in violation of the requirements of Code of Criminal Procedure Article 18.04(5). The trial court agreed, the court of appeals

concurred, and the evidence was suppressed because of the illegible signature. The Texas Court of Criminal Appeals disagreed with both lower courts, finding the court of appeals erred in holding that reliance on the statutory good-faith exception was automatically precluded based on an illegible magistrate's signature in violation of Code of Criminal Procedure Article 18.04(5). Because the remaining issues in the case were not properly addressed by the court of appeals, judgment was vacated and the matter remanded for further proceedings.

Criminal Law Opinions

Kelly v. United States

Court: US Supreme Court
Docket: 18-1059
Opinion Date: May 7, 2020
Judge: Elena Kagan
Areas of Law: Criminal Law, Government & Administrative Law, White Collar Crime

During former New Jersey Governor Christie's 2013 reelection campaign,

Fort Lee's mayor refused to endorse Christie. Kelly, Christie's Deputy Chief of Staff, Port Authority Deputy Executive Director, Baroni, and another official decided to reduce from three to one the number of lanes reserved at the George Washington Bridge's toll plaza for Fort Lee's commuters. To disguise the political retribution, the lane realignment was said to be for a traffic study. Port Authority traffic engineers were asked to collect some numbers. An extra toll collector was paid overtime. The lane realignment caused four days of gridlock, ending only when the Port Authority's Executive Director learned of the scheme. The Third Circuit affirmed the convictions of Baroni and Kelly for wire fraud, fraud on a federally funded program, and conspiracy to commit those crimes. The Supreme Court reversed. The scheme did not aim to obtain money or property. The wire fraud statute refers to "any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses," 18 U.S.C. 1343. The federal-program fraud statute bars "obtain[ing] by fraud" the "property" (including money) of a federally funded program or entity, section 666(a)(1)(A). The statutes are limited to the protection of property rights and do not authorize federal prosecutors to set standards of good government. The Court rejected arguments that the defendants sought to take control of the Bridge's physical lanes or to deprive the Port Authority of the costs of compensating employees. Their realignment of the access lanes was an exercise of regulatory power; a scheme to alter a regulatory choice is not one to take government property. The time and labor of the employees were an incidental byproduct of that regulatory object. Neither defendant sought to obtain the services that the employees provided.

Gomes v. Silva

Court: US Court of Appeals for the First Circuit
Docket: 19-1656
Opinion Date: May 1, 2020
Judge: Stahl
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed the judgment of the district court denying Appellant's petition for a writ of habeas corpus, holding that, under the highly deferential standard prescribed by the Antiterrorism and Effective

Death Penalty Act for federal habeas review of state criminal convictions, Appellant's claims to habeas relief failed. Appellant was convicted in a Massachusetts superior court of murder in the first degree and related crimes. The Supreme Judicial Court (SJC) affirmed the convictions. Appellant subsequently petitioned the District Court for the District of Massachusetts for a writ of habeas corpus. The district court denied the petition but granted a certificate of appealability. The First Circuit affirmed, holding (1) sufficient evidence supported Appellant's conviction for first-degree murder as a joint venturer, and the SJC's sufficiency determination was not unreasonable; and (2) the SJC reasonably determined that the trial court's admission into evidence of certain items did not constitute error.

United States v. Perez-Couvertier

Court: US Court of Appeals for the First Circuit
Docket: 16-2186
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed Defendant's conviction of possessing with intent to distribute controlled substances in a protected area and conspiring to distribute controlled substances in a protected area, holding that the district court did not plainly err with respect to any of Defendant's challenges. Specifically, the First Circuit held (1) the district court did not commit plain error in admitting evidence of the conspiracy's activities occurring after he withdrew from the conspiracy or, alternatively, in not instructing the jury to ignore such evidence; (2) the district court did not plainly err in admitting evidence of a drug trafficking organization's violent acts; and (3) the delay between Defendant's indictment and arrest did not violate his Sixth Amendment right to a speedy trial.

United States v. Haverkamp

Court: US Court of Appeals for the Second Circuit

Docket: 18-3735
Opinion Date: May 4, 2020
Judge: Barrington D. Parker
Areas of Law: Criminal Law

Defendant pleaded guilty to one count of distribution and receipt of child pornography and one count of possession of child pornography. The district court sentenced him to 121 months of imprisonment, followed by five years of supervised release, and imposed a $200 mandatory special assessment under 18 U.S.C. 3013, as well as a $10,000 assessment under 18 U.S.C. 3014. The Second Circuit held that the district court did not abuse its discretion in sentencing defendant and his sentence was substantively reasonable. The court held that the text of the Justice for Victims of Trafficking Act (JVTA), 18 U.S.C. 3014, taken as a whole and in its context, is straightforwardly meant to be applied on a per-offender, not a per-count, basis. In this case, the district court erroneously applied the special assessment on a per-count, rather than per-offender, basis. Finally, the court held that the computer monitoring condition in question was reasonably related to the nature of defendant's offense. Accordingly, the court affirmed in part, vacated in part, and remanded for further proceedings.

United States v. Mladen

Court: US Court of Appeals for the Second Circuit
Docket: 18-0616
Opinion Date: May 6, 2020
Judge: Amalya Lyle Kearse
Areas of Law: Criminal Law, Trusts & Estates

After defendant died while his appeal was pending, counsel moved for abatement of all incidents of the prosecution, requesting that the appeal be dismissed without a decision on the merits, that defendant's conviction be vacated, and that the matter be remanded to the district court with instructions to dismiss the indictment and order repayment to defendant's estate of the $20,000 fine and $100 special assessment. Because defendant was convicted upon his plea of guilty, and he neither did nor was permitted to challenge on appeal the merits of his conviction, the Second

Circuit denied as without merit so much of the motion as seeks (1) vacatur of his conviction, (2) dismissal of the count of the indictment on which he was convicted, and (3) repayment of the mandatory $100 special assessment. The court granted so much of the motion as requests dismissal of this appeal and a remand to the district court for vacatur of the imposed terms of imprisonment and supervised release and for an order requiring that the paid fine of $20,000 be repaid to defendant's estate.

United States v. Richardson

Court: US Court of Appeals for the Second Circuit
Docket: 19-412
Opinion Date: May 5, 2020
Judge: Menashi
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for distribution and possession with intent to distribute a controlled substance. The court held that the district court did not procedurally err by applying the career offender sentencing enhancement pursuant to USSG 4B1.1 because defendant's prior convictions of conspiracy to distribute a controlled substance in violation of 21 U.S.C. 841(a)(1) and 846, and attempted criminal possession of a controlled substance in violation of N.Y. Penal Law 220.16(1), qualify as controlled substance offenses, as defined in USSG 4B1.2(b). The court also held that the district court did not substantively err in sentencing defendant, because it properly considered his criminal history and accounted for his need for mental health and substance abuse treatment.

United States v. Rosemond

Court: US Court of Appeals for the Second Circuit
Docket: 18-3561
Opinion Date: May 1, 2020
Judge: Chin
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for murder-for-hire, conspiracy to commit murder-for-hire, murder through use of a firearm, and possession of a firearm during a murder-for-hire conspiracy. Defendant owned Czar Entertainment, a music management company that represented hip-hop, rap and R&B artists such as Jayceon Taylor, also known as "The Game." Taylor was a member of G-Unit, a rap group run by Curtis Jackson, also known as "50 Cent." Defendant's crimes stemmed from a rivalry with Violator Records, the company that managed G-Unit. The court rejected defendant's contention that his attorney was ineffective because he conceded that defendant paid for the victim to be shot, even though he told counsel not to make this concession. The court held that defendant failed to show that this was objectively unreasonable or that he would have been found not guilty had a different argument been advanced. In this case, there was ample evidence supporting counsel's strategy to concede that defendant ordered a shooting where, among other things, the government's key witness, who participated in the conspiracy and lured the victim to be shot, testified that defendant agreed to pay the shooter. The court also held that the district court did not abuse its broad discretion by admitting prior bad-act evidence under Federal Rule of Evidence 404(b)(1).

United States v. Lacerda

Court: US Court of Appeals for the Third Circuit
Docket: 15-2812
Opinion Date: May 5, 2020
Judge: Porter
Areas of Law: Criminal Law, White Collar Crime

VOG billed itself as an advocacy group helping victims of timeshare fraud get out of their timeshare debts. A jury determined that VOG had actually defrauded its customers and that three individual defendants (including Lacerda) were each knowing participants in that fraud. Lacerda was sentenced to 324 months' imprisonment for his leading role in the fraudulent enterprise. The Third Circuit affirmed the respective convictions and sentences. The court rejected a claim of impermissible "overview testimony" by an FBI agent; an officer who is familiar with an investigation or was personally involved may tell the story of that investigation—how the

investigation began, who was involved, and what techniques were used, and, with a proper foundation, may offer lay opinion testimony and testify about matters within his personal knowledge. The district court did not abuse its discretion when it disqualified defense counsel based on a conflict of interest; when it denied replacement counsel's motion for a continuance; when it excluded from evidence, as hearsay, an email sent by Lacerda to VOG's former CFO; in exercising its sentencing discretion; or by ordering the forfeiture of all VOG's gross proceeds.

Cucalon v. Barr

Court: US Court of Appeals for the Fourth Circuit
Dockets: 18-1292, 18-2206
Opinion Date: May 7, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law, Immigration Law

The Fourth Circuit denied petitions for review of the BIA's final order of removal. Applying the modified categorical approach, the court held that defendant's prior conviction for distribution of cocaine under Virginia Code 18.2-248, including distribution of that substance as an accommodation under Virginia Code 18.2-248(D), satisfies the federal definitions of an "aggravated felony" and of a crime "relating to a controlled substance" pursuant to 8 U.S.C. 1227(a)(2)(A)(iii), 1227(a)(2)(B)(i). The court also held that the district court did not abuse its discretion in denying petitioner's motion to reconsider.

United States v. Doctor

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4874
Opinion Date: May 4, 2020
Judge: Roger L. Gregory
Areas of Law: Criminal Law

The Fourth Circuit affirmed the district court's revocation of defendant's

supervised release and resulting sentence. The court held that the district court did not clearly err in finding the government proved he committed the assault underlying the supervised release violation; the district court did not commit plain error by adopting the violation report when announcing defendant committed Violation One; and, even if the district court erred in sentencing defendant for a Grade A violation, the error was harmless.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lewis

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-4028
Opinion Date: May 4, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law

Defendant was convicted for possessing a firearm as a felon and sentenced to 63 months' imprisonment and a three-year period of supervised release. The district court additionally recommended, without explanation, that defendant receive addiction treatment while incarcerated and ordered, as a special condition of his supervised release, that defendant participate in an addiction treatment program. The Fourth Circuit held that defendant's sentence is procedurally unreasonable because the district court failed to provide an adequate explanation for imposing as a special condition of supervised release the requirement of addiction treatment. The court also held that the district court failed to address defendant's nonfrivolous mitigation arguments. Therefore, the court remanded for resentencing.

United States v. Jordan

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-40499
Opinion Date: May 1, 2020
Judge: Jennifer Walker Elrod
Areas of Law: Criminal Law

The Fifth Circuit affirmed the district court's grant of defendants' motion for a new trial on the basis of prejudicial outside influence on the jury. The court held that the district court did not abuse its broad discretion in granting the motion for a new trial without holding an evidentiary hearing. To the extent there is a bright-line rule applicable to allegations of outside influence on the jury, the court held that it was not applicable to this case. Furthermore, the district court did not abuse its discretion in exercising its prerogative, within broadly defined parameters, to handle the allegation of outside influence in the least disruptive manner possible in this unusual case. Finally, the district court permissibly concluded that the evidence showed a sufficient likelihood of prejudice to shift the burden to the Government, and that the Government did not (and could not) show "no reasonable possibility that the jury's verdict was influenced by" the CSO's comments.

United States v. Longoria

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-20201
Opinion Date: May 5, 2020
Judge: Gregg Costa
Areas of Law: Criminal Law

The Fifth Circuit held that the base offense level of 20 was proper for defendant's felon-in-possession crime involving a semiautomatic firearm that is capable of accepting a large capacity magazine. In this case, defendant failed to show that the district court clearly erred in relying on the FBI's agent statement about what was found in the apartment. The court clarified any confusion and held that the 2013 amendment to the commentary on the acceptance-of-responsibility Guideline does not clearly overrule its caselaw allowing the government to withhold the third point for acceptance of responsibility when it must litigate a suppression motion. The court held that Amendment 775 does not contain the unequivocal override needed to get past the court's precedent. Therefore, the court affirmed defendant's sentence.

United States v. McNabb

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-50265
Opinion Date: May 1, 2020
Judge: Costa
Areas of Law: Criminal Law

The Fifth Circuit affirmed defendant's sentence imposed after he pleaded guilty to possessing a gun after having been convicted of a felony. The court held that defendant is not entitled to relief on his claim that the government breached the plea deal, and thus his appellate waiver remains enforceable. Accordingly, defendant's challenges to his sentence must be dismissed.

Andrews v. Wayne County

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1992
Opinion Date: May 4, 2020
Judge: Suhrheinrich
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Canton Police received a 911 call from Andrews, who stated that his fiance, White, had physically attacked him. Officers arrested White. Andrews later took White's medications to the jail; a “KOP” policy allows inmates to keep certain drugs for self-administration. During an intake interview, White admitted to attempting to harm herself or commit suicide in the past but said she was not thinking of harming herself or having suicidal thoughts. An R.N. later evaluated White for nearly two hours, reported White’s chief complaints were “anxiety and depression,” and contacted a pharmacy to verify White’s prescriptions. The R.N. claims White did not exhibit any psychotic behavior, suicidal ideation, or psychiatric distress but ordered further evaluation. The next day, White was found on the floor with vomit on her face. She stated repeatedly that she took too many pills. The next day, White died in the hospital. The cause of death was Verapamil toxicity. The Sixth Circuit affirmed the rejection of a suit under 42 U.S.C. 1983 on summary judgment. A pretrial detainee does not have an automatic right to a suicide screening. The court rejected an argument that the KOP Policy was deficient because

it allows inmates in need of a psychological evaluation to participate before a psychiatrist's assessment of proper housing. The County had no history of suicides relative to the program, so any purported failure to train its employees in suicide risk assessment did not cause White's death.

Hicks v. Scott

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-3410
Opinion Date: May 1, 2020
Judge: Gibbons
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Cincinnati officers Scott and Moore responded to a reported incident of menacing. Two people alleged that Quandavier had driven by their home that night and threatened to kill them and that Quandavier carried guns. Officer Loreaux identified a vehicle fitting the description. Officers Scott, Moore, Schneider, and Loreaux, standing where the vehicle was parked, heard a voice. Thinking that it was likely Quandavier, they knocked on the exterior door of the residence. It swung open. Three officers entered without a warrant or exigent circumstances. Loreaux remained outside. Neither Scott nor Moore recall announcing their presence or identifying themselves. Inside and upstairs, Scott knocked on a closed door. As it opened, Scott "saw the barrel of a rifle pointed at [her] face." Moore and Schneider also saw Quandavier "nonchalantly" panning the rifle from left to right. Moore reached for its barrel as Scott fired her weapon. Moore did not instruct Quandavier to drop his rifle nor did Scott issue any commands before firing. Quandavier collapsed. The officers immediately radioed for paramedics. Before the officers applied handcuffs or provided first aid, they heard another voice and conducted a sweep. Quandavier died at the scene without receiving medical attention. In a suit under 42 U.S.C. 1983 for unlawful entry, excessive force, and deliberate indifference to a serious medical need, plus state claims, the district court granted the defendants summary judgment, citing qualified immunity. The Sixth Circuit reversed in part. The district court erred by granting qualified immunity to Scott, Moore, and Schneider on the unlawful entry claim. The court affirmed as to the excessive force, deliberate indifference, and state-law battery claims, and

remanded for evaluation of municipal liability and wrongful death claims.

Moody v. United States

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5015
Opinion Date: May 6, 2020
Judge: Thapar
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

At Moody's trial, the government produced a video of Moody cooking crack on his stove and waving a handgun while he mused about life in "the game" (drug trafficking). The court ruled that most of the video was admissible. Moody then tried to persuade the jury that the video was filmed more than five years before his indictment, putting it outside the statute of limitations. The jury convicted Moody. Due to prior felony drug convictions, Moody received enhanced, mandatory-minimum life sentences on several counts. He appealed on evidentiary grounds relating to the video. The Sixth Circuit affirmed. Later, Moody raised new claims on collateral review, 28 U.S.C. 2255. The district court found each claim meritless; most were also procedurally defaulted. The court authorized Moody to appeal. The Sixth Circuit dismissed the appeal, stating that none of the claims should have been certified. Reasonable jurists could not doubt that the district court properly denied relief on Moody's claims that he was deprived of his statute-of-limitations defense (violating due process); that the past convictions for his sentencing enhancements were not charged in the indictment or found by the jury; and that his previous lawyers failed to raise the first two claims sooner, violating his right to effective assistance of counsel.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Foreman

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1827
Opinion Date: May 7, 2020
Judge: Gibbons

Areas of Law: Criminal Law

In 2006, Foreman pled guilty to possession with intent to distribute 50 or more grams of cocaine base, possession with intent to distribute cocaine powder, and possession of a firearm during and in furtherance of a drug trafficking crime. Foreman admitted that he was responsible for approximately 135 grams of crack cocaine and 250 grams of cocaine powder. Foreman had a final Guidelines range of 322-387 months; he was sentenced to 240 months' imprisonment with respect to each drug conviction, to run concurrently, and 60 months' imprisonment for the firearms conviction, to run consecutively. When the First Step Act of 2018 made the Fair Sentencing Act retroactive, Foreman sought relief. The district court held that Foreman was not entitled to a plenary resentencing and declined to revisit his career offender status or hold an in-person hearing, then weighed the new statutory range applicable to Foreman's drug offenses, his recalculated Guidelines range, and the 18 U.S.C. 3553(a) factors, and reduced Foreman's total sentence to 172 months on each drug offense, to run concurrently, plus the mandatory consecutive 60 months on the firearms offense. The Sixth Circuit affirmed. Nothing in the First Step Act entitles a defendant to a plenary resentencing. First Step Act resentencings are not shielded from review for reasonableness; the district court thoroughly explained its rationale, carefully examining Foreman's circumstances, the amended penalty provisions, and the resulting changes to Foreman's Guidelines range.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Smith

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1724
Opinion Date: May 6, 2020
Judge: Bush
Areas of Law: Criminal Law

In 2006, Smith was convicted of conspiracy to distribute and to possess with intent to distribute 500 grams or more of powder or 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute

500 grams or more of cocaine powder; and being a felon in possession of a firearm. The court imposed a mandatory minimum life sentence. The Fair Sentencing Act subsequently lowered the penalty for cocaine-base offenses, made retroactive through the First Step Act. Smith moved for relief and received a reduced sentence of 360 months, the bottom of the new Guideline range for the counts impacted by the Fair Sentencing Act, to run concurrent to his existing 360-month sentence for his powder cocaine count that was not affected by the Fair Sentencing Act. The Sixth Circuit affirmed, rejecting an argument that the court should have imposed a below-Guideline sentence for all counts. The First Step Act is a limited grant of authority to impose a reduced sentence for certain offenses and does not require a plenary resentencing proceeding. Even assuming the court's obligation to explain its reasons for imposing the modified sentence was akin to that which applies in initial sentencing, the court's use of a modified AO 247 form order to explain its decision was not procedurally unreasonable.

Kirkman v. Thompson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1904
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Following a 1992 fight that involved Johnson, Herron, and Walker, two shooters shot the three men. Johnson survived. In the hospital, Johnson described a shooter by the street name "Duke," where Duke lived, and Duke's car. Johnson identified Duke and his accomplice from a photo array. Police pulled over a vehicle matching Johnson's description and arrested the driver, Kirkman, and the passenger, who matched the general description of the second shooter. Kirkman had a tattoo of Duke on his arm. Police took additional photos and presented a second photo array to Johnson, who identified them as the shooters. At trial, Johnson identified Kirkman and his passenger as the shooters. There was disputed testimony about the cause of the fight. Convicted of murder and aggravated battery with a firearm, Kirkman was sentenced to life in prison. Johnson had a

change of heart and submitted an affidavit, identifying Ford and an unknown man as the shooters. At Kirkman's post-conviction hearing, Johnson testified that he and his family had been threatened. Other testimony was inconsistent with Johnson's. Illinois courts denied post-conviction relief, finding that Johnson's recantation lacked credibility. Johnson later pleaded guilty for perjury but failed to specify which statement was false. The Seventh Circuit affirmed the denial of federal habeas relief. Illinois courts found Johnson's recantation lacked credibility. An evidentiary hearing satisfied Kirkman's due process rights. The Illinois trial court's determination defeated Kirkman's innocence and perjured testimony claims.

Tuduj v. Newbold

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1699
Opinion Date: May 1, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Illinois prisoner Tuduj, having received extensive dental treatment, filed a "deliberate indifference" suit under 42 U.S.C. 1983 against his dentists and prison officials. The court recruited counsel to assist Tuduj in filing an amended complaint that complied with the Federal Rules of Civil Procedure. Counsel defended against two summary judgment motions, one arguing that Tuduj had not exhausted his administrative remedies and another on the merits While the motions were pending, Tuduj moved "for leave to represent himself," stating that he was "concerned that his counsel has filed a structurally, technically and legally insufficient response doomed to be denied." He asked to file his own brief, except "in the event this Honorable Court deems counsel's response … legally sufficient and Grants same[,] Plaintiff would be open to continued effective representation." A magistrate denied Tuduj's motion, stating that Tuduj "varie[d] between saying he would like to" represent himself and "indicating that he is happy with counsel's representation as long as he prevails." The district judge granted the motions for summary judgment, citing professional judgment and finding "no competent evidence" of any policy that unlawfully influenced dental-treatment decisions. The Seventh Circuit rejected Tuduj's argument

that the court wrongly denied his “unqualified” right to proceed pro se under 28 U.S.C. 1654, the due process clause, the equal protection clause, and the Seventh Amendment. The district court permissibly denied his equivocal request.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Gibson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1402
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Constitutional Law, Criminal Law

Officer Garrison encountered Gibson, a suspected drug trafficker, walking with a companion. Although initially a consensual encounter, Garrison questioned Gibson and his companion and briefly detained Gibson. After Gibson and his companion departed, Garrison spotted a methamphetamine pipe under his patrol vehicle. Local law enforcement conducted a traffic stop of Gibson’s vehicle in the curtilage of his driveway. A drug detection dog signaled the presence of a controlled substance in the vehicle, though nothing was found. Earlier that day, Gibson’s wife had met with DEA agents to tell them about methamphetamine inside the home. Police used information Mrs. Gibson had provided to obtain a search warrant. The search of the home uncovered drugs, drug paraphernalia, currency, and AK-47 rifles, which led to Gibson’s arrest. Gibson moved to suppress all evidence seized during the search, alleging he was detained without reasonable suspicion, unlawfully frisked, arrested without probable cause, stopped without probable cause or reasonable suspicion, and the traffic stop exceeded a permissible scope. Upon learning of his wife’s cooperation, Gibson also argued her statement was insufficiently attenuated to justify the search warrant. The Seventh Circuit affirmed the denial of the motion. Mrs. Gibson’s voluntary statement with DEA agents was independently sufficient to sustain findings of probable cause and sufficiently attenuated from subsequent events to preclude suppression.

United States v. Howell

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3157
Opinion Date: May 4, 2020
Judge: Scudder
Areas of Law: Constitutional Law, Criminal Law

In December 2012, Chicago Police officers responded to an anonymous call reporting a Hispanic man in a black sweater and black hat, carrying a bag, and climbing under a warehouse fence. They found someone who matched the description. After stopping and frisking him, they determined he was not engaged in any crime. Howell, walking toward the police, was white and wearing a black jacket and dark hat. When an officer approached to speak to him, Howell did not answer, looked panicked, and put his hands in his pockets. The officer patted Howell down and found a gun in his jacket. A federal gun charge followed. Howell unsuccessfully moved to suppress the gun. The Seventh Circuit reversed the denial of his suppression motion and vacated his conviction for possessing that gun. The court noted that the facts in the pretrial record differed significantly from those presented at trial, where the arresting officer testified that he decided to proceed with the pat-down only after Howell ignored a directive to remove his hands from his pockets. Viewing the pretrial record as a whole, the police lacked reasonable suspicion to frisk Howell. The court did not reverse Howell's conviction on a second gun charge that resulted from the execution of a warrant to search Howell's apartment three months after the initial stop and the ensuing discovery of more guns and ammunition.

United States v. Lewis

Court: US Court of Appeals for the Seventh Circuit
Dockets: 19-1911, 19-1262
Opinion Date: May 7, 2020
Judge: Joel Martin Flaum
Areas of Law: Criminal Law

In 2016-2018, Draheim managed a conspiracy, responsible for at least 38 packages of methamphetamine sent from California to La Crosse,

Wisconsin. Draheim supervised at least 11 associates who accepted shipments on her behalf, sent money transfers to California, distributed the meth, rented storage lockers, and collected money owed to her. Draheim provided vehicles. After agents placed a wiretap on her phone and seized several packages of meth en route to Draheim, her California supplier forced Draheim to find a new source. Draheim contacted Lewis, recently out of jail but still involved in the "meth scene." Lewis agreed to purchase meth from a new supplier. During the planned transaction, agents seized the package, which contained 28.6 grams of nearly pure meth. Police subsequently arrested Draheim after they found her daughter dead at home from an overdose; they took Lewis into custody for violating the terms of his state supervision. Both pleaded guilty to meth distribution offenses, 21 U.S.C. 841, 846. Draheim, facing a mandatory-minimum 10-year sentence, unsuccessfully argued that she qualified for "safety-valve relief." The court reasoned that she was the leader of her enterprise. Lewis unsuccessfully contended that he should be sentenced based only on his conviction, not other "relevant conduct." The Seventh Circuit affirmed Draheim's sentence but vacated as to Lewis. The fact that the defendant has engaged in other drug transactions is not, alone, sufficient to justify treating those transactions as relevant conduct for sentencing purposes.

Bakor v. Barr

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3011
Opinion Date: May 7, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit denied a petition for review of the BIA's determination that defendant committed two crimes involving moral turpitude. The court held that the BIA did not err in determining that petitioner's conviction for the Minnesota crimes of Criminal Sexual Conduct in the Fifth Degree and knowing failure to comply with Minnesota's sex offender registration statute were crimes involving moral turpitude. The court also held that petitioner failed to exhaust his remaining arguments and therefore declined to consider them.

Smith v. Titus

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2915
Opinion Date: May 5, 2020
Judge: Steven M. Colloton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eighth Circuit affirmed the district court's denial of habeas relief to petitioner based on his claim that the trial court violated his Sixth Amendment right to a public trial when it briefly closed the courtroom to spectators. The district court denied relief based on the ground that the Minnesota Supreme Court's decision was neither contrary to, nor an unreasonable application of, clearly established federal law. The court agreed and held that it was not objectively unreasonable for the Minnesota Supreme Court to deem it constitutional under the Sixth Amendment for the trial court to explain the parameters of an earlier public order on evidentiary issues in a brief nonpublic proceeding before the jury was sworn.

United States v. Becerra

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2777
Opinion Date: May 7, 2020
Judge: Stras
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm and ammunition. The court held that there was more than enough evidence for defendant's probation officer and other officers to believe defendant had a firearm on him. Therefore, the officers had probable cause to arrest him without a warrant. The court also held that defendant was in custody when he made both statements at issue. In this case, the "request for clarification" of defendant's statement that he had "something" in his car did not require Miranda warnings. Furthermore,

because the bulge in defendant's pocket could have been a gun or other weapon that would have posed a danger to the officers and others, they could ask about it without the formality of Miranda warnings. The court joined its sister circuits in declining to recognize the innocent-possessor defense. The court held that the district court did not err in excluding defendant's proposed testimony that he had found the handgun in his car earlier in the day and was about to hand it over to his probation officer. The court reasoned that, even if defendant intended to turn over the gun (or the ammunition) to his probation officer, it is still a crime to knowingly possess it in the first place. Finally, the court held that the district court did not err in denying defendant a sentencing reduction for acceptance of responsibility; the district court considered defendant's mitigation arguments at sentencing; and the district court did not abuse its discretion by imposing a within-Guidelines sentence.

United States v. Haynes

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1607
Opinion Date: May 5, 2020
Judge: Raymond W. Gruender
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that the government did not violate the Speedy Trial Act, and defendant failed to offer any evidence showing that Iowa and federal prosecutors colluded. Furthermore, the district court did not abuse its discretion by failing to hold an evidentiary hearing regarding the existence of collusion. The court also held that the district court did not err in denying the motion to suppress where defendant was not unlawfully seized. In this case, prior to producing the marijuana cigarette, the officer did not ask defendant any questions but merely ordered him off the bus, particularly as the smell of marijuana alerted the officer that evidence of a more serious crime than failure to use a turn signal might be uncovered during the stop. Finally, the court held that defendant was not unlawfully searched when the officer conducted a pat-down search incident to arrest; the evidence was sufficient to support defendant's conviction;

defendant's Rehaif claim failed because there was sufficient evidence that he knew of his prohibited status; and defendant's sentence was not substantively unreasonable nor an abuse of the district court's discretion.

United States v. Roberts

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1176
Opinion Date: May 1, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law

The Eighth Circuit vacated defendant's sentence imposed after he pleaded guilty to unlawful possession of a firearm as a previously convicted felon. The court held that, although the district court properly applied a four-level increase for possession of a firearm "in connection with another felony offense" under USSG 2K2.1(b)(6)(B), but that a two-level increase for "using a minor to commit a crime" under USSG 3B1.4 should not have applied. In this case, the evidence showed only that defendant engaged in an arm's-length transaction with a minor. The court held that this mere joint participation in an offense as a partner, does not amount to "use" of a minor "to commit the offense" of unlawful possession of a firearm by a felon. Accordingly, the court remanded for resentencing.

United States v. Wright

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1081
Opinion Date: May 5, 2020
Judge: Erickson
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's restitution order and certain special conditions of defendant's supervised release imposed after he pleaded guilty to sex trafficking of a child. The court found no error in the district court's restitution amount of $20,000, holding that the evidence

supported the amount in light of the aggregate harm to the victim. The court also held that the special conditions -- including a requirement that defendant participate in sex offender treatment including psychological testing and polygraph examinations, a prohibition against contact with any minors without pre-approval, and a requirement that defendant seek prior approval before using temporary commercial lodging, such as a hotel or motel -- where reasonably related to both the offense of conviction and to defendant's history of sexual contact with minor females.

Benson v. Chappell

Court: US Court of Appeals for the Ninth Circuit
Docket: 13-99004
Opinion Date: May 1, 2020
Judge: Consuelo Maria Callahan
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's denial of petitioner's habeas corpus petition challenging his California conviction and death sentence for murder and other crimes. Petitioner raised two certified claims and two uncertified claims. The panel held that petitioner failed to show that the California Supreme Court's denials of his claims were unreasonable determinations of the facts or contrary to clearly established federal law. In this case, the California Supreme Court reasonably determined that an officer's misstatement during petitioner's interrogation that there was no death penalty in California did not prompt petitioner's confessions. Furthermore, petitioner failed to show that his statements were not knowing, voluntary, and intelligent. Even if petitioner were able to show that trial counsel was ineffective in not fully investigating his abuse as a child or his alleged organic brain injury, the panel held that the state court could reasonably have determined that any shortcoming in trial counsel's investigation was not prejudicial. Finally, the panel granted a certificate of appealability on petitioner's two uncertified claims and held that the state court reasonably rejected the claims that his trial counsel should have impeached the government's case and the prosecutor withheld material, exculpatory evidence.

Mero v. Barr

Court: US Court of Appeals for the Ninth Circuit
Docket: 17-70929
Opinion Date: May 1, 2020
Judge: Paul Jeffrey Watford
Areas of Law: Criminal Law, Immigration Law

The Ninth Circuit granted in part a petition for review of the BIA's finding that petitioner was removable based on his conviction for possession of visual presentation depicting sexual conduct of a person under 16 years of age, in violation of Nevada Revised Statutes (N.R.S.) 200.730. Applying the categorical approach, the panel compared the elements of N.R.S. 200.730 with the applicable definition of "sexual abuse of a minor," which requires proof of three elements. The panel held that N.R.S. 200.730 punishes a broader range of conduct because the Nevada statute does not require proof that the offender participated in sexual conduct with a minor. Therefore, petitioner's conviction did not qualify as sexual abuse of a minor. The panel explained that, with a possession-only offense such as N.R.S. 200.730, the minor depicted in the image is not the direct object of the offender's conduct, which is a necessary predicate for the offense to qualify as sexual abuse of a minor.

United States v. Yang

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10341
Opinion Date: May 4, 2020
Judge: Piersol
Areas of Law: Criminal Law

The Ninth Circuit affirmed the district court's denial of defendant's motion to suppress after he pleaded guilty to receipt of stolen mail and being a prohibited person in possession of a firearm. Defendant moved to suppress the evidence seized from his residence and the statements he made to law enforcement on the basis that the search warrant obtained by the Postal Inspection Service relied on evidence that was obtained illegally. The panel declined to address the potential Fourth Amendment privacy interests that may be implicated by the warrantless use of this Automatic License Plate Recognition (ALPR) technology, and held that defendant does not have a reasonable expectation of privacy in the historical location data of the Yukon under the facts of this case. The panel found no evidence in the record that Prestige Motors had a policy or practice of allowing lessees to keep cars beyond the rental period and Prestige had made affirmative attempts to repossess the vehicle by activating the GPS unit to locate and disable the vehicle. Therefore, defendant lacked standing to challenge the warrantless search of the database.

United States v. Neugin

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-7043
Opinion Date: May 1, 2020
Judge: Scott Milne Matheson, Jr.
Areas of Law: Constitutional Law, Criminal Law

Jack Neugin pled guilty to being a felon in possession of a firearm and ammunition on the condition that he could appeal the district court's denial of his motion to suppress evidence of the ammunition and firearm police found in the bed of his pickup truck. Officers responded to a reported verbal altercation between Neugin and his girlfriend. One of the officers saw ammunition in the back of the truck after he lifted the truck's camper lit do allow the girlfriend to retrieve her belongings. Neugin argued the officers discovered the evidence during an unconstitutional search; the district court concluded the officer was acting "in a lawful position" as "community caretaker," and found no Fourth Amendment violation. The Tenth Circuit reversed, finding that : (1) the officer conducted the without a warrant or probable cause, (2) the community caretaking exception to the warrant requirement does not apply, and (3) the inevitable discovery exception to the exclusionary rule does not apply. The evidence seized should have been suppressed.

United States v. Ramon

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-1221
Opinion Date: May 1, 2020
Judge: Gregory Alan Phillips
Areas of Law: Constitutional Law, Criminal Law

In 2016, after serving a federal prison sentence for having possessed a firearm after a felony conviction, Charles Ramon III began serving a mandatory term of supervised release. Before Ramon completed the term, his probation officer filed a petition, soon followed by two superseding petitions, to revoke Ramon's supervised release. At the revocation hearing, the district court found three violations—two for possessing a controlled substance and one for again illegally possessing a firearm. Of these, the most serious was Ramon's illegal possession of a firearm—a Grade B violation. For this, the court imposed the statutory maximum sentence of twenty-four months in prison. During the revocation hearing, the government mentioned that it might seek to indict Ramon for illegally possessing a firearm (the conduct in part underlying the revocation). Mindful of this, the district court ordered that Ramon's twenty-four-month sentence run

"consecutively to any sentences imposed previously or prospectively in federal or state court." At the hearing, Ramon did not object to the district court's running his sentence consecutively to future federal sentences. On appeal, Ramon argued that the district court exceeded its sentencing authority under 18 U.S.C. 3584(a) by ordering that Ramon's sentence run consecutively to future federal sentences. By the terms of 18 U.S.C. 3584(a), the Tenth Circuit determined the district court did err. But Ramon failed to object to this at trial, and on appeal, failed to show that the error was plain, thus, judgment was affirmed.

United States v. Richards

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-8044
Opinion Date: May 6, 2020
Judge: Baldock
Areas of Law: Constitutional Law, Criminal Law

In 2018, the Wyoming Division of Criminal Investigation (DCI) obtained a search warrant to review the contents of Defendant–Appellant Joshua Richards' Tumblr account. During the search and subsequent investigation, DCI agents discovered Defendant had re-blogged videos and images of child pornography to his private Tumblr so he could later access and view the materials. Defendant ultimately pleaded guilty to one count of accessing with intent to view child pornography. He was sentenced to twenty-four months' imprisonment followed by five years of supervised release. The district court imposed several special conditions of supervised release, which, as relevant here, related to drugs and alcohol and required Defendant to submit to polygraph testing. On appeal, Defendant argued the district court erred in imposing these special conditions. He also challenged the length of his prison sentence as substantively unreasonable. The Tenth Circuit determined the alcohol and drug conditions did not directly conflict with the relevant policy statement in the sentencing guidelines, so the district court's decision to impose the conditions was not manifestly unreasonable. And given the circumstances of the case, the Court determined the trial court did not abuse its discretion in imposing Defendant's twenty-four month sentence.

Andrews v. Warden

Court: US Court of Appeals for the Eleventh Circuit
Docket: 19-12443
Opinion Date: May 5, 2020
Judge: William Holcombe Pryor, Jr.
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of habeas relief under 28 U.S.C. 2241. Plaintiff alleged that President Obama commuted his "total sentence" of imprisonment, which included the 37 months of imprisonment that he served as part of his 2003 sentence. Based on the terms of the commutation order, the Constitution, and Supreme Court precedent, the court could not say that the Bureau erred in excluding the 37-month term of imprisonment from its recalculation.

Hollis v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 19-11323
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's motion to vacate his sentence under 28 U.S.C. 2255. The court held that petitioner cannot prove that his counsel rendered ineffective assistance, because petitioner's prior convictions in Alabama categorically qualify as predicate offenses under both the Armed Career Criminal Act and the career-offender provision of the Guidelines, and his prior conviction in Georgia qualifies as a predicate offense under the Act. Therefore, counsel did not perform deficiently by failing to raise a meritless objection.

Knight v. Florida Department of Corrections

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-12488
Opinion Date: May 1, 2020
Judge: Newsom
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eleventh Circuit affirmed the district court's denial of a 28 U.S.C. 2254 petition for habeas relief. Petitioner alleged that his counsel rendered ineffective assistance under Strickland v. Washington, 466 U.S. 668 (1984), by failing to adequately investigate and present mitigating evidence during the sentencing phase of his capital-murder trial. The court held that, even assuming that counsel performed deficiently in failing to investigate and present the mitigation evidence that petitioner now raises—thus satisfying the first prong of the two-part Strickland standard that governs ineffective-assistance claims—petitioner failed to carry his burden of demonstrating resulting prejudice.

United States v. Evans

Court: US Court of Appeals for the Eleventh Circuit
Docket: 17-15323
Opinion Date: May 6, 2020
Judge: Grant
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that, given the totality of the circumstances, it was reasonable for officers, mistaking a dog's whimper for a person in distress, to enter defendant's home without a warrant. Therefore, defendant's challenge to the district court's denial of his motion to suppress evidence failed. The court upheld the district court's imposition of a 22 offense level finding because defendant possessed a semiautomatic firearm capable of accepting a large capacity magazine under USSG 2K2.1(a)(3)(A)(i) (2016). The court also upheld defendant's sentencing enhancement under USSG 2K2.1(b)(4)(B) for possessing a rifle that had an

obliterated serial number.

United States v. McLellan

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-13289
Opinion Date: May 6, 2020
Judge: Boggs
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm. The court held that the district court did not abuse its discretion in permitting one of his arresting officers to offer testimony at trial on the correlation between guns and drug activity and to suggest that defendant was selling drugs; the court declined to evaluate the applicability of the Armed Career Criminal Act (ACCA), because the district court would have imposed the same sentence regardless of whether the mandatory minimum applied; and the court rejected defendant's claim under Rehaif v. United States, 139 S. Ct. 2191 (2019), and held that there was no plain error in the district court's failure to instruct the jury of the knowledge-of-status element and any error from the lack of a knowledge-of-status element in defendant's plea colloquy did not affect his substantial rights. Finally, the court remanded for clarification of the judgment to reflect the sentence the district court said it would have imposed if the Armed Career Criminal Act did not apply.

United States v. Russell

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-11202
Opinion Date: May 4, 2020
Judge: Charles R. Wilson
Areas of Law: Criminal Law

Defendant was convicted of possessing a firearm and ammunition as an immigrant illegally or unlawfully in the United States. After defendant

appealed his conviction and sentence, the Supreme Court issued its decision in Rehaif v. United States, 588 U.S. ___, 139 S. Ct. 2191 (2019), which reversed a decision from this court and held that under 18 U.S.C. 922(g), the government must prove that a defendant knew "his status as a person barred from possessing a firearm" when he knowingly possessed a firearm. The Eleventh Circuit held that defendant established the necessary prejudice under plain error review and vacated defendant's section 922(g) conviction, remanding for further proceedings. In this case, the district court committed an error that was made plain by the Supreme Court in Rehaif. Furthermore, defendant has sufficiently shown a reasonable probability that but for the error, the outcome of his trial would have been different.

Welch v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 14-15733
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's 28 U.S.C. 2255 motion to vacate his sentence. The court held that defendant's prior 1996 Florida convictions for robbery qualified as violent felonies under the Armed Career Criminal Act's (ACCA) elements clause, and rejected his contention that the court's decision in his direct appeal carved out a narrow exception to pre-1997 Florida robbery convictions obtained in Florida's Fourth District Court of Appeal. The court also held that petitioner's prior Florida felony battery conviction was a violent felony under the ACCA in light of the court's holding in United States v. Vail-Bailon, 868 F.3d 1293 (11th Cir. 2017) (en banc), cert. denied, 138 S. Ct. 2620 (2018).

State v. Trujillo

Court: Arizona Supreme Court
Docket: CR-18-0531-PR

Opinion Date: May 4, 2020
Judge: Gould
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court held that, for purposes of imposing mandatory sex offender registration under Ariz. Rev. Stat. 13-3821(A)(3), a judge has the authority to make the necessary factual finding that the victim is under the age of eighteen and that Arizona's sex offender registration statutes are civil regulatory statutes, not criminal penalties. Defendant was convicted by a jury of one count of sexual abuse. In reaching its verdict the jury determined that the victim was "fifteen or more years of age." At sentencing, the trial court ordered Defendant to register as a sex offender. Defendant objected, arguing that, pursuant to Apprendi v. New Jersey, 530 U.S. 466 (2000), a jury was required to find whether Defendant was under eighteen pursuant to section 13-3821(A)(3). The trial court denied the objection. The court of appeals affirmed. The Supreme Court affirmed, holding (1) Apprendi does not apply to factual findings that are necessary to impose registration because sex offender registration is a civil regulatory requirement, not a criminal penalty; and (2) the trial judge did not violate Apprendi by determining that the victim was under eighteen.

California v. Law

Court: California Courts of Appeal
Docket: E072845(Fourth Appellate District)
Opinion Date: May 5, 2020
Judge: Slough
Areas of Law: Constitutional Law, Criminal Law

In 2001, appellant Terrell Law and his codefendant Brett May committed a home invasion robbery, during which one of them shot and killed one of the residents. They were tried jointly in 2006 before two separately empaneled juries who found them both guilty of first degree felony murder with the special circumstance described in Penal Code section 190.2(a)(17(A) and (d). Though Law's jury found he was not the shooter, they nonetheless concluded he was a "major participant" in the underlying robbery and acted "with reckless indifference to human life." In 2018, the Legislature enacted Senate Bill No. 1437 (2017-2018 Reg. Sess.) which, among other things, amended the definition of felony murder in Penal Code section 189. The legislation also added Penal Code section 1170.95, which established a procedure for vacating murder convictions predating the amendment that could not be sustained under the new definition of felony murder. Law challenged the trial court's summary denial of his section 1170.95 petition to vacate his murder conviction, arguing the trial court erred by reviewing his record of conviction and determining the jury's true finding on the special circumstance rendered him ineligible for relief. The Court of Appeal concluded it was proper for a trial court to review the record of conviction when determining whether a section 1170.95 petitioner had stated a prima

facie claim for relief. Additionally, the Court concluded Law "undoubtedly qualifies" as a major participant who acted with reckless indifference to human life, a conclusion that rendered him ineligible for relief under section 1170.95. The Court therefore affirmed the order denying his petition.

Galeotti v. International Union of Operating Engineers

Court: California Courts of Appeal
Docket: A157785(First Appellate District)
Opinion Date: May 6, 2020
Judge: Henry E. Needham, Jr.
Areas of Law: Criminal Law, Labor & Employment Law, White Collar Crime

Galeotti, a former Union Local 3 employee, filed a complaint against Local 3 and three of individual union leaders, alleging that the individual defendants required union employees to pay them money to keep their jobs, lied about the reason for collecting the money, and caused Local 3 to terminate Galeotti's employment when he failed to pay the full amount demanded. The trial court dismissed his second amended complaint without leave to amend.

The court of appeal reversed in part, reasoning that a threat to terminate employment can provide a basis for an extortion claim and that the allegations of the second amended complaint stated a cause of action for wrongful termination in violation of the public policy underlying the extortion statutes. The complaint stated a cause of action for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO; 18 U.S.C. 1961), based on the predicate acts of extortion, but did not state a cause of action for interference with prospective economic advantage.

In re I.A.

Court: California Courts of Appeal
Docket: B296549(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Tangeman
Areas of Law: Criminal Law, Juvenile Law

Where a juvenile court vacates its true finding on a generic murder allegation and redesignates it as a finding on an uncharged target offense, and does so before a minor has had the opportunity to contest the court's findings or orders, the minor may challenge the sufficiency of the evidence of the redesignated offense on appeal. The Court of Appeal held that there was insufficient evidence to support the juvenile court's decision sustaining the allegations that I.A. possessed a concealable firearm and committed vandalism. Therefore, the court reversed the juvenile court's findings, vacating the jurisdiction and disposition order and dismissing the Welfare and Institutions Code section 602 petition.

People v. Edwards

Court: California Courts of Appeal
Docket: A158055(First Appellate District)
Opinion Date: May 1, 2020
Judge: Petrou
Areas of Law: Criminal Law

In 2006, Edwards fired an assault weapon into an apartment, killing the victim. Edwards pled guilty to possession of a firearm as a felon and was convicted of second-degree murder and shooting into an inhabited dwelling. Following the enactment of Senate Bill 1437, Edwards filed a Penal Code 1170.95 resentencing petition, checking form boxes indicating that he was convicted under a theory of felony murder or murder under the natural and probable consequences doctrine and that he could not now be convicted of 1st or 2nd-degree murder because of changes to Penal Code 188 and 189. Edwards submitted the jury instructions and the transcript of the prosecutor's closing remarks that Edwards acted with "both express malice, specific intent to kill, as well as implied malice," described as "an intentional act, the natural consequences of which are dangerous to human life, and at the time that the individual acted, they knew of the danger, and they deliberately acted with conscious disregard." The court denied the petition, finding that Edwards was convicted on a valid theory of murder that survived the statutory changes. The court of appeal affirmed. The superior court did not err in considering the record of conviction. Edwards could not meet the statutory prerequisites for even filing a section 1170.95 petition because he was not charged or convicted of second-degree felony murder or murder under the natural or probable consequences doctrine directed at accomplice liability.

People v. Thomkins

Court: California Courts of Appeal
Docket: A141375(First Appellate District)
Opinion Date: May 1, 2020
Judge: Streeter
Areas of Law: Criminal Law

On Easter night in 2011, gunfire erupted at an Oakland bar-restaurant, leaving two people dead and five wounded. Thompkins and Fox were convicted of two counts of first-degree murder for the benefit of a criminal street gang, with firearm discharge enhancements, a multiple-murder special circumstance, and five counts of attempted murder with great bodily injury findings, gang enhancements, and firearm discharge enhancements.

Thompkins was convicted as the shooter and Fox as an accomplice. Both were sentenced to life in prison without possibility of parole, plus 224 years to life. After Thompkins was sentenced, Fox stated under oath he was the actual shooter and Thompkins knew nothing about Fox's intentions. Thompkins claimed this new testimony, and his attorney's incompetent reaction entitled him to a new trial and submitted a declaration by another gang member who was present that night. The court of appeal concluded that Thompkins's attorney was not ineffective for failing to bring a motion to recall the sentence followed by a new trial motion because Thompkins failed to show prejudice. The attempted murder convictions and related enhancements must be reversed for both defendants based on the flawed kill zone instruction. Introducing evidence that defendants admitted their gang affiliation at jail intake violated the defendants' privilege against self-incrimination but was harmless. There was some evidentiary error that was harmless due to the wealth of admissible evidence establishing the gang enhancements. Arguments based on the statutory amendments to Penal Code 188 and 189 must be raised in the trial court (section 1170.95). The case must be remanded so the judge may exercise his discretion whether to impose or strike the firearm enhancements on under Penal Code 12022.53.

People v. Torres

Court: California Courts of Appeal
Docket: B295043(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Wiley
Areas of Law: Criminal Law

After the trial court admitted a witness's former testimony, the Court of Appeal applied People v. Roldan (2012) 205 Cal.App.4th 969, 975–985, and reversed. Roldan held that, before invoking the former testimony exception, prosecutors should react appropriately to the impending deportation risk by following four steps: alert the defense to the risk; videotape the preliminary hearing testimony; use judicial measures to try to delay deportation; and consider an array of other specific measures. In this case, the prosecution conceded that prosecutors were simply unaware of Roldan and did not comply with it. The court held that Roldan controls the court's analysis

because the facts about prosecutorial diligence are weaker here than they were in Roldan, where the appellate court held for the defense. In this case, the record before deportation is of prosecutorial inaction where the prosecution's brief in this court admits the investigating officer did not do anything to ensure that the witness would not be deported, nor is there other evidence of prosecutorial efforts to delay the witness's departure or to videotape his testimony at the preliminary hearing.

People v. Triplett

Court: California Courts of Appeal
Docket: B298914(Second Appellate District)
Opinion Date: May 1, 2020
Judge: Frances Rothschild
Areas of Law: Criminal Law

Defendant was convicted of assault with a deadly weapon, carjacking, and attempted murder. In the published portion of the opinion, the Court of Appeal held that the trial court erred by denying defense counsel's request to inform the jurors that they could have testimony of certain witnesses read back to them. The court also held that, under the circumstances in this case, the error was harmless.

Colorado In Interest of G.S.S.

Court: Colorado Supreme Court
Citation: 2020 CO 32
Opinion Date: May 4, 2020
Judge: Brian D. Boatright
Areas of Law: Constitutional Law, Criminal Law, Juvenile Law

After being charged, fourteen-year-old G.S.S. was detained for more than three months without bail, even though he had not entered a plea and had not been tried on the charges against him. At that point, G.S.S.'s counsel filed a motion to dismiss, arguing that G.S.S.'s "right to a speedy trial" had been violated under section 19-2-509(4)(b), C.R.S. (2019). The trial court

agreed and dismissed the case against G.S.S. with prejudice, and the court of appeals affirmed in Colorado in Interest of G.S.S., 2019 COA 4M, __ P.3d __. The Colorado Supreme Court then granted certiorari to determine the proper remedy for a violation of the sixty-day limit in section 19-2-509(4)(b). The Supreme Court determined the remedy for a section 19-2-509(4)(b) violation was for the trial court to immediately hold a bail hearing and order the juvenile's release. Accordingly, the judgment of the court of appeals was reversed.

Barringer v. Halkitis

Court: Florida Supreme Court
Docket: SC19-1071
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court held that Jay Barringer's quo warranto petition filed in this case was a frivolous proceeding brought before the Supreme Court by a state prisoner and sanctioned Barringer by barring him from filing any further pro se requests for relief related to his criminal case. Barringer was convicted of one count of attempted sexual battery of a victim less than twelve years old and sentenced to twenty-five-years' imprisonment. In 2011, Barringer began filing petitions in the Supreme Court. The Court did not grant the relief sought in any of Barringer's filings. In the instant quo warranto petition Barringer challenged his conviction on the ground that the information was defective, a claim Barringer previously raised by way of a habeas petition. The Supreme Court denied the petition and found that Barringer abused the Court's limited judicial resources. The Court sanctioned Barringer by directing the Clerk of Court to reject any future pleadings or other requests for relief submitted by Barringer that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Franqui v. State

Court: Florida Supreme Court
Docket: SC19-203
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's claim of intellectual disability, raised in successive motions for postconviction relief under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying relief. Appellant was convicted of first-degree murder and sentenced to death in two separate cases. After the United States Supreme Court decided Hall v. Florida, 572 U.S. 701 (2014), Appellant filed successive motions for postconviction relief in both of his capital cases, asserting that the circuit court's denials of his previous claims of intellectual disability were based on the court's improper interpretation of Florida's intellectual disability statute. The circuit court summarily denied the motions. The Supreme Court reversed and remanded for an evidentiary hearing on the issue of intellectual disability. After a hearing, the circuit court denied the claim. The Supreme Court affirmed, holding (1) the circuit court did not err in denying Appellant's intellectual disability claim; and (2) Appellant was not entitled to relief under Hurst v. Florida, 136 S. Ct. 616 (2016), or Hurst v. State, 202 So. 3d 40 (Fla. 2016).

Hicks v. State

Court: Florida Supreme Court
Docket: SC19-1978
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied the instant mandamus petition filed by Hicks and sanctioned Hicks by barring him from filing any further pro se requests for relief related to his criminal case. Hicks was convicted of one count of lewd and lascivious conduct by a person over eighteen years of age on a victim under sixteen years of age. Since 2016, Hicks filed thirteen pro se requests for relief in the Supreme Court related to his criminal case. The

Court did not grant the relief sought in any of Hicks' filings. In the instant petition, Hicks sought a writ of mandamus compelling the circuit court to comply with the requirements of Fla. R. Crim. P. 3.850 by filing a copy of an order denying his second postconviction motion with the clerk of court. The Supreme Court dismissed the petition and found that Hicks abused this Court's limited judicial resources. The Court directed the Clerk of Court to reject any future pleadings or other requests for relief submitted by Hicks that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Burley v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0356
Opinion Date: May 4, 2020
Judge: Boggs
Areas of Law: Constitutional Law, Criminal Law

In 1992, Douglas Burley pled guilty to malice murder. He moved for an out-of-time appeal in 2019, claiming that his right to appeal was frustrated by his plea counsel's erroneous advice that he could not appeal his conviction because it was the product of a guilty plea. The trial court denied Burley's motion. After review, the Georgia Supreme Court vacated the trial court's judgment and remanded the case with direction to hold a hearing to determine whether ineffective assistance of counsel frustrated Burley's right to appeal.

Evans v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0007
Opinion Date: May 4, 2020
Judge: McMillan
Areas of Law: Constitutional Law, Criminal Law

Jimmy Evans was convicted by jury for murder and other crimes relating to the 2006 deaths of Tavoris Calhoun and Dezmon Thomas. On appeal, Evans argued that because he was visibly intoxicated at the time he made statements to law enforcement and consented to a search of his home and

person, the statements and consent were involuntarily given and the trial court should have granted his motion for new trial on this ground. Furthermore, Evans argued that his trial counsel was ineffective for failing to file a motion to suppress at trial on the same basis. Because Evans failed to show error or ineffective assistance of counsel, the Georgia Supreme Court affirmed his conviction.

Hill v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0285
Opinion Date: May 4, 2020
Judge: Harold D. Melton
Areas of Law: Constitutional Law, Criminal Law

Esco Hill was convicted by jury of malice murder and other crimes relating to the stabbing death of Alford Morris in 2014. On appeal, Hill argued the trial court committed reversible error by requiring him to be visibly shackled for the duration of his six-day trial. After review of the trial court record, the Georgia Supreme Court concurred this was reversible error, consequently, reversed judgment of conviction. Because the Court concluded the evidence at trial was sufficient to sustain Hill's conviction, the State could re-try him. The Court did not address Hill's remaining enumerations of error, "as they are not likely to recur in the event of a retrial."

Whitehead v. Georgia

Court: Supreme Court of Georgia
Docket: S20A0171
Opinion Date: May 4, 2020
Judge: Ellington
Areas of Law: Constitutional Law, Criminal Law

Javis Whitehead was convicted by jury of murder and other crimes in connection with the shooting death of Dominique Larry. On appeal, Whitehead challenged the sufficiency of the evidence presented to rebut his claim of self-defense and to convict him for murder beyond a reasonable doubt. He also argued the trial court erred in denying his motion to suppress his custodial statement, and in refusing to excuse for cause the District Attorney from the panel of prospective jurors prior to the conclusion of voir dire. Finding no merit to these contentions, the Georgia Supreme Court affirmed conviction.

Read Opinion Are you a lawyer? **Annotate this case**.

Idaho v. Blythe

Court: Idaho Supreme Court - Criminal
Docket: 46992
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Nicholas Blythe appealed after he was convicted of possessing a controlled substance. He conditionally pled guilty, reserving the right to challenge his sentence. On appeal, he argued the district court erred in denying his motion to suppress certain evidence found because the evidence presented at trial was found in violation of Blythe's Fourth Amendment rights. After review, the Idaho Supreme Court determined the search at issue took place before an arrest occurred, and because no rationale justifying a search incident to arrest was sufficiently present here, the search of Blythe's shoes was not a valid search incident to arrest. Therefore, the district court erred in holding that the search was reasonable under the Fourth Amendment. Blythe's conviction was vacated, the district court order denying Blythe's motion to suppress was reversed, and the matter remanded for further proceedings.

Read Opinion Are you a lawyer? **Annotate this case**.

Idaho v. Glodowski

Court: Idaho Supreme Court - Criminal
Docket: 47131
Opinion Date: May 6, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

David Glodowski appealed after he was convicted for failing to update his sex-offender registration in violation of Idaho Code section 18-8309. He argued the district court erred by ruling that his prior conviction under a Wisconsin statute was "substantially equivalent" to Idaho statutes that required sex-offender registration in Idaho. After review, the Idaho Supreme Court determined the district court improperly allowed the State to seek a

redetermination of the “substantially equivalent” element given that the Idaho Bureau of Criminal Identification made a final determination on that element. However, because the State put forth sufficient evidence to prove that element, and the district court’s jury instruction accomplished the same purpose, the Supreme Court concluded the error was harmless. Accordingly, the Court found no reversible error in the district court’s decision to grant the State’s motion and provide the jury instruction. Therefore, judgment of conviction was affirmed.

State v. Gordon

Court: Iowa Supreme Court
Docket: 18-1099
Opinion Date: May 1, 2020
Judge: Brent R. Appel
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for assault on a peace officer with a dangerous weapon, a felony, and several misdemeanors, holding that Defendant did not receive ineffective assistance of counsel. After Defendant pleaded guilty, he absconded. He was later returned to

custody. On appeal, Defendant argued that he received ineffective assistance of counsel because the plea bargain contained an unlawful term. Specifically, Defendant argued that the plea bargain's provision that he would be released from jail for a forty-eight-hour furlough after pleading guilty was illegal and that his trial counsel committed ineffective assistance in obtaining the illegal benefit for him. The Supreme Court affirmed, holding that where Defendant entered into the plea agreement with the illegally lenient sentence, he could not benefit from that sentence and then attack the plea bargain.

Read Opinion Are you a lawyer? **Annotate this case**.

State v. Craig

Court: Kansas Supreme Court
Docket: 119660
Opinion Date: May 1, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction and sentence for first-degree felony murder, holding that there was no error in the proceedings below. A jury found Defendant guilty of both first-degree felony murder and second-degree intentional murder. At sentencing, Defendant moved for a new trial and judgment notwithstanding the verdict, arguing that the jury must have had reasonable doubt on the first-degree felony murder theory because it convicted him of second-degree murder for the same killing. The district court dismissed the second-degree murder conviction and sentenced Defendant for the felony murder over his objection. The Supreme Court affirmed, holding (1) the district court did not err when it sentenced Defendant on felony murder instead of declaring a mistrial because Defendant did not establish that the jury failed to find each element of the felony murder beyond a reasonable doubt or that the jury's first- and second-degree murder verdicts were so irreconcilable as to require a new trial; and (2) the district court did not err in declining to give an instruction on voluntary intoxication.

Commonwealth v. Billingslea

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12715
Opinion Date: April 30, 2020
Judge: Cypher
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's convictions and the decision of the Appeals Court denying Defendant's motion to vacate the entry of his appeal from his convictions in that court and to have the case entered directly in the Supreme Judicial Court, holding that a direct appeal from the third conviction of a habitual offender pursuant to Mass. Gen. Laws ch. 279, 25(b) may be entered in the Appeals Court. Defendant was indicted for serious felonies arising from a brutal attack and rape. In addition to charging the specific felony, each indictment also alleged that the sentence for that felony should be enhanced pursuant to the habitual criminal provision Mass. Gen. Laws ch. 279, 25(a) or the habitual offender provision of section 25(b), or both. After he was convicted, Defendant moved to have the case entered directly in the Supreme Judicial Court. The Appeals Court denied the motion. The Supreme Judicial Court affirmed Defendant's convictions, holding (1) this direct appeal was entitled to the unique review prescribed by Mass Gen. Laws ch. 278, 33E, and the Appeals Court may conduct such section 33E review; (2) Defendant was not impermissibly allowed to waive his right to a jury trial on the sentencing enhancement provisions of the indictments; and (3) Defendant was not entitled to reversal of his convictions on any other ground.

Commonwealth v. Martin

Court: Massachusetts Supreme Judicial Court
Docket: SJC-08768
Opinion Date: May 5, 2020

Judge: Ralph D. Gants
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree and the denial of his motion for a new trial and declined to exercise its authority under Mass. Gen. Laws ch. 278E to reduce Defendant's conviction to murder in the second degree, holding that Defendant was not entitled to relief on any of his allegations of error. Defendant was convicted of murder in the first degree on the theory of felony-murder. Defendant filed a motion for a new trial, which was denied. The Supreme Judicial Court affirmed, holding (1) Defendant's motion for a new trial was correctly denied because Defendant was not prejudiced by counsel's ineffective assistance; (2) this Court declines to extend the reach of the Court's holding in Commonwealth v. Brown, 477 Mass. 805 (2017), to Defendant's case; and (3) trial judge erred when he declined Defendant's request that the jury be instructed on the elements of voluntary and involuntary manslaughter, but the error was not prejudicial in the context of the judge's other instructions.

Galloway v. Mississippi

Court: Supreme Court of Mississippi
Citation: 2018-CA-01427-SCT
Opinion Date: May 7, 2020
Judge: Beam
Areas of Law: Constitutional Law, Criminal Law

Leslie Galloway appealed the denial of his 2015 petition for post-conviction relief (PCR) pertaining to his 2007 guilty plea to carjacking, a conviction that was used as an aggravating circumstance in Galloway's 2010 capital-murder trial at which Galloway received a death sentence. Galloway claimed in the petition that his defense counsel Wendy Martin had an actual

conflict of interest because, before becoming his defense counsel, Martin had served as an assistant district attorney in the same case, unbeknownst to Galloway. The trial court ruled that Galloway's PCR claim was time barred under Mississippi's Uniform Post-Conviction Collateral Relief Act (UPCCRA), having been filed more than seven years after Galloway's conviction for carjacking. The trial court alternatively found no merit to Galloway's PCR claim, time bar notwithstanding. Accordingly, the trial court denied Galloway's PCR petition. The Mississippi Supreme Court agreed with the trial court that Galloway's PCR claim was time barred under the UPCCRA. The Court also agreed there was no merit to Galloway's PCR claim.

City of Missoula v. Zerbst

Court: Montana Supreme Court
Citation: 2020 MT 108
Opinion Date: May 5, 2020
Judge: Beth Baker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction for sexual assault, holding that the municipal court erred when it instructed the jury on a definition of "consent" from the 2017 sexual assault statute and not the applicable 2015 statute, and the erroneous jury instruction prejudicially affected Defendant's substantial rights. At trial, the court instructed the jury, over Defendant's objection, on the definition of consent contained in recent amendments to the sexual assault statute. On appeal, Defendant argued that the municipal court failed to apply the correct law when instructing the jury on the elements of the claimed offense. The district court denied the appeal. The Supreme Court reversed, holding (1) the instructions, as a whole, did not fully and fairly instruct the jury on the law applicable to the case; and (2) Defendant's substantial due process right was prejudiced by the erroneous jury instruction.

State v. Degarmo

Court: Nebraska Supreme Court
Citation: 305 Neb. 680
Opinion Date: May 1, 2020
Judge: Stacy
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of driving under the influence, holding that Defendant consented to a chemical test of his urine and, therefore, the results of the urine test were admissible. A law enforcement officer stopped Defendant for an expired registration. Based on his observations, the officer, a certified drug recognition evaluation expert, administered field sobriety tests. The officer concluded that Defendant was under the influence of marijuana arrested Defendant for driving under the influence and then took him to a detoxification center. Thereafter, a chemical test of Defendant's urine confirmed the presence of marijuana. On appeal, Defendant challenged the admission of the results of the urine test. The Supreme Court affirmed, holding that Defendant voluntarily consented to the warrantless search of his urine, and therefore, the search fell within a recognized exception to the warrant requirement.

People v. Holz

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02682
Opinion Date: May 7, 2020
Judge: Fahey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals held that N.Y. Crim. Proc. Law (CPL) 710.70(2) grants a defendant the right to review of a suppression decision when the order related exclusively to a count that was satisfied by a guilty plea but was not one to which the defendant pleaded guilty. Defendant was charged with two counts of burglary in the second degree. The first count related to a laptop computer, and the second count related to jewelry. Defendant moved to suppress the jewelry, but Supreme Court denied the motion. Defendant then pleaded guilty to one count of burglary in the second degree as charged in the count pertaining to the theft of the laptop computer, in satisfaction of the

count charging the burglary of jewelry. On appeal, Defendant argued that Supreme Court erred in denying his motion to suppress the jewelry. The Appellate Division affirmed, concluding that it was jurisdictionally precluded from reviewing the suppression order. The Court of Appeals reversed, holding (1) Defendant's right to appellate review of Supreme Court's suppression order was secured by CPL 710.70(2); and (2) because the Appellate Division did not reach the underlying suppression question the case must be remitted to the Appellate Division for further proceedings.

People v. Maffei

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02680
Opinion Date: May 7, 2020
Judge: DiFiore
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals affirmed the order of the Appellate Division concluding on direct appeal that Defendant was not entitled to relief on his ineffective assistance of counsel claim, holding that Defendant, on this record, did not sustain his burden to establish that counsel was constitutionally ineffective. After a jury trial, Defendant was convicted of second-degree murder. On appeal, Defendant argued that his trial counsel's failure to challenge a prospective juror constituted ineffective assistance of counsel. The Appellate Division affirmed. The Court of Appeals affirmed, holding (1) the record was inadequate to review Defendant's ineffective assistance of counsel claim; and (2) the appropriate procedure for the litigation of Defendant's challenge to his counsel's performance was a N.Y. Crim. Proc. Law 440.10 motion.

State v. Bailey

Court: North Carolina Supreme Court
Docket: 360A19
Opinion Date: May 1, 2020

Judge: Davis
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the order of the trial court denying Defendant's motion to suppress evidence seized during the execution of a search warrant, holding that the warrant supported by probable cause. Defendant pled guilty to the offense of trafficking in cocaine while preserving his right to appeal the denial of his motion to suppress. On appeal, Defendant argued that the trial court erred in denying his motion to suppress because the facts contained in the affidavit were insufficient to establish probable cause to search his residence. The court of appeals affirmed. The Supreme Court affirmed, holding that the affidavit contained facts that were sufficient to provide a nexus between the residence and suspected criminal activity, and therefore, the warrant was supported by probable cause.

State v. Ellis

Court: North Carolina Supreme Court
Docket: 340A19
Opinion Date: May 1, 2020
Judge: Robin E. Hudson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the decision of the Court of Appeals affirming the trial court's denial of Defendant's motion to suppress evidence, holding that there was no reasonable suspicion to justify the law enforcement officer's stop when Defendant signaled with his middle finger from the passenger side window of a moving vehicle. While assisting a stranded motorist, the officer turned his attention to another car traveling on the roadway, a white SUV. Defendant had his arm outside the passenger window and gestured with his middle finger, making an up-and-down motion. Believing that Defendant was committing the crime of disorderly conduct, the officer pursued and then stopped the SUV. At trial, Defendant moved to suppress the officer's testimony, arguing that there was no reasonable suspicion to justify the stop. The trial court denied the motion. Defendant pleaded guilty to resisting, delaying, or obstructing a public

officer. The court of appeals affirmed the trial court's denial of Defendant's motion to suppress. The Supreme Court reversed, holding that the specific, articulable facts did not establish reasonable suspicion of the crime of disorderly conduct.

State v. Hobbs

Court: North Carolina Supreme Court
Docket: 263PA18
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction, holding that the trial court clearly erred in ruling that Defendant failed to prove purposeful discrimination with respect to the State's use of peremptory challenges to strike three jurors without considering all of the evidence presented by Defendant. Defendant was found guilty of one count of first-degree murder and other crimes. On appeal, Defendant argued that the trial court erred by failing to grant three objections that he made under Batson v. Kentucky, 476 U.S. 79 (1986). The court of appeals affirmed Defendant's convictions. The Supreme Court reversed, holding (1) the court of appeals erred in its analysis of Defendant's Batson claims with respect to the three jurors; and (2) as to all three jurors, remand was required for reconsideration of whether Defendant proved purposeful discrimination in each case.

State v. Mylett

Court: North Carolina Supreme Court
Docket: 6A19
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the court of appeals affirming the trial court's judgment convicting Defendant for conspiracy to commit

harassment of a juror, holding that the trial court erred in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. Defendant was convicted of conspiracy to commit harassment of a juror because of his actions at a courthouse following his twin brother's conviction for assault on a government official. On appeal, the court of appeals concluded that the trial court did not err in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. The Supreme Court reversed, holding that the evidence in Defendant's trial was insufficient to raise anything more than mere conjecture that he had made an agreement with another person to threaten or intimidate a juror.

Dodge v. North Dakota

Court: North Dakota Supreme Court
Citation: 2020 ND 100
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

Richard Dodge appealed from a district court order denying his application for post-conviction relief. Dodge was charged with five felonies and a misdemeanor in December 2015. Dodge was appointed counsel. In April 2016, Dodge's counsel moved the court to withdraw because the attorney-client relationship was "irreparably broken and rendered unreasonably difficult." The court granted the motion, and Dodge was appointed substitute counsel in May 2016. In July 2016, Dodge himself filed a "motion to dismiss counsel." The court denied Dodge's motion. Five months after the deadline for motions and plea agreements, Dodge's counsel sought to have Dodge submit to a psychiatric examination. This request was denied, the trial court found no evidence, and the the court itself made no observations, that Dodge was incompetent to stand trial. After this denial, Dodge himself again moved to dismiss his trial counsel, and due to the allegations Dodge made in his motion, counsel moved to withdraw. The trial court denied both motions, and instead, required the attorney to appear as standby counsel and assist Dodge during trial if requested, but relieved him of any further obligations to consult with Dodge. The case proceeded to trial. At the beginning of trial, the court gave Dodge the option of representing himself or

having his attorney represent him. Dodge chose to have his attorney represent him. Because his attorney had not prepared for trial and had no communication with Dodge since he moved to withdraw, Dodge's attorney asked for a brief recess to consult with Dodge. During the recess, a settlement was reached. Dodge agreed to enter Alford pleas on all counts, waived a presentence investigation, and agreed to be sentenced immediately after entering his pleas. Dodge was immediately sentenced following his guilty pleas, and thereafter sought post-conviction relief on grounds he was not competent to enter his pleas, and that he received ineffective assistance of trial counsel. After review, the North Dakota Supreme Court concluded the district court's finding that Dodge was competent when he entered his pleas was not clearly erroneous, and disposed of his claim of ineffective assistance of counsel.

Kastet v. NDDOT

Court: North Dakota Supreme Court
Citation: 2020 ND 91
Opinion Date: May 7, 2020
Judge: Daniel J. Crothers

Areas of Law: Criminal Law, Government & Administrative Law

The North Dakota Department of Transportation (Department) appealed the district court's reversing a hearing officer's decision suspending Holden Kastet's driving privileges for 365 days. The Department argued the hearing officer did not abuse his discretion in admitting the chemical breath test, and State Highway Patrol Trooper King scrupulously complied with the approved method for testing Kastet's breath on the Intoxilyzer 8000. After review, the North Dakota Supreme Court concurred with the Department and reversed the district court judgment. The matter was remanded with instructions to reinstate the hearing officer's decision.

North Dakota v. Dahl

Court: North Dakota Supreme Court
Citation: 2020 ND 87
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

The State of North Dakota appealed a district court order denying its motion to resume prosecution against Matthew Dahl and dismissing the case. In December 2014, the State charged Dahl with two counts of theft. Dahl did not appear on the charges until he was arrested on a bench warrant in February 2017. In mid-April 2017, the State mailed Dahl a pretrial diversion agreement. Dahl signed and returned the notarized agreement dated May 3, 2017. On May 9, 2017, the state's attorney signed and filed the agreement with the district court, and the court approved the agreement the same day. Under the agreement, the State agreed to suspend prosecution for "two years from the date of execution" conditioned on Dahl's timely payment of restitution. Dahl failed to make minimum monthly restitution payments. On June 6, 2019, the State moved to resume prosecution, alleging Dahl violated the pretrial diversion agreement by his non-payment. The district court held a hearing on the State's motion in August 2019. The court concluded the pretrial agreement was executed when Dahl signed it on May 3, 2017. The court then denied the State's motion to resume prosecution as untimely under N.D.R.Crim.P. 32.2(d)(2), and dismissed the complaint

against Dahl. After review, the North Dakota Supreme Court reversed, concluding the district court erred in determining the State's motion was untimely, and remanded for further proceedings.

North Dakota v. Foster

Court: North Dakota Supreme Court
Citation: 2020 ND 85
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Akeem Foster was convicted by jury of Terrorizing and Carrying a Concealed Weapon. Foster contended on appeal he was denied a fair trial because he was asked during cross-examination if other witnesses were lying and because the prosecutor expressed personal beliefs about the evidence during closing arguments. Foster also argued there was insufficient evidence to convict him of either charge. After review, the North Dakota Supreme Court affirmed Foster's conviction for Carrying a Concealed Weapon, but reversed his conviction for Terrorizing. The Court found Foster was improperly asked to provide an opinion on the veracity and credibility of the State's witnesses. The improper questioning was prejudicial and denied Foster a fair trial on the terrorizing charge.

North Dakota v. Kolstad

Court: North Dakota Supreme Court
Citation: 2020 ND 97
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

In December 2018, Officer Nelson of the University of North Dakota Police Department conducted a traffic stop of Stanley Kolstad for suspicion of driving under the influence. Kolstad performed field sobriety tests and a preliminary breath test (PBT). Prior to performing the PBT, Kolstad informed

Nelson that he had asthma. Nelson testified he was unable to obtain a PBT result because Kolstad was filling his cheeks with air while performing the test. Kolstad was arrested for DUI and refusing to submit to a chemical test. Kolstad was transported to the UND police station to be given an Intoxilyzer breath test. Prior to the Intoxilyzer test, Nelson read Kolstad the implied consent advisory. But, because Nelson was not a certified operator of the Intoxilyzer machine, Officer Waltz conducted the test. Prior to the test, Kolstad informed Waltz he had asthma. The Intoxilyzer test results were deficient. Waltz testified Kolstad was not providing enough air for the test machine to provide a valid result. Kolstad was charged with driving under the influence and refusing to submit to a chemical test. Kolstad's counsel made a discovery request to the State seeking copies of any audio or video recordings taken by police officers. Kolstad's counsel also requested the State inform him whether any sound or video recordings taken of Kolstad were subsequently "altered, edited, destroyed, or discarded." The State provided Kolstad's counsel with dash camera footage from Nelson's police car that had been taken at the scene of the arrest, but the State did not provide any body camera footage from either Nelson or Waltz. Upon learning that Waltz's body camera footage was successfully uploaded to UND servers, Kolstad's counsel moved to dismiss the case because the State did not provide any body camera footage in discovery as requested. The district court ultimately dismissed the refusal to submit to a chemical breath test charge as a sanction for failing to provide the body camera footage. The State appealed, arguing the alleged discovery violation did not rise to a constitutional violation of Kolstad's due process rights, and the district court abused its discretion in dismissing the refusal charge. Kolstad argued the district court's order dismissing the refusal charge was not appealable, and if it was, the court did not abuse its discretion in dismissing the charge. The North Dakota Supreme Court concluded there was nothing in the record to indicate the district court adequately considered an alternative or less severe sanction to dismissal, and by not considering a less severe sanction, the trial court erred. The district court's order dismissing the refusal charge was reversed, and the matter remanded for further proceedings.

North Dakota v. Michel

Court: North Dakota Supreme Court
Citation: 2020 ND 101
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

Kevin Michel was convicted by jury of knowingly receiving stolen property. Jamestown Police began investigating theft of tires from Northwest Tire in October 2017. About ten months later, Thomas Melland and Andrew Heckelsmiller became suspects in the investigation. Heckelsmiller told police he had sold stolen tires to Michel. In August 2018, Detective LeRoy Gross spoke with Michel about the stolen tires. Michel acknowledged he had bought tires from Heckelsmiller and Melland. Michel also told Detective Gross he stopped buying tires from Heckelsmiller and Melland after seeing a Facebook post from Northwest Tire offering a $500 reward for information regarding stolen tires. Detective Gross told Michel, "There's going to be a lot of restitution these two boys are going to have to come up with unless we can get some tires back." Michel said he had sold several of the tires but still had some of them. Michel turned over seven new tires to Detective Gross. Representatives from Northwest Tire and J&L Service identified the tires as some of those stolen from their shops. During the jury's deliberations, the jury submitted a note with written questions to the court. Michel argued on appeal the district court erred by not specifically answering the jury's questions and instead referring them to the existing jury instructions. After review, the North Dakota Supreme Court affirmed the criminal judgment, except as to the award of restitution. The award was reversed because the district court awarded more than what was required to make the victims whole. The matter was remanded for a redetermination of restitution.

North Dakota v. Wayland

Court: North Dakota Supreme Court
Citation: 2020 ND 106
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Joey Wayland appealed after he was convicted by jury of Theft of Property and Possession of Drug Paraphernalia. Wayland contended his case should have been dismissed because his right to a speedy trial was violated by a continuance of his trial from March 11, 2019 to April 8, 2019. Wayland also contended the district court violated his right to remain silent by ordering him to submit to a mental health evaluation. Finding no reversible error, the North Dakota Supreme Court affirmed.

Schwindt v. Sorel

Court: North Dakota Supreme Court
Citation: 2020 ND 92
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Constitutional Law, Criminal Law, Government & Administrative Law

Gregory Schwindt appealed a district court judgment affirming a Department of Transportation hearing officer's revocation of his driving privileges for 180 days. Schwindt argued North Dakota's implied consent and refusal laws were unconstitutional, the hearing officer erred by considering the results of the horizontal gaze nystagmus (HGN) test, and the hearing officer erred in finding he refused to take a chemical test. After review, the North Dakota Supreme Court concluded the hearing officer's findings of fact were supported by a preponderance of the evidence, the conclusions of law were sustained by the findings of fact, and the decision to revoke Schwindt's driving privileges was in accordance with the law.

State ex rel. McDougald v. Greene

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2782
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied a writ of mandamus sought by Relator to

compel Respondent, the public-records custodian at the Southern Ohio Correctional Facility (SOCF), to provide Relator with three public records and to pay Relator statutory damages and court costs associated with this litigation, holding that Relator was not entitled to either a writ of mandamus nor statutory damages. When Relator was an inmate at SOCF he submitted a public-records request to Respondent seeking three documents. Respondent provided one of the three documents. Relator then filed a complaint for a writ of mandamus seeking an order compelling Respondent to provide the two documents and to pay statutory damages and court costs associated with this litigation. The Supreme Court denied the writ of mandamus on the merits, holding that Respondent's response to Relator fully satisfied Respondent's obligations under Ohio Rev. Code 149.43, and therefore, Relator was not entitled a writ of mandamus, and there was no basis to award statutory damages.

State ex rel. Parker Bey v. Byrd

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2766
Opinion Date: May 5, 2020
Judge: Maureen O'Connor
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the judgment of the court of appeals denying Appellant's complaint for a writ of mandamus to compel the Cuyahoga County Clerk of Courts to produce various court records and denying the clerk's request that Appellant be declared a vexatious litigator, holding that the court of appeals erred in denying Appellant's complaint on the grounds that he did not invoke the Rules of Superintendence as the basis for his request. Appellant sought copies of journal entries from his criminal case and a copy of the clerk of courts' records-retention schedule. The clerk largely denied the request. Appellant then filed a complaint for a writ of mandamus. The court of appeals denied Appellant's request for mandamus relief, concluding that the clerk had no clear legal duty to provide the requested records. The Supreme Court reversed, holding (1) this action to compel the production of journal entries from a 1995 case was properly brought under the Public Records Act; and

(2) this Court declines to impose sanctions on Appellant or to declare him a vexatious litigator.

State v. Dangler

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2765
Opinion Date: May 5, 2020
Judge: DeWine
Areas of Law: Criminal Law

The Supreme Court reversed the judgment of the court of appeals vacating Defendant's conviction and sentence and reinstated the trial court's acceptance of Defendant's plea of no contest to sexual battery, holding that the trial court did not completely fail to comply with Crim.R.11(C)(2)(a), and there was nothing in the record to support a conclusion that Defendant would not have entered his plea had the trial court been more detailed in its explanation. On appeal, Defendant sought to vacate his plea of no contest, arguing that his plea was invalid because the trial court erred by not explaining more fully the obligations and restrictions that went with his status as a sex offender, in violation of Crim. R. 11(C)(2)(a). The court of appeals vacated the conviction without requiring Defendant to show prejudice, concluding that the trial court had completely failed to comply with Crim. R. 11(C)(2)(a). The Supreme Court reversed, holding (1) the trial court did not completely failed to comply with Crim R. 11(C)(2)(a)'s maximum-penalty-advisement requirement; and (2) because Defendant did not establish prejudice, he was not entitled to have his no-contest plea vacated for a failure to comply with Crim.R. 11(C).

Oregon v. Haji

Court: Oregon Supreme Court
Docket: S066254
Opinion Date: May 7, 2020
Judge: Nakamoto

Areas of Law: Constitutional Law, Criminal Law

After a grand jury issued an indictment charging defendant Hanad Ali Haji with multiple offenses, the district attorney determined that the indictment could be challenged by demurrer because the basis for joining those offenses was not expressly alleged. Instead of seeking another indictment from the grand jury, the district attorney obtained leave from the trial court to amend the indictment by adding allegations specifying the statutory basis for joinder, without adding factual allegations about the crimes. Defendant was convicted on some of the charges at trial, and the Court of Appeals affirmed. The issue this case presented for the Oregon Supreme Court's review centered on whether the district attorney could add allegations specifying the statutory basis for joinder of multiple offenses to an indictment instead of resubmitting the case to the grand jury. The Supreme Court determined that neither the statute permitting joinder of multiple offenses in a single indictment nor Article VII (Amended), section 5(6), of the Oregon Constitution precluded a district attorney, with approval of the trial court, from amending an indictment to add allegations specifying the statutory basis for joinder of multiple offenses. The Supreme Court affirmed the decision of the Court of Appeals, based in part on different reasoning, and affirmed the judgment of the circuit court.

South Carolina v. Durant

Court: South Carolina Supreme Court
Docket: 27964
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law

Appellant Larry Durant was convicted of second-degree criminal sexual conduct (CSC) for sexually abusing a teenage girl in his church office where he served as the pastor. Durant contended the trial court improperly permitted the State to introduce evidence of prior sexual abuse allegations as evidence of a common scheme or plan under Rule 404(b), SCRE, and that the State committed a "Brady" violation by failing to accurately disclose the criminal history of its witness. After review, the South Carolina Supreme

Court affirmed the admissibility of the girls' testimony. "[W]hile the State failed to disclose the criminal background information of its witness, we find this information was not material." The Court found Durant exercised his position of trust, authority, and spiritual leadership to hold private prayer meetings with teen girls who had grown up in his church. He told them he was praying for their health and good fortune, and represented that part of this process was touching them sexually and having intercourse. Durant then warned the girls of misfortune if they refused or told anyone. Moreover, he used scripture as a means of grooming the children into performing sex acts. "These facts demonstrate the requisite logical connection between the prior acts of sexual abuse and the one forming the basis of the crime charged." The Court therefore affirmed Durant's conviction.

Read Opinion Are you a lawyer? **Annotate this case**.

South Carolina v. Perry

Court: South Carolina Supreme Court
Docket: 27963
Opinion Date: May 6, 2020
Judge: Few
Areas of Law: Constitutional Law, Criminal Law

Petitioner Wallace Perry was convicted on two counts of criminal sexual conduct (CSC) with a minor in the first degree and two counts of CSC with a minor in the second degree for sexually assaulting two of his biological daughters. Prior to Perry's trial, the State made a motion to admit the testimony of Perry's stepdaughter from an earlier marriage that Perry sexually assaulted her twenty-two to twenty-seven years earlier. The State argued the trial court should not exclude the stepdaughter's testimony under Rule 404(b) of the South Carolina Rules of Evidence because it fit the "common scheme or plan" exception. Perry objected to this testimony. The trial court initially reserved ruling on the issue, but later indicated it was inclined to allow the stepdaughter to testify. The jury convicted Perry on all counts, and the trial court sentenced him to thirty years in prison. The court of appeals affirmed. The South Carolina Supreme Court determined it was not enough to meet the "logical connection" standard for admission of other crimes under the common scheme or plan exception to Rule 404(b) that the defendant previously committed the same crime. "When evidence of other

crimes is admitted based solely on the similarity of a previous crime, the evidence serves only the purpose prohibited by Rule 404(b), and allows the jury to convict the defendant on the improper inference of propensity that because he did it before, he must have done it again. ...The common scheme or plan exception demands more." The Supreme Court held State must show a logical connection between the other crime and the crime charged such that the evidence of other crimes "reasonably tends to prove a material fact in issue." The State must also convince the trial court that the probative force of the evidence when used for this legitimate purpose is not substantially outweighed by the danger of unfair prejudice from the inherent tendency of the evidence to show the defendant's propensity to commit similar crimes. In this case, the State did not meet its burden. Conviction was reversed and the matter remanded for a new trial.

South Carolina v. Quinn

Court: South Carolina Supreme Court
Docket: 27966
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law, White Collar Crime

Respondent Rick Quinn, Jr. was a former member of the South Carolina House of Representatives, representing constituents in Richland and Lexington counties from 1989-2004 and 2010-2017 and serving as House Majority Leader from 1999- 2004. He owned and operated a mail business called Mail Marketing Strategies (MMS) in Columbia, while his father owned and operated a political consulting firm, Richard Quinn & Associates (RQ&A). In 2014, Attorney General Alan Wilson designated First Circuit Solicitor David Pascoe as special prosecutor to conduct a State grand jury investigation into alleged public corruption committed by current and former members of the South Carolina General Assembly. This case arose from a prior state grand jury investigation of former House Speaker Bobby Harrell, which resulted in six counts of misusing campaign funds, to which he pleaded guilty. During the course of the investigation into Speaker Harrell, SLED uncovered potentially criminal conduct by Representative Jimmy Merrill and Representative Rick Quinn, and a second grand jury

investigation was initiated to investigate the conduct of these individuals. The investigation focused on Quinn's practice of using his office as House Majority Leader and leader of the House Republican Caucus to direct mailing and political services to his family's businesses. Quinn only admitted to a limited set of facts supporting the indictment. Believing the plea lacked a sufficient basis, the State moved to vacate Quinn's guilty plea, reconsider the sentence, and for the trial court's recusal. The State appealed the order denying its motions. After review, the South Carolina Supreme Court determined that the State could not appeal the guilty plea, the trial court did not abuse its discretion in sentencing, and there was no evidence of judicial bias or prejudice requiring the court to recuse itself. Therefore, the Court dismissed the State's appeal of the guilty plea, and affirmed as to all other issues.

Texas v. Arellano

Court: Texas Court of Criminal Appeals
Docket: PD-0287-19
Opinion Date: May 6, 2020
Judge: Slaughter
Areas of Law: Constitutional Law, Criminal Law

After Appellee Cesar Ramiro Arellano was arrested for driving while intoxicated, the arresting officer, Phillip Garcia, prepared a probable cause affidavit to support a search warrant for a blood draw. Officer Garcia submitted his sworn affidavit to the on-duty magistrate. Using a cursive signature, the magistrate signed the blank signature line of a form search warrant authorizing the search and seizure of Appellee's blood. Below the signature line appeared the words, "Magistrate, Victoria County, Texas." Aside from the cursive signature, the magistrate's name was not typed or handwritten anywhere on the warrant. Upon execution of the search warrant, Appellee was charged with DWI. In the trial court, Appellee filed a motion to suppress all evidence stemming from the blood draw. At the pretrial suppression hearing, Appellee argued that the search warrant to obtain the blood specimen was facially invalid because the magistrate's signature was illegible in violation of the requirements of Code of Criminal Procedure Article 18.04(5). The trial court agreed, the court of appeals

concurred, and the evidence was suppressed because of the illegible signature. The Texas Court of Criminal Appeals disagreed with both lower courts, finding the court of appeals erred in holding that reliance on the statutory good-faith exception was automatically precluded based on an illegible magistrate's signature in violation of Code of Criminal Procedure Article 18.04(5). Because the remaining issues in the case were not properly addressed by the court of appeals, judgment was vacated and the matter remanded for further proceedings.

Department of Justice Once Again Proves Its Loyalty to the President, Not the Rule of Law

AUSTIN SARAT

verdict post

Austin Sarat—Associate Provost, Associate Dean of the Faculty, and William Nelson Cromwell Professor of Jurisprudence and Political Science at Amherst College—comments on the recent news that the Justice Department will seek dismissal of charges against Michael Flynn. Sarat suggests that because the decision does not seem to advance the fair administration of justice in this case, the court should take the unusual step of refusing to grant the prosecutor's motion to dismiss.

Criminal Law Opinions

Kelly v. United States

Court: US Supreme Court
Docket: 18-1059
Opinion Date: May 7, 2020
Judge: Elena Kagan
Areas of Law: Criminal Law, Government & Administrative Law, White Collar Crime

During former New Jersey Governor Christie's 2013 reelection campaign, Fort Lee's mayor refused to endorse Christie. Kelly, Christie's Deputy Chief of Staff, Port Authority Deputy Executive Director, Baroni, and another official decided to reduce from three to one the number of lanes reserved at the George Washington Bridge's toll plaza for Fort Lee's commuters. To disguise the political retribution, the lane realignment was said to be for a traffic study. Port Authority traffic engineers were asked to collect some numbers. An extra toll collector was paid overtime. The lane realignment caused four days of gridlock, ending only when the Port Authority's Executive Director learned of the scheme. The Third Circuit affirmed the convictions of Baroni and Kelly for wire fraud, fraud on a federally funded program, and conspiracy to commit those crimes. The Supreme Court reversed. The scheme did not aim to obtain money or property. The wire fraud statute refers to "any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses," 18 U.S.C. 1343. The federal-program fraud statute bars "obtain[ing] by fraud" the "property" (including money) of a federally funded program or entity, section 666(a)(1)(A). The statutes are limited to the protection of property rights and do not authorize federal prosecutors to set standards of good government. The Court rejected arguments that the defendants sought to take control of the Bridge's physical lanes or to deprive the Port Authority of the costs of compensating employees. Their realignment of the access lanes was an exercise of regulatory power; a scheme to alter a regulatory choice is not one to take government property. The time and labor of the employees were an incidental byproduct of that regulatory object. Neither defendant sought to obtain the services that the employees provided.

Gomes v. Silva

Court: US Court of Appeals for the First Circuit
Docket: 19-1656

Opinion Date: May 1, 2020
Judge: Stahl
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed the judgment of the district court denying Appellant's petition for a writ of habeas corpus, holding that, under the highly deferential standard prescribed by the Antiterrorism and Effective Death Penalty Act for federal habeas review of state criminal convictions, Appellant's claims to habeas relief failed. Appellant was convicted in a Massachusetts superior court of murder in the first degree and related crimes. The Supreme Judicial Court (SJC) affirmed the convictions. Appellant subsequently petitioned the District Court for the District of Massachusetts for a writ of habeas corpus. The district court denied the petition but granted a certificate of appealability. The First Circuit affirmed, holding (1) sufficient evidence supported Appellant's conviction for first-degree murder as a joint venturer, and the SJC's sufficiency determination was not unreasonable; and (2) the SJC reasonably determined that the trial court's admission into evidence of certain items did not constitute error.

United States v. Perez-Couvertier

Court: US Court of Appeals for the First Circuit
Docket: 16-2186
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The First Circuit affirmed Defendant's conviction of possessing with intent to distribute controlled substances in a protected area and conspiring to distribute controlled substances in a protected area, holding that the district court did not plainly err with respect to any of Defendant's challenges. Specifically, the First Circuit held (1) the district court did not commit plain error in admitting evidence of the conspiracy's activities occurring after he withdrew from the conspiracy or, alternatively, in not instructing the jury to ignore such evidence; (2) the district court did not plainly err in admitting evidence of a drug trafficking organization's violent acts; and (3) the delay between Defendant's indictment and arrest did not violate his Sixth Amendment right to a speedy trial.

United States v. Haverkamp

Court: US Court of Appeals for the Second Circuit
Docket: 18-3735
Opinion Date: May 4, 2020
Judge: Barrington D. Parker
Areas of Law: Criminal Law

Defendant pleaded guilty to one count of distribution and receipt of child pornography and one count of possession of child pornography. The district court sentenced him to 121 months of imprisonment, followed by five years of supervised release, and imposed a $200 mandatory special assessment under 18 U.S.C. 3013, as well as a $10,000 assessment under 18 U.S.C. 3014. The Second Circuit held that the district court did not abuse its discretion in sentencing defendant and his sentence was substantively reasonable. The court held that the text of the Justice for Victims of Trafficking Act (JVTA), 18 U.S.C. 3014, taken as a whole and in its context, is straightforwardly meant to be applied on a per-offender, not a per-count, basis. In this case, the district court erroneously applied the special assessment on a per-count, rather than per-offender, basis. Finally, the court held that the computer monitoring condition in question was reasonably related to the nature of defendant's offense. Accordingly, the court affirmed in part, vacated in part, and remanded for further proceedings.

United States v. Mladen

Court: US Court of Appeals for the Second Circuit
Docket: 18-0616
Opinion Date: May 6, 2020
Judge: Amalya Lyle Kearse
Areas of Law: Criminal Law, Trusts & Estates

After defendant died while his appeal was pending, counsel moved for

abatement of all incidents of the prosecution, requesting that the appeal be dismissed without a decision on the merits, that defendant's conviction be vacated, and that the matter be remanded to the district court with instructions to dismiss the indictment and order repayment to defendant's estate of the $20,000 fine and $100 special assessment. Because defendant was convicted upon his plea of guilty, and he neither did nor was permitted to challenge on appeal the merits of his conviction, the Second Circuit denied as without merit so much of the motion as seeks (1) vacatur of his conviction, (2) dismissal of the count of the indictment on which he was convicted, and (3) repayment of the mandatory $100 special assessment. The court granted so much of the motion as requests dismissal of this appeal and a remand to the district court for vacatur of the imposed terms of imprisonment and supervised release and for an order requiring that the paid fine of $20,000 be repaid to defendant's estate.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Richardson

Court: US Court of Appeals for the Second Circuit
Docket: 19-412
Opinion Date: May 5, 2020
Judge: Menashi
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for distribution and possession with intent to distribute a controlled substance. The court held that the district court did not procedurally err by applying the career offender sentencing enhancement pursuant to USSG 4B1.1 because defendant's prior convictions of conspiracy to distribute a controlled substance in violation of 21 U.S.C. 841(a)(1) and 846, and attempted criminal possession of a controlled substance in violation of N.Y. Penal Law 220.16(1), qualify as controlled substance offenses, as defined in USSG 4B1.2(b). The court also held that the district court did not substantively err in sentencing defendant, because it properly considered his criminal history and accounted for his need for mental health and substance abuse treatment.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Rosemond

Court: US Court of Appeals for the Second Circuit
Docket: 18-3561
Opinion Date: May 1, 2020
Judge: Chin
Areas of Law: Criminal Law

The Second Circuit affirmed defendant's conviction for murder-for-hire, conspiracy to commit murder-for-hire, murder through use of a firearm, and possession of a firearm during a murder-for-hire conspiracy. Defendant owned Czar Entertainment, a music management company that represented hip-hop, rap and R&B artists such as Jayceon Taylor, also known as "The Game." Taylor was a member of G-Unit, a rap group run by Curtis Jackson, also known as "50 Cent." Defendant's crimes stemmed from a rivalry with Violator Records, the company that managed G-Unit. The court rejected defendant's contention that his attorney was ineffective because he conceded that defendant paid for the victim to be shot, even though he told counsel not to make this concession. The court held that defendant failed to show that this was objectively unreasonable or that he would have been found not guilty had a different argument been advanced. In this case, there was ample evidence supporting counsel's strategy to concede that defendant ordered a shooting where, among other things, the government's key witness, who participated in the conspiracy and lured the victim to be shot, testified that defendant agreed to pay the shooter. The court also held that the district court did not abuse its broad discretion by admitting prior bad-act evidence under Federal Rule of Evidence 404(b)(1).

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lacerda

Court: US Court of Appeals for the Third Circuit
Docket: 15-2812
Opinion Date: May 5, 2020
Judge: Porter
Areas of Law: Criminal Law, White Collar Crime

VOG billed itself as an advocacy group helping victims of timeshare fraud get out of their timeshare debts. A jury determined that VOG had actually

defrauded its customers and that three individual defendants (including Lacerda) were each knowing participants in that fraud. Lacerda was sentenced to 324 months' imprisonment for his leading role in the fraudulent enterprise. The Third Circuit affirmed the respective convictions and sentences. The court rejected a claim of impermissible "overview testimony" by an FBI agent; an officer who is familiar with an investigation or was personally involved may tell the story of that investigation—how the investigation began, who was involved, and what techniques were used, and, with a proper foundation, may offer lay opinion testimony and testify about matters within his personal knowledge. The district court did not abuse its discretion when it disqualified defense counsel based on a conflict of interest; when it denied replacement counsel's motion for a continuance; when it excluded from evidence, as hearsay, an email sent by Lacerda to VOG's former CFO; in exercising its sentencing discretion; or by ordering the forfeiture of all VOG's gross proceeds.

Read Opinion Are you a lawyer? **Annotate this case**.

Cucalon v. Barr

Court: US Court of Appeals for the Fourth Circuit
Dockets: 18-1292, 18-2206
Opinion Date: May 7, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law, Immigration Law

The Fourth Circuit denied petitions for review of the BIA's final order of removal. Applying the modified categorical approach, the court held that defendant's prior conviction for distribution of cocaine under Virginia Code 18.2-248, including distribution of that substance as an accommodation under Virginia Code 18.2-248(D), satisfies the federal definitions of an "aggravated felony" and of a crime "relating to a controlled substance" pursuant to 8 U.S.C. 1227(a)(2)(A)(iii), 1227(a)(2)(B)(i). The court also held that the district court did not abuse its discretion in denying petitioner's motion to reconsider.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Doctor

Court: US Court of Appeals for the Fourth Circuit
Docket: 18-4874
Opinion Date: May 4, 2020
Judge: Roger L. Gregory
Areas of Law: Criminal Law

The Fourth Circuit affirmed the district court's revocation of defendant's supervised release and resulting sentence. The court held that the district court did not clearly err in finding the government proved he committed the assault underlying the supervised release violation; the district court did not commit plain error by adopting the violation report when announcing defendant committed Violation One; and, even if the district court erred in sentencing defendant for a Grade A violation, the error was harmless.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Lewis

Court: US Court of Appeals for the Fourth Circuit
Docket: 19-4028
Opinion Date: May 4, 2020
Judge: Barbara Milano Keenan
Areas of Law: Criminal Law

Defendant was convicted for possessing a firearm as a felon and sentenced to 63 months' imprisonment and a three-year period of supervised release. The district court additionally recommended, without explanation, that defendant receive addiction treatment while incarcerated and ordered, as a special condition of his supervised release, that defendant participate in an addiction treatment program. The Fourth Circuit held that defendant's sentence is procedurally unreasonable because the district court failed to provide an adequate explanation for imposing as a special condition of supervised release the requirement of addiction treatment. The court also held that the district court failed to address defendant's nonfrivolous mitigation arguments. Therefore, the court remanded for resentencing.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Jordan

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-40499
Opinion Date: May 1, 2020
Judge: Jennifer Walker Elrod
Areas of Law: Criminal Law

The Fifth Circuit affirmed the district court's grant of defendants' motion for a new trial on the basis of prejudicial outside influence on the jury. The court held that the district court did not abuse its broad discretion in granting the motion for a new trial without holding an evidentiary hearing. To the extent there is a bright-line rule applicable to allegations of outside influence on the jury, the court held that it was not applicable to this case. Furthermore, the district court did not abuse its discretion in exercising its prerogative, within broadly defined parameters, to handle the allegation of outside influence in the least disruptive manner possible in this unusual case. Finally, the district court permissibly concluded that the evidence showed a sufficient likelihood of prejudice to shift the burden to the Government, and that the Government did not (and could not) show "no reasonable possibility that the jury's verdict was influenced by" the CSO's comments.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Longoria

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-20201
Opinion Date: May 5, 2020
Judge: Gregg Costa
Areas of Law: Criminal Law

The Fifth Circuit held that the base offense level of 20 was proper for defendant's felon-in-possession crime involving a semiautomatic firearm that is capable of accepting a large capacity magazine. In this case, defendant failed to show that the district court clearly erred in relying on the FBI's agent statement about what was found in the apartment. The court clarified any confusion and held that the 2013 amendment to the commentary on the acceptance-of-responsibility Guideline does not clearly overrule its caselaw allowing the government to withhold the third point for

acceptance of responsibility when it must litigate a suppression motion. The court held that Amendment 775 does not contain the unequivocal override needed to get past the court's precedent. Therefore, the court affirmed defendant's sentence.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. McNabb

Court: US Court of Appeals for the Fifth Circuit
Docket: 19-50265
Opinion Date: May 1, 2020
Judge: Costa
Areas of Law: Criminal Law

The Fifth Circuit affirmed defendant's sentence imposed after he pleaded guilty to possessing a gun after having been convicted of a felony. The court held that defendant is not entitled to relief on his claim that the government breached the plea deal, and thus his appellate waiver remains enforceable. Accordingly, defendant's challenges to his sentence must be dismissed.

Read Opinion Are you a lawyer? **Annotate this case**.

Andrews v. Wayne County

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1992
Opinion Date: May 4, 2020
Judge: Suhrheinrich
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Canton Police received a 911 call from Andrews, who stated that his fiance, White, had physically attacked him. Officers arrested White. Andrews later took White's medications to the jail; a “KOP” policy allows inmates to keep certain drugs for self-administration. During an intake interview, White admitted to attempting to harm herself or commit suicide in the past but said she was not thinking of harming herself or having suicidal thoughts. An R.N. later evaluated White for nearly two hours, reported White’s chief complaints were “anxiety and depression,” and contacted a pharmacy to verify White’s prescriptions. The R.N. claims White did not exhibit any psychotic behavior,

suicidal ideation, or psychiatric distress but ordered further evaluation. The next day, White was found on the floor with vomit on her face. She stated repeatedly that she took too many pills. The next day, White died in the hospital. The cause of death was Verapamil toxicity. The Sixth Circuit affirmed the rejection of a suit under 42 U.S.C. 1983 on summary judgment. A pretrial detainee does not have an automatic right to a suicide screening. The court rejected an argument that the KOP Policy was deficient because it allows inmates in need of a psychological evaluation to participate before a psychiatrist's assessment of proper housing. The County had no history of suicides relative to the program, so any purported failure to train its employees in suicide risk assessment did not cause White's death.

Read Opinion Are you a lawyer? **Annotate this case**.

Hicks v. Scott

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-3410
Opinion Date: May 1, 2020
Judge: Gibbons
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Cincinnati officers Scott and Moore responded to a reported incident of menacing. Two people alleged that Quandavier had driven by their home that night and threatened to kill them and that Quandavier carried guns. Officer Loreaux identified a vehicle fitting the description. Officers Scott, Moore, Schneider, and Loreaux, standing where the vehicle was parked, heard a voice. Thinking that it was likely Quandavier, they knocked on the exterior door of the residence. It swung open. Three officers entered without a warrant or exigent circumstances. Loreaux remained outside. Neither Scott nor Moore recall announcing their presence or identifying themselves. Inside and upstairs, Scott knocked on a closed door. As it opened, Scott "saw the barrel of a rifle pointed at [her] face." Moore and Schneider also saw Quandavier "nonchalantly" panning the rifle from left to right. Moore reached for its barrel as Scott fired her weapon. Moore did not instruct Quandavier to drop his rifle nor did Scott issue any commands before firing. Quandavier collapsed. The officers immediately radioed for paramedics. Before the officers applied handcuffs or provided first aid, they heard another voice and conducted a sweep. Quandavier died at the scene

without receiving medical attention. In a suit under 42 U.S.C. 1983 for unlawful entry, excessive force, and deliberate indifference to a serious medical need, plus state claims, the district court granted the defendants summary judgment, citing qualified immunity. The Sixth Circuit reversed in part. The district court erred by granting qualified immunity to Scott, Moore, and Schneider on the unlawful entry claim. The court affirmed as to the excessive force, deliberate indifference, and state-law battery claims, and remanded for evaluation of municipal liability and wrongful death claims.

Read Opinion Are you a lawyer? **Annotate this case**.

Moody v. United States

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-5015
Opinion Date: May 6, 2020
Judge: Thapar
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

At Moody's trial, the government produced a video of Moody cooking crack on his stove and waving a handgun while he mused about life in "the game" (drug trafficking). The court ruled that most of the video was admissible. Moody then tried to persuade the jury that the video was filmed more than five years before his indictment, putting it outside the statute of limitations. The jury convicted Moody. Due to prior felony drug convictions, Moody received enhanced, mandatory-minimum life sentences on several counts. He appealed on evidentiary grounds relating to the video. The Sixth Circuit affirmed. Later, Moody raised new claims on collateral review, 28 U.S.C. 2255. The district court found each claim meritless; most were also procedurally defaulted. The court authorized Moody to appeal. The Sixth Circuit dismissed the appeal, stating that none of the claims should have been certified. Reasonable jurists could not doubt that the district court properly denied relief on Moody's claims that he was deprived of his statute-of-limitations defense (violating due process); that the past convictions for his sentencing enhancements were not charged in the indictment or found by the jury; and that his previous lawyers failed to raise the first two claims sooner, violating his right to effective assistance of counsel.

United States v. Foreman

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1827
Opinion Date: May 7, 2020
Judge: Gibbons
Areas of Law: Criminal Law

In 2006, Foreman pled guilty to possession with intent to distribute 50 or more grams of cocaine base, possession with intent to distribute cocaine powder, and possession of a firearm during and in furtherance of a drug trafficking crime. Foreman admitted that he was responsible for approximately 135 grams of crack cocaine and 250 grams of cocaine powder. Foreman had a final Guidelines range of 322-387 months; he was sentenced to 240 months' imprisonment with respect to each drug conviction, to run concurrently, and 60 months' imprisonment for the firearms conviction, to run consecutively. When the First Step Act of 2018 made the Fair Sentencing Act retroactive, Foreman sought relief. The district court held that Foreman was not entitled to a plenary resentencing and declined to revisit his career offender status or hold an in-person hearing, then weighed the new statutory range applicable to Foreman's drug offenses, his recalculated Guidelines range, and the 18 U.S.C. 3553(a) factors, and reduced Foreman's total sentence to 172 months on each drug offense, to run concurrently, plus the mandatory consecutive 60 months on the firearms offense. The Sixth Circuit affirmed. Nothing in the First Step Act entitles a defendant to a plenary resentencing. First Step Act resentencings are not shielded from review for reasonableness; the district court thoroughly explained its rationale, carefully examining Foreman's circumstances, the amended penalty provisions, and the resulting changes to Foreman's Guidelines range.

United States v. Smith

Court: US Court of Appeals for the Sixth Circuit
Docket: 19-1724
Opinion Date: May 6, 2020

Judge: Bush
Areas of Law: Criminal Law

In 2006, Smith was convicted of conspiracy to distribute and to possess with intent to distribute 500 grams or more of powder or 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 50 grams or more of cocaine base (crack cocaine); possession with intent to distribute 500 grams or more of cocaine powder; and being a felon in possession of a firearm. The court imposed a mandatory minimum life sentence. The Fair Sentencing Act subsequently lowered the penalty for cocaine-base offenses, made retroactive through the First Step Act. Smith moved for relief and received a reduced sentence of 360 months, the bottom of the new Guideline range for the counts impacted by the Fair Sentencing Act, to run concurrent to his existing 360-month sentence for his powder cocaine count that was not affected by the Fair Sentencing Act. The Sixth Circuit affirmed, rejecting an argument that the court should have imposed a below-Guideline sentence for all counts. The First Step Act is a limited grant of authority to impose a reduced sentence for certain offenses and does not require a plenary resentencing proceeding. Even assuming the court's obligation to explain its reasons for imposing the modified sentence was akin to that which applies in initial sentencing, the court's use of a modified AO 247 form order to explain its decision was not procedurally unreasonable.

Kirkman v. Thompson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1904
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Following a 1992 fight that involved Johnson, Herron, and Walker, two shooters shot the three men. Johnson survived. In the hospital, Johnson described a shooter by the street name "Duke," where Duke lived, and Duke's car. Johnson identified Duke and his accomplice from a photo array. Police pulled over a vehicle matching Johnson's description and arrested

the driver, Kirkman, and the passenger, who matched the general description of the second shooter. Kirkman had a tattoo of Duke on his arm. Police took additional photos and presented a second photo array to Johnson, who identified them as the shooters. At trial, Johnson identified Kirkman and his passenger as the shooters. There was disputed testimony about the cause of the fight. Convicted of murder and aggravated battery with a firearm, Kirkman was sentenced to life in prison. Johnson had a change of heart and submitted an affidavit, identifying Ford and an unknown man as the shooters. At Kirkman's post-conviction hearing, Johnson testified that he and his family had been threatened. Other testimony was inconsistent with Johnson's. Illinois courts denied post-conviction relief, finding that Johnson's recantation lacked credibility. Johnson later pleaded guilty for perjury but failed to specify which statement was false. The Seventh Circuit affirmed the denial of federal habeas relief. Illinois courts found Johnson's recantation lacked credibility. An evidentiary hearing satisfied Kirkman's due process rights. The Illinois trial court's determination defeated Kirkman's innocence and perjured testimony claims.

Tuduj v. Newbold

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1699
Opinion Date: May 1, 2020
Judge: Per Curiam
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

Illinois prisoner Tuduj, having received extensive dental treatment, filed a "deliberate indifference" suit under 42 U.S.C. 1983 against his dentists and prison officials. The court recruited counsel to assist Tuduj in filing an amended complaint that complied with the Federal Rules of Civil Procedure. Counsel defended against two summary judgment motions, one arguing that Tuduj had not exhausted his administrative remedies and another on the merits While the motions were pending, Tuduj moved "for leave to represent himself," stating that he was "concerned that his counsel has filed a structurally, technically and legally insufficient response doomed to be denied." He asked to file his own brief, except "in the event this Honorable Court deems counsel's response … legally sufficient and Grants same[,]

Plaintiff would be open to continued effective representation." A magistrate denied Tuduj's motion, stating that Tuduj "varie[d] between saying he would like to" represent himself and "indicating that he is happy with counsel's representation as long as he prevails." The district judge granted the motions for summary judgment, citing professional judgment and finding "no competent evidence" of any policy that unlawfully influenced dental-treatment decisions. The Seventh Circuit rejected Tuduj's argument that the court wrongly denied his "unqualified" right to proceed pro se under 28 U.S.C. 1654, the due process clause, the equal protection clause, and the Seventh Amendment. The district court permissibly denied his equivocal request.

United States v. Gibson

Court: US Court of Appeals for the Seventh Circuit
Docket: 19-1402
Opinion Date: May 7, 2020
Judge: William Joseph Bauer
Areas of Law: Constitutional Law, Criminal Law

Officer Garrison encountered Gibson, a suspected drug trafficker, walking with a companion. Although initially a consensual encounter, Garrison questioned Gibson and his companion and briefly detained Gibson. After Gibson and his companion departed, Garrison spotted a methamphetamine pipe under his patrol vehicle. Local law enforcement conducted a traffic stop of Gibson's vehicle in the curtilage of his driveway. A drug detection dog signaled the presence of a controlled substance in the vehicle, though nothing was found. Earlier that day, Gibson's wife had met with DEA agents to tell them about methamphetamine inside the home. Police used information Mrs. Gibson had provided to obtain a search warrant. The search of the home uncovered drugs, drug paraphernalia, currency, and AK-47 rifles, which led to Gibson's arrest. Gibson moved to suppress all evidence seized during the search, alleging he was detained without reasonable suspicion, unlawfully frisked, arrested without probable cause, stopped without probable cause or reasonable suspicion, and the traffic stop exceeded a permissible scope. Upon learning of his wife's cooperation, Gibson also argued her statement was insufficiently attenuated to justify the

search warrant. The Seventh Circuit affirmed the denial of the motion. Mrs. Gibson's voluntary statement with DEA agents was independently sufficient to sustain findings of probable cause and sufficiently attenuated from subsequent events to preclude suppression.

United States v. Howell

Court: US Court of Appeals for the Seventh Circuit
Docket: 18-3157
Opinion Date: May 4, 2020
Judge: Scudder
Areas of Law: Constitutional Law, Criminal Law

In December 2012, Chicago Police officers responded to an anonymous call reporting a Hispanic man in a black sweater and black hat, carrying a bag, and climbing under a warehouse fence. They found someone who matched the description. After stopping and frisking him, they determined he was not engaged in any crime. Howell, walking toward the police, was white and wearing a black jacket and dark hat. When an officer approached to speak to him, Howell did not answer, looked panicked, and put his hands in his pockets. The officer patted Howell down and found a gun in his jacket. A federal gun charge followed. Howell unsuccessfully moved to suppress the gun. The Seventh Circuit reversed the denial of his suppression motion and vacated his conviction for possessing that gun. The court noted that the facts in the pretrial record differed significantly from those presented at trial, where the arresting officer testified that he decided to proceed with the pat-down only after Howell ignored a directive to remove his hands from his pockets. Viewing the pretrial record as a whole, the police lacked reasonable suspicion to frisk Howell. The court did not reverse Howell's conviction on a second gun charge that resulted from the execution of a warrant to search Howell's apartment three months after the initial stop and the ensuing discovery of more guns and ammunition.

United States v. Lewis

Court: US Court of Appeals for the Seventh Circuit
Dockets: 19-1911, 19-1262
Opinion Date: May 7, 2020
Judge: Joel Martin Flaum
Areas of Law: Criminal Law

In 2016-2018, Draheim managed a conspiracy, responsible for at least 38 packages of methamphetamine sent from California to La Crosse, Wisconsin. Draheim supervised at least 11 associates who accepted shipments on her behalf, sent money transfers to California, distributed the meth, rented storage lockers, and collected money owed to her. Draheim provided vehicles. After agents placed a wiretap on her phone and seized several packages of meth en route to Draheim, her California supplier forced Draheim to find a new source. Draheim contacted Lewis, recently out of jail but still involved in the "meth scene." Lewis agreed to purchase meth from a new supplier. During the planned transaction, agents seized the package, which contained 28.6 grams of nearly pure meth. Police subsequently arrested Draheim after they found her daughter dead at home from an overdose; they took Lewis into custody for violating the terms of his state supervision. Both pleaded guilty to meth distribution offenses, 21 U.S.C. 841, 846. Draheim, facing a mandatory-minimum 10-year sentence, unsuccessfully argued that she qualified for "safety-valve relief." The court reasoned that she was the leader of her enterprise. Lewis unsuccessfully contended that he should be sentenced based only on his conviction, not other "relevant conduct." The Seventh Circuit affirmed Draheim's sentence but vacated as to Lewis. The fact that the defendant has engaged in other drug transactions is not, alone, sufficient to justify treating those transactions as relevant conduct for sentencing purposes.

Bakor v. Barr

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-3011
Opinion Date: May 7, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law, Immigration Law

The Eighth Circuit denied a petition for review of the BIA's determination

that defendant committed two crimes involving moral turpitude. The court held that the BIA did not err in determining that petitioner's conviction for the Minnesota crimes of Criminal Sexual Conduct in the Fifth Degree and knowing failure to comply with Minnesota's sex offender registration statute were crimes involving moral turpitude. The court also held that petitioner failed to exhaust his remaining arguments and therefore declined to consider them.

Smith v. Titus

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2915
Opinion Date: May 5, 2020
Judge: Steven M. Colloton
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eighth Circuit affirmed the district court's denial of habeas relief to petitioner based on his claim that the trial court violated his Sixth Amendment right to a public trial when it briefly closed the courtroom to spectators. The district court denied relief based on the ground that the Minnesota Supreme Court’s decision was neither contrary to, nor an unreasonable application of, clearly established federal law. The court agreed and held that it was not objectively unreasonable for the Minnesota Supreme Court to deem it constitutional under the Sixth Amendment for the trial court to explain the parameters of an earlier public order on evidentiary issues in a brief nonpublic proceeding before the jury was sworn.

United States v. Becerra

Court: US Court of Appeals for the Eighth Circuit
Docket: 18-2777
Opinion Date: May 7, 2020
Judge: Stras
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction for two counts of being a

felon in possession of a firearm and ammunition. The court held that there was more than enough evidence for defendant's probation officer and other officers to believe defendant had a firearm on him. Therefore, the officers had probable cause to arrest him without a warrant. The court also held that defendant was in custody when he made both statements at issue. In this case, the "request for clarification" of defendant's statement that he had "something" in his car did not require Miranda warnings. Furthermore, because the bulge in defendant's pocket could have been a gun or other weapon that would have posed a danger to the officers and others, they could ask about it without the formality of Miranda warnings. The court joined its sister circuits in declining to recognize the innocent-possessor defense. The court held that the district court did not err in excluding defendant's proposed testimony that he had found the handgun in his car earlier in the day and was about to hand it over to his probation officer. The court reasoned that, even if defendant intended to turn over the gun (or the ammunition) to his probation officer, it is still a crime to knowingly possess it in the first place. Finally, the court held that the district court did not err in denying defendant a sentencing reduction for acceptance of responsibility; the district court considered defendant's mitigation arguments at sentencing; and the district court did not abuse its discretion by imposing a within-Guidelines sentence.

United States v. Haynes

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1607
Opinion Date: May 5, 2020
Judge: Raymond W. Gruender
Areas of Law: Criminal Law

The Eighth Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that the government did not violate the Speedy Trial Act, and defendant failed to offer any evidence showing that Iowa and federal prosecutors colluded. Furthermore, the district court did not abuse its discretion by failing to hold an evidentiary hearing regarding the existence of collusion. The court also held that the district court did not err in denying the motion to suppress where defendant

was not unlawfully seized. In this case, prior to producing the marijuana cigarette, the officer did not ask defendant any questions but merely ordered him off the bus, particularly as the smell of marijuana alerted the officer that evidence of a more serious crime than failure to use a turn signal might be uncovered during the stop. Finally, the court held that defendant was not unlawfully searched when the officer conducted a pat-down search incident to arrest; the evidence was sufficient to support defendant's conviction; defendant's Rehaif claim failed because there was sufficient evidence that he knew of his prohibited status; and defendant's sentence was not substantively unreasonable nor an abuse of the district court's discretion.

United States v. Roberts

Court: US Court of Appeals for the Eighth Circuit
Docket: 19-1176
Opinion Date: May 1, 2020
Judge: Steven M. Colloton
Areas of Law: Criminal Law

The Eighth Circuit vacated defendant's sentence imposed after he pleaded guilty to unlawful possession of a firearm as a previously convicted felon. The court held that, although the district court properly applied a four-level increase for possession of a firearm "in connection with another felony offense" under USSG 2K2.1(b)(6)(B), but that a two-level increase for "using a minor to commit a crime" under USSG 3B1.4 should not have applied. In this case, the evidence showed only that defendant engaged in an arm's-length transaction with a minor. The court held that this mere joint participation in an offense as a partner, does not amount to "use" of a minor "to commit the offense" of unlawful possession of a firearm by a felon. Accordingly, the court remanded for resentencing.

Docket: 19-1081

Opinion Date: May 5, 2020
Judge: Erickson
Areas of Law: Criminal Law

The Eighth Circuit affirmed the district court's restitution order and certain special conditions of defendant's supervised release imposed after he pleaded guilty to sex trafficking of a child. The court found no error in the district court's restitution amount of $20,000, holding that the evidence supported the amount in light of the aggregate harm to the victim. The court also held that the special conditions -- including a requirement that defendant participate in sex offender treatment including psychological testing and polygraph examinations, a prohibition against contact with any minors without pre-approval, and a requirement that defendant seek prior approval before using temporary commercial lodging, such as a hotel or motel -- where reasonably related to both the offense of conviction and to defendant's history of sexual contact with minor females.

Benson v. Chappell

Court: US Court of Appeals for the Ninth Circuit
Docket: 13-99004
Opinion Date: May 1, 2020
Judge: Consuelo Maria Callahan
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Ninth Circuit affirmed the district court's denial of petitioner's habeas corpus petition challenging his California conviction and death sentence for murder and other crimes. Petitioner raised two certified claims and two uncertified claims. The panel held that petitioner failed to show that the California Supreme Court's denials of his claims were unreasonable determinations of the facts or contrary to clearly established federal law. In this case, the California Supreme Court reasonably determined that an officer's misstatement during petitioner's interrogation that there was no death penalty in California did not prompt petitioner's confessions. Furthermore, petitioner failed to show that his statements were not knowing, voluntary, and intelligent. Even if petitioner were able to show that trial counsel was ineffective in not fully investigating his abuse as a child or his alleged organic brain injury, the panel held that the state court could

reasonably have determined that any shortcoming in trial counsel's investigation was not prejudicial. Finally, the panel granted a certificate of appealability on petitioner's two uncertified claims and held that the state court reasonably rejected the claims that his trial counsel should have impeached the government's case and the prosecutor withheld material, exculpatory evidence.

Mero v. Barr

Court: US Court of Appeals for the Ninth Circuit
Docket: 17-70929
Opinion Date: May 1, 2020
Judge: Paul Jeffrey Watford
Areas of Law: Criminal Law, Immigration Law

The Ninth Circuit granted in part a petition for review of the BIA's finding that petitioner was removable based on his conviction for possession of visual presentation depicting sexual conduct of a person under 16 years of age, in violation of Nevada Revised Statutes (N.R.S.) 200.730. Applying the categorical approach, the panel compared the elements of N.R.S. 200.730 with the applicable definition of "sexual abuse of a minor," which requires proof of three elements. The panel held that N.R.S. 200.730 punishes a broader range of conduct because the Nevada statute does not require proof that the offender participated in sexual conduct with a minor. Therefore, petitioner's conviction did not qualify as sexual abuse of a minor. The panel explained that, with a possession-only offense such as N.R.S. 200.730, the minor depicted in the image is not the direct object of the offender's conduct, which is a necessary predicate for the offense to qualify as sexual abuse of a minor.

United States v. Yang

Court: US Court of Appeals for the Ninth Circuit
Docket: 18-10341
Opinion Date: May 4, 2020
Judge: Piersol
Areas of Law: Criminal Law

The Ninth Circuit affirmed the district court's denial of defendant's motion to suppress after he pleaded guilty to receipt of stolen mail and being a prohibited person in possession of a firearm. Defendant moved to suppress the evidence seized from his residence and the statements he made to law enforcement on the basis that the search warrant obtained by the Postal Inspection Service relied on evidence that was obtained illegally. The panel declined to address the potential Fourth Amendment privacy interests that may be implicated by the warrantless use of this Automatic License Plate Recognition (ALPR) technology, and held that defendant does not have a reasonable expectation of privacy in the historical location data of the Yukon under the facts of this case. The panel found no evidence in the record that Prestige Motors had a policy or practice of allowing lessees to keep cars beyond the rental period and Prestige had made affirmative attempts to repossess the vehicle by activating the GPS unit to locate and disable the vehicle. Therefore, defendant lacked standing to challenge the warrantless search of the database.

United States v. Neugin

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-7043
Opinion Date: May 1, 2020
Judge: Scott Milne Matheson, Jr.
Areas of Law: Constitutional Law, Criminal Law

Jack Neugin pled guilty to being a felon in possession of a firearm and ammunition on the condition that he could appeal the district court's denial of his motion to suppress evidence of the ammunition and firearm police found in the bed of his pickup truck. Officers responded to a reported verbal altercation between Neugin and his girlfriend. One of the officers saw ammunition in the back of the truck after he lifted the truck's camper lit do allow the girlfriend to retrieve her belongings. Neugin argued the officers discovered the evidence during an unconstitutional search; the district court concluded the officer was acting "in a lawful position" as "community caretaker," and found no Fourth Amendment violation. The Tenth Circuit reversed, finding that : (1) the officer conducted the without a warrant or probable cause, (2) the community caretaking exception to the warrant requirement does not apply, and (3) the inevitable discovery exception to the exclusionary rule does not apply. The evidence seized should have been suppressed.

United States v. Ramon

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-1221
Opinion Date: May 1, 2020
Judge: Gregory Alan Phillips
Areas of Law: Constitutional Law, Criminal Law

In 2016, after serving a federal prison sentence for having possessed a firearm after a felony conviction, Charles Ramon III began serving a mandatory term of supervised release. Before Ramon completed the term, his probation officer filed a petition, soon followed by two superseding petitions, to revoke Ramon’s supervised release. At the revocation hearing, the district court found three violations—two for possessing a controlled

substance and one for again illegally possessing a firearm. Of these, the most serious was Ramon's illegal possession of a firearm—a Grade B violation. For this, the court imposed the statutory maximum sentence of twenty-four months in prison. During the revocation hearing, the government mentioned that it might seek to indict Ramon for illegally possessing a firearm (the conduct in part underlying the revocation). Mindful of this, the district court ordered that Ramon's twenty-four-month sentence run "consecutively to any sentences imposed previously or prospectively in federal or state court." At the hearing, Ramon did not object to the district court's running his sentence consecutively to future federal sentences. On appeal, Ramon argued that the district court exceeded its sentencing authority under 18 U.S.C. 3584(a) by ordering that Ramon's sentence run consecutively to future federal sentences. By the terms of 18 U.S.C. 3584(a), the Tenth Circuit determined the district court did err. But Ramon failed to object to this at trial, and on appeal, failed to show that the error was plain, thus, judgment was affirmed.

United States v. Richards

Court: US Court of Appeals for the Tenth Circuit
Docket: 19-8044
Opinion Date: May 6, 2020
Judge: Baldock
Areas of Law: Constitutional Law, Criminal Law

In 2018, the Wyoming Division of Criminal Investigation (DCI) obtained a search warrant to review the contents of Defendant–Appellant Joshua Richards' Tumblr account. During the search and subsequent investigation, DCI agents discovered Defendant had re-blogged videos and images of child pornography to his private Tumblr so he could later access and view the materials. Defendant ultimately pleaded guilty to one count of accessing with intent to view child pornography. He was sentenced to twenty-four months' imprisonment followed by five years of supervised release. The district court imposed several special conditions of supervised release, which, as relevant here, related to drugs and alcohol and required Defendant to submit to polygraph testing. On appeal, Defendant argued the district court erred in imposing these special conditions. He also challenged

the length of his prison sentence as substantively unreasonable. The Tenth Circuit determined the alcohol and drug conditions did not directly conflict with the relevant policy statement in the sentencing guidelines, so the district court's decision to impose the conditions was not manifestly unreasonable. And given the circumstances of the case, the Court determined the trial court did not abuse its discretion in imposing Defendant's twenty-four month sentence.

Knight v. Florida Department of Corrections

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-12488
Opinion Date: May 1, 2020
Judge: Newsom
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Eleventh Circuit affirmed the district court's denial of a 28 U.S.C. 2254 petition for habeas relief. Petitioner alleged that his counsel rendered ineffective assistance under Strickland v. Washington, 466 U.S. 668 (1984), by failing to adequately investigate and present mitigating evidence during the sentencing phase of his capital-murder trial. The court held that, even assuming that counsel performed deficiently in failing to investigate and present the mitigation evidence that petitioner now raises—thus satisfying the first prong of the two-part Strickland standard that governs ineffective-assistance claims—petitioner failed to carry his burden of demonstrating resulting prejudice.

Read Opinion Are you a lawyer? **Annotate this case**.

United States v. Evans

Court: US Court of Appeals for the Eleventh Circuit
Docket: 17-15323
Opinion Date: May 6, 2020
Judge: Grant
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction and sentence for being a felon in possession of a firearm. The court held that, given the totality of the circumstances, it was reasonable for officers, mistaking a dog's whimper for a person in distress, to enter defendant's home without a warrant.

Therefore, defendant's challenge to the district court's denial of his motion to suppress evidence failed. The court upheld the district court's imposition of a 22 offense level finding because defendant possessed a semiautomatic firearm capable of accepting a large capacity magazine under USSG 2K2.1(a)(3)(A)(i) (2016). The court also upheld defendant's sentencing enhancement under USSG 2K2.1(b)(4)(B) for possessing a rifle that had an obliterated serial number.

United States v. McLellan

Court: US Court of Appeals for the Eleventh Circuit
Docket: 18-13289
Opinion Date: May 6, 2020
Judge: Boggs
Areas of Law: Criminal Law

The Eleventh Circuit affirmed defendant's conviction for two counts of being a felon in possession of a firearm. The court held that the district court did not abuse its discretion in permitting one of his arresting officers to offer testimony at trial on the correlation between guns and drug activity and to suggest that defendant was selling drugs; the court declined to evaluate the applicability of the Armed Career Criminal Act (ACCA), because the district court would have imposed the same sentence regardless of whether the mandatory minimum applied; and the court rejected defendant's claim under Rehaif v. United States, 139 S. Ct. 2191 (2019), and held that there was no plain error in the district court's failure to instruct the jury of the knowledge-of-status element and any error from the lack of a knowledge-of-status element in defendant's plea colloquy did not affect his substantial rights. Finally, the court remanded for clarification of the judgment to reflect the sentence the district court said it would have imposed if the Armed Career Criminal Act did not apply.

Docket: 18-11202
Opinion Date: May 4, 2020
Judge: Charles R. Wilson
Areas of Law: Criminal Law

Defendant was convicted of possessing a firearm and ammunition as an immigrant illegally or unlawfully in the United States. After defendant appealed his conviction and sentence, the Supreme Court issued its decision in Rehaif v. United States, 588 U.S. ___, 139 S. Ct. 2191 (2019), which reversed a decision from this court and held that under 18 U.S.C. 922(g), the government must prove that a defendant knew "his status as a person barred from possessing a firearm" when he knowingly possessed a firearm. The Eleventh Circuit held that defendant established the necessary prejudice under plain error review and vacated defendant's section 922(g) conviction, remanding for further proceedings. In this case, the district court committed an error that was made plain by the Supreme Court in Rehaif. Furthermore, defendant has sufficiently shown a reasonable probability that but for the error, the outcome of his trial would have been different.

Read Opinion Are you a lawyer? **Annotate this case**.

Welch v. United States

Court: US Court of Appeals for the Eleventh Circuit
Docket: 14-15733
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Eleventh Circuit affirmed the district court's denial of petitioner's 28 U.S.C. 2255 motion to vacate his sentence. The court held that defendant's prior 1996 Florida convictions for robbery qualified as violent felonies under the Armed Career Criminal Act's (ACCA) elements clause, and rejected his contention that the court's decision in his direct appeal carved out a narrow exception to pre-1997 Florida robbery convictions obtained in Florida's Fourth District Court of Appeal. The court also held that petitioner's prior Florida felony battery conviction was a violent felony under the ACCA in light of the court's holding in United States v. Vail-Bailon, 868 F.3d 1293 (11th Cir. 2017) (en banc), cert. denied, 138 S. Ct. 2620 (2018).

State v. Trujillo

Court: Arizona Supreme Court
Docket: CR-18-0531-PR
Opinion Date: May 4, 2020
Judge: Gould
Areas of Law: Constitutional Law, Criminal Law

The Supreme Court held that, for purposes of imposing mandatory sex offender registration under Ariz. Rev. Stat. 13-3821(A)(3), a judge has the authority to make the necessary factual finding that the victim is under the age of eighteen and that Arizona's sex offender registration statutes are civil regulatory statutes, not criminal penalties. Defendant was convicted by a jury of one count of sexual abuse. In reaching its verdict the jury determined that the victim was "fifteen or more years of age." At sentencing, the trial court ordered Defendant to register as a sex offender. Defendant objected, arguing that, pursuant to Apprendi v. New Jersey, 530 U.S. 466 (2000), a jury was required to find whether Defendant was under eighteen pursuant to section 13-3821(A)(3). The trial court denied the objection. The court of appeals affirmed. The Supreme Court affirmed, holding (1) Apprendi does not apply to factual findings that are necessary to impose registration because sex offender registration is a civil regulatory requirement, not a criminal penalty; and (2) the trial judge did not violate Apprendi by determining that the victim was under eighteen.

Barnett v. State

Court: Arkansas Supreme Court
Citation: 2020 Ark. 181
Opinion Date: May 7, 2020
Judge: Hudson
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's "motion for credit for time spent in custody," holding that the

circuit court's findings were not clearly erroneous. In his motion, Appellant alleged that he was entitled to 312 days of jail-time credit and that the circuit court should enter a new sentencing order nunc pro tunc that reflected the correct amount of jail-time credit. The circuit court denied the motion. The Supreme Court affirmed, holding that the circuit court's denial of Appellant's motion was not clearly erroneous because Appellant failed to demonstrate a clerical error subject to correction.

Mason v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 182
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court dismissing Appellant's pro se petition for writ of habeas corpus, holding that Appellant stated no ground on which the writ could issue. Appellant was convicted of aggravated robbery, theft of property, and second-degree battery and sentenced as a habitual offender to an aggregate term of 660 months' imprisonment. The court of appeals affirmed. Appellant later petitioned for writ of habeas corpus, asserting that the trial court misapplied Arkansas's habitual-offender statutes. The circuit court dismissed the petition. The Supreme Court affirmed, holding that the issues Appellant raised in his petition for the writ should have been raised at trial, on direct appeal, or in a petition for postconviction relief.

Ray v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 184
Opinion Date: May 7, 2020
Judge: Wynne
Areas of Law: Criminal Law

The Supreme Court dismissed Appellant's appeal from an order denying his pro se petition for permission to reinvest jurisdiction in the trial court to consider a petition for writ of error coram nobis, holding that the circuit court had no jurisdiction to consider the petition. Appellant entered negotiated guilty pleas to rape and other offenses. Appellant later filed a petition for writ of error coram nobis in the Chicot County Circuit Court, the court where he was incarcerated, setting out two grounds for coram nobis relief. The circuit court denied the petition. The Supreme Court dismissed Appellant's appeal, holding that jurisdiction lay in the trial court where Appellant was convicted, which in this case was the Ashley County Circuit Court. Therefore, the Chicot County Circuit Court was without jurisdiction to address Appellant's coram nobis petition.

Walker v. Kelley

Court: Arkansas Supreme Court
Citation: 2020 Ark. 183
Opinion Date: May 7, 2020
Judge: Rhonda K. Wood
Areas of Law: Criminal Law

The Supreme Court affirmed the judgment of the circuit court denying Appellant's pro se petition for declaratory judgment, holding that Appellant could not use a declaratory-judgment action to collaterally attack his criminal conviction. Appellant was convicted of first-degree murder and second-degree unlawful discharge of a firearm from a vehicle. The court of appeals affirmed. Years later, Appellant filed a petition for declaratory judgment alleging that he was denied due process in his criminal trial when the court admitted the prior testimony of an unavailable witness and that this admission violated the Confrontation Clause. The circuit court denied the petition. The Supreme Court affirmed, holding that a declaratory judgment action provided no relief on these grounds.

People v. Flores

Court: Supreme Court of California
Docket: S116307
Opinion Date: May 4, 2020
Judge: Kruger
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of three counts of first degree murder and his sentence of death, holding that the three or four minor errors at Defendant's trial were harmless and did not interfere with his due process right to a fair trial. Specifically, the Supreme Court held (1) no error occurred during jury selection; (2) Defendant was not prejudiced by any misstatements by the prosecutor; (3) assuming certain evidence was inadmissible, the court's admonition to the jury and the court's instruction cured the resultant harm; (4) the trial court erred in admitting testimony that the victim was afraid of Defendant, but the error was harmless; and (5) Defendant's remaining allegations of error were without merit.

California v. Law

Court: California Courts of Appeal
Docket: E072845(Fourth Appellate District)
Opinion Date: May 5, 2020
Judge: Slough
Areas of Law: Constitutional Law, Criminal Law

In 2001, appellant Terrell Law and his codefendant Brett May committed a home invasion robbery, during which one of them shot and killed one of the residents. They were tried jointly in 2006 before two separately empaneled juries who found them both guilty of first degree felony murder with the special circumstance described in Penal Code section 190.2(a)(17(A) and (d). Though Law's jury found he was not the shooter, they nonetheless concluded he was a "major participant" in the underlying robbery and acted "with reckless indifference to human life." In 2018, the Legislature enacted Senate Bill No. 1437 (2017-2018 Reg. Sess.) which, among other things, amended the definition of felony murder in Penal Code section 189. The legislation also added Penal Code section 1170.95, which established a procedure for vacating murder convictions predating the amendment that could not be sustained under the new definition of felony murder. Law

challenged the trial court's summary denial of his section 1170.95 petition to vacate his murder conviction, arguing the trial court erred by reviewing his record of conviction and determining the jury's true finding on the special circumstance rendered him ineligible for relief. The Court of Appeal concluded it was proper for a trial court to review the record of conviction when determining whether a section 1170.95 petitioner had stated a prima facie claim for relief. Additionally, the Court concluded Law "undoubtedly qualifies" as a major participant who acted with reckless indifference to human life, a conclusion that rendered him ineligible for relief under section 1170.95. The Court therefore affirmed the order denying his petition.

California v. Sanchez

Court: California Courts of Appeal
Docket: E072647(Fourth Appellate District)
Opinion Date: May 7, 2020
Judge: Menetrez
Areas of Law: Constitutional Law, Criminal Law

Victor Sanchez was charged with first degree murder, but pled guilty to voluntary manslaughter. He filed a petition under Penal Code section 1170.95 to vacate that conviction. The trial court denied the petition, concluding that Sanchez was ineligible for relief because he was not convicted of murder. After review, the Court of Appeal joined other courts that held section 1170.95 did not apply to defendants convicted of voluntary manslaughter. The Court also rejected Sanchez's argument that section 1170.95 violated equal protection.

Galeotti v. International Union of Operating Engineers

Court: California Courts of Appeal
Docket: A157785(First Appellate District)
Opinion Date: May 6, 2020
Judge: Henry E. Needham, Jr.
Areas of Law: Criminal Law, Labor & Employment Law, White Collar Crime

Galeotti, a former Union Local 3 employee, filed a complaint against Local 3 and three of individual union leaders, alleging that the individual defendants required union employees to pay them money to keep their jobs, lied about the reason for collecting the money, and caused Local 3 to terminate Galeotti's employment when he failed to pay the full amount demanded. The trial court dismissed his second amended complaint without leave to amend. The court of appeal reversed in part, reasoning that a threat to terminate employment can provide a basis for an extortion claim and that the allegations of the second amended complaint stated a cause of action for wrongful termination in violation of the public policy underlying the extortion statutes. The complaint stated a cause of action for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO; 18 U.S.C. 1961), based on the predicate acts of extortion, but did not state a cause of action for interference with prospective economic advantage.

In re I.A.

Court: California Courts of Appeal
Docket: B296549(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Tangeman
Areas of Law: Criminal Law, Juvenile Law

Where a juvenile court vacates its true finding on a generic murder allegation and redesignates it as a finding on an uncharged target offense, and does so before a minor has had the opportunity to contest the court's findings or orders, the minor may challenge the sufficiency of the evidence of the redesignated offense on appeal. The Court of Appeal held that there was insufficient evidence to support the juvenile court's decision sustaining the allegations that I.A. possessed a concealable firearm and committed vandalism. Therefore, the court reversed the juvenile court's findings, vacating the jurisdiction and disposition order and dismissing the Welfare and Institutions Code section 602 petition.

People v. Edwards

Court: California Courts of Appeal
Docket: A158055(First Appellate District)
Opinion Date: May 1, 2020
Judge: Petrou
Areas of Law: Criminal Law

In 2006, Edwards fired an assault weapon into an apartment, killing the victim. Edwards pled guilty to possession of a firearm as a felon and was convicted of second-degree murder and shooting into an inhabited dwelling. Following the enactment of Senate Bill 1437, Edwards filed a Penal Code 1170.95 resentencing petition, checking form boxes indicating that he was convicted under a theory of felony murder or murder under the natural and probable consequences doctrine and that he could not now be convicted of 1st or 2nd-degree murder because of changes to Penal Code 188 and 189. Edwards submitted the jury instructions and the transcript of the prosecutor's closing remarks that Edwards acted with "both express malice, specific intent to kill, as well as implied malice," described as "an intentional act, the natural consequences of which are dangerous to human life, and at the time that the individual acted, they knew of the danger, and they deliberately acted with conscious disregard." The court denied the petition, finding that Edwards was convicted on a valid theory of murder that survived the statutory changes. The court of appeal affirmed. The superior court did not err in considering the record of conviction. Edwards could not meet the statutory prerequisites for even filing a section 1170.95 petition because he was not charged or convicted of second-degree felony murder or murder under the natural or probable consequences doctrine directed at accomplice liability.

People v. Thomkins

Court: California Courts of Appeal
Docket: A141375(First Appellate District)
Opinion Date: May 1, 2020
Judge: Streeter
Areas of Law: Criminal Law

On Easter night in 2011, gunfire erupted at an Oakland bar-restaurant, leaving two people dead and five wounded. Thompkins and Fox were convicted of two counts of first-degree murder for the benefit of a criminal street gang, with firearm discharge enhancements, a multiple-murder special circumstance, and five counts of attempted murder with great bodily injury findings, gang enhancements, and firearm discharge enhancements. Thompkins was convicted as the shooter and Fox as an accomplice. Both were sentenced to life in prison without possibility of parole, plus 224 years to life. After Thompkins was sentenced, Fox stated under oath he was the actual shooter and Thompkins knew nothing about Fox's intentions. Thompkins claimed this new testimony, and his attorney's incompetent reaction entitled him to a new trial and submitted a declaration by another gang member who was present that night. The court of appeal concluded that Thompkins's attorney was not ineffective for failing to bring a motion to recall the sentence followed by a new trial motion because Thompkins failed to show prejudice. The attempted murder convictions and related enhancements must be reversed for both defendants based on the flawed kill zone instruction. Introducing evidence that defendants admitted their gang affiliation at jail intake violated the defendants' privilege against self-incrimination but was harmless. There was some evidentiary error that was harmless due to the wealth of admissible evidence establishing the gang enhancements. Arguments based on the statutory amendments to Penal Code 188 and 189 must be raised in the trial court (section 1170.95). The case must be remanded so the judge may exercise his discretion whether to impose or strike the firearm enhancements on under Penal Code 12022.53.

People v. Torres

Court: California Courts of Appeal
Docket: B295043(Second Appellate District)
Opinion Date: May 4, 2020
Judge: Wiley
Areas of Law: Criminal Law

After the trial court admitted a witness's former testimony, the Court of Appeal applied People v. Roldan (2012) 205 Cal.App.4th 969, 975–985, and reversed. Roldan held that, before invoking the former testimony exception,

prosecutors should react appropriately to the impending deportation risk by following four steps: alert the defense to the risk; videotape the preliminary hearing testimony; use judicial measures to try to delay deportation; and consider an array of other specific measures. In this case, the prosecution conceded that prosecutors were simply unaware of Roldan and did not comply with it. The court held that Roldan controls the court's analysis because the facts about prosecutorial diligence are weaker here than they were in Roldan, where the appellate court held for the defense. In this case, the record before deportation is of prosecutorial inaction where the prosecution's brief in this court admits the investigating officer did not do anything to ensure that the witness would not be deported, nor is there other evidence of prosecutorial efforts to delay the witness's departure or to videotape his testimony at the preliminary hearing.

Colorado In Interest of G.S.S.

Court: Colorado Supreme Court
Citation: 2020 CO 32
Opinion Date: May 4, 2020
Judge: Brian D. Boatright

Areas of Law: Constitutional Law, Criminal Law, Juvenile Law

After being charged, fourteen-year-old G.S.S. was detained for more than three months without bail, even though he had not entered a plea and had not been tried on the charges against him. At that point, G.S.S.'s counsel filed a motion to dismiss, arguing that G.S.S.'s "right to a speedy trial" had been violated under section 19-2-509(4)(b), C.R.S. (2019). The trial court agreed and dismissed the case against G.S.S. with prejudice, and the court of appeals affirmed in Colorado in Interest of G.S.S., 2019 COA 4M, __ P.3d __. The Colorado Supreme Court then granted certiorari to determine the proper remedy for a violation of the sixty-day limit in section 19-2-509(4)(b). The Supreme Court determined the remedy for a section 19-2-509(4)(b) violation was for the trial court to immediately hold a bail hearing and order the juvenile's release. Accordingly, the judgment of the court of appeals was reversed.

Barringer v. Halkitis

Court: Florida Supreme Court
Docket: SC19-1071
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court held that Jay Barringer's quo warranto petition filed in this case was a frivolous proceeding brought before the Supreme Court by a state prisoner and sanctioned Barringer by barring him from filing any further pro se requests for relief related to his criminal case. Barringer was convicted of one count of attempted sexual battery of a victim less than twelve years old and sentenced to twenty-five-years' imprisonment. In 2011, Barringer began filing petitions in the Supreme Court. The Court did not grant the relief sought in any of Barringer's filings. In the instant quo warranto petition Barringer challenged his conviction on the ground that the information was defective, a claim Barringer previously raised by way of a habeas petition. The Supreme Court denied the petition and found that Barringer abused the Court's limited judicial resources. The Court sanctioned Barringer by directing the Clerk of Court to reject any future

Franqui v. State

Court: Florida Supreme Court
Docket: SC19-203
Opinion Date: May 7, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court affirmed the order of the circuit court denying Appellant's claim of intellectual disability, raised in successive motions for postconviction relief under Fla. R. Crim. P. 3.851, holding that the circuit court did not err in denying relief. Appellant was convicted of first-degree murder and sentenced to death in two separate cases. After the United States Supreme Court decided Hall v. Florida, 572 U.S. 701 (2014), Appellant filed successive motions for postconviction relief in both of his capital cases, asserting that the circuit court's denials of his previous claims of intellectual disability were based on the court's improper interpretation of Florida's intellectual disability statute. The circuit court summarily denied the motions. The Supreme Court reversed and remanded for an evidentiary hearing on the issue of intellectual disability. After a hearing, the circuit court denied the claim. The Supreme Court affirmed, holding (1) the circuit court did not err in denying Appellant's intellectual disability claim; and (2) Appellant was not entitled to relief under Hurst v. Florida, 136 S. Ct. 616 (2016), or Hurst v. State, 202 So. 3d 40 (Fla. 2016).

Hicks v. State

Court: Florida Supreme Court
Docket: SC19-1978
Opinion Date: May 7, 2020
Judge: Per Curiam

Areas of Law: Criminal Law

The Supreme Court denied the instant mandamus petition filed by Hicks and sanctioned Hicks by barring him from filing any further pro se requests for relief related to his criminal case. Hicks was convicted of one count of lewd and lascivious conduct by a person over eighteen years of age on a victim under sixteen years of age. Since 2016, Hicks filed thirteen pro se requests for relief in the Supreme Court related to his criminal case. The Court did not grant the relief sought in any of Hicks' filings. In the instant petition, Hicks sought a writ of mandamus compelling the circuit court to comply with the requirements of Fla. R. Crim. P. 3.850 by filing a copy of an order denying his second postconviction motion with the clerk of court. The Supreme Court dismissed the petition and found that Hicks abused this Court's limited judicial resources. The Court directed the Clerk of Court to reject any future pleadings or other requests for relief submitted by Hicks that are related to his criminal case, unless such filings are signed by a member of The Florida Bar in good standing.

Idaho v. Blythe

Court: Idaho Supreme Court - Criminal
Docket: 46992
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Nicholas Blythe appealed after he was convicted of possessing a controlled substance. He conditionally pled guilty, reserving the right to challenge his sentence. On appeal, he argued the district court erred in denying his motion to suppress certain evidence found because the evidence presented at trial was found in violation of Blythe's Fourth Amendment rights. After review, the Idaho Supreme Court determined the search at issue took place before an arrest occurred, and because no rationale justifying a search incident to arrest was sufficiently present here, the search of Blythe's shoes was not a valid search incident to arrest. Therefore, the district court erred in holding that the search was reasonable under the Fourth Amendment. Blythe's conviction was vacated, the district court order denying Blythe's motion to suppress was reversed, and the matter remanded for further proceedings.

Idaho v. Glodowski

Court: Idaho Supreme Court - Criminal
Docket: 47131
Opinion Date: May 6, 2020
Judge: Roger S. Burdick

Areas of Law: Constitutional Law, Criminal Law

David Glodowski appealed after he was convicted for failing to update his sex-offender registration in violation of Idaho Code section 18-8309. He argued the district court erred by ruling that his prior conviction under a Wisconsin statute was "substantially equivalent" to Idaho statutes that required sex-offender registration in Idaho. After review, the Idaho Supreme Court determined the district court improperly allowed the State to seek a redetermination of the "substantially equivalent" element given that the Idaho Bureau of Criminal Identification made a final determination on that element. However, because the State put forth sufficient evidence to prove that element, and the district court's jury instruction accomplished the same purpose, the Supreme Court concluded the error was harmless. Accordingly, the Court found no reversible error in the district court's decision to grant the State's motion and provide the jury instruction. Therefore, judgment of conviction was affirmed.

Court: Idaho Supreme Court - Criminal
Docket: 45905
Opinion Date: May 4, 2020
Judge: Roger S. Burdick
Areas of Law: Constitutional Law, Criminal Law

Timothy Jones was convicted by jury of trafficking heroin and possession of drug paraphernalia. On appeal, he argued the trial court erred in admitting certain evidence regarding his probation status, a knife found in the initial police search of his person, and that the trial court abused its discretion in arriving at his sentence. Finding no reversible error, the Idaho Supreme Court affirmed Jones' conviction and sentence.

State v. Gordon

Court: Iowa Supreme Court

Docket: 18-1099
Opinion Date: May 1, 2020
Judge: Brent R. Appel
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction for assault on a peace officer with a dangerous weapon, a felony, and several misdemeanors, holding that Defendant did not receive ineffective assistance of counsel. After Defendant pleaded guilty, he absconded. He was later returned to custody. On appeal, Defendant argued that he received ineffective assistance of counsel because the plea bargain contained an unlawful term. Specifically, Defendant argued that the plea bargain's provision that he would be released from jail for a forty-eight-hour furlough after pleading guilty was illegal and that his trial counsel committed ineffective assistance in obtaining the illegal benefit for him. The Supreme Court affirmed, holding that where Defendant entered into the plea agreement with the illegally lenient sentence, he could not benefit from that sentence and then attack the plea bargain.

State v. Craig

Court: Kansas Supreme Court
Docket: 119660
Opinion Date: May 1, 2020
Judge: Dan Biles
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's conviction and sentence for first-degree felony murder, holding that there was no error in the proceedings below. A jury found Defendant guilty of both first-degree felony murder and second-degree intentional murder. At sentencing, Defendant moved for a new trial and judgment notwithstanding the verdict, arguing that the jury must have had reasonable doubt on the first-degree felony murder theory because it convicted him of second-degree murder for the same killing. The district court dismissed the second-degree murder conviction and sentenced Defendant for the felony murder over his objection. The Supreme Court affirmed, holding (1) the district court did not err when it sentenced Defendant on felony murder instead of declaring a mistrial because

Defendant did not establish that the jury failed to find each element of the felony murder beyond a reasonable doubt or that the jury's first- and second-degree murder verdicts were so irreconcilable as to require a new trial; and (2) the district court did not err in declining to give an instruction on voluntary intoxication.

State v. Lemmie

Court: Kansas Supreme Court
Docket: 119439
Opinion Date: May 1, 2020
Judge: Carol A. Beier
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's convictions of first-degree felony murder, aggravated robbery, conspiracy to commit aggravated robbery, criminal possession of a firearm, fleeing and eluding, and interference with law enforcement, holding that Defendant's arguments on appeal failed. Specifically, the Supreme Court held (1) any possible violation of Defendant's Fifth Amendment right in the admission of a witness's testimony about Defendant giving the witness phone passcodes was undoubtedly harmless; (2) the district court did not err by admitting hearsay statements as statements of a coconspirator and contemporaneous statements; (3) the State introduced sufficient evidence to convict Defendant of first-degree murder; and (4) the district judge did not abuse its discretion by admitting testimony that Defendant was upset over a meth pipe that went missing.

State v. Mullen

Court: Maine Supreme Judicial Court
Citation: 2020 ME 56
Opinion Date: May 5, 2020
Judge: Connors
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction for reckless

conduct and aggravated criminal mischief, holding that the trial court did not abuse its discretion by offering Defendant a continuance of the trial in lieu of excluding his medical records. On appeal, Defendant argued that the trial court abused its discretion by denying his motion to suppress his personal medical records as a sanction for the State's late seizure of the records. The Supreme Judicial Court agreed that the State's conduct undermined the purpose of Maine Rule of Unified Criminal Procedure 18(b) but that the court's offer of a continuance in lieu of the exclusion of the evidence constituted an appropriate response to the State's conduct.

Commonwealth v. Billingslea

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12715
Opinion Date: April 30, 2020
Judge: Cypher
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's convictions and the decision of the Appeals Court denying Defendant's motion to vacate the entry of his appeal from his convictions in that court and to have the case entered directly in the Supreme Judicial Court, holding that a direct appeal from the third conviction of a habitual offender pursuant to Mass. Gen. Laws ch. 279, 25(b) may be entered in the Appeals Court. Defendant was indicted for serious felonies arising from a brutal attack and rape. In addition to charging the specific felony, each indictment also alleged that the sentence for that felony should be enhanced pursuant to the habitual criminal provision Mass. Gen. Laws ch. 279, 25(a) or the habitual offender provision of section 25(b), or both. After he was convicted, Defendant moved to have the case entered directly in the Supreme Judicial Court. The Appeals Court denied the motion. The Supreme Judicial Court affirmed Defendant's convictions, holding (1) this direct appeal was entitled to the unique review prescribed by Mass Gen. Laws ch. 278, 33E, and the Appeals Court may conduct such section 33E review; (2) Defendant was not impermissibly allowed to waive his right to a jury trial on the sentencing enhancement provisions of the indictments; and (3) Defendant was not entitled to reversal of his convictions on any other ground.

Commonwealth v. Martin

Court: Massachusetts Supreme Judicial Court
Docket: SJC-08768
Opinion Date: May 5, 2020
Judge: Ralph D. Gants
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree and the denial of his motion for a new trial and declined to exercise its authority under Mass. Gen. Laws ch. 278E to reduce Defendant's conviction to murder in the second degree, holding that Defendant was not entitled to relief on any of his allegations of error. Defendant was convicted of murder in the first degree on the theory of felony-murder. Defendant filed a motion for a new trial, which was denied. The Supreme Judicial Court affirmed, holding (1) Defendant's motion for a new trial was correctly denied because Defendant was not prejudiced by counsel's ineffective assistance; (2) this Court declines to extend the reach of the Court's holding in Commonwealth v. Brown, 477 Mass. 805 (2017), to Defendant's case; and (3) trial judge erred when he declined Defendant's request that the jury be instructed on the elements of voluntary and involuntary manslaughter, but the error was not prejudicial in the context of the judge's other instructions.

Commonwealth v. Tavares

Court: Massachusetts Supreme Judicial Court
Docket: SJC-12631
Opinion Date: May 6, 2020
Judge: Lowy
Areas of Law: Criminal Law

The Supreme Judicial Court affirmed Defendant's conviction of murder in the first degree on theories of deliberate premeditation and extreme atrocity

or cruelty and declined to exercise its power pursuant to Mass. Gen. Laws ch. 278, 33E to reduce the conviction to manslaughter, holding that there was no reversible error in the proceedings below. Specifically, the Supreme Judicial Court held (1) the trial judge did not err by denying Defendant's requests for a jury instruction pursuant to Commonwealth v. Croft, 345 Mass. 143 (1962); (2) the trial judge did not err by denying Defendant's motions for a required finding of not guilty under Croft because a rational jury could have found that Defendant was guilty of murder in the first degree on both the theories of premeditation and extreme atrocity or cruelty; and (3) there was no basis for reducing Defendant's sentence or ordering a new trial.

State v. Branch

Court: Minnesota Supreme Court
Docket: A18-1055
Opinion Date: May 6, 2020
Judge: Lorie Skjerven Gildea
Areas of Law: Criminal Law

The Supreme Court affirmed Defendant's sentences for drive-by shooting at an occupied vehicle and second-degree assault, holding that Minn. Stat. 609.035 did not prohibit the sentences for both offenses when the crimes arose from a single behavioral incident. The district court sentenced Defendant to forty-eight months for drive-by shooting at an occupied vehicle and thirty-six months for second-degree assault and imposed the two sentences to run concurrently. The court of appeals affirmed. The Supreme Court affirmed, holding that, under this Court's analysis in State v. Ferguson, 808 N.W.2d 586 (Minn. 2012), the district court properly imposed multiple sentences in this case.

Galloway v. Mississippi

Court: Supreme Court of Mississippi
Citation: 2018-CA-01427-SCT

Opinion Date: May 7, 2020
Judge: Beam
Areas of Law: Constitutional Law, Criminal Law

Leslie Galloway appealed the denial of his 2015 petition for post-conviction relief (PCR) pertaining to his 2007 guilty plea to carjacking, a conviction that was used as an aggravating circumstance in Galloway's 2010 capital-murder trial at which Galloway received a death sentence. Galloway claimed in the petition that his defense counsel Wendy Martin had an actual conflict of interest because, before becoming his defense counsel, Martin had served as an assistant district attorney in the same case, unbeknownst to Galloway. The trial court ruled that Galloway's PCR claim was time barred under Mississippi's Uniform Post-Conviction Collateral Relief Act (UPCCRA), having been filed more than seven years after Galloway's conviction for carjacking. The trial court alternatively found no merit to Galloway's PCR claim, time bar notwithstanding. Accordingly, the trial court denied Galloway's PCR petition. The Mississippi Supreme Court agreed with the trial court that Galloway's PCR claim was time barred under the UPCCRA. The Court also agreed there was no merit to Galloway's PCR claim.

City of Missoula v. Zerbst

Court: Montana Supreme Court
Citation: 2020 MT 108
Opinion Date: May 5, 2020
Judge: Beth Baker
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction for sexual assault, holding that the municipal court erred when it instructed the jury on a definition of "consent" from the 2017 sexual assault statute and not the applicable 2015 statute, and the erroneous jury instruction prejudicially affected Defendant's substantial rights. At trial, the court instructed the jury, over Defendant's objection, on the definition of consent contained in recent amendments to the sexual assault statute. On appeal, Defendant argued that the municipal court failed to apply the correct law when instructing the jury on the elements of the claimed offense. The district court denied the

appeal. The Supreme Court reversed, holding (1) the instructions, as a whole, did not fully and fairly instruct the jury on the law applicable to the case; and (2) Defendant's substantial due process right was prejudiced by the erroneous jury instruction.

State v. Degarmo

Court: Nebraska Supreme Court
Citation: 305 Neb. 680
Opinion Date: May 1, 2020
Judge: Stacy
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed Defendant's conviction of driving under the influence, holding that Defendant consented to a chemical test of his urine and, therefore, the results of the urine test were admissible. A law enforcement officer stopped Defendant for an expired registration. Based on his observations, the officer, a certified drug recognition evaluation expert, administered field sobriety tests. The officer concluded that Defendant was under the influence of marijuana arrested Defendant for driving under the influence and then took him to a detoxification center. Thereafter, a chemical test of Defendant's urine confirmed the presence of marijuana. On appeal, Defendant challenged the admission of the results of the urine test. The Supreme Court affirmed, holding that Defendant voluntarily consented to the warrantless search of his urine, and therefore, the search fell within a recognized exception to the warrant requirement.

People v. Holz

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02682
Opinion Date: May 7, 2020
Judge: Fahey
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals held that N.Y. Crim. Proc. Law (CPL) 710.70(2) grants a defendant the right to review of a suppression decision when the order related exclusively to a count that was satisfied by a guilty plea but was not one to which the defendant pleaded guilty. Defendant was charged with two counts of burglary in the second degree. The first count related to a laptop computer, and the second count related to jewelry. Defendant moved to suppress the jewelry, but Supreme Court denied the motion. Defendant then pleaded guilty to one count of burglary in the second degree as charged in the count pertaining to the theft of the laptop computer, in satisfaction of the count charging the burglary of jewelry. On appeal, Defendant argued that Supreme Court erred in denying his motion to suppress the jewelry. The Appellate Division affirmed, concluding that it was jurisdictionally precluded from reviewing the suppression order. The Court of Appeals reversed, holding (1) Defendant's right to appellate review of Supreme Court's suppression order was secured by CPL 710.70(2); and (2) because the Appellate Division did not reach the underlying suppression question the case must be remitted to the Appellate Division for further proceedings.

People v. Maffei

Court: New York Court of Appeals
Citation: 2020 NY Slip Op 02680
Opinion Date: May 7, 2020
Judge: DiFiore
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Court of Appeals affirmed the order of the Appellate Division concluding on direct appeal that Defendant was not entitled to relief on his ineffective assistance of counsel claim, holding that Defendant, on this record, did not sustain his burden to establish that counsel was constitutionally ineffective. After a jury trial, Defendant was convicted of second-degree murder. On appeal, Defendant argued that his trial counsel's failure to challenge a prospective juror constituted ineffective assistance of counsel. The Appellate Division affirmed. The Court of Appeals affirmed, holding (1) the record was inadequate to review Defendant's ineffective assistance of counsel claim; and (2) the appropriate procedure for the litigation of Defendant's challenge to his counsel's performance was a N.Y. Crim. Proc.

State v. Bailey

Court: North Carolina Supreme Court
Docket: 360A19
Opinion Date: May 1, 2020
Judge: Davis
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court affirmed the decision of the court of appeals affirming the order of the trial court denying Defendant's motion to suppress evidence seized during the execution of a search warrant, holding that the warrant supported by probable cause. Defendant pled guilty to the offense of trafficking in cocaine while preserving his right to appeal the denial of his motion to suppress. On appeal, Defendant argued that the trial court erred in denying his motion to suppress because the facts contained in the affidavit were insufficient to establish probable cause to search his residence. The court of appeals affirmed. The Supreme Court affirmed, holding that the affidavit contained facts that were sufficient to provide a nexus between the residence and suspected criminal activity, and therefore, the warrant was supported by probable cause.

State v. Ellis

Court: North Carolina Supreme Court
Docket: 340A19
Opinion Date: May 1, 2020
Judge: Robin E. Hudson
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed the decision of the Court of Appeals affirming the trial court's denial of Defendant's motion to suppress evidence, holding that there was no reasonable suspicion to justify the law enforcement officer's stop when Defendant signaled with his middle finger from the passenger side window of a moving vehicle. While assisting a stranded

motorist, the officer turned his attention to another car traveling on the roadway, a white SUV. Defendant had his arm outside the passenger window and gestured with his middle finger, making an up-and-down motion. Believing that Defendant was committing the crime of disorderly conduct, the officer pursued and then stopped the SUV. At trial, Defendant moved to suppress the officer's testimony, arguing that there was no reasonable suspicion to justify the stop. The trial court denied the motion. Defendant pleaded guilty to resisting, delaying, or obstructing a public officer. The court of appeals affirmed the trial court's denial of Defendant's motion to suppress. The Supreme Court reversed, holding that the specific, articulable facts did not establish reasonable suspicion of the crime of disorderly conduct.

State v. Hobbs
Court: North Carolina Supreme Court
Docket: 263PA18
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Civil Rights, Constitutional Law, Criminal Law

The Supreme Court reversed Defendant's conviction, holding that the trial court clearly erred in ruling that Defendant failed to prove purposeful discrimination with respect to the State's use of peremptory challenges to strike three jurors without considering all of the evidence presented by Defendant. Defendant was found guilty of one count of first-degree murder and other crimes. On appeal, Defendant argued that the trial court erred by failing to grant three objections that he made under Batson v. Kentucky, 476 U.S. 79 (1986). The court of appeals affirmed Defendant's convictions. The Supreme Court reversed, holding (1) the court of appeals erred in its analysis of Defendant's Batson claims with respect to the three jurors; and (2) as to all three jurors, remand was required for reconsideration of whether Defendant proved purposeful discrimination in each case.

State v. Mylett

Court: North Carolina Supreme Court
Docket: 6A19
Opinion Date: May 1, 2020
Judge: Earls
Areas of Law: Criminal Law

The Supreme Court reversed the decision of the court of appeals affirming the trial court's judgment convicting Defendant for conspiracy to commit harassment of a juror, holding that the trial court erred in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. Defendant was convicted of conspiracy to commit harassment of a juror because of his actions at a courthouse following his twin brother's conviction for assault on a government official. On appeal, the court of appeals concluded that the trial court did not err in denying Defendant's motion to dismiss the conspiracy charge for insufficient evidence. The Supreme Court reversed, holding that the evidence in Defendant's trial was insufficient to raise anything more than mere conjecture that he had made an agreement with another person to threaten or intimidate a juror.

Dodge v. North Dakota

Court: North Dakota Supreme Court
Citation: 2020 ND 100
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

Richard Dodge appealed from a district court order denying his application for post-conviction relief. Dodge was charged with five felonies and a misdemeanor in December 2015. Dodge was appointed counsel. In April 2016, Dodge’s counsel moved the court to withdraw because the attorney-client relationship was “irreparably broken and rendered unreasonably difficult.” The court granted the motion, and Dodge was appointed substitute counsel in May 2016. In July 2016, Dodge himself filed a “motion to dismiss counsel.” The court denied Dodge’s motion. Five months after the deadline for motions and plea agreements, Dodge's counsel sought to have Dodge submit to a psychiatric examination. This request was denied, the trial court

found no evidence, and the the court itself made no observations, that Dodge was incompetent to stand trial. After this denial, Dodge himself again moved to dismiss his trial counsel, and due to the allegations Dodge made in his motion, counsel moved to withdraw. The trial court denied both motions, and instead, required the attorney to appear as standby counsel and assist Dodge during trial if requested, but relieved him of any further obligations to consult with Dodge. The case proceeded to trial. At the beginning of trial, the court gave Dodge the option of representing himself or having his attorney represent him. Dodge chose to have his attorney represent him. Because his attorney had not prepared for trial and had no communication with Dodge since he moved to withdraw, Dodge's attorney asked for a brief recess to consult with Dodge. During the recess, a settlement was reached. Dodge agreed to enter Alford pleas on all counts, waived a presentence investigation, and agreed to be sentenced immediately after entering his pleas. Dodge was immediately sentenced following his guilty pleas, and thereafter sought post-conviction relief on grounds he was not competent to enter his pleas, and that he received ineffective assistance of trial counsel. After review, the North Dakota Supreme Court concluded the district court's finding that Dodge was competent when he entered his pleas was not clearly erroneous, and disposed of his claim of ineffective assistance of counsel.

North Dakota v. Dahl

Court: North Dakota Supreme Court
Citation: 2020 ND 87
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

The State of North Dakota appealed a district court order denying its motion to resume prosecution against Matthew Dahl and dismissing the case. In December 2014, the State charged Dahl with two counts of theft. Dahl did not appear on the charges until he was arrested on a bench warrant in February 2017. In mid-April 2017, the State mailed Dahl a pretrial diversion agreement. Dahl signed and returned the notarized agreement dated May 3, 2017. On May 9, 2017, the state's attorney signed and filed the agreement with the district court, and the court approved the agreement the same day. Under the agreement, the State agreed to suspend prosecution for "two

years from the date of execution" conditioned on Dahl's timely payment of restitution. Dahl failed to make minimum monthly restitution payments. On June 6, 2019, the State moved to resume prosecution, alleging Dahl violated the pretrial diversion agreement by his non-payment. The district court held a hearing on the State's motion in August 2019. The court concluded the pretrial agreement was executed when Dahl signed it on May 3, 2017. The court then denied the State's motion to resume prosecution as untimely under N.D.R.Crim.P. 32.2(d)(2), and dismissed the complaint against Dahl. After review, the North Dakota Supreme Court reversed, concluding the district court erred in determining the State's motion was untimely, and remanded for further proceedings.

North Dakota v. Foster

Court: North Dakota Supreme Court
Citation: 2020 ND 85
Opinion Date: May 7, 2020
Judge: Jon J. Jensen
Areas of Law: Constitutional Law, Criminal Law

Akeem Foster was convicted by jury of Terrorizing and Carrying a Concealed Weapon. Foster contended on appeal he was denied a fair trial because he was asked during cross-examination if other witnesses were lying and because the prosecutor expressed personal beliefs about the evidence during closing arguments. Foster also argued there was insufficient evidence to convict him of either charge. After review, the North Dakota Supreme Court affirmed Foster's conviction for Carrying a Concealed Weapon, but reversed his conviction for Terrorizing. The Court found Foster was improperly asked to provide an opinion on the veracity and credibility of the State's witnesses. The improper questioning was prejudicial and denied Foster a fair trial on the terrorizing charge.

North Dakota v. Kolstad

Court: North Dakota Supreme Court

Citation: 2020 ND 97
Opinion Date: May 7, 2020
Judge: Gerald W. VandeWalle
Areas of Law: Constitutional Law, Criminal Law

In December 2018, Officer Nelson of the University of North Dakota Police Department conducted a traffic stop of Stanley Kolstad for suspicion of driving under the influence. Kolstad performed field sobriety tests and a preliminary breath test (PBT). Prior to performing the PBT, Kolstad informed Nelson that he had asthma. Nelson testified he was unable to obtain a PBT result because Kolstad was filling his cheeks with air while performing the test. Kolstad was arrested for DUI and refusing to submit to a chemical test. Kolstad was transported to the UND police station to be given an Intoxilyzer breath test. Prior to the Intoxilyzer test, Nelson read Kolstad the implied consent advisory. But, because Nelson was not a certified operator of the Intoxilyzer machine, Officer Waltz conducted the test. Prior to the test, Kolstad informed Waltz he had asthma. The Intoxilyzer test results were deficient. Waltz testified Kolstad was not providing enough air for the test machine to provide a valid result. Kolstad was charged with driving under the influence and refusing to submit to a chemical test. Kolstad's counsel made a discovery request to the State seeking copies of any audio or video recordings taken by police officers. Kolstad's counsel also requested the State inform him whether any sound or video recordings taken of Kolstad were subsequently "altered, edited, destroyed, or discarded." The State provided Kolstad's counsel with dash camera footage from Nelson's police car that had been taken at the scene of the arrest, but the State did not provide any body camera footage from either Nelson or Waltz. Upon learning that Waltz's body camera footage was successfully uploaded to UND servers, Kolstad's counsel moved to dismiss the case because the State did not provide any body camera footage in discovery as requested. The district court ultimately dismissed the refusal to submit to a chemical breath test charge as a sanction for failing to provide the body camera footage. The State appealed, arguing the alleged discovery violation did not rise to a constitutional violation of Kolstad's due process rights, and the district court abused its discretion in dismissing the refusal charge. Kolstad argued the district court's order dismissing the refusal charge was not appealable, and if it was, the court did not abuse its discretion in dismissing the charge. The North Dakota Supreme Court concluded there was nothing in the record to indicate the district court adequately considered an

alternative or less severe sanction to dismissal, and by not considering a less severe sanction, the trial court erred. The district court's order dismissing the refusal charge was reversed, and the matter remanded for further proceedings.

North Dakota v. Michel

Court: North Dakota Supreme Court
Citation: 2020 ND 101
Opinion Date: May 7, 2020
Judge: Jerod E. Tufte
Areas of Law: Constitutional Law, Criminal Law

Kevin Michel was convicted by jury of knowingly receiving stolen property. Jamestown Police began investigating theft of tires from Northwest Tire in October 2017. About ten months later, Thomas Melland and Andrew Heckelsmiller became suspects in the investigation. Heckelsmiller told police he had sold stolen tires to Michel. In August 2018, Detective LeRoy Gross spoke with Michel about the stolen tires. Michel acknowledged he had bought tires from Heckelsmiller and Melland. Michel also told Detective Gross he stopped buying tires from Heckelsmiller and Melland after seeing a Facebook post from Northwest Tire offering a $500 reward for information regarding stolen tires. Detective Gross told Michel, "There's going to be a lot of restitution these two boys are going to have to come up with unless we can get some tires back." Michel said he had sold several of the tires but still had some of them. Michel turned over seven new tires to Detective Gross. Representatives from Northwest Tire and J&L Service identified the tires as some of those stolen from their shops. During the jury's deliberations, the jury submitted a note with written questions to the court. Michel argued on appeal the district court erred by not specifically answering the jury's questions and instead referring them to the existing jury instructions. After review, the North Dakota Supreme Court affirmed the criminal judgment, except as to the award of restitution. The award was reversed because the district court awarded more than what was required to make the victims whole. The matter was remanded for a redetermination of restitution.

Schwindt v. Sorel

Court: North Dakota Supreme Court
Citation: 2020 ND 92
Opinion Date: May 7, 2020
Judge: Lisa K. Fair McEvers
Areas of Law: Constitutional Law, Criminal Law, Government & Administrative Law

Gregory Schwindt appealed a district court judgment affirming a Department of Transportation hearing officer's revocation of his driving privileges for 180 days. Schwindt argued North Dakota's implied consent and refusal laws were unconstitutional, the hearing officer erred by considering the results of the horizontal gaze nystagmus (HGN) test, and the hearing officer erred in finding he refused to take a chemical test. After review, the North Dakota Supreme Court concluded the hearing officer's findings of fact were supported by a preponderance of the evidence, the conclusions of law were sustained by the findings of fact, and the decision to revoke Schwindt's driving privileges was in accordance with the law.

State ex rel. McDougald v. Greene

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2782
Opinion Date: May 6, 2020
Judge: Per Curiam
Areas of Law: Criminal Law

The Supreme Court denied a writ of mandamus sought by Relator to compel Respondent, the public-records custodian at the Southern Ohio Correctional Facility (SOCF), to provide Relator with three public records and to pay Relator statutory damages and court costs associated with this litigation, holding that Relator was not entitled to either a writ of mandamus nor statutory damages. When Relator was an inmate at SOCF he submitted a public-records request to Respondent seeking three documents. Respondent provided one of the three documents. Relator then filed a complaint for a writ of mandamus seeking an order compelling Respondent to provide the two documents and to pay statutory damages and court costs associated with this litigation. The Supreme Court denied the writ of mandamus on the merits, holding that Respondent's response to Relator fully satisfied Respondent's obligations under Ohio Rev. Code 149.43, and therefore, Relator was not entitled a writ of mandamus, and there was no basis to award statutory damages.

Opinion Date: May 5, 2020
Judge: Maureen O'Connor
Areas of Law: Criminal Law

The Supreme Court affirmed in part and reversed in part the judgment of the court of appeals denying Appellant's complaint for a writ of mandamus to compel the Cuyahoga County Clerk of Courts to produce various court records and denying the clerk's request that Appellant be declared a vexatious litigator, holding that the court of appeals erred in denying Appellant's complaint on the grounds that he did not invoke the Rules of

Superintendence as the basis for his request. Appellant sought copies of journal entries from his criminal case and a copy of the clerk of courts' records-retention schedule. The clerk largely denied the request. Appellant then filed a complaint for a writ of mandamus. The court of appeals denied Appellant's request for mandamus relief, concluding that the clerk had no clear legal duty to provide the requested records. The Supreme Court reversed, holding (1) this action to compel the production of journal entries from a 1995 case was properly brought under the Public Records Act; and (2) this Court declines to impose sanctions on Appellant or to declare him a vexatious litigator.

State v. Dangler

Court: Supreme Court of Ohio
Citation: 2020-Ohio-2765
Opinion Date: May 5, 2020
Judge: DeWine
Areas of Law: Criminal Law

The Supreme Court reversed the judgment of the court of appeals vacating Defendant's conviction and sentence and reinstated the trial court's acceptance of Defendant's plea of no contest to sexual battery, holding that the trial court did not completely fail to comply with Crim.R.11(C)(2)(a), and there was nothing in the record to support a conclusion that Defendant would not have entered his plea had the trial court been more detailed in its explanation. On appeal, Defendant sought to vacate his plea of no contest, arguing that his plea was invalid because the trial court erred by not explaining more fully the obligations and restrictions that went with his status as a sex offender, in violation of Crim. R. 11(C)(2)(a). The court of appeals vacated the conviction without requiring Defendant to show prejudice, concluding that the trial court had completely failed to comply with Crim. R. 11(C)(2)(a). The Supreme Court reversed, holding (1) the trial court did not completely failed to comply with Crim R. 11(C)(2)(a)'s maximum-penalty-advisement requirement; and (2) because Defendant did not establish prejudice, he was not entitled to have his no-contest plea vacated for a failure to comply with Crim.R. 11(C).

Oregon v. Haji

Court: Oregon Supreme Court
Docket: S066254
Opinion Date: May 7, 2020
Judge: Nakamoto
Areas of Law: Constitutional Law, Criminal Law

After a grand jury issued an indictment charging defendant Hanad Ali Haji with multiple offenses, the district attorney determined that the indictment could be challenged by demurrer because the basis for joining those offenses was not expressly alleged. Instead of seeking another indictment from the grand jury, the district attorney obtained leave from the trial court to amend the indictment by adding allegations specifying the statutory basis for joinder, without adding factual allegations about the crimes. Defendant was convicted on some of the charges at trial, and the Court of Appeals affirmed. The issue this case presented for the Oregon Supreme Court's review centered on whether the district attorney could add allegations specifying the statutory basis for joinder of multiple offenses to an indictment instead of resubmitting the case to the grand jury. The Supreme Court determined that neither the statute permitting joinder of multiple offenses in a single indictment nor Article VII (Amended), section 5(6), of the Oregon Constitution precluded a district attorney, with approval of the trial court, from amending an indictment to add allegations specifying the statutory basis for joinder of multiple offenses. The Supreme Court affirmed the decision of the Court of Appeals, based in part on different reasoning, and affirmed the judgment of the circuit court.

South Carolina v. Durant

Court: South Carolina Supreme Court
Docket: 27964
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law

Appellant Larry Durant was convicted of second-degree criminal sexual conduct (CSC) for sexually abusing a teenage girl in his church office where he served as the pastor. Durant contended the trial court improperly permitted the State to introduce evidence of prior sexual abuse allegations as evidence of a common scheme or plan under Rule 404(b), SCRE, and that the State committed a "Brady" violation by failing to accurately disclose the criminal history of its witness. After review, the South Carolina Supreme Court affirmed the admissibility of the girls' testimony. "[W]hile the State failed to disclose the criminal background information of its witness, we find this information was not material." The Court found Durant exercised his position of trust, authority, and spiritual leadership to hold private prayer meetings with teen girls who had grown up in his church. He told them he was praying for their health and good fortune, and represented that part of this process was touching them sexually and having intercourse. Durant then warned the girls of misfortune if they refused or told anyone. Moreover, he used scripture as a means of grooming the children into performing sex acts. "These facts demonstrate the requisite logical connection between the prior acts of sexual abuse and the one forming the basis of the crime charged." The Court therefore affirmed Durant's conviction.

South Carolina v. Perry

Court: South Carolina Supreme Court
Docket: 27963
Opinion Date: May 6, 2020
Judge: Few
Areas of Law: Constitutional Law, Criminal Law

Petitioner Wallace Perry was convicted on two counts of criminal sexual conduct (CSC) with a minor in the first degree and two counts of CSC with a minor in the second degree for sexually assaulting two of his biological daughters. Prior to Perry's trial, the State made a motion to admit the testimony of Perry's stepdaughter from an earlier marriage that Perry sexually assaulted her twenty-two to twenty-seven years earlier. The State argued the trial court should not exclude the stepdaughter's testimony under Rule 404(b) of the South Carolina Rules of Evidence because it fit the

"common scheme or plan" exception. Perry objected to this testimony. The trial court initially reserved ruling on the issue, but later indicated it was inclined to allow the stepdaughter to testify. The jury convicted Perry on all counts, and the trial court sentenced him to thirty years in prison. The court of appeals affirmed. The South Carolina Supreme Court determined it was not enough to meet the "logical connection" standard for admission of other crimes under the common scheme or plan exception to Rule 404(b) that the defendant previously committed the same crime. "When evidence of other crimes is admitted based solely on the similarity of a previous crime, the evidence serves only the purpose prohibited by Rule 404(b), and allows the jury to convict the defendant on the improper inference of propensity that because he did it before, he must have done it again. ...The common scheme or plan exception demands more." The Supreme Court held State must show a logical connection between the other crime and the crime charged such that the evidence of other crimes "reasonably tends to prove a material fact in issue." The State must also convince the trial court that the probative force of the evidence when used for this legitimate purpose is not substantially outweighed by the danger of unfair prejudice from the inherent tendency of the evidence to show the defendant's propensity to commit similar crimes. In this case, the State did not meet its burden. Conviction was reversed and the matter remanded for a new trial.

South Carolina v. Quinn

Court: South Carolina Supreme Court
Docket: 27966
Opinion Date: May 6, 2020
Judge: Kaye Gorenflo Hearn
Areas of Law: Constitutional Law, Criminal Law, White Collar Crime

Respondent Rick Quinn, Jr. was a former member of the South Carolina House of Representatives, representing constituents in Richland and Lexington counties from 1989-2004 and 2010-2017 and serving as House Majority Leader from 1999- 2004. He owned and operated a mail business called Mail Marketing Strategies (MMS) in Columbia, while his father owned and operated a political consulting firm, Richard Quinn & Associates (RQ&A). In 2014, Attorney General Alan Wilson designated First Circuit

Solicitor David Pascoe as special prosecutor to conduct a State grand jury investigation into alleged public corruption committed by current and former members of the South Carolina General Assembly. This case arose from a prior state grand jury investigation of former House Speaker Bobby Harrell, which resulted in six counts of misusing campaign funds, to which he pleaded guilty. During the course of the investigation into Speaker Harrell, SLED uncovered potentially criminal conduct by Representative Jimmy Merrill and Representative Rick Quinn, and a second grand jury investigation was initiated to investigate the conduct of these individuals. The investigation focused on Quinn's practice of using his office as House Majority Leader and leader of the House Republican Caucus to direct mailing and political services to his family's businesses. Quinn only admitted to a limited set of facts supporting the indictment. Believing the plea lacked a sufficient basis, the State moved to vacate Quinn's guilty plea, reconsider the sentence, and for the trial court's recusal. The State appealed the order denying its motions. After review, the South Carolina Supreme Court determined that the State could not appeal the guilty plea, the trial court did not abuse its discretion in sentencing, and there was no evidence of judicial bias or prejudice requiring the court to recuse itself. Therefore, the Court dismissed the State's appeal of the guilty plea, and affirmed as to all other issues.

Texas v. Arellano

Court: Texas Court of Criminal Appeals
Docket: PD-0287-19
Opinion Date: May 6, 2020
Judge: Slaughter
Areas of Law: Constitutional Law, Criminal Law

After Appellee Cesar Ramiro Arellano was arrested for driving while intoxicated, the arresting officer, Phillip Garcia, prepared a probable cause affidavit to support a search warrant for a blood draw. Officer Garcia submitted his sworn affidavit to the on-duty magistrate. Using a cursive signature, the magistrate signed the blank signature line of a form search warrant authorizing the search and seizure of Appellee's blood. Below the signature line appeared the words, "Magistrate, Victoria County, Texas."

Aside from the cursive signature, the magistrate's name was not typed or handwritten anywhere on the warrant. Upon execution of the search warrant, Appellee was charged with DWI. In the trial court, Appellee filed a motion to suppress all evidence stemming from the blood draw. At the pretrial suppression hearing, Appellee argued that the search warrant to obtain the blood specimen was facially invalid because the magistrate's signature was illegible in violation of the requirements of Code of Criminal Procedure Article 18.04(5). The trial court agreed, the court of appeals concurred, and the evidence was suppressed because of the illegible signature. The Texas Court of Criminal Appeals disagreed with both lower courts, finding the court of appeals erred in holding that reliance on the statutory good-faith exception was automatically precluded based on an illegible magistrate's signature in violation of Code of Criminal Procedure Article 18.04(5). Because the remaining issues in the case were not properly addressed by the court of appeals, judgment was vacated and the matter remanded for further proceedings.

Subject: License Plate Recognition with a Twist of A.I. Intelligent LPR as a Force Multiplier for Law Enforcement Confirmation
Date: Tuesday, July 28, 2020 9:10:04 AM

Thank you for registering for "License Plate Recognition with a Twist of A.I. Intelligent LPR as a Force Multiplier for Law Enforcement".

Utility, Inc. in collaboration with Sony Imaging Products & Solutions, Inc. has developed a Smart Automated License Plate Recognition system (Smart ALPR). Unlike any other ALPR system, this one is powered by an A.I. Engine. With the use of the RocketIoT communications system, the Smart ALPR system can gather real-time information at the edge to enhance alerting capabilities.

Key Points attendees will learn:

· Smart ALPR - What it is & How it is different

· Real-Time Triple Alerting Capabilities

· Benefits of Injecting Local Plate Data

· Historical Data Features for Investigative Purposes

· Added Advantages that ALPR brings to the Agency

· Importance of Sony and Utility's Strategic Partnership

Please send your questions, comments and feedback to: pro.info@sony.com

How To Join The Webinar

Thu, Jul 30, 2020 2:30 PM - 3:30 PM EDT

Add to Calendar: Outlook® Calendar | Google Calendar™ | iCal®

1. Click the link to join the webinar at the specified time and date:

Join Webinar

Note: This link should not be shared with others; it is unique to you.

Before joining, be sure to check system requirements to avoid any connection issues.

2. Choose one of the following audio options:

TO USE YOUR COMPUTER'S AUDIO:
When the webinar begins, you will be connected to audio using your computer's microphone and speakers (VoIP). A headset is recommended.

--OR--

TO USE YOUR TELEPHONE:
If you prefer to use your phone, you must select "Use Telephone" after joining the webinar and call in using the numbers below.
United States: +1 (631) 992-3221
Access Code: 254-026-953
Audio PIN: Shown after joining the webinar

License Plate Recognition with WatchGuard 4RE In-Car Video System

The WatchGuard 4RE Mobile ALPR Solution harnesses the power of the industry-leading WatchGuard 4RE in-car video system and high-definition cameras to detect and match vehicle license plates of interest stored in a database of over 20 billion detections.

Increase Officer Safety - Help distinguish between a routine traffic infraction stop and something potentially more serious.

Proactively Interrupt Crimes - Alert officers to vehicles of interest in real-time, potentially interrupting a string of crime.

Deliver Leads to Solve More Cases - Use historical data to determine a vehicle's proximity to crime scenes, providing leads crucial to an investigation.

From: 91111-33928506@requests.muckrock.com
To: MSP RAO (POL)
Cc: MSP Legal Section (POL)
Subject: Massachusetts Public Records Law Request: ALPR/Force used by Massachusetts State Police (Massachusetts State Police)
Date: Monday, April 6, 2020 12:38:30 PM

CAUTION: This email originated from a sender outside of the Commonwealth of Massachusetts mail system. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Massachusetts State Police
PRL Office
470 Worcester Road
Framingham, MA 01702

April 6, 2020

To Whom It May Concern:

Pursuant to the Massachusetts Public Records Law, I hereby request the following records:

1. All use of force reports from Troop E and A at Westfield Massachusetts state police barracks, from January 1, 2017 until the date that this request is processed. (Submitted March 28th 2020)
2. The names of agencies and organizations with which the Agency shares ALPR data;
3. The names of agencies and organizations from which the Agency receives ALPR data;
4. The names of agencies and organizations with which the Agency shares "hot list" information;
5. What is "hot list" information and I would like my personal record of what shows up when my license plate is scanned- License Plate 289ve4, by MSP;**

This information is easily available within the Agency's LEARN system. The simplest way to extract this data is to generate an "Agency Data Sharing Report" PDF file from within LEARN. To do this, a user may simply go to the "Sharing" section of LEARN and select "Output Report." A CSV/XLS file containing these records would also satisfy this request.
The instructions for extracting this data is described on pages 62-63 of the LEARN Agency Manager Guide, which may be found at this link:
https://www.documentcloud.org/documents/3860685-LEARN-5-1-Agency-Manager-Guide html
An example of this record may be found at this link:
https://www.documentcloud.org/documents/3936113-Palos-Verdes-Estates-Police-Department-Data html
A number of other agencies have regularly determined the above information constitutes a public record and have provided an "Agency Data Sharing Report." These agencies include:
Anaheim Police Department, Antioch Police Department, Bakersfield Police Department Chino Police Department, Clovis Police Department, Elk Grove Police Department, Fontana Police Department, Fountain Valley Police Department, Glendora Police Department, Hawthorne Police Department, Irvine Police Department, Livermore Police Department, Lodi Police Department, Long Beach Police Department, Montebello Police Department, Orange Police Department, Palos Verdes Estates Police Department, Red Bluff Police Department ,Sacramento Police Department, San Bernardino Police Department, San Diego Police Department, San Rafael Police Department, San Ramon Police Department, Simi Valley Police Department, and the Tulare Police Department.

I also request that, if appropriate, fees be waived as we believe this request is in the public interest, as suggested but not stipulated by the recommendations of the Massachusetts Supervisor of Public Records. The requested documents will be made available to the general public free of charge as part of the public information service at MuckRock.com, processed by a representative of the news media/press and is made in the process of news gathering and not for commercial usage.

I expect the request to be filled in an accessible format, including for screen readers, which provide text-to-speech for persons unable to read print. Files that are not accessible to screen readers include, for example, .pdf image files as well as physical documents.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 10 business days, as the statute requires.

Sincerely,

mikayla mucha

With 30 residents dead, Belmont Manor emerges as another symbol of misery in coronavirus pandemic
By Laura Crimaldi and John R. Ellement Globe Staff, Updated April 16, 2020, 11:52 a.m.

- For more than 50 years, Belmont Manor Nursing and Rehabilitation Center has been the sole option for skilled nursing care in Belmont and the life's work of two generations of the Karger family, which opened the facility in 1967.

- On Thursday, the family-owned nursing home near the open fields and woodlands of the Beaver Brook Reservation emerged as another symbol of misery in the COVID-19 pandemic, after the facility announced the virus had killed 30 patients, accounting for all but one death in Belmont apparently connected to the illness.

- The development came as the state announced 2,263 new infections and 137 new deaths attributed to the coronavirus. The virus has claimed the lives of 1,245 people in Massachusetts, 49 percent of whom lived in long-term care facilities.

- During his daily briefing on Thursday, Governor Charlie Baker urged residents to cooperate with a growing team of "contact tracers" mapping the spread of COVID-19. The project, launched with Boston-based nonprofit Partners in Health, has hired 176 people, and many more will be coming online in the coming weeks. The program, Baker said, will help officials craft strategies to stem the spread of the virus.

- They are interviewing patients about whom they had had close contact with. "We urge residents to take this call and provide the relevant information" if reached by the contact tracers, Baker said. He called the initiative "key to helping the state build a strategy for how we can get back to something like a new normal."

- Baker also provided an update Thursday on the state's supply of personal protective equipment and hospital bed capacity. He said the state has distributed more than 3.8 million pieces of gear, including masks, gloves, and gowns, to hospitals, nursing homes, community health centers, and public safety personnel.

- In the state's hospitals, Baker said, roughly half of the 17,800 beds are in use, with temporary hospitals in Boston and Worcester, as well as temporary

facilities opening soon in Bourne, Lowell, and Dartmouth, available to address any potential overflow as coronavirus cases surge.

- “We do want to be able to rely on those beds if we need them,” Baker said.

- In Belmont, the death toll at Belmont Manor is among the highest publicly disclosed in the state among elder-care facilities.

- “It’s horrible," said Town Administrator Patrice Garvin. "There are just no words to describe it.”

- The state-run Soldiers’ Home in Holyoke had seen 52 deaths as of Thursday, including 44 linked to COVID-19. With a total of 222 positive cases, 81 staffers and 141 residents, the outbreak there is outpacing the toll at a nursing home in Kirkland, Wash., which marked the onset of the US crisis and has been linked to 37 deaths.

- There are 232 long-term care facilities in Massachusetts that have reported at least one case of COVID-19, the state said, and so far 4,798 residents and workers have been infected. State officials said this week that about half of the people who have died of the virus in Massachusetts lived in long-term-care facilities.

- “One thing we know about nursing homes is that it can spread very quickly,” state Secretary of Health and Human Services Marylou Sudders said at a State House news conference.

- The state had assigned a rapid-response clinical team to work with Belmont Manor, she said.

- “Every member of the Belmont Manor team is heartbroken by the losses of beloved members of our community. From the beginning of this pandemic, we have taken every possible step to address this fast-moving situation," said a statement from administrator Stewart Karger, who began working at the facility under his father in 1979.

- The death of a patient on April 1 was the first linked to COVID-19 at Belmont Manor. On Saturday, the town said 13 patients there had died from the virus.

- Then in a letter to families dated Wednesday, Belmont Manor announced that a total of 30 patients had died, including four who had been hospitalized.

- “Every death represents an enormous amount of loss to the families of these individuals,” Karger wrote. “And because many of these residents have been with us for a longer period of time, this feeling of loss is something that we at Belmont Manor share.”

- The letter said 116 residents have tested positive with two test results outstanding. Among employees, 59 have tested positive out of 94 who have been tested. The company said it employs around 190 people.

- Belmont Manor Nursing Home Inc. has a five-star rating from Medicare, which bases its ratings on health inspections, staffing, and quality measures. Belmont Manor's rating is "much above average," according to Medicare. The facility has 135 certified beds.

- Cynthia Lee Segal, 72, died at Belmont Manor on April 9 after becoming infected, her sister said.

- Linda Fritz said Segal developed a fever in late March and later tested positive for COVID-19.

- A nurse facilitated two FaceTime calls for the sisters before Segal died, Fritz said.

- "They were very kind, and I think they are stunned by this happening, too," said Fritz, who lives in Newton.

- Still, Fritz said, the Centers for Disease Control and Prevention made it too difficult to get testing in nursing homes, and plans by the state and Belmont Manor to address the outbreak have proven inadequate.

- "I would like to think that Belmont Manor and the large number of deaths resulting at the nursing home should give nursing homes, the state, and maybe the country many lessons learned for the next wave of the pandemic," she said.

- Garvin said town officials began communicating with Belmont Manor about COVID-19 on March 5 and delivered 900 masks to the facility. On Thursday, she said the town planned to deliver 150 gowns to the nursing home.

- The state said it has been in touch with the facility by phone for two weeks and planned to help the facility with staffing.

- The National Guard has performed 43 tests onsite, and another 190 self-test kits have been delivered to Belmont Manor, the state said.

- Sudders on Thursday said Massachusetts is one of two states offering mobile testing to nursing homes, rest homes, assisted-living facilities, and other state-run care centers.

- As of Thursday, the state had administered 5,883 tests at 279 elder-care

facilities and 10,995 self-test kits had been sent to 103 facilities, Sudders said. The National Guard also planned to visit 11 sites Thursday and administer about 1,300 tests, she said.

WBUR

30 Deaths, Another 86 Positive Tests: Nearly All Belmont Manor Nursing Home Residents Have The Coronavirus
April 16, 2020
Miriam Wasser

- It began with a fever and a dry cough on March 28. The following day, the elderly man was transferred from the Belmont Manor nursing home to the hospital, where he was tested for the coronavirus.

- The results came back positive on March 30, nursing home administrator Stewart Karger told Wicked Local; Belmont Manor, a 135-bed family-owned and operated nursing home, had its first coronavirus case.

- As of April 15, 30 residents have died from COVID-19 -- four of whom had been transferred to the hospital. Another 86 residents have tested positive for the virus, and two others await test results, Belmont Manor spokeswoman Diana Pisciotta said.

- In an email dated April 11, Karger reported that 14 residents had died, meaning that fatalities at the nursing home more than doubled in five days.

- "Every member of the Belmont Manor team is heartbroken by the losses of beloved members of our community," he said in a statement. "From the beginning of this pandemic, we have taken every possible step to address this fast moving situation."

- Meanwhile, 59 of the nursing home's 190 employees have tested positive. Belmont Manor is hoping to get all employees tested soon, Pisciotta said.

- Older adults have been particularly hard hit by the coronavirus because they often have other underlying health issues. In Massachusetts, 37% of people testing positive for the virus are 60 or older, and according to state data, the vast majority of recent fatalities have been people in their 70s and older.

- The state has also reported that as of Wednesday afternoon, 530 people have died from COVID-19 at long-term care facilities in Massachusetts, and another 4,163 residents and employees have tested positive for the virus. To date, 222 long-term care facilities in the state have at least one positive case.

- "This is an incredibly infectious and unpredictable virus that is lethal to the

elderly and those with multiple medical conditions, which is exactly our nursing home resident population," Tara Gregorio, of the Massachusetts Senior Care Association, told WBUR in an email.

- Leaders at Belmont Manor declined interview requests, but noted in a statement that staff are using "aggressive infection control methods" and "carefully monitoring all residents" for signs of the virus.

- Complicating matters at Belmont Manor — and other long-term care facilities — is the fact that some residents who have the virus are asymptomatic. Though the National Guard is testing people at nursing homes around the state, demand still exceeds supply. Earlier this week, Gov. Charlie Baker said that 4,500 seniors at 264 long-term care facilities had been tested, but that another 77 facilities had requested at least 8,600 more tests.

- "Testing is crucial for a number of reasons, but most of all, it gives us the opportunity to identify and then isolate people who have tested positive and to make sure they get treatment," Baker said. "It helps us understand where the outbreaks are and to keep people informed with respect to infection, even if they don't have symptoms, to slow the spread."

- But not everyone at Belmont Manor could get a test easily. An email from Karger dated April 11 said that only symptomatic residents were being tested.

- "We've had the same experience as other long-term care facilities in that at the outset, because of limitations on testing and testing supplies, we were only able to test symptomatic residents," Pisciotta said. She added that the National Guard has come back at least twice, and that as of now, all residents have been tested.

- Lisa Kimball's 96-year-old mother, Sandy Kimball, is one of the people who got tested when the National Guard came back. Kimball said she learned Wednesday that her mother has the virus — despite showing no symptoms.

- The diagnosis, though disheartening, wasn't particularly surprising. Kimball's mother requires assistance for most daily tasks, meaning aides are constantly in contact with her.

- "It's like a petri dish in there," Kimball said. "How can anyone get away from it?"

Racist 'Zoom-bombing' invades Chinese class at Newton South High
By Matt Berg Globe Correspondent, Updated April 16, 2020, 2:04 p.m.

- On Wednesday morning, a Newton South High School advanced placement

Chinese class was underway on Zoom when hackers infiltrated the group, posting “vile, hate-filled images and speech” directed at the students, officials said.

- The incident, which lasted about three minutes, was part of a phenomenon known as “Zoom-bombing,” when a Zoom call is hacked into by individuals who disrupt a meeting. It was also an example, school officials said, of coronavirus-related racism that has run rampant since the beginning of the pandemic, often directed at the Asian community.

- Joel Stembridge, Newton South’s principal, wrote to the school community Thursday morning, calling the episode “clearly racist, hateful, and horrible.”

- “This was a traumatic experience for our teacher and students, and we will continue to offer support to everyone involved,” Stembridge said via e-mail. “To be clear, an attack on members of our NSHS Asian-American community is an attack on all of us. We will be working on a plan for responding — I will share more about this soon.”

- All Zoom meetings scheduled for Thursday were canceled, allowing the IT department and staff to check security protocols. Classes were to resume Friday, said Julie McDonough, a school spokeswoman.

- “Our counseling staff is reaching out to every student today," McDonough said. “We are scheduling a meeting with student leaders and teachers to plan a response. Hate speech and racism have no place at South and won’t be tolerated.”

- School officials notified students’ families and local police, who were investigating. Teachers and students were working with officials to gather information about the intruders, who did not appear to be associated with the high school, according to Stembridge’s e-mail.

- The intruders may have accessed the meeting through a link to the call that was created before security updates were made in recent weeks, Stembridge said. Hundreds of calls had been successful prior to the incident, he added.

- The intrusion comes as millions of people adopt the online platform for work or education. Since the pandemic started, Zoom has struggled to keep up with security features to prevent such incidents.

- After two Massachusetts schools reported “Zoom-bombing" in March, FBI officials in Boston urged users to take security precautions, such as sending links to participants directly instead of posting links in publicly available areas and making sure users have the most current version of Zoom’s teleconferencing software.

- “This is a trying time for all of us, and events such as these underscore the fragility of this new environment in which we are working,” Stembridge wrote. “We’ll have more work to do to ensure that we can continue to support students and build a safe, connected online community.”

SJC OK’s limited use of license plate readers to secretly collect current location and data of drivers
By John R. Ellement Globe Staff, Updated April 16, 2020, 3:26 p.m.

- In a ruling that hearkened back to British soldiers searching homes with “general warrants” in colonial Massachusetts, the state’s high court ruled Thursday that automatic license plate readers used by the State Police do not violate 21st-century privacy protections — under limited circumstances.

- In its unanimous ruling, the Supreme Judicial Court cautioned that it might elevate privacy issues in future cases if State Police and other law enforcement agencies start tapping information in the secretive data base, known by the acronym of ALPR, without proper justification.

- The court noted that both the federal and state constitutions have strong protections against unlawful search and seizures by law enforcement built into them by founders who had personal experience with the “abuses of arbitrary power under British rule." At that time, soldiers used “general warrants” to rummage through Colonial homes, the court noted

- "The framers had first-hand experience with abuses of arbitrary power under British rule...The surveillance implications of new technologies must be scrutinized carefully, lest scientific advances give police surveillance powers akin to these general warrants," Justice Frank M. Gaziano wrote.

- "Just as police are not permitted to rummage unrestrained through one’s home, so too constitutional safeguards prevent warrantless rummaging through the complex digital trails and location records created merely by participating in modern society," he added.

- But in the case that landed the issue before the SJC — police were alerted any time an alleged drug dealer drove over the Bourne or Sagamore bridges — the court said law enforcement properly used limited data from four cameras installed on the Cape Cod bridges, highly public location that people freely choose to travel on.

- As such, Cape and Islands District Attorney Michael O’Keefe, State and Barnstable police did not violate the constitutional rights of Jason McCarthy when they used the ALPR system to learn when and how often he drove over the bridges during one 74-day period in 2016 and 2017. Nor were his rights violated when real-time alerts allowed police to track McCarthy as he allegedly

twice engaged in alleged drug sales in Barnstable that led to his indictment.

- "While we cannot say precisely how detailed a picture of the defendant's movements must be revealed to invoke constitutional protections, it is not that produced by four cameras at fixed locations on the ends of two bridges," Gaziano wrote.

- McCarthy has pleaded not guilty to all charges.

- O'Keefe applauded the SJC's conclusion while noting that he is among those who do not want to see government have so many surveillance cameras installed that they can track a person from the moment they leave home until the moment they return.

- "When you have cameras everywhere that have the ability to track you, I don't think we want to have that in American society," O'Keefe said. "But we are not there yet. And certainly this case is not an example of that kind of broad overreach…This is a very limited use of cameras [installed] at a fixed point."

- The court acknowledged that the way it resolved the legal questions raised by McCarthy and his defense attorney, Paul Bogosian, creates more legal questions than answers. The American Civil LIberties Union and the Electronic Freedom Foundation had urged the SJC to mandate that police obtain search warrants before accessing ALPRs data or setting up an alert.

- Kade Crockford, director of the Technology for Liberty program at the ACLU of Massachusetts said the SJC has now set the stage for the Legislature to step in and provide more privacy protections for Massachusetts residents.

- "Now that the state's highest court has held that once it crosses a certain threshold, persistent, dragnet surveillance of motorists' movements would violate the Constitution, the ball is now in the legislature's proverbial court to fill in the details," Crockford said in a statement.

- In a footnote, Gaziano wrote that the SJC expects to provide answers to those questions in future cases.

- "In declining to establish a bright-line rule for when the use of ALPRs constitutes a search, we recognize this may bring some interim confusion," Gaziano wrote. "We trust, however, that as our cases develop, this constitutional line gradually and appropriately will come into focus."

- The total number of State Police-installed license plate reading cameras, and where they are, is not publicly known. State Police refused to provide the information to the Globe and it is not part of the evidence in the McCarthy case reviewed by the SJC.

- Data collected from the cameras is maintained in a database for one year under rules issued by the Executive Office of Public Safety and Security.

Coronavirus spreads to 3 state-run facilities for those with mental illness, developmental disabilities
By Matt Rocheleau Globe Staff, Updated April 16, 2020, 10:02 a.m.

- Three state-run medical centers that serve people with chronic conditions, mental illness, and intellectual disabilities are reporting widespread COVID-19 outbreaks among their live-in patients and staff.

- In recent days, teams from either the National Guard or a local ambulance company were brought in to each facility to conduct testing, according to state officials. The spread of the virus presents a particular challenge for these facilities, which are trying to quell the disease while serving a vulnerable group with complex mental and medical conditions.

- State officials said that, as of Tuesday, 67 patients and 46 staff had tested positive at the 394-bed Tewksbury Hospital. At the 255-bed Lemuel Shattuck Hospital in Jamaica Plain, 37 patients and 23 staff had tested positive. Both facilities specialize in providing long-term treatment for adults.

- Officials also identified at least 44 positive cases among residents and 55 staff at the Hogan Regional Center in Danvers, according to the Massachusetts Nurses Association, a union that represents health care workers at each site. The facility houses and provides long-term care for about 120 people with intellectual and development disabilities.

- None of the facilities have seen the same deadly consequences as nursing homes, which serve populations in the age range considered most at risk for complications from coronavirus. Nearly half of the state's deaths have been attributed to those types of long-term care facilities. Still, many of the obstacles that nursing homes face also are prevalent at these chronic care facilities, and officials are preparing for the worst.

- "It is a terribly challenging time, but people have come together and we have leadership [at the facilities] that is determined to get the resources these centers need," said Danna Mauch, president and CEO of the Massachusetts Association for Mental Health, an advocacy group.

- State officials said the facilities have been following federal and state guidelines to protect patients and staff.

- "We are and will continue to do everything in our power to ensure an aggressive and rapid response to COVID-19 confirmed cases at facilities operated and overseen by the Commonwealth," said a statement from the

state’s Executive Office of Health and Human Services.

- Officials said they have implemented measures such as isolating infected patients, restricting visitors, and taking employees’ temperatures and screening for symptoms before they enter buildings. Patients now eat meals in their rooms instead of in common areas.

- However, cutting off access to loved ones and disrupting routines can be particularly hard for people living in such facilities, potentially leading to confusion, anxiety, and depression, advocates said.

- Kathy Marith said her brother Dan, 63, a resident at the Hogan center, recently tested positive for COVID-19. So far, he’s been symptom-free, she said.

- She worries not only for him, but for the facility’s many other residents, especially elderly and frail patients.

- “I’m nervous for all of them,” said Marith, who has been in close contact with the staff, whom she credited with being proactive in trying to prevent the virus’s spread.

- Chronic care facilities have long struggled to maintain adequate staffing, a problem driven by low compensation, according to Mauch, of the mental health advocacy association. That issue has been exacerbated, she said, by the ongoing crisis because workers have had to miss work because they’re sick themselves or caring for loved ones.

- The nurses association, as well as officials at the Service Employees International Union Local 509, said they have urged state officials to provide on-site testing for workers at each facility. So far, widespread testing has been offered only for patients, union officials said. Workers are being tested only if symptomatic, and dozens have tested positive, they said.

- “The only people going in and out of the facilities are the staff,” said nurses association spokesman David Schildmeier. “So it makes no sense to not be testing staff.”

- Union officials said workers have also reported concerns in at least some facilities about the limited availability of personal protective equipment, with some staff rationing supplies such as masks. Peter MacKinnon, president of SEIU Local 509, said some social workers have told the union that because of staffing shortages they’re now being asked to take on front-line duties but without proper training.

- State officials acknowledged staff are being asked to conserve protective gear, but insisted the equipment is available and the state is continuing to try to procure more supplies.

- The state operates a handful of other hospitals and centers across Massachusetts that provide long-term specialty care. Altogether, those facilities have reported just one patient and seven staff members who have tested positive, state officials said, though they declined to provide figures for one facility, the Wrentham Developmental Center.

- The state Department of Developmental Services, which runs the Hogan and Wrentham sites and operates or funds thousands of group homes statewide, said that, across its network, nine residents had died and 276 residents and 321 staff had tested positive for coronavirus, as of Tuesday. Testing is ongoing.

- Tom Frain, whose brother lives in a group home, said while state officials have moved to test nursing home residents across the state, testing for people with developmental disabilities has been done too slowly. “People like my brother — they get nothing.”

- “They’ve been functionally abandoned by the administration,” said Frain, president of COFAR, a local advocacy group for people with intellectual and developmental disabilities. “We’re now in a solid six weeks of this and they did their first testing on Easter Sunday.”

- “What are they waiting for?” he added. “Why is my brother so far at the end of the line?”

Boston Herald

Coronavirus isolation raises concerns among Massachusetts advocates of domestic violence, assault victims
By ERIN TIERNAN | etiernan@bostonherald.com | Boston Herald
PUBLISHED: April 16, 2020 at 8:43 p.m. | UPDATED: April 16, 2020 at 8:43 p.m.

- Stay-at-home advisories are causing concern among advocates who are sounding the alarm for victims of domestic violence and sexual assault who may be trapped inside with their abusers.

- “The isolation that occurs behind the walls of a house fosters sexual abuse, domestic violence, impacts children … it’s happening in our neighborhoods. It happened before this and it’s still happening now,” said Debra Robbin, executive director of Jane Doe Inc., a victims’ advocacy organization.

- Robbin said it’s difficult to gauge just how severe the impact of quarantining and isolation are on survivors, but said it’s important people know there are still resources available. Nonprofits are still operating hotlines and she said support groups and prevention resources have rapidly moved online.

- Arrests for violent crimes often associated with domestic violence, like aggravated and simple assaults, were up by 19% and almost 50% respectively in the months leading up the coronavirus pandemic, according to Boston Police data.

- Last week, the state expanded services accessed through its confidential domestic violence hotline, called SafeLink, to also include resources and support for survivors of sexual assault, Lt. Gov. Karyn Polito announced during the press conference.

- Polito indicated domestic violence and sexual assault reporting is “way down” and the hotline, which is accessible through the state’s 211 system will now directly connect callers to rape crisis centers and domestic violence programs that can provide services.

- “In this time of physical distancing it is critical that we maintain social connection, especially for those who are experiencing domestic violence,” Polito said

- In March, simple assaults were still up 22% even as Gov. Charlie Baker enacted a stay-at-home advisory on March 24 and Boston Mayor Martin Walsh announced arrests were down 21% overall that month.

- “This isolation can mean danger for some members of our City. Make no mistake, you are not alone and no one deserves to be abused. To those in need of help, there are resources available to you. Please reach out if you, or someone you know, is in need of help or safety planning,” Sgt. John Boyle said in a statement.

- It’s difficult to track statistics on actual rates of domestic violence and sexual abuse because of a widespread lack of reporting, Robbin said.

- The coronavirus was cited as a factor in abuse in more than 3,000 calls to the National Domestic Violence Hotline in a three-week span, indicating the pandemic is having an effect.

Ahead of the Supreme Court’s First Telephonic Arguments, Some Tips From the Trenches
Morrison & Foerster’s Joseph Palmore recently argued his first telephonic oral argument before the highest court in Massachusetts. He shares his thoughts on what makes a successful session.
By Joseph Palmore | April 16, 2020 at 11:29 AM

- The U.S. Supreme Court announced this week that it will hold oral arguments in May by teleconference and that “[d]etails will be shared as they become available.” Those details matter—they’ll help determine whether the Court’s pandemic-forced innovation will succeed.

- I argued an appeal by phone last week. That gives me exactly one more such argument than many appellate lawyers—who, like me until very recently, have done zero. That doesn’t make me an expert, but my experience has led to thoughts on how the Supreme Court can make the best of this format.

- First a bit of background. I argued before the Massachusetts Supreme Judicial Court, the commonwealth’s highest court. Like the U.S. Supreme Court, it’s hearing arguments by phone. And the Massachusetts court has seven justices, which makes it similar in size to the U.S. Supreme Court. All of this means the Supreme Judicial Court is something of a test case for the justices and court officers now planning the Supreme Court’s phone arguments.

- The Supreme Judicial Court follows this standard format for its phone arguments:

- First, each advocate gets three minutes at the start of their time to speak without interruption.

- Second, justices are recognized in descending order of seniority by the chief justice to ask their questions. The chief justice goes last. After one full round, the chief asks the justices if they have any additional questions.

- Third, while each side still has a formal time limit of 15 minutes, no buzzer or chime marks it. Allowing each justice to ask questions in turn (with a second round when necessary) means that many of the arguments have gone over time.
- Fourth, the argument audio is live-streamed to the general public.

- The Clerk for the Commonwealth Fran Kenneally and his excellent team clearly communicated this format to advocates in advance. The chief justice then reiterated it at the start of each argument.

- The U.S. Supreme Court’s prior practices and already-announced plans mirror some of this. The Supreme Court recently began allowing advocates two minutes of uninterrupted time to open their arguments. And the high court has already announced it will livestream the audio of its telephone arguments. A first for the court, livestreaming is a welcome move in favor of public access to its work.

- The main challenge of telephone arguments at the Supreme Court will be justices’ questioning. A typical Supreme Court argument can be like an 8-on-1

game of ping-pong, in which advocates answer questions in rapid succession from different, often-interrupting Justices. (It's 8-on-1 instead of 9-on-1 because Justice Clarence Thomas is famously silent during oral argument.)

- That free-for-all, rapid-fire mode of argument may be ill-suited to a teleconference. Some federal courts of appeals, like the Federal Circuit, have allowed judges to ask questions in the ordinary, unstructured way during phone arguments without much problem. But what works for a three-judge panel may be unwieldy for a nine-Justice Supreme Court.

- Anyone who has participated in a large conference call knows how common it is for people to talk over each other, awkwardly pause and then do it again. The slight time lag on the phone and the inability to see visual cues that someone is about to speak can make for a frustrating conversation. Those difficulties are compounded when multiple people are eagerly trying to interject or disagree—people like the justices at a typical argument.

- Another problem with attempting the court's traditional, freewheeling approach on the phone would be identifying which Justice is speaking. Veteran court observers may be able to guess a questioning Justice by voice, but first-time advocates and members of the public may not.

- One solution would be to follow the Supreme Judicial Court's approach of having justices ask questions in seniority order. That would avoid cross-talk and limit interruptions. It would also allow participants and listeners to identify a justice who speaks because the chief justice would have called on them. But that format would not allow Justices to easily follow up on other Justices' questions, as often happens in live arguments.

- If the court prefers a less-rigid approach, it could use a hybrid system. Justices could notify the chief justice by email that they have a question, allowing him to call on each in turn. The chief could use this air traffic-control power to spread questions equitably, identify each speaking justice by name and keep the arguments roughly within their assigned time limits.

- On the other side of the equation are the advocates who will argue by phone in May. From the attorney's perspective, what is different about presenting argument by phone? Not much actually. Whether in person, over the phone or on video, the oral advocate's goals are the same: Make the important affirmative points, directly answer questions and know the record and relevant law cold.

- To prepare for my phone argument, I had the same kind of moot courts as always. I did the "in-role" portion telephonically to simulate the coming argument, followed by a debrief session on video. I also made the same kind of argument outline I always do. But, just as I never look at an outline during an in-person argument, I did not do so during the phone argument, preferring

natural conversation to reading.

- A final word on technology and the need for testing. During my argument, audible static could be heard on my line when I spoke, likely due to storms moving through Washington, D.C., at the time. The high court should consider a pre-argument audio check, in which advocates and justices can call in, test sound quality and ensure a good connection.

- I commend the court for proceeding with oral arguments. With careful planning and communication, its telephone sessions will be successful. And they will provide the public valuable access to a part of their government that has shown admirable flexibility in proceeding with its business in these difficult times.

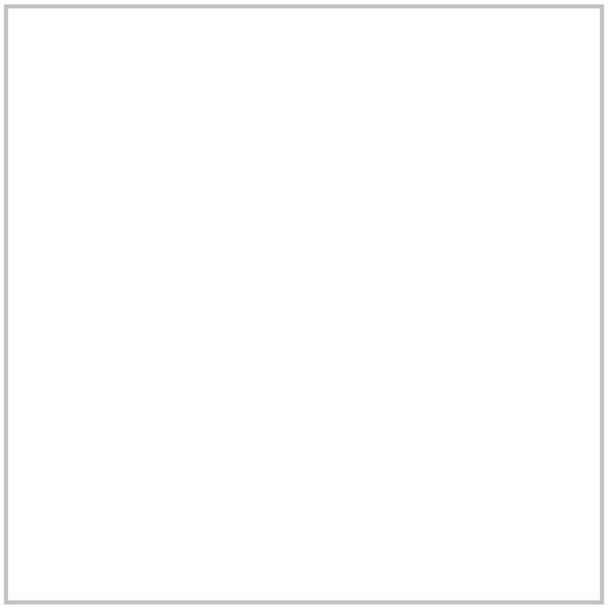
Dear PoliceOne Member,

What caused you stress two months ago is vastly different from what is causing stress today as the entire world battles COVID-19. As a first responder, you are on the front lines of this fight, which not only causes you concern for your physical safety, but also how you could compromise the safety of your family.

Staying mentally healthy is key to survival. In a recent Lexipol webinar, law enforcement trainer, resilience expert and former paramedic Mike Taigman provided strategies to lower your stress and build resilience during the coronavirus crisis.

"Mike Taigman explained the neuroscience for the increased stress many of us are experiencing and gave immediate, easy-to-use techniques to alleviate some of that stress," said Lexipol Editorial Director Greg Friese. "Many of Mike's suggestions can be put to use as you prepare to go on duty, in the spare minutes between calls for service or on the drive home from another unbelievable shift."



Watch this free on-demand webinar here.

Find Grant Money to Pay for ELSAG® Automatic License Plate Reader Technology

We have partnered with PoliceGrantsHelp.com to help you access government grant dollars.

ELSAG Plate Hunter ALPR systems bring incredible efficiencies to real-time policing, security and investigations. Proven force multipliers, our solutions include fixed, mobile and covert plate readers, and our newly released ELSAG Video Plate Hunter 900 – a

low-cost option for tight budgets. All systems assist law enforcement with vehicle-related missions including:

- Recovering stolen vehicles and license plates
- Removing unregistered vehicles and unlicensed drivers from roads
- Finding missing persons
- Finding vehicles suspected of involvement in unlawful activity
- Parking management and enforcement
- Collecting criminal intelligence
- Permit validation and tolling
- Collection of traffic data

There's no better time than now to deploy ELSAG automatic license plate readers.

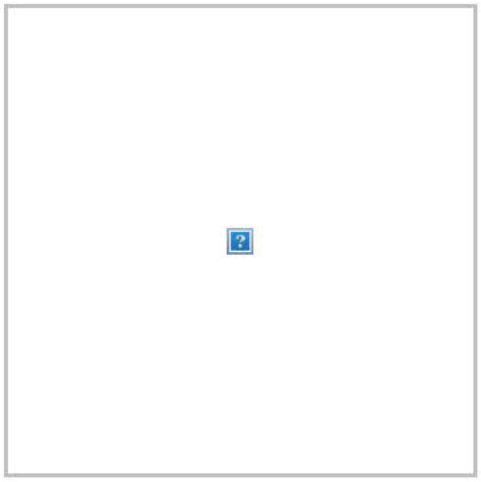
Subject: Portland LEO attacked in patrol car; Cop gifts car to needy family
Date: Tuesday, October 6, 2020 7:35:47 PM

October 6, 2020 | View as webpage

Dear Police1 Member,



Marijuana is on the ballot again in 2020, with Politico reporting that 1 in 3 Americans could have access to legal recreational pot depending on the results. As the number of states with some form of legal weed increases, the potential impact on law enforcement issues ranging from drug-impaired driving to officer hiring and recruitment is immense.

Police1 and Louisiana State University recently conducted an expansive survey to capture law enforcement attitudes toward marijuana use and enforcement. A total of 3,615 sworn LEOs weighed in on a range of topics, from the use of medicinal marijuana off duty to decriminalization.

Today's newsletter features some highlights from our special report. You can find the full coverage and analysis here.

Marijuana is on the ballot again in 2020, with Politico reporting that 1 in 3 Americans could have access to legal recreational pot depending on the results. As the number of states with some form of legal weed increases, the potential impact on law enforcement issues ranging from drug-impaired driving to officer hiring and recruitment is immense.

Police1 and Louisiana State University recently conducted an expansive survey to capture law enforcement attitudes toward marijuana use and enforcement. A total of 3,615 sworn LEOs weighed in on a range of topics, from the use of medicinal marijuana off duty to decriminalization.

Today's newsletter features some highlights from our special report. You can find the full coverage and analysis here.

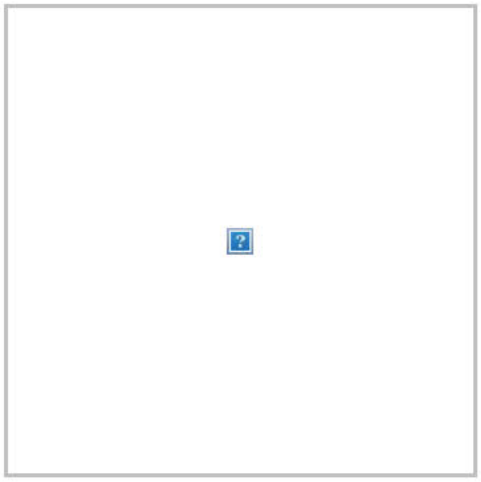
Dear Police1 Member,



Marijuana is on the ballot again in 2020, with Politico reporting that 1 in 3 Americans could have access to legal recreational pot depending on the results. As the number of states with some form of legal weed increases, the potential impact on law enforcement issues ranging from drug-impaired driving to officer hiring and recruitment is immense.

Police1 and Louisiana State University recently conducted an expansive survey to capture law enforcement attitudes toward marijuana use and enforcement. A total of 3,615 sworn LEOs weighed in on a range of topics, from the use of medicinal marijuana off duty to decriminalization.

Today's newsletter features some highlights from our special report. You can find the full coverage and analysis here.

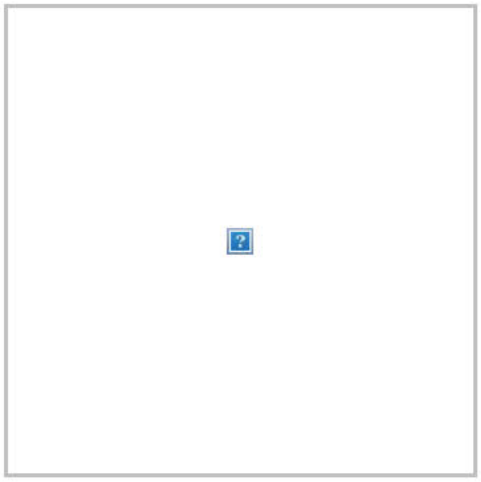
Dear Police1 Member,



Marijuana is on the ballot again in 2020, with Politico reporting that 1 in 3 Americans could have access to legal recreational pot depending on the results. As the number of states with some form of legal weed increases, the potential impact on law enforcement issues ranging from drug-impaired driving to officer hiring and recruitment is immense.

Police1 and Louisiana State University recently conducted an expansive survey to capture law enforcement attitudes toward marijuana use and enforcement. A total of 3,615 sworn LEOs weighed in on a range of topics, from the use of medicinal marijuana off duty to decriminalization.

Today's newsletter features some highlights from our special report. You can find the full coverage and analysis here.

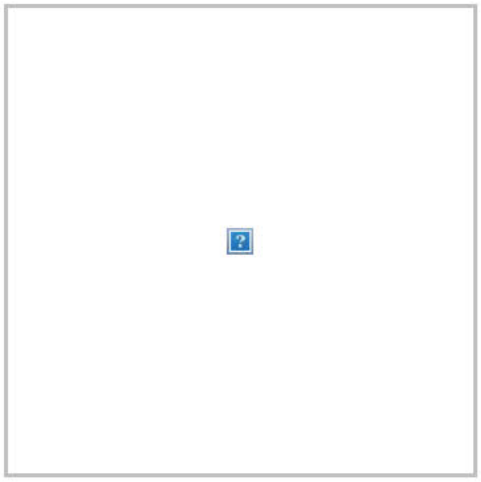
Dear Police1 Member,



Marijuana is on the ballot again in 2020, with Politico reporting that 1 in 3 Americans could have access to legal recreational pot depending on the results. As the number of states with some form of legal weed increases, the potential impact on law enforcement issues ranging from drug-impaired driving to officer hiring and recruitment is immense.

Police1 and Louisiana State University recently conducted an expansive survey to capture law enforcement attitudes toward marijuana use and enforcement. A total of 3,615 sworn LEOs weighed in on a range of topics, from the use of medicinal marijuana off duty to decriminalization.

Today's newsletter features some highlights from our special report. You can find the full coverage and analysis here.

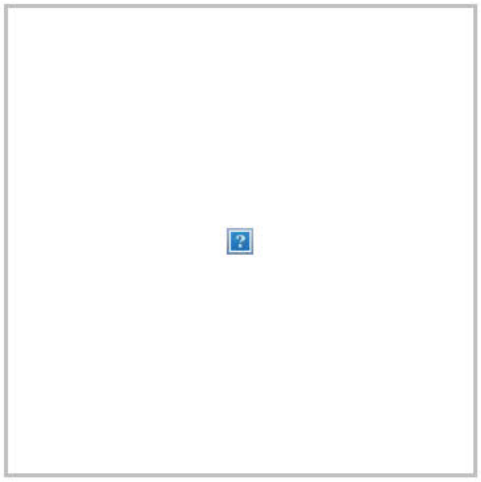
Dear Police1 Member,



Marijuana is on the ballot again in 2020, with Politico reporting that 1 in 3 Americans could have access to legal recreational pot depending on the results. As the number of states with some form of legal weed increases, the potential impact on law enforcement issues ranging from drug-impaired driving to officer hiring and recruitment is immense.

Police1 and Louisiana State University recently conducted an expansive survey to capture law enforcement attitudes toward marijuana use and enforcement. A total of 3,615 sworn LEOs weighed in on a range of topics, from the use of medicinal marijuana off duty to decriminalization.

Today's newsletter features some highlights from our special report. You can find the full coverage and analysis here.

Achieving and Maintaining Best-Practices for Cybersecurity with Third- Party Vendors and Partners

CAUTION: This email originated from a sender outside of the Commonwealth of Massachusetts mail system. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Dear partner,

Please see the attached documents produced by the National Fusion Center Association's Cyber Intelligence Network (CIN) on the BlueLeaks Data Breach over the past seven days. The document titled ***"Achieving and Maintaining Best-Practices for Cybersecurity with Third- Party Vendors and Partners"***, is the most recent document produced and may be distributed to all of your organization's members and partners.

Please see the notes below my signature block for further important updates and e-mail ciosubcommittee@nfcausa.org for any cyber mitigation coordination requests.

Thank you.

Mike
