13.16.02 License Plate Recognition (LPR)

a. Definitions

(1) **LPR:** License Plate Recognition

(2) **LPR System:** Includes a camera and an associated mobile data computer running LPR software, wherein the mobile data computer may exchange data with a central LPR data server.

(3) **OCR:** Optical Character Recognition.

(4) **System Operations Software:** System Operation Software serves as a database, data management tool, inquiry tool, history tracking, and reporting interface for deployed LPR systems.

(5) **Read:** A data file comprised of digital images of license plates and vehicles, and which contains associated data used by the LPR system (e.g., OCR values, date, time, and geographic coordinates associated with the license plate/vehicle image capture).

(6) **Alert:** A visual and/or auditory notice that is triggered when the LPR system receives a "hit" based on an OCR value associated with a license plate.

(7) **Hit:** A read having OCR values corresponding to license plate values that have previously been placed in a hot list.

(8) **Hot list**: License plate values associated with vehicles having law enforcement relevance, for example, stolen cars, vehicles associated with AMBER/SILVER Alerts, as well as vehicles related with criminal activity.

(9) **Mobile LPR system**: LPR systems which include cameras that are affixed, either permanently (hardwired) or temporarily (e.g., magnet-mounted), to a law enforcement vehicle.

(10) **Portable LPR system**: LPR systems which include cameras that can be temporarily deployed in stationary locations which include traffic barrels or speed radar signs.

b. Overview

(1) LPR systems utilize specialized cameras to capture license plate images and use computers to perform OCR on those images such that the OCR values can be compared to a stored list of license plates values. The stored license plate value list is referred to as a hot list. The hot list contains license plate values associated with vehicles having significance to law enforcement, for example, license plates associated with stolen vehicles, vehicles associated with wanted or missing persons, vehicles associated with AMBER/SILVER Alerts, as well as those reasonably believed to be involved with criminal activity. LPR systems include mobile LPR systems, mounted on police vehicles, and portable LPR systems that can be deployed in temporary stationary locations.

(2) The DESPP's LPR system operations software serves as a database, data management tool, inquiry tool, history tracking, and reporting interface for deployed LPR systems. The DESPP's LPR system operations software is installed on a system operations server located at the DESPP Headquarters, and is maintained by DESPP personnel.

(3) The system operations software operates within a secured networked environment that allows license plate read data access to only authorized personnel. The system operations software receives all LPR reads collected by DESPP mobile and portable LPR systems, and organizes the data into a central database. This central database supports a reporting and query function in which authorized DESPP personnel have the ability to:

(a) Search for LPR reads that may match a license plate or partial license plate;

(b) Generate maps showing the location of LPR reads and alarms;

(c) Create metrics based reports utilizing LPR reads and alarms; and

(d) Segregate LPR reads and alarms associated within geographic or time based boundaries.

c. <u>Policy</u>

(1) **Use, Installation and Maintenance**

(a) LPR systems facilitate access to such things as stolen vehicles and wanted person files for the purpose of supporting criminal investigations. As such, the operational use of LPR systems is restricted to authorized users for official law enforcement purposes.

(b) Mobile and portable LPR systems may only be used in vehicles or locations approved by the Commissioner or his designee.

(c) Designated DESPP personnel shall be responsible for the installation and maintenance of the LPR system equipment in DESPP vehicles or temporary locations, and shall be specifically responsible for the installation and maintenance of the system operations software on the system operations, mobile data computer, and all computer hardware and software related to the LPR systems.

(d) Designated personnel shall be responsible for maintaining a detailed inventory record of all LPR system equipment in the custody of DESPP.

(e) Designated personnel shall be responsible for conducting an annual physical inventory of all LPR system equipment and reconciling that physical inventory with the detailed inventory record.

(f) LPR equipment shall be cleaned and maintained according to the manufacturer's recommendations.

(g) Any damage to LPR systems shall be reported immediately according to established DESPP policy and procedures related to the loss/damage to DESPP equipment.

d. <u>DESPP LPR Program Administrator</u>

(1) The Commander of the Bureau of Infrastructure, Transportation and Communication shall designate a DESPP LPR Program Administrator who will be responsible for the overall management of LPR data collection, maintenance, searches, and retention related to the DESPP's LPR systems. The DESPP LPR Program Administrator is also responsible for ensuring all hot lists are updated in a timely manner. The LPR Program Administrator will serve as the LPR systems custodian and shall:

(a) Oversee and administer the storage and management of all LPR data;

(b) Ensure all hot lists are updated in the system operations software and are transmitted to the portable and mobile LPR systems as necessary;

(c) Ensure stored data is purged from the LPR system operations software 90 days after it has been initially stored, and ensure that purging operations are immediately suspended upon the LPR data becoming subject to a preservation or other legal retention obligation involving the LPR data.

(d) Designate personnel who will be authorized to access the secure data collected on the systems operations software server and conduct LPR stored data queries;

(e) Ensure appropriate training of all DESPP personnel that utilize DESPP's LPR system operations software prior to those personnel using the system;

(f) Ensure all training is documented; and

(g) Ensure ongoing training of personnel is provided as needed.

e. Hot List Updating and Storage

(1) The DESPP LPR Program Administrator or designee shall be responsible for updating the LPR system hot lists pursuant this policy. Designated personnel shall be contacted immediately if problems are encountered with the updating of any LPR system.

(2) Each hot list shall be retained for a period of time corresponding with the retention of the LPR systems reads that were compared against that hot list.

f. Data Collection, Retention, and Dissemination

(1) Data collected by the DESPP LPR systems will be maintained on the system operations server utilizing the system operations software.

(2) Only trained personnel approved by the LPR Program Administrator may access LPR system data on the system operations server.

(3) LPR data on the system operations server shall be stored for a period not to exceed 90 days from the creation date, unless such data becomes subject to a preservation obligation or other legal obligation requiring retention. All hot lists shall be retained for a period of time coterminous with the retention of the LPR systems reads that were compared against that hot list. In the event that LPR system read data becomes subject to a legal obligation to retain, the associated hot list shall also be preserved.

(4) In those circumstances when a retention obligation arises, purging will be immediately suspended with respect to the data subject to the obligation.

(5) In the event that LPR data is retained as evidence in an investigation, the data shall be subject to the same DESPP logging, handling, and chain of custody requirements as other electronic evidence.

(6) All requests for data stored on the system operations server shall be considered in view of applicable law, statute, regulation, and policy.

(7) Each request for access to data will be recorded on an LPR Program Data Query Log indicating the date received, the name of the DESPP employee processing the request, and the final status of the request.

(8) The authorized personnel conducting the LPR data query must make the LPR Program Data Query Log entry. The LPR Program Data Query Log shall be retained for a minimum of current calendar year plus one year.

(9) Random audits shall be conducted on the use of the LPR data.

g. Mobile and Portable LPR Systems

(1) Mobile LPR systems will be installed in DESPP vehicles and deployed as directed by the Commissioner or designee.

(2) Portable LPR systems include LPR cameras that are transportable and which can be deployed in a variety of venues as needed. For example, portable LPR systems can be used in conjunction with such things as traffic barrels or speed radar signs.

(3) Commanders of personnel who are assigned mobile or portable LPR systems shall:

(a) Select the appropriate personnel to utilize LPR systems;

(b) Ensure the LPR systems are properly deployed and maintained;

(c) Maintain an adequate number of properly trained personnel;

(d) Ensure all personnel assigned, utilizing, or maintaining LPR systems are properly trained prior to accessing the system;

(e) Designate a supervisor as the Troop LPR program supervisor;

(f) Ensure all required LPR program logs and records are properly maintained according to policy;

(g) Ensure all incidents that involve an LPR hit and arrests that are related to LPR usage are properly documented in CAD by utilizing an LPR sub type; and

(h) Be responsible for overseeing the LPR systems assigned to personnel under their command and ensuring compliance with DESPP policy.

(4) A mobile data computer associated with a mobile or portable LPR system will provide access to current LPR reads and will store a most recent version of the hot list. License plates captured and processed by the LPR system will be stored and accessible utilizing the mobile data computer. LPR data is maintained on the mobile data computer for the purpose of querying the hot list and verifying hits before that data is transmitted to the DESPP system operations server running the system operations software. Such transmission to the DESPP system operations server shall take place no later than the end of shift during which the LPR system was utilized. Mobile data computers will maintain no LPR reads unique to those on the system operations server after the completion of the shift during which the LPR system was used.

(5) Hot lists shall be updated as necessary by the DESPP LPR Program Administrator or designee; however, an update shall be made at no greater interval than once daily. The updated hot list will be transmitted to the LPR systems. The mobile data computer associated with the mobile and portable LPR systems will automatically purge all prior hot list data upon completion of the data transfers.

(6) All data scanned by the LPR system is transmitted to the mobile data computer and compared against the hot list. In the event that a possible match is made between the read and the hot list, an alarm is initiated. When an alarm is received alerting personnel of a potentially hit, a read record will be displayed on the mobile data computer screen. Such read record will include a digital image of the captured license plate.

(7) Personnel who receive an alarm of a hit shall compare the digital image of the license plate to the NCIC information to verify the hit. Verified hits shall be accepted by activating an "accept" alarm key displayed on the mobile data computer screen. When an alarm does not result in a verified hit, personnel shall activate the "reject" alarm key.

(8) Personnel shall provide the information by radio to the local barracks, who shall attempt to confirm the hit according to current policy.

(9) When a trooper locates a vehicle related to a hit, the trooper shall verify the license plate information and relay this information to the troop who will confirm the hit according to current DESPP policy.

(10) Personnel assigned mobile or portable LPR systems shall be responsible for the following:

a. Logging onto DESPP's LPR system to activate the system and receive updated "hot lists" at the beginning of each shift.

b. Ensure that personnel who receive a hit on a scanned license plate compare the digital image of the license plate to the NCIC information to verify the hit.

c. Providing information by radio to the Troop desk operations who shall attempt to confirm the hit according to established policy.

d. Confirming a hit according to established policy prior to any enforcement action being taken.

e. Adding specific information after the initial upload of the fixed LPR system only if it becomes necessary, such as in cases where crimes are reported after the LPR has been deployed (e.g. stolen vehicles, AMBER alerts, SILVER alerts, radio item broadcasts, etc.), or when a manual plate check needs to be performed.) Such updates shall be uploaded to the system operations server automatically, and such update will result in the generation of an updated hot list that will be transmitted to each deployed LPR system in use.

f. Ensuring that all custom manual inputs have a specific criminal investigative or patrol purpose.

g. Ensuring that all data from the mobile LPR system is transferred to DESPP's LPR systems operations server.

h. <u>Hit Verification</u>

(1) The LPR system does not interface with real time COLLECT and NCIC data.

(2) It should be recognized that information derived from license plates is compared against information on the hot list which may be up to 24 hours old.

(3) Personnel must verify all hits through COLLECT and NCIC and follow all DESPP policies and procedures.

(4) The LPR system is ONLY to be used as an investigative tool. Confirmation is essential prior to a stop.

16.1.3 Selective Traffic Enforcement

a. Traffic law enforcement will not eliminate all traffic accidents
Sometimes driver behavior, improper highway construction or design and sudden mechanical failures are not possible to prevent through traffic law enforcement efforts.

(1) **Use selective traffic enforcement programs**
Traffic accidents are most effectively reduced by selective traffic enforcement programs performed by motivated, well trained and properly deployed troopers.

(2) **Department programs cannot perform in a vacuum**
Traffic law enforcement can be relatively successful if there is public acceptance, judicial recognition and fairness in the application of traffic enforcement efforts.

(3) **Traffic enforcement programs must be efficient**
Because of the magnitude of traffic problems and limited personnel resources of the department, troopers must be deployed selectively.

CALEA 1.2.7 **b. Traffic enforcement allows considerable trooper discretion**

(1) The uniform application of traffic laws is an important component of a troop or traffic unit selective enforcement program.

(2) Conducting stationary radar activities in the same spot without consideration for the number of accidents at that location will do little to improve accident reduction, but will cause public antagonism toward these efforts.

(3) Enforcement activities should be directed towards the locations and times that violators are determined to be causing the most accidents or the most serious accidents.

CALEA 61.1.1b **c. Implementing a selective traffic enforcement program**

(1) **Determine enforcement needs**
Commanders and supervisors must accurately analyze the accidents within the troop area to determine when and where they occurred during the previous three year period, using I-CAD / I-LEADS data.

CALEA 61.1.1c (2) **Establish high visibility patrols**

CALEA 61.1.6 (a) Maintain high visibility area, line, or directed patrols because motorists automatically evaluate driving behavior whenever a patrol vehicle is in view.

(b) Active patrols encourage motorists to believe that traffic violators will incur enforcement action.

CALEA 61.1.1d (3) **Deploy traffic enforcement personnel**
The Traffic Coordinator shall deploy traffic personnel to best advantage consistent with unit goals and objectives consistent with the department mission statement.

CALEA 61.1.1c (4) **Conduct patrol activities during peak traffic periods**.
Mobile patrols are a greater deterrent because more drivers will observe a trooper on moving patrol.

(a) By patrolling during peak traffic periods, a high deterrent effect can be realized; but

CALEA 61.1.6b (b) During periods of extremely high traffic density, fixed traffic posts at strategic locations may prove effective, whether covert (hidden) or overt (highly visible).

(5) **Troopers should constantly initiate violator contacts**

(a) Troopers must observe speeders and other hazardous violators to initiate enforcement action.

(b) Drivers witnessing such enforcement activity will believe that patrols are both active and effective.

(6) **Employ random patrol patterns**
Random patrolling should normally be used because predictable patrol patterns allow motorists to anticipate troopers at locations at given times and adjust their driving behavior accordingly.

d. **Types of department patrols**
Which patrol to use will depend largely upon the results of analysis of accident patterns in an area.

(1) **Line patrol**
A line patrol covers a highway from one point to another;

(2) **Area patrol**
An area patrol may include several highways on which hazardous violations have been observed;

(3) **Point or stationary patrol**
Point or stationary patrols are of value whenever a great number of vehicles pass a given location on a highway; and

CALEA 61.1.6c (4) **Unmarked vehicle patrol**
Unmarked vehicles discover hazardous moving violations, which normally would not occur in the presence of a marked vehicle.

CALEA 61.1.1e **e.** **Evaluating selective enforcement efforts**

(1) Any motorist who observes a trooper will usually show improvement in driving behavior because of a perceived risk of penalty for unsafe or unlawful driving maneuvers.

(2) If a trooper observes a violator and takes action, the deterrent effect on drivers who witness the traffic stop is great and long lasting, but if violators are seldom stopped, there will be little or no deterrent effect.

(3) Consistent motor vehicle law enforcement activities by troopers foster the belief among drivers that there is a real possibility of being stopped for a traffic violation.

(4) Compliance with traffic laws can be achieved by earning a reputation for effective traffic enforcement programs and activities.

(5) The degree and quality of enforcement activities will determine the immediate and long term effect of department enforcement programs.

(a) The number of troopers on patrol and the number of arrests and warnings issued are simply measures of enforcement activity.

(b) How enforcement effort is applied will determine the results.

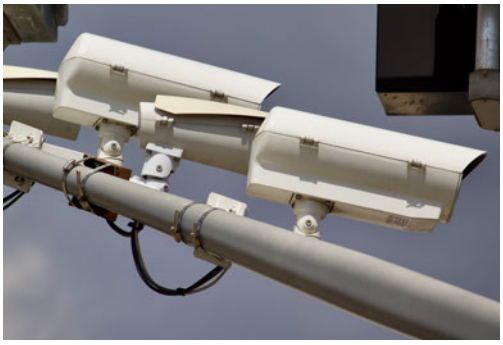
(6) Enforcement efforts which concentrate on violations causing accidents at locations and times when and where accidents are known to occur should reduce the rate and severity of traffic accidents.

(7) Periodic evaluation of enforcement efforts should be conducted at least annually, including tabulation of enforcement action and correlation of enforcements to the number and severity of accidents occurring before and during the program.

f. **Improper motives are counter-productive**

Enforcement programs based upon raising funds or issuing a large number of summonses will antagonize the public, cast doubt upon department credibility and engender disrespect from troopers and citizens.

(1) Efforts must be directed primarily toward selective enforcement of violations which cause accidents.



(2) Qualitative and quantitative measurement of activities can be used to measure program effectiveness.

Executive Summary

Since their inception more than a century ago, license plates have primarily been used to display information for fast and accurate identification of motor vehicles and to demonstrate compliance with motor vehicle registration laws.

In support of their highway and public safety missions, License Plate Readers (LPRs) provide law enforcement with the ability to check license plates against various databases. Tolling and parking enforcement authorities also rely on LPR technology for the collection of tolls and enforcing parking regulations.

Law enforcement agencies can build meaningful LPR system policies that respect individuals' privacy rights while providing authorized users with the information necessary to ensure the public's safety.

More than a decade ago, it was recognized that inconsistent business rules used by license plate issuing authorities were resulting in alarmingly high "misreads," diminishing law enforcement's ability to identify and apprehend suspected criminals and terrorists, recover stolen vehicles, and assist people in need of assistance. Similarly, tolling and parking authorities are hampered in their revenue collection mandates that are critical to maintaining infrastructure and ensuring parking regulations are not flouted. In addition, license plate misreads hamper Customs and Border Protection's ability to correctly identify vehicles crossing international borders.

In response to this issue, in 2012, AAMVA published a *Best Practices Guide for Improving Automated License Plate Reader Effectiveness Through Uniform License Plate Design & Manufacture*. At the time, AAMVA did not have a License Plate Standard. Since that time, AAMVA has published a License Plate Standard (2016) and a License Plate Standard, Edition 2 (2020).

In 2020, the AAMVA Law Enforcement and Vehicle Standing Committees determined the 2012 LPR document should be retained but with content now covered in the License Plate Standard removed and the remaining material updated and added to as appropriate. This guide has been renamed *License Plate Reader Program Best Practices Guide* and has been refocused on best practices in the administration of LPR Programs for state and provincial law enforcement, although much of the content is applicable to tolling and parking enforcement authorities alike.

Chapter 1 Introduction

License Plate Readers (LPRs) are an effective law enforcement and traffic safety tool and are critical to government entities—such as tolling and parking enforcement authorities—who use the technology to enforce the law and collect revenue. LPRs enhance public safety and security by providing law enforcement the ability to check license plates against databases such as the National Crime Information Center. The databases searched are at the discretion of each law enforcement agency using LPR technology.

Federal, state, local, and tribal public safety agencies rely on accurate and timely license plate information to effectively and efficiently perform the multiple tasks required in the performance of their duties. Information is available in multiple formats, including hot lists (e.g., stolen vehicle), Be On the Look Out (BOLO), Attempt to Locate (ATL), officer safety information, AMBER Alerts for at-risk children, SILVER Alerts for at-risk adults, and more. Much of this information can be, and often is, associated with a vehicle's license plate. The ability of LPRs to quickly and accurately scan thousands of license plates is critical to the men and women of law enforcement who contact hundreds of thousands of people throughout the U.S. and Canada every day, as well as to Customs and Border Protection officers and agents monitoring international ports of entry. When LPRs misread license plates, law enforcement is hampered in its mission to protect and to serve, and government entities lose revenue from uncollected tolls.

The International Association of Chiefs of Police conducted a 2021 survey of police agencies across the U.S. about their use of LPR systems. More than 1,200 agencies responded to the survey measuring LPR use, policy considerations, data retention and management, and more.[1]

Among all respondents:

- **40%** reported currently using LPR systems in their departments.
- Cost was the biggest barrier to LPR use.
- Larger agencies were more likely to use LPR systems than smaller agencies were.
- Mobile units were the most common form of LPR system used.

Among agencies using LPR:

- **75%** owned their own LPR system. Others contracted use of their LPR system or leveraged another agency's LPR system.
- **63%** shared their system with another agency, and **84%** shared their LPR data with other agencies.
- **64%** reported full control of the data in their LPR system.
- **44%** of the agencies using LPR stored their data on the cloud, and **43%** stored their data on agency servers or other government resources.

A study conducted by the Police Executive Research Forum[2] concluded that LPRs increased license plate reads by a factor of more than eight. What the study did not, and could not reveal, is the number of hits "missed" because of license plate misreads. Regardless of the misread rate in a particular jurisdiction, there

1 As of this printing, these represent preliminary estimates only.

2 Combating Auto Theft in Arizona: A Randomized Experiment with License Plate Recognition Technology: Police Executive Research Forum, December 2011.

is no refuting that misreads occur. And when they do, the potential exists to miss opportunities to arrest a suspected criminal or terrorist, to recover a stolen vehicle, or to collect toll revenue.

A completely effective "ecosystem" is needed to ensure as close to 100% as possible accurate license plate read rate is achieved by LPRs. Multiple stakeholders share the responsibility for maintenance of the ecosystem. Motor vehicle agencies having license plate design and manufacture administration oversight responsibility should ensure their issued license plates align with the AAMVA License Plate Standard (see Appendix B). LPR manufacturers have a responsibility to develop and implement state of the art technology to accurately read the multi-variant license plates that exist. Law enforcement and other government entities using LPR are responsible for ensuring they have policies and training that align with the most current best practices available.

AAMVA published a *Best Practices Guide for Improving Automated License Plate Reader Effectiveness Through Uniform License Plate Design & Manufacture*. At the time, AAMVA did not have a License Plate Standard. Since that time, AAMVA has published a License Plate Standard (2016) and a License Plate Standard, Edition 2 (2020) (see Appendix B).

In 2020, the AAMVA Law Enforcement and Vehicle Standing Committees determined the 2012 document should be retained but with content now covered in the License Plate Standard removed and the remaining material updated and added to as appropriate. This guide has been renamed *License Plate Reader Program Best Practices Guide* and has been refocused on best practices in the administration of LPR Programs for state and provincial law enforcement, although much of the content is applicable to tolling parking enforcement authorities alike.

AAMVA also has four policy statements addressing license plates (see Appendix B).

In 2020, AAMVA launched the License Plate Verification Program (LPVP). The LPVP allows jurisdictions to submit up to four license plates per fiscal year for examination and comparison with the AAMVA License Plate Standard, at no cost to the jurisdiction. The examination is conducted by an independent third-party laboratory under contract with AAMVA. A written report is provided to the submitting jurisdiction outlining areas where their license plate(s) do, and do not, align with the License Plate Standard. The report identifies for jurisdictions areas for potential improvement in the readability of their license plates.

This LPR Program Best Practices document, combined with the AAMVA License Plate Standard, Edition 2; License Plate Policy Statements; and License Plate Verification Program all serve to assist jurisdictions in shaping of jurisdiction laws and regulations and operational policies ensuring license plate readability and integrity.

Chapter 2 License Plate History

Introduction

Since their inception more than a century ago, license plates have primarily been used to display information for fast and accurate identification of motor vehicles and to demonstrate compliance with motor vehicle registration laws. The advancement of manufacturing technology has resulted in more colorful and detailed graphics on plates, which can be used to promote a jurisdiction or organization but at times have created an identification challenge for law enforcement and a readability challenge for camera technology. Most jurisdictions now have numerous plate types and designs available to the public.

Hand-Made, Horse-Drawn

The first record of a registration plate in the U.S. was in Philadelphia, Pennsylvania, in the 1850s. Even then, legibility of plates was a concern, and horse-drawn vehicles required registration to be identified with numbers "not less than four inches high." Among other things, these numbers provided a means of identification when reporting an incident involving inappropriate or reckless driving. Today, only the state of Indiana still requires a license plate on a horse-drawn carriage.

The construction of these early registration plates was left to the innovation of the vehicle owner; wood, brass, or other metals affixed to leather backings were common materials used. During the next 50 years, many cities required registration, and they frequently required payment of a modest registration fee.

Plate Production and Issuance

In the early 1900s with the advent of motorized vehicles, jurisdictions took responsibility for registration and standardization of plate issuance.

In 1901, New York became the first state to require license numbers on motor vehicles. In 1903, Massachusetts was the first state to issue a standard statewide plate. Others soon followed, but issuance of plates remained inconsistent.

California also began requiring plates in 1903 but did not produce them; the Automobile Club of Southern California (an early AAA organization) issued license plates—called mouse ears—to members for $1.00. The state assumed this responsibility in 1910.

On March 22, 1905, the Maine senate debated House Document 552, which required automobiles to be registered and plates to be issued. A senator argued in favor of the plate by stating: "The point upon this bill comes is upon the matter of registration. What does it mean? The matter of registration does not prevent the violation of the law, but the matter of registration, and the law compelling the carrying in a conspicuous position, of a certain number, which leads to the registration and which may lead to the detection or recognition of a violation of the law, is all that registration can amount to as to guarding the safety of the public against accidents from automobiles."

As the debate continued, another senator voiced his support for the display of a number on automobiles so that the operator could be identified when it frightened a horse. In part he stated, "I do not own

an automobile, and do not ever expect to. I do own a cheap horse and have a wife and three girls that drive it. What is the result now? They do not dare to go out. I have a safe horse, but when one of those reckless fellows comes along (*in an automobile*), they are likely to get tipped out, as many have in the State of Maine."

The debate continued, the bill passed and became public law Chapter 147. It required the Secretary of State to license operators, to register automobiles and motorcycles, and to issue plates. The law also required the Secretary of State to "furnish the applicant two enameled iron plates containing the word 'Maine' and the number of the registration in Arabic numerals not less than four inches in height. The number plates must be attached to the front and back of the automobile and one number plate must be attached to the back of motorcycles."

Maine plate, 1905 to 1911. The width changed based on the number of characters on the plate.

Starting in 1903, "mouse ear" plates were sold for $1 by the Automobile Club of Southern California.

By 1915, nearly all jurisdictions issued license plates on an annual basis and charged a registration fee that allowed a vehicle to be driven on public roads. Government officials recognized early on that a registration system provided for vehicle identification and a source of transportation revenue. However, license plate design continued down an inconsistent path. It wasn't until 1956 that a standard plate size (12" x 6") was introduced at the request of automobile manufacturers to make it easier to incorporate license plates.

Integrating Safety Concepts

With the rapid increase in the motor vehicle population in the 1920s and 1930s, traffic crashes increased dramatically, leading to the need to improve not only vehicle identification but also vehicle safety. License plates became one means to improve safety by providing a device that improved the night visibility of motor vehicles. The first retro-reflective license plates in the U.S. were issued by New Mexico in 1936.

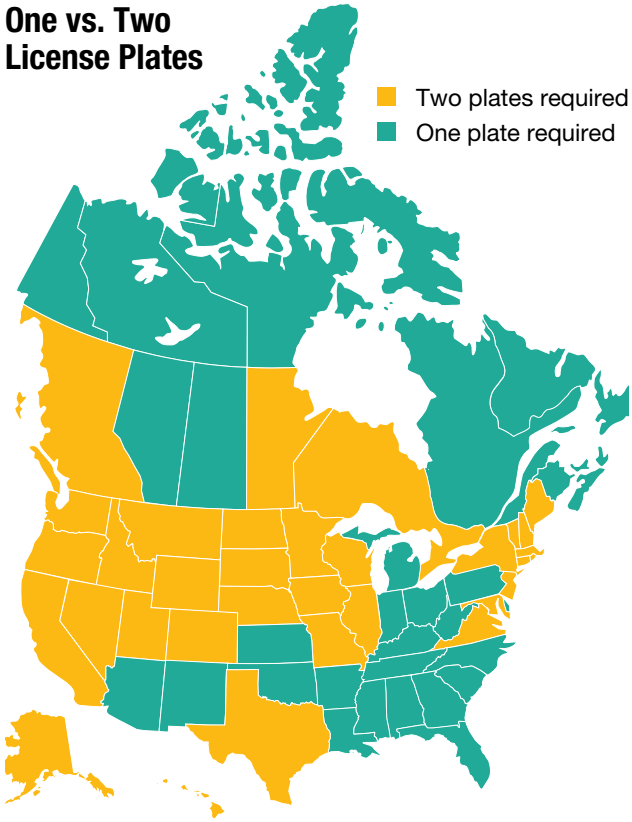
As retro-reflective technology advanced, fully retro-reflective plates became possible and the first was issued by Connecticut in 1947 followed by Maine in 1949. Delaware followed suit in 1950 followed by Rhode Island and Oregon in 1951.

During the 1950s, relatively new sheeting gave retro-reflective plates their biggest boost. Minnesota had the distinction of being the first state to use the sheeting on automobile license plates.

The effect that retro-reflective plates had on nighttime motor vehicle crashes was dramatic, and it did not go unnoticed. In 1956, the first year of use in Minnesota, deaths caused by automobile crashes in rural areas dropped from 24% to 9%. Urban area fatalities involving parked vehicles decreased from 28% to 7%.

Standards Materialize

Tiny San Marino—the smallest republic in Europe, with an area of only 24 square miles—had the distinction of being the first country on that continent to make reflective license plates mandatory on all 2,500 of its automobiles. In the other hemisphere, the South and Central American countries of Peru and Costa Rica also became pioneers in retro-reflective license plates. In Canada, the provinces of Newfoundland and Alberta led the way. Today, all 50 U.S. states and most other countries in the world use retro-reflective plates.



With the advent of retro-reflective license plates, law enforcement realized a benefit in improved legibility.

Although one of the original intents of a vehicle registration number was to aid law enforcement, the reality was that non-reflective plates could only be easily read during daylight hours. Retro-reflection provided greatly improved legibility at night, and even today fully retro-reflective plates continue to have strong endorsement from U.S. law enforcement officials, who advocate fully retro-reflective plates on both the front and rear of vehicles for improved safety and law enforcement efficiency.

Although early license plates were often homemade or devised of porcelain, steel became the predominant base material for plates during the first half of the 20th century. Today, aluminum dominates as the material used in license plate manufacture.

After 1945, most states returned to the pre-war practice of requiring two plates per vehicle. Since then some states have moved from two plates to one or vice versa. States typically move to one plate with the intent to save on the cost of the second plate. During the late 1980s, Connecticut was the last state to move from one plate to two plates. Law enforcement effectiveness was cited as the primary reason for the change. The U.S. and Canada are two of a small number of countries that allow one plate. The following chart identifies the North American jurisdictions that require either one or two license plates.

Within the U.S. and Canada, each jurisdiction is responsible for issuing license plates for vehicles registered in their jurisdiction. To create a plate unique and easily recognizable to that jurisdiction, combinations of colors were originally used. Plate background color and colors of the alphanumeric were varied, along with the characters, to create the necessary combinations needed for vehicle classifications and to differentiate plates among the jurisdictions. With increases in vehicle populations and registration classifications, color alone was not enough. Graphic technology became available in the early 1970s that allowed another level of differentiation of license plates. In 1973, Illinois was the first state to use graphics preprinted on the reflective sheeting, for a special plate for disabled veterans. South Dakota quickly followed with the first general issue graphic of Mount Rushmore National Monument. Today all jurisdictions use graphic plate design. When first introduced, graphic design plates were viewed as attractive and as a mechanism to enhance the image of the jurisdiction.

Three Canadian jurisdictions require two plates and 10 require one plate. Thirty U.S. States and the District of Columbia require two plates and 20 states require one plate. NOTE: The five U.S. Territories are not included.

However, since the proliferation of graphic plate designs, law enforcement is no longer able to easily recognize the issuing jurisdiction. The widespread use of graphics and colors frequently makes legibility of the plate characters a challenge for law enforcement.

Modern Features, Security, and Function

Until the 1990s, all the U.S. and Canada and most of the rest of the world produced license plates with raised (embossed) alphanumeric characters. In the late

1990s, digital printing technology was introduced, resulting in flat, digitally printed license plates. Today, many states are issuing flat plates. Some jurisdictions issue a combination of embossed and flat plates.

As a result of increasing concern with the use of counterfeit license plates used to perpetrate crimes, security features were added to license plate. These security features allow for easy recognition of fraudulent plates and provides one more obstacle for criminals to overcome.

The following functions of a license plate have been, and continue to be, the most important over the past century:

- Display of information necessary for fast and accurate identification of a motor vehicle and compliance with motor vehicle registration laws
- A validation sticker is issued in most jurisdictions, often rotating the color, to indicate a current and valid registration
- Provide an added margin of visibility and safety by making vehicles more visible

More recently, additional functions of license plates have emerged to

- Provide revenue for highway funds and sponsoring organizations (specialty and vanity plates)
- Use images of plates to improve and increase toll collection, parking fees, and fines
- Provide a way for individuals to express their pride or to promote various causes
- Provide access control to parking, facilities, and gated communities.

Alternative Vehicle License Plates

Two nontraditional license plate technologies have recently emerged: digital license plates and front license plate wraps. These alternative vehicle license plates are intended to replace traditional aluminum or metal license plates.

Digital license plates are reflective but not retro-reflective, creating challenges for law enforcement, tolling authorities, and others that read license plates in all light conditions and rely on License Plate Reader (LPR) technology, which is currently programmed to read retro-reflective license plates.

A license plate wrap is an adhesive license plate applied to a vehicle's bumper. Wraps, where currently authorized for purchase, are only allowed to be applied to the front of a vehicle.

A curved, indented, or otherwise non-flat surface could render the wrap unreadable to LPRs or the human eye.

For a fuller explanation of both the benefits and challenges associated with nontraditional license plates, see the AAMVA License Plate Standard, Edition Two, Chapter 5 – Alternative Vehicle License Plate Displays.

Chapter 3 License Plate Reader Fundamentals

Introduction

This section provides an overview of License Plate Readers (LPRs), the license plate reading process, and key challenges faced by LPR systems.

Typical applications for LPR technology by law enforcement, motor vehicle administrations, and other entities include but are not limited to:

- Law enforcement stolen vehicle and other "hot list" files
- AMBER, BLUE (violent criminal who has killed or injured a law enforcement officer), and SILVER Alerts
- Open road tolling (pay by plate)
- Congestion pricing
- Parking enforcement
- Access control
- Traffic studies
- Automated speed enforcement
- On-street parking enforcement
- Travel or journey time calculations

As the demand for LPR systems expands in both law enforcement and commercial applications, LPR technology continues to evolve. LPR provides cost-efficient approaches in varied environments that include both environmental challenges (e.g., mobile-based platforms, high-speed traffic) and license plate challenges (e.g., introduction of new designs, fonts, and so on across multiple jurisdictions).

The reads from LPR systems, namely the license plate number and in some applications the license plate jurisdiction, are primarily used as input into downstream systems to support the intended application. For example, whereas in open road tolling systems, the license plate number and jurisdiction are used to support the collection of toll revenues, in federal and state law enforcement systems, the license plate number and jurisdiction are used to support law enforcement queries against both large-scale (e.g., National Crime Information Center) and local data sources.

In some applications, manual verification or certification of LPR results is required at some point in the process. To the extent LPR systems can improve and retain a high degree of accuracy, operational costs can be reduced. In some applications, LPR system service-level objectives call for a 95% accuracy rate in correctly identifying both the license plate number and jurisdiction when the license plate is completely visible in the license plate image. The most significant challenge to maximizing license plate read rate accuracy is the ability of LPR system vendors to quickly adapt to the introduction of jurisdictional license plate designs with varying fonts, graphical designs, stacked letters, and so on.

License Plate Reader Systems

LPR systems include deployment of fixed, portable, mobile, and mobile application platforms.

Fixed Platforms

Fixed LPR platforms are permanently mounted on fixed infrastructure such as overhead gantries or roadside bollards. LPR fixed platforms are commonly used in open road tolling, commercial vehicle weigh station operations, and some federal and local law enforcement applications.

Fixed LPR in weigh station operations.

Fixed LPR in Customs and Border Protection inbound.

Portable Platforms

Portable LPR systems can be transported between locations, assembled, operated, and then disassembled. Once deployed, they operate as a fixed platform. Examples include portable trailers, traffic barrels, and other platforms configured with or containing LPR equipment.

Portable department of transportation trailer with LPR.

Speed trailer with LPR.

Mobile Platforms

Mobile LPR systems are defined as any LPR system that is mounted on a vehicle, whether a police car, tow truck, street sweeper, parking enforcement vehicle, and so on. These systems can include one to four camera configurations and are typically mounted on the roof or trunk, or they are custom manufactured.

Typical components of mobile systems include cameras that obtain images of the plate and vehicle, which in turn are passed to a processor mounted in the trunk. The processor locates the license plate in the image and extracts the license plate number. It then compares the textual license plate read against selected data sources and sends the output in the form of an alert to a mobile data terminal (screen) and an operator in the cab. The alert typically contains the name of the data source to which the image was compared such as an expired license or registration system, an infrared (IR) image of the license plate, and a color overview image of the vehicle in question. Data generated from mobile LPR systems can also be stored or transmitted via a back-office software application.

Patrol vehicle roof-mounted LPR.

Parking enforcement roof-mounted LPR.

Mobile LPR Applications (Apps)

Mobile LPR applications are defined as LPR systems that are held and operated by individuals using devices such as barcode readers, ruggedized PDAs, and smart phones that provide other capabilities (e.g., communications, internet access). These technologies provide mobile LPR capabilities and rely on the user to point the imager toward the location of the license plate.

LPR application on a mobile device.

Use of these devices is limited to speed applications typically less than 45 mph and are subject to unique challenges such as shadows, low ambient light, distance or angle to the license plate surface, and non-reflective surfaces. These limits can be overcome using techniques to light or IR illuminators resident in the device. Because IR imagers are not typically available on commercial general-purpose handheld devices, overcoming readability of non-reflective surfaces using a color imager generally requires special Optical Character Recognition (OCR) techniques. The accuracy of these OCR devices is dependent on the specific device and environment in which it is being used.

Handheld platforms are useful because they are easily deployed and can be used in parking enforcement, covert applications, portable checkpoints, and more. Benefits include portability, relatively low cost, and tactical use. The biggest drawback is that when the LPR application is used, it drains the device battery much faster than normal usage.

LPR Camera Technology

Two primary approaches are used to capture images from which the license plate information can be extracted. One approach is to capture a single still image of the license plate at an "optimal" distance from the camera, where the illumination, lens settings, and field of view can all be controlled to yield the best possible images under any ambient lighting and weather conditions. Another approach is to capture multiple images as the vehicle travels through the field of view of the camera. In this approach, near-instantaneous adjustments to the flash, shutter, and gain settings are performed to optimize the license plate image for different environmental conditions.

Monochrome (black and white), color, and IR cameras are used in various solutions. Monochrome cameras tend to yield the best resolution, can work with most types of visible light illumination, and are generally less costly. Color cameras are useful when the color information can be used to improve

the separation between characters and background and for identification of the jurisdiction. Color cameras require white light to produce accurate color information and are of very limited value at night without the use of additional illumination.

IR cameras are tuned to respond to IR illumination. IR cameras tend to be most sensitive at night and tend to be fitted with a band-pass filter designed to block visible light (to limit the effect of headlights and sunlight). This tuned IR illumination is effective at reflecting off the reflective background finish of the plate and not reflecting off the non-reflective characters (or vice versa).

Additional cameras are often used as part of the solution so that both a plate image and a vehicle image can be simultaneously captured to provide context and for investigative purposes. Multiple cameras are also useful when multiple bandwidths of light are used. For example, the fusing of white light and NIR (near-IR) light imagery adds significant information during the OCR and jurisdiction determination.

License Plate Recognition Process

The license plate recognition process begins when a vehicle is detected by an LPR system and ends when an LPR system information has been collected, analyzed, and handed off to backend systems for further processing.

The key steps of the LPR process are to

- Detect the vehicle and/or license plate.
- Locate the license plate in the image(s).
- Extract license plate characters from the background.
- Identify the license plate number.
- Determine the license plate jurisdiction *(optional).*
- Hand off LPR results to backend systems.

The following paragraphs describe each of the LPR steps in detail.

Detecting the Vehicle and/or License Plate

External triggers such as through-beam IR sensors, retro-reflective license plate sensors, ground-based induction loops, laser range sensors, and so on can be used to detect the presence of a vehicle in the field of view of the ALPR system. These types of triggers are primarily used in fixed-platform ALPR systems. Alternatively, the ALPR system detects the presence of a license plate by analyzing the camera's video signal (which may capture up to 60 images per second) and looking for potential license plate candidates. This type of detection is primarily used in mobile platform ALPR systems and can support vehicle speeds up to 140 mph. When the vehicle is detected, the ALPR captures one or more images containing the license plate that will be used to support the subsequent license plate number and jurisdiction determination.

Locating the License Plate in the Image

After one or more images containing a license plate are captured, a "license plate finder" algorithm is used to determine the exact location of the license plate in the image. This may be accomplished by searching for license plate characteristics (e.g., high-contrast objects) or character strings in the image that indicate the presence of a license plate. This process is one of the most difficult steps of the LPR process because the license plate must be located in potentially conflicting images that contain other information that may appear as license plates (e.g., bumper stickers, other writing, contrasting graphic designs). In addition, the type and condition of the license plate (e.g., retro-reflective, non-reflective, license plate frames and covers, license plate orientation) may require the use of special lighting and camera technologies to both locate and present the optimal license plate image to the character recognition algorithms.

As shown in the picture below, LPR cameras can vary flash, shutter, and gain settings to capture multiple images per vehicle over a wide range of ambient and environmental conditions.

Camera Arrangement	Resulting Image with Unchanged Ambient Conditions
Flash Duration = 130 µs Shutter Duration: = 200 µs Gain = 2	
Flash Duration = 390 µs Shutter Duration: = 500 µs Gain = 2	
Flash Duration = 780 µs Shutter Duration: = 1000 µs Gain = 2	

By varying camera settings and controlling illumination, the ability to locate a license plate within an image can be greatly improved. In addition, the 'best' image can also be used to improve the accuracy of the subsequent character extraction and license plate number determination.

License plate that has been located in the larger vehicle image captured by an LPR camera.

Extracting the Characters from the Background (Segmentation)

After the license plate is identified in the images(s), the region around the license plate may be further analyzed to extract the characters from the background. In the following example, pixels making up the candidate region are separated into foreground and background pixels to provide a more suitable candidate image used by the OCR algorithms to translate a character string image into an alphanumeric value that constitutes the license plate number. This is made more difficult when there is little contrast between the license plate number and the plate background.

The segmented or pre-processed license plate image is then passed off to OCR software, where the images are converted to individual alphanumeric characters.

Determining the License Plate Number

Challenge: Poorly designed fonts and variations in fonts themselves, additional symbols, half-height characters, location of registration stickers, license plate frames and covers, and holograms on characters all increase the complexity of OCR algorithms used to determine the alphanumeric characters of a license plate.

In the following example, you can see the software cannot discern whether the first character is a "B" or and "8" and whether the third character is a "6" or a "G."

In the following license plate examples, the ascender and descender of the letter 'Q' takes on different characteristics that may require specifically tuned or trained OCR engines depending on the region or jurisdiction in which the LPR system is deployed. The number '4' in the first license plate compared with the '4' in the second photo below provides another example of inconsistent fonts used between jurisdictions, making the same number look different. Note that the image processing and segmentation steps described must discern the actual license plate number from other alphanumeric information such as vehicle registration tabs and jurisdiction names and logos.

Determining the License Plate Types and Jurisdiction

Some LPR systems can identify the license plate type and the jurisdiction of origin by recognizing key features on the plate such as the jurisdiction logo, background graphics, special symbols, unique character font features, and so on. Other techniques include applying syntax rules and other regionalization rules to provide additional clues to determine the license plate jurisdiction. Use of white light for this process significantly improves the accuracy of jurisdiction identification. Many of the jurisdiction specific features are lost when imaging the license plate in the NIR light spectrum.

Handing Off LPR Results to Backend System

After the license plate number and, in some cases, the jurisdiction, are determined, the information is handed off to backend systems in support of the intended LPR system application. These systems may compare the license plates with watch lists or other law enforcement systems to allow interdiction or other actions to occur in near real time. Sometimes these actions are not for interdiction purposes but merely to allow vehicles to gain access to secure locations, parking garages, and so on.

In some cases, the LPR data—along with supplemental data such as scene and driver images, vehicle location, and date and time stamps—are stored in highly scalable and searchable data sources to support intelligence analysis, bill generation, or other processes that may occur at a later date.

LPR systems are often configured to automatically communicate or transmit all the collected data to a backend data archive or server. Communication methods can include any conventional networking protocols, including cellular, Wi-Fi, hardwire, and thumb drives, all with a variety of security protocols. In many cases, this communication process occurs in the background without any effort from the system user.

After the data have been inserted into the backend data management software, they are immediately available for review and search. These systems are generally web based and can support numerous workstations simultaneously. Often the software solutions used to manage data sources allows information to be queried in a multitude of ways, by location, time, plate number, and so on.

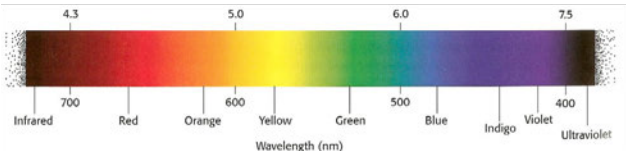
In addition, the image captured and the results generated by the ALPR system can be digitally signed and encrypted to enable a third party to verify that the data was collected at a specific time and location and that no one has tampered with it. This approach also provides for a chain of custody for legal evidence purposes.

Challenges Associated with License Plate Reading

Certain steps of the LPR process present unique challenges that require continuous innovations in hardware and software technologies. A key challenge is the constant introduction of new and varied license plate designs that greatly expands the types of license plates

that LPR systems are required to process. Some of those challenges and the current techniques being applied to address these challenges include the following.

Detecting the Vehicle and/or License Plate



Challenge: LPR systems operate in outdoor environments subject to constantly changing conditions, including lighting, weather, varying vehicle speed and acquisition angles, and varying distances from cameras.

Techniques: LPR camera locations, focal points, illumination controls, and vehicle detection sensors are carefully controlled to help ensure the capture of optimal images used for subsequent license plate location and OCR. Often ALPR cameras are sequencing illumination levels or acquisition parameters to counteract the constantly changing conditions in which they are operating.

Locating the License Plate in the Image(s)

Challenge: Low-contrast license plates, license plate frames and covers, and other noise in the image (e.g., bumper stickers) all impact the ability of license plate detection algorithms to locate the license plate in the larger image captured by the LPR system.

Techniques: Commercial LPR systems typically use a narrow band of IR illumination to light the plate for detection purposes in nearly all weather and lighting conditions. This band ranges from 750 nanometers (nm), which has a visible bright red glow, to 810, 850, 940, and 950 nm. A 950-nm IR illumination is completely invisible to the naked eye.

The purposes in using several bands of IR light are to filter out the effects of background graphics and to highlight the alphanumeric characters for OCR software systems. To help overcome graphic-heavy backgrounds, a spectral analysis can be performed automatically on a plate-by-plate basis to determine which IR illumination is best suited for each plate at the time it is read by the LPR. In general, lower IR bands such as 750 nm handle heavier graphics, and higher IR bands of light are more effective with lower density graphic backgrounds.

Extracting License Plate Characters

Challenge: License plates with conflicting backgrounds or graphics that encroach on the character fields present conditions that make it difficult to recognize specific license plate characters.

Technique: To address these challenges, LPR systems can use different illumination techniques to improve the contrast between characters and background. Also, specialized segmentation algorithms are used to segment the characters from the background. Many LPR systems use neural networks that are trained to find characters correctly in cases of low contrast between characters and background.

In this example, the R could be read as an A and the Q as an O.

The first photo shows a plate with three stacked characters (the AAMVA License Plate Standard calls for no more than two characters to be stacked). The second photo shows appropriate half-height stacked characters. In some jurisdictions, the stacked characters are considered part of the plate number, but in other cases, they are not.

When characters are located too close to the plate's edge, license plate frames can easily prevent the plate number from being read by an LPR.

Chapter 4 License Plate Reader Benefits

Introduction

Prior to the introduction of License Plate Reader (LPR) technology, a law enforcement officer could run a minimal number of plates per shift. LPR technology allows an officer to "read" more than eight times the license plates than officers conducting only manual checks. LPR systems may be used in targeted areas such as crime hot spots, assisting law enforcement in obtaining valuable information of vehicles that may be involved in criminal activity. Moreover, by eliminating the manual check process, not only is officer efficiency increased, but it allows officers to focus more on their surroundings, which improves both officer and public safety.

In studies supported by the National Institute of Justice, research was conducted as to the effectiveness of LPR use for law enforcement patrol and investigations. The first study was conducted in a large suburban jurisdiction in designated hot spots for a period of four months. Officers who used LPR were found to be much more likely to recover stolen vehicles than officers who did not use LPR. The second study examined how LPR could be used for investigations and was focused on a large city with nearly 100 LPRs in fixed locations. After two years, researchers noted 4,000 incidents were documented, including auto theft, missing persons, and homicide cases. LPRs were found to provide information that contributed somewhat to resolving roughly one in five incidents.[1]

Misreads of license plates by LPRs or illegible license plates causing no reads by LPRs do occur.

1 Christopher S. Koper and Cynthia Lum, "Effectiveness of License Plate Readers for Patrol and Investigations," Research in Brief, Police Chief 85, no. 9 (2018): 14–15.

Research conducted by one major toll authority from December 2020 indicated that 9% of toll revenue was lost because of unbillable revenue from misread or illegible license plates.

Gantry mounted LPR technology commonly used for automated toll collection.

When they do occur, the potential for arresting the wrong person, missing an opportunity to arrest a suspected criminal or terrorist, recover a stolen vehicle, or miss toll revenue exists. Research conducted by one major toll authority from December 2020 indicated that 9% of toll revenue was lost because of unbillable revenue from misread or illegible license plates.[2]

Challenges to Law Enforcement

In the past, a law enforcement officer could be familiar with all 50 states' license plates. Today with the proliferation of license plate designs, specialty, and vanity plates—in some cases into the hundreds in a single jurisdiction—it is virtually impossible for instant visual recognition for today's police officer. The issue

2 E470 Public Highway Authority Quarterly Dashboard Report December 31, 2020.

is exacerbated by the introduction of additional new license plate designs each year. Moreover, novelty plates that closely resemble official license plates have added to the difficulty law enforcement contends with in determining plate validity.

A sampling of eight states illustrates the significant growth in the number of license plate designs in circulation in the U.S.

This table represents a sample of the growth in license plate designs:

Jurisdiction	2009	2012	2021
Arizona	52	64	75
California	106	117	167
Maryland	800	935	1,365
Missouri	172	200	269
Montana	152	177	350
Pennsylvania	245	310	582
South Carolina	385	417	429
Texas	225	376	499
8 state totals	2,137	2,596	3,736
% Increase from 2009 to 2021			57%

Officer Safety Benefits

Safety is of paramount concern for any law enforcement officer initiating a "routine" traffic stop. Officers in patrol vehicles that are not equipped with LPR technology may not be as informed about the vehicle and its occupants as those who have the technology.

LPR technology provides the ability to check the vehicle plate number automatically and rapidly against selected databases. License plates are often "flagged" when the owner is associated with certain information (e.g., wanted, attempt to locate, be on the lookout for, stolen car). With LPR technology, officers stopping drivers for sometimes minor traffic offenses can be made aware of this type of information, which allows them to use the appropriate officer safety tactics given the information they have instead of unknowingly walking into a dangerous encounter.

Traffic Safety Benefits

One significant example of a traffic safety benefit involves suspended, *revoked, or otherwise ineligible* drivers. *Across North America, at any given time, approximately 7% of all drivers are suspended, and it is estimated as many as 75% of these people continue to drive.*[1] Moreover, 19% of all fatal crashes involve an unlicensed or suspended driver. These drivers pose a significant threat to highway safety. LPR technology has the capability to quickly identify vehicles whose registered owners have suspended or revoked licenses or registrations, making it much faster and easier for law enforcement officers to detect and apprehend suspended drivers.

Benefits to Law Enforcement: Beyond Traffic Safety

LPR's are at the forefront of discussions about the impact of technology on improving traffic and public safety. In the field of auto theft recovery and investigation, the LPR is a force multiplier for officers in the field. The technology enables reading and checking the status of thousands of license plates in a single shift, all while the investigator can watch his or her surroundings for activity, malevolent or benign. The LPR is a tireless partner, constantly on the watch

1 The National Cooperative Highway Research Program, Report 500, Volume 2.

for stolen vehicles and wanted subjects, AMBER Alerts, missing persons, and more. This technology is even more effective when there is a front and rear license plate for the LPR to read.

Many police agencies use LPR-equipped vehicles to collect plate information as they respond to bank robberies and other major crimes to capture plate numbers of vehicles leaving the area as police respond to the scene of the crime. There have been many instances when these reads have led to the identification of suspect vehicles and suspect arrests.

Public Safety Benefit

As mentioned in the previous Benefits subsections, LPR-equipped law enforcement vehicles can scan thousands of plates an hour, thus increasing the chances of finding a particular vehicle quickly, enhancing highway and public safety. One example was provided by the Utah Department of Motor Vehicles Enforcement Division, which prior to installing LPRs on their police vehicles, averaged

One example was provided by the Utah Department of Motor Vehicles Enforcement Division, which prior to installing LPRs on their police vehicles, averaged 400 stolen vehicle recoveries annually. After LPR deployment, they now scan 45,000 plates monthly and are now recovering more than 1,000 stolen vehicles annually. See Chapter 7 – License Plate Reader Success Stories for many more examples.

400 stolen vehicle recoveries annually. After LPR deployment, they now scan 45,000 plates monthly and are now recovering more than 1,000 stolen vehicles annually. See Chapter 7 – License Plate Reader Success Stories for many more examples.

It should be noted that there are circumstances when the lack of a front license plate limits the effectiveness of LPR on front-facing traffic. This is also an issue for school bus drivers who report drivers who fail to stop for the buses while loading or unloading students. These drivers often rely on the presence of a front license plate to be able to report these violations. Some tolling authorities also rely on the front plate for both revenue collection and enforcement.

Homeland Security Enhancements

LPR technology has also become an important national security tool. LPR technology is used to query the license plate numbers of vehicles entering and departing the U.S. to identify potential threats to national security. LPR units are also set up in locations in proximity to critical infrastructure to identify potential threats.

Chapter 5 License Plate Readers as a Tool to Improve Toll, Commercial Motor Vehicle, and Border Operations

Introduction

This chapter discusses how License Plate Reader (LPR) systems benefit public mobility but also have become core to the way many electronic toll systems collect tolls and enforcing payment. LPR has made it possible for the toll industry to move increasingly toward all-electronic cashless toll operations, which are permitting free-flow traffic to pay tolls at highway speeds, improving roadway efficiency, improving the customer experience, and mitigating adverse environmental impacts. Road and bridge toll collection helps provide revenue assurance for highway lane management, maintenance, and improvement.

LPR systems are also effective in commercial vehicle enforcement, which results in efficiencies in safety and traffic flow near weigh station and inspection facilities. These systems help officers identify and focus resources on the vehicles and drivers that are most likely to present safety risks.

LPR systems are also deployed by Customs and Border Protection along the U.S. borders with Canada and Mexico to improve and enhance traveler mobility across these borders.

The introduction of electronic toll collection (ETC) has reduced the dependence on toll collection personnel and manual cash transactions at toll points. Although ETC has improved traffic flow and efficiency, it has also introduced a new challenge—toll evasion and revenue loss.

Mobility and Toll Collection

Collection of user fees on roads, bridges, and tunnels—or tolls—has served as an important means of financing key transportation projects and funding ongoing operations and maintenance for as long as roads have existed. Tolls provide a direct approach to funding highways, bridges, and tunnels without increasing local or state taxes, and they ensure that those who use and benefit the most from these projects pay for them directly.

For toll facilities to be effective, however, tolls must be collected. Historically, toll collection involved staff at a gate or in a toll booth collecting cash directly from motorists and making change at strategic points along the roadway. This process required each vehicle to stop in the tolling zone for a brief period to tender a cash toll payment. When the collection site becomes a choke point – risks of rear impact and chain reaction crashes increase. Toll chokepoints also reduce the efficiency of the corridor where collection takes place. Additionally, when toll collection slows traffic, the reduced efficiency adds emissions into the environment and increases the time required to move people and commercial goods.

Over the past three decades, most toll operators modernized their toll collection systems with technology that allows for prepaid toll accounts using in-vehicle transponders to identify valid toll account holders. The introduction of electronic toll collection (ETC) has reduced the dependence on toll collection personnel and manual cash transactions at toll points. Although ETC has improved traffic flow and efficiency, it has also introduced a new challenge—toll evasion and revenue loss. Toll violators

include motorists who travel through an ETC-only lane without a transponder or unfunded toll account, creating unpaid toll transactions. This not only reduces the funding available for roadway operations and maintenance but also adversely affects fairness to those who pay their tolls, potentially eroding public support for tolling. In an ETC environment, there is a cash payment option for motorists without a transponder and prepaid toll account. LPR technology is used to capture license plate images of vehicles without toll transponders in ETC toll lanes to enforce the toll payment from the registered vehicle owner.

In recent years, toll operators are increasingly adopting all-electronic tolling (AET) operations, in which the cash payment option is eliminated entirely. Cashless AET operations offer the benefit of allowing free-flow tolling, often permitting all vehicles to move through the tolling point at the posted speed limit without stopping or slowing. AET operations are reducing the need to separate cash payment and ETC vehicles and the associated roadside infrastructure required to do so. Instead, AET operations often use overhead gantries with electronic toll equipment (e.g., antennas, transponder readers, and LPR cameras) to process the toll transaction with all vehicles.

This not only reduces the funding available for roadway operations and maintenance but also adversely affects fairness to those who pay their tolls, potentially eroding public support for tolling.

Vehicles with in-vehicle transponders pay their tolls through their toll accounts, just as they do in an ETC environment. Vehicles without toll transponders in an AET environment have their license plate images captured, and toll bills are sent to the registered owners of the vehicles to arrange payment of the toll due. In an AET tolling environment, more transactions are being processed based on LPR technology. For commercial motor vehicles, the Federal Motor Carrier Safety Administration estimates a truck will save approximately $10 per facility each time a truck is able to legally bypass a weight station or inspection facility.

Today as motor vehicle transportation solutions orient their designs toward improved mobility, reduced congestion, and more reliable levels of service, the use of LPR technologies has increased substantially. The conundrum in this development is that as LPR technologies improve, license plates continue to take on increasingly complex designs, making accurate license plate reading problematic.

According to the Federal Highway Administration (FHWA), jurisdictions throughout the U.S. are installing managed lanes (e.g., high occupancy/toll [HOT] lanes) in response to increased congestion. Managed lanes are intended to lessen congestion and provide greater mobility than the adjacent general-purpose lanes of state highways or interstate highways located in urban areas. In some cases, it is also used to enforce High Occupancy Vehicle (HOV) violations automatically, without the need of a law enforcement officer to visually detect violations. LPR also assists transportation officials to understand and influence traffic patterns and set flexible pricing based on traffic levels to reduce congestion, resulting in fewer roadway incidents and increased mobility.

Today as motor vehicle transportation solutions orient their designs toward improved mobility, reduced congestion, and more reliable levels of service, the use of LPR technologies has increased substantially. The conundrum in this development is that as LPR technologies improve, license plates continue to take on increasingly complex designs, making accurate license plate reading problematic.

Another feature of the move to LPR-related open road tolling is the use of enforcement-intended data access for revenue collection that is not law enforcement related. In jurisdictions where overhead tolling is

introduced, the department of motor vehicles should be consulted in the means by which vehicle and vehicle operator data may be obtained.

Revenue Loss

License plate designs, license plate obstruction, and purposeful avoidance to register and title vehicles are the most significant contributors to revenue losses for authorities using LPR systems. License plates that align with the AAMVA License Plate Standard will improve the effectiveness of LPRs and subsequently increase toll collections.

One toll agency with years of experience in operating a cashless AET operation that depends on license plate images to collect tolls from motorists without toll transponders indicates the following experience:

	2017		2018		2019	
Total Image Transactions	**36.930M**		**39.092M**		**41.143M**	
Reject Reason	**Total**	**%**	**Total**	**%**	**Total**	**%**
Unreadable Plate	2.058M	5.6%	2.139M	5.5%	1.901M	4.6%
Temporary Plate	1.063M	2.9%	723K	1.8%	667K	1.6%
No DMV Record	1.116M	3.0%	801K	2.0%	780K	1.9%
Other	784K	2.1%	1.061M	2.7%	978K	2.4%
Unenforceable Totals	**5.021M**	**13.6%**	**4.724M**	**12.1%**	**4.326M**	**10.5%**
Lost Revenue	**$23.1 Million**		**$25.8 Million**		**$25.3 Million**	

Although the unrecoverable revenue is significant, it should also be noted that even through a 12.1% growth in image-based transactions over three years, there was a 13.8% decline in unenforceable images. This is indicative of what the industry has experienced in terms of improvements in hardware, software, and business practices improving overall outcomes. That said, easily identifiable license plates can further mitigate lost revenue in the transportation industry as well as other businesses and enforcement models that use imagery and license plate information as the core of their revenue enforcement efforts.

Lost toll revenues amounted to $23.1 million in 2017, $25.8 million in 2018, and $25.3 million in 2019.

Mobility at U.S. Borders with Canada and Mexico

Currently, Customs and Border Protection (CBP) has three programs that use LPR to expedite entry to the U.S.—NEXUS, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), and Free And Secure Trade (FAST). NEXUS is used at the Canadian border and SENTRI, is used at the Mexican border. FAST is a commercial clearance program for low-risk shipments entering the U.S. from Canada and Mexico. Each of these programs has dedicated lanes, and users are vetted.

All vehicles and persons entering the U.S. are subject to inspection. Every vehicle and every person entering at a land border port must be queried through various law enforcement databases before they can enter the U.S. Although the inspection process encompasses more than just queries, each query takes time to perform, and time is a factor in vehicle wait times. CBP, through the Western Hemisphere Travel Initiative (WHTI), has installed technology at most ports of entry that automates many functions previously done manually. This automation has resulted in reduced vehicle inspection times while maintaining the integrity of the inspection process.

Other LPR Applications That Benefit Mobility

Commercial Vehicle Enforcement

Commercial Vehicle Enforcement entities use LPR. Several specialized companies have emerged that use LPRs to read license plates and compare the plate number to federal safety data sources to ensure trucks are in compliance with federal and state motor carrier safety programs. Some systems also verify various state and federal credentials required to operate in the jurisdiction, check for out-of-service violations, and check for wants or warrants associated with vehicles.
Municipal Parking Enforcement

LPR camera in use at a roadside truck scale.

Municipal Parking Enforcement

On-street parking enforcement efficiencies have been gained by using LPR technology. With these systems, parking scofflaws who fail to pay their parking citations or fines are placed in a data source that is downloaded to an LPR-equipped vehicle. The LPR quickly identifies those who have failed to pay, which allow municipalities to boot vehicles, ensuring parking revenues are recaptured.

Mobile LPR camera mounted on parking enforcement vehicle.

In a 30-day trial conducted during 2020 using one LPR-equipped vehicle, the Long Beach Police Department in southern California identified nearly 300 scofflaws who had five or more unpaid parking citations, capturing nearly $200,000 in unpaid fines. In addition, seven arrests not associated with a parking citation were made.

Chapter 6 License Plate Reader Program Best Practices for Law Enforcement

Introduction

A properly organized and managed license plate reader (LPR) program can greatly enhance the effectiveness of patrol operations and criminal investigations. The best LPR programs are built on a foundation of good policy and training.

The measurement of success for an LPR program is subjective. Recovering stolen vehicles; arresting subjects with active warrants; and recovering AMBER, SILVER, and BLUE Alert subjects are some measures of success. However, in an era of transparency and civilian oversight, a true measure of success should include an agency's ability to collect, store, and delete millions of LPR reads in an efficient and secure manner. It should also be noted that LPR systems are only as good as the data they rely on. Ensuring that the hot lists they access are kept current is critical to limiting the possibility that users will act on erroneous information.

Policy

Law enforcement agencies can build meaningful LPR system policies that respect individuals' privacy rights while providing authorized users with the information necessary to ensure the public's safety. Policies should include LPR program goals and objectives and should not be too restrictive as to limit 'operators' ability to perform law enforcement functions yet still be protective of the massive amounts of data an LPR system collects.

Because LPR equipment and accounts can have broad permissions, policies should contain language defining what functions an operator can and cannot perform with an assigned LPR account or LPR equipment. Having operators sign an acceptable use statement is a method of tracking and ensuring each user has been made aware of the policies set forth. In addition to the policies already explained, the following specific topics and their relationship to the use of LPRs should also be reflected in policy:

- **Data retention and dissemination** – Data usage policies should conform with jurisdiction laws governing the agencies legal authority to collect, retain, disseminate, and dispose of LPR data. Agencies should have a data retention period in policy (whether it is included in jurisdiction law or not) with justification for the data retention period they choose.
- **Freedom of Information Act (FOIA)** – An agency's FOIA policy should be examined to reflect the legal standards of FOIA.
- **Data security** – Operator passwords, system lockouts, system audits, and user audits should all be addressed in policy. Many of these are already established within an agency or by an overarching governing body. Assurances should be made to maintain compliance with these existing policies.
- **Memorandums of understanding (MOU)** – Many agencies and jurisdictions may decide to work together to establish one large LPR network. This reduces the cost per agency, and the burden of responsibility is shared. An established MOU identifies the roles and responsibilities between the agencies.

See Appendix (C) for Sample LPR Policies from Ohio, Utah, and Virginia.

Training

In addition to having sound policy, formalized training should be in place that conveys the policy content to LPR system operators. Training is a fundamental component of an LPR system. Without properly documented training, operators have no direction for which to properly set up, use, and troubleshoot LPR equipment. Training should emphasize policy (and case law) surrounding data retention. This can serve to assure the public that data are being collected, stored, used, and deleted in a manner consistent with established legal guidelines and policy.

LPR training can be divided into three sections: operations, data analysis, and technical support. All sections of training should be recurring and culminate in a test. This ensures new material is presented and operators remain vigilant in the use of the LPR system.

Operations training should focus on the daily operator of an LPR-equipped vehicle. Like speed-measuring devices, the operator of an LPR-equipped vehicle should be able to set up, operate, and troubleshoot a vehicle-mounted LPR system.

Data analytics could be considered the second most important function of an LPR system.(the most important function being data collection). Having the training necessary to analyze a target vehicle across a network of LPR cameras relies on consistent and thorough training.

The last section of training which that be included in an LPR program is technical support. This section of training encompasses the logistical support staff most agencies will use to up-fit LPR patrol vehicles, monitor fixed sites, perform server maintenance, and perform system upgrades.

LPR Program Staffing

An LPR program should be adequately staffed to provide proper program support, oversight, and planning. Prior to determining staffing levels, a decision should be made if the LPR program will fall under the management and leadership of an existing police hierarchy (such as Operations or Investigations) or if it will be autonomous (specialty unit).

If an agency has fixed LPR equipment in its program, the program should be staffed sufficiently to maintain 24-hour operations to respond to any received alert, such as AMBER Alerts.

An LPR program needs enough employees to install and fix the equipment and employees who can manage both the system and equipment. If agency staffing is limited, employees can effectively multitask and meet the needs of multiple positions at once. If an agency does not have the number of employees or expertise to complete all the required aspects of running an efficient program, contractors can be employed to conduct one or more critical functions of the LPR program.

Equipment

Like staffing, LPR equipment needs to encompass all aspects of the program. A comprehensive, but non-inclusive list of equipment needed for an effective LPR program follows (mobile, fixed, and portable platforms):

MOBILE LPR	FIXED-SITE LPR	PORTABLE PLATFORM
Vehicle-mounted readers	Overhead or pole-mounted readers	Platform: commonly a trailer
Connecting wires from readers to trunk box	Continuous power supply	Continuous power supply (solar combined with battery)
Trunk box	Cellular or fiberoptic network	Cellular network
Mobile systems software	Systems software	Systems software
Mobile computer capable of operating mobile systems software		
GPS-capable antenna		

Vehicle-mounted reader.

Pole-mounted reader.

Trailer-mounted reader.

Roof-mounted LPR.

Trunk-mounted LPR.

There are many LPR manufacturers that produce reliable and durable LPR equipment. Purchasing agents need to consider the proprietary nature of LPR equipment and be aware that some products are not interoperable with others. It is critical for LPR data to properly communicate from the point of collection

(reader) to a central computer (server). LPR data must be securely protected and accessible by operators, most commonly from a desktop- or vehicle-based computer system. Legal considerations need to be addressed before purchasing equipment. For example, a cloud-based data storage system may not be compliant with a jurisdiction's data storage laws.

The specific type of LPR equipment chosen should be driven by agency mission and priorities. Whereas some agencies may prefer only mobile LPR, others may also use fixed-site LPR's, covert equipment, or portable platforms to create a robust LPR program.

When selecting LPR equipment, anticipate and plan for program expansions and logistical support needs. Items such as spare parts, storage facilities, and ancillary equipment should be considered as well.

Summary

A well-thought-out and well-executed LPR program provides law enforcement an additional tool in providing essential public safety services. Establishing an LPR program is a task that should be completed with careful consideration, planning, and organization.

Chapter 7 License Plate Reader Success Stories

Introduction

What follows are documented examples of how License Plate Reader (LPR) technology has benefited law enforcement in the performance of their public safety mission.

On **January 7, 2021**, Kristin Walker from Alabama was putting fuel into her vehicle with her two children in the backseat when a subject jumped into the driver seat to steal the vehicle. Walker was able to remove her children from the vehicle before it was highjacked. With the use of LPR technology, the Rankin County, Mississippi, Sheriff's Office was able to spot the vehicle a short time later and arrest the two subjects involved.

In **December 2020**, a North Carolina DMV License & Theft Bureau Law Enforcement Agent observed a Volkswagen traveling in a toll lane at a high rate of speed and attempted to stop the vehicle. The vehicle operator failed to stop, and with speeds near 130 mph, the pursuit was called off. LPR information was obtained from the North Carolina Turnpike Authority that included photographs of the driver, vehicle, and license plate information. The violator was located, apprehended, and charged with several serious traffic violations.

On **December 19, 2019**, A Delaware guidance counselor allegedly sexually assaulted a minor teenage boy while in Ocean City, Maryland. The victim alleged Allen Reese drove him from Delaware into Ocean City, where he sexually assaulted him. Using Ocean City's LPR, detectives were able to confirm that Reese's vehicle crossed the Route 90 bridge as well as entry and exit times consistent with the dates and times of the assault provided by the victim. Based on the evidence from the victim corroborated by the LPR system, detectives scheduled an interview with the suspect to execute a warrant and collect DNA samples. However, detectives were notified by Homeland Security that a flight to Casablanca, Morocco, had been booked for Mr. Reese. Because it appeared that he was preparing to flee the country to avoid the sexual assault charges, a warrant was immediately issued for Mr. Reese. He was quickly located and held without bond on charges of sexual abusing a minor and third-degree sexual offense.

In **August 2019**, police with Duck, North Carolina, Police Department (an Outer Banks Island community) deployed their LPR systems to find residents who stayed on the island during a mandatory evacuation during Hurricane Dorian. LPR cameras recorded the plate numbers of vehicles exiting the island to determine which registered vehicles did not leave. The homes associated with those vehicles were visited by police to warn those residents of the risks of remaining on the island.

On **July 24, 2019**, a woman put her dog Happy into her car in Baltimore's Guilford neighborhood. She was just getting into the driver's seat when she was forcibly pulled her from her car and several suspects got into her car and sped off. Happy was still in the car when the suspects fled. The woman notified police, and the Baltimore Police Department immediately placed the license plate on an LPR hotlist as a carjacked vehicle. Soon after a patrol officer passed by the vehicle, which

was parked and unoccupied, and received an alarm on the LPR system he was operating. He approached the car and saw that Happy was still inside with the windows closed and doors locked. Because it was a hot July day, the officer smashed a window and rescued Happy before he was overcome from the heat. The woman and Happy were soon reunited.

On **July 15, 2020**, a man shot and killed his ex-girlfriend in the parking lot of her workplace in Springfield, Tennessee. Two days later, the suspect drove through Mt. Juliet, where a Mt. Juliet Police Department (MJPD) vehicle equipped with an LPR system detected the suspect vehicle license plate, alerting the officers who arrested the suspect.

According to MJPD Chief James Hambrick, "It's amazing the stuff that you wouldn't know travels through your city … is actually traveling through your city." That's one of many success stories to come out of the MJPD's use of LPR, Chief Hambrick said.

On **June 30, 2018**, a subject in Sacramento, California, was attempting to cross a street in his wheelchair and was hit and killed by a passing motorist who failed to stop and render aid. The license plate belonging to the vehicle that left the scene was detected by LPR, and the driver was arrested for felony hit and run.

On **March 15, 2018**, James Allen Hayes plead guilty in federal court to committing multiple bank robberies over the course of five months throughout California. Hayes was apprehended as a result of LPR detecting his vehicle traveling between robbery locations.

Robert Sheets was accused of shooting a man on **August 13, 2017**, in Manor Township, Pennsylvania. Sheets returned to the suspect the next day and discovered him still alive. He then shot the victim again, leaving him for dead and fleeing the area. Miraculously, the victim survived and was able to identify the man who tried to kill him as Sheets. The vehicle driven by Sheets was immediately filed in National Crime Information Center as a felony vehicle, which resulted in a hotlist entry on LPR systems across the U.S.

A few days later, in Fairfax County, Virginia, an LPR alerted officers that Sheets was connected to a 2007 Ford Edge heading west on I-66. Fairfax police cruisers pulled in behind Sheets, and after a 38-mile pursuit, Sheets was apprehended.

On **August 26, 2015**, a gunman shot and killed a news anchor and cameraman from a local news station (Alison Parker and Adam Ward) while they were doing a report in Roanoke, Virginia. The license plate number of the shooter was broadcast statewide. Several Virginia State Police patrol vehicles were equipped with LPR. Five hours later and approximately 200 miles away from the shooting scene, Virginia State Police Trooper Pam Neff entered the license plate number into her LPR and discovered the LPR had just read the suspect license plate three minutes prior. Trooper Neff was able to catch up to the suspect vehicle and when back-up was in position proceeded with the apprehension. Trooper Neff was recognized by AAMVA during the AAMVA Annual International Conference in Williamsburg, Virginia, in August 2016.

For more news stories about law enforcement LPR successes from September 2017 to September, 2018, go to https://www.theiacp.org/sites/default/files/ALPR%20Success%20News%20Stories%202018.pdf

Appendix A Significant License Plate Reader Court Cases and Applicable Federal Statutes

United States Court of Appeals for the Ninth Circuit
United States v. Jay Yang,
958 F.3d 851 (9th Cir. 2020).
May 4, 2020
https://law.justia.com/cases/federal/appellate-courts/ca9/18-10341/18-10341-2020-05-04.html

Jay Yang was observed stealing mail from U.S. mail collection boxes on surveillance cameras driving a rented GMC vehicle beyond the rental contract due date. The license plate number was observed and searched in a License Plate Reader (LPR) database, which helped lead investigators to his home. Yang claimed because his rental agreement was past due and the contract was no longer valid when the plate was observed by LPR, the LPR data were invalid, and anything obtained from the search of his residence was not admissible. The court ruled there is no expectation of privacy of a license plate regardless if rental contract was expired. The LPR database did not reveal all the defendant's movements and therefore did not infringe on reasonable expectation of privacy.

United States Court of Appeals for the Eleventh Circuit
United States v. Larry Lamar Wilcox,
415 F. App'x 990 (11th Cir. 2011).
February 28, 2011
https://law.justia.com/cases/federal/appellate-courts/ca11/10-13031/201013031-2011-02-28.html

Larry Wilcox argued the use of LPR technology amounted to unconstitutional surveillance violating his reasonable expectation of privacy. The defendant said the district court erred in denying a motion to suppress, stating an Atlanta police officer's use of LPR technology violated his Fourth Amendment right to be free from an unreasonable search.

The Court of Appeals ruled that the Supreme Court had concluded in similar contexts visual surveillance of vehicles in plain view does not constitute an unreasonable search for Fourth Amendment purposes. Given the Supreme Court's Fourth Amendment precedent, the Court of Appeals ruled the district court did not commit plain error in concluding Wilcox did not have a reasonable expectation of privacy in the plainly visible license plate and the officers' use of LPR did not violate the Fourth Amendment.

United States Supreme Court
United States v. Knotts,
460 U.S. 276, 103 S.Ct. 1081, 75 L.Ed.2d 55 (U.S. 1983).
December 1983
https://supreme.justia.com/cases/federal/us/460/276/

Tristian Armstrong was being investigated for stealing chemicals to manufacture illegal drugs. Agents attached a radio transmitter to a container of chemical sold to Armstrong, which tracked the location of where methamphetamine was being produced by Leroy Knotts. A search warrant was obtained, and an illegal drug manufacturing lab was discovered.

Knotts was convicted in district court, but the U.S. Court of Appeals reversed the conviction, stating Knotts' Fourth Amendment rights were violated by use of the tracking device, and the evidence could be suppressed. The U.S. Supreme Court held the initial conviction, ruling the tracking device did not invade any legitimate expectation of privacy and was neither a "search" nor a

"seizure" by grounds of the Fourth Amendment. The movement of a person traveling on a public highway does not afford an expectation of privacy of the movements. Nothing indicated the tracking device was used to gather information from within the private area.

Privacy and Fourth Amendment

Authority for Police to Check License Plates
United States Court of Appeals for Ninth Circuit
***United States v. Ismael Diaz-Castaneda*,**
494 F.3d 1146 (9th Cir. 2007).
July 18, 2007
https://caselaw.findlaw.com/us-9th-circuit/1468527.html

An officer ran the license plate on a pickup traveling in front of him in traffic. The plate information response indicated that the driver's license of the registered vehicle owner, Solia Diaz, was suspended. The officer, believing the operator fit the description of Diaz, stopped the vehicle. Diaz was arrested for driving while under suspension. The vehicle passenger, Ismael Diaz-Castaneda, was found to have an immigration detainer on him and was arrested.

Diaz-Castaneda argued the stop violated his Fourth Amendment rights, and any subsequent evidence should be withheld. The court held a license plate check does not constitute a Fourth Amendment search, and evidence should not be suppressed.

U.S. Court of Appeals for Sixth Circuit
United States v. Curtis Ellison,
462 F. 557 (6th Cir. 2006).
September 5, 2006
https://caselaw.findlaw.com/us-6th-circuit/1031532.html

A Farmington Hills, Michigan, police officer ran a license plate of a parked vehicle through a police telecommunication system belonging on a vehicle operated by Curtis Ellison. Information returned revealed the registered owner was a "wanted person." Ellison was determined to be a passenger in the vehicle and was arrested. District court originally ruled the officer did not have probable cause to run the plate because the van was not parked illegally, and therefore Ellison Fourth Amendment Rights were violated. The court determined what a person exposes publicly is not subject to Fourth Amendment protection, and observing a license plate displayed in plain view does not constitute a search.

Validity of License Plate Reader Technology

United States Court of Appeals for the Third District
***United States v. Marcus White*,**
504 F. App'x 168 (3d Cir. 2012).
November 15, 2012
https://law.justia.com/cases/federal/appellate-courts/ca3/11-4035/11-4035-2015-04-29.html

Marcus White was convicted in Pennsylvania for his involvement in robberies of a post office and convenience stores. White's vehicle had been reported stolen and was detected by a Maryland state police trooper by an alert from an LPR while on patrol. During the suppression hearing, the District Court noted "the technology used by the license [plate] reader is verifiable and acceptable technology." White did not challenge this conclusion.

Use of License Plate Reader Data

Supreme Court of Virginia
Opinion of Justice Stephen R. McCullough
Harrison Neal v. Fairfax County Police Department, ET AL,
299 Va. 253, 849 S.E.2d 123 (Va. 2020).
October 22, 2020
https://law.justia.com/cases/virginia/supreme-court/2020/191127.html

In a prior ruling, the Virginia Court of Appeals ruled the "passive use" of LPR data by Fairfax County, Virginia, police violated the Virginia Data Act. Neal

argued the police department could not collect and store passively obtained LPR data without suspicion of criminal activity. Neal claimed the Virginia Data Act prohibited the gathering of personal information unless justified by law. The court initially ruled the LPR data provided a link to identify the vehicle owner and therefore LPR data was subject to the Virginia Data Act.

In a later ruling from the Virginia Supreme Court, the court stated the LPR system did not qualify as an information system because it did not contain name, personal number, or other identifying particulars of data for a subject. The court further stated the plate, vehicle photo, date, time, and GPS location did not bring the Data Act into play because the LPR system did not contain all the components and operations of a record keeping process. The court found the police department's passive use of the LPR system was legal.

Massachusetts Supreme Court
***Commonwealth of Massachusetts v. McCarthy*,**
484 Mass. 493, 142 N.E.3d 1090 (Mass. April 16, 2020).
https://law.justia.com/cases/massachusetts/supreme-court/2020/sjc-12750.html

Law enforcement officers were investigating Jason McCarthy's suspected illegal drug activity and deployed LPRs on bridges to track his activity. Police used data from the LPRs and received real-time alerts, which led to the arrest of McCarthy. McCarthy filed motion to suppress the LPR data because it violated his constitutional right to privacy of his public movements. The court ruled the defendant's privacy was not violated because of the limited extent and use of the LPR data.

Reasonable Suspicion for Vehicle Stop Based on License Plate Reader Information

United States Court of Appeals for the Ninth Circuit
***Denise Green v. City and County of San Francisco*,**
751 F.3d 1039 (9th Cir. 2014).
May 12, 2014
https://caselaw.findlaw.com/us-9th-circuit/1666208.html

An LPR operated by a San Francisco Police officer indicated a license plate displayed on Denise Green's vehicle was on a stolen vehicle. A high-risk felony stop occurred, and Green was held at gunpoint, handcuffed, and detained. Eventually, officers ran the actual plate to confirm stolen and determined the LPR misread the plate, and the vehicle was not stolen; Green was released.

San Francisco Police Department officers are trained that an LPR hit does not automatically justify a vehicle stop. Officers are directed to verify validity of the identified hit before executing a stop. Officers are instructed to verify the plate being read by the LPR is truly the plate on the vehicle and to confirm the stol-en "hit" with their police telecommunications system. **The court ruled an unconfirmed LPR "hit" does not form a reasonable suspicion to support an investigatory detention of subject.**

Georgia Court of Appeals
***Hernandez-Lopez v. The State of Georgia*,**
319 Ga. App. 662, 738 S.E.2d 116 (Ga. Ct. App. 2013).
February 5, 2013
https://caselaw.findlaw.com/ga-court-of-appeals/1622591.html

An LPR in use by an officer with the Gwinnett County, Georgia, Police Department indicated a plate belonged to a "wanted person" by the name of Eloy

Hernandez-Lopez. The officer noted a warrant was for an adult male, which matched the warrant identifying information. The vehicle was stopped and the subject operating the vehicle was determined to be Salomon Hernandez-Lopez, and he was arrested for operating without a license.

Hernandez-Lopez claimed the officer lacked reasonable suspicion to conduct a traffic stop based on the LPR information. The court held the officer did in fact have reasonable suspicion based on the LPR information indicating the license plate belonged to a "wanted person." This would be the same as if an officer ran the license plate through the Georgia police telecommunications system directly. **The court ruled an LPR "hit" provides an officer with reasonable suspicion to justify an investigatory stop.**

New York Supreme Court
***People of the State of New York v. Luis Davila, Jr.*, 27 Misc.3d 921, 901 N.Y.S.2d 787 (N.Y. Sup. Ct. 2010), *aff'd*, 137 A.D.3d 655, 26 N.Y.S.3d 862 (N.Y. App. Div. 2016).**
April 1, 2010
https://law.justia.com/cases/new-york/other-courts/2010/2010-20111.html

A New York Police Department LPR mounted on a police vehicle alerted officers to a suspended plate, and the vehicle was stopped. An officer observed what appeared to be a weapon in possession of a vehicle occupant and subsequently arrested the subject for possession of a firearm. Davila contested the arrest, arguing the officer failed to follow department policy by first verifying the LPR data had been updated in the past 24 hours and did not verify the information against the department database. The court ruled the department policies are guidelines and not required by law; therefore, use of LPR to detect the vehicles registration as suspended was lawful.

Related Federal Statutes

28CFR Part 23 Criminal Intelligence Systems Operating Policies
28 CFR Part 23 contains policy standards for law enforcement agencies operating federally funded multijurisdictional criminal intelligence systems. The standards specifically provide guidance for the submission, entry, security, inquiry, dissemination, review, and purge of criminal intelligence information.

2 CFR § 200.79 Personally Identifiable Information (PII).
LPR information is NOT PII
PII is information considered capable of identifying an individual either by itself or with other identifying information. LPR systems contain information consisting of vehicle license plates, vehicle photos, dates, times, and GPS locations—information generally not considered PII. Therefore, LPR information may not be restricted by statutes concerning maintaining PII but can become PII if additional information is included that is defined as PII. Case-by-case assessment is recommended when developing LPR system data maintenance and use.

Driver's Privacy Protection Act (DPPA) of 1994, 18 U.S.C. 2721
The Driver's Privacy Protection Act (DPPA), 18 U.S.C.A. §§ 2721-25 also supports the premise that a license plate number alone is not PII. Enacted in 1994, the DPPA is a federal law that regulates how state motor vehicle departments release information contained in their records. DPPA addresses the prohibition on release and use of certain personal information from state motor vehicle records. Collected LPR information contains no PII that may be used to connect a license plate detection to an individual. It is only with permissible purpose law enforcement may make this connection (using motor vehicle records).

Appendix C Sample License Plate Reader Policies

Introduction

The core business values that License Plate Reader (LPR) promises can only be achieved through proper planning, implementation, training, deployment, use, and management of the technology and the information it provides. Like all tools and technologies available to law enforcement, LPR must also be carefully managed. Agencies must clearly articulate their strategic goals and tactical objectives for the technology, and this strategy should be tightly aligned with the broader strategic plans of the agency. Thorough and ongoing training is required to ensure that the technology performs effectively and that users are well versed in the operational policies and procedures defined and enforced by the agency.

Policies must be developed and strictly enforced to ensure the quality of the data, the security of the system, compliance with applicable laws and regulations, and the privacy of information gathered. Building robust auditing requirements into agency policies will help enforce proper use of the system and reassure the public that their privacy interests are recognized and respected.[1]

Three agency sample policies follow:

Ohio State Highway Patrol

Utah Tax Commission, Motor Vehicle Enforcement Division

Virginia State Police

1 IACP ALPR Policy & Operational Guidance (see Appendix B).

OHIO STATE HIGHWAY PATROL POLICY

Summary of Revisions

Revisions are in red, bold, italics throughout.

Purpose

To provide guidelines for the implementation, installation, and use of mobile and stationary Automatic Plate Reader (APR) technology and equipment at selected locations to scan, detect, and identify license plate numbers appears on selected "Hot Lists."

Policy

A. **STATEMENT OF POLICY –** The Ohio State Highway Patrol will utilize APR technology in patrol cars and at stationary locations to accurately identify license plates ***linked to criminal activity and/or commercial motor vehicle administrative violations.***

B. **FUNCTIONALITY AND OPERATION <41.3.9a>**

1. **Installation –** Stationary and mobile scanners will be installed at selected locations and on selected marked and unmarked vehicles. ***GHQ electronic technicians are responsible for maintaining a list of all locations and vehicles equipped with APR technology.***

2. Data Sources for "hits" – All APRs have the ability to match a captured image to two categories of databases: criminal violations and commercial motor vehicle violations. Officers and MCEIs have the ability to match images with one or both types of databases simultaneously.

a. Criminal Databases: Both mobile and stationary APRs can match captured images with LEADS and NCIC entries with an associated license plate (e.g., stolen motor vehicles, felony warrants, missing persons, protection orders, etc.)

b. Commercial Motor Vehicles – Both mobile and stationary APRs can match captured images with the Federal Motor Carrier Safety Administration PRISM database for commercial motor vehicles placed out of service and ones with an "Inspect" or "Possible" score in the Inspection Selection System (ISS).

3. General Operation – The Division's automatic plate readers capture images of numbers and letters resembling license plates and match those captured images to the current "hot list." The "hot list" is the master index of license plates entered in both data sources listed above. The criminal database "hot list" is updated twice daily and the commercial motor vehicle database "hot list" is updated once daily.

4. Units assigned to enforcement vehicles equipped with mobile APR systems shall ***verify the receipt of*** the most recent "Hot List" from the applicable databases at the beginning of each shift.

5. **Probable Cause** – An APR "hit" from the criminal databases shall not be used as probable cause for a traffic stop or enforcement contact. Contact with the vehicle and occupants shall only be made after the "hit" is confirmed through LEADS/NCIC.

6. **Manual Entry by User into "Hot List" Database** – ***The system does not obtain real***

time information from LEADS/NCIC; therefore, there may be situations which require an officer or dispatcher to manually enter a vehicle registration into the database. These situations include, but are not limited to: active Amber Alerts, Ohio Blue Alerts, endangered missing child alerts, endangered missing adult alerts, BOLOs, and other emergency messages/alerts. Manual entry of a plate into the "Hot List" shall only be done with supervisor approval. See User Manual for entry procedures.

A "hit" on a BOLO that is manually-entered into the system shall not be used as probable cause for a traffic stop or enforcement contact.

7. **'O' vs. Zero** – Because of standardized NCIC formats, a letter 'O' and a zero in a license plate number are synonymous in NCIC records. Therefore, the "hot list," NCIC, and the APR read the letter 'O' as a zero. Any plate entry, including any manually entered by an officer or a dispatcher with an 'O' is automatically converted to a zero.

8. **Fixed Point and APR Notification** – When a license plate entered in the "Hot List" is detected by a stationary APR, a notification is automatically sent by the APR system to an OSP dispatch facility equipped to receive the notifications. When a mobile APR detects a "Hot List" entry, the officer receives an audible and visual notification on the in-car MCT.

9. **Case Documentation** – A record of the APR "hit" shall be included in the case/incident report. All "hits" captured by the APR system shall be stored for 30 days and will then be automatically purged. All "hits" will be stored electronically in the ELSAG system. Access to the ELSAG system is limited to authorized personnel only. <41.3.9b,d>

10. **Storage of "Non-Hits"** – All "non-hit" APR captures shall be automatically purged from the system within a 24-hour period. APR captures shall not be collected, stored, or shared with the intent of data mining. Dispatchers assigned to Cleveland and the Statehouse shall query the system for plates older than 24-hours on a quarterly basis to ensure "non-hit" captures are being deleted in accordance with this policy. Troopers assigned APR equipped enforcement vehicles shall perform the same query as part of the semi-annual vehicle inspection. <41.3.9d>

11. **Training –** Dispatchers, sworn officers, electronic technicians, motor carrier enforcement inspectors, and network administrators shall receive appropriate training from qualified OSP staff or vendor representatives prior to using or maintaining the APR equipment. <41.3.9c>

C. **USER MANUALS –** The manufacturer's user manuals, which provide operational procedures for both the Mobile Auto-Detector User and Operations Center Personnel are attached to this policy.

D. **GUIDELINES FOR USE <41.3.9a>**

1. **Stationary APRs**

   a. **Notification** – After receiving a "hit" through LEADS/NCIC, the dispatcher will verify the APR "hit" on the plate matches the image and follow established procedures to check NCIC/LEADS. The dispatcher will then dispatch an officer to intercept the vehicle. Two officers will be dispatched to verify "hits" at the Statehouse Garage. The officer(s) will be notified of the reason for the "hit," that the dispatch is a result of the APR and that the "hit" has been verified through NCIC.

   b. **Verification of Hit** – If, for any reason, the APR "hit" cannot be verified through LEADS/NCIC, the vehicle is not to be stopped based solely on the APR. If the

Ohio State Highway Patrol Policy (continued)

dispatcher cannot read the digital image sufficiently to verify the license plate number and state, an officer may be dispatched to intercept the vehicle, however the intercepting officer must first verify the "hit" through NCIC prior to stopping the vehicle.

c. **Turnpike Gate Personnel** – If an officer is unavailable to immediately intercept a valid "hit," the dispatcher may notify additional personnel to be on the lookout for the suspect vehicle. Ability to identify the vehicle, reason for the "hit," and known direction of travel should all be used to determine whether additional personnel should be notified. If the vehicle is observed, they should be instructed to notify the dispatch facility of the route and direction of travel.

d. Officers and dispatchers should use their discretion based on hazards, proximity of assisting officers, type of "hit," etc.

e. **Cleveland Dispatch Center / Capitol Square Parking Facility**

i. The APR system will be checked by the dispatcher at the beginning of the shift and the information will be logged on the OTIS HP-53 using File 1 – Sub Category "APR."

ii. The Statistical Analysis function will determine if the APR is functioning correctly. The system should indicate a number of plates that have been checked. If there are no plates indicated, the system is not functioning. If the system shows that plates are being scanned, the system is working correctly.

iii. The Statistical Analysis section is found in section 6 of the User's Guide.

2. ***Mobile APRs***

a. Mobile APRs are operational as long as the officer is logged in to the MCT in the vehicle.

b. Officers have the ability to toggle between the Criminal and Commercial databases or they can activate both. If both databases are active, the mobile APR will indicate a "hit" on a violation in either system.

c. Officers must verify the "hit" through LEADS/NCIC prior to stopping the vehicle. If, for any reason, the APR "hit" cannot be verified, the vehicle is not to be stopped based solely on the APR. Officers only need to verify that the plate matches the "hit" in the FMCSA database.

d. Officers and MCEIs should use their discretion based on hazards, proximity of assisting officers, type of "hit," etc.

e. Motor Carrier Enforcement Inspectors may not stop a commercial motor vehicle for the sole purpose of a LEADS/NCIC "hit".

3. **Infrastructure Specialist and Electronic Technicians are responsible for:** <41.3.9b>

a. Equipment and software deployment and installation

b. Coordinating maintenance and repair

c. Coordinating the establishment of parameters for download of NCIC and LEADS

Ohio State Highway Patrol Policy (continued)

data, pick-up radius restrictions, misdemeanor and/or felony warrants.

d. Ensure all captures on stationary and mobile APRs follow the appropriate retention schedule.

4. **Public Affairs -** All media contacts will be coordinated through the Public Affairs Unit, which shall be consulted prior to releasing any information to the news media.

5. **Licensing and Commercial Standards**

   a. LCS units may stop commercial motor vehicles for the purpose of inspection based on hits received from the PRISM file "Hot List."

   b. The reason code LPRI (License Plate Reader Inspection) will be used in ASPEN for all inspections conducted based on a PRISM hit.

UTAH MVED POLICY

Policy

Automated License Plate Readers (ALPRs)

410.1 PURPOSE AND SCOPE

ALPR is a computer-based system that utilizes special cameras to capture a color image, as well as an infrared image, of the license plate of a passing vehicle. The infrared image is converted into a text file utilizing Optical Character Recognition (OCR) technology. The text file is automatically compared against an “informational data file” containing information on stolen or wanted vehicles as well as vehicles associated with AMBER alerts, warrant subjects or other criteria. If a match is found, the user is notified of the vehicle “hit” by an audible alert and an associated notation on the user’s computer screen.

ALPR cameras can be mobile (mounted on vehicles) or on fixed positions such as freeway overpasses or traffic signals. ALPR systems mounted on vehicles have all the necessary equipment to scan plates, notify the user of a vehicle hit, and store the plate scan data for uploading into the ALPR server at a later time. ALPR fixed positions transmit plate scan data to the ALPR server as they are scanned and notify a central dispatch, such as a station desk, of any vehicle hit.

ALPR cameras can photograph thousands of plates in a shift. All plate scan data collected from the ALPR cameras are transmitted to an ALPR server. The ALPR server resides within the State of Utah Data Network Center. In addition to software applications that are used to run the ALPR server, the ALPR server also houses the “informational data file” containing wanted, stolen, or vehicles of interest, as well as all the plate scans captured by the ALPR cameras.

The informational data file is comprised of information from the Stolen Vehicle File (SVF), “HOT FILE” (HF), Wanted Persons File (WPF), Stolen Plate File (SPF), Revoked Registration File (RRF), Cancelled Registration File (CRF), Expired Registration File (ERF), Out of Service (OS), and user defined “hot lists.“ The Informational data file is updated throughout the day with different data sources being “refreshed” at different intervals. SVF/WPF/SPF/RRF/ERF/OS data is refreshed from the state database daily, HF data is refreshed from the Bureau of Criminal Investigation hourly, CRF data is refreshed weekly, and hot list data is refreshed upon input into the ALPR server. It is important that ALPR users take into account the amount of lag time between receiving an ALPR hit notification and the last updating of the informational data file within the mobile ALPR unit database. When possible, confirm that the mobile ALPR unit hit information is still valid, either through your Communication Center (CC) or via your laptop computer (LC) prior to taking police action. Confirmation can be deferred in rare circumstances (i.e. special investigative units) when compelling circumstances may exist that, if CC is contacted, it could jeopardize the investigation and/or officer safety.

Fixed ALPR cameras have a continuous connection to the ALPR server. They are capable of uploading plate scan data to the ALPR server as the scans occur. ALPR scans can be compared against the informational data file immediately when the data sources are updated. Mobile ALPR units do not have a continuous connection to the ALPR server. In order to facilitate the exchange of data, air cards are used which will allow connectivity to the ALPR server via wireless transmission.

Automated License Plate Readers (ALPRs)

If the air card in the vehicle is connected to a service, the ALPR will continually “sync” which will upload plate scan information from the vehicle to the ALPR server and/or download the latest informational data file from the ALPR server to the vehicle. It is imperative that mobile ALPR users sync their mobile units at least once at the beginning of their shift to ensure they have the latest informational data available.

410.2 POLICY AND PROCEDURES

Mobile ALPR unit users receiving an alert shall confirm the status of the vehicle by running the license plate either manually via the LC or over the radio via CC, unless compelling circumstances are present or officer safety issues make it unsafe to do so.In such cases, Officers shall confirm the status of the alert as soon as possible. When requesting CC to confirm the status of an ALPR alert, the officer shall advise CC the request is for an ALPR alert.

In the case of a stolen vehicle alert, personnel may regard the vehicle as a known stolen vehicle, while awaiting a secondary confirmation. If the decision is made to initiate a “felony stop” due to an ALPR alert on a stolen vehicle, officers shall advise CC they are following a vehicle due to an ALPR stolen vehicle alert prior to receiving a secondary confirmation by LC/CC.

Officers shall adhere to the Department’s pursuit policy as described in the Manual of Policy and Procedures. CC shall immediately provide secondary confirmation or advise the unit that the vehicle is not reported as stolen.

When Desk Personnel receive an alert from a fixed ALPR system, which is the result of an image taken from a fixed camera, they shall confirm the current status of the vehicle via their CAD terminal or via CC. While waiting for confirmation, desk personnel will advise field patrol units of the ALPR alert, the location, the vehicle description, request aero bureau, and coordinate responding field units.

410.2.1 HOT LISTS

Hot lists are comprised of user defined data that is manually input into the informational data file so that ALPR users will be alerted whenever a “vehicle of interest” is located.Hot lists can be loaded into a specific station area vehicle or to ALPR all vehicles countywide.

Hot lists can be input into the ALPR server informational data file only by ALPR administrators. Unit commanders, or their designees, must approve hot list information that is intended for use solely in their area cars. With the exception of AMBER alert information, hot list information intended for Department-wide use must have the approval of the Division Director, or his designee.Mobile ALPR users can input individual license plates into their patrol vehicle’s ALPR system for use during their shift, however, the information will be deleted from that mobile ALPR unit once user performs an “end shift” and the vehicle syncs with the ALPR server. An ALPR vehicle alert identified via hot list information does not automatically provide ALPR users with sufficient justification to pullover or detain vehicle occupants. Often times, these hotlists will identify a “vehicle of interest” which is not necessarily wanted for a crime (ex: sex offender vehicle).

Copyright Lexipol, LLC 2020/08/26, All Rights Reserved.
Published with permission by Utah Motor Vehicle Enforcement Division

Utah MVED Policy (continued)

Personnel must use discretion and in some cases have independent information justifying a traffic stop.

410.3 ALPR OPERATION

Use of an ALPR is restricted to the purposes outlined below. Department personnel shall not use or allow others to use, the equipment or database records for any unauthorized purpose.

(a) An ALPR shall only be used for official and legitimate law enforcement business (Utah Code 41-6a-2003).

(b) An ALPR may be used in conjunction with any routine patrol operation or official investigation. Reasonable suspicion or probable cause is not required before using an ALPR.

(c) While an ALPR may be used to canvass license plates around any crime scene, particular consideration should be given to using ALPR-equipped cars to canvass areas around homicides, shootings and other major incidents. Partial license plates reported during major crimes should be entered into the ALPR system in an attempt to identify suspect vehicles.

(d) No member of this department shall operate ALPR equipment or access ALPR data without first completing department-approved training.

(e) If practicable, the investigator should verify an ALPR response through the Utah Department of Public Safety (DPS) law enforcement information system or other appropriate database before taking enforcement action that is based solely upon an ALPR alert.

(f) No ALPR operator may access the DPS database or other system unless otherwise authorized to do so.

410.4 ALPR DATA COLLECTION AND RETENTION

All data and images gathered by an ALPR are for the official use of the Utah Motor Vehicle Enforcement Division and because such data may contain confidential information, it is not open to public review. ALPR information gathered and retained by this department may be used and shared with prosecutors or others only as permitted by law (Utah Code 41-6a-2004).

The Administration Lieutenant is responsible to ensure proper collection and retention of ALPR data, and for transferring ALPR data stored in department vehicles to the department server on a regular basis, not to exceed 30 days between transfers.

All ALPR data downloaded to the server should be stored for the minimum period established by department records retention guidelines and thereafter should be purged unless it has become, or it is reasonable to believe it will become, evidence in a criminal or civil action. In no event shall data be maintained longer than nine months unless it is subject to a warrant, preservation request or disclosure order (Utah Code 41-6a-2004). Data that will not be purged should be downloaded from the server onto portable media and booked into evidence.

Automated License Plate Readers (ALPRs)

410.4.1 NON-GOVERNMENTAL AGENCY ALPR
ALPR data captured by a non-governmental agency device may only be obtained pursuant to a warrant or a court order (Utah Code 41-6a-2005).

410.5 ACCOUNTABILITY AND SAFEGUARDS
All saved data will be closely safeguarded and protected by both procedural and technological means. The Utah Motor Vehicle Enforcement Division will observe the following safeguards regarding access to and use of stored data:

(a) All non-law enforcement requests for access to stored ALPR data shall be referred to the Office Manager and processed in accordance with applicable law.

(b) All ALPR data downloaded to the mobile workstation and server shall be accessible only through a login/password-protected system capable of documenting all access of information by name, date and time.

(c) Persons approved to access ALPR data under these guidelines are permitted to access the data for legitimate law enforcement purposes only, such as when the data relate to a specific criminal investigation or department-related civil or administrative action.

(d) Such ALPR data may be released to other authorized and verified law enforcement officials and agencies at any time for legitimate law enforcement purposes.

(e) ALPR system audits should be conducted on a regular basis.

Virginia State Police Policy

Virginia Department of State Police

General Order OPR 1.20 **License Plate Reader Operating Procedures**

Purpose: To establish uniform guidelines for License Plate Reader operations by Department personnel.

1. The License Plate Reader (LPR) program is intended to enhance law enforcement operations related to homeland security and terrorist watch lists, stolen vehicles and license plates, sex offender violators, wanted and missing persons, and other vehicle-related crimes that impact the safety of citizens.

2. The Director of the Bureau of Field Operations (BFO) shall appoint a Statewide LPR Program Coordinator who shall be responsible for the daily operations of the LPR Program.

Guidelines for Use

3. The Department's LPR system shall be used for official law enforcement purposes only. No employee may use, or authorize the use of, the equipment or database records for any other reason. Misuse of equipment or database records may result in disciplinary action.

4. LPR units will be installed in Department vehicles as determined by the Director of BFO or his/her designee. The Director of BFO must pre-approve the transfer of an LPR unit to another Area. Otherwise, if a sworn employee assigned a vehicle equipped with an LPR unit is transferred, promoted or resigns, the vehicle will be reassigned to another sworn employee and retained in the original Area.

5. LPR-equipped vehicles may be used for routine patrol or during special events. In all instances, LPR-equipped vehicles shall be operated in accordance with Department policies regarding vehicle operations.

6. Each employee assigned an LPR unit is responsible for ensuring they are operating with the most current "Hotlist" at the beginning of each shift. The Statewide LPR Program Coordinator should be contacted immediately if problems are encountered with the updating of the LPR units.

7. Upon receiving an alarm or hit, the sworn employee shall verify the accuracy of the information by contacting the Communications Center per established Department policy.

Effective Date – 10/1/2018 Review Date – 7/1/2022
BFO

General Order OPR 1.20

a. An LPR alarm alone is NOT sufficient probable cause to warrant a stop or arrest.

b. Sworn employees are required to confirm a positive hit prior to any enforcement action being taken.

8. Sworn employees are required to ensure that all positive hits on the Terrorist Watch List are reported to the Terrorist Screening Center (TSC) and Virginia Fusion Center (VFC) immediately. All Terrorist Watch List hits will be handled by MDT or telephone. There will be no radio traffic concerning terrorist hits except in the case of emergencies.

9. Special circumstances, such as AMBER Alerts or critical incidents, may require immediate manual updating of the LPR system "hot list." Sworn employees in possession of license plate information related to such circumstances will immediately enter the data into the LPR system. The Virginia Fusion Center (between 0600 and 2200 hours) and/or Statewide LPR Program Coordinator will ensure that new information is uploaded or relayed to all active LPR units. If a critical situation requires manual entry of license plate data, the Communications Center shall immediately notify all LPR users of the new data in the Division and document this action in the CAD system. LPR users shall manually enter the license plate information associated with the critical incident. The Communications Center shall also contact the Virginia Fusion Center and provide the information so that the data may be entered into the statewide list.

10. Terrorist organizations have openly voiced their desire to attack venues where large crowds gather, such as major sporting events, large festivals, etc. Because of the potential of just such an incident, stationary, mobile, and covert LPR use is permitted for such events. Prior to utilizing LPRs at these venues, the affected Division Commander shall submit a letter, through channels, to the Superintendent describing the event, potential threat, and parameters under which the LPRs will be utilized. The decision to grant the approval rests with the Superintendent's Office.

11. Fixed and/or covert LPR units may be used to support on-going criminal investigations or approved venues. The use of fixed and/or covert LPR units shall be coordinated with the Statewide LPR Program Coordinator.

12. At the end of each month, Monthly Plate Reader Activity Logs will be submitted to the appropriate Area Office and Division LPR Coordinator by personnel using an LPR unit.

General Order OPR 1.20

a. At the Area office, a separate file will be maintained for each LPR unit assigned to the Area. Each file will include all Monthly Plate Reader Activity Logs submitted after LPR system usage. These logs will be handled as Department-governed non-records (DGNRs) and shall be retained for two years after the end of the calendar year.

b. At the Division headquarters, all Monthly Plate Reader Activity Logs will be reviewed by the Division LPR Coordinator and consolidated into one Monthly Plate Reader Activity Report. The report shall be reviewed by the Division Commander and forwarded to the Statewide LPR Program Coordinator by the 5th of each month. The Division is the record holder for the Monthly Plate Reader Activity Reports, and these reports shall be included on the Division's file list. Monthly Plate Reader Activity Reports shall be retained for two years after the end of the calendar year.

Data Security and Access

13. The Statewide LPR Program Coordinator is responsible for overall operations of the program, including:

    a. controlling access of sworn personnel to the LPR system and hot file data;

    b. ensuring stored data are purged from the LPR system server as required;

    c. approving or denying in writing requests to access and/or use LPR data; and,

    d. designating personnel who will be authorized to access the server and conduct data queries.

14. The Department's Data Center will house the Department's LPR System Operations Center, which is the central database for all license plates scanned by the Department's LPR units.

    a. All collected data will be maintained on an independent server that is not connected to, or shared with, other law enforcement databases.

    b. The Data Center will provide an inquiry tool, history tracking, and reporting protocols for the entire LPR program.

    c. The Data Center will provide a secure intranet site, allowing only approved personnel password-protected access to collected data. This access shall be restricted to:

(1) searching for a license plate or partial license plate;

(2) viewing the image and location of matches on the "hot list";

(3) viewing maps showing the location of alarms or hits;

(4) viewing statistical reports on alarms or hits; and,

(5) searching for matches for a specific geographical location and/or time frame.

Operator Training

15. All users must receive standardized training prior to operating the LPR system.

a. The Statewide LPR Program Coordinator is responsible for providing initial training of all Department personnel who utilize the LPR system.

b. Additional training will be provided as needed and as determined by the Statewide LPR Program Coordinator.

c. The Training Division will be responsible for maintaining and updated all training records associated with the LPR program.

Data Storage and Retention

16. Per the Virginia Attorney General's Opinion #12-073, "License Plate Readers – Use and Storage of Data," the Department may not passively collect and store plate read data for potential use in future investigations.

a. The collection and use of stored data to help solve future crime are prohibited under the Opinion and existing Virginia law.

b. The Department may continue to use the LPRs to compare active reads to existing lists, such as stolen vehicles or Amber Alerts. Only the reads that are directly related to the intended purpose (i.e., stolen plate) may be retained beyond the use session of the LPR. All other non-relevant, passive reads should be deleted at the end of that day's use.

c. The Department may collect, store, and analyze data that relates to a specific, on-going, active investigation. That data shall be made part of the criminal investigative file and may not be used for other purposes.

d. The Department may collect and temporarily store data that relates to special events as enumerated in paragraphs 10 and 11 of this General Order. This data will only be stored during the event and will be disposed of immediately following the event if it has been determined no applicable criminal investigation has been initiated. If an applicable criminal investigation is initiated, the data will be handled in accordance with paragraph 16.c. of this General Order.

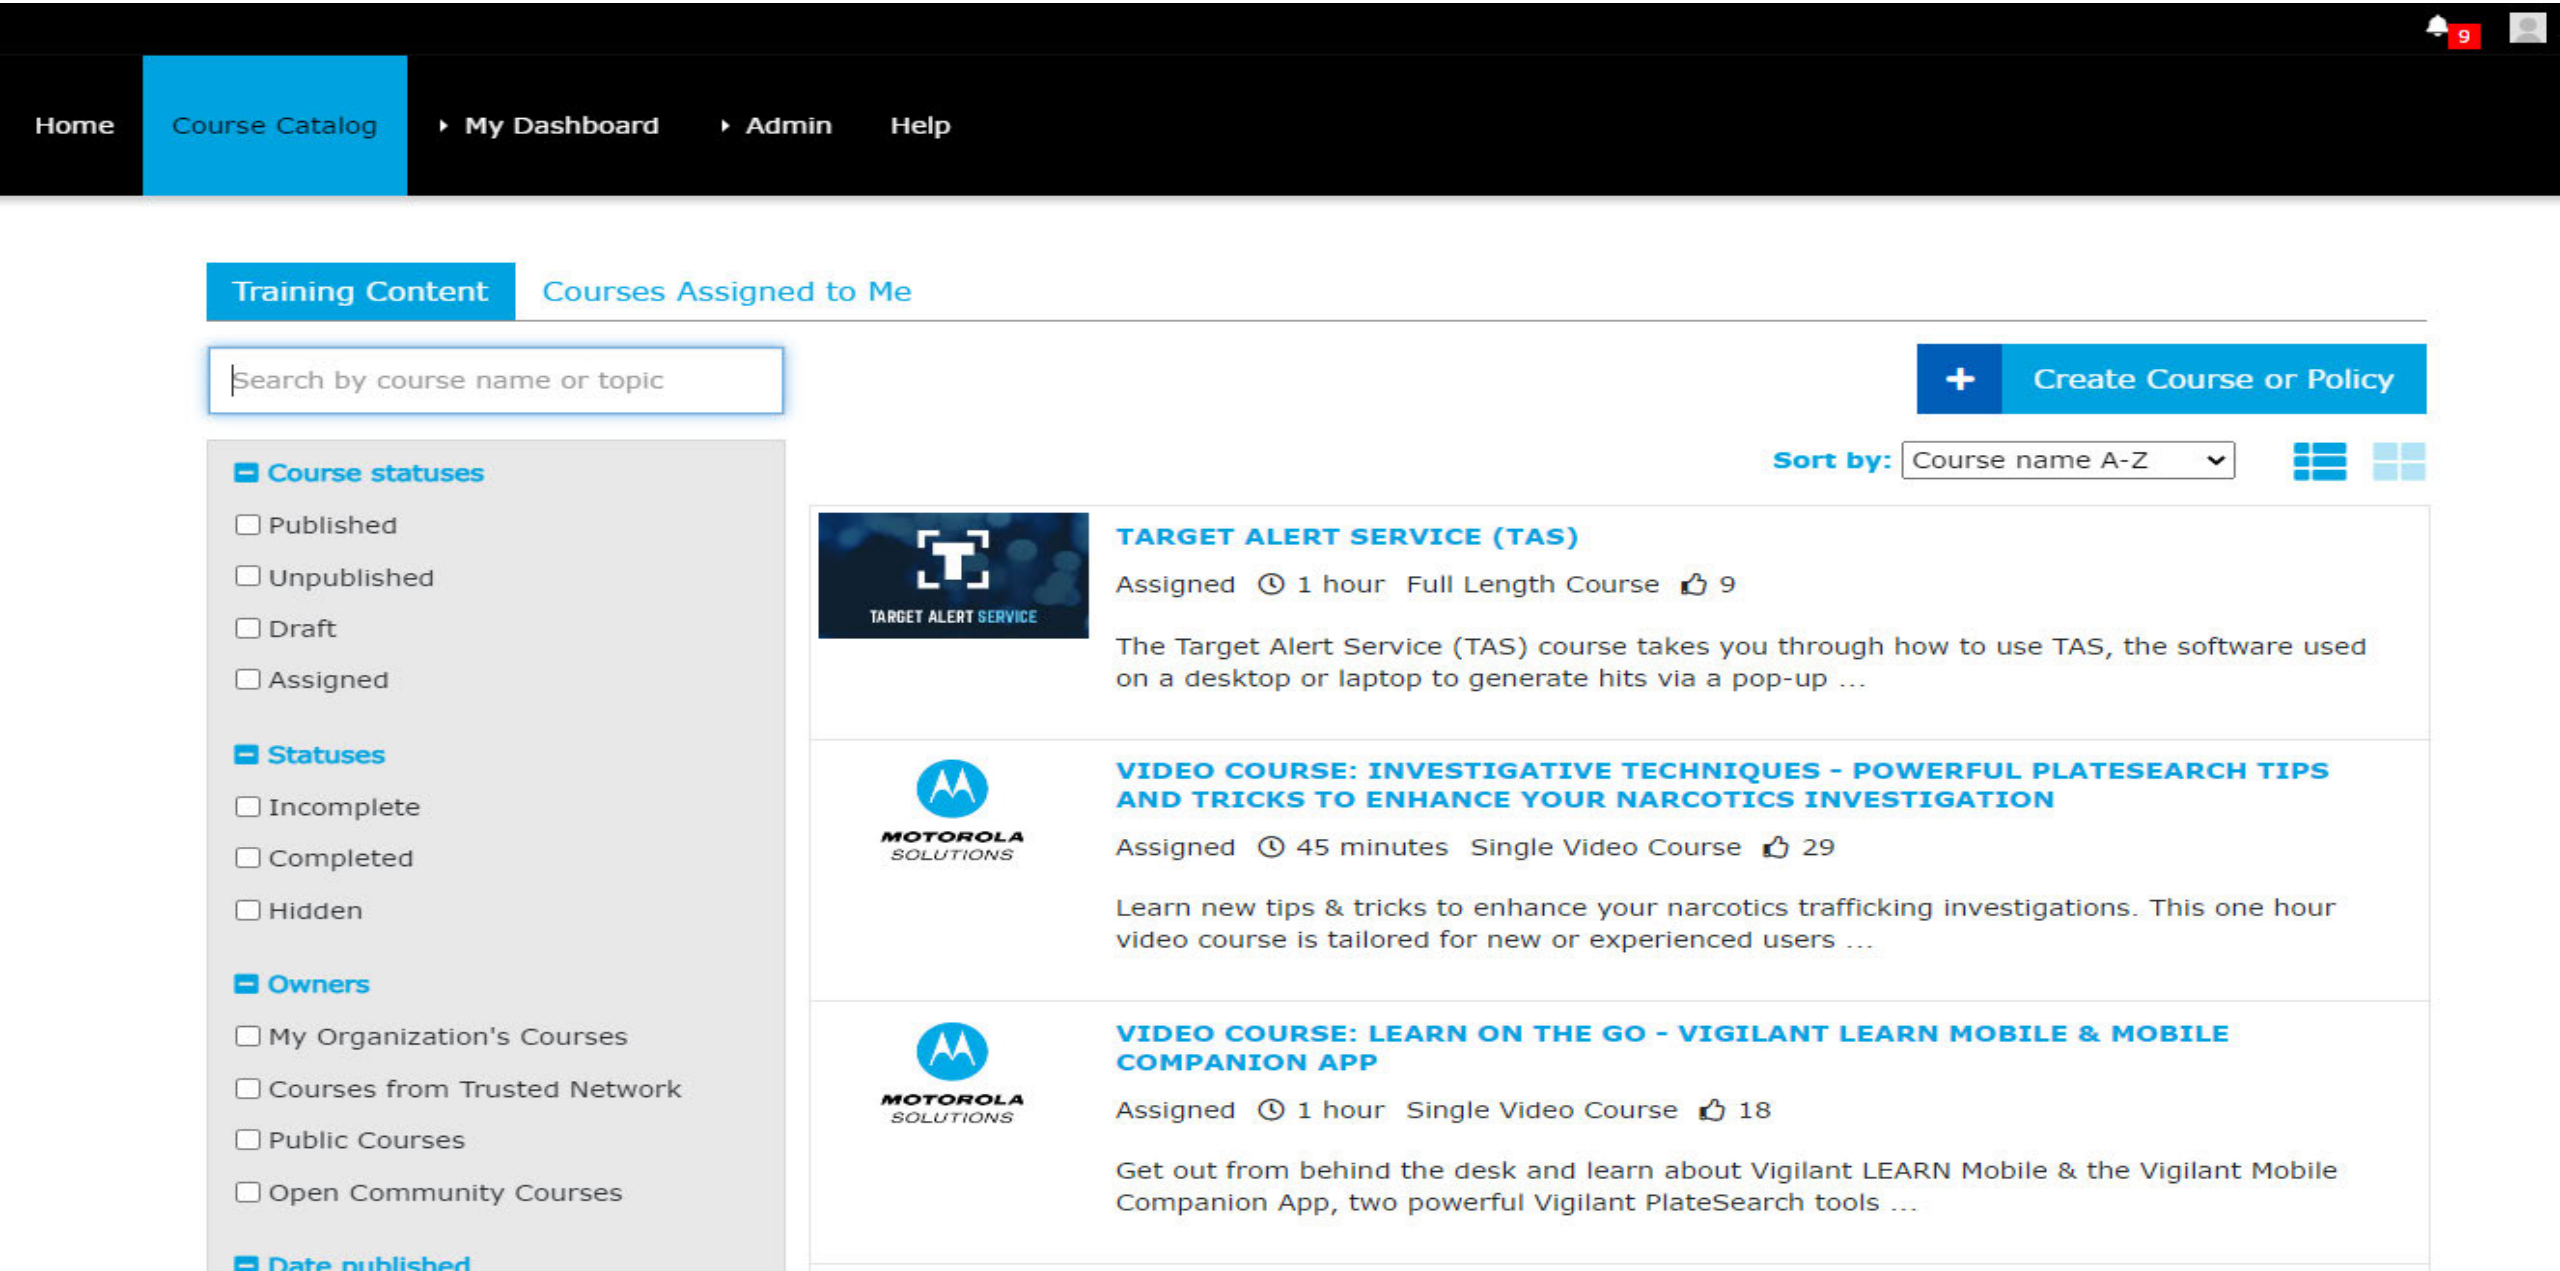
Vigilant LEARN Training Bulletin:

Welcome to Vigilant Training Academy



Vigilant Training Academy is an online on-demand learning program to help you learn more about tools that will enhance your investigations. These courses can be completed at your own pace and offer a comprehensive look into how the technologies can be applied into your investigation process.

To get an understanding of Vigilant PlateSearch, begin with the **Vigilant PlateSearch Introduction & User Account Management Course** and work your way through **Vigilant PlateSearch 101** & **Vigilant PlateSearch 202** . You will receive a certificate upon completion of each course.

Other available courses include **Vigilant LEARN Agency Manager** , **Target Alert Service (TAS)** , & **Vigilant CarDetector** . View training manuals and installation guides in the **Vigilant Documentation** area.

Click on **Course Catalog** in the menu bar to view all available courses, documentation , & videos.

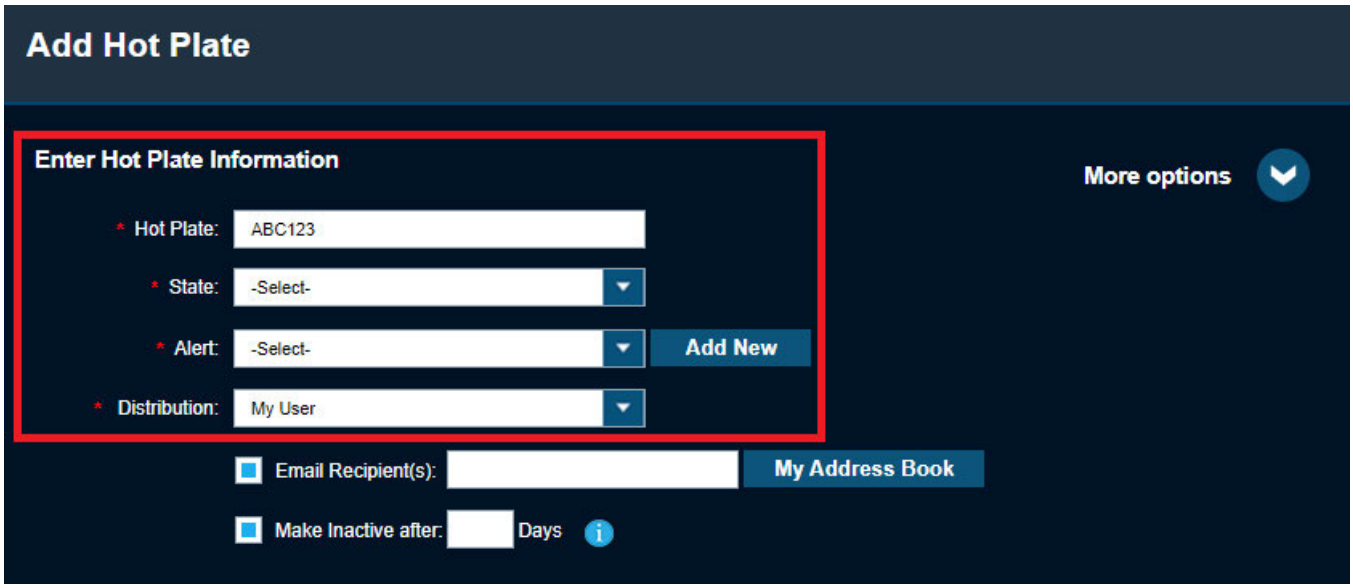
VIGILANT VEHICLEMANAGER QUICK GUIDES

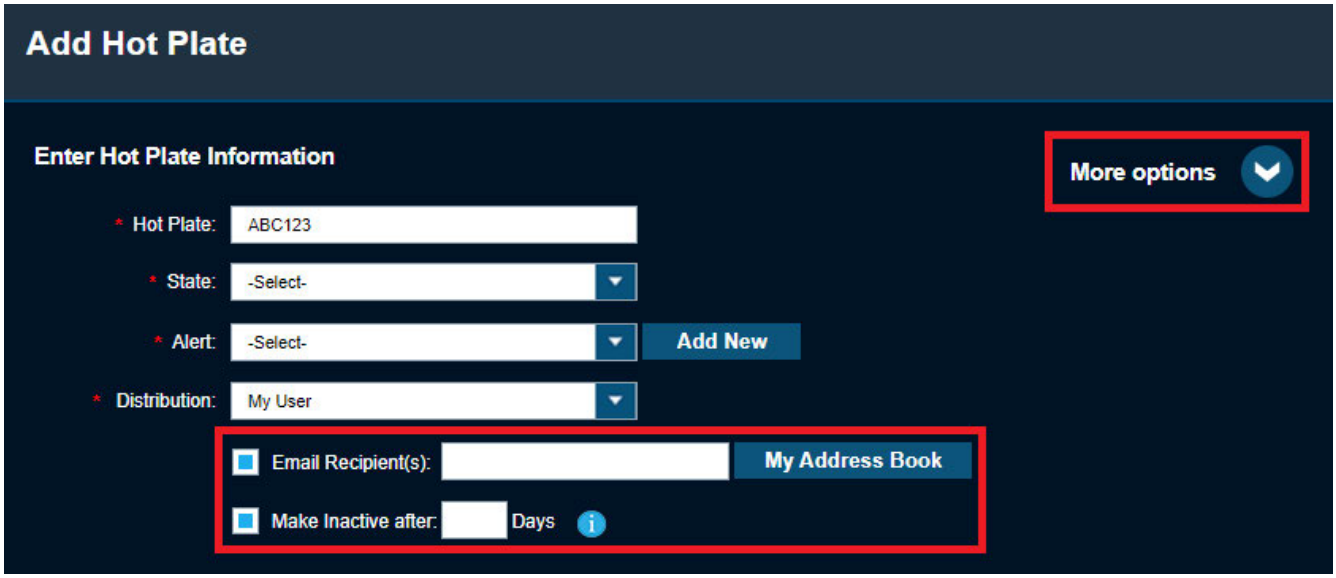


ADDING NEW HOTPLATES

This guide describes how Users and Agency Managers can add new **Hot Plates** to Vigilant VehicleManager and then search for and modify those records.

- **Hot Plates** are license plate records with associated alert and distribution options that generate alerts when detected by Vigilant camera systems.
- **Hot Lists** are lists of **Hot Plates** with alert and distribution options that apply to the entire list.

Hot Plates and **Hot Lists** can be distributed to an entire Agency, individual Users, or to groups of Users that are part of a User Profile.



ADDING REQUIRED HOT PLATE INFORMATION

1. Login to Vigilant VehicleManager with an Agency Manager account and navigate to **Hot list management → Upload hot list → Add hot list → Add hot plate.**
2. Enter the following required information:
    a. **Hot Plate:** The alphanumeric license plate number.
    b. **State:** The state or territory in which the license plate is registered.
    c. **Alert:** The alert type that will be generated when the Hot Plate is detected. If desired, use the **Add New** button to add a new Alert type and select it from the drop down list.
    d. **Distribution:** The Users that will receive alerts when this Hot Plate is detected: All Users in the Agency, just this User, selected Users, or certain groups of Users.

© 2023, Motorola Solutions. All rights reserved. MOTOROLA, MOTO, MOTOROLA SOLUTIONS, and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of their respective owners.

ADDING OPTIONAL HOT PLATE INFORMATION

1. Enable the **Email Recipient(s)** checkbox and enter additional email addresses that will receive the select Alerts when this Hot Plate is detected.

   NOTE: To enter more than one email address, use the **My Address Book** button to add and select additional addresses. Or, use a comma **(,)** to separate each address.

2. Enable **Make Inactive after** to select the number of days after which this Hot Plate record will be inactive and no longer generate alerts.

3. Click **More Options** to open additional Hot Plate configuration options.

CONFIGURING MORE OPTIONS

1. Select front the following options:
    a. **Assign Alert Level**: Enable to select the urgency of the Alert.
    b. **Generate historical Hits**: Enable and select the number of days to look back and generate Alerts for past detections of this Hot Plate.
    c. **Order Date**: Enable to manually select a different date for the creation of the Hot List record.
    d. **Freeze Hotplate Owner**: Enable to prevent the overwriting of this Hot Plate by another Agency member until the Freeze Ownership option is removed from this record.
    e. **Source**: Select a Source that this Hot Plate will be added to. When that Source is selected by other Users or Agency Managers, this Hot Plate will be active for them.

ADDING ADDITIONAL HOT LIST FIELDS

2. Enter any additional information about the Hot Plate or vehicle that may be available:

    a. **Custom Hot List Fields**: Enter a type of data in the **Title** field and the data itself in the **Data** field. For example: Windows, Tinted. Use the **Plus Sign (+)** to add additional fields.

    b. **Default Hot List Fields**: When the **Hot Plate** field is populated, click the **Get Info** to automatically populate the default fields with available data. Enter any additional vehicle information present.

    c. **Add Comment**: Enter a subject and any additional notable information about the Hot Plate record as desired.

3. After all the required and optional information has been entered, click **Load Hot Plate** to create the Hot Plate record.

© 2023, Motorola Solutions. All rights reserved. MOTOROLA, MOTO, MOTOROLA SOLUTIONS, and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of their respective owners.

SEARCHING FOR HOT PLATE RECORDS

1. To search for Hot Plate records, navigate to **Hot List Management** → **Search Records**.
2. If necessary, select from the **Time Period** and **Filter** options to narrow the search. Click **Search**.
3. In the search results, click on a single Hot Plate to highlight it or use the checkboxes to select multiple Hot plates.
4. Select from the following search result options:
    a. **Customize View**: **Add** or **Remove** fields to display in the search results.
    b. **Active/Inactive**: Inactive Hot Plates are still stored, but will not generate alerts.
    c. **View**: View the Hot Plate records and associated information.
    d. **Edit**: Edit any of the details of an existing Hot Plate record.
    e. **Delete**: Deletes the selected Hot Plate records.

ATTORNEY GENERAL LAW ENFORCEMENT DIRECTIVE NO. 2022-12

TO: All Law Enforcement Chief Executives and County Prosecutors

FROM: Matthew J. Platkin, Attorney General

DATE: October 21, 2022

SUBJECT: Updated Directive Regulating Use of Automated License Plate Recognition (ALPR) Technology

In 2010, Attorney General Law Enforcement Directive 2010-5 established statewide guidelines governing the use of automated license plate recognition (ALPR) technology and the data it generates.[1] After more than a decade of experience with what was then an emerging technology, an updated policy on ALPRs is necessary.

This update has two major goals. First, it maintains—and builds upon—the significant safeguards from abuse and privacy protections that have served the State well under the 2010 policy, including continuing to apply the New Jersey Supreme Court's framework in State v. Donis, 157 N.J. 44 (1998), limiting law enforcement access to personal identifying information associated with a vehicle's license plate unless there is a particularized basis. Second, the revised policy facilitates the sharing and standardization of ALPR data statewide in order to maximize our ability to use this tool to solve and prevent crimes.

The major revisions are as follows. Additionally, other portions of the 2010 policy have been reorganized or condensed.

- ***Oversight***. Establishes ALPR coordinators at the agency, county, and state level to improve oversight and information sharing.

- ***Sharing and standardization of data***. Requires use of the statewide application program

[1] "Automated license plate recognition" or ALPR is technology that uses optical character recognition on images to read vehicle registration plates to create vehicle location data. ALPR devices may be placed at a stationary location (permanent or portable) or be mobile and affixed to a police vehicle. The vehicle location data captured by an ALPR device is (1) used to alert law enforcement to vehicles they have a legitimate and specific reason to locate, and (2) stored so that law enforcement may perform searches to further subsequent investigations. Both situations are described in more detail in this Directive.

interface ("Statewide API")—software that will make ALPR data accessible statewide—and mandates standard data formats to make ALPR information consistent across agencies, without requiring additional agreements between agencies.

- ***Retention period***. Decreases retention period for both ALPR data and records from five years to three years.

- ***Release of ALPR data***. Lays out release process for ALPR data in criminal prosecutions.

- ***Audits***. Mandates annual audits of each agency's ALPR program.

- ***Training***. Establishes specific training requirements for all agency users authorized by their law enforcement executive to use ALPRs and access ALPR data.

Therefore, pursuant to the authority granted to me under the New Jersey Constitution and the Criminal Justice Act of 1970, N.J.S.A. 52:17B-97 to -117, which provides for the general supervision of criminal justice by the Attorney General as chief law enforcement officer of the State in order to secure the benefits of a uniform and efficient enforcement of the criminal law and the administration of criminal justice throughout the State, I hereby direct all law enforcement and prosecuting agencies operating under the authority of the laws of the State of New Jersey to implement and comply with the directives outlined below.

1. **Oversight**

1.1 ***Agency***. The law enforcement executive of each agency using an ALPR or its data shall designate an Agency ALPR Coordinator who will:

- Be the external point of contact for agency ALPR-related items such as information sharing and audits;

- Internally oversee the agency's ALPR program, including training and approving access requests (may delegate approval authority to other supervisors);

- Designate authorized users within the agency who can use ALPRs and access stored data (such users must complete the trainings mandated by this Directive).

1.2 ***County***. Each County Prosecutor will designate a County ALPR Coordinator who will maintain contact information for Agency ALPR Coordinators in the county and provide it to the State ALPR Coordinator. Where county ALPR data is maintained by a sheriff's department or public safety agency, a representative from that agency may be designated as a County ALPR Co-Coordinator. State agencies should report their Agency ALPR Coordinators directly to the State ALPR Coordinator.

1.3 ***State***. The Attorney General, in consultation with the New Jersey State Police ROIC Commander, will designate a State ALPR Coordinator to oversee the "Statewide API" that connects stored ALPR data (discussed below) and the state's ALPR program generally.

2. Deployment

2.1 ***Official use only***. An ALPR and the data it generates shall only be used for official and legitimate law enforcement purposes. The agency's law enforcement executive or designee must authorize deployment of each ALPR.

2.2 ***Scanning limited to vehicles exposed to public view***. An ALPR shall only be used to scan license plates of vehicles that are exposed to public view (e.g., vehicles on a public road, street, or that are on private property but whose license plate(s) are visible from a public road, street, or a place to which members of the public have access, such as the parking lot of a shopping mall or other business establishment).

2.3 ***Sharing deployment information***. The following data must be shared with the State ALPR Coordinator prior to installing or relocating a permanent fixed ALPR unit:

- Camera name (pursuant to convention specified by State ALPR Coordinator)
- Location (latitude and longitude)
- Survey provided by ALPR vendor, including projected size of ALPR data

When deploying or relocating a portable fixed ALPR unit, agencies must provide updated latitude and longitude data to the State ALPR Coordinator.

2.4 ***Deconfliction***. Agency ALPR Coordinators shall deconflict with the County and State ALPR Coordinator about deployment locations to avoid duplication of efforts.

3. BOLO lists

3.1 ***Standard for including license plate in BOLO list***. A license plate number may be included in a "be on the lookout" or BOLO list (a compilation of license plates or partial plates for which a BOLO situation exists) for input into an ALPR system only if there is a legitimate and specific law enforcement reason to identify or locate that particular vehicle, or any person(s) who are reasonably believed to be associated with that vehicle. Examples of legitimate and specific reasons include but are not limited to:

- Persons who are subject to an outstanding arrest warrant
- Missing persons
- AMBER/SILVER alerts
- Vehicles and/or persons involved in prior suspicious activity, such as groups of vehicles travelling together suspected of criminal activity, or subjects trying to open doors to random cars
- Stolen vehicles
- Vehicles reasonably believed to be involved in the commission of a crime or disorderly persons offense
- Vehicles registered to or reasonably believed to be operated by persons who do not have a valid operator's license or who are on the revoked or suspended list
- Vehicles with expired registrations or other Title 39 violations

- Persons who are subject to a restraining order or curfew issued by a court or by the Parole Board, or who are subject to any other duly issued order restricting their movements
- Persons wanted by a law enforcement agency who are of interest in a specific investigation, whether or not such persons are themselves suspected of criminal activity
- Persons who are on any watch list issued by a state or federal agency responsible for homeland security

3.2 ***Batch downloading***. BOLO list information may be downloaded in batch form from other databases, including but not limited to the National Crime Information Center (NCIC), National Insurance Crime Bureau, US Department of Homeland Security, and Motor Vehicle Commission database.

3.3 ***Updating BOLO lists***. A BOLO list may be revised at any time. Updates to a BOLO list shall be done at the start of each shift for mobile ALPRs attached to police vehicles, and as frequently as possible, but at least daily, for ALPRs at stationary locations.

3.3.1 All ALPR systems must provide an Application Program Interface (API) or web service to update in real-time a BOLO list(s) through methods approved by the State ALPR Coordinator, including AMBER/SILVER alerts that remain on the list until expired or withdrawn.

3.4 ***Immediate alert response***. A BOLO match with an ALPR scan may be programmed to trigger an immediate alert. The reason for including the vehicle on the BOLO list shall be disclosed to the officer who will react to an immediate alert. The officer should determine whether the alert has been designated as a non-encounter alert (meaning officer should not encounter the vehicle) and, if so, follow any instructions included in the alert for notifying the originating agency.

3.4.1 When an officer receives an immediate alert without a non-encounter restriction, the officer shall take such action in response to the alert as is appropriate in the circumstances. An officer alerted that an observed motor vehicle's license plate is on the BOLO list may be required to make a reasonable effort to confirm that a wanted person is actually in the vehicle before the officer would have a lawful basis to stop the vehicle. See State v. Parks, 288 NJ. Super. 407 (App. Div. 1996) (no reasonable suspicion to justify a stop because registered car owner's license suspended unless driver generally matches the owner's physical description (e.g., age and gender)).

4. Accessing stored data

4.1 ***Alert data***. An authorized user may access and use stored ALPR alert data (i.e., ALPR license plate data matching an entry on a BOLO list) as part of an active investigation or for any other legitimate law enforcement purpose, including but not limited to a BOLO query, a crime scene query, or crime trend analysis (as defined below).

4.2 ***Non-alert data***. Access to and use of stored non-alert ALPR data (i.e., ALPR data gathered not matching a BOLO list entry) is limited to the following three purposes explained below: a BOLO query, a crime-scene query, and crime trend analysis (system tests and troubleshooting are also acceptable purposes).

4.2.1 BOLO query. Agencies may compare a BOLO list against stored non-alert data where the results of the query might reasonably lead to the discovery of evidence or information relevant to any active investigation or ongoing law enforcement operation or where the subject vehicle might subsequently be placed on an active BOLO list (for example, may review data to determine whether a specific vehicle was present at the time and place where the ALPR data was initially scanned to check an alibi defense or to develop lead information for the purpose of locating a specified vehicle or person; or to determine whether a vehicle that was only recently added to a BOLO list had been previously observed in the jurisdiction before being placed on the list).

4.2.2 Crime scene query. Agencies may access and use stored non-alert data where such access might reasonably lead to the discovery of evidence or information relevant to the investigation of a specific criminal event (i.e., incident that would constitute an indictable crime under New Jersey law). Such queries may not be conducted to review data based on general crime patterns (e.g., to identify persons traveling in or around a "high crime area"). A record shall be kept of the specific crime(s) justifying the query, including the crime date and location.[2]

4.2.3 Crime trend analysis. Agencies may access and use stored non-alert data where such access, which may be automated, might reasonably lead to the discovery of evidence or information relevant to an investigation that is not related to a specific criminal event. Such access must be approved by the Agency ALPR Coordinator or their designee.

Crime trend analysis shall not result in the disclosure of personal identifying information (such as name, address, SSN, vehicle operator's license number) to an authorized user or any other person unless (a) there exist "specific and articulable facts that warrant further investigation" of possible criminal or terrorist activity by the driver or occupants of a specific vehicle and access has been approved by a designated supervisor; or (b) disclosure of personal identifying information concerning any vehicle plate scanned by the ALPR is authorized by a grand jury subpoena.[3]

[2] A crime scene query shall be limited in scope to data that is reasonably related to the specified criminal event, considering the date, time, location, and nature of the specified criminal event. For example, a crime that reasonably involves extensive planning and possible "rehearsals," such as a terrorist attack, would justify examining data that had been scanned and collected days or even weeks or months before the criminal event and that may have been scanned at a substantial distance from the site of the crime or intended crime (e.g., at any point along a highway leading to the intended crime site). In contrast, a spontaneous crime might reasonably justify examining data that was scanned and collected on or about the time of and in closer physical proximity to the criminal event.

[3] For the purposes of this Section, the "specific and articulable facts that warrant further investigation" standard required for the disclosure of personal identifying based upon crime trend analysis of stored non-alert data is intended to be comparable to the "specific and articulable facts that warrant heightened caution" standard developed by the

Any crime trend analysis shall document:

- The nature and purpose of the crime trend analysis
- The authorized users who accessed stored non-alert data
- The designated supervisor who approved access
- Where personal identifying information was disclosed, (a) the specific and articulable facts that warrant further investigation and (b) the designated supervisor who approved the disclosure of personal identifying information; or, where applicable, the fact that a grand jury subpoena authorized access to personal identifying information.

4.3 ***Documenting access for any stored data search***. A record shall be made of the authorized user accessing stored ALPR data and the date, and for non-alert data the record should include the justification for access. Once stored data has been accessed and transferred to an investigation file by an authorized user, it shall not be necessary after that to document further access or use of that data pursuant to this Directive.

5. Sharing data

5.1 ***Statewide API***. The State ALPR Coordinator shall implement a "Statewide API" (application program interface) that allows access to stored ALPR data across agencies, and specify the method by which all ALPRs used by New Jersey agencies must provide real-time access to ALPR data through the API. Agencies may also share data regionally with other New Jersey agencies pursuant to the mandates of this Directive, and ALPR data collected by a private entity that has entered into an agreement with New Jersey law enforcement can be shared with New Jersey agencies. All ALPRs must make data available to the Statewide API by the effective date of this Directive, and subsequent ALPRs must do so within 45 days of deployment. ALPR systems must be programmed to capture data parameters and meet minimum requirements for accuracy and performance as specified by the State ALPR Coordinator.

5.2 ***Sharing with agencies not covered by this Directive***. An agency may enter into a written agreement to share ALPR data with, or receive data from, a law enforcement agency outside of New Jersey or otherwise not covered by this Directive with the approval of the State ALPR Coordinator. Only federally recognized law enforcement agencies may receive access to a New Jersey agency's ALPR data. The State ALPR Coordinator may agree to share ALPR data with a law enforcement agency outside of New Jersey if the out of state agency agrees in writing to use the data only for documented, legitimate law enforcement purposes and to follow other restrictions required by the State ALPR Coordinator in order to achieve the

New Jersey Supreme Court in State v. Smith, 134 N.J. 599, 616-19 (1994) (establishing the level of individualized suspicion required before an officer may order a passenger to exit a motor vehicle stopped for a traffic violation).

objectives of this Directive. Private entities may provide ALPR data to New Jersey agencies but cannot receive law enforcement-owned ALPR data.

6. Storage, records, and retention

6.1 ***Storage of ALPR data***. All ALPR data shall be stored securely and maintained electronically with access restricted to authorized users. ALPR data shall be the property of the agency and not any ALPR vendor. Agencies may jointly store their ALPR data. Commercially obtained ALPR data shall not be co-mingled with law enforcement data. Data being used in an investigatory process shall be maintained in accordance with the agency's evidence or records management procedures.

6.2 ***Deployment records***. Agencies shall maintain the following information regarding each ALPR owned or operated:

- Date and time deployed
- Portable or fixed
- Identity of operator
- Vendor name
- Date ALPR data connected to Statewide API (for agencies that house ALPR data)

6.3 ***Stored ALPR data access records***. Agencies that store ALPR data shall maintain an automated record-keeping of all access to stored ALPR data (in the case of county storage, the county may keep access records instead), including the following:

- Date and time of access, and for non-alert data, the justification for access
- Authorized accessor name
- Whether an automated software program was used to analyze the data
- Designated supervisor who approved disclosure of personal identifying information based upon crime trend analysis
- Instances of testing or troubleshooting an ALPR system
- Any other information required to be documented under this Directive

6.4 ***Retention***. Records and ALPR data covered by this Section shall be retained for three years.

6.4.1 ALPR stored data shall be purged after the retention period, unless it is associated with an active investigation or pending judicial process, in which case the data should be exported from the relevant storage system and retained in the case file.

6.4.2 Any ALPR data transferred to another agency shall indicate the date on which the data had been collected by the ALPR so that the receiving agency may comply with required retention and purging period.

6.4.3 Records shall be kept in a manner that makes them readily accessible for audit.

7. Discovery

7.1 ***Criminal investigatory records***. Stored ALPR data shall be treated as "criminal investigatory records" within the meaning of N.J.S.A. 47:1A-1 et seq., and shall not be shared with or provided to any person, entity, or government agency other than a law enforcement agency, unless a subpoena or court order authorizes such disclosure or unless such disclosure is required by court rules governing discovery in criminal matters.

7.1.1 Any agency receiving a subpoena or court order for the disclosure of ALPR data shall, before complying with the subpoena or court order, provide notice to the County Prosecutor (or Director of the Division of Criminal Justice (DCJ)).

7.2 ***Release of ALPR data***. If ALPR data is accessed as part of an investigation—including but not limited to a BOLO query, a crime scene query, or crime trend analysis—a record of the access, which may be automated, and corresponding data shall be included in the agency's investigative file (electronic or physical). If the investigation results in criminal charges, the ALPR records shall be turned over in discovery pursuant to applicable court rules and case law.

8. Compliance

8.1 ***Establishing a policy***. Agencies that possess or use an ALPR or its data shall establish—or conform existing—standing operating procedures, directives, or orders that govern ALPRs and stored ALPR data consistent with this Directive before the Directive takes effect (ninety days after issuance). The law enforcement executive shall provide a copy of the agency's ALPR policy to the County Prosecutor (or DCJ Director) and County and State ALPR Coordinator at or before the time of promulgation, including any subsequent policy amendments.

8.2 ***Violations***. Any knowing violation of this Directive or related agency standing operating procedure, directive, or order, or applicable law, shall be subject to discipline.

8.2.1 All significant violations of this Directive or agency policy, including but not limited to unauthorized access or use of ALPR stored data, must be reported to the County Prosecutor (or DCJ Director) and County and State ALPR Coordinator upon discovery. Unless the County Prosecutor or Director elects to conduct or oversee the investigation of the violation, such notification of the violation shall be followed up with a report, approved by the law enforcement executive and with notification to the State ALPR Coordinator, explaining to the County Prosecutor or to the Director, the circumstances of the violation, and the steps that are being taken to prevent future similar violations.

8.2.2 Any complaints about an agency's ALPR program made by any citizen or entity shall be forwarded to the appropriate County Prosecutor (or DCJ Director), for appropriate review and handling, as well as notification to the County and State ALPR Coordinator. The County Prosecutor or Director may conduct an investigation or direct the agency that is the subject of the complaint to conduct an investigation and

report back to the County Prosecutor or Director, with notification to the State ALPR Coordinator.

8.2.3 If the Attorney General or their designee has reason to believe that a law enforcement agency is not complying with or adequately enforcing the provisions of this Directive, the Attorney General may temporarily or permanently suspend or revoke the authority of the department, or any officer or civilian employee, to operate an ALPR, or to gain access to or use ALPR stored data. The Attorney General or designee may initiate disciplinary proceedings and may take such other actions as the Attorney General, in their sole discretion, deems appropriate to ensure compliance with this Directive.

8.3 ***Audits***. By January 31 each year, the Agency ALPR Coordinator shall perform an audit of their agency's ALPR program and provide it to the County and State ALPR Coordinator.[4] That audit shall certify the following:

- Agency has an ALPR policy in place
- Only authorized users have accessed ALPR data
- Date of each authorized user's last ALPR training
- That a random survey of ALPR accesses revealed no misuse
- A description of any known significant violations and citizen complaints and whether they have been forwarded to the County Prosecutor or DCJ Director

The County ALPR Coordinator or State ALPR Coordinator may conduct an audit of an agency's ALPR program at any time.

8.4 ***Public reporting***. By March 31 each year, the State ALPR Coordinator shall publicly report the list of agencies that have completed audits, and the number of significant violations and citizen complaints reported by each agency.

8.5 ***Training***. The State ALPR Coordinator shall design and disseminate training on ALPR technology—including the application of this Directive and privacy and security considerations generally—that shall be a prerequisite for an individual being designated an authorized user under this Directive. Authorized users must complete refresher trainings every two years, as determined by the State ALPR Coordinator.

9. <u>Other provisions</u>

9.1 ***Attorney General exemptions***. ALPRs, and all ALPR stored data, shall only be used and accessed as authorized by this Directive. However, the Attorney General or their designee may authorize the specific use of an ALPR or the data it generates that is not expressly authorized by this Directive. Any request by a department to use an ALPR or ALPR-generated data for a purpose or in a manner not authorized by this Directive shall be made to the Attorney General or their designee through the DCJ Director. Such requests shall be made

[4] Where appropriate, a County Prosecutor may perform an agency's audit in place of the Agency ALPR Coordinator. The State ALPR Coordinator will audit the New Jersey State Police ALPR program.

in writing unless the circumstances are exigent, in which case approval or denial may be given orally and memorialized in writing as soon thereafter as is practicable.

9.2 ***Non-enforceability by third parties***. This Directive is issued pursuant to the Attorney General's authority to ensure the uniform and efficient enforcement of the laws and administration of criminal justice throughout the State. This Directive imposes limitations on law enforcement agencies and officials that may be more restrictive than the limitations imposed under the United States and New Jersey Constitutions, and federal and state statutes and regulations. Nothing in this Directive shall be construed in any way to create any substantive right that may be enforced by any third party.

9.3 ***Severability***. The provisions of this Directive shall be severable. If any phrase, clause, sentence or provision of this Directive is declared by a court of competent jurisdiction to be invalid, the validity of the remainder of the document shall not be affected.

9.4 ***Questions***. Any questions concerning the interpretation or implementation of this Directive shall be addressed to the DCJ Director or their designee.

9.5 ***Effective date***. This Directive shall take effect on January 23, 2023, which is approximately ninety days after issuance. The provisions of this Directive shall remain in force and effect unless and until it is repealed, amended, or superseded by Order of the Attorney General.

9.6 ***Prior directives***. This Directive supersedes any prior directive on this topic, including Law Enforcement Directive 2010-5 and its November 18, 2015 revision.

noah.pack@state.ma.us

Dear Noah,

Thank you for providing BCM Controls with the opportunity to support you and your Security Systems. BCM's industry-leading services are designed to keep your system in top operating condition as well as to provide a level of engagement aimed at helping to prepare you for the needs of today and those into the future. Our service program consists of various features and benefits, as illustrated in this proposal.

Pricing assumes that the agreement will be in place before 07/01/2023 and that the agreement will remain in place from 07/01/2023 through 09/30/2024.

We value your business.

Sincerely,

Matt Boschetto

Sustainment Services

Product Details

Subscription Services

Subscription Services are another emerging service area that will enable BCM's clients to subscribe to software-based offerings in lieu of purchasing them outright.

Subscription Services will be predicated on monthly, quarterly, semi-annual or annual billing, allowing clients to opt-out of individual services when they are no longer needed or relevant.

Included

Per your request, the following Subscription Service plans will align with a September 30th 2024 expiration. These services will need to be renewed annually at the aligned expiration date.

Sierra Wireless - AirLink Basic Remote Device Management

The proposed Subscription Services Plan provides services listed below:

Detailed Description:

10 - *AirLink Basic Remote Device Management (July 1, 2023 to Sept 30, 2024)*

123 - *AirLink Basic Remote Device Management (Oct 1, 2023 to Sept 30, 2024)*

1 - *AirLink Basic Remote Device Management (Nov 1, 2023 to Sept 30, 2024)*

5 - *AirLink Basic Remote Device Management (May 1, 2024 to Sept 30, 2024)*

AO MA ITC71 - Terms & Conditions

ITC-71

All provisions of the Service Agreement are governed and in compliance with the Commonwealth of Massachusetts procurement contract ITC71.

Exclusions

The following are excluded from this Agreement. Any materials or services provided by BCM Controls due to the following will be invoiced separately on a Time and Material basis with payment due Net 30 days.

- Improper Operation - Repairs due to improper or incorrect operation procedures by the Customer or others, negligent maintenance by the Customer or others, misuse or excessive wear and tear of System equipment and relocation of System equipment by Customer or others.
- Modifications. This Agreement covers the System as installed under the manufacturer's guidelines and specifications for the intended use of the product. Modifications to the System to rectify improper installations by vendors other than BCM Controls are not included under the Agreement.
- Consumable Goods. Tags, Cards, r bbons, paper, supplies and other consumable goods.
- Governmental Requirements. System design changes required in order to comply with governmental authorities, Fire Marshal, etc.
- Existing Defects. Any deficiencies in or damages to the System caused solely by Massachusetts State Police found during the first complete inspection by BCM Controls . BCM Controls will offer a quotation to repair or replace such items.
- Obsolete and Unrepairable Materials. Materials no longer manufactured or repairable at a reasonable cost will not be maintained. Non-repairable items will be quoted to be replaced.
- Bucket Trucks and/or lifts, if required, are the owners responsibility unless specified in the agreement. If BCM is to provide, the costs will be billed to the customer.
- Other Exclusions. Software; repairs or replacements due to vandalism, flooding, fire, lightning, power failure or surges, brownouts, acts of God or similar phenomenon, or any other cause beyond the control of BCM Control.

Work Hours / Time and Material Rates

This agreement is inclusive of labor as applicable by the terms and conditions set forth. Non-covered services during "Normal Business Hours" and/or "Non-Business Hours", as applicable, will be billed at labor rates listed below.

Work Hours are defined as follows:
Normal Business Hours: 8:00AM - 5:00PM Monday - Friday, Excluding Holidays
Non- Business Hours: 5:00PM - 8:00AM Monday - Friday, Weekends and Holidays

Labor Rate Schedule for work that is not included in this agreement are as follows**:

$148/hr: Technician - Hourly during Business Hours
$211/hr: Technician - Hourly during Non-Business Hours
$179/hr: Remote Services - Hourly during Business Hours
$255/hr: Remote Services - Hourly during Non-Business Hours
$184/hr: Engineering / Programming - Hourly during Business Hours
$259/hr: Engineering / Programming - Hourly during Non-Business Hours

**Labor Rate Schedule is as per ITC71.

Communications Equipment and Services

Customer acknowledges that signals are transmitted over an internet connection, regular phone lines or network service, and that such telephone or network service is the sole responsibility of the customer, and that in the event internet connection, telephone or network services is out of order, disconnected, or otherwise interrupted, circumvented or compromised, signals will not be received by the system during the interruption and the interruption will not be known to BCM Controls. You will immediately report (i) problems with the communications equipment or communications services to the communications provider; and (ii) problems with the System to BCM Controls for repair service. You will pay all charges for communications equipment and communications services, including any charges for the installation, modification or repair of such communications equipment and communications services.

Increase in Charges

Any equipment additions may result in additional costs to the service agreement. BCM Controls will add the charges for the additional equipment on the anniversary of the contract. All service costs from completion of the installation until the anniversary will be included in the project costs.

BCM Controls Corporation

AO MA ITC71 - Terms & Conditions

Default

If you default under this Agreement, BCM Controls will provide written notice. If default is not cured within thirty (30) business days of notice, BCM Controls shall be entitled to retain all prepayments received and you shall immediately pay BCM Controls all payments then due and payable through the end of the service year and, BCM Controls shall have no further obligation to perform under this Agreement, upon your default. BCM Controls purchases software support agreements and warranties on an annual basis, requiring the customer to complete the year.

Binding Agreement

This Agreement only becomes binding upon BCM Controls when signed by BCM Controls' authorized representative or upon the commencement of any of the Services. This Agreement is binding on the parties' heirs, executors, administrators, successors and permitted assigns.

Assignment

This agreement and its benefits are not assignable by either party except upon the prior written consent of the other party. Customer acknowledges that this Agreement and particularly those paragraphs relating to BCM Controls' maximum liability and indemnification, inure to the benefit of, and are applicable to any assignees or subcontractors of BCM Controls and/or its affiliates.

Delays in Service

You acknowledge that there may be interruptions of service or delays in performing the services. BCM Controls' sole obligation after receiving a service request from you will be assigned to a team member within a reasonable time period once the team member becomes available, during normal business hours excluding Saturdays, Sundays and holidays.

Remote Services

The remote services group is your greatest asset. BCM Controls built the group to deliver speed of service, continuity and not to roll vehicles, all saving costs. To that end, BCM Controls will need remote access to the onsite equipment. BCM Controls may add software to existing servers or those provided during the install. If the customer does not allow access the costs of service may escalate. Customer's IT staff will be an integral part of the solution and will be required to maintain connectivity for the BCM Controls remote team.

Limited Warranty

BCM Controls warrants to you alone only that equipment we are obligated to install, is installed in a good and workmanlike manner. If any part, becomes defective within 90 days of the installation, BCM Controls shall repair or replace the defective part without charge to you. If you select the warranty period specified, BCM Controls shall repair or replace the defective part without charge to you, for the term of the agreement. System defects must be identified in writing and emailed to the service department at BCM Controls so that immediate corrective action may be taken. This warranty does not cover damage to equipment to equipment caused by accident, vandalism, customer negligence, flood, water, lightning, fire intrusion, abuse, misuse, terrorism, acts of God, any casualty including electrical charges, attempted unauthorized repair service, modification or improper installation by anyone other than BCM Controls, or any causes other than wear and tear.

Valid Agreement

Should any provision hereof (or portion thereof), or its application to any circumstances, be held illegal, invalid or unenforceable to any extent, the validity and enforceability of the remainder of the provision and this Agreement, or of such provisions as applied to any other circumstances, shall not be affected thereby, and shall remain in full force and effect as valid, binding and continuing.

Modifications

All changes or amendments to this Agreement must be in writing and signed by all parties to be binding on the parties.

Additional Equipment or Service

If, at any time after the date hereof, you request or authorize additional equipment or services, all sales, installation and services supplied by BCM Controls shall be subject to the terms of this Agreement only, except that additional charges shall be made for such additional sales, installation or services.

Functional Obsolescence

Materials no longer manufactured or repairable at a reasonable cost will not be maintained. Non-repairable items will be replaced and invoiced additionally with the customer's approval.

BCM Controls Corporation

AO MA ITC71 - Terms & Conditions

Right to Notice and Cure

Either party may terminate this agreement at any time for breach of any material term or condition by the other party, provided however, non-breaching party must provide the other party with five (5) business days written notice of the existence of an allegation with a detailed description of such breach. In the event such breach is not cured to the reasonable satisfaction of the non-breaching party, the non-breaching party shall have the right to terminate this Agreement at the end of that cure period with a written notice to the breaching party specifying the effective date of termination.

Right to Terminate

Notwithstanding anything set forth in this Agreement to the contrary, either party may terminate this Agreement, without cause and without any liability whatsoever, upon sixty (60) days' written notice.

Jurisdiction and Arbitration

Both parties to this agreement will be governed by the laws of the Commonwealth of Massachusetts and heard in the Massachusetts court system. Further both parties agreed to seek arbitration in the event of disagreement and will follow the American Arbitration guidelines. Each party will be respons ble for their own legal fees.

Electronic Media

A copy of this Agreement and signatures transmitted and delivered by facsimile or e-mail shall be deemed to be originals for all purposes. We may scan or otherwise convert this Agreement into an electronic and/or digital media file and a copy of this Agreement or the electronic Data file produced from any such electronic or digital media format may serve and be given the same legal force and effect as the original.

Insurance

BCM Control shall, at its own expense, for the duration of this Agreement and for two (2) years after the end of the Agreement, maintain policies of commercial general liability insurance including but not limited to product liability insurance and where appropriate professional liability insurance in an amount of at least One Million and 00/100 Dollars ($1,000,000.00) per occurrence and Three Million and 00/100 Dollars ($3,000,000.00) annual aggregate respectively to insure it, its employees, and its agents against all claims and liabilities arising out of or related to this Agreement. BCM Control liability aggregates can be satisfied by umbrella or excess liability policies.

Exclusion

Neither BCM Controls nor any BCM Controls subcontractor that provides Services under this Agreement has been excluded, suspended, debarred, or otherwise sanctioned from participation in any federal or state healthcare program, or has been convicted or found to have violated any federal or state fraud and abuse or illegal remuneration law. In the event that during the term of this Agreement, BCM Control or any of its agents are so excluded, suspended, debarred, or sanctioned or are convicted or found to have violated any federal or state fraud and abuse or illegal remuneration law, BCM Control shall promptly notify Customer of such event.

Indemnification

BCM Controls agrees to indemnify and hold armless Customer and Customer's directors, officers, agents and employees from and against all liabilities, losses , claims, suits, damages, cause of action, judgements or settlements of any kind or nature (including reasonable attorney's fees) asserted against Customer as a result of, arising out of, or relating to the acts or omissions of BCM Controls or its Directors, officers, employees, agents, contractors, or subcontractors committed directly or indirectly in the performance of this Agreement including, without limitation, any penalties and costs associated with fraudulent or illegal activities by BCM Controls. Customer agrees to indemnify and hold harmless the BCM Controls and BCM Controls' directors, officers, agents and employees from and against all liabilities, losses, claims, suits, damages, causes of action, judgments or settlements of any kind or nature (including reasonable attorney's fees) asserted against BCM Controls as a result of, arising out of, or relating to the acts or omission of Customer or its Directors, officers, employees, agents, contractors or subcontractors committed directly or indirectly in the performance of this Agreement including, without limitation, any penalties and costs associated with fraudulent or illegal activities by Customer.

			The Office of Professional Integrity and Accountability investigates allegations	

1561 ADM-15 Internal Affairs Investigations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	of serious misconduct by employees of the Department or as ordered by the Office of the Superintendent or the Division of Standards and Training. The Office of Professional Integrity and Accountability also conducts Staff Inspections as outlined in ADM-09A.	1/22/2021
ADM-16 Notifying Prosecuting Agencies Regarding Evidence	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	Prosecuting agencies shall be notified of any and all Departmental investigations, to include personnel and/or internal affairs investigations, that are associated with an open criminal prosecution or investigation. Department employees who generate records, percipient witness statements, and/or evidence that relate to a criminal prosecution shall and must notify the appropriate agency prosecuting the case. The assigned lead Departmental investigator in any criminal or administrative investigation is responsible for ensuring such notification is made.	5/4/2018
ADM-17 Employee Evaluation System	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	The Department shall continuously maintain an Employee Evaluation System (EES) to establish and measure performance expectations for sworn members. The EES shall be conducted in accordance with the Department's EES Manual.	6/25/2008

562 ADM-18 Unlawful Harassment Sexual Harassment and Discrimination	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	The Department shall promote and maintain a working environment free from unlawful harassment, sexual harassment and discrimination.	8/1/2017
ADM-19 Vehicle Management	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	To establish a central management system for all vehicles owned or controlled by the Department in order to maintain a state of operational readiness.	1/22/2021
ADM-19A Vehicle Use and Maintenance	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	Department vehicles shall be maintained in a safe, clean and serviceable condition for reasons of safety, operational readiness, and to enhance the Department's public image. For the purposes of this policy only, members shall include sworn and civilian employees of the Department. Members assigned vehicles belonging to other authorities or governmental agencies, shall adhere to the vehicle use and maintenance policies of those particular authorities/agencies.	1/22/2021
ADM-19B Automated Vehicle Locater (AVL) Technology	Policy & Procedure / Rules & Regulations / Policy & Procedure	5/16/2023	The purpose of this policy is to establish guidelines and procedures for the use of the Department's Automated Vehicle Locator (AVL) Technology. AVL is designed to increase officer accountability and safety by enhancing the ability to rapidly locate and deploy Department personnel and resources. AVL	5/2/2018

563	Documents		technology also improves coordination and resource management during tactical situations, assists in improving response times to radio calls and increases situational awareness for all employees.	
ADM-20 Weapons Management	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	The Armorer shall provide oversight for the control and operational readiness of all Department weapons and ammunition, from acquisition to final disposition. Members shall continually inspect all weapons and ammunition issued to them or under their control, to ensure cleanliness and operational readiness.	8/1/2017
ADM-21 Communications	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Department shall maintain an effective and efficient communications system to aid in the performance of its public safety mission. The Department shall ensure continuous communication accessibility through a mission-critical, multi-channel radio system capable of two-way operation on joint public safety frequencies. Dispatchers, Desk Officers and Troop Duty Officers shall use available technologies, including radio and Automated Vehicle Locator (AVL) to identify members potentially available for service and to maintain communication with	1/22/2021

			members. The Department shall comply with all Federal Communications Commission (FCC) procedures and requirements.	
ADM-22 Court Attendance and Fees	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	Department employees shall comply with all court orders and summons. Employees shall be compensated for court attendance according to their applicable collective bargaining agreements.	4/23/2009
ADM-24 Department Radio Call Signs	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	The Department shall promote officer safety and efficiency using a standardized Radio Call Sign procedure. Standardized Radio Call Signs, as referenced within this General Order, shall be used by all employees for all radio transmissions.	1/22/2021
ADM-25 Paid Details and Overtime	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	2/21/2023	The Department may allow personnel, on full duty status or alternative duty status (as specified in ADM-11C Maternity Leave and Guidelines), to work paid details. The Department recognizes the importance of maintaining safe and efficient traffic flow at roadway work sites and special events. The Department also recognizes that at major sporting, civic, special events, and other times, members may be required to provide crowd control and/or security.	6/14/2018
	Policy & Procedure /		To establish and define	

ADM-26 Military Service	Rules & Regulations / Policy & Procedure Documents	5/12/2023	military service protocols for Department of State Police personnel.	6/25/2020
ADM-27 Transfers	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	12/5/2022	In order to maintain and enhance the operational functions of the Department, transfers may be made to: • Ensure adequate staffing levels; • Provide efficient public safety services; and • Meet other goals and objectives of the Department.	5/21/2018
ADM-28 Department Motor Vehicles	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	State owned vehicles shall be operated for official use only and in accordance with Policy and Procedure ADM-19 Vehicle Management and ADM-19A Vehicle Use and Maintenance.	3/1/2016
ADM-29 Workplace Violence	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Department shall maintain zero tolerance for workplace violence and ensure the workplace environment remains free from any form of violence. This policy does not apply to situations where members are exposed to threats or violent acts from persons in their care or custody, or the public at large, as an unavoidable component of the lawful performance of their law enforcement duties.	4/23/2009
			The Department shall conduct an Annual Fixed Asset Inventory. The Department shall: • Record and report Governmental Generally Accepted Accounting Principles (GAAP) Fixed Assets	

566 ADM-30 Asset Management	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	of $50,000 or more within the Massachusetts Management Accounting and Reporting System (MMARS) twice per year pursuant to State Comptroller policy; • Maintain an automated Asset Management System that reflects all NonGAAP Fixed Assets with a useful life of one (1) year or more and a cost between $1,000 -$49,999; and • Maintain inventories of other assets in accordance with State Comptroller policy and as determined by the Division of Administrative Services.	6/14/2018
ADM-34 Information Technology Resources	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	The Department shall regulate the use of Information Technology Resources (ITR), including computers, printers and other peripherals, programs, data, local and wide area networks, and use of the internet. ITR communications including email messages are considered public records, copies of which may be requested by the public.	4/23/2009
	Policy &		The personal use of social media can have bearing on departmental personnel in their official capacity. As such, this policy provides information of a precautionary nature as well as prohibitions on the use of social media by Department of	

567 ADM-34A Social Media Networking	Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	State Police Employees. When using social media/networking, Department Employees (sworn and civilian) should be mindful that their speech becomes part of the worldwide electronic domain. Department Employees should also be mindful to treat Department of State Police business as confidential per Rules and Regulations Article 5.	6/17/2013
ADM-35 Body-Worn and Cruiser-Mounted Cameras	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021		3/2/2021
ADM-36 Diversity and Equal Opportunity	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	The Department prohibits discrimination in employment on the basis of race, color, religious creed, national origin, ancestry, gender, sexual orientation, Vietnam Era Veteran status, age, and disability.	11/5/2008
ADM-41 Telephone Use	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The use of Department telephones should be limited to conducting official business and their use is subject to audit and review by the Department. Telephone communication shall be conducted in a professional manner providing information and assistance to callers as appropriate. Department members, including sworn and civilian members, shall adhere to all Massachusetts General Laws and MSP policy	1/22/2021

568			while utilizing cellular phones.	
ADM-46 Sexual Activity in Public Places	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Commonwealth of Massachusetts has a legitimate enforcement interest in ensuring that sexual activity and/or genital exposures do not occur in public places, where the likelihood of being observed by a casual passerby is reasonably foreseeable. Disparate enforcement of applicable statutes against any particular group and/or disparate treatment of any group is unacceptable.	4/23/2009
ADM-47 Bias-Based Policing	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	Except in "suspect specific incidents", members are prohibited from considering the race, national origin, ethnicity, sexual orientation/identity, socio-economic status, religion, immigration status, and/or age, gender identity or expression, cultural group, or disability, of members of the public in deciding to detain a person or stop a motor vehicle and in deciding upon the scope or substance of any law enforcement action. Bias practices are unfair, ineffective, promote mistrust, and perpetuate negative and harmful stereotypes. The Department is committed to bias-free policing.	1/7/2020

Article 9 - Regulations Establishing Examination Appeal	Policy & Procedure / Rules & Regulations / Rules & Regulations	11/5/2021		1/31/2001
DET-01 Warrant Management	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	Department members shall utilize established warrant management systems in accordance with federal and state laws and regulations and the contents of this policy.	1/22/2021
DET-01A Warrants, Summons, or Subpoenas	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	In furtherance of a legitimate law enforcement purpose, members shall serve warrants, summons, or subpoenas once they become aware of their existence, or as otherwise ordered.	1/22/2021
DET-02 Custodial Inventory	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	*To protect members and detainees from harmful items or substances that may have been concealed by the subject; *To protect members from claims of lost, stolen, or damaged property; and *To establish and define the processing of detainees who come under the care and custody of the Department.	1/22/2021
			Safety is the paramount	

1571 DET-03 Detainee Transportation	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	concern when transporting detainees. Members shall always keep in mind: *The safety and well-being of themselves and others; *The proper restraint of the detainee to prevent escape or injuries; and *The detainee's safety and rights.	1/22/2021
DET-04 Holding Facility and Design	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	The Department shall maintain holding facilities that comply with applicable laws and regulations, in order to provide a safe environment for members and detainees.	1/22/2021
DET-05 Identification of Persons in Department Custody	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/4/2021	All persons in Department custody must be properly identified prior to release. Fingerprints offer the most reliable means of individual identification. The submission and retention of fingerprint records and other biometrics create a reliable criminal history record. Therefore, all persons arrested shall be fingerprinted and photographed. In addition, all persons charged with a felony shall have their palmprints recorded if recording equipment is available. Persons taken into department custody for non-criminal reasons may be fingerprinted and photographed or may be identified through other means.	1/22/2021
			The safety and well-being of members and	

1572 DET-06 Detainee Monitoring	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	detainees is the Department's paramount concern and shall guide the application of this policy. Continuous supervision is essential for maintaining and ensuring the safety and welfare of both detainees in custody and the members responsible for monitoring them. To ensure the safety of all, necessary precautions shall be taken whenever a person is taken into custody.	1/22/2021
DET-07 Detainee Sexual Abuse and Sexual Harassment	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	In accordance with the Prison Rape Elimination Act (PREA) of 2003, the Department shall: * Establish a zero tolerance policy toward all forms of sexual abuse and sexual harassment towards any detainee; *Ensure that all detainees have the right to be free from sexual abuse and sexual harassment; and *Establish a zero tolerance policy toward all forms of retaliation against anyone who reports sexual abuse and sexual harassment or who cooperates in a sexual abuse investigation. This policy shall be made available through the Department's website and upon request.	1/29/2021
			As the investigative agency for alleged sexual crimes committed on adults and juveniles held in a confinement setting by	

1573 DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review, and Data Collection	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	either the Department of Correction or Department of Youth Services, the Department of State Police shall ensure full compliance with the standards found within federal laws and mandates regarding the Prison Rape Elimination Act (2003). This policy shall be made available through the Department's website and upon request.	1/22/2021
DET-08 Gender Identity and Expression	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	The Department strives to ensure that everyone it serves is treated with dignity, respect, and professionalism. Department employees shall not engage in conduct that denigrates or shows hostility toward an individual because of their gender identity or gender expression.	2/4/2021
DET-09 Juvenile Operations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	12/1/2021	The Department shall ensure protection of Constitutional rights and compliance with Federal and Massachusetts laws and regulations regarding the detention of juveniles. Steps should be taken to determine if juveniles in custody of the Department are alleged to have been harmed or to be in danger of harm. Members shall adhere to mandated reporting requirements pursuant to SOC-07C.	1/22/2021
	Policy &		The Massachusetts State Police shall comply with the	

DET-10 Protective Custody	Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	requirements of Massachusetts General Law Chapter 111B and Massachusetts General Law Chapter 111E when taking an incapacitated person into protective custody.	1/22/2021
GEN-01 Personal Appearance	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	As the principal law enforcement agency within the Commonwealth of Massachusetts, members shall present an image of the highest standard, order, and professionalism to the public. Members shall correct any deficiencies in their personal appearance, uniform, or equipment as soon as practicable, unless otherwise specified in this Order.	9/3/2019
GEN-01A Tattoos and Body Modifications	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	Pursuant to GEN-01 Personal Appearance, members shall present an image of the highest standard, order, and professionalism to the public. Members of the Department shall maintain their personal appearance to the highest standards possible and in conformance with GEN-01 Personal Appearance.	6/22/2020
GEN-02 Uniforms	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	Members of the Department shall maintain their personal appearance and uniforms to the highest standards possible.	1/25/2018
GEN-04 Military Courtesy	Policy & Procedure / Rules & Regulations	7/8/2022	The Department has been a paramilitary organization since its inception; the application of military	4/23/2009

1575	/ Policy & Procedure Documents		courtesies shall continue to maintain this tradition.	
GEN-04A Ceremonial Tributes	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The protocols identified within this policy shall be adhered to during ceremonial tributes in honoring Department members or when attending tributes with other agencies.	6/17/2013
GEN-05 Communicable Diseases	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Department shall provide its employees with equipment and information on communicable diseases to prevent exposure to dangerous and life-threatening diseases.	11/5/2008
GEN-06 Drug Testing	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	In order to ensure public safety and promote public trust, it is the policy of the Department to maintain a drug-free work environment.	11/5/2008
GEN-07 Automatic External Defibrillators	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	The Department maintains Automatic External Defibrillators (AED) to help save lives. Only Department members trained in the use of AED's may operate them.	4/23/2009
GEN-08 Ride Along_Observer	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	The Department may allow approved ride-along/observers to accompany onduty members for educational purposes.	11/5/2008
INV-01 Criminal Investigations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	Investigations shall be conducted on all matters of a criminal nature that fall within the jurisdiction of the Department.	1/22/2021
			Case management is an ongoing process	

1576 INV-01A Case Management	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	involving all members of the Department. Proper case management facilitates the scope and direction of an investigation, in addition to providing documentation for the Department and court proceedings.	1/22/2021
INV-02 Confidential Informants	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Department shall develop and use confidential informants, as well as other sources of information, as a means to detect, investigate, and prosecute violators of state and federal law.	6/14/2018
INV-02A Confidential Funds	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	Confidential funds may be used to further investigations, and shall be carefully monitored and supervised.	4/23/2009
INV-03 Prescription Monitoring Program	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	The purpose of the Prescription Monitoring Program is to assist health care providers and investigative agencies in addressing drug diversion and the misuse and abuse of pharmaceutical controlled substances.	5/21/2018
INV-05 Special Protections for Juveniles	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	Courts recognize the vulnerability of children. The Department shall ensure that juveniles are afforded special protections during interrogations.	7/12/2018
INV-07 Non-Published Telephone Numbers	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/12/2023	Telephone company records shall only be obtained when necessary for the furtherance of a criminal investigation or in an emergency.	5/21/2018

1577 INV-08 Criminal Intelligence	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/2/2021	The Department shall share criminal intelligence among the criminal justice community in an effort to prevent and control crime, while protecting the privacy and constitutional rights of individuals.	5/21/2018
INV-09 Polygraph Examinations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	he polygraph is a reliable investigative tool when used by a professional examiner. The Department shall use the polygraph with great selectivity, and then, only as an investigative tool.	1/22/2021
INV-10 Evidence Collection and Preservation	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Department shall ensure that evidence is properly recognized, documented, collected, packaged, and stored; and shall ensure that a chain of custody is established for evidence recovered at every crime scene.	1/22/2021
INV-11 Controlled Substance Intake-Storage	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Department shall establish rigid controls for all controlled substances held within its custody to preserve the integrity of the Department and its personnel. Through the assignment of responsibilities, processing procedures, storage requirements and continuous inspections, all levels of command shall ensure strict compliance with established controls and this policy.	5/10/2012
			The Department shall establish procedures for all evidentiary, found, seized, recovered, impounded, abandoned,	

INV-11A Evidence/Contraband/Property Intake-Storage	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	or unclaimed property including contraband held within its custody to preserve the integrity of the Department and its personnel. A written report shall document the circumstances by which said property came into the Department's possession and detail each item of property. All levels of supervision shall ensure compliance with established procedures within this policy regarding processing, storage requirements, and inspection.	1/22/2021
INV-13 Asset Forfeiture	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Department shall adhere to state and federal forfeiture laws involving illegal activities.	4/23/2009
INV-14 Seized Currency	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Department shall establish rigid controls and strict accountability for all seized currency coming into its custody. A non-interest bearing cashless system shall be utilized to ensure that all seized currency is properly accounted for, secured, stored, and readily retrievable. Any changes in the custody of any seized currency shall be appropriately documented.	1/29/2021
INV-15 Field Interview and Observation Reports	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/2/2021	Members shall follow the established guidelines for the collection, security, and dissemination of information gathered through field interviews and observations.	4/23/2009

579 INV-16 Electronic Recording of Interrogations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	Members shall, whenever it is practical, electronically record all custodial interrogations of suspects or interrogations of suspects conducted in places of detention.	4/23/2009
INV-16A Eyewitness Identification	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	Eyewitness identification frequently plays an important role in Department investigations and it is absolutely critical that eyewitness evidence be accurate and reliable in order to ensure that the highest possible quality of evidence is obtained. The Department recognizes the importance of conducting and documenting eyewitness identification information in accordance with established guidelines, while recognizing that members are free to exercise discretion in adapting these guidelines to fit the unique circumstances of each case.	1/22/2021
INV-17 Travel-Immigration Status Inquiries and Investigations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	Investigating and enforcing violations of federal immigration law is not a mission of the Massachusetts State Police. Accordingly, it is not appropriate for a member of the State Police to inquire about a non-citizen's immigration or travel status for the sole purpose of facilitating that person's detention or deportation by U.S. Immigration & Customs Enforcement	8/1/2017

580			(ICE).	
INV-18 Mobile Identification Device Use	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	This policy provides guidelines for the issuance, training, and use of Mobile Identification Devices. Authorized and trained Members may access the Department's Automated Fingerprint Identification System and the Next Generation Identification system by the State Identification Section (SIS) for the use of Mobile Identification Devices to assist in the identification of individuals under appropriate circumstances and to provide for additional officer safety and situational awareness.	1/22/2021
INV-19 Use of Facial Recognition Technology	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	12/1/2021		12/1/2021
INV-20 Covert Audio Recordings	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	6/29/2023		6/29/2023
Policy Index 06-05-2023	Policy & Procedure / Rules & Regulations / Policy Index	6/5/2023		3/2/2021
SOC-01 Hazardous Materials	Policy & Procedure / Rules & Regulations	5/15/2023	Department personnel, unless properly equipped and trained, shall not be deployed into areas that have	6/28/2019

1581	/ Policy & Procedure Documents		been contaminated, or face an immediate and substantial threat of contamination with a hazardous material.	
SOC-02 Bomb Threats / Explosive Incidents	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	To establish and define the role of the Bomb Squad within the Division of Investigative Services-Fire and Explosion Investigation Unit (FEIU), and to establish guidelines for utilization and activation of their members.	6/28/2019
SOC-03 Emergency Planning	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	To maintain and ensure the Department's compliance with Homeland Security Presidential Directive 8 (HSPD-8) with regards to emergency planning.	3/25/2020
SOC-03A Emergency Operations Center (EOC)	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/2/2021	To provide guidance to personnel regarding the activation and operation of the Department's Emergency Operations Center (EOC).	3/25/2020
SOC-03B Response to Emergency Situations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	To provide guidance for the Department's response efforts to public safety emergencies.	3/25/2020
SOC-03C Response to Civil Disturbances	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	To provide guidance for the Department's response to civil disturbances.	3/25/2020
			The Department recognizes the Incident Command System (ICS) as a valid incident management system for use at the scenes of all	

1582 SOC-03D All Hazards Incident Command Framework	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	emergency incidents. Regardless of the size or complexity of an incident, emergency responders must employ good management techniques to ensure an effective response and an efficient, safe use of resources. ICS helps emergency responders accomplish these goals. While ICS is normally associated with responses to emergency incidents, the Department further recognizes that ICS can be applied to a wide variety of incidents requiring Department response.	3/25/2020
SOC-03E Emergency and Continuity Plan Requirements	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	In accordance with SOC-03 Emergency Planning, and SOC-03D All Hazards ICS Framework, the Department shall maintain written plans for responding to critical incidents including, but not limited to natural and man-made disasters, pandemics, civil disturbances, mass arrests, bomb threats, hostage/barricaded person situations, acts of terrorism, and other unusual incidents. These plans will follow standard Incident Command System (ICS) protocols and National Incident Management System (NIMS) which include functional provisions for: Command, Operations, Planning, Logistics and	1/29/2021

583			Finance/Administration.	
SOC-04 Lost / Missing Person Searches	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	Every incident involving a lost and/or missing person shall be treated as a potential emergency event that may require a rapid and coordinated response of specialized personnel and equipment. Members should understand that every lost and/or missing person incident has the potential of being or becoming a criminal investigation; members shall treat the scene of each incident as a potential crime scene. If the missing person is identified as a child age seventeen (17) or younger and there is evidence of abduction, the Amber Alert Coordinator shall be notified.	1/22/2021
SOC-04A AMBER Alert Activation	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Department shall initiate an AMBER Alert for cases of child abduction, where the child's life is in imminent danger of seriously bodily harm or death, and specific criteria supporting the AMBER Alert Activation have been met.	12/21/2020
SOC-05 Special Considerations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	In accordance with international, federal, and state laws, the following are entitled to special considerations and/or immunities: *Diplomatic and consular officers; *Foreign Nationals; *Individuals requesting political asylum; *Military personnel;	6/22/2014

1584			and *Elected officials.	
SOC-06 Administration of Naloxone Hydrochloride (Narcan)	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	This policy shall establish protocol for Department members, in order to reduce life-threatening emergency of fatal opioid overdose, where medical professionals are not readily available, by administering naloxone hydrochloride. Department members shall assist any person who may be suffering from an opioid overdose. Department members trained in accordance with this policy shall make every reasonable effort, to include the use of naloxone combined with First Responder Training, to revive the victim of any apparent drug overdose.	7/29/2014
SOC-07 Domestic Abuse	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Department shall adhere to the Massachusetts Domestic Violence Law Enforcement Guidelines 2001.	4/23/2009
SOC-07A Domestic Abuse Arrest / Investigations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	The Department shall respond and investigate allegations of domestic abuse while ensuring the rights and safety of all those involved.	4/23/2009
SOC-07B Domestic Abuse Involving Members	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Department shall ensure that all reports of alleged domestic abuse by members are thoroughly investigated. The Department shall respond and investigate allegations of domestic abuse while ensuring	6/17/2013

585			the rights and safety of all those involved.	
SOC-07C Abuse of Children / Disabled / Elderly	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Department shall investigate all allegations regarding the abuse of children, the disabled, and the elderly, to ensure the safety and rights of all those involved.	7/22/2014
SOC-08 Missing-Abandoned-Runaway Children	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Department shall thoroughly investigate all reports of missing children. Every child reported missing to the Department will be considered at risk until significant information to the contrary is confirmed. Incidents involving missing, abandoned and/or a runaway child shall be treated as a potential emergency event that may require a rapid and coordinated response of specialized personnel and equipment. Every lost and/or missing child incident has the potential of being or becoming a criminal investigation; members shall treat the scene of each incident as a potential crime scene.	1/22/2021
SOC-09 Terrorism / WMD Incidents	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The preservation of life and the prevention of injury shall be recognized as high priorities in responding to terrorist incidents, including those involving Weapons of Mass Destruction.	6/28/2019
SOC-10 Clandestine Drug Laboratory Response	Policy & Procedure / Rules & Regulations / Policy &	7/8/2022	To define the role of the Clandestine Laboratory Enforcement Team (CLET) and establish guidelines for the utilization and	6/28/2019

1586	Procedure Documents		activation of team members.	
SUP-01 Jurisdiction_Mutual Aid	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	To define the role of the Clandestine Laboratory Enforcement Team (CLET) and establish guidelines for the utilization and activation of team members.	4/23/2009
SUP-03 Media Relations	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	The Department shall provide the media and the public with information on Department operations and administration, ensuring that individual rights are protected.	4/23/2009
SUP-04 Employee Assistance Unit	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	11/5/2021	The Department has a responsibility to ensure the safety of our employees and to contribute to their psychological and physical well-being. The Department shall offer to employees and their families, professional assistance, training, peer counseling, and professional referrals.	7/11/2011
SUP-04A Critical Incident Stress Management Team	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	2/17/2023		2/17/2023
SUP-05 State Police Chaplain Corps	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/15/2023	The Department has a responsibility to ensure the safety of our employees and to contribute to their psychological and physical well-being. The Department shall offer to employees and their families, professional assistance, training, peer	4/10/2019

1587			counseling, and professional referrals.	
SUP-06 Binding Written Agreements	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	All Memorandum of Understandings, Mutual Aid Agreements, or any other type of binding written agreements (collectively referred to as "MOUs") between the Department and outside organizations, including any state or federal agency, shall only be authorized and signed by the Colonel/Superintendent.	4/23/2009
SUP-12 Office of The Ombudsman	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	7/8/2022	The Ombudsman Program provides a confidential, neutral, and informal process to help resolve work-related issues. It is a dispute resolution system that offers employees formal and informal options for addressing work-related problems and concerns. Although the program is an alternative channel of communication, it is designed to complement, not replace or circumvent the Department's formal resolution options.	7/11/2011
TOP-01 Special Operations Command and Control	Policy & Procedure / Rules & Regulations / Policy & Procedure Documents	5/16/2023	The Ombudsman Program provides a confidential, neutral, and informal process to help resolve work-related issues. Subject:	
Oath of Office	

Policy

All sworn members of the Department of State Police shall take and affirm an Oath of Office prior to the initial performance of duties.

Oath of Office

I do solemnly swear that I will bear true faith and allegiance to the Commonwealth of Massachusetts, and will support the Constitution thereof, so help me God.

I do solemnly swear and affirm that I will faithfully and impartially discharge and perform all the duties incumbent on me as a Massachusetts State Police Trooper: according to the best of my abilities and understanding, agreeably, to the rules and regulations of the Constitution, and the laws of this Commonwealth, so help me God.

I do solemnly swear that I will support the Constitution of the United States.

Department Mission Statement

Mission

As the principal state-wide law enforcement agency in the Commonwealth, the Massachusetts State Police, in partnership with local communities, shall provide for the public safety by providing quality policing directed at achieving safer roadways and reducing crime through investigations, education and patrol services, and by providing leadership and resources during natural disasters, civil disorders and critical incidents.

Policy

The Department of State Police, in cooperation with the Executive, Legislative, and Judicial branches of government, shall ensure that justice in a free society is perpetually prevalent.

Organizational Values

The value statements of the Massachusetts State Police are:

- Maintenance of the highest standard of integrity and ethics;
- Excellence and teamwork in the performance of duty;
- Protection of Constitutional Rights;
- Problem solving for continuous improvement;
- Continuous planning for the future; and
- Performing public service and law enforcement tasks so as to provide leadership to the police profession.

Subject:

State Police Authority

Policy

Within the Commonwealth, sworn members shall exercise all the powers of police officers as authorized by law and exercise professional discretion when appropriate.

Limits of Authority

No member may be used or called upon for service at any industrial dispute unless actual violence has occurred therein, and then only by written order of the Governor.

Members shall not exercise police powers on a reservation or other property of the United States of America unless requested by the person in charge of the reservation or property.

No member shall serve civil process.

Discretion

When Rules and Regulations, Policy and Procedure, other Orders or Directives, fail to provide specific guidance, members shall exercise professional discretion that may be based upon:

- Training, experience, common sense;
- Principles, values, ethics;
- Advice from supervisors, senior officers; and
- Professionally accepted standards.

Discretionary measures may include:

- Application for complaint;
- Verbal or written warnings;
- Referral to other divisions, departments, or agencies;
- Guidance from the Attorney General/District Attorney; and
- Informal resolution.

General Order

Effective Date:	Number:
May 25, 2023	**ADM-05**
Subject:	
Organizational Structure	

Policy

The Department's organizational structure is arranged in a manner that simplifies the direction, coordination, and control of personnel.

Organizational Structure

The Superintendent does hereby establish the following operational Divisions for the effective and efficient delivery of services:

- Division of Field Services;

The mission of the Division of Field Services (DFS) is to: provide uniformed policing and patrol service to the citizens of, and visitors to, the Commonwealth in order to facilitate motor vehicle crash and fatality reduction utilizing proactive enforcement and education to ensure the safe and expeditious flow of traffic; deter, interdict, apprehend and prosecute those engaged in criminal activity; provide primary policing and law enforcement services to the Massachusetts State House, Massachusetts Department of Conservation and Recreation, Massachusetts Port Authority, Massachusetts Department of Transportation and Massachusetts Water Resource Authority; and to provide special and tactical resources in order to assist municipal law enforcement agencies in effectively responding to public safety emergency incidents or events throughout the Commonwealth.

- Division of Investigative Services;

The mission of the Division of Investigative Services (DIS) is to: reduce criminal activity in the Commonwealth in cooperation with local and federal law enforcement agencies by gathering, analyzing and reporting on the type, manner and location of criminal activity within the Commonwealth; monitor the activities and associations of individuals engaging in organized crime; investigate criminal acts for the purpose(s) of identifying, apprehending and prosecuting perpetrators; apprehend fugitives from justice, and provide executive protection.

Organizational Structure, continued

- Division of Standards and Training;

The mission of the Division of Standards and Training (DST) is to improve the quality of the services provided by the Department ensuring the integrity and competence of its operations. This mission shall be accomplished through the continual training and education of Department members; the investigation, and when deemed appropriate, the prosecution of Department personnel misconduct; and the regular inspection of Department operations and facilities. The Division shall work cooperatively with local and federal law enforcement agencies, as well as the general public, providing training and education in public safety and law enforcement related matters.

- Division of Homeland Security and Preparedness;

The mission of the Division of Homeland Security and Preparedness (DHS) is to lead the Department's criminal intelligence, counterterrorism, cybersecurity, emergency preparedness, and emergency response efforts, employing an intelligence-led policing approach to sustaining, enhancing and coordinating the Department's statewide capabilities to prepare for, protect against, investigate, respond to and recover from any criminal, terrorist, natural or manmade hazards or threats.

- Division of Administrative Services;

The mission of the Division of Administrative Services (DAS) is to provide the material resources and logistical support necessary for the Department to fulfill its mission by: preparing a complete and relevant budget; procuring and maintaining necessary equipment and facilities; and providing services for supporting the physical, financial and morale needs of Department personnel.

- Forensic Services Division.

The mission of the Forensic Services Division (FSD) is to provide forensic services to criminal justice agencies in the Commonwealth by supplying on-scene technical assistance to law enforcement agencies statewide, performing laboratory analysis of scientific evidence in connection with criminal cases, and offering expert scientific testimony in state and federal court proceedings.

Organizational Charts

Organizational charts graphically depict organizational entities, levels of command, lines of authority, and positions established for the duties of personnel.

The charts shall be:

- Updated continually to reflect Organizational change(s) in Command and/or reporting;
- Reviewed by each Division Commander prior to the next fiscal year;
- Revised through the Office of the Superintendent; and
- Be accessible to the public upon submission of record request.

Subject:	Number:
Organizational Structure	**ADM-05**

Accountability

Each employee is accountable:
- For the use of their authority delegated to others; and
- For the performance of any personnel under their control.

Chain of Command

The chain of command is the extension of authority and responsibility from the Colonel/Superintendent down to the level of execution.

Responsibility is accompanied by commensurate authority.

The chain of command for sworn members, in order of descending rank, shall be:
- Colonel/Superintendent;
- Lieutenant Colonel/Deputy Superintendent;
- Lieutenant Colonel;
- Major;
- Detective Captain;
- Captain;
- Detective Lieutenant;
- Lieutenant;
- Sergeant; and
- Trooper - The senior Trooper is in command, when necessary.

Command

Each organizational entity shall be:
- Under the direct command of only one supervisor.

Each employee shall be:
- Accountable to only one supervisor at any given time; and
- Bound by the chain of command that is applicable to their position.

Supervisory ratio must be:
- Adequate to provide guidance and control, as determined by the Colonel/Superintendent.

Ranking personnel shall:
- Assume line control outside their own organizational entity when failure to do so would seriously endanger the Department's:
  - Ability to maintain law and order; and
  - Public image.

Command Staff Responsibilities

Policy

The Command Staff is responsible for the administrative and operational control of the Department. Each member of the Command Staff shall maximize their involvement in the operations of the Department to deliver the highest level of public safety services to the public and other law enforcement entities.

Definition

The Command Staff shall include the following ranks:

- Colonel/Superintendent;
- Lieutenant Colonel/Deputy Superintendent;
- Lieutenant Colonel;
- Major; and
- Civilian Members of the Command Staff:
  - Chief Administrative Officer
  - Chief Science Officer.

Responsibilities

Position	Duties
Colonel/Superintendent	• Act as the Chief Executive Officer of the Department; • Assume full authority over the organization, administration and discipline of the Department; and • Promulgate all rules, regulations, policies, procedures, orders and directives.
Lieutenant Colonel/Deputy Superintendent	• Act as the Chief Operating Officer of the Department; and • Assume command of the Department as assigned and during the absence of, or when so designated by the Colonel/ Superintendent.
Lieutenant Colonel	• Act as the Chief Operating Officer of a Division.
Chief Administrative Officer	• Act as the Chief Administrative Officer and Division Commander of the Division of Administrative Services.
Chief Science Officer	• Act as the Chief Operating Officer of the Forensic Services Division.
Major	• Serve as a Troop Commander or other organizational unit head as directed by the respective Division Commander.

Meetings

Staff meetings shall be conducted to encourage and support the exchange of information. This may include a weekly staff meeting between the Colonel and all Divisions. Information from these meetings shall be distributed to all affected personnel as directed by the Colonel/Superintendent.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**ADM-07**
Subject:	
Written Directives, Schedules and Forms	

Policy

The Department shall provide administrative direction and operational guidance through an internal written directive process. Written directives shall be formatted, indexed and accessed according to the guidelines set forth in this policy unless otherwise directed by the Office of the Superintendent.

Written Directive

Directive	Approving Authority	Purpose
General Order	Superintendent	• Codify the policies and procedures of the State Police.
Rules & Regulations	Superintendent	• Regulate the governance of the State Police.
Personnel Order	Superintendent	• Assignments • Appointments • Discipline • Transfers • Discharges • Commendations
Special Order	Superintendent	• Specific instructions for specific personnel; and/or • Dissemination of information relative to a particular topic or incident.
Superintendent's Memorandum	Superintendent	• Formal or informal clarification or inquiry.
Division Commander's Order	Division Commander	• Administrative order issued for members under their command.
Administrative Notice	Superintendent/ Deputy Superintendent	• To inform members about general issues (crime, training, law updates, etc.); and/or • Address item(s) not covered by the above directives.
Standard Operating Procedures	Deputy Superintendent	• Procedures specific to the operations of individual sections/units.
Academy Training Bulletin	DST Division Commander	• To provide information related to specific current training topics.

Responsibilities for Written Directives

Position	Duties
Colonel/ Superintendent	• Approve and sign applicable written directives; and • Establish a Policy Review Committee.
Deputy Superintendent	• Review and approve SOP's.
Policy Review Committee	• Ensure that each Department Rule & Regulation, General Order and SP Form is reviewed at least annually, revised as needed; and • Consider suggestions/recommendations regarding the revision or creation of a General Order and/or SP Form:
Human Resources	• Ensure all Personnel Orders are posted and archived accordingly.
Division Commanders	• Approve and sign Division Commander Orders; • Ensure all Division Commander's Orders are posted and archived accordingly; • Review all Section/Unit SOP's annually; • Return SOP's approved by the Deputy Superintendent to the Section/Unit Commander for Section/Unit promulgation; • Assign a Commissioned Officer to review Division Commander's Orders annually; and • Assign a Commissioned Officer to the Departmental Policy Review Committee as directed by the Office of the Superintendent.
Strategic Planning Section	• Post approved written directives, excluding Division Commander's Orders and Personnel Orders on PowerDMS and/or DocuShare; and • Archive all written directives, excluding Division Commander's Orders and Personnel Orders.
Legal Section	• Review written directives as directed by the Office of the Superintendent.

Written Directive Formatting

Policy & Procedure
- Shall be indexed with prefix denoting administrative code, title and effective date.

Rules & Regulations
- Shall be indexed with effective date, number and subject (appendix or article).

Standard Operating Procedures
- Shall be indexed by the respective Section/Unit Commander to include effective date, numeric order, subject and review date.

Other written directives
- Shall be indexed by directive type and include/denote the issuing entity, effective date, numeric order by year (excepting General Orders) and subject matter.

As applicable, review/revision and effective dates will be updated and shall be signed by the person with authority to issue such directive.

Formatting will be consistent with all other directives posted on PowerDMS and/or DocuShare. The Strategic Planning Section can provide assistance with formatting but is not responsible for content creation unless directed by the Office of the Superintendent.

Publication

Department written directives, with the exception of Section/Unit SOP(s) shall be published on PowerDMS and/or DocuShare.

Section/Unit Commanders shall be responsible for the distribution and access to Section/Unit SOP(s) for personnel under their command.

If applicable, Troop/Section Commanders shall ensure that Department bulletin boards are maintained with current directives and are accessible to all personnel.

Distribution / Receipt and Familiarization

The Colonel/Superintendent shall ensure written directives are properly distributed and posted.

It is the responsibility of each sworn and civilian employee to read and familiarize themselves with promulgated directives. Sworn and civilian employees shall:
- Read promulgated directives within one week of distribution or upon return to duty for members on approved leave;
- Familiarize themselves with Policy & Procedures and Rules & Regulations as issued;
- Access PowerDMS and electronically sign an acknowledgment of receipt and review of all written directives posted to PowerDMS;

Distribution / Receipt and Familiarization, continued

- Sign appropriate Signature Receipt Form to acknowledge receipt and review of all other written directives (Each Division shall maintain a copy of signature sheets acknowledging assigned employees have read issued directives); and
- Civilian employees shall direct questions on applicability of specific written directives to their immediate supervisor.

Duration

All General Orders, Personnel Orders, and Superintendent's Memorandums shall:

- Be reviewed on an annual basis as applicable; and
- Remain in effect until:

Rescinded by the Colonel/Superintendent; or
Superseded by another General Order, Personnel Order, or Superintendent's Memorandum.

Division Commander's Orders shall:

- Be reviewed on an annual basis; and
- Remain in effect until:

Rescinded by the Division Commander or Colonel/Superintendent; or
Superseded by another Division Commander's Order or General Order promulgated by the Colonel/Superintendent.

All other written directives are valid for one (1) year, unless rescinded. New directives may be issued at any time. These directives shall be reviewed at the end of one (1) year by the issuing authority prior to re-issue.

The Strategic Planning Section shall facilitate the annual policy review process, including, but not limited to, establishing the review schedule and maintenance of the review records.

Changes

All written directives shall be amended to coincide with the terms of current Collective Bargaining Agreement(s), state and federal laws, and including Executive Orders.

When a negotiated labor agreement is ratified by all parties, the Colonel/Superintendent or designee, shall:

- Obtain a written, signed copy of the labor agreement; and
- Review and amend, if necessary, all written directives and procedures to coincide with the terms of the labor agreement.

The Office of Employee Relations shall disseminate information relative to a new labor agreement, including modifications to existing agreements, to managers and supervisors of bargaining unit employees.

Members are encouraged to make suggestions and recommendations to revise or create written directives. Such suggestions/recommendations shall be written and forwarded, through channels, to the Office of the Superintendent-Strategic Planning Section for consideration by the Department Policy Review Committee.

Requesting Written Directives

To obtain a copy of a written directive, members shall access PowerDMS and/or DocuShare. If unable to access PowerDMS and/or DocuShare, members shall consult their commanding officer who shall make the request through channels to the Strategic Planning Section.

Archives

Department written directives, excluding Division Commander's Orders and Personnel Orders, shall be maintained by the Office of the Superintendent-Strategic Planning Section, including the signed "master copy".

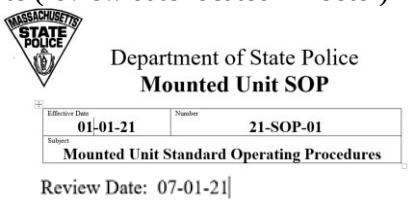
Division Commanders and the Human Resources Section shall maintain the signed "master copy" of their Division Commander's Orders or Personnel Orders.

"SP" Forms

The Policy Review Committee shall consider suggestions/recommendations forwarded, in writing, through channels to the Office of Superintendent-Strategic Planning Section concerning the creation of a new or revision to an existing Department "SP" Form; and

Station/Section/Unit Forms, strictly used within their station/section/unit for Department business and not forwarded to any outside entities, are not under the purview of the Strategic Planning Section and shall not be issued a Departmental "SP" number.

Exclusive Directives



Commanding Officers may create written directives for the administration of their respective entities. Directives shall be filed with their appropriate Division Commander and shall remain in effect for one (1) year unless:

- Rescinded; or
- The directive conflicts with a Division Commander Order or General Order.

Standard Operating Procedures (SOP)

Section/Unit Commanders shall:

- As applicable, create and maintain an internal SOP specific to their function to include effective date, numeric order, subject and review date (review date located in footer) formatted similar to example below;

Department of State Police
Mounted Unit SOP

Effective Date	Number
01-01-21	21-SOP-01
Subject: Mounted Unit Standard Operating Procedures	

Review Date: 07-01-21

  - Above template for SOP's can be obtained from the Strategic Planning Section;
  - Sections/Units with SOP's that are lengthy may utilize alternative formatting provided the cover sheet includes the above information;
- Forward a copy through channels to the Deputy Superintendent for approval;
- Upon approval, provide Section/Unit members with a copy of the approved SOP via Section/Unit Commander discretion of manual or electronic distribution, documenting distribution/receipt within RAMS/ACISS;
- Review SOPs annually and submit any revised SOP's through channels to the Office of the Superintendent for review/approval prior to promulgation; and
- Annually update the review date to document the review and update the effective date upon the implementation of any changes to said SOP.

Master Vacation Schedule

Each Troop/Station/Section/Unit Commanding Officer shall:

- Submit through channels the Master Vacation Schedule for all sworn and civilian employees under their command to their Division Commander on or before February 14th of each year; and
- Ensure that all sworn and civilian employees have selected vacation week(s) according to their collective bargaining agreement.

Division Commanders shall:

- Retain submitted Master Vacation Schedules for the current year for all sworn and civilian employees under their command.

Division of Administrative Services / Human Resources Section: shall:

- Post a blank copy of the Master Vacation Schedule to PowerDMS-Department Forms prior to January 1st.

20-SM-07 Establishment of Departmental Policy Review Committee

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-08**
Subject:	
Strategic Planning	

Policy

In order to provide effective management and planning, the Department shall:

- Establish, review and revise a Multi-Year Plan;
- Establish goals and objectives for the Department and each Division;
- Continuously review, revise and track the progress of established goals and objectives;
- Make established goals and objectives available to all agency personnel;
- Annually review and revise written directives; and
- Maintain a grant application process.

Division Goals & Objectives

Each Division will develop goals and objectives that are based upon and designed to promote, enhance and achieve:

- The overall mission and organizational values of the Department as stated in ADM-02 State Police Mission and Policy;
- Division mission(s) as stated in ADM-05 Organizational Structure;
- Interoperability of Divisions where applicable; and
- The Department's Multi Year Plan.

Division Commanders shall meet, at least annually, with the Office of the Superintendent to review, evaluate, and update the stated goals and objectives of their respective Division.

Progress Review

The Colonel may request goal and objective progress review reports from Divisions at any time. Additionally, prior to September 30th of each year, each Division Commander shall submit a *written program evaluation* of their Divisional goals and objectives to assist the Office of the Superintendent in conducting a formal review assessing progress towards achieving the stated goals and objectives.

Division Goals & Objectives, continued

Prior to November 30st of each year, each Division Commander shall submit, in writing, to the Office of the Superintendent a Divisional Goals and Objectives report.

The Divisional Goals and Objectives report shall:

- Enumerate the goals and objectives for the Division;
- Indicate the progress that has been made towards achieving the goals and objectives for the Division; and
- Address unrealized goals/objectives and plan for achievement where applicable.

Division Planning Officer

Each Division Commander shall assign a Commissioned Officer as the Division's Planning Officer who shall:

- Coordinate the development, implementation and review of the Division's goals and objectives;
- Work with the Division's Station/Section/Unit Commanders to:
  - Establish the goals and objectives for the respective entities;
  - Identify the resources and initiatives necessary to achieve these goals and objectives; and
  - Provide to the Division Commander a listing of these goals and objectives and the resources and initiatives necessary to achieve them.
- Act as a point of contact for Station/Section/Unit/Commanders within their Division regarding technological advancement, equipment procurement, and other programs and initiatives that may be eligible for, acquired through, and/or developed and/or enhanced by grant funding; and
- Act as the Project Administrator, as prescribed in ADM-08A Grant Approval Process to:
  - Review, track and oversee a specific funding request/project;
  - Complete required quarterly and annual reports;
  - Maintain oversight on the Division's grant program operations and reporting;
  - Assist employees submitting grant proposals with obtaining the required Divisional signatures on the SP 426 Grant/Agreement Approval Request;
  - Work directly with the Strategic Planning Section and Fiscal Section throughout the grant application process; and
  - Provide the appropriate Division, Station/Section/Unit Commanders, with grant application progress updates.

Department Annual Goal and Objective Report

Utilizing and compiling the Divisional Goals and Objectives reports submitted by each Division to the Office of the Superintendent prior to November 30th each year, the Strategic Planning Section shall generate the Department's Annual Goal and Objective Report. The Department's Annual Goal and Objective Report will enumerate the goals and objectives for the agency and for each major organizational component within the agency.

On or prior to December 30th of each year, Strategic Planning will forward the Annual Goal and Objective Report to the Colonel for review. Upon approval by the Colonel, the final Annual Goal and Objective Report shall be posted on PowerDMS.

Strategic Planning and Analysis Section

The Strategic Planning and Analysis Section shall:

- Report to the Office of the Superintendent;
- Assist the Command Staff with the Department's administration and control through planning, research, and coordination;
- As prescribed in ADM-07:
  - Assist Divisions with the revision, editing and chain of command review of current and proposed written directives (excluding Division Commander's Orders and Personnel Orders);
  - Facilitate the annual review of MSP Policies, Rules & Regulations in accordance with the established schedule;
  - Post promulgated written directives (excluding Division Commander's Orders and Personnel Orders) on PowerDMS;
  - Archive all written directives (excluding Division Commander's Orders and Personnel); and
  - Maintain the SP Forms management process, including design, inventory, archiving and promulgation;
- Compile Divisional Goal and Objective reports, prepare and submit the Department's Annual Goal and Objective Report to the Colonel/Superintendent for approval and promulgation on PowerDMS;
- Research and forward to Division Commanders and the designated Divisional Planning Officers any Notices of Funding Opportunity for which the Department is eligible;
- Instruct and assist members and the Divisional Planning Officers during the grant application process;
- Provide research regarding Departmental initiatives when requested; and
- Research emerging technologies and trends.

Subject:	
Grant Approval Process	

Policy

Whenever Department employees seek to obtain services and/or funding through private, public (including state or federal) entities; or to acquire or transfer equipment from an outside entity, employees shall adhere to the procedures contained herein .

Definitions

Grant requests can be any of the following:

- *Grant*: An award of financial assistance from an external entity where no "substantial involvement" is anticipated between the awarding entity and the Department during performance of the agreed upon activity.
- *Cooperative Agreement*: An agreement of financial assistance where there is "substantial involvement" anticipated between an external entity and the Department during the performance of an agreed upon activity. Cooperative agreements are often non-cash agreements involving services provided to or by the Department.
- *Interagency Service Agreement* (ISA): An agreement between the Department and a Massachusetts state entity, which is committing funds for a specific program.
- *Equipment Acquisition Agreement*: Agreements where the Department shall receive equipment to provide services, perform a specific function, or use within its operations.

Director of Federal Grant Initiatives: A member from the Division of Administrative Services who is responsible for monitoring the grants request process and assisting members in grant research, application, and submission.

Grants Unit: A unit within the Department's Fiscal Section under the Division of Administrative Services, which is responsible for the grant fiscal oversight process through the Office of the State Comptroller and ensures the timely submission of expenditure documentation as necessary to ensure compliance with grant award(s).

Match Funds: The portion of funds that the Department shall provide to supplement the funding agency's contribution. The match is usually a percentage of the project's total budget.

Project Administrator: An employee appointed by their Division Commanderto oversee a specific request/project and is responsible for the completion of all quarterly and annual reports.

Definitions, continued

SP 426 Grant/Agreement Approval Request Form: A form to be completed by employees requesting approval to initiate the application process for any services, funding, and/or equipment acquisitions.

Process

Unless prior written approval has been granted from the Colonel/Superintendent, employees shall not:

- Enter into any grants, cooperative agreements, or interagencyservice agreements; or
- Submit an application, or solicit or accept funding and/or equipment from any outside entities.

Equipment

Project Administrators shall comply with ADM-30 Asset Management when receiving equipment through a grant request.

Grants Review Committee

Requests for grant funding shall be reviewed by the following Department members prior to submission to ensure they align with departmental goals and objectives and are not duplicative:

- Director of Federal Grant Initiatives;
- Grants Unit Representative; and
- Strategic Planning Section Commanding Officer or designee.

Request Process

Position	Process
Employees	• Shall Notify the Director of Federal Grant Initiatives of intent to apply for a grant as soon as feasible, before the SP 426 deadline. • Shall submit all requests through channels to the appropriate Division Commander or designee, **at least fifteen (15) days prior to the filing date deadline**; • Submitted requests shall include the following information; o A completed SP 426; o A copy of the original solicitation/application that identifies the funding source and requirements i.e. eligibility, application deadline, and matching amount requirements; o A program statement narrative that identifies the goals and objectives, as well as the intended outcome to be accomplished, and any supporting documentation; and o A budget which includes current information regarding personnel and/or equipment costs andthe services to be performed and/or purchased.
Division Commander or Designee	• Shall review all requests; • Ensure adequate time is available to allow for modifications to the application before the filing deadline; • Endorse the SP 426; • Forward the request to the Strategic Planning Section; and • Designate a Project Administrator.
Director of Federal Grant Initiatives	• Shall review the request with the designated Project Administrator; • Notify the fiscal Grants Unit; • Ensure the application adheres to program guidelines and includes all required information and attachments; and • Shall document grant requests and maintain electronic copies of grant requests and SP-426 forms.
Grants Unit	• Ensure the request budget is appropriate and accurate; and • Assist as needed with questions pertaining to budget and finance.

Request Process, continued

Strategic Planning Section Commander	• Shall immediately review the request to ensure it aligns with Departmental goals and objectives; • Confirm that the request has been reviewed by the Director of Federal Grant Initiatives and Grants Unit; • Forward completed requests to the Chief Administrative Officer and the Colonel/Superintendent for approval; and • Maintain hard copies of completed applications and SP-426 forms.
Colonel/ Superintendent	• Approve or deny the request; • If approved, sign the original application and the SP426.

Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-09**
Subject:	
Line Inspection	

Policy

Line Inspections shall be conducted to improve the operational readiness of the Department by ensuring that all members adhere to all established rules, regulations, policies, procedures, orders, directives, and general laws.

Members shall immediately correct unsatisfactory behavior and conditions in order to avoid the consequences which erode the trust and confidence of the public.

Procedure

Members from the rank of Captain through Trooper shall be inspected.

Members assigned to duties requiring civilian attire are exempt from the uniform/appearance portion of the inspection.

Troop/Section Commanders may require additional line inspection procedures within their respective commands.

Line Inspections

Troop/Section Commanders or designee, shall:

- Oversee the entire line inspection program for their command;
- Ensure that all members are inspected at least quarterly by their first line supervisor; and
- Ensure inspections are properly documented on PayStation.

First Line Supervisors Duties

First Line Supervisors shall:

- Conduct an inspection of all immediate subordinates at least quarterly, including their assigned cruisers and equipment; and
- Submit a report of the inspection, including an explanation of the inadequacies, via PayStation, quarterly during the months of January, April, July, and October.

Minor deficiencies which can be corrected during the course of a first line inspection, may be reported as adequate via PayStation. Repeated minor deficiencies shall be documented on an Employee Evaluation System (EES) form.

First Line Supervisors Duties, continued

Use Line Inspections shall include:

- Personnel: Uniform, equipment, appearance, cleanliness/neatness, jewelry, hygiene, cosmetics, and hair;
- Use of force equipment: All issued use of force equipment;
- Cruiser: General condition, issued equipment, cleanliness, and maintenance;
- Citations and audit sheets: Review citations and audit sheets, ensure documentation for racial profiling requirements are correctly submitted; and
- Licenses and Identification Cards e.g., Massachusetts Driver's License, License to Carry Firearms, and Department Identification Cards.

Reviewing Supervisor Duties

Each submitted inspection report shall be reviewed by a second level supervisor prior to approval via PayStation. The reviewing supervisor shall:

- Discuss any deficiencies noted within the report with the inspecting member prior to approving the report; and
- Take corrective action to ensure that all deficiencies and inadequacies are addressed.

Station/Unit Inspection

Station/Unit inspections shall be performed in conjunction with the Annual Fixed Assets Inventory. Station/Unit Commanders shall examine Department facilities and determine where there are inadequacies, deficiencies or areas not otherwise in compliance with Department rules, regulations, policies, procedures, orders, directives, and general laws.

Any written reports generated shall be forwarded to the Troop Commander through channels.

Annual inspections shall include at a minimum:

- Buildings and grounds of facility: Conduct a general inspection of the facility with attention to the condition of maintenance and safety issues;
- Entrances, exits, and security;
- Public accommodation: Parking, handicap access, toilet facilities/ public restrooms, and lobby area;
- Holding facilities: As required under DET-04 Holding Facilities; and
- Employee cards/records: Are current and complete for all assigned employees.

Subject:	
Staff Inspections	

Policy

The Department shall continuously audit and inspect all resources, facilities, equipment, personnel, practices and policies, to update the Command Staff on the quality of Department services.

Staff Inspections Protocols

To accomplish the mission of conducting Staff Inspections, inspectors shall have complete and unrestricted access to all Department records and properties.

Office of Professional Integrity and Accountability (OPIA) shall:

- Conduct Staff Inspections on all resources, entities, and facilities within the Department;
- Conduct open inspections with the full knowledge and cooperation of everyone involved;
- Notify the appropriate Commanders of the intended date and scope any inspections at least seven (7) days in advance of the inspection; and
- Include a list of those materials, files, and subjects to be reviewed or examined by the inspector.

Troop/Section Commanders shall work cooperatively with the inspector, and shall prepare and provide all materials requested.

Upon request of the appropriate Division Commander, inspectors may conduct unannounced inspections of any Department entity.

Routine Staff Inspections

Routine Staff Inspections may include:

- Narcotics, contraband and physical evidence;
- Seized monies/asset forfeiture;
- Payroll entries, including overtime and details;
- Automated Vehicle Locator Technology (AVL);
- Body-Worn and Cruiser-Mounted Camera footage;
- Detail inspections;
- Found/held property;

Routine Staff Inspections, continued

- Holding facilities;
- Racial profiling compliance;
- Line inspections;
- Administrative journals and records;
- Issued Department equipment; and
- Other areas as directed by the Division Commander of Standards and Training.

Inspection Finding and Reports

Inspectors shall prepare and submit a detailed report through appropriate channels to the Colonel/Superintendent within sixty (60) days of each inspection.
This report shall include, at a minimum:

- Findings and observations; and
- Opinions, recommendations and conclusions.

Copies of this report shall also be forwarded to the appropriate Division Commander.

Upon receipt of a Staff Inspection Report, Troop/Section Commanders shall submit a report outlining the specific actions taken to ensure correction of all deficiencies noted. This report shall be submitted within thirty (30) days to the appropriate Division Commander, with a copy to be forwarded to the Division Commander of Standards and Training.

Awards	

Policy

The Department shall make every effort to recognize the people whose actions assist the Department in carrying out its mission and who go beyond normal expectations or requirements.

EES Coordinator

The Employee Evaluation System (EES) Coordinator shall be a Commissioned Officer or Program Coordinator designated by the Division Commander of Standards and Training or designee. The EES Coordinator shall be responsible for the Awards Board's administrative duties, preservation of all records, and shall not be a voting member of the Awards Board.

Standard Operating Procedure

The EES Coordinator shall develop a standard operating procedure that details:

- The Board's organization and procedures; and
- Board member duties and responsibilities.

Awards

State Police Members	
Medal of Honor Gold Medal Blue/Yellow/Blue Ribbon	Established to honor Department members who have performed acts of extraordinary heroism above and beyond the call of duty. <u>Elements of consideration are:</u> • Actions that depict outstanding bravery, courage, and self-sacrifice, or overriding concern for others; • Heroic actions taken for the rescue of life or in defense of another life; • Actions taken notwithstanding the potential of being killed; or • Valorous sacrifice (severe injury or loss of life).

Awards, continued

Sworn Police Officers	
Medal of Valor Silver Medal White/Red/Blue/Red/White Ribbon	Established to bestow recognition upon police officers who have performed specific acts of bravery or have exhibited outstanding courage while performing their duties. Elements of consideration are: • An act characterized by courage, daring, and bravery; • The officer took immediate and decisive action to avert injury or loss of life to others; • While in a hazardous environment, the officer exhibited outstanding courage while performing their duties; • The officer rescued or defended another; or • Valorous sacrifice (severe injury or loss of life).
Medal of Merit Bronze Medal Blue/White Ribbon	Established to bestow recognition upon police officers who have performed acts of outstanding achievement, far exceeding normal demands of the Department, which greatly contribute to the operation of the Department. Elements of consideration are: • Noteworthy achievements that greatly contributed to a Department operation or a community; • An exemplary act characterized by ingenuity, devotion, creativity, boldness, and outstanding professional conduct; or • Action(s) that reflects great credit to the member and the Department.
Medal of Lifesaving Bronze Medal Red/White Ribbon	Established to bestow recognition upon police officers who undertake significant actions in the saving of another life. Elements of consideration are: • Actions were taken for the preservation of another life; and • The actions actually preserved life. Note: Documentation should be submitted supporting the life threatening nature of the injuries or circumstances.

Awards, continued

Sworn Police Officers and Members of the Public

Superintendent's Commendation Plaque	Established to bestow recognition upon an employee of the Department, or a member of the public, who has made an exceptional contribution to the Department. Elements of consideration are: • Extraordinary performance that clearly distinguishes the individual; • Performance that significantly contributes to Department operations; • Actions that significantly enhance the positive image of the Department; • Exceptional contribution(s) to the Department; or • Exceptional service to the community.
Division Commander's Commendation Certificate	Established to bestow recognition upon an employee of the Department, or a member of the public, who has made a significant contribution to a Division. Elements of consideration are: • Notable performance that clearly distinguishes the individual; • Performance that notably contributes to the Division's operations; • Actions that notably enhance the positive image of a Division; • Exceptional contribution(s) to a Division; or • Exceptional service to the community.
Troop/Section Commander's Commendation Certificate	Established to bestow recognition upon an employee of the Department, or a member of the public, who has made a significant contribution to their Station/Section/Unit, or, upon a member of the public who has made a significant contribution to any Station/Section/Unit, or the Department. Elements of consideration are: • Notable performance that clearly distinguishes the individual, • Exceptional contribution(s) to the Station/Section/Unit; or • Exceptional service to the community.

Awards, continued

Department Entities

Superintendent's Unit Citation Plaque	Established to bestow recognition upon the employees of a particular Station/Section/Unit who have made an exceptional contribution to the Department. Elements of consideration are: • Extraordinary performance that clearly distinguishes the Station/Section/Unit; • The successful conclusion or culmination of a significant investigation or achievement of a significant project; • The achievement of outstanding enforcement efforts by a Station/Section/Unit; • Superior support efforts to the Department; or • Actions that significantly increase the positive image of the Department.

Civilians

Distinguished Service Award Gold Medal Red/White/Blue Ribbon	Established as the highest award to bestow recognition upon an employee of the Department, or a member of the public, who has provided extraordinary assistance to the Department. Elements of consideration are: • Heroic actions were taken for the rescue of life, or in defense of an officer or other person; • The individual, while assisting the Department, imperilled himself/herself to the risk of great personal injury, or death; • The individual aided an officer in a critical situation and in need of help; or • The individual's extraordinary actions/achievements greatly contributed to a significant Department operation.

Awards, continued

Civilians	
Lifesaving Award Red/White Lapel Pin	Established to bestow recognition upon an employee of the Department, or member of the public, who undertakes significant actions in the saving of another life. Elements of consideration are: • Actions were taken for the preservation of another life; and • The actions preserved life. Note: Documentation should be submitted supporting the life threatening nature of the injuries or circumstances.
Public Service Award Certificate	Established to recognize an employee of the Department, or a member of the public, who has provided outstanding assistance to the Department, or has significantly contributed to public safety. Elements of consideration are: • Significant actions contributing to Department objectives; • Significant actions contributing to the betterment of policing or public safety; • Noteworthy achievements that greatly contributed to a Department operation; or • Noteworthy achievements that greatly contributed to a community.

Nomination Procedure

Step	Action
1	Supervisors shall make nominations according to the following process: **Department Members** • Consult the list of the Awards Board criteria; • Complete an electronic EES Supervisory Observation Report or an EES quarterly performance evaluation; and • Electronically forward, through channels, within the awards database designated by the Division of Standards & Training, the respective award recommendation and reasoning (i.e. Medal of Valor) to the appropriate Division Commander. • Attach any supporting documentation relevant to the submission within the awards database. **Department Civilian Employees or Non-Department Individuals** Nominations for awards to civilian employees or non-department individuals shall be forwarded to the Awards Board as outlined above.

Nomination Procedure, continued

2	Division Commanders shall: • Determine if the act is worthy of recognition; • Electronically forward, within the awards database, the respective award recommendation(s) to the EES Coordinator and the Awards Board. • Ensure all documentation supporting the award selection is electronically attached/uploaded within the awards database.
3	The Awards Board shall: • Meet biannually (twice a year) or as needed to review recommendations from the Division Commanders; • Make recommendations to the Colonel/Superintendent based upon a majority vote; and • Return recommendations, which do not rise to the level of an award, to the appropriate the Division Commander.
4	The Colonel/Superintendent shall: • Review the biannual recommendations from the Awards Board; and • Notify the Awards Board of any changes to the recommendations.

Non-Department Nominations

Nominations for awards given by organizations outside the Department shall be forwarded to the Awards Board as outlined above.

Ceremony Procedures

Awards shall be presented at least biannually, at ceremonies scheduled during the months of April and October. The Colonel/Superintendent may hold additional ceremonies as deemed necessary.

Position	Duties
Awards Board	• Notify each Division Commander, in writing of all actions taken regarding the awards nominations for that Division; and • Notify Media Relations of the nominees at least forty-five (45) days before the next scheduled ceremony.
Media Relations	• Arrange for award ceremonies in April and October of each year; and • Ensure the award recipients have been notified, through the Office of the Superintendent, in writing at least thirty (30) days before the ceremony.

Ceremony Procedures, continued

Position	Duties
Human Resources	• Maintain a database containing all of the awards recipients' specifics; and • Place supporting award files in recipients' Personnel Files.
Office of the Superintendent	• Notify Award recipients of their invitation to the Awards ceremony at least thirty (30) days before the ceremony.
Colonel/ Superintendent	• Present the awards.
Division Commander	• Generate and print Division Commander Commendation Certificates and Troop/Section Commendation Certificates; • Present Division Commander Commendation Certificates to the recipient in hand; and • Electronically record the issuance of the award.
Troop/Section Commander	• Present Troop/Section Commendation Certificates to the recipient in hand; and • Electronically record the issuance of the award.

Awards Board Composition

The Awards Board shall be comprised of nine (9) employees with eight (8) voting members. Awards shall be approved based on a majority vote. Employees shall serve for a minimum term of one (1) year.

Representative	Rank/Position	Designated by:
President	Major	Superintendent
Department Employee	Civilian	Deputy Superintendent
Field Services	Captain or lower	Division Commander
Investigative Services	Captain or lower	Division Commander
Standards and Training	Captain or lower	Division Commander
Administrative Services	Captain or lower	Division Commander
Homeland Security and Preparedness	Captain or lower	Division Commander
Forensic Services	Captain or lower	Division Commander
EES Coordinator	Commissioned Officer/Program Coordinator Non-Voting Member	Division Commander of Standards and Training

Other Awards

Supervisors may establish:

- Other forms of recognition as necessary and electronically document the issuance of any recognition in the EES system. These recognitions shall not be deemed to be a Department Award within the guidelines of this policy.

Exceptions

In extraordinary circumstances the Awards Board may:

- Vote to make an exception to this policy, providing the vote is unanimous; and
- Forward the exception to the Colonel/Superintendent for approval.

MPAC: 26.1.2.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**ADM-11**
Subject:	
Sick Leave	

Policy

The Department recognizes the importance of Sick Leave for its sworn members and their families.

The Department has a responsibility to monitor the use of Sick Leave to prevent abuses.

For the purposes of this policy, the term member(s) shall refer to sworn Department members.

Sick Leave Credits

Sick Leave credits are granted in accordance with provisions of the applicable Collective Bargaining Agreement (CBA) and the Department's Rules and Regulations. The Collective Bargaining Agreement also provides guidelines for the administration of Sick Leave.

Granting Sick Leave

Sick Leave is granted at the discretion of the Colonel/Superintendent, or designee, to a sworn member when the member cannot perform their duties because they are incapacitated by:

- Personal illness or injury;
- The presence of the member at their work location would jeopardize the health of others through exposure to a contagious condition; or
- The member's spouse, child, parent, or spouse's parent, or relative living in the member's household, is seriously ill. In this event, a limit to the amount of leave the member can use is set by the CBA and federal and state laws.

Notifying duty assignment of intention to use Sick Leave

As early as possible on the first day of a Sick Leave absence, a member shall notify their duty assignment of the intention to use Sick Leave. The member shall notify their duty assignment of the anticipated duration of the Sick Leave absence. If the absence is shorter than, or extends beyond, the initially anticipated period of absence, the member shall advise their duty assignment of the modification to the Sick Leave request. The Sick Leave request shall be appropriately logged in the Department's time and attendance system and in the Daily Administrative Journal and shall only reflect the member's name, identification number, and type of Sick Leave.

Subject:	Number:
Sick Leave	**ADM-11**

Notifying duty assignment of intention to use Sick Leave, continued

Supervisors shall be informed of:

- The nature of the illness or injury, and anticipated duration of absence, if known;
- The location of their recuperation and a telephone number; and
- Any duties or scheduled court appearances that may require attention.

If using Sick Leave in excess of five (5) consecutive work days, the member may be required to undergo a medical examination, or provide documentation from a licensed medical practitioner, to determine their fitness for duty.

Sick Leave

Members who are granted Sick Leave shall not request or work overtime and/or details within twenty-four (24) hours from the start time of their regularly scheduled work shift, unless the members has:

- Worked at least four (4) or more consecutive hours during the first half of their shift for which Sick Leave was granted; or
- Worked at least four (4) or more consecutive hours during the second half of their shift for which Sick Leave was granted.

Members may utilize Sick Leave to attend doctor and dental appointments.

Note: Supervisors shall ensure compliance with ADM-19 Vehicle Management with regards to Department issued vehicles.

Cancelling Sick Leave

If a member is returning to work earlier than previously reported, the member shall call to cancel the remaining Sick Leave at least eight (8) hours prior to the reporting start time of their next shift.

Location of Recuperation

Members using Sick Leave may leave the Commonwealth of Massachusetts only:

- With authorization of their Commanding Officer; and
- To obtain medical care as prescribed by their licensed medical practitioner.

Members utilizing Sick Leave may be ordered to remain at a reported place of recuperation. A reasonable time period away from this location is allowed to:

- Obtain services or products consistent with medical care;
- Vote or attend religious services;
- Attend to an emergency situation; or
- Attend to other matters with the permission of their supervisor.

Subject:	Number:
Sick Leave	**ADM-11**

Review of Sick Leave

Supervisors at all levels are responsible for monitoring Sick Leave. Supervisors should review attendance records for signs of Sick Leave abuse, preferably in conjunction with the Employee Evaluation System (EES).

Some potential signs of Sick Leave abuse are:

- Excessive use;
- Patterns of use, such as before or after days off, or on weekends;
- Use on or around a holiday;
- Use after working overtime, details, or extra shifts;
- Use when the member has indicated that they want time off;
- Use when the supervisor believes that the member is not sick; and
- When the Sick Leave repeatedly creates shortages or overtime.

When a supervisor has *reason to suspect* Sick Leave abuse, the supervisor has the following options:

- Reason to Suspect Abuse in General- Notify the member using the SP 382 Abuse of Sick Leave form. This advises the member that future Sick Leave may be subject to extra scrutiny; or
- Reason to Suspect Abuse in a Particular Instance- Notify the member using the SP 383 Submission of Medical Evidence form. The member is then required to produce satisfactory medical evidence by submitting the SP 384 Request for Certification of Medical Condition form within seven (7) days.

Supervisors should have articulable reasons for suspecting abuse before filing the SP 382 Abuse of Sick Leave form. Supervisors may call or visit the member at their place of recuperation to verify the use of Sick Leave. Calls or visits shall not occur between 2200 hours and 0800 hours.

Members who abuse Sick Leave or who are excessively absent from duty may be subject to administrative or disciplinary action and denial of Sick Leave.

Leave Benefits

Leave issues for members are addressed in the Collective Bargaining Agreement.

Commanding Officers shall consult applicable collective bargaining agreements for civilians under their charge.

Subject:	Number:
Sick Leave	**ADM-11**

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**ADM-11A**
Subject:	
Temporary Modified Duty	

Policy

Temporary Modified Duty provides an alternative work assignment for eligible members who are temporarily unable to meet some Department in-service standards. Members failing to meet in-service medical and physical fitness standards due to temporary injury, illness or incapacitation are eligible to undergo re-examination pursuant to M.G.L. c. 22C, §10. Requests for re-examinations shall be made in writing to the Colonel/Superintendent within the period prescribed by M.G.L. c. 22C, §10 or shall be waived.

Temporary Modified Duty

While on Temporary Modified Duty, members shall not:

- Wear a uniform;
- Work overtime;
- Work paid details; and
- Have contact with prisoners, the public in an enforcement capacity, or function as a desk officer in a sub-station.
  Exception: Emergency situations may require the immediate response of the member.

The Colonel/Superintendent may authorize members on Temporary Modified Duty to:

- Operate a Department vehicle; and/or
- Carry a Department issued firearm.

The immediate supervisor of a member on Temporary Modified Duty shall ensure compliance with ADM-19 Vehicle Management.

Eligibility

Eligibility for Temporary Modified Duty status shall:

1. Be recommended by the State Police Surgeon;
2. Require that the member's anticipated period of injury, illness or incapacitation be temporary in nature, meaning less than twelve (12) months in duration; and
3. Be determined by the Colonel/Superintendent.

Members who are not eligible for Temporary Modified Duty may:

- Remain or be placed on Sick Leave, Injured Leave, or other approved duty or leave status as appropriate.

Evaluation by State Police Surgeon

Members who are eligible or assigned to Temporary Modified Duty shall be required to:

- Submit to periodic medical evaluation(s) of their condition as determined by the State Police Surgeon or by order of the Colonel/Superintendent.

Any member who has been assigned to Temporary Modified Duty for a period of twelve (12) months, shall be examined by the State Police Surgeon, who, after reviewing all medical information, shall recommend to the Colonel/Superintendent that the member:

- Remain on Temporary Modified Duty for a period as recommended by the State Police Surgeon and as determined by the Colonel/Superintendent;
- Submit to a medical examination as directed by the Department;
- Be placed on: Full Duty; No Duty; or Temporary Modified Duty; and/or
- Be discharged, separated and/or the member may retire.

Member's Assignment to Temporary Modified Duty

The Colonel/Superintendent may assign a member to Temporary Modified Duty based upon a medical recommendation from the State Police Surgeon. A member may dispute such assignment by:

- Providing a written notification to the Colonel/Superintendent within ten (10) days; and
- Producing a written statement from the member's physician detailing the medical reasons the member cannot perform such assignment.

The Colonel/Superintendent upon receipt of such written notification may:

- Require the member to submit to an examination by a medical physician selected by the Department.

The medical physician selected by the Department shall:

- Examine the member to determine if the member can perform the duties of the proposed assignment; and
- Forward written documentation of the examination with recommendations to the Colonel/Superintendent.

The Colonel/Superintendent shall make all final determinations regarding a member's assignment to Temporary Modified Duty.

Responsibilities

Position	Duties
Colonel/Superintendent	Shall establish and approve Departmental: • Duty Status; • Leave Status; • Medical Standards; and • In-service Standards.
State Police Surgeon	Shall evaluate members and recommend: • Eligibility for Temporary Modified Duty status; and • The frequency of medical evaluation periods.

Return to Duty

Any leave or break in service 90 days – 1 year:

Members returning from any leave, temporary modified duty or break in service exceeding ninety (90) days requesting full duty status shall ensure the tasks below are completed in the following sequence:

- The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty;
- Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty;
- The member shall then be required to successfully complete:
    - Online academy;
    - Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
        1. Patrol Procedures
        2. Defensive Tactics
        3. EVOC
        4. Firearms (reissuance of assigned UOF gear and requalification if necessary)
- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Any leave or break in service exceeding 1 year:

Members returning from any leave or break in service exceeding one (1) year requesting full duty status shall ensure the tasks below are completed in the following sequence:

- The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty.

Return to Duty, continued

- The member shall then be required to successfully complete:
  - A background investigation;
  - A medical examination by the State Police Surgeon to include drug testing; and
  - Psychological testing.

Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty.

The member shall then be required to successfully complete:

- Online academy
- Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
  - Patrol Procedures
  - Defensive Tactics
  - EVOC
  - Firearms (reissuance of assigned UOF gear and requalification if necessary)
- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Former members wishing to return from a separation from service that exceeds three (3) years shall:

- Meet all requirements for re-entry to the Department; and
- Successfully complete the Recruit Training for appointment to the position of Trooper.

Note: Failure to successfully complete the Recruit Training may affect pension benefits, if applicable.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**ADM-11B**
Subject:	
Injury Reporting and Leave	

Policy

The Department shall investigate and document each on-duty injury sustained by a member. All duty related injury documentation shall be completed and forwarded to the proper authority in a timely manner.

Every injury shall be investigated in accordance with this policy.

Leave Status

Members incapacitated by an injury incurred on-duty shall:

- Be placed on *Injured Leave Pending* (ILP) status by their Commanding Officer or designee until examined by the State Police Surgeon; and
- Officially be placed on *Injured Leave Duty* (ILD) status when so determined and approved by the Board on Claims.

Payroll Information

A member who:

- Remains on approved ILD into the next calendar year, or
- Returns from approved ILD in the last quarter of the current calendar year may request:
  - The Colonel/Superintendent to convert excess vacation time credits to sick leave.

Members on approved ILD may request a tax exempt status letter through the Payroll Section.

Reporting

If injured while on-duty:

- Division of Field Services members shall immediately advise the Desk Officer who shall notify the Troop Duty Officer; and
- Non-Field Services members shall notify their Commanding Officer.

The nature and cause(s) of a member's injury shall be noted in the Daily Administrative Journal.

Supervisors shall ensure the procedures outlined in TRF-20 Department Vehicle Crashes are followed, if an injury is the result of a cruiser crash.

Investigation/ Documentation Protocols

The **Troop Duty Officer** (for DFS members) or the **Commanding Officer** (for non-DFS member) shall:

- Assign an investigating officer;
- Ensure that form SP 624 Initial Injury Report is completed; and
- Ensure that prior to the end of the shift, the SP 624 is sent via fax or email to General Headquarters Division Commander and the Occupational Health Unit/Human Resources Section.

Injured members should, if necessary, seek emergency medical care or seek treatment from their own personal physician. All bills shall be:

- Made out in the injured member's name and home address;
- Itemized and initialled by the member; and
- Submitted to the investigating officer within seven (7) days.

Injured members (unless physically incapable) shall, within seven (7) days, complete and sign the following forms and submit to the investigating officer:
Sections 1 through 7 of SP 37 Statement in Support of Claim;

- Commonwealth's Form 1 Notice of Injury;
- To/From Letter (including how the injury occurred and names of any witnesses and statements); and
- Authorization for Release of Medical Records.

Investigating officers shall:
When the injured members are physically incapable:

- Prepare the appropriate forms (e.g. SP 37); and
- Forward same on the injured member's behalf.

Within seven (7) days of receipt of claim, submit to the Troop/Section/Unit Commander:

- Statement in Support of Claim, after completing Section 8;
- Notice of Injury;
- Injured member's To-From along with all supporting documentation;
- Any witness statements; and
- Medical Records and Medical Bills, as available.

Troop/Section/Unit Commander shall:

- Complete Section 9 of the Statement in Support of Claim;
- Prepare a To/From letter to the President of the Board on Claims, which shall include a brief account of the facts concerning the injury and conclusions regarding the cause of the injury and forward:
    - Investigating Officer's Report and documentation; and
    - The Statement in Support of Claims.
- Forward a copy of the Board on Claims decision letter to the injured member.

Investigation/ Documentation Protocols, continued

Troop/Section/Unit Commanding Officer shall, if the injured member is unable to return to duty:

- Place the member on ILP (members who have a recurrence of a previous injury should be placed on Sick Leave); and
- Notify the Occupational Health Unit of the status and request an appointment with the State Police Surgeon.

The **State Police Surgeon** shall:

- Conduct an initial evaluation of the injured member to determine the member's duty status;
- Schedule periodical examinations as deemed necessary to determine the member's duty status;
- Determine and recommend a member's eligibility for Modified Duty; and
- Report to the Department when a member is medically able to return to full duty status.

Recurrent Injuries

All recurrent injuries shall be reported using the same process as new injuries.

Members with any recurrent injuries shall be placed on Sick Leave until officially approved and placed on ILD status.

While on Injured Leave

Members on injured leave may only leave the Commonwealth:

- With authorization of their Commanding Officer.

Supervisors shall ensure compliance with:

- ADM-19 Vehicle Management with regards to Department issued vehicles; and
- ADM-20 Weapons Management with regards to Department issued weapons.

Return to Duty

<u>Any leave or break in service 90 days – 1 year:</u>

Members returning from <u>any</u> leave, temporary modified duty or break in service exceeding ninety (90) days requesting full duty status shall ensure the tasks below are completed in the following sequence:

- The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty;
- Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty;

Return to Duty, continued

- The member shall then be required to successfully complete:
  - Online academy;
  - Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
    1. Patrol Procedures
    2. Defensive Tactics
    3. EVOC
    4. Firearms (reissuance of assigned UOF gear and requalification if necessary)
- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Any leave or break in service exceeding 1 year:

Members returning from any leave or break in service exceeding one (1) year requesting full duty status shall ensure the tasks below are completed in the following sequence:

- The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty.
- The member shall then be required to successfully complete:
  - A background investigation;
  - A medical examination by the State Police Surgeon to include drug testing; and
  - Psychological testing.

Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty.

The member shall then be required to successfully complete:

- Online academy
- Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
  - Patrol Procedures
  - Defensive Tactics
  - EVOC
  - Firearms (reissuance of assigned UOF gear and requalification if necessary)
- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Former members wishing to return from a separation from service that exceeds three (3) years shall:

- Meet all requirements for re-entry to the Department; and
- Successfully complete the Recruit Training for appointment to the position of Trooper.

Note: Failure to successfully complete the Recruit Training may affect pension benefits, if applicable.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-11C**

Subject:

Maternity Leave and Guidelines

Policy

The maternity policy is designed to provide notification and employment guidelines in order to prevent workplace discrimination based on pregnancy.

Members shall:
- Not be required to disclose her pregnancy except in accordance with this policy.

The Department shall only take action when;
- Requested by the member; or
- The member's physician or obstetrician recommends work limitations.

Notification Requirements

A member shall notify her commanding officer that she is pregnant, when she has:
- Reached her third trimester of pregnancy;
- Requested modification, exemption, or leave from her assigned duties; or
- Been given physical restrictions or limitations by her healthcare provider that prohibits her from performing all aspects of her current assignment.

All notifications shall be made:
- In writing, and include the anticipated due date as well as the anticipated date of return to work (if known).

Notification Process

The member shall submit to her commanding officer:
- Within seven (7) days of the initial notification, a letter from her healthcare provider regarding her pregnancy; and
- Every thirty (30) days thereafter, a written update from her attending physician or obstetrician.

Notification Process, continued

Each letter shall contain:

- Name, address and contact information for the attending healthcare provider;
- Any restriction or limitation on her current work assignment, if none, the letter shall explicitly state so;
- Anticipated due date;
- Anticipated date for return to work (if known); and
- Any other information the member or healthcare provider believes would be of assistance to the Department.

Duty Status

A member not placed on alternative duty shall:

- Perform all duties required of her in her current position until such time as other duties are assigned consistent with this policy.

If the member has not notified the Department of her pregnancy and sought alternative duty status under this policy then her pregnancy:

- Cannot be a defense to any disciplinary action taken against her for failure to perform her duties.

A member may request in writing, at any time during her pregnancy, to be assigned to alternative duty. Alternative duty shall:

- Not affect the member's existing benefits;
- Be consistent with restrictions or limitations identified by her attending regarding:
  - Overtime and paid details;
  - Interaction with prisoners;
  - Interactions with the public in an enforcement capacity; and
  - Dangerous duty such as riots.

  <u>Exception</u>: Any emergency situation that may require the immediate response of the member.

Voluntary Alternative Duty

The Colonel/Superintendent or designee shall:

- Approve and determine a member's request for alternative duty assignment taking into consideration the pregnant member's current assignment and duties.

Eligibility for an alternative duty assignment:

- Does not entitle the member to be transferred to a different position or unit within the Department.

Alternative duty may be:

- A form of modified duties and/or an altered work shift at the request of the member; and
- Consistent with any restrictions or limitations set forth by her attending healthcare provider.

Voluntary Alternative Duty, continued

Eligible Members:

- Shall not be transferred or have their shift changed involuntarily as the result of seeking alternative duty, however, a reasonable accommodation may require the member to accept temporary assignment in the geographic area of her current assignment or residence.

Involuntary Alternative Duty

The Department may involuntarily reassign a member to alternative duty based upon medical evidence that the member cannot safely perform her current duties.

A member may challenge such reassignment by:

- Providing a statement from her healthcare provider that she can perform such duties;
- Submit to an examination by a neutral healthcare provider selected by the member from a list agreed upon by the Department and the representatives of the member's collective bargaining unit;
- Remain in her current duty assignment pending receipt of the opinion of the neutral healthcare provider; and
- Be bound by the opinion of the neutral healthcare provider.

The neutral healthcare provider shall:

- Examine the member and determine whether she can perform the duties of her assigned position; and
- Render an opinion which shall be binding upon the Department and the member.

Duty Assignment

When an alternative duty assignment is unavailable within a member's current assignment, the Colonel/Superintendent or designee shall:

- Find an appropriate alternative assignment within the member's immediate geographic area as defined by the Troop Area of her current assignment or her residence; and
- Ensure no member be denied such an assignment within her current assignment or immediate geographic area.

If a member believes that she has been unreasonably denied such an assignment in violation of this policy the member shall:

- Submit a To-From outlining the objections to the Colonel/Superintendent or designee.

The Colonel/Superintendent or designee shall:

- Endeavor to remedy the member's concerns within seventy-two (72) hours of receipt of the notice; or
- Respond, in writing, stating the position of the Department with respect to the request.

Department Standards

A member who has notified the Department of her pregnancy in accordance with this policy shall:

- Be exempt from weapons qualification requirements during the course of her pregnancy; and
- Be required, upon return to full duty status, to meet the Department's medical and in-service standards.

Department Issued Vehicles

A member who is placed on alternative duty shall be:

- Issued an unmarked vehicle while on an alternative duty status.

If the Department is unable to provide the member with an unmarked vehicle, the member shall be:

- Provided with a per diem rate in accordance with the same terms and conditions as apply to members of equal rank assigned to the Massachusetts Port Authority.

Members who are currently assigned an unmarked vehicle shall be allowed to continue to operate the vehicle.

Supervisors shall ensure compliance with:

- ADM-19 Vehicle Management with regards to Department issued vehicles.

Members Rights

The member retains all such rights available to her under the collective bargaining agreement, state and federal law to challenge the decision of the Colonel/Superintendent or designee with respect to such a determination by the Colonel/Superintendent or designee as to the implementation of this policy.

MPAC: 22.2.0.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-11E**
Subject:	
Leaves of Absence	

Policy

The Department may grant to a sworn or a civilian employee a leave of absence, with or without pay, as allowed by:

- Federal and state law;
- Commonwealth's Human Resources Division (HRD);
- Collective Bargaining Agreements (CBA), Personnel Administration Rules (PAR), HRD Red Book;
- Military Leave pursuant to ADM-26 Military Service; or
- The Colonel/Superintendent.

Leave Coordinator

The Division of Administrative Services (DAS) Commander shall appoint a Leave Coordinator who shall be responsible for:

- Receiving and processing specified requests for leave;
- Assisting employees with paperwork requirements;
- Assisting and coordinating with Commanding Officers and the Colonel/Superintendent to evaluate requests for leave;
- Coordinating the requirements for employees returning from leave;
- Ensuring personnel records, payroll history, health insurance and other benefits are updated or administered as necessary; and
- Consulting with Office of Employee Relations and Legal Section regarding leave requests.

Approval of Leave

The Leave Coordinator shall forward all requests for leave to the Colonel/Superintendent. The Colonel/Superintendent may approve or deny leave based upon:

- Applicable federal and state laws, and collective bargaining agreements;
- Operational needs of the Department;
- The purpose of the leave; and/or
- Other factors that may exist.

The Leave Coordinator shall notify an employee, in writing, of the decision of the Colonel/Superintendent.

Conduct on Leave

An employee on a leave of absence for any duration shall:

- Adhere to and abide by all Department Rules & Regulations, Policies & Procedures, applicable written directives, and collective bargaining agreements;
- Not work any details or overtime with exception of court service; and
- Notify their supervisor immediately upon receipt of a subpoena, summons, or other court order. Supervisors shall make every effort to postpone the court date, or provide a substitute witness, where feasible and appropriate. As a last resort, the employee shall appear in court as ordered. Any questions or concerns regarding appearances in court shall be forward to the MSP Legal Section for review.

An employee who is on any form of leave more than thirty (30) days shall return the following issued equipment to their Troop/Section/Unit Commander:

- All issued Department firearms and ammunition;
- All issued Department UOF equipment;
- Assigned vehicle along with vehicle issued equipment;
- Department issued fuel card, transponder and snow gate access cards; and
- All issued electronic devices (e.g., cell phone, laptop computer).

Troop/Section/Unit Commanders shall contact the issuing section regarding storage.

Bereavement Leave

Employees are entitled to leave, without loss of pay or benefits, in recognition of the death of family members or persons living in the household of the employee, in accordance with their respective collective bargaining agreements.

Blood Donation Leave

Employees are permitted a maximum of four (4) hours leave of absence with pay, subject to operational needs and the approval of their supervisor, specifically to enable the employee to donate blood. The decision of their supervisor cannot be appealed.

To qualify for the Blood Donation Leave, an SP 635 Employees Blood Bank form shall be completed certifying the date, location, times and type of blood donation.

Leave time is for:

- Travel from assigned work location to the donation site;
- Actual donation time;
- Recovery from donation; and
- Travel time back to assigned work location.

Leave Time
- Shall be taken on the day the donation occurs;
- Employees shall not accrue compensatory time in lieu of such leave;
- Blood Donation Leave is permitted a maximum of five (5) times per federal fiscal year, the period of October 1 through September 30.

Education Leave

Purpose

Employees may be granted a paid leave of absence for educational purposes to attend conferences, seminars, briefing sessions, or other functions of a similar nature that are intended to improve or upgrade the individual's skills or professional ability.

Request Procedure

A request shall be made in writing to the Leave Coordinator at least forty-five (45) days in advance of the desired leave, or if unforeseen, as soon as possible.

Requests shall include:
- The anticipated start and end dates of training;
- A thorough description of the training accompanied by documentation from the institute hosting the training;
- Rationale for the relationship of the training to the employee's work unit, and/or the Department as a whole; and
- Professional development training requests shall be guided by TRN-01 Training Administration.

Approval

Approval is entirely at the discretion of the Colonel/Superintendent, and is not subject to appeal.

Considerations may include, but not be limited to:
- Costs and benefit of the training to the Department as a whole;
- Benefit of the training to the individual employee and their work unit; and
- The reasonable relationship of the training to the individual employee's work assignment.

Extended Illness Leave Bank (EILB)

EILB is a voluntary program to assist employees who have expended their accrued paid leave due to an extended personal illness or injury, thereby enabling the employee to remain on paid leave within the limits of the program.

Eligibility
- To be eligible for membership, employees shall annually donate an amount of sick, vacation or personal leave credits to the EILB; and
- Apply to withdraw from the EILB, up to one-hundred and twenty (120) days within a two (2) year period, when extended illness or injury have exhausted all their paid leave time.

Note: Employees seeking further information should contact the Leave Coordinator.

Family and Medical Leave (FMLA)

The Department shall grant employees who have completed their probationary period the following Family and Medical Leave in tandem with Workpartners, the absence and leave administrator for the Commonwealth's Executive Department.

Eligible employees may qualify to take leave for these qualifying reasons:

- Bonding with a new child welcomed by birth, adoption, or foster placement;
- For a serious health condition that makes the employee unable to perform the essential functions of their job;
- To care for a family member with a serious health condition;
- To care for a covered servicemember with a serious injury or illness (employee's spouse, child, parent, or next of kin); and/or
- For any qualifying exigency arising out of the fact that an employee's family member is on active military duty or call to covered active-duty status.

Note: Employees shall consult their applicable collective bargaining agreements for specific benefits, durations, definitions, and other information for cited leave.

Request Procedure

Requests shall be made in writing to the Department Leave Coordinator and with Workpartners, by visiting the following website: https://www.mass.gov/info-details/commonwealth-absence-and-leave-management, at least thirty (30) days in advance of the desired leave, or if unforeseen, as soon as possible.

The request shall include the following:

- Your name;
- Your date of birth;
- Your mailing address;
- Your email address (for quicker receipt of documents);
- The start and expected end date of the leave;
- The reason for the leave (including family member name, if relevant); and
- Appropriate documentation (Workpartners will advise on the appropriate documentation needed for the respective leave request.)

Note: Day-to-day sick calls are NOT administered through Workpartners. Employees are required to continue Department protocol for day-to-day sick calls.

Non-FMLA Family Leave

The Colonel/Superintendent may grant employees who have completed their probationary period, Non-FMLA Family Leave in accordance with the appropriate collective bargaining agreement.

Request Procedure

Requests shall be made in writing to the Leave Coordinator at least fourteen (14) days in advance of the desired leave, or if unforeseen, as soon as possible.

The request shall contain the following:

- The anticipated start and end dates of leave, or the intended days for incremental use; and
- The specific reason for the requested leave and any documentation the employee may have in support of the leave request.

Note: Employees shall consult their applicable collective bargaining agreements for specific benefits, durations, definitions, and other information for cited leave.

Paid Family and Medical Leave (PFML)

Paid family and medical leave (PFML) is paid time off of work for family or medical reasons. The Department shall grant employees the following Paid Family Medical Leave in tandem with the Department of Family and Medical Leave (DFML), the PFML administrator for the Commonwealth's Executive Department.

Eligible employees may qualify to take leave for these qualifying reasons:

- Bonding with a new child welcomed by birth, adoption, or foster placement;
- For a serious health condition that makes the employee unable to perform the essential functions of their job;
- To care for a family member with a serious health condition;
- To care for a covered servicemember with a serious injury or illness (employee's spouse, child, parent, or next of kin); and/or
- For any qualifying exigency arising out of the fact that an employee's family member is on active military duty or call to covered active-duty status.

Note: Employees shall consult their applicable collective bargaining agreements for specific benefits, durations, definitions, and other information for cited leave.

Request Procedure

Requests shall be made in writing to the Department PFML Coordinator and with the Department of Family and Medical Leave, by visiting the following website: https://www.mass.gov/how-to/how-to-apply-for-paid-family-and-medical-leave-pfml at least thirty (30) days in advance of the desired leave, or if unforeseen, as soon as possible.

Paid Family and Medical Leave (PFML), continued

The employee shall include the following information on the application:

- The reason you are taking leave;
- The date you notified your employer that you need to take leave; and
- The date when you are planning to take leave, or when your leave started.

Leave of Absence Without Pay

Authorization

The Colonel/Superintendent may grant employees authorized leave of absence without pay for up to ninety (90) days and/or grant an extension of leave of absence upon written request filed by the employee.

Request Procedure

Requests for Leave of Absence Without Pay shall be made in writing to the Leave Coordinator at least thirty (30) days in advance of the desired leave, or if unforeseen, as soon as possible.

- The written request shall contain the following:
  - Anticipated start and end dates of said leave;
  - A detailed statement of the reason for the leave;
  - In the event that the absence is illness/injury related, written requests shall be accompanied by substantiating proof of such illness.

Sworn Members – Return to Service Requirements

The Leave Coordinator shall inform sworn members of any requirements necessary for return to service from leave.

Returning to Service – FMLA-Medical Leave or Authorized Leave of Absence Without Pay:

- Members returning to service due to their own illness/injury that exceeds ten (10) days shall:
  - Notify their Commanding Officer to contact the Occupational Health Unit to schedule an appointment with the State Police Surgeon prior to returning to work; and
  - Have a recommendation from the State Police Surgeon for return to service.

Any leave or break in service 90 days – 1 year:

Members returning from any leave, temporary modified duty or break in service exceeding ninety (90) days requesting full duty status shall ensure the tasks below are completed in the following sequence:

- The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty;
- Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty;
- The member shall then be required to successfully complete:

- Online academy;
- Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
    1. Patrol Procedures
    2. Defensive Tactics
    3. EVOC
    4. Firearms (reissuance of assigned UOF gear and requalification if necessary)

- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Any leave or break in service exceeding 1 year:

Members returning from any leave or break in service exceeding one (1) year requesting full duty status shall ensure the tasks below are completed in the following sequence:

- The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty.
- The member shall then be required to successfully complete:
    - A background investigation;
    - A medical examination by the State Police Surgeon to include drug testing; and
    - Psychological testing.

Sworn Members – Return to Service Requirements, continued

Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty.

The member shall then be required to successfully complete:

- Online academy
- Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
    - Patrol Procedures
    - Defensive Tactics
    - EVOC
    - Firearms (reissuance of assigned UOF gear and requalification if necessary)
- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Former members wishing to return from a separation from service that exceeds three (3) years shall:

- Meet all requirements for re-entry to the Department; and
- Successfully complete the Recruit Training for appointment to the position of Trooper.

Note: Failure to successfully complete the Recruit Training may affect pension benefits, if applicable.

Returning From Leave: Civilians

Return From Leave

- Civilian employees returning from a leave that exceeds one (1) year shall be required to successfully complete:
  - A background investigation;
  - A drug test;
  - A medical examination by the State Police Surgeon, as applicable, if returning from medical leave where the employee was the one that was ill; and
  - Retraining, as determined by the employee's supervisor or the Human Resources Director.

Sworn Members Returning From Disability

In addition to the previously listed requirements, sworn members returning from disability retirement shall have a medical evaluation conducted in conformance with M.G.L. c. 32, and the standards of the Commonwealth of Massachusetts Public Employee Retirement Administration Commission.

Benefits

Employees may be required to pay premiums for certain benefits while on leave.

Military Leave

Refer to Policy and Procedure ADM-26 Military Service.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-12**
Subject:	
Serious Injury/Death of a Member	

Policy

The Department recognizes that the death or serious injury of a member is traumatic and shall provide assistance to the member's family, recognizing that the needs of the family generally take precedence over the wishes of the Department.

Department members shall:
- Ensure that whenever a member's next of kin calls, their questions are answered honestly and openly.

OFF-DUTY Death Notification Procedure

When any member becomes aware of the death of a current or retired member of the Department of State Police, or an immediate member of their family, they shall immediately:
- Notify the Office of the Superintendent through channels.

Information for notification shall include:
- Personal information on the deceased person;
- The circumstances of the death;
- Any funeral arrangements; and
- A family contact person.

The Office of the Superintendent shall notify:
- Members of the Department; and
- Special effort shall be made to contact the member's graduating class.

ON-DUTY Death Notification Procedure

If the death or life threatening injury occurs on-duty, the member's Commanding Officer or designee shall immediately notify:
- The Office of the Superintendent.

The Colonel/Superintendent shall immediately:
- Assign a ranking member to personally contact the member's immediate family; however
- Every effort shall be made to use a member of the Department who is a personal friend, along with the ranking member.

Liaison Member

If the family chooses, the Colonel/Superintendent shall:

- Appoint a Department member as a liaison, to provide additional assistance to the immediate family of the deceased/injured member or retiree.

As a guide, the liaison member should:

- Assist the family in contacting clergy, friends, and relatives;
- Assist the family with funeral arrangements;
- Provide transportation assistance for the immediate family;
- Arrange for security needs of the home and screening of phone calls prior to and on the day of the funeral;
- Coordinate the family's efforts to determine the status and amounts of compensation to which the deceased member may be entitled; and
- Keep the Colonel/Superintendent informed of all arrangements and developments.

Honor Guard

The Colonel/Superintendent shall:

- Designate a member to be the Officer-in-Charge (OIC) of the funeral detail.

The OIC shall:

- Coordinate with the liaison member; and
- Adhere to GEN-04A Ceremonial Tributes regarding funeral details.

References: GEN-04A Ceremonial Tributes;
SUP-04 Employee Assistance Unit.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-13**

Subject:

Notification of Medical Examiner and/or Next of Kin

Policy

The Department shall promptly and compassionately notify the nearest relative of victims who have sustained life threatening injuries, or passed away.

Notification of Medical Examiner

The Medical Examiner (ME) of jurisdiction shall be notified whenever a member of the Department becomes aware of a death (Specific circumstances appear in MGL c.38, §4, 6.).

Responsibilities

Note: The District Attorney's Office or State Police Detective Unit (SPDU) of jurisdiction shall direct the investigation of all homicides, suicides, and unattended deaths (including traffic fatalities, as requested by the Office of the District Attorney of jurisdiction).

Position	Duties
First member at the scene	• Notify the Barracks Desk Officer. • For all homicides, suicides, and unattended deaths, secure the scene, pending arrival of the SPDU of jurisdiction.
Station Desk Officer	• Immediately notify the Troop Duty Officer.
Troop Duty Officer	Immediately notify the appropriate: • SPDU of jurisdiction of all homicides, suicides, and unattended deaths, and take any action requested; and • Local ME Office, as requested by SPDU. If the ME declines to respond to the scene, request authority from the ME to remove the body. If the ME is unavailable, contact the Office of the Chief Medical Examiner at (617) 267-6767 and request authority to remove the body.
Troop Commanders	Ensure that their Troop Duty Office has an updated list of Medical Examiners' phone numbers and addresses.

Next of Kin

Every effort should be made to locate the next of kin in the order of:

- Live-in spouse;
- Parents or legal guardian;
- Adult children;
- Brother or sister; or
- Other relatives.

Request for Notification

Members may be called upon to notify the next of kin that a family member or friend has been seriously injured or is deceased. Except under unusual circumstances, **this notification should be made in person.** No identifying information of the victim or their family shall be transmitted via radio.

Position	Responsibility

Members receiving request to notify the next of kin	• Request as much information as possible, to include:
	  o Cause of death and/or injuries;
	  o Location of deceased or injured person; and
	  o Contact person and telephone number.
	• If the member is unfamiliar with the caller, seek to confirm the information.
	• Notify Troop Duty Officer.

Troop Duty Officer	• Notify the appropriate Detective Unit of all homicides, suicides, and unattended deaths (including traffic fatalities if so requested by the DA's Office of jurisdiction). • Determine who shall make the notification to the next of kin. • If the notification is not to be made in person, determine what means shall be used.

District Attorney Offices

Whenever there is a homicide, suicide, or unattended death, the Division of Investigative Services shall determine the notification process. Members assigned to an Office of a District Attorney shall follow the protocols promulgated for their particular office.

All other notifications shall be made by the Division of Field Services.

Field Services Procedure

Whenever possible, two (2) members shall be sent to make a notification of serious injury, illness, or death.

The member who is making the notification should carefully prepare their message before speaking with the next of kin. When possible, members shall:

- Seek assistance from clergy, relative, or close friend of the family;
- Make the notification in a private setting, and ask the recipient to sit down;
- Deliver the information to the recipient in a gradual manner;
- Observe the recipient carefully as the information is given;
- If possible, do not leave the recipient alone. Members should attempt to contact a relative, friend, or neighbor to stay with the recipient; and
- When the recipient is operating a motor vehicle, the member shall ascertain if they are able to continue driving. If not, members may transport or make transportation arrangements for the recipient.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-14**
Subject:	
Internal Department Investigations	

Policy

To protect the integrity of the Department and to ensure continued public support:

- All Department employees shall adhere to the Department's Policies and Procedures regarding external complaints (including anonymous complaints) against any employee, or involving any policy, procedure, or operation of the Department;
- All complaints shall be documented and investigated according to complaint intake procedures;
- Complaints, when assigned, shall be investigated at the lowest appropriate organizational level, unless determined otherwise by the Division of Standards and Training (DST) Commander or designee;
- All complaints against Department employees and/or the Department shall be maintained in a secure manner to protect confidentiality;
- The withholding of officers' disciplinary records related to a misconduct investigation as a public records exemption is prohibited;
- Access shall be provided to the Peace Officer Standards and Training Commission's (POST) Division of Police Standards to audit all records related to complaints, investigations, and personnel records pursuant to the rules and regulations promulgated by POST;
- The DST Division Commander, or designee, shall transmit any officer misconduct complaint received by the Department in accordance with MGL c.6E § 8(b) within 2 business days to the division of police standards in accordance with POST requirements;
- The DST Division Commander shall notify the Colonel/Superintendent of complaints against Department employees and/or the Department.
  - Immediate notification shall be made in cases involving allegations of serious misconduct.
  - Weekly reports shall be provided verbally on all other complaints or involving complaints against a sworn member;
- DST shall comply with the investigation and notification requirements of MGL c. 6E, § 8(b) and §10(h); and
- The Colonel/Superintendent shall have the authority to conduct and/or direct an inquiry as necessitated by circumstance.

Definition

Internal Investigation: An investigation or inquiry related to complaints against Department policy, procedure or operations.

Personnel Investigation: An investigation or an inquiry into the actions of an employee that may result in charges of misconduct.

Rights of the Accused Employee

An accused employee shall:

- Receive a copy of the complaint, including the name of the complainant, if known, prior to any employee interrogation;
- Be afforded full constitutional and other legal protections; and
- Be afforded the appropriate protections under applicable collective bargaining agreements.

Rights of the Complainant

The Complainant shall be:

- Notified of the receipt of the complaint, and the steps to be taken;
- Given a status report when requested; and
- Notified of the final disposition classification.

Use of Examinations

If, during an investigation, it becomes necessary to request an employee to submit to an examination or required test(s), the Troop/Section/Unit Commander shall contact DST for approval.

The results of medical tests shall be afforded appropriate privacy rights according to applicable laws.

Complaint Intake Procedures

A complaint that requires <u>immediate attention</u> shall:

- Be immediately referred to the Troop/Section/Unit Commander, Duty Officer or Shift Supervisor.

<u>External Complaints</u>

External complaints are to be completed by the Complainant on a SP 340 Public Response Form. The Complainant may obtain a SP 340 by:

- Contacting a State Police facility for instructions;
- Arriving in person to a State Police facility and securing a copy of a SP 340;
- Downloading the SP 340 form from the State Police external website http://www.mass.gov/msp or https://www.mass.gov/how-to/submit-a-public-response-report ; or
- Calling the Public Response Intake Line (508) 988-7003 and following the prompts.

Complaint Intake Procedures, continued

When a Complainant calls or arrives at a State Police facility the following shall occur:

- The Desk Officer or employee who attends to a Complainant, either by telephone or in person, shall:
  - If applicable to their work assignment, log only the name and address of the Complainant into the Daily Administrative Journal (DAJ) (the Complainant should not be asked to identify the employee(s) named in the complaint, nor should any employee information pertaining to this complaint be included within the DAJ entry). Note: DAJ information would also include anonymous complaints or when the Complainant refuses to give his/her name;
  - Give the Complainant a copy of the SP 340 form; or
  - Instruct the Complainant on how to obtain a SP 340 form from the above options;
  - Ensure the Complainant understands all options and the submission procedure; and
  - Assure the Complainant that all complaints shall be addressed by the Department.

In instances where the Complainant demands to immediately speak to a supervisor the following shall occur:

- Division of Field Services employees shall notify the Troop Duty Officer of jurisdiction and then refer or forward the Complainant to the same Troop Duty Officer; or
- Division of Investigative Services, Division of Administrative Services, Division of Standards and Training, and Division of Homeland Security and Preparedness employees shall notify a Commissioned Officer from within their Division and then refer or forward the Complainant to the same Commissioned Officer.

The Troop Duty Officer or the Division Commissioned Officer shall:

- Record the Complainant within the DAJ, if applicable to his/her work assignment. Note: DAJ information would also include anonymous complaints or when the Complainant refuses to give his/her name;
- Explain the complaint intake procedure to the Complainant;
- Instruct the Complainant on how to obtain a SP 340 form from the above options; and
- Assure the Complainant that all complaints shall be addressed by the Department.

Employees who receive complaints about their own conduct shall immediately:

- Notify their Troop Duty Officer or a Commissioned Officer within their Division; and
- Transfer or refer the Complainant to the same Troop Duty Officer or Commissioned Officer within their Division.

Complaint Intake Procedures, continued

Internal Complaints

Internal personnel complaints originating within the Department by any employee shall be documented in a To/From format. The To/From shall be submitted in the following manner:

- Copy faxed or emailed to DST within twenty-four (24) hours from the date of the To/From;
- Copy submitted through channels to the appropriate Troop/Section/Unit Commander; and
- Original forwarded to DST.

SP 340 Public Response Form Submission

SP 340 Public Response Form shall be submitted in the following manner:

- Delivered in person to the Massachusetts State Police General Headquarters, 470 Worcester Road Framingham, MA 01702 / Public Response Reports; or
- Faxed to: The Division of Standards and Training / Public Response Reports (508) 820-2149; or
- Emailed to: The Division of Standards and Training/ Public Response Reports at publicresponsereports@pol.state.ma.us; or
- Mailed to: The Massachusetts State Police Division of Standards and Training/ Public Response Reports, 470 Worcester Road Framingham, MA 01702.

Interviews

For all interviews, reasonable arrangements shall be made to accommodate the schedules of the parties involved.

Interviews may be recorded mechanically or by a Department stenographer. The accused employee may independently record his/her own interview.

Investigation

Step	Action
1	Supervisors shall conduct assigned investigations within thirty (30) days.
2	The complaint shall be categorized as: • Employee's conduct; • Validity of the enforcement action taken; • Department policy, procedure, or operations; or • Other.
3	The investigating member shall make a conclusion of fact for each complaint, which shall be reviewed by the appropriate Troop/Section/Unit Commander. Dispositions shall be classified as: • **Unfounded** - Complaint or incident is false and not factual. • **Exonerated** - Incident occurred, but employee's action was lawful and proper. • **Not Sustained** - Insufficient evidence to prove or disprove the complaint. • **Sustained** - The complaint or incident is supported by sufficient evidence to prove employee misconduct.

4	Complaint dispositions classified as **Unfounded**, **Exonerated, or NOT- Sustained,** and not alleging serious misconduct, shall be filed within the Internal Affairs database. For **Sustained** disposition classifications the Troop/Section/Unit Commander shall: • Prepare a memorandum indicating the category of the complaint, and recommendations; and • Forward the memorandum, with all completed reports and correspondence, through channels to DST.
5	The affected employee and Complainant shall be notified of the final disposition classification by the Troop/Section/Unit Commander or the DST Commander.

Note: Nothing in this policy should prevent members from taking appropriate and timely action for any allegations of criminal activity or criminal acts.

Responsibilities

Position	Duties
All Employees	• Follow the complaint intake procedures; and • Ensure the Complainant understands: o All options for acquiring a SP 340; o The SP 340 submission procedure; and o That all complaints shall be addressed by the Department.
Supervisor	• Follow the complaint intake procedures; and • Review complaints and conduct investigations when assigned.
Troop Duty Officer or Division Commissioned Officer	• Follow the complaint intake procedures; and • Ensure the Complainant understands: o All options for acquiring a SP 340; o The SP 340 submission procedure; and o That all complaints shall be addressed by the Department.
Troop/Section/Unit Commander	• Initiate investigations on complaints about employees under their supervision or command as assigned by DST; and • Forward completed reports and recommendations to the DST Division Commander within thirty (30) days of assigned date. Note**:** DST may authorize a time extension upon a written request.
Complaint Intake Officer	• Process SP 340 received according to standards established by DST.

Office of Professional Integrity and Accountability	• Provide oversight of all personnel investigations in accordance with the Section's Standard Operating Procedure (SOP).
Division Commander	• Review investigative reports; • Forward recommendations and requests for disciplinary action to DST; and • Issue letters of counseling as appropriate.

Responsibilities, continued

Position	Duties
Division of Standards and Training	• Review complaints in accordance with the Division's SOP; • Notify the Division Commanders of any personnel investigations conducted by Office of Professional Integrity and Accountability; and • Review recommendations for disciplinary action with the Deputy Superintendent.
Deputy Superintendent	• Review recommendations for disciplinary action with DST; and • Administer disciplinary action as appropriate which has been approved by the Colonel.
Colonel/Superintendent	• Refer personnel investigations to entities outside the Department, as necessary; and • Review, prescribe and impose discipline.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-15**

Subject:

Office of Professional Integrity and Accountability Investigations

Policy

The Office of Professional Integrity and Accountability (OPIA) investigates allegations of serious misconduct by employees of the Department or as ordered by the Office of the Superintendent (OS) or the Division of Standards and Training (DST).

In accordance with MGL c. 6E, § 10(h), OPIA shall complete an internal affairs investigation into officer misconduct and issue a final disposition within one year of receiving a complaint or notice from the POST commission of the complaint being filed. The POST commission may, upon a showing of good cause, extend the time to complete the investigation upon notification from OPIA.

Organization

OPIA has the authority to report directly to the OS.

Serious Misconduct

Serious misconduct includes, but is not limited to, acts of:

- Corruption;
- Criminal conduct;
- Use of excessive force; and
- Civil rights violations.

Jurisdiction

Complaints are investigated at the lowest appropriate organizational level in accordance with ADM-14 Internal Department Investigations.

OPIA may investigate any complaint when:

- Requested by the Troop/Section/Unit Commander, with approval from DST;
- Directed by the OS or DST; or
- The complaint alleges serious misconduct.

The Colonel/Superintendent shall have the authority to conduct and/or direct an inquiry as necessitated by circumstance.

Use of Examinations

Upon the approval of the DST Commander or designee, any employee subject to an internal investigation may be asked to submit to tests, examinations, and/or disclosures. These procedures may include, but are not limited to, the following:

- Ballistics and chemical tests;
- Submission to photographing;
- A photograph array or line-up;
- Forensic and polygraph examinations;
- Financial disclosure statements;
- Audio/video recordings; and
- Medical and/or laboratory examinations.

Examinations and/or tests shall be:

- Relevant and material to the subject investigation;
- Specifically directed and narrowly related to such investigation; and
- Completed within a reasonable time and according to professionally accepted standards.

For Internal Affairs Investigations, a polygraph examination may only be used in investigations of criminal conduct.

The results of medical tests shall be afforded appropriate privacy rights according to applicable laws.

Procedure for OPIA Cases

Step	Action
1	Open an OPIA case file.
2	Notify the affected employee in writing regarding: • The nature of the investigation; • The employee's rights as legally required; and • The employee's responsibilities relative to the investigation. NOTE: The OPIA can request written authorization from DST not to notify the employee if the notification could hinder the investigation. However, the employee must be informed of the nature of the investigation before any interrogation takes place of the employee.
3	Provide notification to the employee's Commanding Officer, unless it would hinder the investigation.
4	Conduct the investigation in a timely manner.
5	Prepare a report on the investigation for DST, with supporting facts for each allegation and a classification of the complaint: • Unfounded; • Exonerated; • Not Sustained; or • Sustained.
6	In accordance with MGL c.6E §8(b) DST shall act as the designee of the Colonel. Upon completion of the internal investigation of a complaint DST shall immediately transmit to the POST Commission division of police standards an

	investigation report in a form determined by the commission. Further, upon the final disposition of the complaint, DST shall immediately transmit to the division of police standards a final report in a form to be determined by the Commission.
7	The DST Commander shall notify the affected employee in writing, through channels, of the decision(s).
8	All case files shall be permanently retained.

Notifying Prosecuting Agencies Regarding Evidence

Policy

Prosecuting agencies shall be notified of any and all Departmental investigations, to include personnel and/or internal affairs investigations associated with an open criminal prosecution or investigation. Department members who generate records, percipient witness statements, and/or evidence that relate to a criminal prosecution shall and must notify the appropriate agency prosecuting the case. The assigned lead Departmental investigator in any criminal or administrative investigation is responsible for ensuring such notification is made.

Definitions

Internal Affairs Investigation: Any investigation conducted pursuant to ADM-15 Internal Affairs Investigations.

Personnel Investigation: Pursuant to ADM-14 Personnel Investigations, any investigation or inquiry into the actions of an employee that may result in charges of misconduct.

Reporting

A Department investigator assigned to an investigation, to include personnel and/or internal affairs investigations, shall:

- Determine whether the investigation to which he or she is assigned relates to the same facts and circumstances of an open criminal prosecution or investigation;
- Notify the agency prosecuting the open criminal matter of the related Departmental investigation; and document the same in official Department records;
- Upon request of the prosecuting agency, provide any related Departmental records, percipient witness statements and/or evidence to said prosecuting agency, and advise their supervisor and the State Police Legal Section of documents/evidence being provided. The Legal Section will document and maintain a record of the documents or evidence that were provided;
- If the lead investigator believes such notification may adversely affect the investigation to which they are assigned, they shall immediately address the same in writing through their chain of command with a final determination documented in official Department records.

Employee Evaluation System

Policy

The Department shall continuously maintain an Employee Evaluation System (EES) to establish and measure performance expectations for sworn members.

The EES shall be conducted in accordance with the Department's EES Manual.

EES Coordinator

The EES Coordinator shall be a Commissioned Officer or Program Coordinator designated by the Division Commander of Standards and Training or designee.

EES Purpose

EES is a proven tool for continuous individual and organizational improvement. Some primary purposes of EES are to:

- Maintain continuous supervisor/employee lines of communication and feedback;
- Motivate employees to improve by understanding their needs;
- Establish goals and objectives at all organizational levels;
- Evaluate the quality of performance; and
- Evaluate the readiness to handle enhanced responsibilities.

Subject:

Unlawful Harassment, Sexual Harassment and Discrimination

Policy

The Department shall promote and maintain a working environment free from unlawful harassment, sexual harassment and discrimination.

Purpose

This policy addresses all forms of sexual harassment and addresses discrimination and unlawful harassment based on race, color, religious creed, national origin, age (40 or older), sex (including pregnancy), gender identity or expression, sexual orientation, genetic information, ancestry, handicap (disability), protected veteran status, participation in discrimination complaint-related activities or other protected class under law.
Note: The definitions found in 804 CMR 3.00, et seq., as amended (the MCAD's *Employment Discrimination Guidelines*), shall be applicable to, and are hereby incorporated into, this policy.

This policy does not address conduct, conflicts, or disagreements otherwise addressed through the chain of command or within Department Policy and Procedures. Internal complaints or concerns, which do not relate to an identified protected class or sexual harassment, will not be addressed under this policy. Such complaints may have another course of action such as in ADM-14 Personnel Investigations or SUP-12 Office of the Ombudsman.

Harassment Investigation Unit (HIU)

The Sexual Harassment Officer for the Department is the Division Commander of Standards and Training.

Harassment Investigation Officer(s) shall be Commissioned Officer(s) assigned by the Colonel/Superintendent and shall report to the Division of Standards and Training.

All Complaint Forms of unlawful harassment, sexual harassment or discrimination shall be forwarded to the Harassment Investigation Unit (HIU). Upon receipt of such such complaint form, the HIU shall perform an intake and may make recommendations for various avenues of resolutions. If the HIU determines an investigation is required, the complaint shall be forwarded to the Commonwealth's Human Resources Division's Investigations Center of Expertise (COE) for investigation and findings. All HIU investigations shall remain confidential to the extent practicable. All Supervisors (except for Supervisors assigned to the Office of the Ombudsman and/or Employee Assistance Unit) shall immediately report

Harassment Investigation Unit (HIU), continued

incidents of unlawful harassment, sexual harassment or discrimination to the Harassment Investigation Unit.

Discrimination Defined

Discrimination is the unequal and unlawful treatment of persons ***in employment related decisions*** because of race, color, religious creed, national origin, age (40 or older), sex (including pregnancy), gender identity or expression, sexual orientation, genetic information, ancestry, handicap (disability), protected veteran status, participation in discrimination complaint-related activities and/or other protected class under law.

Discrimination Examples

Conduct may include, but is not limited to, when the Department:

- Bases employment decisions solely on the race of an applicant; or
- Makes assignments solely on the age of an employee.

Unlawful Harassment Defined

Unlawful harassment is unwelcome conduct that is based on race, color, religious creed, national origin, age (40 or older), sex (including pregnancy), gender identity or expression, sexual orientation, genetic information, ancestry, handicap (disability), protected veteran status, participation in discrimination complaint-related activities and/or other protected class under law.

Harassment becomes unlawful when:

- Enduring the offensive conduct becomes a condition of continued employment; or
- The conduct is severe or pervasive enough to create a work environment that a reasonable person would consider intimidating, hostile, or abusive.

Unlawful Harassment Examples

Conduct may include, but is not limited to:

- Offensive jokes, slurs, epithets or name calling, or other derogatory comments;
- Physical assaults or threats, intimidation, ridicule or mockery, insults or put-downs, or other verbal or physical conduct that denigrates or shows hostility or aversion; or
- Objects, photographs, images, or demeaning gestures connected to an individual's membership in a protected class.

Sexual Harassment Defined

Sexual harassment is unwelcome sexual conduct such as: sexual advances, requests for sexual favors, and/or other verbal or physical conduct of a sexual nature, when:

Sexual Harassment Defined, continued

- Submission to or rejection of such advances, requests or conduct is explicitly or implicitly made a term or condition of employment or as a basis for employment decisions;
- Such advances, requests or conduct have the purpose or effect of unreasonably interfering with an individual's work performance; or
- Such advances, requests or conduct have the purpose or effect of creating an intimidating, hostile, humiliating, or sexually offensive work environment.

It is not necessary to meet the threshold of sexual harassment as defined by law to be considered a violation of this policy.

Sexual Harassment Examples

Examples of sexual harassment, may include but are not limited to:

- Direct sexual advances or assaults;
- Sexual inquiries, jokes, and epithets;
- Derogatory comments about a person's sex, sexual orientation or gender identity or expression;
- Other forms of verbal abuse of a sexual nature, such as whistling or catcalling;
- Offensive or unnecessary touching, pinching, patting, etc.;
- The display of sexually suggestive posters, photographs, or objects; or
- An employee receiving job benefits contingent on sexual favors (quid pro quo).

Sexual Harassment Victims

Victims of sexual harassment <u>may</u> be…	**The harasser <u>may</u> be…**
Of the same or different gender as the harasser.	Of either gender.
A third person who is not the intended target of the sexual harassment or conduct.	Any employee or in certain circumstances someone who is not an employee (vendors, contractors).

Liability and Sanctions

Employees may be personally liable if they engage in unlawful harassment, sexual harassment or discrimination.

Any employee found to have engaged in unlawful harassment, sexual harassment, or discrimination in violation of this policy is subject to disciplinary action up to and including termination.

Supervisors may potentially be personally liable if they knew or should have known about incidents of sexual harassment, and did not take appropriate corrective action.

The Department may not be held responsible in cases of unlawful harassment, sexual harassment, and/or discrimination, if it can show that it took prompt and appropriate corrective action.

Complaint Procedure

Step	Action
1	Process for reporting incidents of unlawful harassment, sexual harassment, discrimination, and/or retaliation: • Notify a supervisor, who shall assist in reporting the complaint to the Harassment Investigation Unit (HIU); • Fax a copy of the SP 387 *Unlawful Harassment, Sexual Harassment and Discrimination Complaint* Form directly to the HIU at (508) 820-2149, or email to MSPHIU@MASSMAIL.STATE.MA.US; • Forward the original SP 387 to the HIU 470 Worcester Road, Framingham, MA 01702; • Report Complaint to the Director of Human Resources at GHQ, who shall forward to the HIU; • Report Complaint to the Diversity Office of the Office of Diversity and Equal Opportunity, who shall forward to the HIU; and • Report Complaint to the Chief Legal Counsel, who shall forward to the HIU.
2	The HIU shall promptly: • Respond to the complainant; • Review all available information pertaining to the complaint; • Determine if the aggrieved individual(s) is/are a member of a class protected under the law and this policy; • Determine if the alleged conduct meets the definition of unlawful harassment, sexual harassment or discrimination as defined in this policy; • Perform an intake and may make recommendations for various avanues of resolutions where appropriate; • If the HIU determines an investigation is required, the complaint shall be forwarded to the Commonwealth's Human Resources Division's Center of Expertise for investigation and findings; • To the extent practicable, ensure that all interviews by HIU are digitally recorded.; • Consult procedures included within the Department's Resolution Process as outlined within the Affirmative Action Plan; and • Make a report of findings and forward report to the Commander of the Division of Standards and Training. Consistent with Commonwealth and Department Policy/Rules and Regulations, and in a manner determined by the Division Commander of Standards and Training, HIU completed confidential reports will be made available for inspection to complainants and persons alleged to have committed unlawful

Complaint Procedure, continued

	harassment, sexual harassment, discrimination and/or retaliation upon request.

3	An employee may also file a complaint with: **Human Resources Division's Investigations Center of Expertise (COE)** **www.mass.gov/service-details/investigations-center-of-expertise** **Phone: 833-778-7270** **E-mail: HRDInvestigations@mass.gov** **Massachusetts Commission Against Discrimination (MCAD)** www.mass.gov/mcad Main Office: One Ashburton Place, Room 601, Boston, MA 02108 Phone 617-994-6000 TTY: 617-994-6196 Regional Offices New Bedford Office: 800 Purchase Street, Room 501, New Bedford, MA 02740 Phone: 508-990-2390 Springfield Office: 424 Dwight Street, Rm. 220, Springfield , MA 01103 Phone 413-739-2145 Worcester Office: 484 Main Street, Room 320 Worcester, MA 01608 Phone 508-453-9630 **Office of Diversity and Equal Opportunity** One Ashburton Place, Room 213 Boston, MA 02108-1516 Telephone 617-727-7441 (Note: this office takes only **Discrimination** complaints.) **US Equal Employment Opportunity Commission (EEOC)** www.eeoc.gov John F. Kennedy Federal Building 475 Government Center, Boston, MA 02203 Phone: 1-800-669-4000 TTY: 1-800-669-6820

4	The Harassment Investigation Unit shall notify the Department's Office of Diversity and Equal Opportunity of complaints of unlawful harassment or discrimination.

Responsibilities

Position	Duties
Supervisors	• Aggressively monitor the workplace to prevent and detect unlawful harassment, sexual harassment, and discrimination; • Take appropriate corrective action to stop all types of unlawful harassment, sexual harassment, and discrimination; • Immediately report incidents of unlawful harassment, sexual harassment, or discrimination to the Harassment Investigation Unit; • Assist any employee in filing a complaint, or obtaining information on the Commonwealth's Sexual Harassment Policy; and • Contact the HIU for information and guidance pertaining to unlawful harassment, sexual harassment and/or discrimination.
All Employees	• Shall not engage in any harassment, sexual harassment, or discrimination; • Shall cooperate in investigations of any harassment, sexual harassment, and discrimination; • Shall actively participate in the Department's efforts to prevent and eliminate any harassment, sexual harassment, and discrimination; and • May contact the HIU for information and guidance pertaining to any harassment, sexual harassment and/or discrimination.

Office of the Ombudsman/ Employee Assistance Unit

All employees should be aware that conversations with the Office of the Ombudsman and/or Employee Assistance Unit are considered confidential and are not the proper venue to notify the Department of unlawful harassment, sexual harassment and/or discrimination complaints. Supervisors assigned to the Office of the Ombudsman or the Employee Assistance Unit are not required to report such complaints through the official chain of command.

Retaliation

Any retaliation against an individual who has complained about unlawful harassment, sexual harassment, discrimination or for cooperating with a complaint and/or investigation of harassment, sexual harassment, or discrimination is unlawful and shall not be tolerated. Any such retaliation shall be a violation of this policy. Incidents of such retaliation shall be reported to the HIU in To/From format.

Subject: **Unlawful Harassment, Sexual Harassment and Discrimination**	Number: **ADM-18**

Distribution of Policy

This policy shall be issued to each employee upon hiring and to all employees annually thereafter. This policy shall be continuously posted and available on DocuShare.

Statewide Policy

The Department shall adhere to the Commonwealth of Massachusetts Human Resources Division Sexual Harassment Policy.

Findings

In the event that an investigation is conducted regarding unlawful harassment, sexual harassment, discrimination, and/or retaliation, the findings shall be classified as one of the following:

- ***Unfounded*** - Complaint or incident is false and not factual;
- ***Exonerated*** - Incident occurred, but employee's action was lawful and proper;
- ***Not Sustained*** - Insufficient evidence to prove or disprove the complaint; or
- ***Sustained*** - Complaint or incident is supported by sufficient evidence to prove employee misconduct.

Cases in which the complainant has withdrawn the complaint shall be classified as Withdrawn. Cases that are approved for an alternate resolution shall be classified as referred. In all cases, a record shall be made in the case file. All findings, withdrawals and referrals shall be reviewed and approved by the Division Commander of Standards and Training.

Any complaint which is sustained shall be deemed a violation of ADM-18 and/or the Rules and Regulations of this Department and shall be handled in accordance with Rules and Regulations of the Department, as applicable. Whether found to be a violation of ADM-18 or not, any inappropriate employee conduct, including but not limited to making or providing false claims, reports, information, statements and/or testimony, may be deemed a violation of Department Policy/Rules and Regulations and is subject to investigation under ADM-14 Personnel Investigations. All investigations shall be conducted in accordance with ADM-14 Personnel Investigations.

<u>NOTE</u>: Nothing in this policy should prevent members from taking appropriate and timely action for any allegations of criminal activity or criminal acts.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-19**
Subject:	
Vehicle Management	

Policy

To establish a central management system for all vehicles owned or controlled by the Department in order to maintain a state of operational readiness.

Procurement

The Fleet Administrator shall authorize and be responsible for the procurement of all Department vehicles including:

- Vehicle specifications;
- Bidding processes; and
- Equipment, parts and materials necessary for vehicle maintenance.

Fleet Administrator

The Fleet Administrator shall:

- Maintain a master vehicle inventory for computer/cruiser number, operator, operator assignment, vehicle model year, mileage, registration number, and condition;
- Ensure the annual reconciliation of the master inventory during the month of June;
- Maintain a sufficient inventory of parts, materials, and equipment at Fleet and Troop/Section garages, subject to available funding;
- Issue parts and materials to Troop/Section garages according to need and availability;
- Maintain detailed vehicle maintenance records; and
- Notify Department personnel of manufacturer vehicle recalls.

Fleet Coordinator

Troop/Section Commander or designee shall act as the Fleet Coordinator, and shall:

- Ensure that monthly mileage and state inspections are submitted through established Departmental procedures.

Specialty Vehicles

Requests for specialized vehicles shall be forwarded through the respective Division Commander to the Fleet Administrator.

Specialty vehicles shall:

- Be purchased based on needs of the Department;
- Be assigned to personnel within the specialized sections/units;
- Follow the operational guidelines set forth in ADM-19A Vehicle Use and Maintenance; and
- Remain within the assigned section/unit unless otherwise authorized by the Fleet Administrator.

Vehicle Status

Designation	Meaning
Active	Assigned and in-use
Down*	Inoperable, requires repairs
Out of Service*	Permanently disabled
Spare	Unassigned and available for use
*Vehicles designated "Down" or "Out of Service" **shall not be operated**.	

Vehicle Assignment

The Fleet Administrator or designee shall:

- Maintain control over vehicle assignment and re-assignment;
- Assign vehicles based on the year, condition, and mileage;
- Assign vehicles to individual personnel based upon availability and particular assignment; and
- Prior to the assignment or replacement of a vehicle:
  - Analyze inventory reports of affected vehicle(s);
  - Notify member(s) of scheduled vehicle assignments or appointments; and
  - Inspect and verify vehicles being turned in for mileage, damage, operational status, cleanliness, and/or issued equipment.

Note: Personnel failing to report with their assigned vehicle and/or issued vehicle equipment shall not be issued a new or replacement vehicle.

Transfers

If members are...	Then members shall...
Transferred or promoted to a function requiring the same vehicle	Retain currently assigned vehicle.
Transferred or promoted to a function requiring an alternate vehicle, i.e., marked, unmarked or specialty vehicle	Contact the Fleet Section for vehicle re-assignment.

Vehicle Disposal

The Fleet Administrator shall:

- Maintain standards and criteria for determining when a vehicle is suitable for disposal;
- Ensure all usable equipment and parts are removed and the vehicle is appropriately prepared for disposal; and
- Provide the Commonwealth of Massachusetts Operational Services Division with the vehicle identification number of disposed vehicles.

Extended Leave

Position	Responsibilities
Member	Shall return the following issued equipment to their Troop/Section/Unit Commander when on extended leave in excess of thirty (30) days: • Assigned vehicle along with issued vehicle equipment; and • Department issued fuel card, transponder and snow gate access cards.
Troop/Section Commander	• Shall notify the Fleet Administrator when issued vehicles and equipment are returned due to extended leaves; and • Advise the location of the vehicle and equipment.
Fleet Administrator	• Re-assign vehicle based upon the needs of the Department; and • If practicable, members returning to full duty should be re-assigned the same vehicle.

Subject: Vehicle Management	Number: ADM-19

Forfeited/ Donated Vehicles

The Fleet Administrator has the authority to accept or reject vehicles on behalf of the Department.

Any vehicle accepted by the Department, shall be:

- Delivered to the Fleet Section with appropriate documentation (e.g. order of forfeiture, certificate of title);
- Inspected for mechanical and/or physical safety defects prior to acceptance and registration;
- Assigned a Fleet vehicle computer number; and
- Assigned by the Fleet Administrator based on the needs of the Department.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-19A**
Subject:	
Vehicle Use and Maintenance	

Policy

Department vehicles shall be maintained in a safe, clean and serviceable condition for reasons of safety, operational readiness, and to enhance the Department's public image. For the purposes of this policy, members shall include sworn and civilian employees of the Department.

Members assigned vehicles belonging to other authorities or governmental agencies shall adhere to the vehicle use and maintenance policies of those particular authorities/agencies.

Required Equipment

Vehicles used for patrol purposes shall be equipped with, at a minimum, the following:

- Emergency lights and siren;
- Medical kit;
- Fire extinguisher;
- Radios;
- Detainee safety barrier (marked, semi marked, low profile vehicles);
- Conspicuous markings (marked, semi marked vehicles, low profile vehicles), including, but not limited to reflective chevrons/pinstriping configured as determined by the Fleet Administrator; and
- All other equipment issued with, or made part of the vehicle according to Department specifications.

Vehicle Inspection

Vehicles and equipment shall be inspected:

- At the beginning of each shift by the vehicle operator;
- For damage, contraband, and/or evidence before and after transporting detainees;
- Quarterly by Station/Unit Commanders and documented according to Department procedures;
- In preparation for line or staff inspections; and
- Upon request by the Fleet Administrator.

Equipment in need of replacement/replenishment shall be coordinated through the member's Station/Section/Unit Commander.

The member shall immediately report, in writing, to their immediate supervisor and the Fleet Administrator, any damage or vandalism to Department vehicles.

Any damage to a Department vehicle caused by a person arrested, detained, transported to court or other non-Department employee shall be immediately reported to the Fleet Section in order to collect restitution. The Fleet Coordinator shall make arrangements for repairs through the Fleet Section.

Installation of Non-Issued Equipment, Adding or Removing Window Tint or Vehicle Alteration

Members shall not install non-issued equipment and/or add or remove window tint in any Department vehicle without prior written authorization from the Fleet Administrator.

Issued Department vehicle equipment shall not be altered without prior written authorization from the Fleet Administrator.

Members requesting to install non-issued equipment and/or add or remove window tint in Department vehicles shall:

- Make written requests through the appropriate channels to the Troop/Section/Unit Commander;
- Agree in writing to assume all responsibility for the loss or theft of the equipment, and any damage caused to the vehicle associated with the installation or removal of the equipment;
- Assume all costs associated with the purchase, installation, and service and/or maintenance fees associated with the installed equipment;
- Notify the Fleet Administrator of the location where the professional installation of the equipment shall occur; and
- Immediately remove any equipment as directed by the Fleet Administrator or proper authority.

The Troop/Section/Unit Commander shall review all requests and forward approved requests to the Fleet Administrator or the proper authority.

The Fleet Administrator shall:

- Approve or deny all written requests; and
- Forward the written approval or denial to the appropriate Troop/Section Commander.

Installation of Non-Issued Equipment, Adding or Removing Window Tint or Vehicle Alteration, continued

Vehicle Ornamentation

Members shall not affix/install vehicle ornamentation on or in any Department vehicle, including vehicles assigned to various authorities or other governmental agencies, unless approved in advance, and in writing, by the Deputy Superintendent and the Fleet Administrator.

Vehicle Alteration

Members shall not:

- Remove, cover, or obscure the display of the issued registration plates; or
- Remove cruiser markings from Department vehicles without prior authorization from the Fleet Administrator or proper authority.

Recalls

Recalls issued by the Department or the manufacturer regarding Department vehicles shall be posted by the Fleet Administrator according to Department procedures.

Members who are assigned Department vehicles shall upon notification of a recall:

- Contact an authorized service facility to schedule an appointment for service;
- Ensure the recall work is completed as ordered;
- Forward the repair order to the Fleet Section; and
- Retain a copy of the repair order.

Vehicle Use

Members shall operate Department vehicles in a cautious manner, and in conformance with Department Policies and Procedures, Rules and Regulations, and applicable Massachusetts General Laws.

Department vehicles shall be used for:

- Official use only;
- Commuting to and from home to assigned work location;
- Scheduled work assignments, callouts, or training; and
- Paid Details (undercover vehicles shall not be used at road construction sites.)

Members who use a Department vehicle shall:

- Notify their supervisor and receive authorization prior to using the vehicle outside of normal scheduled work hours, scheduled work assignments, callouts, training, details, or when on any type of time off or days off.

Vehicle Use, continued

Supervisors shall:

- Only authorize a member to use a Department vehicle when the member is on time off or days off for official Department business; and
- Be responsible for documenting each request and authorization.

Maintenance

The operators of Department vehicles shall be responsible for:

- Maintaining a clean exterior and interior;
- Scheduling routine service and repairs with Fleet Section personnel, or at authorized service facilities;
- Reporting all malfunctions in Department vehicles to the Fleet Administrator;
- Ensuring the vehicle registration is current;
- Ensuring the state safety and emission inspection is current;
- Submitting monthly cruiser information according to Department procedures;
- Daily inspection checks; and
- The removal of snow and ice.

Daily Inspection Checks

- All Department Members shall ensure that their assigned vehicle is in proper working order.

Scheduled Maintenance

All Department Members are required:

- To have their currently assigned Department vehicle routinely serviced; and
- To have an oil change at a Department Fleet Facility every 9,000 miles or six (6) months, whichever occurs first.

Appointments shall be made with each individual Fleet Facility prior to mileage/month deadline. No member shall:

- Have their cruiser serviced at a third party commercial service facility, unless the service is specifically pre-approved by the Fleet Administrator.

Troop/Station/Section/Unit Commanders that have specialty, spare, and/or pool vehicles assigned under their command shall ensure compliance.

Fuel Cards

Fuel cards issued to Department members are restricted to the purchase of fuel for assigned Department vehicles. All purchases for items, other than fuel, shall result in the payment of restitution and/or disciplinary action. Members utilizing fuel cards shall:

- Sign a receipt when issued a fuel card;
- Enter Fleet vehicle computer number for PIN and current mileage when fueling;
- Immediately report lost or stolen cards in writing to the Fleet Section, through channels;
- Fuel vehicles at authorized facilities;
- Purchase regular unleaded fuel only, unless otherwise authorized;
- Use self-service facilities, whenever possible, to assist in controlling Department fuel expenditures;
- Ensure vehicle fuel tanks remain at least half full at all times; and
- Turn in fuel cards through channels to the Fleet Administrator upon any leave in excess of thirty (30) or more days.

Note: Members shall not leave their vehicles running while unattended, unless within the scope of their duties (e.g. motor vehicle stops pursuant to M.G.L. c. 90, § 13).

Transponders and Snow Gate Access Cards

Non-revenue Fast Lane Transponders and Snow Gate Access Cards shall only:

- Be utilized for official business in Department assigned vehicles within the Commonwealth of Massachusetts.

Members traveling outside of the Commonwealth shall:

- Disable their transponders;
- Pay tolls personally; and
- File for reimbursement through the standard member expense reimbursement process.

Electronic data associated with the use of these items shall be monitored to ensure compliance. Use of non-revenue Fast Lane Transponders and Snow Gate Access Cards constitutes express consent for the Department to monitor and/or inspect any data created in the course of such use.

Members assigned non-revenue Fast Lane Transponders and Snow Gate Access Cards shall:

- Use the Fast Lane;
- Disable their transponders when traveling out of state;
- Immediately report lost or stolen transponders or Snow Gate Access Cards in writing to the Fleet Administrator, through channels; and
- Turn in non-revenue transponders and Snow Gate Access Cards through channels to the Fleet Administrator upon any leave in excess of thirty (30) or more days.

Specialty Vehicles

Operation of Specialty Vehicles assigned to Specialized Sections/Units shall adhere to the following:

- Use of Specialty Vehicles shall be dictated by circumstances requiring their deployment/use and shall be authorized by the Section/Unit Commander(s);
- Operated by trained, qualified and duly licensed operators assigned to the Section/Unit as approved by the Section/Unit Commander;
- Section/Unit Commander(s) shall ensure that proper training for members assigned is provided for the Specialty Vehicle(s) to be operated;
- Section/Unit Commander(s) shall maintain a file containing all training records and training certifications for their members operating Specialty Vehicle(s);
- Section/Unit Commander(s) shall assign one designee to be responsible for proper maintenance and related equipment associated with the Specialty Vehicle(s) assigned to the Section/Unit. All maintenance will be coordinated with the Fleet Section;
- Section/Unit Commander(s) will maintain updated Operating Manuals for the assigned Specialty Vehicle(s); and
- Section/Unit Commander(s) will determine the equipment to be maintained on assigned Specialty Vehicle(s), if any, and will maintain a record of said equipment and coordinate replacement/replenishment of specialized equipment.

Emergency Operation and Response

Members responding in emergency vehicles shall operate vehicles with due care and regard for the safety of all persons and property.

Members, in an emergency and while in the performance of duty:

- May drive in excess of the applicable speed limit, if exercising caution and due regard under the circumstances;
- May drive through an intersection, contrary to traffic signs or signals, **after coming to a full stop**, and then proceeding with caution; and
- **Shall never pass** a school bus with red lamps flashing that has stopped to allow pupils to alight or board.

Emergency Operation and Response, continued

Response	Action
Non-emergency/non-life threatening.	• Emergency lights and/or siren need not be used; and • Observe all traffic laws and regulations.
Emergency, but non-life threatening.	• Emergency lights and sirens may be utilized; and • May use discretion in approach.
Actual or potential life-threatening injuries or violent situations.	• Utilize emergency lights and sirens; • Expeditious response with due care and regard for public safety; and • May use discretion in approach.

Seatbelts

All occupants shall properly wear seatbelts while traveling in any state owned vehicles as mandated by Executive Order No. 241.

Airbags

No object shall be placed on or in the path of airbags for safety reasons. Airbag switches shall not be installed in any Department vehicle without the prior written approval of the Fleet Administrator.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-19B**
Subject:	
Automated Vehicle Locator (AVL) Technology	

Policy

The purpose of this policy is to establish guidelines and procedures for the use of the Department's Automated Vehicle Locator (AVL) Technology. AVL is designed to increase officer safety and accountability by enhancing the ability to rapidly locate and deploy Department personnel and resources. AVL technology also improves coordination and resource management during tactical situations, assists in improving response times to radio calls, and increases situational awareness for all employees.

The Department's AVL utilizes global positioning system (GPS) to determine the location of Department personnel and resources.

AVL technology allows for real-time command and control of Department resources. Knowledge of resources that are in the vicinity of an incident improves officer safety, increases operational efficiency, and provides the Department with a more efficient and dependable means of enforcing work rules. Accordingly, it is the Department's goal and policy to utilize AVL in all marked Department cruisers and as many additional vehicles and resources, subject to operational demands and funding, as determined by the Colonel.

Safety and accountability are the primary goals of the AVL system; however, AVL data shall be used for all relevant purposes including but not limited to, the deployment of personnel, operational efficiency, patrol strategy, personnel and other investigations, the enforcement of work rules, regulations, policies, customs, practices, procedures, orders, commands, and/or directives.

Department employees are reminded that, in relation to the Department's receipt and use of AVL data, they have no expectation of personal privacy.

Subject	Number
Automated Vehicle Locator (AVL) Technology	**ADM-19B**

Definitions

Automated Vehicle Locator Technology (AVL): An electronic means for automatically determining and transmitting the geographic location of Department resources to include: personnel, vehicles and crafts. Examples of AVL technology include, but are not limited to: GPS equipped radios, cellular devices, Mobile Data Terminals (MDTs), and stand-alone hardware devices.

Global Positioning System (GPS): A satellite system that provides geo-coordinates and time information to a GPS receiver.

On Duty: For the purposes of this Order only, shall refer to any period of time that an employee of the Department is performing any Department function or using a Department vehicle or resource, to include, but not be limited to, the following: the performance of duties, whether assigned or self-initiated, uniformed or plain clothed, patrol, investigative and administrative functions, reporting and traveling to and from work assignment, court, paid detail or training, and/or commuting to and from home.

Administration

All on duty Department personnel issued AVL Technology, or a vehicle or resource equipped with AVL, shall use AVL in accordance with all of the following:

- Unless expressly exempted by the Colonel or his/her designee, all on duty members equipped with AVL Technology shall, except where AVL is not self-activated, activate AVL systems or devices at the beginning of being on duty and shall keep it activated until off duty. This requirement includes activating GPS equipped portable radios, logging on to GPS equipped MDT, and activating assigned cellular devices and/or modems.

- A member shall report technical problems and or malfunctions relating to the operation of the AVL system immediately to their supervisor and to the Communications Section. The malfunction shall be recorded in the Daily Administrative Journal (DAJ) by the member. This entry shall include who the malfunction was reported to.

- Any member operating a Department vehicle or resource with a malfunctioning AVL system shall comply with the Officer/Vehicle Status notifications required by ADM-21 Communications.

- Supervisors and the Communications Section shall immediately report any malfunction of the AVL system to the Executive Office of Technology Services and Security (EOTTS).

- At least once during a shift, Troop/Section/Unit Commanders, or designees, shall determine the AVL systems of each on duty member, under their command, are working properly.

Subject	Number
Automated Vehicle Locator (AVL) Technology	**ADM-19B**

Equipment

- No member shall use or install any equipment or items that may interfere with Department authorized AVL equipment.
- Members shall not tamper with the AVL/GPS receiver, antenna, wiring, and/or software or attempt to hinder the systems designed performance. Any misuse, abuse, alteration or modification of the AVL software, hardware or any associated components or any violation of this General Order may result in disciplinary action.

Exemptions

The Colonel shall determine which vehicles and resources shall be equipped with AVL technology. A Division Commander, or designee, may authorize the temporary disabling of AVL equipment for members or resources under their command, and shall, when authorized, document the reasons for same in writing.

- Any member whose assignment would be adversely affected by having location information recorded/published may request authorization from the member's Division Commander, or designee, to temporarily disable the AVL system for as long as necessary to complete the assignment.

AVL Records

AVL data:

- Shall be the property of the Department of State Police;
- Shall not be disseminated without authorization from the Department;
- Shall not be accessed, copied, or released for non-law enforcement purposes except as authorized in this policy or as required by law;
- Shall be preserved and/or made available in compliance with all legal obligations and orders, for investigative and training purposes and other needs of the Department;
- Shall be securely stored and disposed of in accordance with state records retention laws; questions related to storage and disposal shall be directed to the Department's Legal Section.; and
- May be preserved at the request of a Division Commander or designee or for any lawful reason.

Accessing AVL Data

Members and employees may only access Department AVL data when they are expressly authorized to access such data in the course of their assigned duties and in accordance with SPAM Unit 5A-Commonwealth CBA.
Other requests for access to AVL data, live or stored, shall be made in writing and forwarded through channels to the member/employee's Division Commander or designee.

Subject	Number
Automated Vehicle Locator (AVL) Technology	**ADM-19B**

Audits

The Colonel/Superintendent or designee may authorize audits of any AVL device to ensure system integrity and functionality.

The Colonel, Deputy Superintendent, Division Commanders and/or their designee(s) shall have access to AVL data for any lawful, relevant purpose, including but not limited to situational awareness, response times, analysis and improvement of patrol tactics, improvement of officer safety, criminal or personnel investigations, and the enforcement of existing work rules, regulations, policies, customs, practices, procedures, orders, commands, and/or directives.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**ADM-20**
Subject:	
Weapons Management	

Policy

The Armorer shall provide oversight for the control and operational readiness of all Department weapons and ammunition, from acquisition to final disposition.

Members shall continually inspect all weapons and ammunition issued to them or under their control, to ensure cleanliness and operational readiness.

Definition

Armorer: A member designated by the Colonel/Superintendent, responsible for all weapons and ammunition under their control or in storage at the Armory.

Firearms: All firearms, rifles, shotguns, and machine guns issued by the Department.

Armorer

The Armorer shall:

- Maintain an accurate inventory of all weapons;
- Maintain all SP 9 Record of Issue and SP 255 Equipment Transfer/Disposition forms;
- Update the Department Soft Body Armor/Weapons Inspection database;
- Maintain an inventory of ammunition and firearms related supplies;
- Ensure that sufficient quantities of ammunition, parts, and supplies remain at the Armory for Department use;
- Coordinate all firearms repairs;
- Conduct training for all members;
- Ensure each Station/Section/Unit has a suitable bullet trap or body armor for use in unloading firearms; and
- Be available to provide temporary replacement firearms.

Firearms Issue or Transfer

Each firearm issuance and transfer shall be recorded on the SP 9. The Armorer shall ensure the correct information is updated on PayStation.

Commanding Officers that have firearms assigned to the Station/Section/Unit shall complete a SP 255 form indicating:

- Description of firearms including serial number; and
- Date and location of assignment.

Commanding Officers shall forward one (1) copy to the Armorer and retain a copy for the Station/Section/Unit records.

Storage of Firearms and Ammunition

Commanding Officers that have firearms assigned to their Station/Section/Unit shall:

- Provide a secure, locked, and alarmed storage area;
- Keep all stored items in a state of operational readiness and available for emergency use at any time; and
- Permit immediate accessibility only to authorized members.

Seizure of Firearms

Upon seizure of a duty firearm, the supervisor shall contact the Armorer to:

- Determine if the member has additional issued firearms; and
- Coordinate storage of the seized duty firearms(s).

Disposal of Weapons

Upon determination that Department firearms or ammunition have become obsolete or inoperable, the Armorer shall complete a SP 255 indicating:

- Description of item;
- Reason and method of disposal (sale, trade-in, destruction); and
- Name of receiving agency/company and signature of receiving party.

The Armorer shall dispose of the item in accordance with the guidelines established by the Commonwealth of Massachusetts.

Inspections

During range qualification all firearms shall be inspected for condition and operational readiness by the Armorer or designee.

Supervisors shall ensure:

- A firearms inspection has been completed quarterly for all subordinates during the months of January, April, July, and October;
- A report of the inspection is documented on PayStation; and
- Members on leave during the quarterly period have their firearms inspected on the first day that the member returns to duty.

Only members trained in the inspection of specific firearms shall inspect that particular type of firearm.

Inspections, continued

Members submitting a firearm for inspection shall:

- Ensure that the firearm is in a safe and unloaded condition with the magazine removed;
- Present the firearm with the slide locked in the open position;
- Shotguns shall be presented for inspection with the action in the open position; and
- Rifles, machine guns and submachine guns shall be presented for inspection in a safe manner as directed by the Inspector.

Weapons shall be unloaded in a safe manner consistent with training, using a suitable bullet trap or ballistic vest as a backdrop in a safe area approved by the Armorer.

Inspectors Duties

Only members trained in the inspection of specific firearms shall inspect that particular type of firearm. Inspectors may use a SP 608 Weapons Inspection form as a guideline during the inspection process.

Firearms Inspectors shall:

- Inspect all Department firearms as assigned and document on the Department database during the months of January, April, July, and October;
- Detail all inadequacies on the database; and
- Remove any weapon or ammunition found to be defective and forward to the Armorer for repair or replacement.

Temporary Firearms

Commanding Officers shall:

- Ensure that the member with the defective firearm is issued a temporary replacement firearm by the Armorer; and
- Document the issue of the temporary firearm on a SP 9.

The Armorer or designee shall issue temporary firearms. The Armorer may be contacted through the GHQ Communications Section.

Leave

Commanding Officers of a member who is on any leave in excess of thirty (30) days shall contact the Armorer for storage of Department issued firearms and ammunition.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-21**
Subject:	
Communications	

Policy

The Department shall maintain an effective and efficient communications system to aid in the performance of its public safety mission.

The Department shall ensure continuous communication accessibility through a mission-critical, multi-channel radio system capable of two-way operation on joint public safety frequencies.

Troop Duty Officers, Desk Officers and Dispatchers shall utilize available technologies, as applicable, including but not limited to: radio, CAD (Computer Aided Dispatch), Department issued technology, and Automated Vehicle Locator (AVL) to determine which members are available for service and to maintain communication with members.

The Department shall comply with all Federal Communications Commission (FCC) procedures and requirements.

Within the content of this policy, members shall refer to sworn Department members and employees shall refer to civilian Department members.

Positions and Responsibilities

Position	Duties
Colonel/Superintendent or designee member(s)	• Designate personnel to Communications Staff positions.
Director of Telecommunications	• Supervise all personnel assigned to the Communications Section; • Serve as "Keeper of the Records" for the Communications Section; • Oversee the administration of the audio recordings of Department radio frequencies; and • Oversee the recording, retention and preservation of 9-1-1 call payload and Department radio payload as outlined in this policy.
Communications Officer (Commissioned Officer)	• Supervise sworn members assigned to the Communications Section; and • Serve as the DCJIS Administrator and Point of Contact for the Department.

Positions and Responsibilities, continued

Position	Duties
Director of Dispatch Services	• Supervise all civilian personnel in the Dispatch Services Unit.
Radio System Manager	• Supervise all civilian personnel in the Radio Unit; and • Provide technical expertise in the operation and implementation of Department radio systems.

Recording & Data Retention

The Department shall maintain immediate playback capability of recorded telephone and radio communications.

Requests for immediate playback of 9-1-1 and/or radio communications shall be directed to the Troop Dispatcher of jurisdiction.

9-1-1 Payload

The Department shall record all incoming/outgoing 9-1-1 payloads (audio, text, photo, video, telematics, etc.) at all of its Public Safety Answering Points (PSAPs). 9-1-1 payloads shall be retained and preserved for a minimum period of one (1) year. Records shall be secured and accessible only to authorized personnel.

9-1-1 Call Detail Records

The Department shall capture all 9-1-1 call detail records at all of its PSAPs. 9-1-1 call detail records shall be retained and preserved for a minimum period of three (3) years. Records shall be secured and accessible only to authorized personnel.

Radio Payload

The Department shall record/capture all operational radio payload (audio, metadata, etc.), as determined by the Colonel/Superintendent or designee. Radio payloads shall be retained and preserved for a minimum period of one (1) year. Records shall be secured and accessible only to authorized personnel.

Audio Recordings

Requests for cellular and radio audio recordings shall comply with all legal requirements and shall be provided for the needs/requests of the Department including, but not limited to, investigations, training, court-orders, public record requests, or as otherwise directed by the Colonel/Superintendent.

Audio recording requests shall be forwarded utilizing the SP-623 Cellular 911 & Radio Transmission Recording Request Form.

Communication Facilities and Equipment

Access to Department Communications Centers and equipment shall be restricted to authorized personnel.

Communication Facilities and Equipment, continued

Each Department facility is equipped with an alternative power source/generator, sufficient to operate the radio systems and other vital equipment, in the event of a primary power source failure.

The alternative power source shall be:

- Accessible only to authorized personnel;
- Inspected and tested weekly by the Troop/Station/Section Commander or designee who shall document said inspection/test; and
- Maintained at least annually, including documented testing and/or operation at full load.

Emergency Service Numbers

The Troop/Station/Section/Unit Commanders shall ensure:

- Telephone numbers and addresses of available emergency service agencies are up to date and readily available to dispatchers, desk officers, as well as other communications personnel; and
- Tactical dispatching plans or emergency operational plans that may affect facilities within their specific jurisdiction (e.g., prisons, nuclear plants, sports facilities) are current and readily available.

Emergency Radio Alarm Activation

The activation of an emergency radio alarm of a member shall be deemed notification of an "Officer In Trouble" until proven otherwise.

Upon a member activating the emergency alarm the Dispatcher shall immediately:

- Initiate contact with the member;
- Request a "Code 30 Status" and follow Communication Section Emergency Radio Alarm Protocols; then
- Query the AVL database for the member's location.

If able to communicate, the activating member shall broadcast their cruiser number or name, nature of the emergency and exact location.

Upon confirmation of the "Code 30", or if the member does not respond, the barracks Desk Officer shall initiate the response of additional resources, including MSP personnel and local law enforcement, providing the members last known location. Additional technology shall be utilized to identify, and/or verify, the location of the member.

A "Code 1" shall be initiated upon confirmation of the "Code 30" or if the member fails to respond to attempts to communicate with them.

The Troop Duty Officer shall assume responsibility for oversight of the "Code 1" assisting the Dispatcher and barracks Desk Officer with actions related to the "Code 30" response.

The "Code 1" should remain in effect until confirmation of the activating member's status can be verified by the member or responding members.

Emergency Radio Alarm Activation, continued

Inadvertent activation of the emergency alarm shall be immediately addressed by the member. The member shall broadcast "Code 17" in response to the Dispatcher request of "Code 30 Status". The Dispatcher will confirm receipt of the "Code 17" broadcasting the updated status of the activating member.

The member shall reset the inadvertent emergency alarm activation by pressing and holding the emergency button for approximately three (3) seconds until the radio tones indicating clearance of the activation, or turning the radio off and on again.

Radio Decorum

Department members and employees(s) shall ensure:

- Department radio communications/messages have first priority;
- They properly identify themselves and use clear diction when communicating on the Department network;
- Radio transmissions shall be necessary, professional, concise, and formal at all times using a clear spoken message-based on common terminology; and
- When making requests for law enforcement information, they shall do so via their assigned radio frequency, unless doing so would compromise an investigation or a member's safety.

Alternative Reporting Methods

Emerging technologies may result in the receipt of information in a non-traditional manner (e.g.: text, e-mail…) requiring a Department response. Personnel receiving information through non-traditional reporting methods shall:

- Evaluate the need for a Department response;
- Record the details of the information received and Department response in the appropriate CAD/RMS, DAJ, or ACISS call log;
- Assign member(s) to calls requiring a Department response when applicable, or route the information to the appropriate Division/Section/Unit for follow up if applicable;
- The Division /Section/Unit shall assign member(s) to calls requiring a Department response; and
- Communicate the Department response to the reporting party where applicable/appropriate.

Incident Command

The National Incident Management System (NIMS) has integrated existing best practices into a consistent, nationwide approach to domestic incident management at all jurisdictional levels and across functional disciplines.

Department personnel involved with a complex critical incident shall:

- Use a clear spoken message-based on common terminology; and
- Refrain from using codes for radio communications.

Radio Interoperability

In an effort to simplify communications while promoting interoperability, plain English will be utilized in all situations requiring inter-agency operations.

Radio Codes

To eliminate lengthy radio transmissions and maintain confidentiality, the following codes shall be used for all radio broadcasts, whenever practicable:

CODE 1	STANDBY FOR AN EMERGENCY - Cease and desist all unnecessary radio traffic. Only primary dispatchers and officers engaged in the emergency shall transmit messages**.**
CODE 2	TELEPHONE YOUR STATION
CODE 3	TELEPHONE (person) AT (number).
CODE 4	CRUISER OUT OF SERVICE Specify location.
CODE 5	CRUISER NOW IN SERVICE
CODE 6	WHAT IS YOUR LOCATION?
CODE 7	RETURN TO YOUR STATION OR SPECIFIC LOCATION
CODE 8	STOPPING A SUSPICIOUS VEHICLE – Transmit vehicle make, model, color, registration number, number of occupants, and give EXACT LOCATION.
CODE 9	REQUEST LISTING ON-Transmit registration number and/or vehicle identification number of motor vehicle, and give EXACT LOCATION.
CODE 10	REQUEST STOLEN RECORD ON - Transmit registration number and/or vehicle identification number or serial number of suspected stolen property, and give EXACT LOCATION.
CODE 11	REQUEST LICENSE DATA ON - Transmit license number and give EXACT LOCATION. If license number is not known, transmit name and DOB.
CODE 12	ANY MESSAGES FOR ME?
CODE 13	RADIO TEST CALL. Give signal strengths as follows: R-1 Barely audible; R-7 Moderately strong signal; R-3 Weak signal; R-9 Strong signal loud and clear. R-5 Fairly good signal;
CODE 14	MISSING OR WANTED CHECK - Transmit name, race, sex, DOB, social security number, registration of vehicle if applicable, and give EXACT LOCATION.
CODE 15	OFFICER REQUESTING ASSISTANCE - Transmit EXACT LOCATION and, if able, reason for request.
CODE 16	CRASH INVESTIGATION (state type) AT (location)
CODE 17	CLEAR – From a previous assignment completed and now back on patrol and/or original assignment and available.
CODE 18	PERMISSION TO LEAVE ASSIGNED PATROL - Transmit EXACT LOCATION, reason and estimated time of absence.
CODE 20	INVESTIGATION (state type) AT (location)
CODE 22	CELLULAR CALLER ADVISEMENT/NOTIFICATION
CODE 30	**OFFICER IN TROUBLE/ TRANSMIT EXACT LOCATION**

Phonetic Alphabet

Members shall utilize the following phonetic alphabet.

A	Alpha	**N**	November
B	Bravo	**O**	Oscar
C	Charlie	**P**	Papa
D	Delta	**Q**	Quebec
E	Echo	**R**	Romeo
F	Foxtrot	**S**	Sierra
G	Golf	**T**	Tango
H	Hotel	**U**	Uniform
I	India	**V**	Victor
J	Juliet	**W**	Whiskey
K	Kilo	**X**	X-ray
L	Lima	**Y**	Yankee
M	Mike	**Z**	Zulu

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-22**
Subject:	
Court Attendance and Fees	

Policy

Department employees shall comply with all court orders and summons.

Employees shall be compensated for court attendance according to their applicable collective bargaining agreements.

Definitions

Court Officers: Shall be designated by a Troop Commander as the Officer-in-Charge of Instruments for Breath Alcohol Testing and be the Keeper of Records for their jurisdiction's Breath Alcohol Testing Devices.

Day Off: Any regularly scheduled day off, including a holiday or an administrative day off.

Nighttime Shift: A regular duty assignment to the evening or midnight shift.

Vacation Day: A paid vacation day within an approved scheduled vacation week.

Documentation

All court appearances, depositions, or consultations shall be accurately documented by appropriate log entries in the Daily Administrative Journal (DAJ) including the following:

- Case name;
- Type of appearance;
- Time in/out; and
- Court location.

All court entries within the DAJ shall be reviewed daily by the Station/Unit Commander or designee.

Payment for Court Appearances

Members may be entitled to payment of a court fee for attendance at a state or federal court if the member is on duty at night, on vacation or furlough, or on a regularly scheduled day off and is a:

- Witness testifying in court on behalf of the Commonwealth or United States;
- Subpoenaed witness in criminal court testifying in an official capacity; or
- Defendant in court in a civil rights case in which the member was acting in an official capacity within the scope of employment.

Members may not receive a court fee or additional pay when:

- They are not a witness for the Commonwealth;
- They are the plaintiff in a case; or
- They are a witness, on behalf of another Department member, not acting in an official capacity.

Note: Except when on an approved scheduled vacation week, no member shall be granted paid time off which conflicts with a scheduled court appearance, or would result in overtime being generated for the court appearance.

Witness Fees

Any member entitled to a court witness fee may receive and accept such fee, in lieu of but not in addition to, any other type of compensation (MGL c.262, §50.)

Members shall not receive a court witness fee when:

- Any other type of compensation is received during the period of time of court appearance;
- Appearing at a second court during a time for which the member is still receiving compensation for their appearance at the first court attended;
- Working a day shift;
- On sick, injured, or extended leaves; or
- They are not a witness for the Commonwealth.

Travel Fees

Members may be entitled to a travel allowance from the court when:

- A private vehicle is used to travel to and from court held in a city or town other than a city or town in which the member resides.

Note: Travel allowance is only authorized from the actual point of origin and actual point of return from court attendance.

Travel Fees, continued

Members are not entitled to any travel allowance if:

- A state-owned vehicle is used;
- Receiving mileage allowance from any other government or private source; or
- Duplication of mileage occurs from more than one (1) court within one (1) day.

Court Fees

Court appearance fees shall:

- Be computed from the start of the appearance, or the member's actual arrival time, whichever is later, until the end of the appearance;
- Be consistent with Massachusetts General Laws and collective bargaining agreements, unless it overlaps with a member's other duties; and
- Not be paid for member's travel time to or from court.

Injured Leave Status

Members on injured leave subpoenaed to appear in court shall:

- Notify their immediate supervisor and the Court Officer who issued the SP 189 Court Appearance Notification;
- Request a continuance or reschedule the appearance through the court officer of jurisdiction; or
- If a continuance is not granted, request authorization to appear from the Troop/Section Commander or designee.

Temporary Modified Duty Status

Members on Temporary Modified Duty notified to appear in court shall:

- Notify their immediate supervisor and the Court Officer who issued the SP 189;
- Request a continuance or reschedule the appearance; or
- If a continuance is not granted, request authorization to appear from the Troop/Section Commander or designee.

Extended Leave Status

Members on extended leave subpoenaed to appear in court shall:

- Notify their immediate supervisor and the Court Officer who issued the SP 189;
- Request a continuance or reschedule the appearance through the court officer of jurisdiction; and
- Not appear in court on behalf of the Department.

Court Responsibilities

Position	Responsibilities
Employees	• Check the Department email system every work shift, to remain apprised of newly assigned court cases or status changes to pending cases; • Print any emailed SP 189 Court Card Notifications; • Submit complaint applications to the Court Officer of jurisdiction; • If a summons is received directly from an authorized agent of the court, immediately submit the hard copy to the Court Officer of jurisdiction and request a SP 189; • Have any SP 189's signed by the required parties, if any overtime hours are generated by a court appearance; • The SP 189 shall be date/time stamped by the Clerk's Office at the conclusion of the case, if more than four (4) hours of overtime are generated by any court appearance on any single calendar day; • Have the Assistant District Attorney sign the SP 189, including the actual time of the member's appearance, if a date/time stamp is not available; • Notify the Court Officer of jurisdiction of any continuances and the parties who requested the continuance; and • Enter information on the case disposition, sign, and submit the SP 189 to their assigned Station/Section /Unit.
Court Officer	• Schedule employee's court appearances in an effort to minimize overtime; • Immediately enter information from summonses, continuances, or cancellations into the Department court database; • Issue the SP 189 for proceedings not scheduled by other Court Officers (e.g., Grand Jury, Superior Court, Federal Court, depositions); • Immediately advise affected employees of court case assignment and status changes to pending cases using all available methods; • Advise the Station/Unit Commander of any court case requiring the appearance of three (3) or more members; • Enter all disposition information into the Department court database;

Court Responsibilities, continued

Position	Responsibilities
Court Officer	• Shall be the Officer-in-Charge of Instruments for Breath Testing Devices according to TRF-14 Operating Under the Influence, and function as the Keeper of the Records; • Provide the Commanding Officer with a weekly list of court notifications; and • Immediately notify their Commanding Officer if a member: o Fails to appear for a scheduled court date; or o Appears at court without prior notification by a Court Officer; or o Is notified to return to court for additional information required by the court during an arraignment.
Commanding Officers	• Review and reconcile all submitted SP 189's prior to approving PayStation court overtime submissions; • Deny any court overtime submitted on PayStation without a proper and signed SP 189; • Retain all submitted Station/Unit court appearance notification forms for inspection for three (3) years; Review requests for court appearances involving three (3) or more members as notified by the Court Officer and consult with the appropriate court authority to determine if any members appearance is not critical to the case; and • Notify the Troop/Section Commander or designee immediately if a member: o Fails to appear for a scheduled court date; or o Appears at court without prior notification by a Court Officer; or o Is notified to return to court for additional information required by the court during an arraignment.
Troop Cases and Report Officers	• Conduct examinations of submitted PayStation and SP 189's for signs of inefficiency or abuse; • Maintain staff supervision of the Court Officers and conduct semi-annual staff inspections of Court Officer's files; • Report inspection findings and analysis to the Troop Commander; and • Assist Court Officers in addressing problems at their assigned courts, or with conflicts between the courts and the Department.

Subject: Court Attendance and Fees	Number: ADM-22

Court Responsibilities, continued

Position	Responsibilities
Troop/ Section Commanders or Designee	• Contact the appropriate court authority to confirm the necessity of the appearance of three (3) or more members on the same day; and • Conduct examinations of submitted PayStation and SP 189's for signs of inefficiency or abuse.

Non-Field Sections/Units

Commanding Officers shall create court appearance guidelines appropriate for their Section/Unit and file a copy with the appropriate Division Commander.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-24**
Subject:	
Department Radio Call Signs	

Policy

The Department shall promote officer safety and efficiency using a standardized Radio Call Sign procedure.

Standardized Radio Call Signs, as referenced within this General Order, shall be used by all employees for all radio transmissions.

Protocol

Whenever a member requests information over the radio, such requests shall be preceded by, or ended with, the member's exact location.

All transmissions shall be conducted in a concise manner and in accordance with the formats indicated in this General Order. At the end of all transmissions, the receiving party shall acknowledge receipt of the transmission by saying "Received."

Call Sign Structure

The Department shall use the following categories for Radio Call Signs:

- The Executive Branch;
- The Executive Office of Public Safety and Security (EOPSS);
- The State Police Command Staff;
- Division Call Signs;
- Station Identifiers; and
- Specialty Vehicles.

Radio Call Sign Database

The Fleet Administrator shall:

- Maintain a database of assigned cruiser numbers, matching each cruiser number to a vehicle and employee;
- Ensure Radio Call Signs assigned to Executive Branch, EOPSS, and Department Command Staff are included within the database; and
- Not be responsible for, nor maintain a database of call signs outside of the actual vehicle to member assignment.

Department Radio Call Signs

Department employees (sworn and civilian personnel), unless specifically identified within this General Order, shall:

- Use the Fleet Designated Cruiser Number assigned by the Fleet Administrator as their Radio Call Sign.

Employees assigned spare cruisers or pool vehicles shall:

- Use the assigned spare cruiser/pool vehicle's designated cruiser number as their Radio Call Sign; and
- Provide their name, Department ID number, and rank (if applicable).

Call Signs for the Executive Branch, EOPSS and Command Staff

The Department shall assign Radio Call Signs for the Executive Branch, EOPSS, and Department Command Staff. The following Radio Call Signs shall be assigned:

Entity	Call Sign	Assignment
Executive Branch	S-1	Governor
Executive Branch	S-2	Lt. Governor
EOPPS	S-3	Secretary of Public Safety and Security
EOPPS	S4-10	Available for EOPPS
Department Command Staff	1	Colonel/Superintendent
Department Command Staff	2	Lt. Colonel / Deputy Superintendent
Department Command Staff	3	Lt. Colonel / Field Services
Department Command Staff	4	Lt. Colonel / Investigative Services
Department Command Staff	5	Lt. Colonel / Standards and Training
Department Command Staff	6	Lt. Colonel / Homeland Security and Preparedness
Department Command Staff	7	Chief Administrative Officer
Department Command Staff	8	Chief Science Officer
Department Command Staff	10	Chief of Staff for the Colonel/Superintendent
Department Command Staff	11-19	Majors – Division of Field Services (DFS), Non-Troop
Department Command Staff	20-29	Majors and Detective Captains – Division of Investigative Services (DIS)
Department Command Staff	30-39	Majors – Division of Standards and Training (DST)
Department Command Staff	40-49	Majors and Detective Captains – Division of Homeland Security and Preparedness (DHS)
Department Command Staff	50-59	Majors – Division of Administrative Services (DAS)

Department Command Staff	60-69	Majors and Detective Captains Forensic Services Division (FSD)

Division of Field Services

The Division of Field Services shall adhere to the following protocol:

Troop Headquarters shall use the appropriate troop phonetic identifier preceded by the word “Station” as the radio call sign (e.g., "Station H to 756").

Sub-Stations shall use the appropriate phonetic identifier followed by the assigned numerical designation (e.g., "B-1", "D-2"). Troops and Sub-Stations along with their corresponding phonetic identifiers are listed below in the “**Troop and Sub-Station Call-Sign**” table.

Specialty vehicles shall be identified through Radio Call Signs as the name of the unit followed by the assigned number of the vehicle (e.g., “Cycle 5”).

All DFS personnel shall utilize their Fleet Designated Cruiser Number as their Radio Call Sign, except as follows:

Troop Commander:
- Number one (1) attached to the phonetic troop identifier (e.g., "1A”).

Troop Executive Officer:
- Number two (2) attached to the phonetic troop identifier (e.g., "2A”).

Troop Captains:
- Numbers three (3) through five (5) attached to the phonetic troop identifier, (e.g., "3A," "4A," or "5A”).

Operations Officers:
- Numbers six (6) through eight (8) attached to the phonetic troop identifier, e.g., "6A," "7A," or "8A”).

Station Commanders:
- In numeric sequential order, beginning with the number 11 attached to the phonetic troop identifier (e.g., “11A” for the Station Commander of A-1 and “15A” for the Station Commander of A-5);

Division of Field Services, continued

Special Operations Troop "S" Commanders shall be identified as:

- Special Operations Captains (2-4) (e.g., "2S," or "3S," etc.);
- STOP Team Commander- "5S;"
- SERT Commander- "6S;"
- CVES Commander- "1T;" and
- Canine Unit Commander- "1K."

DFS members specified above shall follow their call sign with their rank/name during their initial communication with a Troop Dispatch or Barracks.

Personnel assigned to Troop F, the Commercial Vehicle Enforcement Section, and the Canine Unit, shall use:

- Their assigned Authority cruiser number or their Fleet Designated Cruiser Number as their Radio Call Sign, followed by the phonetic identifier "F," "T," or "K" respectively, (e.g., "121F," "221T," or "437K").

Troop and Sub-Station Call Signs

AHQ – Danvers

- A-1 Andover
- A-2 Newbury
- A-3 Concord
- A-4 Medford
- A-5 Revere
- A-6 Danvers (sub-station)

BHQ – Northampton

- B-1 Lee
- B-2 Shelburne Falls
- B-3 Springfield
- B-4 Cheshire
- B-5 Russell
- B-6 Northampton (sub-station)
- B-7 Shelburne Falls (dispatch)
- B-8 Westfield

CHQ – Holden

- C-1 Athol
- C-2 Millbury
- C-3 Brookfield
- C-4 Leominster
- C-5 Sturbridge
- C-6 Holden (sub-station)
- C-7 Belchertown
- C-8 New Braintree (dispatch**)**
- C-9 Devens
- C-10 Charlton

Troop and Sub-Station Call Signs, continued

DHQ – Middleboro
- D-1 Norwell
- D-2 Yarmouth
- D-3 Dartmouth
- D-4 Middleboro (sub-station)
- D-5 Oak Bluffs
- D-6 Nantucket
- D-7 Bourne

FHQ – Logan Airport
GHQ – General Headquarters-Framingham
HHQ – South Boston
- H-1 Government Center
- H-2 Framingham
- H-3 Foxboro
- H-4 Boston
- H-6 South Boston (sub-station)
- H-7 Milton
- H-8 Weston
- H-9 Tunnels

Division of Investigative Services

Radio Call Signs for Section/Unit members within the Division of Investigative Services, who make radio transmissions over the Troop Radio System, shall:
- Use plain language one word unit name followed by their assigned Fleet Designated Cruiser Number (e.g., "Middlesex 1234 to Station A" or "VFAS 4321 to Station H").

Section/Unit Commanders/Executive Officers within DIS shall:
- Be assigned specific Radio Call Signs for their sections and units;
- Use the number "1" for the Commanding Officer preceded by the section/unit name (e.g., "Middlesex 1 to Station A");
- Use the number "2" for the Executive Officer preceded by the section/unit name (e.g., "VFAS 2 to Station H").

The Division Commander, Division Majors, and Detective Captains are designated call signs in accordance with the "Department Command Staff" table on page 2 of this General Order.

Division of Standards and Training

The Division of Standards and Training personnel shall utilize:
- Their Fleet Designated Cruiser Number as their Radio Call Sign.

The Division Commander and Division Major(s) are designated call signs in accordance with the "Department Command Staff" table on page 2 of this General Order.

Division of Homeland Security and Preparedness

Radio Call Signs for Section/Units Members within the Division of Homeland Security and Preparedness, who make radio transmissions over the Troop Radio System, shall:

- Use plain language one word unit name followed by their assigned Fleet Designated Cruiser Number (e.g., "Fraud Id Unit 1234 to Station A").

Section/Unit Commanders/Executive Officers within DHS shall:

- Be assigned specific Radio Call Signs for their sections and units;
- Use the number "1" for the Commanding Officer preceded by the section/unit name (e.g., "Fraud Id Unit 1 to Station A");
- Use the number "2" for the Executive Officer preceded by the section/unit name (e.g., "Fraud Id Unit 2 to Station H").

The only two exceptions to this are as follows:

- The Air Wing Commanding Officer will utilize "Whiskey 1" and the Marine Unit Commanding Officer will utilize "Mike 1"; and
- The Air Wing Executive Officer will utilize "Whiskey 2" and the Marine Unit Executive Officer will utilize "Mike 2".

The Division Commander, Division Majors, and Detective Captains are designated call signs in accordance with the "Department Command Staff" table on page 2 of this General Order.

Division of Administrative Services

The Division of Administrative Services personnel shall utilize

- Their Fleet Designated Cruiser Number as their Radio Call Sign.

The Division Commander and Division Major(s) are designated call signs in accordance with the "Department Command Staff" table on page 2 of this General Order.

Forensic Services Division

The Forensic Services Division personnel shall utilize

- Their Fleet Designated Cruiser Number as their Radio Call Sign.

The Division Commander, Division Major(s) and Detective Captain(s) are designated call signs in accordance with the "Department Command Staff" table on page 2 of this General Order.

GHQ/ COMSEC

The General Headquarters / Communications Section shall be identified with the phonetic letter "G."

Subject: Department Radio Call Signs	Number: ADM-24

Specialty Vehicles

Specialty vehicles shall be identified through Radio Call Signs as:

- Name of the unit followed by the assigned number of the vehicle (e.g., Marine 1, Air 3, and/or Cycle 5).
-

Portable Radio Call Signs

Members with a Fleet Designated Cruiser Number shall use that number when transmitting on the portable radio.

Members without a Fleet Designated Cruiser Number shall announce their name, rank, and ID number, if needed, while transmitting on the portable radio (e.g., members who are assigned to Troop "F").

Incident Command

The National Incident Management System (NIMS) has integrated existing best practices into a consistent, nationwide approach to domestic incident management at all jurisdictional levels and across functional disciplines.

Department member(s) involved at a critical incident with multiple agencies shall use a clear spoken message, based on common terminology.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

1721

Department of State Police
General Order

Effective Date:	Number:
February 21, 2023	**ADM-25**
Subject:	
Paid Details and Overtime	

Policy

The Department may allow personnel, on full duty status or alternative duty status (as specified in ADM-11C Maternity Leave and Guidelines), to work paid details.

The Department recognizes the importance of maintaining safe and efficient traffic flow at roadway work sites and special events. The Department also recognizes that at major sporting, civic, special events, and other times, members may be required to provide crowd control and/or security.

Paid details may be worked by members:

- From the rank of Trooper through Detective Lieutenant inclusive; and/or
- From the rank of Captain/Detective Captain with approval of the Deputy Superintendent when:
  - The type of detail is "non-construction" i.e., stadium events, security details, in a supervisory capacity where they must supervise at least ten (10) officers; or
  - A vacancy exists on any type of detail after the primary and secondary detail lists of the respective troop have been completely exhausted of eligible members.
    Note: Once assigned to a detail, Captains/Detective Captains shall not be bumped by:
    1. Another Commissioned Officer; or
    2. A Non-Commissioned Officer or Trooper within twenty-four (24) hours of the start time of the assigned detail.

Definitions

Paid Detail Administrator: The Paid Detail Officer of jurisdiction or the point of contact for the Paid Details Management Service (PDMS) vendor. The Paid Detail Officer of jurisdiction, or the PDMS vendor, shall receive and coordinate paid detail requests, assignments, billing, collection, and compensation of payroll expenses.

Paid Detail: A voluntary assignment paid for by an outside entity, which has been authorized by the Colonel/Superintendent.

Scheduled Work Hours: A regular shift or tour of duty consisting of eight and one-half (8.5) hours.

Definitions, continued

Type I Paid Detail: A voluntary assignment requiring a commitment of up to four (4.0) hours duration paid for at a flat rate of four (4.0) hours of the detail rate, by an outside entity, which has been authorized by the Colonel/Superintendent.

Type II Paid Detail: A voluntary assignment requiring a commitment of up to eight (8.0) hours duration paid for at a flat rate of eight (8.0) hours of the detail rate, by an outside entity, which has been authorized by the Colonel/Superintendent.

Work: Shall be defined to include hours actually worked during regularly scheduled duty, overtime, court time and paid details.

Hours of Work

Members shall not schedule or work combinations of assignments and/or details which they know or should know will result in a direct violation of the "sixteen and one-half (16.5) hour rule" as contained within the Collective Bargaining Agreement (CBA) and this General Order (as further clarified in Superintendent's Memo *13-SM-10 Extension to the 16.5 Hour Rule Limitation*.)

Members shall not accept a detail or overtime assignment if doing so would require the member not to work a regularly scheduled shift or attend other work obligations of which the member is aware.

Members shall not cancel a detail in order to accept another detail or overtime assignment.

In the event the detail or overtime hours exceed the hours of work allowed in any twenty-four (24) hour period, the member shall not be allowed to alter the starting time of their next assigned work shift, but shall use accrued personal leave or vacation leave credits to offset any conflicts with their scheduled work hours.

Members shall be paid for details in conformance with their applicable collective bargaining agreement. When availability requirements or demand for a member working a Type I Paid Detail assignment goes beyond the four (4.0) hour duration, it shall automatically be converted to a Type II Paid Detail assignment. Any Type II Paid Detail assignment that goes beyond the eight (8.0) hour duration shall be extended in thirty (30) minute increments to be paid based on the hourly rate of time and one-half.

A member shall receive time and one-half detail pay for the actual hours worked on the calendar day of Thursday, Thanksgiving Day or December 25, Christmas Day.

Overlapping Time

There shall be no overlapping of details or overtime during the commitment times of the Type I or Type II Paid Details. This does not, however, preclude a member from beginning a regularly scheduled shift after being appropriately relieved from said detail and logging same in the Daily Administrative Journal.

In order to prevent any overlapping of scheduled work hours members shall utilize accrued personal or vacation leave to offset any overlap in conformance with the member's collective bargaining agreement.

Timely Recording of Paid Details

To ensure the timeliness of paid detail processing and to facilitate the use of PayStation for paid detail reporting members shall:

- Enter any detail hours worked into PayStation within twenty-four (24) hours of completion of the detail and prior to submitting PayStation for that week; and
- Paid details shall not be entered into PayStation prior to completion of the assignment.

Travel Time

Travel to/from a regularly scheduled shift to/from an overtime or detail assignment is expressly authorized, provided such travel does not exceed one-half hour from the geographical boundary of such regularly scheduled shift location. Personnel are on-duty during such periods of travel and shall undertake all necessary activities ordinarily performed during motor patrol. Members are required to use at a minimum, one-half (1/2) hour of accrued personal or vacation leave as travel time to or from a detail when the following occurs:

- The travel time from the duty assignment to the paid detail location or overtime assignment, or the paid detail to a duty assignment location, is **greater** than one-half (1/2) hour.
  Note: Members not assigned to a specific sub-station, the geographical boundary for a section/unit is defined as the station of jurisdiction where their **regular reporting** location is sited. Temporary Duty Assignments (TDY) work locations shall be considered as the member's regular reporting location for administration of this General Order.

When a member is assigned to a paid detail or overtime assignment they shall:

- Determine the need to use accrued personal or vacation leave to ensure prompt arrival to a detail or when reporting for their tour of duty or overtime assignment; or
- Decline the detail/overtime assignment if they chose **not to use** the appropriate accrued personal or vacation leave.

Supervisors shall be held responsible:

- To ensure members are held accountable for taking appropriate accrued personal or vacation leave when reporting to or from a paid detail/overtime, if it effects their regular tour of duty assignment; and
- To ensure members accurately document and record accrued person or vacation leave used for travel time to or from a paid detail/overtime when **greater** than one-half (1/2) hour

Requests

Members shall not:

- Make duplicate/same day requests for details in different Troops; or
- Request or work overtime or details within twenty-four (24) hours from the start time of their regularly scheduled work shift when sick leave was taken for:
  - Personal illness or injury;
  - The presence of the member at their work location would jeopardize the health of others, through exposure to a contagious condition; or
  - The member's spouse, child, parent, or spouse's parent, or relative living in the member's household, is seriously ill. In this event, a limit to the amount of leave the member can use is set by the CBA and federal and state laws.

Exception: A member who works at least four (4) or more consecutive hours of their regularly scheduled work shift, in which Sick Leave was granted as outlined in ADM-11 Sick Leave, shall remain eligible to work paid details and overtime.

Members may request only one troop as a primary choice on an SPD-3 Request for Paid Detail form. The primary choice for:

- Members assigned to Field Operations within the Division of Field Services shall be limited to the troop to which they are assigned, or to the troop where they reside;
- Members assigned to the Division of Field Services, but not assigned to a troop within Field Operations, may request any troop as their primary choice; and
- Troop F is reserved for members assigned to: Troop F, Office of the Superintendent, Division of Field Services (see above), Division of Administrative Services, Division of Investigative Services, Division of Standards and Training, the Division of Homeland Security and Preparedness, and Forensic Services Division.

If a member wishes to change their primary choice, the SPD-3 shall be forwarded to the Paid Detail Administrator of jurisdiction prior to the first of March each year or upon transfer.

Weekly requests for assignments shall be made according to a procedure approved by the Troop Commander. When requesting a detail, a member shall report all out-of-troop details worked for the previous five (5) weeks to the Paid Detail Administrator of jurisdiction.

Member Responsibilities

Members assigned to a road construction type detail shall maintain a professional presence and shall perform the following duties:

- Provide public and site safety;
- Be aware of, and visible to, oncoming traffic;

- Maintain uniform traffic flow through manual direction or other devices as necessary;

Member Responsibilities, continued

- Stand, facing traffic, unless otherwise directed or authorized;
- Wear proper field uniform and assigned traffic vest or raincoat with high visibility side out;
- Remain on the work site, except to perform enforcement duties, or at the direction of the state engineer, site foreman, appropriate authority, or in case of personal necessity; and
- Maintain radio contact with Troop of jurisdiction.

If radio contact is not possible with the Troop of jurisdiction, then contact the nearest troop or station.

If more than one member is assigned to a detail, then the members shall:

- Position themselves uniformly throughout the site or as directed by the state engineer, site foreman, or appropriate authority; and
- Dress alike, in the duty uniform of the day, or as prescribed by the officer-in-charge (OIC).

Members shall:

- Arrive and depart at the times posted and/or prescribed by the Paid Detail Administrator, state engineer, site foreman, or appropriate authority;
- Appropriately record the start time and end time of the paid detail, the actual hours worked, the hours to be paid, the location, and the contractor name;
- Enter into PayStation the detail information including the total amount of hours to be paid; and
- Enter into the PayStation "Comments" field the detail start and end time and the actual hours worked.

Members assigned to a detail shall appropriately report the start time and end time of the paid detail, the actual hours worked, the hours to be paid, the location, and the contractor name to both:

- The Paid Detail Administrator of jurisdiction; and
- The supervisor authorizing the member's PayStation entries: and

When a member is assigned a detail <u>outside</u> of that member's primary troop choice, the member shall furnish the above information to the member's primary Troop Paid Detail Administrator.

Failure to adhere to the requirements outlined in this General Order shall constitute unsatisfactory performance and the member may be disciplined under the Department Rules and Regulations. In such instances the member may be removed from all detail lists until final disposition of the formal disciplinary process.

Supervisory Responsibilities

All supervisory personnel shall:

- Monitor all members assigned to details;
- Immediately address and remedy all observed violations of this General Order; and
- Document all violations on the SP 381 Paid Detail Inspection form, prior to the end of that shift.

The supervisor approving a member's weekly PayStation entry shall:

- Review the member's submitted record of paid details/overtime worked;
- Review the weekly entries made by the member in PayStation;
- Ensure that the submitted record of paid details/overtime worked corresponds correctly to the PayStation weekly entries;
- Require the member to use accrued personal or vacation leave in order to ensure compliance with this General Order; and
- Report all violations of hours to their Commanding Officer.

Troop Commanders

Troop Commanders are directly responsible for the administration and supervision of this General Order and shall assign a supervisor to:

- Conduct inspections of detail sites within the Troop jurisdiction; and
- Submit SP-381 forms with all applicable findings.

Troop Commanders/Duty Officers of jurisdiction over the detail shall only authorize members to work in excess of 16.5 hours when:

- An emergency situation has arisen that requires the members' presence; or
- The member is on their last scheduled work day; or
- The member is on a day off and has no scheduling conflict.

Extension to the 16.5 Hour Rule

The Troop Commander or Troop Duty Officer of jurisdiction over the detail may grant an extension in order to allow member(s) to extend beyond the sixteen and one-half (16.5) hour limit under the following conditions:

- Member(s) shall not be granted more than one extension to the 16.5 hour rule in any forty-eight (48) hour period; and
- No more than a two (2) hour extension shall be granted without the member being required to take paid leave time, (vacation, personal), to ensure adequate rest before the start of their next assignment.

In no event shall the maximum number of weekly work hours as allowed by the Collective Bargaining Agreement be exceeded. Please refer to Superintendent's Memo *13-SM-10 Extension to the 16.5 Hour Rule Limitation* for further clarification.

Troop Inspections

The Troop Executive Officer shall maintain all SP-381 forms and ensure that those forms indicating unsatisfactory performance are brought to the attention of the Troop Commander.

Troop Inspections shall include:

- Site, time, members present, overall appearance, adherence to General Order;
- Verification of assigned members arrival and departure times with both the record of paid details worked and state engineer and/or site foreman; and
- Detail violation(s), if any.

Staff Inspections

Staff Inspectors shall conduct random inspections of detail sites and submit written reports to the appropriate Troop Commander of findings and recommendations to include:

- Site, time, members present, overall appearance, adherence to General Order;
- Verification of assigned members arrival and departure times with both the record of paid details worked and state engineer and/or site foreman;
- Detail violation(s), if any;
- Audit of actual and overall hours worked by assigned members;
- Audit of Paid Detail Office, and
- Audit of Paid Detail Administrator's reports

Administration

Troop Commanders shall issue a Troop Commander's Order outlining the administration of paid details in their respective troop. Troop Commanders shall assign a supervisor as the Paid Detail Officer.

The Paid Detail Officer shall:

- Work an administrative day shift or eve shift at the direction of the Troop Commander;
    - Ensure the administration of paid details complies with the Troop Commander's Order.

Cruisers

The Paid Detail Officer with the approval of the Troop Commander shall determine the number of vehicles at details.

Marked and unmarked vehicles shall:

- Have working emergency lighting activated, when appropriate;
- Be conspicuously and strategically placed between oncoming traffic and the work site; and
- Be properly fueled prior to the detail.

Undercover vehicles shall not be used at road construction sites.

Commercial Motor Vehicle Escort Details

Prior to an escort detail, a member assigned to the Commercial Vehicle Enforcement Section, or the member assigned to the detail, shall inspect all oversized or overweight loads for:

- Permits;
- Load security;
- Vehicle condition; and
- Operator qualifications.

Breaks

To minimize impact on the work site, breaks shall be taken:

- At scheduled times in conjunction with vendor's/contractor's scheduled breaks; and
- Out of public view whenever possible.

1720

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-26**
Subject:	
Military Service	

Policy

The Department shall allow sworn and civilian employees who are members of a Reserve Component of the United States Armed Forces (i.e., the Army National Guard of the United States, the Air National Guard of the United States, the Army Reserve, the Navy Reserve, the Marine Corps Reserve, the Air Force Reserve, and the Coast Guard Reserve) to attend drills and other training as required.

The Department shall allow employees who are members of the Massachusetts Army and Air National Guard and called to emergency/contingency duty in the service of the Commonwealth, to perform their required duties in accordance with the provisions of M.G.L. c. 33, Sections 38, 40, 41, 59, 59A, 60 and 61, and perform duties under Title 10 and 32 of the United States Code (USC).

The Department shall allow employees who are members of the Army and Air National Guard of other states or U.S. territories, to perform active duty as required by the proper authority of the other state or territory.

The Department shall support and facilitate the transition of employees who are called to active service under USC Title 10 and Title 32 upon their activation/mobilization as well as their return from active duty. This supported transition will ensure that the employee is treated fairly and equitably in accordance with all applicable federal and Massachusetts state laws pertaining to their service and employment rights.

Purpose

To establish and define military service protocols for Department of State Police personnel.

Notifications

Employees shall notify Station, Section and/or Unit Commanders of Inactive Duty Training Drill (IDT Drill), Annual Training, emergency/contingency activation/mobilization, as well as any other service obligations that conflict with regular work schedules with as much advance notice as possible.

Notifications Procedure

Members receiving military orders, yearly drill schedules and military leave earning statements shall adhere to the following notification procedure:

- All military orders, yearly drill schedules, and military leave earning statements (LES) shall be submitted via email to polmilitaryleave@pol.state.ma.us. immediately upon notification of military activation if eligible for pay difference during any portion of that military service.
- All military service orders and drill schedules will be reviewed by the Department's Human Resources Military Service Coordinator. Based on the military orders submitted, instructions will be provided to the employee and supervisor to ensure the proper weekly time reporting codes are utilized during the employee's military service. Payroll will not process any paid military service selections in the time reporting system without having received current military orders or drill schedules.
- Until documentation is received and reviewed by the Human Resources Military Service Coordinator, the employee's payroll status will be "Military Leave/No Pay." Additionally, timely notice of pending military service shall be made through the chain of command via a "To/From." The notice shall include:
  - The timing and purpose of military service;
  - Reference of any applicable law; and
  - A copy of official orders or correspondence on official letterhead.
- In the event the employee has not received written orders in hand, the employee shall submit notification through the chain of command to the Office of the Superintendent/Deputy Superintendent and polmilitaryleave@pol.state.ma.us with the following additional information:
  - The name and rank of the military commanding officer;
  - A contact phone number for the commanding officer; and
  - Notice that written orders will be forthcoming.

Time Reporting

Employees on Military Leave With or Without Pay shall be placed on an administrative schedule (i.e., a 5 and 2 schedule) for the duration of any individual or consecutive leaves in excess of thirty (30) consecutive/calendar days. All pertinent station, section, and/or unit records must reflect such schedule. Please note that employees who are performing annual training, drill, or related assemblies do not require this schedule change.

Station, Section, and/or Unit Commanders shall ensure that the appropriate notations are entered into the time reporting system to reflect the employee's military leave/work status if the employee is unavailable to do so.

Authorized Leave

Refer to the accompanying ADM-26 Military Leave – Matrix that is incorporated into this policy.

Department Work While on Military Leave

While an employee is on a military leave of any duration, the employee shall:

- Be deemed separated from service with the Department; and
- Not work any overtime assignments, detail assignments, or be compelled by the Department to perform any other function on behalf of the Department or in the capacity of a Department employee.

Leave Accrual, Seniority, and Other Pay Considerations for Employees on Military Leave

Employees who are called to military service that qualifies them for Military Leave With Pay (pursuant to M.G.L. c. 33, §38, 40 or 41) or Without Pay (under Title 10 or 32 USC or for service with the National Guard of another state or U.S. territory pursuant to M.G.L. c. 33, §13), shall:

- Retain all employment rights pursuant to federal and Massachusetts state law;
- Suffer no loss of Department seniority or seniority for retirement purposes;
- Continue to accrue all regularly accrued paid leave time (sick, vacation, and personal leave) as though still present for duty;
- Leave accrued while on active military leave status cannot be applied to that same unpaid military leave;
- Leave accrued while on active military leave status cannot, upon the employee's return to work, be applied retroactively to result in compensation for previously unpaid leave time;
- Employees on military leave without pay may request to use compensatory time and paid leave time accrued prior to the onset of the military leave without pay as a substitute for unpaid leave, provided that the employee does not qualify to receive a pay difference. Such use of compensatory time earned and accrued leave shall be in accordance with regularly applied rules for use as set forth in the applicable CBA and Policies & Procedures;
- Personal leave accrued while on military leave remains use or lose time for that calendar year. There is no carry-over of personal leave;
- Vacation leave accrued while on military leave remains subject to annual carryover rules per the applicable CBA and state policies; and
- Employees on military leave with pay are only entitled to pay for benefits that are seniority based, not performance based, unless otherwise specified in the applicable CBA. (e.g., shift differential, weekend differential, commuting differential, on-call or stand-by pay, clothing allowance, etc.).

Holidays and Administrative Days Off for Employees on Military Leave

Employees in the armed forces of the Commonwealth on Military Leave With Pay due to activation under M.G.L. c. 33, §§ 38, 40 and/or 41 shall receive holiday pay as regularly compensated per the applicable CBA and state policies, however they shall not be eligible to accrue compensatory time or "holidays owed." On the Commonwealth's day of observance, the payroll code for "Holiday – Did Not Work" shall be entered into the time reporting system and recorded accordingly in station, section, and unit records for the employee.

In accordance with the applicable CBA and state policies, employees who are on Military Leave Without Pay shall not receive holiday pay and are therefore not eligible for accrual of compensatory time or "holidays owed" for legal holidays that occur while the employee is in leave of absence without pay status. Please be advised that the military pay difference for an employee in Military Leave Without Pay status does include compensation for holidays that occur during the leave period.

Administrative Days Off (ADOs) are equivalent to Days Off Regular and shall not be accrued.

Time Limit for Return to Work

Time limits for returning to work from military service depend on the duration of the orders. The rules are:

Service of 1 – 30 days: the beginning of the next regularly scheduled work period on the first full day following completion of service and expiration of an eight-hour rest period.

Service of 31 – 180 days: application for reinstatement to duty through chain of command in To/From format to the Office of the Superintendent/Deputy Superintendent shall be submitted not later than 14 days after completion of military duty.

Service of 181 or more days: application for reinstatement to duty through chain of command in To/From format to the Office of the Superintendent/Deputy Superintendent shall be submitted not later than 90 days after completion of military duty.

In the event an employee does not return to work in a timely manner, he/she is subject to the Department's Rules and Regulations, Policies and Procedures, and applicable provisions of the relevant CBA for unauthorized absences.

Sworn Member Requirements for Return to Department Service

Any leave or break in service 90 days – 1 year:

Members returning from any leave, temporary modified duty or break in service exceeding ninety (90) days requesting full duty status shall ensure the tasks below are completed in the following sequence:

- The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty;
- Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty;
- The member shall then be required to successfully complete:
  - Online academy;
  - Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
    1. Patrol Procedures
    2. Defensive Tactics
    3. EVOC
    4. Firearms (reissuance of assigned UOF gear and requalification if necessary)
- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Any leave or break in service exceeding 1 year:

Members returning from any leave or break in service exceeding one (1) year requesting full duty status shall ensure the tasks below are completed in the following sequence:

The members' Station / Section / Unit Commander shall notify Human Resources in advance of date of return and request the member is returned to full duty.

- The member shall then be required to successfully complete:
  - A background investigation;
  - A medical examination by the State Police Surgeon to include drug testing; and
  - Psychological testing.

Human Resources will notify the Division of Standards and Training Commander or designee when the member is returned to full duty.

The member shall then be required to successfully complete:

- Online academy
- Refresher training in the following areas (if deemed necessary by the Division of Standards and Training Commander or designee):
  - Patrol Procedures
  - Defensive Tactics
  - EVOC

Sworn Member Requirements for Return to Department Service, continued

- Firearms (reissuance of assigned UOF gear and requalification if necessary)

- Upon satisfactory completion of training, the Station / Section / Unit Commanders will be advised by the Commandant of the State Police Academy.

Former members wishing to return from a separation from service that exceeds three (3) years shall:

- Meet all requirements for re-entry to the Department; and
- Successfully complete the Recruit Training for appointment to the position of Trooper.

Note: Failure to successfully complete the Recruit Training may affect pension benefits, if applicable.

Civilian Employee Requirements for Return to Department Service

Civilian employees returning from any military leave that exceeds one year shall be required to successfully complete:

- A background investigation;
- A medical examination, to include drug testing, by the State Police Surgeon;
- Psychological testing; and
- Retraining, as determined by the employee's supervisor or the Human Resources Director.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
December 6, 2022	**ADM-27**
Subject:	
Transfers	

Policy

In order to maintain and enhance the operational functions of the Department, transfers may be made to:

- Ensure adequate staffing levels;
- Provide efficient public safety services; and
- Meet other goals and objectives of the Department.

Transfer Restrictions

Troopers assigned to the Division of Field Services, who have three (3) or fewer years of creditable service shall not be considered for any job posting or positions outside of the Division of Field Services.

This restriction does not preclude the Colonel/Superintendent from assigning Troopers with three (3) or fewer years of creditable service to positions outside of the Division of Field Services based upon specific expertise (e.g. language skills, etc.) which a Trooper may possess.

Troopers with five (5) or more years of creditable service may bid on positions within the Division of Field Services-Field Operations pursuant to the Collective Bargaining Agreement.

Biddable Assignments

Biddable Assignments: All assignments established as a biddable assignment pursuant to the Collective Bargaining Agreement.

Non-Biddable Assignments

Non-biddable Assignments: All assignments not otherwise established as a biddable assignment pursuant to the Collective Bargaining Agreement.

Department non-biddable assignments include, but are not limited to:

- Division of Investigative Services;
- Division of Administrative Services;
- Division of Standards and Training;
- Division of Homeland Security and Preparedness;
- Forensic Services Division
- Division of Field Services pursuant to the Collective Bargaining Agreement, and
- Office of the Superintendent.

Non-Biddable Assignments, continued

Due to the specialized nature of these assignments, and the knowledge and skills required, these positions require a selection process.

Request for Transfer: Biddable Assignments

Members who request a transfer to a biddable assignment within the Division of Field Services shall:

- Submit an electronic transfer request.

Only those requests received at least twenty-one (21) days prior to the end of a fifty-six (56) day bid cycle shall be considered for the next fifty-six (56) day bid cycle.

Members are allowed to have only one (1) transfer request for a biddable assignment at any time.

The Human Resources Section shall publish a list of transfer requests for the Division of Field Services on Docushare containing the requesting member's name, current assignment, request, and seniority. Two (2) lists shall be maintained: one (1) list for troopers and one (1) list for supervisors.

Note: Requests for transfers to a biddable assignment within the Division of Field Services shall remain on file until honored or withdrawn.

Request for Transfer: Non-Biddable Assignments

Members who request a transfer to a non-biddable assignment within the Department shall submit the following to Human Resources Section:

- A To/From;
- A resume; and
- Any other materials required within the posting.

The member shall forward a copy of the above items to:

- Their current Commanding Officer; and
- The Commanding Officer of the requested section/unit.

Requests for transfer to a non-biddable assignment shall not be kept on file at the Human Resources Section. All requests shall be submitted within the specified time periods of the posting.

Members who request a transfer to a non-biddable assignment within their respective troop or station shall submit the following to the Troop Commander:

- To-From;
- Resume; and
- Any other materials required within the posting.

Posting and Selection Process: Non-biddable Assignments

Vacancies for non-biddable assignments for members shall be posted for at least ten (10) calendar days on Docushare.

Providing that the minimum qualifications are met, members may apply to:

- Department non-biddable assignments;
- Troop non-biddable assignments when the member is assigned to the troop; and
- Station non-biddable assignments when the member is assigned to the station.

Each posting shall include:

- Assignment, location, and work schedule;
- Name of the current Commanding Officer;
- Rank requirements, if any;
- Minimum commitment and retention requirements, if any (e.g., completion of specialized training or the ability to develop a specialized skill); and
- Other requirements or information as appropriate.

Note: All qualified applicants shall be considered. Members who are on leave are responsible for keeping themselves informed of such postings.

Department Procedure: Non-biddable Posting and Selection

Step	Action
1	The Commanding Officer of the section/unit shall seek approval to fill the vacancy from their Division Commander.
2	The Division Commander shall seek approval to fill the vacancy from the Deputy Superintendent.
3	The Division Commander shall submit a SP 389 Posting Request form to the Human Resources Section for any anticipated openings.
4	The Human Resources Section shall post the anticipated openings for non-biddable assignments for ten (10) calendar days.
5	The Human Resources Section shall forward all timely non-biddable transfer requests to the Section/Unit Commander for review.

Department Procedure: Non-biddable Posting and Selection, continued

Step	Action
6	The Commanding Officer of the section/unit shall schedule interviews, conduct the selection process, and select the candidate(s).
7	The Commanding Officer of the section/unit shall submit a To/From to the Division Commander detailing: • The names of all applicants; • The names of the qualified applicants interviewed, the members of the interview panel, questions asked, and the evaluation instrument; and • The candidate chosen. The chosen candidate's resume and other applicable documentation shall be attached to the To/From.
8	If the Commanding Officer of the section/unit does not find an acceptable candidate, the position may be posted again using the process identified above.
9	The transfer order shall serve as official notice to the candidate(s).

Department Procedure: Troop and Station Non-biddable Posting and Selection

Step	Action
1	The Troop Commander shall post within the troop for ten (10) calendar days for anticipated openings for troop/station non-biddable assignments.
2	The Troop Commander, along with the Commanding Officer of the section/unit where applicable, shall review submissions, schedule interviews, conduct the selection process, and select the candidate(s).
3	If the Troop Commander does not find an acceptable candidate, the position may be posted again using the process identified above.
4	The transfer order shall serve as official notice to the candidate(s).

Interview Process: Non-biddable Assignments

Commanding Officers shall:

- Create an interview panel with a minimum of two (2) people;
- Create a list of standard questions using guidelines from the Human Resources Section; and
- Ensure that a minimum of three (3) qualified applicants are interviewed using the standard questions referenced above. (Follow-up questions may be asked, as necessary.)

If there are less than three (3) qualified applicants, all qualified applicants shall be interviewed.

If the section/unit works in conjunction with another agency (e.g., District Attorney's Office), a representative of the other agency may be one of the interview panel members.

Responsibilities

Position	Duties
Deputy Superintendent	• Schedule transfer meetings as needed; • Obtain the transfer request list from the Human Resources Section and conduct inter-divisional transfer meetings; • Review candidates and the operational needs of the Department; • Make written recommendations for transfers to the Colonel/Superintendent; and • Notify Commanding Officers of pending transfers.
Colonel / Superintendent	• Review and approve or deny the recommendations for transfer; and • Forward the approved transfers to the Human Resources Section.
Human Resources Section	• Issue transfer orders through the Office of the Colonel/Superintendent; and • At least five (5) days before the transfers become effective, notify all members affected by the transfers, through transfer orders.

Transfer Process	Transfer meetings shall take place in conjunction with the fifty-six (56) day bid cycle. Commanding Officers shall be immediately notified of the finalized transfers. Transfers shall be effective seven (7) days prior to the end of the current 56-day bid cycle. Commanding Officers may make transfers outside of the fifty-six (56) bid cycle based on operational needs of the Department.
Bidding and Bid Cycle	All bidding shall conform to the Collective Bargaining Agreement. Once in effect, the fifty-six (56) day bid cycle shall not be violated. Exceptions are as follows: • Promotions; • Training activities, with five (5) day-notice given to the affected member; • Vacancies created as a result of retirement, illness, or leave; • Emergencies; or • With the mutual consent of all parties.
Intra-Troop/Division Transfers	Troop and Division Commanders may make transfers within their Troop or Division at any time within the guidelines of this policy. Troop and Division Commanders shall notify their respective commanders and the Human Resources Section of the pending transfers.
Temporary Duty (TDY) Assignments	TDY assignments may be made by the Colonel/Superintendent at any time. TDY assignments: • Need not be posted; and • Shall not exceed ninety (90) days without a review and written extension by the Colonel/Superintendent. Members shall maintain only one (1) TDY status at any given time. Troop Commanders may make TDY assignments within their troop and shall forward a copy of the order to the Human Resources Section.

Deployment	Each Division Commander shall conduct a needs assessment in order to deploy personnel in the best interests of the Department. The Human Resources Section shall maintain a Position Management System that contains: • A table of organizational entities, as approved by the Colonel/Superintendent; • A position description, classification, and task analysis; • The number, type, and location of each position; and • A monthly report indicating whether each position is filled or vacant.
Supervisory Members	Supervisory members do not have bidding rights but may be considered for posted positions in accordance with the process identified in this policy.
Equal Opportunity	The Diversity Officer shall obtain and review transfer request lists from the Human Resources Section. The Diversity Officer may make recommendations in writing to the Colonel/Superintendent.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-28**

Subject:

Department Motor Vehicles

Policy

State owned vehicles shall be operated for official use only and in accordance with Policy and Procedure ADM-19 *Vehicle Management,* ADM-19A *Vehicle Use and Maintenance and ADM-19B Automated Vehicle Locator (AVL) Technology*.

Commuting in Cruisers

Members with cruisers who are traveling to and from home to their duty stations or assignments shall undertake all necessary activities ordinarily performed during motor patrol.

While commuting in a cruiser, all members are to be attired in the required duty uniform unless their usual duties require otherwise.

While commuting with a cruiser, discretion in choosing routes of travel should be used in order to promote the visibility concept on roadways which receive little or no coverage.

A member coming upon an accident scene while in commuting capacity shall immediately notify the substation or police agency of jurisdiction. The member shall then assist at the scene until relieved by an officer from the substation or police agency with primary jurisdiction, or receives instructions to take appropriate action. If the accident occurs on a roadway where the State Police has primary jurisdiction and a State Police patrol is not available, he/she shall investigate the accident, advise the substation having jurisdiction of the pertinent details, and make a report of same upon returning to duty.

A commuting member arriving at his/her residence shall ensure that the cruiser is properly secured in a safe place and that all equipment is secured in a locked compartment within the cruiser. Firearms shall not be left in an unattended cruiser unless secured in accordance with UOF-04 *Use of Force Equipment*. The vehicle, whenever possible, shall not be parked on a public way. A member may garage a cruiser, at no expense to the Commonwealth, away from his/her residence if the Troop or Section Commander approves the location.

Members shall be required to commute in cruisers, when available, to and from their duty stations and/or assignments and homes, between shifts, unless otherwise authorized by the Troop or Section Commanding Officer.

Subject: Department Motor Vehicles	Number: ADM-28

Vehicle Maintenance

Members shall ensure that cruisers assigned to them are given proper maintenance and care. Members shall also ensure that expended or faulty emergency and safety equipment is promptly replaced. Before returning from days off and starting a tour of duty each member shall inspect the cruiser assigned to them in order to determine if the vehicle is in good condition, undamaged and that all equipment prescribed for the vehicle is present and operable. Any deficiencies shall be recorded in the Barracks Daily Administrative Journal/Department Records Management System and corrective action shall be initiated by the member.

Vandalism to an unattended cruiser shall be reported to the member's duty station or assignment as soon as possible after discovery. Any damage to a cruiser or its equipment, sustained while commuting, responding, or on recall, shall be reported as prescribed for regular on-duty status.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-29**
Subject:	
Workplace Violence	

Policy

The Department shall maintain zero tolerance for workplace violence and shall ensure that the workplace environment remains free from any form of violence.

This policy shall be applicable to all employees, sworn and civilian.

This policy does not apply to situations where sworn members are exposed to threats or violent acts from persons in their care or custody, or the public at large, as an unavoidable component of the lawful performance of their law enforcement duties.

Workplace Violence Defined

Workplace shall be defined as:

- Any Commonwealth owned or leased property;
- Any location where Commonwealth business is conducted;
- Any site where an employee is considered on duty;
- Commonwealth vehicles or private vehicles being used for Commonwealth business; or
- Any location if the violence has resulted from an act or decision made during the course of conducting Commonwealth business.

Workplace violence shall include, but is not limited to:

- Intimidation or threats communicated by any means;
- Physical assault and/or battery;
- Threats and/or acts of intimidation communicated by any means that cause an employee to be in fear of their own safety;
- Disruptive or aggressive behavior that causes a reasonable person to be in fear of their own safety or that of a colleague or that causes the disruption of workplace productivity; or
- Property damage.

Incidents of workplace violence may be individual acts or may take place between an employee(s) and:

- Other employee(s);
- Clients/customers/vendors;
- Acquaintances/partners; and
- The general public.

Workplace Violence Coordinator

The Workplace Violence Coordinator shall be a Commissioned Officer assigned by the Colonel/Superintendent. The Workplace Violence Coordinator shall report directly to the Commanding Officer of the Division of Standards and Training.

Workplace Violence Safety Incident Team

The Deputy Superintendent shall designate employees to the Workplace Violence Safety Incidence Team and provide such names to the Commonwealth's Human Resource Division. The established team shall consist of:

- A Commissioned Officer or senior manager from each division; and
- Representation from the Department's Human Resources Section, the Office of Employee Relations, Division of Standards and Training, and the Legal Section.

Disciplinary Action

Any employee found to have engaged in any act of workplace violence, in violation of this policy, is subject to disciplinary action up to and including termination.

Disciplinary action may also require the employee to participate and to successfully complete counseling, anger management education, or other appropriate programs.

The Department may consider acts of workplace violence, along with an employee's success in completing recommended programs, within the promotional process and other work related determinations (where not prohibited by statute, regulation or collective bargaining agreement).

Investigations

The Workplace Violence Coordinator does not conduct investigations into workplace violence. All investigations shall be conducted in accordance with ADM-14 Personnel Investigations.

Responsibilities

Position	Duties
Department Employees shall:	• Not engage in workplace violence behavior; • Immediately report any incident, threat of incident, or potential incident of workplace violence to their immediate supervisor; • Cooperate in investigations of workplace violence; and • Actively participate in the Department's efforts to prevent and eliminate workplace violence.
Sworn Members shall:	• Promptly respond to reports of workplace violence; • Take appropriate and immediate enforcement action in response to an incident to ensure the safety of those involved; • Follow proper reporting and investigating procedures as prescribed by this policy; and • Make notification to the Workplace Violence Coordinator, **within seventy-two (72) hours of the incident** utilizing a SP 390 Workplace Violence Incident Report.
Supervisors shall:	• Aggressively monitor the workplace to prevent and detect workplace violence; • Take appropriate corrective action to stop workplace violence; • Immediately report any incident of workplace violence to the Troop/Section Duty Officer and the Workplace Violence Safety Incidence Team Member designated for their Division; • Conduct investigations in a manner that is sensitive to the safety concerns and privacy of the victim(s), the perpetrator(s), and all witnesses; • Assist the employee/victim of a workplace violence incident by providing any additional support or services necessary to ensure their protection and safety; • Forward a copy of the final report for all workplace violence incidents, through channels, to the Workplace Violence Coordinator; • Make appropriate referrals to the Employee Assistance Unit, the Office of the Ombudsman, or Human Resources Section as needed; and • Ensure notification is made to the Workplace Violence Coordinator, **within seventy-two (72) hours of the incident** utilizing a SP 390.

Responsibilities, continued

Position	Duties
Station/ Section/ Unit Commanders shall:	• Ensure, if necessary, written workplace protection plans are devised for employee(s) who are victims of workplace violence; and • File a copy of the workplace protection plan with the Workplace Violence Coordinator.
Workplace Violence Safety Incident Team shall:	• Meet as needed, to devise, review policies, procedures and safety protocols for workplace violence; • Ensure, when necessary, written workplace protection plans for employees who are victims of workplace violence are operative; • Ensure consistent and coordinated responses to acts of workplace violence; • Evaluate and/or make additional notification, recommendations as required when notified of an incident of workplace violence by a supervisor; and • Review and evaluate any serious or critical incidents of workplace violence and make any appropriate recommendations to the Workplace Violence Coordinator necessary to enhance safety considerations.
Workplace Violence Coordinator shall:	• Review and file all final reports of workplace violence incidents and make recommendations to the Division Commander of Standards and Training and the Workplace Violence Safety Incident Team; • Coordinate and schedule meetings as needed with the Workplace Violence Safety Incident Team; and • Annually report statistical data relative to workplace violence incidents within the Department to the Division Commander of Standards and Training.
Human Resources Section shall:	• Coordinate with Workplace Violence Coordinator and the Commonwealth's Human Resources Division regarding Workplace Violence Training; and • Maintain all records of civilian employees trained in workplace violence.

Subject: Workplace Violence	Number: ADM-29

Exceptions	All employees should be aware that conversations with the Office of the Ombudsman and/or Employee Assistance Unit are considered confidential and that these entities are not the proper venue for notification to the Department for workplace violence complaints or incidents.
Retaliation	Any retaliation against an individual who has complained about workplace violence and any retaliation against individuals for cooperating with an investigation of workplace violence are prohibited and shall not be tolerated.
Distribution of Policy	This policy shall be issued to each employee upon hiring, and shall be continuously posted and available on PowerDMS.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-30**
Subject:	
Asset Management	

Policy

The Department shall conduct an Annual Fixed Asset Inventory.

The Department shall:

- Record and report Governmental Generally Accepted Accounting Principles (GAAP) Fixed Assets of $50,000 or more within the Massachusetts Management Accounting and Reporting System (MMARS) twice per year pursuant to State Comptroller policy;
- Maintain an Asset Management System that reflects all Non-GAAP Fixed Assets with a useful life of one (1) year or more and a cost between $1,000 -$49,999; and
- Maintain inventories of other assets in accordance with State Comptroller policy and as determined by the Division of Administrative Services.

Definitions

Asset Forfeiture or Federal Grant Fixed Asset: Tangible property funded with asset forfeiture or federal grant funds with a useful life of (1) one year or more, regardless of original cost.

Fixed Assets: Tangible property with a cost of $1,000 or more and a useful life of one (1) year or more.

Technology Asset: Tangible asset determined to have the capability of storing data, regardless of original cost (excludes USB flash drives, digital versatile disks, or other consumable technology).

Asset Management

The Asset Management Unit shall manage fixed asset transactions and conduct an annual inventory.

The Division of Administrative Services Chief Administrative Officer or designee shall:

- Designate the Asset Manager for the Department; and
- Ensure the Asset Management Unit reports to the Division of Administrative Services Chief Administrative Officer or designee.

Asset Management, continued

When Commanding Officers acquire, transfer, lose, or dispose of fixed assets, they shall:

- Notify the Asset Management Unit by forwarding a copy of the SP 255 Equipment Transfer Form or by providing information via email.

Annual Fixed Assets, Biannual Capital Assets Inventories, Asset Forfeiture, Technology, and Federal Grant Inventories

Step	Action
1	The Asset Management Unit shall provide a report of the inventory to the Commanding Officer of each reporting entity.
2	Commanding Officers shall: • Reconcile the inventory with their previous inventory by physically accounting for each item listed; • Complete and return the SP 255 form for fixed assets that have been acquired, transferred, lost, or disposed of; • Complete and return the SP 255A form for all disposals; this form is in addition to the SP 255 form; • Tag newly acquired items with an inventory control identification number; • Rectify discrepancies; • Retain copies of the inventory printout and SP 255 and SP 255A forms; • Sign-off on Capital (Fixed) Asset Inventory confirmation sheet for biannual review of GAAP Fixed Assets; • Complete, sign, and return Compliance letter for annual inventory reviews; and • Continue to monitor and update the Fixed Asset inventory on a perpetual basis throughout the year. Assets should be added when acquired, and updated at all times to reflect their current location and disposition.

The Asset Management Unit shall:

- Coordinate the Annual Fixed Assets Inventory Review; and ensure:
  1) All Sections/Units receive reports of their fixed asset inventory as of June 30th of each year. All Sections/Units must complete this inventory annually;
  2) The Biannual Capital (GAAP/Fixed) Asset Report shall be completed as of December 31st and June 30th of each year; and
  3) All Sections/Units receive reports of their Annual Asset Forfeiture, Technology, and Federal Grant Inventory as of January 31st of each year. All Sections/Units must complete this inventory annually. Assets associated with each of these funding sources shall be accounted for regardless of value.

Subject:	Number:
Asset Management	**ADM-30**

Annual Fixed Assets, Biannual Capital Assets Inventories, Asset Forfeiture, Technology, and Federal Grant Inventories, continued

Whenever there is a change of command at a reporting entity, or a change in the personnel assigned to manage specified fixed assets, an asset inventory shall be completed.

Note: The Asset Management Unit shall be notified before fixed assets are disposed of, so that surplus procedures can be followed.

Exceptions

The following Sections/Units are responsible for the management of their assigned inventory:

- Fleet Section;
- Armorer;
- Traffic Programs (radars, lidars and portable breath test devices);
- Communications Section;
- Special Operations Section/Units; and
- Other Department Section/Units as determined by the Chief Administrative Officer or designee.

Commanding Officers shall maintain a master inventory of their assigned fixed assets that:

- Is accurate and reflects changes as they occur; and
- Includes the valuation of the assets.

These Sections/Units shall also conduct an annual inventory, reconcile their databases, and forward the updated inventory report to the Asset Management Unit as of June 30th of each year.

Subject:	
Information Technology Resources (ITR)	

Policy

The Department shall regulate the use of Information Technology Resources (ITR), including computers, printers and other peripherals, programs, data, local and wide area networks, and use of the internet.

ITR communications including email messages are considered public records, copies of which may be requested by the public.

Definitions

Department Information Technology Resources: Include computers, printers and other peripherals, programs, data, local and wide area networks, and use of the internet.

User: Any employee and/or contractor of the Department that utilizes any of the above resources.

User Responsibilities

Failure to adhere to this policy may subject employees to disciplinary action, up to and including termination.

Employees assigned to a Department entity where they may have occasion to access another system not owned or supplied by the Department shall comply with the terms and provisions of this policy for all such usage.

Acceptable Uses

All employees are allowed to use ITR to the fullest extent possible for any legitimate law enforcement function.

Unacceptable Uses of Agency ITR

Unless conducting a legitimate law enforcement function, it shall be unacceptable for any employee to use ITR:

- In furtherance of any illegal act, including violation of any criminal or civil laws or regulations;
- For any political or commercial purpose;
- To send threatening, sexual, or harassing messages;

Unacceptable Uses of Agency ITRs, continued

- To access or share obscene, or otherwise inappropriate materials;
- To infringe intellectual property rights;
- To gain, or attempt to gain, unauthorized access to any computer or network;
- For any use that causes interference with or disruption of network users and resources, including distribution of computer viruses or other harmful programs;
- To intercept communications intended for other persons;
- To misrepresent either the Department or a person's role at the Department; or
- To libel or otherwise defame any person.

Supervisor Responsibilities

Supervisors are responsible for ensuring that employees under their command comply with the provisions of this policy and shall monitor use in order to ensure compliance.

Data Confidentiality

Under no circumstances is it permissible for employees or contractors to acquire access to confidential data unless such access is required to perform their job or task.

Under no circumstances may employees or contractors disseminate any confidential information that they have rightful access to unless such dissemination is authorized by proper supervisory authority.

Copyright Protection

Employees shall exercise care and judgment when copying or distributing computer programs or information that could reasonably be expected to be copyrighted.

Hardware or Software Installation

Employees shall not install hardware and/or software on any Department ITR without express written authorization from the Division of Administrative Services.

Computer Viruses

Employees shall exercise reasonable precautions in order to prevent the introduction of a computer virus into the local area or wide area networks. Note that many viruses are spread using email attachments.

Virus scanning software shall be used to check any software downloaded from the internet or obtained from any questionable source. All disks or software shall be inspected for virus infection prior to introduction into the Department system or stand-alone computers or laptops.

Security

Employees shall:

- Change passwords at least every ninety (90) days;
- Never share their passwords with anyone else, unless ordered by proper authority;
- Promptly notify the Division of Administrative Services if they suspect their passwords have been compromised;
- Log off the network or have password-protected screen savers in operation if leaving their ITR unattended for extended periods;
- Not access the internet or other external networks via modem unless they have received prior written permission from the Division of Administrative Services;
- Not move desktop computers, terminals, and printers from their assigned location without written notification and the consent of the Division of Administrative Services; and
- Not transfer to another employee any mobile equipment assigned to the individual such as laptop computers, mobile data terminals, and portable printers without prior written notification from the Division of Administrative Services.

Email

Employees are reminded that email messages are considered public records, copies of which may be requested by any member of the public.

Employees shall:

- Consider email messages to be the equivalent of letters sent on official letterhead and be written in a professional and courteous tone;
- Be aware that emails can be stored, copied, printed, or forwarded by recipients; and
- Not subscribe to email mailing lists, unless related to their job function.

Email shall only be used to communicate official business documents to official recipients. The forwarding of non-business related information is prohibited. Employees who are the recipients of non-business related email are required to discard them and shall not forward them to anyone.

Email attachments that are received from an unknown party should be considered suspicious, and shall not be opened until the sender's identity can be confirmed.

Emails which represent privileged correspondence between Department attorneys and other Department employees shall be clearly marked within the message as "Attorney-Client Privileged." In addition, documents that are sent as attachments to an email shall also be clearly marked "Attorney-Client Privileged."

Subject: Information Technology Resources	Number: ADM-34

No Expectation of Privacy

The Department retains the right to inspect any employee's computer at any time

Use of Department ITR constitutes express consent for the Department to monitor and/or inspect any data that employees create or receive, any messages they send or receive, and any web sites that they have accessed.

Employees shall be aware that network administrators routinely monitor network traffic.

Compliance

Staff Inspections shall conduct periodic inspections of all ITR to ensure compliance with all provisions of this policy.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-34A**
Subject:	
Social Media/Networking	

Policy

The personal use of social media can have an unintended adverse impact on Department of State Police employees in their official capacity. As such, this policy provides precautionary information as well as prohibitions on the use of social media by Department employees.

When using social media/networking, Department employees (sworn and civilian) should be mindful that their speech becomes part of the worldwide electronic domain.

Department employees should also be mindful to treat Department of State Police business as confidential per Rules and Regulations Article 5.

Official Department Social Media accounts shall be administered by the Office of Media Relations. Maintenance and information posted/contained therein shall be limited to employees authorized by the Colonel/Superintendent and/or the Director of the Office of Media Relations.

Definitions

Networking: An exchange of information or services among individuals, groups, or institutions that may include, but are not limited to: the cultivation of productive relationships for employment or business, networking sites, podcasts, as well as comments posted on a site, message or discussion boards, LinkedIn, Plaxo, Jobster, Craigslist, and MyWorkster.

Post: Content an individual shares on a social media/network site or the act of publishing the content on a site.

Social Media: A form of electronic communication through which users create online communities to share information that may include, but are not limited to: personal messages, videos, photo and video sharing sites, blogs, micro blogging sites, including sites such as Facebook, Twitter, YouTube, Pinterest, Instagram, and Snapchat.

Social Media and Networking: Categories of internet-based resources that integrate user-generated content and user participation. They are online platforms where users can create profiles, share information, and socialize with others professionally, personally, or informally. The interface is conducted through posts or speech via a range of devices such as computers, cellular phones, and tablets to name a few.

Speech: Expression or communication of thoughts or opinions via spoken word, writing, photographs, video footage, or related forms of expressive conduct or communication.

Supervisor Responsibilities

Supervisors are responsible for ensuring that employees under their command comply with the provisions of this policy and address violations as soon as possible.

Responsibilities of Employees

In accordance with Department Policies and Procedures and Rules and Regulations, Department employees using social media/networking applications shall:

- Use appropriate discretion in their reference to the Department and not discredit and/or embarrass themselves or the Department;
- Be aware that speech and/or related activities on social media/networking sites may reflect upon them in their official capacities and/or upon the Department, and act accordingly;
- Be cautioned that speech, on or off-duty, may form the basis for disciplinary action under current law;
- Be aware that privacy settings and social media/networking sites are constantly in flux, and they should never assume that personal information posted on such sites is protected or private;
- Expect that any information created, transmitted, downloaded, exchanged, or discussed in a public online forum may be accessed by the Department at any time without prior notice;
- Not divulge information gained due to their authority; and
- Not make any statements, speeches, appearances, or endorsements, or publish materials that could reasonably be considered to represent the views or positions of the Department without express authorization.

Department Employees should use common sense in all communications, particularly on any social media/networking site. An examination of the facts could potentially result in an internal personnel investigation. Employees are responsible for anything they write or present online. Some examples of prohibited action may include, but not be limited to:

- Speech containing obscene or sexually explicit language, images, or acts and statements, or other forms of speech that ridicule regardless of the intent to malign, disparage, threaten harm or otherwise express bias against any race, gender, religion, or protected class of individuals; and
- Speech involving themselves or other Department personnel reflecting behavior that would reasonably be considered reckless, irresponsible, or unprofessional.

Responsibilities of Employees, continued

Department employees should exercise care if they choose to post personal information on the internet. Some activities in an employee's personal life may impact job performance, the performance of other employees, and/or interests of the Department. Once information is posted, it is potentially accessible by anyone, indefinitely, and such information may result in unintended consequences, such as:

- Limiting future career opportunities (e.g., undercover, covert operations, or attainment of a security clearance);
- Manipulation by defense counsel or civil attorney to undermine or impeach an employee's credibility or integrity in order to hinder a successful prosecution, or to support a lawsuit against the Department or Commonwealth; and
- Being viewed, altered, printed, and redistributed by other internet users including criminal organizations.

Department employees who choose to identify themselves as employees of the Massachusetts State Police whether explicitly, implicitly, or visually shall:

- Be considered to be publicly representing the agency in a professional manner while employed by the Department; and
- Be responsible for all content published on their individual social media site(s).

Creation of Media Application

Colonel/Superintendent shall approve in writing before the creation of any:

- Website, page, fan group or other application of social media using the Department as the basis of such application. Examples may include, but are not limited to:
- Creating a website or fan group dedicated to the Massachusetts State Police;
- Creating an identity using a username such as Massachusetts State Police, MSP, or any term associated with the Department.

Department employees shall **not**:

- Publish Commonwealth or Department intellectual property-protected images using social media without prior approval from the Colonel/Superintendent (e.g., photos of sworn personnel in uniform; marked agency vehicles; videos of training or operations exercises; compilation videos of personnel, vehicles, or equipment; electronic artwork of the State Police patch or seal); and
- Create an identity, website, page, fan group or other application of social media using the Massachusetts State Police as the basis of such a creation without prior approval from the Colonel/Superintendent (e.g., creating a website or fan group dedicated to Massachusetts State Police, using "Massachusetts State Police" or "MSP" in a username).

Subject:	Number:
Social Media/Networking	**ADM-34A**

Violations

Department employees shall notify their immediate supervisor when they become aware of:

- Any personal identifying information of themselves on the internet in violation of this policy; or
- A posting and/or website in violation of the provisions of this policy.

Any sites deemed inappropriate, bringing discredit/embarrassment to the Department and or employees, and/or promoting misconduct whether on or off duty shall be:

- Investigated either through a criminal or administrative investigation.

Investigative Activities

Department employees shall **not**:

- Conduct any activity related to ongoing investigations through their personal social networking accounts.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**ADM-35**

Subject:

Body-Worn and Cruiser-Mounted Cameras

Policy

The Massachusetts State Police (MSP) will implement the use of Body-Worn Cameras (BWC) and Cruiser-Mounted Cameras (CMC) by members to:

- Enhance policing transparency;
- Increase public trust; and
- Help foster police-community relations through public facing recording.

Definitions

Public Facing BWC/CMC Recordings: Are often an effective tool to preserve member and civilian interactions. These recordings are also effective in capturing video and audio evidence for use in criminal and internal investigations, as well as member training. The Department recognizes that video images cannot always show the full account nor do video images capture an entire visual or auditory scene as experienced by the member. For this reason, variations between a member's first-hand account and the BWC/CMC recordings may vary. As such, persons reviewing recordings must be cautious about drawing conclusions about what the recordings actually represent.

Record After the Fact (RATF): Is an audio and/or video only recording feature that may be included in the BWC and the CMC system. RATF captures events that occur while the camera system is powered on, even if not actively recorded by a member. This is a limited ability to retrieve an event that was not originally classified as a recorded event. RATF shall not be enabled unless agreed to by the parties

Purpose

The purpose of this policy is to establish guidelines for the:

- Proper use;
- Management;
- Storage; and
- Retrieval of video and audio data recorded by BWC/CMCs.

It is the policy of the Department to respect the privacy interests of all persons in the Commonwealth, while ensuring professionalism in its workforce.

Note: BWC/CMC footage is subject to the Massachusetts Public Records Law, M.G.L. c. 66, § 10 and, unless the recordings falls within one of the exemptions noted in M.G.L. c. 66, § 10, the Department will release the footage upon request and in compliance with such law.

Training

All Department members shall successfully complete Department-approved training on the operation of the system and this policy.

BWC Activation and Incidents of Use

BWC's shall not be activated remotely by a supervisor.

Members shall activate the BWC in conjunction with official law enforcement duties while:

- On regular tours of duty;
- Overtime assignments; and
- Paid details where such use is appropriate for the proper performance of duties, and where the recordings are consistent with this policy and the law.

If there is an immediate threat to a member's life or safety, making BWC activation impossible or dangerous, the member shall activate the BWC at the first reasonable opportunity to do so when such situation calls for BWC activation. There will be a thirty (30) second buffer for BWC, which means, the thirty (30) seconds prior to activation of the BWC will also be recorded/retrievable as video only.

Every member is required to record contact with civilians, regardless of the number of BWC members present and recording, in the following occurrences:

- Vehicle Stops, motorists assists, and crash investigations;
- Investigative person stops: field interview observations, consensual stops, or articulable reasonable suspicion stops, or stops supported by probable cause;
- All dispatched calls for service involving contact with civilians;
- Initial responses by members, including on-site detentions, investigations pursuant to an arrest, arrests, and initial suspect interviews on scene;
- Traffic safety and sobriety checkpoints, while interacting with the public, and during all field sobriety testing;
- Pat-frisks, searches of persons incident to arrest (if not already activated), consents to search, and inventory searches;
- K-9 searches (applicable to BWC equipped K-9 members only);
- All searches for lost/missing persons or criminal suspects (unless the incident or event is of such duration that deactivating the BWC/CMC is necessary to conserve available recording time pursuant to **BWC/CMC Pause/Deactivation);**
- Incidents of emergency response driving and pursuit driving, however a BWC recording need not be used if Cruiser-Mounted Camera is recording;
- When a member reasonably believes a lawful/peaceful crowd control public event that would not otherwise require recording may transition, or does actually transition, into unlawful activity;
- Any contact that becomes adversarial, including a Use of Force incident; or
- Any other civilian contact or official duty circumstance that the member reasonably believes should be recorded in order to enhance policing transparency, increase public trust and police-community relations, or preserve representations of member-civilian interactions.

BWC members are not required to wear and/or activate BWCs while in a Department

BWC Activation and Incidents of Use, continued

facility, or other areas where general access is restricted; however, booking procedures shall be recorded.

Cruiser-Mounted Camera Activation and Incidents of Use

CMC recordings are video only and may be activated by member-initiated recording or via auto-record trigger. Audio of CMC recordings is provided by the BWC only when the BWC member is present and recording. All CMCs shall be programmed with auto-record triggers after five (5) seconds that will automatically activate recording. These auto-record triggers include activation of emergency lighting, siren use, crash detection, gun rack opening/patrol rifle, and dog door opening, unless the member is in the vicinity of his/her home, in which case the member is permitted to turn off the CMC cameras to avoid the auto-record triggers of gun rack opening/patrol rifle, and dog door opening.

Members may turn off individual CMC camera recordings when the auto-record trigger event does not coincide with a delineated scenario requiring recording. (e.g.: emergency lights are on, but member is working a fixed post assignment).

If the CMC system does not automatically activate by an auto-record trigger when an event recording is required, the member shall activate the device by pressing the "record" button. Members shall utilize the video recording functions of the CMC system whenever it is employed, except where/when exempted by this policy.

There will be a one (1) minute buffer for CMC, which means, the one (1) minute prior to activation of the CMC will also be recorded/retrievable as video only, unless the BWC is activated during that time frame to provide audio. Members failing to record a required incident shall document the circumstances in the applicable report and articulate the reason(s) the incident was not recorded.

Members shall activate the CMC in conjunction with official law enforcement duties while:

- On regular tours of duty;
- Overtime assignments;
- Paid details where such use is appropriate for the proper performance of duties, and where the recordings are consistent with this policy and the law.

If there is an immediate threat to a member's life or safety, making CMC activation impossible or dangerous, the member shall activate the CMC at the first reasonable opportunity to do so when such situation calls for CMC activation.

Every member is required to record contact with civilians regardless of the number of CMC and/or BWC members present and recording, in the following scenarios:

- Traffic and criminal enforcement stops;
- In-progress violations of law;

Cruiser-Mounted Camera Activation and Incidents of Use, continued

- Pursuits;
- Investigative person stops: field interview observations, consensual stops, or articulable reasonable suspicion stops, or stops supported by probable cause including field interviews, interrogations, and field sobriety testing;
- Emergency response driving;
- Escort or motorcade driving;
- Fatal crash or major crime scenes (in accordance with **BWC/CMC Pause/ Deactivation**);
- Safety Cars at traffic safety and sobriety checkpoints, unless otherwise directed by the checkpoint supervisor;
- Prisoner transport, at which time the rear CMC shall be utilized when transporting a prisoner(s) in the rear seat;
- Transport of individuals other than prisoners in the rear seat shall be recorded by the transporting member, unless the passenger is a Department member or other government official;
- Searches of vehicles and/or persons; and
- Any other incident the member deems appropriate while acting in the performance of their official duties.

Notice of Recording

BWC/CMC members shall make every effort to inform civilians that they are being recorded at the earliest opportunity unless there is an immediate threat to the member's life or safety, making BWC/CMC notification impossible or dangerous. BWC/CMC members should make every effort to notify civilians with language such as "Ma'am/Sir, I am advising you that our interaction is being recorded."

For custodial interrogations and crime scenes, BWC members are reminded to comply with the requirements of INV-16 Electronic Recording of Interrogations and crime lab policies, respectively.

Use of a BWC/CMC is an acceptable method of conducting a recording of custodial interrogations and crime scenes.

Consent to Record

BWC/CMC members are not required to obtain consent to record. If a civilian has requested the BWC/CMC member to stop recording, members have no obligation to stop recording if the recording is initiated under any of the circumstances identified in **BWC/CMC Activation and Incidents of Use**. A civilian's request to turn the BWC/CMC off should be recorded, as well as the member's response.

Recording within a Residence

Members recording in a residence shall not record beyond what is necessary for the civilian contact, and not use the BWC with exploratory intent in an effort to create an inventory of items in the residence. BWC/CMC members are not required to obtain consent to record, but must provide notice pursuant to **Notice of Recording**. A civilian's request to turn the BWC/CMC off should be recorded, as well as the member's response.

Recording of Victims / Witnesses

If a BWC/CMC member is in video or audio-recording range of a victim or witness who is giving his/her first account of a crime, the member shall record the encounter with notice to the victim/witness. However, should the member determine the investigation or inquiry would be impeded by continuing to record, or would cause reasons for concern for the safety of the witness or victim, the member has the discretion to turn off the BWC/CMC only as long as necessary to gather the information required to continue the investigation or inquiry. The member shall state the reason for turning off the BWC/CMC prior to doing so.

Audio Only Recording is Prohibited

Intentionally obstructing video recordings while allowing audio only to record on a BWC/CMC device is strictly prohibited. Due to the possibility of violating legitimate privacy expectations, inadvertently recording protected conversations, or unintentionally violating M.G.L. c. 272, §99 Interception of Wire and Oral Communications, all camera pre/post event buffers shall be configured so they do not record audio.

BWC/CMC Pause/ Deactivation

Once the BWC/CMC is activated, recording should continue uninterrupted until or unless the event has paused or concluded. To the extent possible, prior to pausing/deactivating a BWC/CMC, the member should state the reason for doing so.

The following are examples of when an event shall be considered paused or concluded:

- Victim and/or witness contact has paused or concluded;
- All persons stopped have been released or left the scene or an arrestee has arrived at the barracks for booking. If a transporting member has a BWC, recording shall continue until the transporting member arrives inside the station at the booking desk;
- The member determines the investigation or inquiry will be impeded by continuing to record, or would cause reasons for concern for safety of the witness or victim;
- The BWC/CMC member may pause the recordings while consulting with other law enforcement members or supervisors, as such discussions:
    - May be for training purposes; or
    - Could undermine, reveal or disrupt MSP strategy or plans, ongoing investigations; or
    - Could jeopardize the secrecy, safety or security of victims, witnesses, confidential informants, undercover members, sworn members, or members of the public; or
    - For other legitimate law enforcement related reason.

It should be noted that pausing the BWC does not pause the CMC as both systems must be paused independent of each other, but it does stop the audio feed from the BWC;

- The incident has concluded prior to the arrival of the member;
- The incident or event is of such duration that deactivating the BWC/CMC is necessary to conserve available recording time; or
- The member is ordered to turn the BWC/CMC off by a supervisor.

Member Responsibilities for BWCs

At the beginning of each shift, the BWC member shall:

- Ensure that the issued equipment has a charged battery and is functioning properly;
- Notify a Supervisor whenever there is a malfunction or damage to the BWC;
- Shall only use MSP issued and approved BWC technologies; and
- Wear BWC in a manner that does not obstruct or intentionally defeat the purpose of the BWC Policy.

While on duty, the BWC member shall:

- Activate the BWC and record as outlined in the sections above ;
- Properly tag/classify recordings for retention; and
- Document the existence of a BWC recording in written narratives.

If a member fails to properly activate the BWC, fails to record the entire contact, improperly pauses the recording, or the BWC malfunctions, the member should document the circumstances and reason in the incident or arrest report, if known to the member, should an incident or arrest report of the interaction be made. In the event an incident or arrest report was not created, the circumstances and reason for the failure to properly activate should be logged in the Daily Administrative Journal.

Docking/Uploading requirements- BWC Best Practice is as follows:

- Prior to the end of the shift, each member places his/her BWC in his/her docking station. The docking station will charge the BWC's battery and transfer video data to the storage system;
- Each member shall place his/her BWC in a docking station no less than one (1) time per week and upload all of their video data into the evidence management system, unless otherwise directed by his/her Section/Station/Unit Commander;
- The member shall ensure all uploaded videos are properly tagged/classified in the evidence management system for retention;
- Before going on any planned leave of one (1) work week or more, each member shall place his/her BWC in a docking station and upload all of their video data into the evidence management system; and
- If a member becomes aware that this process is not occurring or becomes aware of any other malfunction of the system, the member shall immediately notify his/her first line supervisor.

Member Responsibilities for Cruiser-Mounted Cameras (CMC)

In general, members equipped with CMC systems will follow the same procedures as defined for Body-Worn Cameras.

They shall:

- Ensure the CMC's are in good working order;
- Immediately report any malfunction or damage to a supervisor;
- Activate and record as directed by this policy;
- And upload recordings to the evidence management system upon arriving at any Department station equipped to wirelessly upload CMC video.

Supervisor Responsibilities

The Supervisor of BWC/CMC members shall:

- Ensure all members assigned a BWC/CMC utilize the BWC/CMC in accordance with this policy;
- Upon notification of a malfunction, Supervisors will remove the BWC/CMC from service, report the malfunction or damage to the Management Information Section at 508-820-2690 and issue a spare unit, where available; and
- Access BWC/CMC recordings during the course of duties in accordance with policy's **Internal Access/Review**.

Internal Access/Review

BWC/CMCs and their recordings shall not be used for the purpose of harassing:

- Members of the public;
- Sworn members; or
- Department employees.

BWC members shall be provided, through their unique user name/password, with access to their BWC footage, and may also review that footage prior to making any statements or producing any reports. All members shall also have reasonable access to other Department BWC/CMC footage, and may review that footage, prior to making any statements that could reasonably be seen as resulting in disciplinary action.

In the event a member refuses to make a statement after being provided reasonable access to other Department BWC/CMC recordings, Department administrative action may be taken against the member for the member's refusal to cooperate with an investigation, or to make any statements or reports. In the event a member refuses to make a statement after being denied reasonable access to their own or other Department BWC/CMC recordings, Department administrative action shall not be taken against the member for failing to make a statement, but could still be pursued for the underlying event and/or refusal to cooperate with an investigation.

BWC/CMC Member Access to Footage

BWC/CMC members and other members of the Department may review BWC/CMC recordings as they relate to:

- Their involvement in an incident for the purposes of completing an investigation and preparing official reports. To help ensure accuracy, members are encouraged to review the BWC/CMC recording(s) prior to preparing reports;
- Providing testimony in court to refresh recollection. Members shall inform the prosecuting attorney whether the member reviewed the BWC/CMC recording(s) prior to a court appearance; and
- Providing a statement pursuant to an internal investigation, including member-involved shooting investigations and other critical incidents as outlined in **BWC/CMC Member Access to Footage** Following an Officer-Involved Shooting.

BWC/CMC Member Access to Footage Following an Officer-Involved Shooting

Following an officer-involved shooting, or other use of deadly force, members, including supervisors, shall not view the BWC/CMC recording prior to the Force Investigation Response and Support Team ("FIRST") and/or the State Police Detective Unit (SPDU) of jurisdiction investigating member(s) viewing the recordings and uploading it into the system. This prohibition shall not apply where exigent circumstances exist, such as a member being injured, or where the BWC/CMC recording may reasonably provide identifying suspect information or other pertinent, time-sensitive information that may be valuable in addressing the exigent circumstances in a timely manner.

All members involved in an officer-involved shooting or other use of deadly force, and BWC/CMC members who witness a member-involved shooting or other use of deadly force, shall be authorized to view all BWC/CMC recording(s) prior to a walkthrough and/or statement.

Collecting and Securing BWC/CMC Recordings following an Officer-Involved Shooting or Use of Deadly Force

In the event of an officer-involved shooting or other use of deadly force, FIRST Team personnel and/or SPDU of jurisdiction investigating member(s) shall be responsible for collecting and securing the BWC/CMCs from all involved members and witness members at the earliest opportunity.

FIRST Team personnel and/or the SPDU of jurisdiction investigating member(s) shall ensure that all involved BWC/CMCs are uploaded into the system. Consistent with evidence collection and preservation protocols, BWC/CMC(s) will be returned to member(s) once the BWC/CMC digital files have been uploaded into the system.

Non-BWC/CMC Member Access to Footage

Non-BWC/CMC members who are not supervisors, as defined in **Supervisor Access to Footage**, who wish to access recordings of a BWC/CMC member by:

- Written or verbal permission of a supervisors; or
- In accordance with **Internal Access/Review**, and **BWC/CMC Member Access to Footage Following an Officer-Involved Shooting**, and only if required to produce a report, make a statement, provide testimony, or for training purposes.

Said member shall either submit a verbal or written request via To-From or e-mail with the BWC/CMC member's supervisor. Approval of such request must be documented by the supervisor or Duty Lieutenant in writing via To-From, DAJ entry, or e-mail.

Verbal requests and approvals must be documented in the DAJ by the supervisor or Duty Lieutenant stating the name of the requesting officer, the approving supervisor, and the scope of the request (i.e. BWC/CMC member, date/time of footage…)

Access to Footage

BWC/CMCs and their footage shall not be used for the purpose of harassing members of the public, sworn members, or Department employees.

As part of supervision, any supervisory member within the recording member's immediate

Access to Footage, continued

chain of command shall perform regular reviews and auditing of BWC/CMC usage in accordance with Rules and Regulations Article 3.7 Supervisory Members, and shall not require employee notification. Review of footage for the purposes of evaluations shall not be done outside of the current EES cycle for the member to whom the footage relates.

The Colonel, the Deputy Superintendent, and any Division Commander or his/her designees, in the ranks of Major, Detective Captain, and Captain, may review BWC/CMC recordings for any reason. Any Non-Commissioned or Commissioned Officer conducting a Personnel Investigation may review BWC/CMC recordings pertaining to that investigation.

Any request for access to BWC/CMC recordings outside of the immediate chain of command of the BWC/CMC member, must be submitted in writing via To-From or e-mail to the BWC/CMC member's Division Commander. The Division Commander or his/her designee, as enumerated above, may approve or deny said request in writing. The BWC/CMC member shall be provided written notice of such request if approved.

Nothing in this policy shall be construed to prohibit the Department's Chief Legal Counsel, Legal Division, and Records Unit access to BWC/CMC recordings for legitimate legal purposes such as, but not limited to:

- Public records requests;
- Court orders;
- Litigation;
- Freedom of Information Act requests; and
- Discovery requirements.

The Department and SPAM will make mutually good faith efforts to notify one another if either reasonably anticipates that BWC/CMC footage may be published by any media outlet.

Office of Professional Integrity and Accountability Access to Footage

While mindful that BWC/CMCs and their footage shall not be used for the purpose of harassing members of the public, sworn members, or Department employees, members of the Office of Professional Integrity and Accountability shall conduct periodic reviews to ensure BWCs and CMCs are being used appropriately.

Use of Footage for Training

Both BWC and CMC footage is the property of the Department and may be used by the Department for training purposes. Any member coordinating training may forward a request to the Division of Standards and Training to use BWC/CMC footage for training purposes. Prior to use, involved members shall be notified of intended use of footage and given an opportunity to provide input, including any objections. Final authority for use under this section resides solely with the Colonel.

External Access

BWC/CMC recordings related to an ongoing investigation or in support of a prosecution shall be provided by the State Police Legal Section to the applicable law enforcement entity in accordance with ADM-16 Notifying Prosecuting Agencies Regarding Evidence.

Should a member receive a subpoena for BWC recordings, the member shall direct the subpoena as soon as practicable to the State Police Legal Section.

BWC/CMC recordings are presumptively subject to a public records request (M.G.L. c. 66, § 10). If a member receives a request for BWC/CMC footage from members of the media, the request shall be directed to the Legal Section, with a copy to the Director of the Office of Media Relations. All other requests for BWC/CMC recordings, including victim or witness requests, shall be directed to the Legal Section. Members are reminded of the requirements of Rules and Regulations Article 5.23 Dissemination of Information.

BWC/CMC Recording Retention

No BWC/CMC footage or recordings shall be deleted/destroyed while any related investigation is still open/pending. Similarly, no BWC/CMC footage or recordings shall be destroyed until all appeals and/or related litigation is exhausted and closed. The Department shall retain all other BWC/CMC footage or recordings based on the below retention schedule:

A. Schedule I - Indefinite Retention
- Death Investigation
- Motor Vehicle Accidents Resulting in Death
- Sexual Assault/Abused Person

B. Schedule II - 10 Year Retention:
- Use of Force
- Felony

C. Schedule III - 6 Year Retention
- Misdemeanor

D. Schedule IV – 3 Year Retention
- Motor Vehicle Accidents with Personal Injury
- Investigate Person – member responding to call
- Investigate Premise – member responding to call
- Significant Event - Public Safety
- Traffic Stop
- Member initiated encounter/Field Interview Observation (FIO)

E. Schedule V - 1 year Retention
- Motor Vehicle Accidents with Property Damage only
- No Report - Dispatch / On Site
- Civilian Transport without arrest
- Test/Training

Requests to Delete Video

The camera systems will not allow recordings to be deleted by members. All recordings that do not fall within the retention schedules of **BWC/CMC Recording Retention** shall be retained for 30 days.

In cases in which a recording has been requested for litigation, the District Attorney's Office and/or the Department's Legal Section shall be notified of the request and said request shall be addressed pursuant to evidentiary rules of court.

In the event of a purely accidental activation of the camera system that does not have any relevance to an event requiring camera activation, members may request that the video file be deleted.

Members shall submit an e-mail request with sufficient information to their Troop/Section/Unit Commander who shall review the recording to confirm it is an accidental recording and it contains no footage required for submission as evidence, or that could be subpoenaed for any criminal or civil proceeding.

The Troop/Section/Unit Commander shall submit the request and approval in writing (e-mail is sufficient) to the BWC/CMC System Administrator who shall delete the file and document the reason for deletion and authorizing authority in the audit log.

Video files recorded by members as part of the initial system training sessions may be routinely deleted by the BWC/CMC System Administrator with the approval of the Division Commander of Administrative Services.

Improper Recording

BWC/CMCs shall not be used to record:

- Breaks, meal periods, or time periods when a member is not responding to a call, or when not in service;
- Any personal conversation of or between other department employees without the recorded employee's knowledge;
- Non work-related personal activity, especially in places where a reasonable expectation of privacy exists, such as locker rooms, dressing rooms, or restrooms;
- Investigative briefings and roll calls;
- Encounters with undercover members or confidential informants;
- Departmental meetings, workgroups, in-service training, or assignments of an operational or administrative nature. Using BWC/CMCs for training purposes is not a violation of this restriction;
- Communication with Department members or other law enforcement agency personnel;
- A telephonic conversation, except in accordance with the provisions of State and Federal Law while in the performance of official duties; or
- Strip searches (refer to DET-02 Custodial Inventory).

Improper Use or Dissemination of BWC/CMC Recordings

All recording/footage is the property of the Department, not the employee and any dissemination must be approved by the Colonel or his/her designee, the Legal Section, or be disseminated in the course of their official duties. BWC/CMC recording/recordings shall not be:

- Used for the purposes of ridiculing or embarrassing any employee or person depicted on the recording;
- Randomly reviewed for disciplinary purposes; or
- Copied/filmed/photographed/reproduced in any fashion by any employee other than in the course of their official duties, and with supervisor approval (e.g., using their personal electronic device to copy).

Prosecutorial & Court Ordered Restrictions

Access to BWC/CMC recordings/footage are subject to all state and federal laws, and any orders of a court of competent jurisdiction. BWC/CMC recordings/footage shall be preserved, stored, and retained in accordance with the requests, directions, and orders of appropriate prosecutorial and/or judicial authorities.

BWC/CMC Technological Changes

Vendor technology is constantly changing and vendors routinely add new features to BWC/CMC systems. Only those features approved and accepted by the Colonel/Superintendent shall be utilized for the Department's video systems.

Any additional vendor system features or enhancements shall be vetted by the BWC/CMC System Administrator, and if deemed desirable, shall be presented to the Colonel/Superintendent for approval and bargaining, before implementation.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**ADM-36**

Subject:

Diversity and Equal Opportunity

Policy

The Department recognizes that when the effects of employment practices, regardless of their intent, discriminate and create adverse impact against any group of people, affirmative action shall be taken to ensure diversity and equal opportunity and provide equitable remedies for the consequences of present and/or past discriminatory practices. This provides a positive benefit by expanding opportunities to society, the public, and all current and future employees.

Purpose

The Department prohibits discrimination in employment on the basis of race, color, religious creed, national origin, ancestry, gender, sexual orientation, protected veteran status, age, and disability.

Strategy for Implementation

The Department shall develop a strategy, which includes plans to address:

- Affirmative action; and
- Diversity and equal opportunity.

The Department, as required and limited by state and federal law, remains committed:

- To ensure equitable participation of minorities, women, Veterans, including Vietnam era Veterans, and persons with disabilities, in all of its operations.

Scope

This policy applies to all employment practices and programs including, but not limited to:

- Recruitment, selection, promotions, termination, transfers, layoffs, compensation, training, and benefits, as well as terms and conditions of employment.

The Department shall annually review, investigate, and when necessary modify:

- The policies relative to facilities and programs accessible to the public; and
- Provisions of reasonable accommodation for persons with disabilities.

Diversity Officer

The Colonel/Superintendent shall appoint a Diversity Officer who shall:

- Develop and implement:
  - An affirmative action plan;
  - A diversity plan; and
  - Track the request, purpose, and dissemination of any protected information.
- Report to the Colonel/Superintendent:
  - Specific goals and timetables for achievement of each plan;
  - The Department's compliance with reporting guidelines and requirements; and
  - Any recommendations regarding equal opportunity.

Divisional Diversity Officer

The Divisional Diversity Officer (DDO) is appointed by the Division Commander and approved by the Colonel and Department Diversity Officer who is the Unit Commander of the Recruitment and Diversity Office.

The DDO shall:

Assist and advise their Division Commander and Unit Commanders in gathering information pertaining to equal employment opportunities specific to their respective Division. This includes:

- Working with the Department Diversity Officer and obtaining Divisional Workforce Demographics; and
- Working to identify and reduce bias within their Division

The DDO will be an informational career path resource for ALL members interested in specific stations, sections or units within their division (For example: AirWing, Marine Unit, VFAS, Gang Unit, K9, SPDU, CINRET, CSSS and CAT Teams etc.).

The DDO will continuously monitor, track, and work with other Divisional Diversity Officers in identifying members who have demonstrated their commitment to the MSP, its organizational values, and who are interested in specific units throughout the State Police. The DDO will contact these members and begin the mentoring process.

Due to the size and complexity of the MSP, DDOs may be provided with assistant DDOs who are approved by the Division Commander.

The DDO is not the avenue for reporting or investigating any external or internal complaint. In these instances, members should continue to follow the procedures outlined in ADM-14 Personnel Investigations and ADM-18 Anti-Harassment/Sexual Harassment and Discrimination.

Responsibilities

The Colonel/Superintendent has the overall responsibility for ensuring equal opportunity and appropriate affirmative action policies exist within the Department. Supervisors at all levels have the responsibility for the successful implementation of the affirmative action and equal opportunity plans.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-41**
Subject:	
Telephone Use/Access	

Policy

This policy defines the proper use of all Department telephones for all forms of communication, including voice, text, multimedia, and native or third-party applications on a cellular telephone. All Department-issued telephones, are intended for official business only.

Within the content of this policy, the term "employees" shall refer to both sworn and civilian Department members.

Department Telephone Use

Department employees shall adhere to Massachusetts General Laws, MSP policies & procedures, rules and regulations, provisions of their applicable collective bargaining agreements and/or the Red Book while utilizing Department telephones.

Department telephones shall not be utilized in a manner that interferes with an employee's official duties and responsibilities. All telephone-related communication shall be conducted in a professional manner, providing appropriate information and assistance to callers, where applicable.

All telephone use, including, but not limited to, voice recordings, call history, text and multimedia messaging, photos, videos, and native or third-party application use, is subject to public records law and litigation-related discovery. In addition, all telephone use is subject to audit and review by the Department.

Cellular telephones shall not be utilized to circumvent radio communications in the ordinary course of Department-related business, except in exigent circumstances or wherein officer safety could otherwise be compromised.

Equipment and Access

Only Department-issued equipment shall be connected to any Department network or telephone jack, or telephone line. Department employees needing nomadic use of a Department-issued telephone number for teleworking or other legitimate business purposes must submit a written request for approval, through appropriate channels, to their Station/Section/Unit supervisor.

Landline Telephone Requests

Requests for additional or deletion of landlines in Department facilities should be submitted in writing by the Commanding Officer of the Station/Section/Unit, through appropriate channels, to the Director of Telecommunications.

Notice of Department Telephone Voice Recording

Department employees are advised that all incoming or outgoing telephone calls from Department facility telephones, including emergency 911 calls transferred from any State Police or local dispatch center, or to any Troop Headquarters or Substation, are subject to audio voice recording.

Telephone Interpreter Services

Department members needing foreign language interpreter services by telephone, for official State Police use, should follow the procedure outlined below:

1. Call Department contracted interpreter service at (833) 254-4575;
2. State the language needed when prompted;
3. State your barracks name (e.g. “SP South Boston”)
   Note: Members not assigned to a specific Troop or Barracks should use “GHQ”;
4. Wait to be connected to an interpreter; and
5. Make an administrative journal entry into RAMS or ACISS indicating the usage of same.

Please note that you do not need a PIN or a code to use this service. The Department’s account is set for Priority Queueing; all incoming calls will be first in line. Also, please note this is for foreign language translation services via telephone only—there is no provision for in-person interpreter services.

Subject:	Number:
Telephone Use/Access	**ADM-41**

Department-Issued Cellular Telephones

Department-issued cellular telephones are restricted to employees or Units whose duties require the use of a cellular telephone to effectively perform the essential functions of the employee's or Unit's job. While-Department-issued cellular telephones are intended to be used for official Department business, employees may make reasonable use of personally assigned Department-issued cellular telephones for personal calls or other use, but may be liable for costs associated with such use.

Requests for Department-issued cellular telephones shall be:

- Submitted through channels, in writing, to the Chief Administrative Officer (CAO).

Employees issued a Department cellular telephone shall:

- Sign for the issued equipment;
- Submit a To-From, through channels, to the CAO and the Fiscal Section if a Department-issued cellular telephone is lost, stolen or damaged; and
- Upon separation from service or transfer from the Department assignment for which the Department issued a cellular telephone, immediately return the cellular telephone to Asset Management or submit a new request, through channels, to the CAO for retention of the Department-issued cellular telephone in his/her new assignment.

Personally-Owned Cellular Telephones

Personally owned cellular telephones should not be used to document evidence. Personally owned cellular telephone records may be subject to litigation discovery if the cellular telephone is utilized to conduct official Department business including, but not limited to, voice recordings, call history, text and multimedia messaging, photos, videos, and native or third-party application use.

The Department is not liable for lost, stolen, or damaged personal cellular telephones or any monetary charges an employee receives while using a personal cellular telephone.

Department employees shall limit, where practicable, personal phone use during work hours or while in view of the public.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**ADM-46**
Subject:	
Sexual Activity in Public Places	

Policy

The Commonwealth of Massachusetts has a legitimate enforcement interest in ensuring that sexual activity and/or genital exposures do not occur in public places, where the likelihood of being observed by a casual passerby is reasonably foreseeable.

Disparate enforcement of applicable statutes against any particular group and/or disparate treatment of any group is prohibited.

Definitions

Public Place: For the purposes of this policy only, a place where it is known or reasonably should be known that members of the public may be present and/or may be able to observe activity. An area may be open to the public and not be considered a public place for the purposes of this policy if a reasonable person would not foresee that his/her activity would be seen by a member of the public.

Sexual Conduct: For the purposes of this policy only, the exposure or touching of the genitals, buttocks, or female breasts for purposes of sexual arousal, gratification or offense, or public solicitation to engage in such conduct in a public place. Sexual conduct does not include socializing and expressions of affection absent the particularized conduct described in this subsection.

Criminal Laws

Members shall pay particular attention to the elements of the various offenses when making a determination to arrest possible offenders for engaging in sexual conduct on public property (e.g. rest areas, parks).

All of the elements of a particular offense shall be met in order to charge an individual with an offense.

Most criminal complaints involving consensual sexual conduct on Commonwealth lands generally allege violations of the following Massachusetts General Laws (MGL):

Subject: Sexual Activity in Public Places	Number: ADM-46

Criminal Laws, continued

MGL c. 272, § 16 Open and Gross Lewdness

To sustain a conviction for open and gross lewdness, the Commonwealth must prove five (5) elements:

- That the defendant exposed their genitals, buttocks, or female breasts to one or more persons;
- That they did so intentionally;
- That they did so openly, i.e., with the intent of exposing themselves, or in reckless disregard or substantial risk of public exposure, to others who might be offended by such conduct;
- That defendant's act was done in such a way as to produce alarm or shock; and
- That one or more persons were in fact alarmed or shocked by defendant's exposing their self. Members should identify at least one witness, who is not a police officer, to satisfy this requirement.

MGL c. 272, § 35 Unnatural Acts

The conduct must:

- Occur in a public place;
- Involve oral contact with the genital or anal area, anal intercourse or masturbation of another person; and
- Be done intentionally or with reckless disregard that others may observe the conduct and be offended.

MGL c. 272, § 53 Indecent Exposure and Lewd and Lascivious Behavior

A charge of lewd and lascivious behavior requires both:

- The sexual conduct must occur in a public place; and
- That it be by a person who knows or should know of the presence of another person or persons who may be offended by the conduct.

This section also prohibits the:

- Public solicitation of conduct to be performed in a public place; when
- The conduct committed or solicited involves touching of the genitals, buttocks, or female breasts for the purpose of sexual arousal, gratification, or offense.

Procedure

Members are free to approach and make inquiries to persons in public areas. The approach or inquiry, however, shall neither explicitly nor implicitly assert that persons must respond to their inquiries.

Persons cannot be arrested:

- For failing to respond;
- On mere suspicion;

Subject: Sexual Activity in Public Places	Number: ADM-46

Procedure, continued

- For failing to give an account which satisfies the member; or
- Because of a past offense.

Members shall not order someone to leave a public area in the absence of unlawful conduct.

An investigatory stop or brief detention shall be based on reasonable suspicion.

An arrest shall be based on probable cause.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-47**
Subject:	
Bias-Based Policing	

Policy

The Department of State Police is committed to protecting the constitutional and civil rights of all people.

The Department is committed to bias-free policing.

Sworn Department members are prohibited from engaging in bias-based policing practices.

Sworn Department members shall receive initial training and subsequent annual training in bias-based policing to include its legal aspects and consequences, in order to prevent bias-based policing.

The Department does not endorse, train, teach, support, or condone any type of stereotyping, or bias-based policing, by its members. While recognizing that most members perform their duties in a professional, ethical and impartial manner, the Department is committed to identifying, investigating, and eliminating any instances of bias-based policing.

In conducting law enforcement activities such as criminal investigations, members shall not consider personal characteristics such as race, ethnicity, national origin, gender, gender identity/expression, cultural group, sexual orientation/identity, socio-economic status, religion, immigration status, and/or age, except when credible intelligence relevant to the location and time frame links a person or people of a specific race, ethnicity, cultural group, national origin, gender, gender identity/expression, sexual orientation/identity, socio-economic status, religion, immigration status, and/or age to a specific unlawful incident, incidents, criminal patterns or schemes (suspect specific incidents.)

Except in suspect specific incidents, members are prohibited from considering the race, national origin, ethnicity, sexual orientation/identity, socio-economic status, religion, immigration status, and/or age, gender identity or expression, cultural group, or disability, of members of the public in deciding to detain a person or stop a motor vehicle and in deciding upon the scope or substance of any law enforcement action.

Subject:	Number:
Bias-Based Policing	**ADM-47**

Purpose

Bias practices are unfair, ineffective, promote mistrust, and perpetuate negative and harmful stereotypes.

Allegations of bias-based policing or any other type of discriminatory practice, real or perceived, are detrimental to the relationship between the police officers and the communities they protect and serve, because they strike at the basic foundation of public trust. This trust is essential to effective community-based policing.

Bias-based policing is illegal and an ineffective method of law enforcement. Bias-based policing results in increased safety risks to members and the public and is a misuse of valuable police resources. More importantly, such improper methods violate the civil rights of members of the public and may lead to increased exposure to liability. The Department is committed to an ongoing and open dialogue with community leaders to ensure that it is engaging in bias-free policing. The Department is committed to community policing in all the Commonwealth's cities and towns, and specifically proactively engaging with youth, families and community members to build relationships, solve problems, and prevent crime.

Definitions

Bias-Based Policing: Any prohibited pattern or practice, including, but not limited to, stopping, detaining, questioning, frisking, and searching by police officers, that is based upon a generalized belief that a person of a particular race, ethnicity, national origin, gender, or other characteristic, status, or trait, is more likely to commit certain types of crimes. This type of inappropriate reliance on certain characteristics such as race, ethnicity, national origin, religion, gender, sexual orientation, immigration status, gender identity or expression, economic status, age, cultural group, or disability as the basis for providing differing law enforcement services or enforcement activity as outlined is strictly prohibited.

Suspect Specific Incident: An incident in which a member is lawfully attempting to detain, apprehend, or otherwise be on the lookout for one or more specific suspects who have been identified or described in part by national or ethnic origin, gender, race, religion, sexual orientation, immigration status, gender identity or expression, economic status, age, cultural group, or disability or any other protected characteristic.

Bias-Based Policing Prevention

To prevent bias-based policing, the Department shall:

- Provide training programs to ensure that appropriate employees receive training on bias-based policing practices, implicit bias, the legal aspects and consequences of bias-based policing and implicit bias, and the standards established by this policy;
- Ensure that this policy is disseminated to all members, dispatchers and appropriate civilian employees;
- Continuously review and, where appropriate, revise all procedures that involve the stop, detention, apprehension, or search of

Bias-Based Policing Prevention, continued

individuals to ensure that procedures are in compliance with the provisions of the law and this policy;
- Continuously review performance recognition and evaluation systems, training curricula, policies, and customs of the Department to determine if any practice encourages conduct that may support or lead to bias-based policing; and
- Work with the Executive Office of Public Safety and Security (EOPSS) and the Registry of Motor Vehicles to educate the public on what to expect when either stopped or detained by the State Police, as well as what the officer's expectations are during motor vehicle stops or detainment, to ensure the safety of both officers and the public.

Enforcement of Bias-Based Policing Policy

To enforce the provisions of this policy, the Department shall:
- Take appropriate and timely action to investigate allegations of bias-based policing; and
- Take appropriate and timely measures to correct any institutional practice or policy that may support or lead to the use of bias-based policing.

Responsibilities

Division of Standards and Training shall:
- Promote professionalism throughout the Department;
- Ensure that all employees receive training on the prevention and elimination of bias-based policing;
- Assist supervisors in identifying and modifying potentially problematic behavior;
- Utilize appropriate citizen complaint procedures to document and investigate allegations of bias-based policing;
- Investigate referrals from the EOPSS; and
- Conduct a documented annual administrative review of agency practices including public concerns.

Responsibilities

Position	Duties
Colonel/ Superintendent	Shall: • Promote the Department's commitment to prevent and eliminate bias-based policing; • Ensure all employees receive a copy of this policy; • Ensure all employees comply with this policy; • and • Ensure the continuing analysis and public release of analysis related to documented police interactions with community members.
Supervisors	Shall: • Monitor members conduct to ensure that the standards of this policy are being carried out; • Address instances of non-compliance with this policy; • Ensure that members collect data on race, gender, and searches in accordance with laws, and TRF-08 Citations; and • Take positive steps to identify, prevent, and eliminate any instances of bias-based policing by members of the Department.
Members	Shall: • Provide everyone with fair and impartial bias-free police services consistent with constitutional and statutory mandates; • Respect the diversity and the cultural differences of all people; • Uphold the Department's commitment to lawful and non-discriminatory enforcement that promotes public safety and strengthens the public's trust and confidence; • Promptly report any instances of bias-based policing to a supervisor; and • Take affirmative and positive steps to identify, prevent, and eliminate any instances of bias-based policing by other members.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**ADM-49**
Subject:	
Deaf or Hard of Hearing Individuals	

Policy

In accordance with the Americans with Disabilities Act, 42 U.S.C. §12101, *et seq*. (ADA), the Massachusetts State Police is committed to serving all individuals according to their needs. Recognizing that persons who are deaf or hard of hearing have may require auxiliary aids or services to ensure effective communication, the Department recognizes its obligations to provide necessary auxiliary aids or services and is committed to meeting those needs. Individuals who are deaf or hard of hearing are entitled to a level of service equivalent to that provided to other individuals without disabilities.

Definitions

Auxiliary aids and services: Various types of communication aids that assist people who are deaf or hard of hearing to communicate effectively. Examples include qualified interpreters on-site or through video remote interpreting (VRI) services; notetakers; real-time computer-aided transcription services; written materials; exchange of written notes; telephone handset amplifiers; assistive listening devices or systems; telephones compatible with hearing aids; closed caption decoders; open and closed captioning, including real-time captioning; voice, text, and video-based telecommunications products and systems, including text telephones (TTYs), videophones, and captioned telephones, or equally effective telecommunications devices; videotext displays; accessible electronic and information technology; or other effective methods of making aurally delivered information available to individuals who are deaf or hard of hearing.

Deaf or Hard of Hearing: An individual who has or is regarded as having substantially limited hearing with or without assistance within the meaning of the ADA. This includes a person who does not hear well enough to rely on their hearing to process speech and language, even with the assistance of hearing aids

Lip Reading: (also referred to as speech reading): The ability to use information gained from movements of the lips, face, and body to increase understanding. It is important to note that while lip-reading may be effective for some individuals who are deaf or hard of hearing, for many it will be insufficient. Some assessments have

determined that only one third of spoken words can be understood by speech or lip-reading.

Definitions, continued

Qualified Interpreter: An interpreter who, via a video remote interpreting service or an on-site appearance, is able to interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. Qualified interpreters include, for example, sign language interpreters, oral transliterators, and cued-language transliterators.

The Massachusetts Commission for the Deaf and Hard of Hearing (MCDHH) is the state agency that determines who is qualified as an interpreter for MSP.

Sign language: Communication through the use of standardized hand or finger signs or gestures. American Sign Language (ASL) is a form of sign language frequently used in the United States. Signs convey concepts or ideas, even though a sign may stand for a separate English word. Signing individual letters by finger spelling can supplement sign language. Just as there are regional variations (dialects) in spoken English, there are regional differences in sign language.

General Considerations and Guidelines

If a member has any reason to believe that a person who has a need to communicate with the Department is deaf or hard of hearing, the member must advise the person that appropriate auxiliary aids and services, including interpreters, will be provided free of charge when necessary for effective communication. The member will ensure that such aids and services including interpreters are offered, utilized, and documented. Primary consideration will be given to the auxiliary aid requested by the person who is deaf of hard of hearing unless there is another equally effective means of communication available. This means that, upon initiating contact, the member should ask the individual who is deaf or hard of hearing about their preferred method of communication.

Members encountering a person they believe are deaf or hard of hearing should never assume that that the person understands what is being communicated. This caution applies to all forms of communication, whether sign language, speech, writing, or reading.

Communication problems in police-public encounters may result in violations of an individual's civil rights, and provide the potential basis for misunderstandings, problems, frustration, and embarrassment. Therefore, it is important that members are able to

identify when they may be interacting with an individual who is deaf or hard of hearing in order to differentiate the person's actions and demeanor from other causes, and then take appropriate measures to facilitate effective communication.

General Considerations and Guidelines, continued

Some deaf and hard of hearing persons have limited written language skills, particularly involving complex matters such as legal warnings and admonitions. Therefore, members should not assume the effectiveness of this form of communication and should gain confirmation of a person's understanding whenever possible.

Encountering and Communications with Deaf or Hard of Hearing Persons

Deaf persons may attempt to gain the attention of a member by touching him/her when the member is not facing them. This is how deaf and hard of hearing persons commonly gain the attention of others, so that they can see the other person's face and attempt to communicate. Members should not interpret this touching alone as offensive or possibly threatening behavior unless additional factors suggest otherwise.

Members should never assume that the person understands verbal communications until comprehension can be confirmed by appropriate responses to questions or directives. Even where an individual may appear to be comprehending some portion of the communication, verbal communication should not be solely relied upon where an individual has indicated a need for auxiliary aids or services.

Members should not assume that persons who wear hearing aids or cochlear implants (an electronic device that partially restores hearing) can hear and fully understand information that is verbally communicated. Some people use these devices to provide sound awareness rather than to increase speech understanding. Highly stressful situations, background noise, multiple speakers, and complex information and instructions can compromise the effectiveness of hearing aids and cochlear implants. Members can assess comprehension by seeking appropriate responses to simple questions or directives as indicated above.

Once someone is identified as a deaf or hard of hearing person, members should attempt to determine (by written or other forms of communication) the person's preferred means of communication (e.g., sign language, lip reading, reading and note writing, using a laminated communication card, or speech).

Encountering and Communications with Deaf or Hard of Hearing Persons, continued

Deaf or hard of hearing persons may require additional time to respond to commands, instructions, and questions. Members must be alert to indications that a person may be deaf or hard of hearing. Such indications may include, but are not limited to the following:

- The appearance of bumper stickers, rear window decals, or visor notices/symbols indicating the disability;
- Failure of persons to appropriately respond to spoken commands or signals;
- Use of signs, hand signals, or gestures in an attempt to communicate;
- Display of cards by the person noting his or her hearing disability;
- Inability or difficulty of a person to consistently follow verbal instruction or requests for information;
- A need to see the member's face directly, suggesting that the person is attempting to lip read;
- Evidence of assistive devices such as hearing aids, cochlear implants, or picture symbols; and
- Evidence of behaviors that indicate an individual is not receiving effective communication access such as increased agitation or irritability, low frustration levels, withdrawal, or decreased attention.

Members should be cognizant of the fact that some persons who are deaf or hard of hearing may also suffer from inner ear impairments that can affect their balance, or speech may be slurred or otherwise difficult to understand.

Lip Reading

Members attempting to communicate with a person who can lip read should:

- Select a location that minimizes interference and distractions;
- Face the person so that eyes and mouth are clearly visible;
- Stand about three to six feet from the person;
- Avoid excessive body movement;
- Speak only after getting the person's full attention;
- Make questions and instructions short and simple;
- Speak clearly and slightly slower than usual;

- Be prepared to repeat oneself using different words to rephrase any question; and

- Recognize that lip reading is ineffective for most individuals, so be sure to inquire with the individual who is deaf or hard of hearing to determine whether they may need more effective auxiliary aids or services.

Members should address all questions and directives to persons who lip read by facing them directly and speaking in a moderately paced conversational tone.

- Shouting or using exaggerated mouth movements interferes with the ability to lip read.
- Understanding can be further degraded by the presence of facial hair or items in the mouth such as chewing gum, etc.

Sign Language

Generally, members should not rely on family members or friends for sign language interpretation due to their potential emotional involvement, conflict of interest, and legal requirements.

A family member or friend may only be asked to interpret for a deaf individual where there is an urgent need to communicate immediately and that is the only option.

In nonemergency situations, an adult family member or friend may interpret if the deaf person requests that arrangement, the other person agrees, and it is appropriate under the circumstances.

Interpreter Requirements

M.G.L. c. 221, § 92A requires a police department to procure and pay for the services of a qualified interpreter for a deaf or hard of hearing person whenever such person is arrested. The Department will make available access to speech language interpreters as coordinated by the Massachusetts Commission for the Deaf and Hard of Hearing.

Members should be certain that when any deaf or hard of hearing person executes a waiver, such person does so knowingly, intelligently, and voluntarily. In fact, in the case of a waiver of an interpreter, the court must make a special finding that any statement made by such deaf or hard of hearing person was made knowingly, voluntarily, and intelligently.

In simple enforcement situations, such as traffic stops, driver's license checks, or consensual police-public encounters, a notepad and pencil may provide effective communication for any individuals who are deaf or hard of hearing. Members should document the steps they took to provide effective communication with the deaf or hard of hearing individual.

During questioning or interrogation of a suspect in a criminal case, a qualified legal sign language interpreter, including a Certified Deaf Interpreter is almost always required.

Field Resources

Examples of methods in the field that may be sufficient for transactions, such as checking a license or giving directions to a location, or for urgent situations such as responding to a violent crime in progress, may include simple actions such as:

- Hand gestures or visual aids;
- Exchange of written notes or communications;
- Verbal communication with an individual who can lip read by facing the individual and speaking slowly and clearly; and/or
- Use of computer, word processing, personal handheld communication device or similar device to exchange texts or messages.

Arrests

Deaf and hard of hearing people may be subject to arrest like any person without a disability in situations where an officer has the right to make an arrest. Except in cases where arrest is mandated by law, given the complexities associated with the arrest, booking, and housing of a deaf or hard of hearing person, members should consider exercising discretion and utilizing alternatives to arrest that may include, but not be limited to, an application for a criminal complaint instead of making an arrest. This decision will depend on the facts and circumstances of the particular case.

A qualified interpreter need not be available in order for an officer to arrest a subject where probable cause is established independent of interrogating the deaf or hard of hearing suspect.

If probable cause to make an arrest can only be established through questioning or interrogating a deaf or hard of hearing person, a qualified interpreter will be required except in emergency situations.

Some deaf and hard of hearing persons have limited written language skills, particularly involving complex matters such as legal warnings and admonitions. Therefore, members should not assume the effectiveness of this form of communication and should gain confirmation of a person's understanding whenever possible.

All essential communication with the suspect should be completed prior to the application of handcuffs, if possible.

Booking

When booking a deaf or hard of hearing person, members may communicate with the person being booked in order to obtain minimally necessary information required to complete the booking process through the following means:

- Written communications;
- Verbal communications (if possible);
- A companion of the suspect acting as an interpreter, if requested by the suspect;
- A non-certified interpreter; or
- A certified interpreter.

As noted in the “Arrests” section above, some deaf and hard of hearing persons have limited written language skills, particularly involving complex matters such as legal warnings and admonitions.

Rights: A member should advise a deaf or hard of hearing person of his or her rights pursuant to *Miranda* and all other required rights through a qualified interpreter to appropriately ensure that a waiver of those rights is deemed valid by a court.

Subject	Number
Deaf or Hard of Hearing Individuals	**ADM-49**

Booking, continued

Any statements made by a deaf or hard of hearing person, which are elicited without the use of a qualified interpreter, may be challenged in court.

Field Sobriety Testing

Some deaf or hard of hearing persons have reduced verbal communication skills, and/or speech that may be incoherent or otherwise resemble intoxication. These individuals may also have difficulty with equilibrium, which would impact their ability to perform a balance test.

Members administering standardized field sobriety tests should avoid any evidentiary questions during the testing process, as such questions may require an interpreter. Further, if applicable, members must document in their reports these and any other extenuating circumstances that impacted the administration of field sobriety tests.

Interpreter Contact Information

In situations involving the need for an interpreter, a request shall be made through the Massachusetts Commission for the Deaf and Hard of Hearing. The contact information is listed below:

MCDHH – Executive Office
600 Washington Street, 3rd Floor
Phone: (617) 740-1600
Fax: (617) 740-1810
TTY: (617) 740-1700
Videophone: (617) 326-7546
Emergency / After Hours: (800) 249-9949

Online Requests may be submitted at
https://www.mass.gov/how-to/how-to-request-an-asl-interpreter-or-cart-provider

John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-01**
Subject:	
Warrant Management	

Policy

Department members shall utilize established warrant management systems in accordance with federal and state laws and regulations and the contents of this policy.

Definitions

Commonwealth's Criminal History Systems Board (CHSB): The state agency responsible for maintaining law enforcement data communications network and systems.

Criminal Justice Information System (CJIS): A computerized system of criminal justice information, available twenty-four (24) hours a day and managed by the CHSB.

Criminal Offender Record Information (CORI): A database of criminal record information where the release is regulated by state and federal laws.

Interstate Identification Index (III): Triple III is an interstate exchange of criminal history record information maintained by the FBI.

Locate: A computer entry that indicates that the wanted person or item has been apprehended or found.

National Crime Information Center (NCIC): Nationwide computerized system of criminal justice information managed by the FBI.

Wanting Police Department (WPD): Primary police agency or Department Station entering a NCIC warrant.

Warrant Management System (WMS): Centralized database operated by the Trial Court of the Commonwealth that provides CJIS users with access to court issued arrest warrants.

CJIS Information

CJIS information shall only be used by law enforcement and criminal justice personnel in the performance of their duties.

Inquiries of a curiosity nature or other types of transactions performed for non-official purposes are strictly prohibited.

Members in the lawful performance of their duties may rely in good faith upon the information received from CJIS and the WMS, and are not liable in any criminal prosecution or civil action for actions based upon said information.

Much of the information in the CJIS computer is codified as CORI, and its dissemination is strictly regulated by law. Employees shall not release information in violation of the CORI laws.

CJIS Representative

Commanding Officers of each Station/Section/Unit containing a CJIS terminal shall:

- Assign a member as the CJIS Representative; and
- Assign a member as the Backup CJIS Representative.

The CJIS Representative shall:

- Act as the liaison to CHSB regarding CJIS training, validation of warrant information, and password oversight;
- Assist other members in the use of the CJIS System;
- Direct members to the CJIS extranet for additional assistance; and
- Ensure all members are informed of updates, publications, or modifications to the CJIS network.

Warrant Databases

CJIS warrant information may be found in:

- WMS which contains most of the state warrants entered after 1995;
- CJIS/NCIC which contains information on federal, state, and nationwide warrants entered prior to 1995, including in-state parole warrants; and
- The Board of Probation (BOP) record query of an individual that may indicate a default from a court appearance.

A warrant on the WMS shall constitute notice and the printout of the warrant represents a true copy.

CJIS Inquiries

The Desk Officer or Dispatcher shall be aware that a WMS inquiry which yields a hit shall be considered probable cause to arrest when the warrant does not indicate recall or locate.

The Desk Officer or Dispatcher shall:
- Verify the warrant hit in CJIS/WMS; and
- Contact the court of issue if the warrant cannot be located.

The Desk Officer or Dispatcher, when notified that a person has been arrested on a WMS warrant, shall:
- Place a locate against all CJIS wanted records to indicate that the wanted person has been apprehended; and
- Print a copy of the warrant.

The arresting member shall:
- Give a true copy of the warrant to a detainee who requests a copy within six (6) hours.

If the detainee is subsequently released on bail, the arresting member or designee shall:
- Remove any WMS warrants from the WMS system for which the detainee had been taken into custody; and
- Place a copy of the Recall Notice with the detainee's personal property prior to the detainee's release.

Court Information for WMS

Members making a request for a WMS warrant shall provide a completed warrant application to the court of jurisdiction.

The clerk from the court of jurisdiction is responsible for the entering, recall, and removal of WMS warrants from the system.

NCIC Warrants

WMS warrants do not automatically enter into NCIC. The Department shall enter NCIC warrants in order to provide out of state access or rendition even when the warrant is located within WMS.

Any felony or serious misdemeanor warrant may be entered:
- When the District Attorney has authorized rendition; and/or
- For officer safety, licensing, or employment, providing the opening notation in the remarks field is no extradition/rendition (NOEX).

All warrants entered into NCIC shall be in conformance with CJIS/NCIC and Department policy.

NCIC Warrants, continued

NCIC/NOEX warrants entered and maintained by Department entities shall be checked by designated personnel:

- Weekly for recall notices from the courts; and
- Quarterly during the months of January, April, July and October for accuracy and compliance.

NCIC/NOEX warrant file folders shall be kept and maintained by Troop Headquarters or the station of entry as the WPD, and shall contain:

- A copy of the WMS warrant;
- Driver's license information;
- Missing and wanted checks;
- A copy of BOP and Triple III records; and
- Any other pertinent information.

CJIS or NCIC Warrant Confirmation

A CJIS (non WMS) or NCIC warrant that yields a hit shall not be probable cause to arrest. However, once the warrant is confirmed as active with the entering agency there may be probable cause to arrest.

When the Department receives a hit from CJIS and/or NCIC, an immediate confirmation with the agency that originated the record in the system shall be made before an arrest or seizure is made.

The Desk Officer/Dispatcher shall:

- Contact the agency that originated the record in the system by telephone to confirm the warrant; and
- Confirm the warrant following CJIS procedures.

When a request for confirmation is made for CJIS/NCIC warrants held by the Department, the Desk Officer/Dispatcher shall:

- Locate the original warrant and confirm the information following CJIS procedures ensuring the response back to the requesting agency is performed within:
  - Ten (10) minutes for an urgent request; or
  - One (1) hour for a routine request; or
- Cancel the warrant.

CJIS Responsibilities

Members who use the CJIS network are responsible for:

- Familiarizing themselves with the CJIS and NCIC operating manuals; and
- Maintaining bi-annual CJIS certification.

The name and Department identification (ID) number of the person requesting a BOP or Triple III shall be indicated in the "Requested by" or "Attention" fields.

Subject: Warrant Management	Number: DET-01

Justification for BOP / Triple III Checks

Members shall only conduct BOP checks for:

- A history of violence and weapons charges to be disseminated immediately for officer safety;
- An investigation;
- Subjects under arrest; and/or
- Background checks for a legitimate law enforcement purpose.

Members shall only conduct Triple III checks for:

- Legitimate law enforcement purpose;
- Background check for a person applying for employment; and/or
- Background check of a person applying for a Firearms Identification card, or a License to Carry Firearms Permit.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-01A**
Subject:	
Warrants, Summons, or Subpoenas	

Policy

In furtherance of a legitimate law enforcement purpose, members shall serve warrants, summons, or subpoenas once they become aware of their existence, or as otherwise ordered.

Definitions

Default Warrant: After being given proper notice, a person fails to appear in Court.

Governor's Warrant: When a person arrested outside of Massachusetts has an active warrant in Massachusetts, the District Attorney's Office/Attorney General's Office requests they be returned to Massachusetts through a Governor's Warrant.

Straight Warrant: When an officer, instead of requesting a summons, requests a person be arrested for a crime. Also, if a person fails to report to their Probation Officer, the Probation Officer may ask the Judge for a Straight Warrant.

Default Warrants and Bail

Type of Default Warrant	Bail
Felony or misdemeanor punishable by imprisonment for more than one-hundred (100) days.	Only by a judge of the court that issued the warrant or the court of jurisdiction holding the warrant.
Misdemeanors punishable by imprisonment for one-hundred (100) days or less.	By any person authorized to admit bail.

A detainee arrested on a default warrant, who is not released on bail, shall be:

- Transported to the court of jurisdiction where the arrest was made; or
- Transported to the court that issued the warrant.

Straight Warrants

An individual arrested on a straight warrant shall be transported to the barracks of jurisdiction for booking and processing.

Governor's Warrants

Whenever the Department receives notification that a person wanted by the Department has been arrested in another state as a fugitive from justice:

Step	Action
1	The Desk Officer receiving such information shall contact the Troop Duty Officer who shall contact the Detective Unit of jurisdiction.
2	If the District Attorney authorizes the rendition of the detainee named in the warrant, the Commanding Officer of the Detective Unit of jurisdiction shall: • Notify the arresting out-of-state agency of the decision by telephone and CJIS Fox Messenger as soon as possible.

Whenever the Department receives a Governor's Warrant from another state, it shall be forwarded to the Commander of the Detective Unit of jurisdiction.

The Detective Unit Commander shall:

- Execute the warrant by proper means; and
- Ensure all legal requirements are adhered to.

Service of Summons/ Subpoena

The service of a summons or subpoena shall be logged by the Desk Officer in the Daily Administrative Journal and shall include:

- BOP check for member's safety;
- Date and time service was executed or attempted;
- Name of member executing or attempting service;
- Name and address of person on whom legal process was served or executed;
- Method of service or reason for non-service; and
- Address of service/attempt.

Whenever possible, the summons/subpoena shall be served by giving a copy, in hand, to the party named.

If the party is not home when the service is attempted, the summons/ subpoena:

- May be left with another responsible person residing at the residence; or
- May be left at the last place of abode of the person named.

If the person lives outside the area where service can be made, and there is sufficient time, the summons/subpoena may be mailed to the last known address.

If the summons/subpoena is for a juvenile, service may be made in hand to the parent or guardian of the juvenile.

Subject:	Number:
Warrants, Summons, or Subpoenas	**DET-01A**

Service of Summons/ Subpoena, continued.

If the service of the summons/subpoena is not possible, it shall be returned to the court of issuance, with a reasonable explanation for non-service.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-02**
Subject:	
Custodial Inventory	

Policy

Any person (detainee) who comes into the custody of the Department shall be searched.

Purpose

- To protect members and detainees from harmful items or substances that may have been concealed by the subject;
- To protect members from claims of lost, stolen, or damaged property; and
- To establish and define the processing of detainees who come under the care and custody of the Department.

Inventory Protocol

Members are authorized to:

- Search a detainee and remove any property from their clothing or person;
- Search the contents of any outer garments, bags or accessories; and
- Read or examine documents, papers or other records only to the extent necessary for custodial purposes, to include ascertaining or confirming a detainee's identity, and/or ensuring a detainee's physical well-being.

Members SHALL <u>NOT</u>:

- Physically search a detainee for the sole purpose of determining the detainee's gender; and/or
- Use custodial inventory searches as a pretext for an investigative search.

Members SHALL:

- Conduct searches of transgender or intersex detainees in a respectful and appropriate manner and in the least intrusive manner possible, consistent with security needs.

Inventory Protocol, continued

Members searching a detainee shall:

- Inventory any documents, currency, jewelry, or valuable items found, carried or concealed by the subject;
- Record inventory on the SP 2 Custodial Property Inventory;
- If possible, inventory items in the presence of the detainee;
- Have the booking member and the detainee sign the SP 2 Custodial Property Inventory. If the detainee refuses to sign, note the refusal and the reason, if any; and
- Properly secure the detainee's property in a locked container. Any items that cannot fit into the locked containers normally used for detainee property shall be properly secured within the Temporary Evidence/Contraband/Property (ECP) locker. If a key is used to lock the property container, the key will be secured properly to prevent unauthorized access.

Member conducting the booking shall, before placing the detainee in a cell:

- Have the detainee remove
  - Loose or extraneous clothing ;
  - Shoes, belts, ties;
  - Jewelry, necklaces, neck chains; and
  - Any other article that the detainee may use to escape or cause harm to themselves or others.
- Scan the detainee with a hand-held metal detector.

The following items may be retained by a subject in the cell, unless a member believes it would create a hazard:

- Wedding ring;
- Currency;
- Eye glasses, hearing aids; and
- Prosthesis – which should be searched if practicable.

Valuable Property, Currency and Jewelry

The member searching a detainee that has valuable property, currency or jewelry shall:

- Record the items on the SP 2 Custodial Property Inventory;
- Document contraband and/or any confiscated property in the related Incident Report;
- Count currency by denomination and verify amount with a witnessing member present;
- Package and seal valuable property, currency or jewelry in a Department evidence bag (evidence bags shall be labelled: 1 of 1, 1 of 2, 2 of 2, accordingly), and initial the seal;
- Secure valuable property, currency or jewelry within a secure/locked container within the appropriate detainee belongings area while the detainee remains in Department custody; and

Valuable Property, Currency and Jewelry, continued

- Provide the Desk Officer with a copy of the investigative report and SP-2 Custodial Property Inventory. The Desk Officer will insure that detainee's valuable property, currency or jewelry was inventoried and secured, and record the member who inventoried and secured these items.

If a detainee leaves the Department's custody, or is transported or transferred to another facility, and the detainee's valuable property, currency or jewelry is not returned, the Desk Officer shall immediately:

- Secure the valuable property, currency or jewelry within the Temporary ECP Locker;
- Log the valuable property, currency or jewelry within the Temporary ECP Journal;
- Make a log note into the DAJ of the time the valuable property, currency or jewelry was placed into the Temporary ECP Locker;
- Notify the Troop Duty Officer; and
- Provide a copy of the investigative report to the ECP Custodian or Assistant ECP Custodian to be placed with the valuable property, currency or jewelry until the owner returns to collect property.

The Arresting Member shall:

- Make every effort to return the valuable property, currency or jewelry to the owner, or to a designated person identified by the owner, when the owner fails or cannot return to the Department to collect such property.

Return of Property

When the detainee is released from custody, their property (except seized property) shall be returned to them and:

- The detainee shall sign the SP 2 Custodial Property Inventory acknowledging the return; and
- If the detainee refuses to sign the form, the refusal and the reason, if any, shall be recorded.

If the detainee is to be transported or transferred to another facility, the transporting/transferring member shall ensure that:

- A copy of the SP 2 Custodial Property Inventory has been provided to the facility and/or the personnel taking custody of the detainee;
- The name of the person taking custody is recorded on the original SP 2 Custodial Property Inventory;
- The person taking custody has signed the SP 2 Custodial Property Inventory; and

Return of Property, continued

- The original SP 2 Custodial Property Inventory is returned to the Department facility where the detainee's inventory search was conducted.

Valuable property, currency or jewelry stored with the ECP Custodian or Assistant ECP shall:

- Be returned to the owner on a mutually agreed upon time and date.

Container Protocols

Any closed unlocked container shall be opened and each article inventoried individually.

If a container is locked and secured, or if a container cannot be opened without damaging it, the member shall ask the detainee for consent to open it.

If consent is not given, the member shall not open the container unless:

- Probable cause exists to believe that the locked container shall put the member or others in immediate risk of injury or loss of life.

If the container is not opened, it shall be inventoried as a single unit.

A member shall apply for a search warrant to open a locked container if they have probable cause to believe the container has inside it:

- Fruits or instrumentalities of a crime; and/or
- Evidence, contraband or weapons.

Strip Search Protocols

A strip search entails:

- Any search of a detainee requiring them to remove or rearrange some or all of their clothing to permit the visual inspection of skin surfaces, specifically the buttocks, genital/groin area, and/or breasts; so that a visual inspection can be made of all areas of the detainee's body where weapons, dangerous instrumentalities, evidence, or contraband may be concealed.

The need for a strip search is based upon:

- The particular circumstances surrounding the arrest, as well as probable cause to believe the detainee possesses contraband or weapons that may jeopardize the health and/or safety of the detainee and/or those who may come into contact with the detainee.

Strip Search Protocols, continued

The search shall be documented in the arrest report and include the following information:

- Individual searched;
- Justification for performing the search;
- Supervisor providing approval or exigency warranting search;
- Member directing and conducting strip search;
- Other individuals present during search, both members and civilians;
- Location of search, including steps taken to protect privacy; and
- Items of contraband, if found.

Strip searches shall only be conducted:

- With the approval of a supervisor, unless exigent circumstances exist;
- Whenever practicable, by two (2) members of the same gender identification as the detainee. If the detainee is an Intersex Individual or Gender Non-Conforming Male or Gender Non-Conforming Female, refer to DET-08 Gender Identity and Expression;
- In an area that affords complete privacy (strip searches shall not be conducted outside of a Department facility unless exigent circumstances exist);
- Out of the public view (including video cameras, windows, etc.);
- Without any touching of the detainee (although the detainee may be asked to bend at the waist and spread their buttocks);
- In a reasonable, non-abusive, and professional manner; and
- Only for the duration necessary to complete the search.

Various other factors may be considered while conducting the search, including, but not limited to, the age (e.g. status as a juvenile) and mental capacity of the detainee.

Members assigned Body Worn Cameras (BWC) conducting or present during a strip search shall follow the mandates of ADM-35 Body-Worn and Cruiser-Mounted Cameras and deactivate the BWC.

Body Cavity Search Protocols

Members shall not conduct visual searches or physical intrusions into body cavities.

A body cavity search is:

- A search conducted pursuant to a warrant, issued by a judge, that is based on a strong showing of particularized need supported by a high degree of probable cause; that
- Authorizes a medical professional to conduct an internal manual inspection of any human body cavity.

Body Cavity Search Protocols, continued

A member or supervisor seeking such a warrant must:

- Show a **high degree of probable cause** that the detainee has contraband or weapons hidden in a body cavity that may jeopardize the health and safety of the detainee and/or anyone with whom the detainee may come in contact.

Body cavity searches shall only be performed:

- By a medical practitioner in appropriate medical surroundings; and
- Pursuant to a search warrant issued by a judge that authorizes a body cavity search.

Other factors to consider include the age (e.g. status as a juvenile) and mental capacity of the detainee.

Members assigned Body Worn Cameras (BWC) present during a body cavity search shall deactivate the BWC.

The warrant requirement shall apply:

- Where an item may be viewed partially protruding from a body cavity.

No warrant is required when:

- A detainee voluntarily and personally extracts any item from their own body cavity; and
- Cases involving exigent circumstances where medical personnel perform an operation, necessitated solely by good medical practice for medical reasons, which incidentally results in the recovery of evidence for police use.

The body cavity search shall be detailed and documented in the arrest report in addition to any other court reporting requirements.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-03**
Subject:	
Detainee Transportation	

Policy

Safety is the paramount concern when transporting detainees. Members shall always keep in mind:

- The safety and well-being of themselves and others;
- The proper restraint of the detainee to prevent escape or injuries;
- The detainee's safety and rights; and
- Members transporting detainee(s) that pose a security risk or identify/exhibit a medical risk shall notify the desk officer prior to arrival at the barracks.

The transfer of custody from point of arrest to the facility receiving the detainee (eg: barracks, court, other facility…) shall be documented in the DAJ.

Detainee Search Protocols

Cruisers shall be searched before and after transporting detainees for contraband, weapons, fruits or instrumentalities of a crime, and/or evidence. A search is also part of the routine cruiser inspection at the beginning of the shift.

All detainees shall be searched for weapons and contraband prior to being placed in a cruiser or whenever transported. For searches involving an Intersex Individual or Gender Non-Conforming Individual, refer to DET-08 Gender Identity and Expression. Never assume that someone else has searched a detainee.

Under exigent circumstances, it may be necessary for a member to search a detainee of the opposite gender. Such a search shall be conducted professionally and be limited to the minimal invasion of privacy necessary. In other situations it may be more prudent to request assistance by an officer of the same gender as the detainee, or conduct the search in the presence of others.

Cruisers

Cruisers which are routinely used to transport detainees shall have:

- Safety barriers (detainee cages);
- The rear passenger compartment windows and locks disabled;
- Rear passenger seat belts; and
- Rear passenger door locks that cannot be unlocked from the rear passenger compartment.

When transporting a detainee, members should not respond to calls for service unless:

Cruisers, continued

- The situation clearly poses a serious risk to others; and
- The risk to the detainee is minimal.

Interruption of transporting a detainee shall be limited to circumstances that require the immediate intervention of a member, e.g. personal injury crash. Any interruption of the transport of a detainee shall be reported to and recorded by the Desk Officer of jurisdiction including the specific location and cause for the interruption of transport.

In the event a detainee is transported a longer distance, such as an extradition, only those stops required for fuel, food or personal necessity shall be made. The detainee shall be under the direct supervision of at least one member during such stops.

Detainee Restraint Protocols

Unless extenuating circumstances dictate otherwise, members transporting detainees:

- Will ensure detainees are handcuffed with their hands behind their back;
- Will use alternate methods when physically unable to handcuff someone behind their back; and
- Double lock handcuffs to prevent inadvertent tightening or to avoid causing or aggravating any injuries.

If detainees are to be transported for an extended period, members may handcuff them in front. Members may also use a waist chain to secure the hands to the waist if the member has been trained by the Department on use of a waist chain.

Detainees should not be handcuffed or restrained to any part of the vehicle (except for use of the seat belt).

Alternate detainee restraint devices shall be used only when authorized by the Department and the member applying said restraint device has received training from the Department.

Seating Positions

Members shall:

- Ensure that detainees being transported are visually observable at all times;
- Secure detainees with a seat belt;
- Not transport more than two (2) detainees at a time, unless authorized by a supervisor;
- Not transport two (2) detainees in a cruiser without a safety barrier, unless another member is present;
- Whenever practical, transport detainees of the opposite gender in separate vehicles; and
- Ensure detainees of opposite gender are not transported to court in the same vehicle pursuant to Massachusetts General Laws (MGL) c.276, § 53.

Seating Positions, continued

IF the cruiser has...	Then, unless circumstances dictate otherwise, detainee(s) should be placed...
A safety barrier.	In the rear compartment, using the right seat first.
One (1) officer, one (1) detainee, no safety barrier.	In the right front seat.

IF the cruiser has...	Then, unless circumstances dictate otherwise, detainee(s) should be placed...
Two (2) members, one (1) detainee, no safety barrier.	In the right front seat with the other member behind them.
Two (2) members, two (2) detainees, no safety barrier.	One in the right front, one in the right rear seats, with the other member seated behind the driver.

Transportation of Juveniles

Juveniles shall not be transported:

- With adult detainees; or
- To court or other institutions in a "patrol wagon" as stipulated in MGL c.119, § 34.

Transporting Opposite Gender Detainees

Members transporting detainees of the opposite gender shall radio their Station/Unit Desk Officer, and have a Daily Administrative Journal (DAJ) entry made of the:

- Location;
- The number and gender of their detainee(s);
- Preliminary charges against the detainee(s);
- Intended destination;
- Beginning odometer mileage, and upon arrival, the ending mileage; and
- If necessary, request for back-up.

When transporting an individual of the opposite gender, refer to DET-08 Gender Identity and Expression.

Communication

Conversations with detainees shall be professional and kept to a minimum.

- Conversations between detainees shall be limited by the transporting officer for safety reasons.

Members will not allow detainees to use communications equipment while in transport, nor stop to allow a detainee access to communication equipment.

Protocols for Transferring Prisoners

When transporting a detainee to or from another agency or a court detention facility, members shall:

- Secure firearms if required by that facility's protocol;

Protocols for Transferring Prisoners, continued

- Remove restraining devices in the designated area at the direction of the receiving agency, when and if deemed safe to do so, by the transporting member;
- Positively identify the detainee by ID, photographs or fingerprints;
- Deliver or receive the necessary documentation, paperwork, and/or information, including any arrest reports or other written reports documenting why the detainee was taken into custody, copies of any warrants, and any documents used for identification or related to any medical condition, flight risk, suicide risk, safety risks or any other condition that the receiving agency or court should be aware of concerning the detainee;
- Document the transfer of custody in the DAJ; and
- Adhere to procedures within DET-02 Custodial Inventory regarding detainee's property.

If the detainee is a security hazard, suicide risk, or has a condition that the receiving agency or court should be aware of, the receiving agency shall be advised in writing of that condition. This written notification will be included with other necessary documentation that accompanies the detainee. A copy of this written notification will also be placed and retained with the written incident report.

Medical Considerations

While in transit, if a detainee notifies the transporting member of an illness or injury, and if in the member's opinion an illness or injury exists and requires immediate attention, the member shall transport the detainee to the nearest medical facility for an examination.

- The transporting member shall notify the Desk Officer;
- The Desk Officer shall notify the medical facility of the particulars prior to the detainee's arrival; and
- The transporting member will exercise caution and closely monitor the detainee at all times if it is necessary to remove the detainee's restraints during treatment at the medical facility. Upon arrival, the member shall adhere to the procedure outlined in DET-06 Detainee Monitoring.

If a detainee is admitted to a medical facility, the Department shall provide, or ensure proper security arrangements, or arrange for the detainee to be bailed.

If released by the medical facility, the detainee shall be transported to the nearest barracks or facility, as appropriate. When released, the detainee's condition shall be recorded in the DAJ. All instructions for future treatment and medication should be obtained in writing, signed by the attending physician and placed with the detainee's property.

Medical Considerations, continued

If, in the member's opinion, the detainee's reported or observable illness or injury does not require immediate attention while in transit, then upon arrival at the booking location, the member will adhere to the procedures outlined in DET-06 Detainee Monitoring.

When transporting a physically or mentally challenged detainee, special care and attention may be required. The transporting member should use discretion as to the type of restraints or type of vehicle to be used, and the Troop Duty Officer shall be notified.

Special Situations

No detainee or individual in custody shall be allowed to participate in any operation and/or function without the specific written approval of the Division Commander.

Section/Units that conduct such operations or functions on a regular basis may request blanket authorization from their Division Commander. If such authorization is granted:

- Sufficient security shall be deployed to maintain control of the detainee or individual;
- The intended destination shall be inspected in advance by a member;
- Control of the perimeter shall be maintained;
- There shall be minimal contact between the detainee and others; and
- Any other measures deemed necessary by the officer-in-charge (OIC) shall be taken.

Detainee Escape Protocols

Position	Duties
Transporting Member	• Immediately notify the appropriate Desk Officer of: o Cruiser number, member's name, rank; o Exact location; o Detainee method of escape, escape route, and means of transportation; o Name and aliases of escapee, and a physical description including clothing; and o Criminal history and safety risk of the escapee, and the pending charges; and • Immediately make every attempt to recapture the escapee, and if unable to do so, preserve the scene for tracking dogs and investigators; and • Include the details of the escape and recapture efforts in an incident report.
Desk Officer	• Immediately notify the Troop Duty Officer of jurisdiction; • Notify all patrols and local departments of the escape; and • Make the appropriate DAJ entries.

Detainee Escape Protocols, continued

Position	Duties
Troop Duty Officer	• Immediately request K-9, Air Wing and other tactical resources as deemed necessary; • Dispatch a supervisor to the scene to: o Assume control of the recapture operation; o Investigate the circumstances of the escape; and o Prepare a report with findings and recommendations; and • Notify: o State Police Detective Unit of jurisdiction; and o The Troop Commander.
Troop Commander	• Notify Division Commander; • Administratively review report(s) for further action; and • Take actions to prevent reoccurrences.

Commercial Air Transportation and Armed Members

Members shall be certified and follow the federal Transportation Security Administration (TSA) guidelines and Code of Federal Regulations (CFR) Title 49 Carriage of Weapons by Law Enforcement Officers.

Troop/Section Commanders shall ensure the following protocols are followed when members, under their command, fly on commercial airlines while armed.

- An administrative message shall be sent to the Transportation Security Administration (TSA) by the GHQ Communications Section via the National Law Enforcement Telecommunications System (NLETS), requesting a unique alphanumeric identifier receipt for the member who will be flying armed;
- The member shall carry the receipt containing all the pertinent information required by TSA to be verified at the airport on the day(s) of travel; and
- The member shall also carry the appropriate number of signed original Letters of Authority from their Troop/Section Commander and surrender a letter to the airline carrier(s) when requested.

Commercial Air Transportation and Armed Members, continued

- The Letters of Authority shall be on Department letterhead and shall include:
  - The name(s) of the member(s);
  - The dates and itinerary for fights;
  - Certification that the member(s) have completed the TSA's Law Enforcement Officers Flying Armed Program;
  - The circumstances for the need to carry a firearm; and
  - The original signature of their Troop/Section Commander and a contact number for verification.

Note: Failure to provide the unique alphanumeric identifier may result in delays due to the additional verification requirements. The airline and the pilot have the discretion to refuse armed members on any flight.

Procedure Transporting Prisoners by Commercial Airlines

When transporting a detainee on an commercial airline flight, members shall:

- Notify TSA and the airline of the name(s) of the detainee(s) and the accompanying member(s) at least one (1) hour before the flight;
- Notify TSA and the airline if the detainee is considered a "high risk" at least twenty-four (24) hours, or as soon as possible, before the scheduled departure. If so, at least two (2) members shall escort the detainee and arrive at the check-in counter at least one (1) hour before the flight. Only one dangerous detainee is allowed on the same flight;
- Ask to board the plane first, and deplane last;
- Sit in the rear of the plane, maintaining one (1) member between the detainee and the aisle;
- Ensure that no food, utensils, or items be given directly to the detainee without checking the items first; and
- Not consume, nor allow the detainee to consume, alcoholic beverages.
- **Note:** There shall always be at least one (1) member per detainee. At least one (1) member shall be the same gender identification as the detainee. If the detainee is an Intersex Individual or Gender Non-Conforming Male or Gender Non-Conforming Female, refer to DET-08 Gender Identity and Expression.

Members shall carry:

- Department issued badge and identification card;
- A secondary valid government issued ID;
- Necessary boarding paperwork;
- Letters of Authority to travel while armed on commercial flight; and
- Adequate restraining devices.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-04**
Subject:	
Holding Facility Design and Inspection	

Policy

The Department shall maintain holding facilities that comply with applicable laws and regulations, in order to provide a safe environment for members and detainees.

Definitions

Detainee: A person who has been arrested or is in the custody of the Department.

Holding Facility: A temporary confinement cell or lockup where detainees are generally held for less than seventy-two (72) hours.

Design of Holding Facilities

Department holding facilities shall comply with Department of Public Health regulations and shall, at a minimum, be equipped with:

- Adequate lighting and air circulation;
- Access to a toilet and drinking water;
- Access to a wash basin and a bed with sanitary/fire-retardant bedding for each detainee held in excess of eight (8) hours;
- A first-aid kit, automatic fire alarms, smoke detectors, and adequate fire suppression systems;
- Audio and electronic (Watchman) monitoring system; and
- Posted signage regarding detainees' rights; obtaining medical services; and emergency evacuation.

Department holding facilities shall comply with the *Prison Rape Elimination Act (PREA) of 2003* and shall have signage posted advising detainees how to report incidents of sexual abuse and/or harassment.

Sanitation

Holding facilities shall be kept clean and sanitary, and shall be inspected:

- Before use by a detainee;
- Upon release of a detainee, and/or
- As necessary to prevent the spread of communicable diseases, as outlined in GEN-05 *Communicable Diseases*.

Cells and Keys

Cells that are:

- Ready for use shall be kept open and unlocked; or
- Not ready for use shall be kept closed, locked, and their not ready for use status posted.

Keys for the cells, and duplicates, shall be kept readily available at the barracks desk area.

Fire Prevention

- No matches, lighters, or smoking materials are allowed in any Department holding facility;
- Fire/smoke detection and suppression systems shall have written approval of fire officials;
- In the event of fire the local Fire Department of jurisdiction shall be notified and initial suppression efforts may be undertaken by member(s);
- An emergency evacuation plan shall be written and posted;
- At least one (1), preferably two (2), emergency exits shall be marked with a sign; and
- Any detainee that is evacuated will be handcuffed and secured in a cruiser. If necessary, the detainee will be transported to another barracks or authorized holding facility.

Electronic Monitoring

In addition to audio monitoring devices required by law, each holding facility shall have:

- A means of communication with the Station Desk Officer, or a panic alarm; and
- A video monitoring system so that each cell can be observed from the barracks desk officer area.

Guidebook

Troop Commanders shall ensure that a guidebook is kept at the desk or in the holding area of each facility, to assist the Station Desk Officer.

The guidebook shall contain information on:

- Holding facility operations;
- Procedures for escapes, fires, or suicide attempts;
- Available alternative lock-up facilities for juvenile offenders;
- The names and contact information for persons or organizations who will respond in the event of an attempted or threatened suicide;
- The names and contact information for persons or organizations who will respond in the event of an incident of sexual assault and/or sexual harassment; and
- List of available community Mental Health Resources including contact information.

Training

Members at a location where there are holding facilities/temporary detention room(s) shall receive training appropriate and consistent with each member's role, assignment and responsibilities in the holding facility/temporary detention room(s) including, but not limited to:

- The use of holding facilities, temporary detention room(s) or area(s), with retraining to occur at least once every three years;
- Suicide detection, intervention, and prevention;
- PREA Standards;
- Department policies regarding holding facilities, temporary detention room(s);
- Equipment related to the processing and detention of detainees and specific barracks detention operations;
- Use of physical restraints; and
- Operation of fire suppression equipment.

Pursuant to MGL c.40, § 36C, upon promotion, members shall receive refresher training in suicide detection, intervention, and prevention.

Access & Security

Facility security shall include securing doors or other means that may provide a potential avenue of escape for a detainee during booking and the temporary detention of a suspect. This includes, but is not limited to, sally port doors, potential avenues of escape from booking rooms, temporary detention rooms or other temporary holding facilities.

Non-essential persons shall not have access to the cell area, unless:

- Visiting a detainee, as outlined in DET-06 Detainee Monitoring**;** or
- No detainees are present, and the person(s) is accompanied at all times by a member.

Maintenance, sanitation, repair, or other outside personnel may have access to cells as necessary. Upon completion of the work, the cell area shall be inspected for tools or other items that may have been left behind.

Inspections

An inspection of each cell for weapons and contraband shall be made immediately prior to use.

Station Commanders are responsible for ensuring:

Frequency	**Item of Inspection**
Daily	• Fire detection and suppression equipment (visual inspection); • Cell bars, doors, locks, windows, ventilation, lights, monitors, and security devices; • First-aid kits, which will be replenished as necessary; • Tampering or damage to facilities; • Search for weapons or contraband; and • Sanitation, including vermin and pest inspection.

Inspections, continued

Frequency	Item of Inspection
Weekly	• Inspect the cell electronic monitoring device (Watchman) to ensure it is properly functioning; • Run a printout of the previous week's cell checks; • Examine the printout for compliance and discrepancies; and • Retain the weekly printouts for one (1) year.
Monthly	• Automatic Fire Alarm system test.
Semi-Annually	• Fire suppression equipment test; and • The review of the guidebook for accuracy.
Annually	• Administrative review of holding facilities and procedures to be completed concurrent with the Department of Public Health inspection.

Inspection records shall be maintained at the barracks for line and staff inspections.

Station Commanders shall ensure cooperation with state and local health and fire inspectors, pursuant to inspection requirements specified in 780 CMR The Massachusetts State Building Code (Appendix A).

To prevent inadvertent use, individual cells that do not pass inspection shall be kept closed, locked, and posted with an explanation of the deficiency.

Incidents

Detainees who cause damage to the cells may be subject to prosecution under MGL c.266, § 96, Defacement or Injury to a State Building.

Station Commanders shall make written reports to their Troop Commander of all incidents or conditions that threaten the holding facility or any person therein including detainees, or the ability of the barracks to safely hold detainees.

Troop Commanders shall immediately notify through channels, the Division Commander of Administrative Services, of all such incidents or conditions. The Division Commander of Administrative Services shall notify the Department of Public Health as required.

Subject: Holding Facility Design and Inspection	Number: DET-04

Temporary Holding Areas

Troop Commanders may authorize such temporary holding areas for the purpose of booking and bailing detainees, which shall provide for:

- Constant supervision of all detainees held in temporary holding areas;
- Immovable objects that are specifically designated for the purpose of booking and bailing detainees;
- Access to water and restrooms;
- Separation of male, female and juvenile detainees who are at high risk of being sexually assaulted;
- Fire prevention, evacuation, and suppression procedures; and
- Adherence to any applicable security procedures as outlined in Policy and Procedure.

Temporary Detention/Processing Room Administrative Review

- Barracks that do not have a holding facility shall ensure that rooms utilized for temporary detention receive regularly scheduled inspections for cleanliness and to determine if any unsafe conditions are developing. Deficiencies shall be addressed upon identification through the Station/Troop Commander; and
- Annually, Troop Commanders shall provide the Division Commander of Field Services an administrative report detailing adherence to Department policies and procedures governing temporary detention areas and whether alternative facilities are available for temporary detention.
  - This report shall be forwarded annually to the Division Commander of Field Services no later than November 30th.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-05**

Subject:

Identification of Persons in Department Custody

Policy

All persons in Department custody must be properly identified prior to release. Fingerprints offer the most reliable means of individual identification. The submission and retention of fingerprint records and other biometrics create a reliable criminal history record. **Therefore, all persons arrested shall be fingerprinted and photographed**. In addition, all persons charged with a felony shall have their palmprints recorded if recording equipment is available. Persons taken into department custody for non-criminal reasons may be fingerprinted and photographed or may be identified through other means.

Definitions

AFIS (Automated Fingerprint Identification System): The computerized biometric matching system that stores identifying biometric templates and related demographics. The State AFIS maintains the following biometric information: known fingerprints and palmprints, latent fingerprints and palmprints, booking and tattoo photos, and iris images. AFIS is operated by the State Identification Section.

AFISR: An application available from the Department of Criminal Justice Information Services via single sign-on (DCJIS SSO). This application allows the review of Massachusetts fingerprint supported arrest records and the search of recent arrest submissions. This system can be searched by OBTN, Name, SID, and FBI number.

Biometrics: Distinctive, measurable physiological characteristics used to identify individuals. Commonly collected biometrics include fingerprints, palmprints, photographs (mug shots), and iris images.

Live Scan: Electronic fingerprint capturing devices that submit fingerprints, palmprints, and associated demographics and photographs to the State AFIS and NGI.

NGI (Next Generation Identification): A biometric matching system operated by the FBI that replaces the IAFIS system creating a national electronic repository of biometric and criminal history information.
www.fbi.gov/services/cjis/fingerprints-and-other-biometrics/ngi

Definitions, continued

OBTN/ SBTN (Occasion/Offense Based Tracking Number): A unique number assigned by the records management system associated with a specific event. This number allows the tracking of the individual event from arrest or summons through the state criminal history systems including AFIS and the courts.

SID (State Identification Number): A unique personal identifier based on a fingerprint ID and assigned by AFIS and the Identification Section.

UCN (Universal Control Number, formerly FBI number): Unique personal identifier based on a fingerprint ID and assigned by the FBI. This number is assigned to both criminal AND civil identities on file with the FBI.

Procedure for Properly Identifying Subjects

All persons arrested shall be fingerprinted and photographed. All persons charged with a felony shall have their palmprints recorded if recording equipment is available. Persons taken into department custody for non-criminal reasons may be fingerprinted and photographed or may be identified through other means.

Fingerprints and palmprints shall be captured and submitted to AFIS using the Live Scan device according to the *SIS-DOC 12-LIVESCAN Operational Guide*, which is located on Docushare.

The detainee's booking photo/mugshot shall be captured in RAMS.

Fingerprinting shall include the recording or annotation of all fingers and may include the recording of palmprints.

The following demographic information shall be included with all fingerprint submissions:

- OBTN/SBTN;
- Name;
- Date of birth;
- Sex;
- Race;
- Place of birth;
- Height;
- Weight;
- Eye color;
- Hair Color;
- Literal description of charges (not the chapter/section only);
- Date printed;
- Fingerprint official; and
- Date of arrest.

Procedure for Properly Identifying Subjects, continued

All Live Scan operators must properly log on and log off the system to prevent unauthorized access to the system. The operator logged on to the system will be documented as the fingerprint official on the official record.

Arrested persons shall not be considered eligible for bail until their fingerprints have been accepted and verified by AFIS. Fingerprint submission search results may be reviewed from the Live Scan or by viewing results in the DCJIS AFISR application. The *SIS-ADM-10 AFISR Procedural Guide* is available on Docushare.

Special Circumstances

In instances where Live Scan is not operational or available, the detainee may be:

- Transported for processing to a barracks where Live Scan equipment is available.

When the Live Scan and/or AFIS is not available and it is impractical to transport to another location, the detainee shall be:

- Processed using the traditional fingerprint card and inkpad method. The fingerprint card shall be sent immediately to the Identification Section via Troop mail for manual entry into AFIS.

- In circumstances where inked fingerprints are taken, a detainee may be considered eligible for bail consideration.

In instances when a subject's identity cannot be documented or when mutilated fingerprints are observed, the booking officer or desk officer may contact the Identification Section for review of the fingerprint record. The booking officer shall provide the SBTN/ OBTN.

Additionally, in situations when mutilated prints are observed, the Troop Duty Officer may contact the Crime Scene Services Section (CSSS) to assist in capturing full major case prints and/or ten-prints to assist in detainee identification.

Supervisors at the sub-station level and Cases and Reports Officer at the Troop level shall ensure:

- All officers are properly trained on the use of electronic fingerprinting/biometric capture equipment;
- All biometric processing equipment is operational;
- Proper supplies are available; and

Special Circumstances, continued

- Biometrics are properly captured and submitted to the Identification Section.

Identification Section
59 Horse Pond Road
Sudbury, MA 01776
24-hour contact 508-358-3170

Troop Commanders shall ensure overall compliance with this General Order.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-06**
Subject:	
Detainee Monitoring	

Policy

The safety and well-being of members and detainees is the Department's paramount concern and shall guide the application of this policy. Continuous supervision is essential for maintaining and ensuring the safety and welfare of both detainees in custody and the members responsible for monitoring them. To ensure the safety of all, necessary precautions shall be taken whenever a person is taken into custody.

Whenever a detainee enters a Massachusetts State Police (MSP) facility, the Desk Officer shall make an entry into the Daily Administrative Journal (DAJ) noting the date and time the detainee entered, the reason for detention, the condition of the detainee, any observed injuries, illness or complaints of pain. The Desk Officer shall log the date and time when a detainee leaves the facility. Only those room(s) and area(s) within the facility designed for detainee processing, testing, and temporary detention should be used for such purposes.

Conduct

Members shall not engage in speech or behavior that could be construed as inappropriate.

Detainee Rights

Detainees held in custody at any MSP facility shall be afforded all Constitutional rights and shall have, at a minimum, the following afforded:

- Timely court appearance;
- Opportunity to make bail;
- Confidential access to attorney(s) in a secure area free from monitoring within the facility;
- Access to a telephone; and
- Notification of the monitoring or recording of telephone conversations.

Detainees held over four (4) hours shall have meals provided at regular meal times, three (3) meals a day.

Detainees held over eight (8) hours shall be given access to a wash basin.

Detainee Rights, continued

Members receiving a call from a detainee's attorney are required to immediately inform the detainee of the attorney's attempt to reach them and to immediately relay the attorney's message to them, including, when applicable, a message advising them not to talk to investigators. An entry into the DAJ shall record the name of the member receiving the call, the name of the calling counsel including their Board of Bar Overseers (BBO) number and the name of the member delivering the message. (*Commonwealth v. McNulty* 458 Mass. 305).

Booking Process

Temporary detention rooms may include booking rooms and other area(s) specifically designated and/or designed for such purpose. Members utilizing said rooms shall have their portable radio on, or other means of direct communication with the Desk Officer available such as a panic/duress alarm.

Care should be taken to ensure that the temporary detention room/booking area is secured and free of items or hazardous materials that may be utilized to aid the escape of a detainee.

Firearms and Electronic Control Weapons (ECWs) **shall not** be carried on a member's person during the booking process, including, but not limited to, booking, fingerprinting, and the administration of the breath test.

Prior to initiating the booking process, the detainee shall be searched for weapons and contraband.

Arresting members are responsible for booking detainees. This shall include, when applicable, completing a booking sheet, conducting an inventory of the detainee's property, conducting any searches, fingerprinting, photographing, and administration of testing and secure detention. Additional members may be utilized to assist in the process and their assistance shall be detailed and logged into the DAJ.

The booking officer shall inform the detainee of his/her rights pursuant to Miranda by reading the Miranda Warning from a printed card or form.

The detainee shall be advised of his/her right to use the telephone and shall be afforded the use of a telephone within one hour of being brought in custody into a Department facility. The detainee may use the telephone to contact family or friends, to arrange for bail, or to contact an attorney. Members shall allow calls of a type, number and duration that are reasonable and practical, including contacting an attorney.

Booking Process, continued

The detainee may be allowed to use a personal cell phone or a Department phone. Toll calls will be made at the detainee's expense. If a detainee is provided a monitored or recorded telephone, they shall be informed of the monitoring (unless exempted by court order). If the detainee's primary language is not English, arrangements to convey this information via translator or language line shall be made.

The booking officer shall fingerprint and photograph all detainees under arrest and follow additional identification guidelines set forth in DET-05 Identification of Persons in Department Custody.

A detainee who actively resists arrest/booking and/or poses a threat to themselves or members should be placed in a cell until such time as the detainee becomes cooperative. A DAJ entry shall be made detailing the cause of delay in the booking process.

The booking officer shall conduct all detainee screening pursuant to the Prison Rape Elimination Act (PREA), suicide risk, medical conditions and advise detainees of all pertinent Constitutional rights.

In accordance with DET-07 Detainee Sexual Abuse and Sexual Harassment, when booking detainees, members shall screen all detainees to assess their risk of being sexually abused by other detainees or sexually abusive toward other detainees. Members shall also advise detainees of the Department's zero tolerance policy toward all forms of sexual abuse and sexual harassment towards any detainee. The screening and the advisement of the Department's zero-tolerance policy shall both be documented in RAMS/Department Records Management System.

An inventory search of the detainee shall be conducted at the time of booking consistent with DET-02 Custodial Inventory.

Detainees shall be handcuffed to the cuffing bar or other immovable object, which is specifically designated for that purpose.

Handcuffs may be removed to facilitate the administration of booking related duties including inventory, fingerprinting, photographing, and the administration of arrest related testing.

When more than one detainee is being booked at the same time, members involved in the booking process may consider use of the holding cell to limit interaction between detainees.

When arrested on a warrant, the detainee shall, upon request, be provided a printed copy of the warrant contained in the warrant management system within six (6) hours of the request.

Detainees under the influence of alcohol or drugs shall be afforded all administrative testing rights including but not limited to applicable rights

Booking Process, continued

pursuant to M.G.L. c. 263, § 5A. Members shall ensure such detainees are properly segregated from other detainees if warranted.

At no time should a member leave a detainee unattended outside the confines of the cell. Whenever a detainee is held in any temporary detention area outside the confines of the cell, the detainee should be under the continual, direct, physical supervision of a sworn member who can immediately intervene. Exception(s) may be warranted for detainee visitation with counsel and/or an interested adult.

Upon the conclusion of the booking procedures, the detainee should be placed in the appropriate cell.

- Prior to the placement of a detainee into a cell, a security check confirming the absence of weapons and/or contraband shall be made by the member placing the detainee into the cell.

The Desk Officer shall be advised of the cell placement, activate the audio/video monitoring and record the information in the DAJ. Cellblock assignment(s) shall adhere to the following:

- Female detainees shall maintain sight and sound separation from male detainees;
- Secure detention of juveniles shall adhere to the mandates of DET-09 Juvenile Detention; and
- Members shall adhere to the mandates of DET-08 Gender Identity and Expression.

Monitoring

The audio and video monitoring systems shall be used to continuously monitor the detainee's condition and shall be used as a means of two-way communication with detainees and other members in the cell block.

The audio and/or video monitoring systems shall not be used to unnecessarily violate the personal privacy of the detainee(s).

The Department shall provide 24-hour monitoring of detainees. The Desk Officer shall conduct a physical face-to-face check of all detainees every thirty (30) minutes, use the electronic monitoring (Watchman) device during the check and be responsible for logging the detainee check into the DAJ. Members making these checks shall have in their possession the keys to the cells in the event an immediate entry is required. Cell keys shall remain in the desk area, under control of the Desk Officer, outside of these checks.

Non-essential personnel are prohibited from all temporary detention areas and/or cellblocks whenever a detainee is present within said area(s).

Under no circumstances, shall non-essential personnel enter the cellblock area or other temporary detention area while detainees are in custody.

Monitoring, continued

The Desk Officer shall provide heightened protection to vulnerable detainees to include direct sight and sound supervision. The Desk Officer shall monitor the conduct and treatment of detainees or employees who reported sexual abuse and of detainees who were reported to have suffered sexual abuse pursuant to DET-07 Detainee Sexual Abuse and Sexual Harassment and DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection.

Meals may be provided from a correctional facility, detainee meal fund, the detainee's personal funds with their consent, or other appropriate source.

- The Desk Officer shall document within the DAJ the number, cost (if applicable), and type of meals served;
- Dishes, cups, and all utensils shall be used only once and secured upon completion of use; and
- Common cups and towels are not allowed.

Shift Change

The on-duty Desk Officer shall inform the incoming Desk Officer about the count and condition of the detainees. Incoming Desk Officers shall conduct a physical face-to-face check of all detainees to verify the count and condition of detainees prior to assuming desk duty. The incoming Desk Officer shall record this information into the DAJ.

Suicide Threats or Attempts

Information received from any source pertaining to a detainee's risk of harming themselves shall be considered valid.

If any of the following apply to the detainee:	Then:
• Makes a suicide threat or attempt; • Clearly exhibits signs or symptoms of suicidal behavior; • Has an entry in the Q-5 Query from a prior suicide threat or attempt at a detention facility; and/or • Has an entry in the Q-5 Query that did not occur at a detention facility.	• The Desk Officer shall assign a member to Q-5 watch; • The assigned member shall physically watch the detainee at all times; • The Desk Officer shall advise the Troop Duty Officer of the Q-5 watch; • The Desk Officer shall log the information related to the Q-5 watch in the DAJ; • The Desk Officer shall adhere to all other duties as outlined in the monitoring section of this policy; and • The detainee may be transported to a medical facility for evaluation;

Suicide Threats or Attempts, continued

If the detainee:	Then:
• Is not actively suicidal, but expresses suicidal ideation (e.g., expressing a wish to die without a specific threat or plan); and/or • Has a recent history of self-destructive behavior.	• The Desk Officer shall physically check the detainee on an unpredictable schedule at staggered intervals not to exceed every fifteen (15) minutes; • The Desk Officer shall record these checks utilizing the electronic monitoring (Watchman) device; and • The Desk Officer shall log these detainee checks into the DAJ.

If a detainee attempts or threatens suicide at an MSP facility, the following additional responsibilities apply.

Position	Duties

Desk Officer	• Contact EMS as necessary;
	• Provide medical attention as necessary;
	• Notify the Troop Duty Officer and Station Commander;
	• Document the incident in the DAJ; and
	• Pursuant to Massachusetts General Laws (MGL) c. 40, § 36A:
	  ○ Ensure the incident has been entered into the CJIS Q-5 suicide menu prior to the end of the shift; and
	  ○ Notify in writing any lockup facility the detainee is transferred to the exact nature of said attempt or threat.

Troop Duty Officer	• If needed, dispatch a supervisor to the barracks to assist; • Ensure the Desk Officer has assigned a member to Q-5 watch of the detainee; • Log the incident information into the DAJ; and • Ensure the provisions of M.G.L. c. 40, § 36A are followed.

Medical Care

Detainee Medications

Administration of medication shall be limited to prescribed medication in the detainee's name. Over the counter medication(s) shall not be administered to detainees.

Prescribed medications in the detainee's name and possession shall be taken into custody, recorded on the SP-2 Detainee Property Inventory and stored with the detainee's property. If the detainee so requests, the Desk Officer may allow a proper dosage, as prescribed on the medicine label, to be given to the detainee. Dosages and their frequency of ingestion shall not exceed the limitations set forth on the medicine container. Each dose of medication issued shall be recorded in the DAJ to include the name of medication, time distributed, and the member distributing the medication. Incoming Desk Officers shall be advised of relevant prescribed medication information including prior dosage distribution.

If there is any question concerning the administration of medications, the Desk Officer may either confer by telephone with a qualified medical physician before administering the medication, or if necessary, the detainee may be transported to a medical facility for the administration of medication. Alternatively, members administering medications may consult with a local pharmacist to confirm that medication is being properly administered, and that pills are properly identified as marked.

Sick or Injured Detainees

The procedures for requesting emergency health care shall be posted in a conspicuous place in English and any other language(s) prevalent within the barracks area.

When a member observes or is informed by a detainee that they are experiencing a medical problem that requires immediate medical treatment, the member shall request an ambulance. If unsure as to whether or not a detainee requires immediate medical treatment, members shall request assistance from trained medical personnel.

Pending arrival of EMS, members should provide basic First Aid if it is an emergency or appears serious. When possible, an additional member should be present, or notified to return to the barracks, prior to the detainee being removed for the administration of first aid.

Sick or injured detainees should not be transported by the Department, unless two (2) or more members are available for the transport. It may be more prudent to await the arrival of an ambulance.

- Upon arrival of an ambulance, members shall defer medical care to the EMTs but retain custody and security of the detainee;

Medical Care, continued

- A member shall follow directly behind the ambulance transporting the detainee to the medical facility to ensure custody of the detainee is continuously maintained during transport. If a member is requested by EMS to ride inside the transporting ambulance due to concerns about safety or flight risk regarding that detainee, another member in a cruiser shall then follow directly behind that ambulance; and
- The Troop Duty Officer shall be informed of any such incidents.

The Desk Officer shall advise the Troop Duty Officer of any medical care provided to a detainee at a barracks and/or during the transportation to and from an outside medical facility. Further, the Desk Officer is responsible for recording all information in the DAJ related to any medical care provided to a detainee at a barracks or during the transportation, temporary detention, and return of a detainee from an outside medical facility.

In the event of a sexual assault upon a detainee while in State Police custody by another detainee, staff member, employee or contractor, members shall adhere to the requirements of DET-07 *Detainee Sexual Abuse and Sexual Harassment.*

Guarding Detainees Off-Site

Injured or ill detainees transported to a medical facility for treatment or medication shall be handcuffed whether they are transported in a police vehicle or ambulance, unless physical disabilities prevent handcuffing. The removal of handcuffs should only occur when necessary to facilitate medical treatment. Prior to any such removal, measures to prevent escape, physical attack of, or by, the detainee shall be put into place where possible (e.g., cuffing of other hand, cuffing to bed/gurney).

The member assigned to guard the detainee will remain with the detainee at all times, whenever possible, during treatment. If it is medically necessary for a member to leave a detainee's immediate presence (e.g., to allow an x-ray), the member shall first ensure that all avenues of escape are secured and that there are no items accessible to the detainee that might be used as weapons.

In order to maintain the safety of members and the public, no outside communications shall be allowed by the detainee with others while at the hospital. Exception(s) to this are limited to medical staff administering aid, legal counsel, and/or an interested adult for the detainee.

Medical Care, continued

When a detainee is admitted to the hospital or remains there for a prolonged period, the member guarding the detainee should request the hospital personnel to 'block' the detainee's name, which would prevent the switchboard operator from re-routing a call to the detainee from an outside caller or allow others to know the detainee's location.

Use of utensils for detainee meals while at a medical facility will be screened and limited to prevent potential self-harm or harming of medical staff and/or any member(s).

Prior to returning the detainee to the barracks' cell, the detainee shall be searched to ensure that no weapon or contraband was concealed by the detainee while receiving medical care.

Discharge paperwork from a treatment facility shall be placed with the detainee's property upon return to the Department facilities.

Outside Deliveries

Detainees may only receive funds, prescription medications, or clean clothing from outside person(s).

All items shall be:

- Inspected for contraband and placed with the detainee's property, or provided to the detainee as appropriate;
- Documented on the detainee's SP 2 Detainee Property Inventory; and
- Logged into the DAJ.

Entering Cellblock

Firearms and ECWs shall be secured before entering an occupied cellblock, except when all detainees are secured in the cells and the 30-minute check is being conducted.

Members entering the cellblock alone shall maintain a means of communication by:

- Verbal communication with another member;
- Portable radio that is powered on; and/or
- Panic alarm or other means.

Department members shall announce themselves prior to entering the cellblock containing a detainee of the opposite gender. Staff should not intentionally place themselves in a position where they can view the breasts, buttocks, or genitalia of a detainee of the opposite gender when entering a cell or monitoring a detainee utilizing the audio/video monitoring system(s).

Detainees will be allowed to perform bodily functions without members or employees of the opposite gender viewing their breasts, buttocks or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks.

Entering an Occupied Cell

Members shall only open or enter an occupied cell when:

- At least one (1) other member is present; or
- Releasing a detainee from custody; or
- In the event of an emergency.

Release of Detainee

When a detainee is removed from a cell, the cell shall be searched for weapons or contraband. If any damage is found to have been caused by the detainee, they should be criminally charged. Any unusual conditions shall be reported to the Station Commander and recorded by the Desk Officer in the DAJ.

Positive identification of the detainee shall be made prior to release by verifying the detainee's booking sheet photo or other photographic identification.

All items of property shall be compared to the items listed on the inventory report and the detainee requested to sign the form indicating that they have received the property. A refusal to sign shall be noted in writing on the inventory report and recorded in the DAJ.

The Desk Officer shall be responsible for recording in the DAJ information related to the release of the detainee from custody, including, but not limited to, the return of property, the cell inspection and the name(s) of the member(s) conducting such actions.

The release of a juvenile from Department custody shall be recorded in the DAJ consistent with the requirements of DET-09 Juvenile Detention.

Counsel / Interested Adult Visitation

Visitation with a detainee shall be limited to legal counsel and/or in the case of juvenile detainees an interested adult.

The Desk Officer shall be responsible for recording all information related to the visit in the DAJ.

<u>Visitor Requirements</u>:

- Show positive identification;
- Name, address and relationship to the detainee shall be documented in the DAJ;
- Counsel information shall include their BBO number;
- Checked for outstanding warrants and active court orders prohibiting contact (restraining/harassment prevention orders);
- Submit to a physical search and electronic scan for weapons and/or contraband;
- Submit to an inspection of their belongings for weapons and/or contraband prior to and immediately following the visit;

Counsel / Interested Adult Visitation, continued

- No physical contact with detainee;
- Prohibited from providing the detainee with any outside items; and
- Have no contact with or violate the privacy of other detainees.

Visitation Restrictions:

- Visitation will only be authorized when the Desk Officer can assign an available member to facilitate the visit;
- Visitation time limits shall be reasonable and not unduly interfere with member duties or otherwise interfere with barracks operations; and
- Visitation may be terminated at any time by the Desk Officer or member assigned for extenuating circumstances or violation(s) of visitor requirements.

Visitation shall be conducted in the following manner:

- If the cellblock is unoccupied the visit should take place in the cellblock with the detainee remaining in the cell and the visitor outside the cell;
- If the cellblock is occupied by other detainees, or at the request of the detainee's counsel or interested adult, the visit may take place in the booking room, temporary detention area or other room(s) specifically designated/designed for interviews and interrogations;
- The detainee shall be handcuffed in accordance with booking procedures if the visit takes place outside of the detainee's cell;
- Counsel or an interested adult shall not be allowed into the booking room, temporary detention area or other room(s) specifically designated/designed for interviews and interrogations until the detainee is properly secured;
- When available, the Desk Officer shall ensure the video monitoring system is activated but will disable the audio monitoring system to ensure the privacy of the visitation area;
- Provisions of INV-05 Special Protections for Juveniles shall be adhered to relative to visitation;
- Visitation that occurs at a medical facility should adhere to the requirements and restrictions as set forth in this policy within practical limitations; and
- The detainee shall be searched for weapons/contraband upon conclusion of the visit, prior to returning them to their cell.

Arraignment

Court in Session: If the court is in session when the booking process and all required reports are complete, it is the responsibility of the Desk Officer to arrange detainee transportation to the court of jurisdiction without delay.

Court not in Session: If the court is not in session when the booking process and all required reports are completed, the detainee shall be placed into a cell until bail can be arranged, or if bail cannot be arranged, until the next session of the court.

Arraignment, continued

Detainees who are not released on bail within twenty-four (24) hours following an arrest on charges for which probable cause has not been determined by a judge or magistrate are entitled to a probable cause hearing (i.e., "Jenkins Hearing" *Jenkins v. Chief Justice of District Court* 416 Mass 221, 1993). The arresting member or Desk Officer shall report the facts, orally or in writing, to a neutral magistrate. The results of the hearing shall be recorded by the Desk Officer in the DAJ. In the event that the review cannot take place due to extenuating circumstances, the hearing shall take place as soon as possible and the reason for the delay documented in the DAJ.

Bail

Arrestees shall be informed of the right to bail and afforded the opportunity for bail.

It shall be the responsibility of the Desk Officer to ensure that a detainee's opportunity to make bail is not impeded.

The Desk Officer shall contact the bail clerk to determine the bail set by the bail clerk.

Arrested persons shall not be considered eligible for bail until their fingerprints have been accepted and verified by AFIS.

Requesting Bail:

Prior to contacting the bail clerk, the Desk Officer should have, at a minimum, the following information available:

- Identity of the person to be bailed. If the identity is in question, the bail clerk shall be so advised;
- Demographic information, excluding race, related to the detainee collected during booking;
- Offenses charged;
- Criminal history to include Board of Probation (BOP) record and Interstate Identification Index (III); and
- Current detainee funds and whether or not the detainee wishes to be bailed.

Detainee Funds:

- The detainee shall be advised of his/her bail status. If the detainee has funds and wishes to be bailed, the bail clerk shall be so advised;
- If the detainee does not have funds and wishes to be bailed, the detainee may utilize the phone to arrange delivery of funds for bail;
- Upon arrival of the bail funds at the barracks, the Desk Officer shall contact the bail clerk; and

Bail, continued

- Funds provided for a detainee's bail shall be recorded in the DAJ and placed with the detainee's property with the SP-2 updated by the Desk Officer. Alternatively, person(s) providing funds for bail may wait for the arrival of the bail clerk in lieu of providing the funds in advance of the arrival of the bail clerk.

Detainees under arrest that are also in protective custody may be returned to custody after being bailed until such time as they may be released.

Receiving Detainees from an Outside Agency

- Desk Officers shall be responsible for the following when accepting detainees from an outside agency:
  - Verify the authority and lawfulness of the detention including identification of the presenting officer. If the presenting officer is not in uniform, a valid identification card shall be recorded and the Desk Officer may contact the requesting agency to verify the presenting officer's authority;
  - Obtain detainee information from the requesting agency. The information shall include:
    1. Positive identification of the detainee;
    2. A copy of the detainee's booking sheet;
    3. An official police report if the detainee is eligible to be bailed; and
    4. A point of contact and telephone number where a sworn member of the requesting agency can be reached at any time during the day or night.
  - The detainee shall be screened for PREA-related issues, suicide risk and medical conditions;
    1. If hospitalization, suicide watch, or other special handling is necessary, the requesting agency will provide the necessary personnel to manage these situations. Exceptions to this must be authorized by the Troop Duty Officer.
  - An inventory of the detainee's property shall be completed pursuant to this General Order;
  - Detainees may be bailed from custody if bail is set by the bail clerk in the jurisdiction of the delivering agency. The delivering agency shall be notified in advance of the bailing of the detainee; and
  - Pertinent information shall be entered into the DAJ consistent with information input during an MSP arrest/detention. This information shall include the contact information for the requesting agency.

Group Arrests/ Overcapacity Procedures

- If, as the result of a group arrest, or at any other time, the Station Commander or Troop Duty Officer determines that the number of persons to be detained in the holding facility will exceed the number for which the facility was designed, they may authorize the overcrowding on a temporary basis. The Desk Officer shall immediately notify the Troop Duty Officer or Station Commander of such conditions;
- In the event of a group arrest, detainees arriving at the barracks will be placed in a holding cell, with multiple detainees in a single cell if necessary, or otherwise secured as directed by the Station Commander or Troop Duty Officer;
  - Prior to the placement of any detainee(s) into a cell or temporary detention area(s), they shall be searched for weapons/contraband, screened for PREA-related issues, suicide risk and medical conditions.
- Area(s) of temporary detention shall be searched for weapons/contraband prior to the placement of any detainees within same;
- All detainee rights applicable to singular detention shall remain in effect during times of excess capacity;
- Monitoring of detainees shall adhere to all procedures set forth for the monitoring of singular detainees;
- Juvenile detention shall adhere to restrictions set forth in DET-09 Juvenile Detention;
- The Desk Officer is responsible for the accurate recording of information within the DAJ related to the booking and detention of all detainees;
- Non-violent, low security risk detainees may be held as a group if from the same incident or by gender affiliation and age in separate locations as determined by the Station Commander or Troop Duty Officer; and
- The temporary exceeding of capacity of this/these area(s) is permitted under these circumstances until such time as the excess capacity situation can reasonably be relieved, typically through the transfer or release of persons being held:
  - In order to accomplish this type of release, the Station Commander or Desk Officer shall examine the list of detainees and attempt to expedite the bail or release of the less serious offenders;
  - If release of a sufficient number of detainees to relieve the excess capacity of the holding facility is not possible, the Troop Duty Officer may authorize the excess detainees to be transported to other holding facilities in the Troop; and
  - The Troop Duty Officer is authorized to assign additional personnel as necessary to satisfy the staffing requirements of the exceeding capacity situation.

Escape or Wrongful Release

If a detainee escapes or is inadvertently released, the following actions shall be taken:

Position	Duties
Desk Officer	• Immediately notify the Troop Duty Office and Station Commander; • Notify area patrols and local departments of the escape; and • Make the appropriate DAJ entries.
Troop Duty Officer	• Immediately request K-9, Air Wing and other tactical resources as deemed necessary; • Dispatch a supervisor to the scene to: o Assume control of the recapture operation; and o Investigate the circumstances of the escape or wrongful release; o Prepare a report with findings and recommendations; • Notify the Troop Commander; • Notify GHQ Communications; • Notify the appropriate State Police Detective Unit (SPDU) of jurisdiction; and • Make the appropriate DAJ entries.
Troop Commander	• Notify the Division Commander; and • Review reports and take actions to prevent reoccurrences.
Division Commander	• Review reports and take actions to prevent reoccurrences.

Detainee Death Protocols

If a detainee dies while in a Department facility, the following actions shall be taken:

Position	Duties
Desk Officer	• Immediately notify the Troop Duty Officer and the Station Commander.
Troop Duty Officer	• Immediately notify the Troop Commander; • Immediately notify the SPDU of jurisdiction; • Notify the Office of the Chief Medical Examiner (OCME), as requested by SPDU; • Ensure that the appropriate DAJ entries are made; and • Ensure that proper procedures and provisions under M.G.L. c. 40, § 36A are followed.
State Police Detective Unit	• Respond to the scene and take command of the investigation.

Detainee Death Protocols, continued

Position	Duties
Station Commander	• Submit, within four (4) days, a report of the incident to the Troop Commander, along with all other related reports.
Troop Commander	• Immediately notify the Division Commander; • Assign a Commissioned Officer to immediately assist the SPDU investigation and to conduct an Administrative Review of the incident; • Forward copies of the reports to the OCME within seven (7) days; and • Review and submit reports and recommendations to the Division Commander.
Reviewing Commissioned Officer	• Assist the SPDU; • Conduct an Administrative Review of the incident to ensure that members followed Department procedures during the incident; and • Submit within four (4) days, a report to the Troop Commander.
Division Commander of Field Services	• Review reports and take actions to prevent reoccurrences; • Submit reports to the Deputy Superintendent for review and action; and • Maintain a file on detainee deaths.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-07**
Subject:	
Detainee Sexual Abuse and Sexual Harassment	

Policy

In accordance with the *Prison Rape Elimination Act (PREA) of 2003,* the Department shall:

- Establish a zero tolerance policy toward all forms of sexual abuse and sexual harassment towards any detainee;
- Ensure that all detainees have the right to be free from sexual abuse and sexual harassment; and
- Establish a zero tolerance policy toward all forms of retaliation against anyone who reports sexual abuse and sexual harassment or who cooperates in a sexual abuse investigation.

This policy shall be made available through the Department's website and upon request.

Definitions

Detainee: Any person detained in a lockup, regardless of adjudication status.

Employee: A sworn member or civilian who works directly for the Department.

Gender Non-Conforming: A person whose gender identity (i.e., internal sense of feeling male or female) is different from the person's assigned gender at birth.

Holding Cell: Any secure enclosure that is under the control of law enforcement and is primarily used for the temporary confinement of suspects who have recently been arrested.

Intersex Individual: A person born with components of both male and female biological sex characteristics (genitalia, chromosomes, hormones, and secondary sex characteristics), or genitalia that are not clearly male or female.

Lockup: A facility that contains holding cells, cell blocks, or other secure enclosures that are:

- Under the control of a law enforcement, court, or custodial officer; and

Definitions, continued

- Primarily used for the temporary confinement of individuals who have recently been arrested, detained, or are being transferred to or from a court, jail, prison, or other agency.

Prison Rape Elimination Act (PREA): Signed into law on September 4, 2003. The Prison Rape Elimination Act establishes a standard of zero tolerance for rape and sexual assault or sexual harassment in any prison, jail, police lockup, or juvenile facility.

PREA Coordinator: A management level employee who oversees, develops, and implements Department efforts to comply with the PREA standards.

Sexual Abuse: Any sexual contact or the intentional touching of the victim's or suspect's genital, anal or other intimate area for sexual arousal or gratification, or for the abuse of either party; in this directive, includes in-custody sex offenses, voyeurism, or rape or attempts; harassment, sexual harassment, neglect, discrimination and similar terms. This policy applies to sexual abuse and/or harassment of a detainee by another detainee and/or sexual abuse of a detainee by an employee, contractor, or volunteer.

Sexual harassment includes:

- Repeated and unwelcome sexual advances, requests for sexual favors, or verbal comments, gestures, or actions of a derogatory or offensive sexual nature by one inmate, detainee, or resident directed toward another; and
- Repeated verbal comments or gestures of a sexual nature to an inmate, detainee, or resident by an employee, contractor, or volunteer, including demeaning references to gender, sexually suggestive or derogatory comments about body or clothing, or obscene language or gestures.

Voyeurism: When any employee, contractor, or volunteer invades a detainee's privacy for reasons unrelated to official duties, such as peering at a detainee who is using a toilet in their cell to perform bodily functions; requiring the detainee to expose their buttocks, genitals, or breasts; or taking images of all or part of a detainee's naked body or of a detainee performing bodily functions.

Department Responsibilities

The Department shall ensure that:

- An administrative or criminal investigation is completed for all allegations of detainee sexual abuse and/or sexual harassment pursuant to DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection;
- Alleged detainee sexual abuse and/or sexual harassment incidents, including third-party and anonymous reports, are reported to designated investigators;
- Detainees are informed of at least one way to report sexual abuse and/or sexual harassment to a public or private entity or office that is not part of the Department, allowing the detainee to remain anonymous if so requested;
- Investigators have received special training in sexual abuse investigations pursuant to Code of Federal Regulations (CFR) 28 CFR § 115.34;
- Develop an internal protocol appropriate for juvenile detainees where applicable; and
- Take appropriate measures to prevent retaliation against individuals who report and/or cooperate with an investigation.

Screening for Risk of Victimization and Abusiveness

In accordance with training, when booking detainees, sworn members shall screen all detainees to assess their risk of being sexually abused by other detainees or sexually abusive toward other detainees. Sworn members shall also advise detainees of the Department's zero tolerance policy toward all forms of sexual abuse and sexual harassment towards any detainee. The screening and the advisement of the Department's zero-tolerance policy shall both be documented in RAMS/Department Records Management System.

If after screening, the sworn member determines that the detainee may be at risk, the detainee shall be housed alone in a holding cell for the duration of his/her detainment at a State Police facility. This includes post-screening transportation in a Department vehicle to/from court, jail, prison, or other agency.

Staffing Plans

Station Commanders for each barracks containing cells shall develop and document a staffing plan that provides for adequate levels of staffing, and, where applicable, video monitoring to protect detainees against abuse.

Station Commanders shall consider the following factors when determining adequate staffing plans:

- The physical layout of the lock-up;
- The composition of the detainee population;
- The prevalence of sexual abuse incidents; and
- Any other relevant factor(s).

Each time the staffing plan is not complied with, the Station Commander shall document and justify all deviations from the staffing plan and shall forward the document with justifications to the PREA Coordinator.

Disabled Detainees

Detainees with disabilities include detainees who are deaf, hard of hearing, blind or have low vision, and those who have intellectual, psychiatric, or speech disabilities.

Sworn members shall take appropriate steps to ensure that detainees with disabilities have an equal opportunity to benefit from all aspects of the Department's efforts to prevent, detect, and respond to sexual abuse and sexual harassment. Such steps shall include providing access to interpreters who can interpret effectively, accurately, and impartially when necessary to ensure effective communication with detainees who are deaf or hard of hearing. In addition, sworn members shall ensure that written materials are provided in formats and through methods that ensure effective communication with detainees with disabilities.

Detainees with Limited English Proficiency

Sworn members shall take reasonable steps to ensure that detainees with limited English proficiency have meaningful access to information regarding the Department's policies and efforts to prevent, detect, and respond to sexual abuse and sexual harassment including by providing interpreters who can interpret effectively, accurately, and impartially.

Detainee Interpreters

No sworn member shall use detainees as interpreters or readers or otherwise request assistance from another detainee except in limited circumstances where an extended delay in obtaining an effective interpreter could compromise the detainee's safety, the performance of first-responder duties, or the investigation of the detainee's sexual abuse/harassment allegations.

First Responder Responsibilities

The first law enforcement sworn member to respond to a report of a sexual assault or sexual harassment shall:

- Immediately separate the alleged victim and abuser;
- Take immediate action to protect the detainee from substantial risk of imminent sexual abuse;
- Keep the detainee either with the officer or in the cell and under surveillance until a supervisor can investigate and determine any further actions to take to protect the detainee;
- Follow uniform evidence protocol that maximizes the potential for obtaining usable physical evidence including preserving and protecting any crime scene until appropriate steps can be taken to collect any evidence;
- If the abuse occurred within a time period that still allows for the collection of physical evidence, request that the alleged victim not take any action(s) that could destroy physical evidence, including, as appropriate, washing, brushing teeth, changing clothes, urinating, defecating, smoking, drinking, or eating;
- Offer all victims access to forensic medical examinations performed by a Sexual Assault Forensic Examiner (SAFE), Sexual Assault Nurse Examiners (SANEs) or qualified medical practitioner without financial cost to the victim, if evidentiary or medically appropriate;
- If the detainee is transported for a forensic examination to an outside hospital that offers victim advocacy services, ensure that the detainee be permitted to use such services to the extent available, consistent with security needs;
- Document all efforts to provide a SAFE or medical practitioner;
- Attempt to make a victim advocate from a rape crisis center or other facility available to the detainee if transported to a hospital or other medical facility consistent with security needs; and
- Accompany the victim through the forensic medical examination process and interviews.

First Responder Responsibilities, continued

If the first responder is not a law enforcement member, that responder shall:

- Request that the alleged victim not take any actions that could destroy physical evidence; and
- Immediately notify a law enforcement member.

Note: See also Policy and Procedure DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection.

PREA Coordinated Response Plan

If a detainee reports that they were sexually harassed while in a Department facility, the following actions shall be taken:

Position	Duties
First Responder	• Immediately separate the alleged victim and abuser; • Preserve and protect any crime scene until appropriate steps can be taken to collect any evidence; • Request that the alleged victim not take any actions that could destroy physical evidence, including washing, brushing teeth, changing clothes, urinating, defecating, drinking, or eating; • Take immediate action pursuant to this General Order; and • Immediately contact the desk officer.

PREA Coordinated Response Plan, continued

Position	Duties
Desk Officer	• Take immediate actions as a first responder pursuant to this General Order; • Notify, if necessary, local EMS and a local medical facility for an assessment of alleged victim's acute medical needs and to make an assessment of necessary treatment; • Immediately notify the State Police Detective Unit (SPDU)/Specialized PREA investigator(s) of jurisdiction; • Explain to the alleged victim the need for a forensic medical exam and offer the victim the option of undergoing one without any financial costs; • Make best efforts to ensure that examinations are conducted by Sexual Assault Forensic Examiners (SAFEs) or Sexual Assault Nurse Examiners (SANEs), or ensure that a qualified medical practitioner performs forensic medical examinations; • Offer alleged victim services by providing the victim with list of local sexual abuse advocates and/or crisis centers found in the Department's PREA brochure in DocuShare/PREA; • Ensure that the appropriate Daily Administrative Journal (DAJ) entries are made; • Immediately notify the Troop Duty Officer and the Station Commander; and • If the victim is transferred from the lockup to a jail, prison, or medical facility, inform the receiving facility of the incident and the victim's potential need for medical or social services, unless the victim requests otherwise.

PREA Coordinated Response Plan, continued

Position	Duties
Troop Duty Officer	• Immediately notify the Troop Commander and PREA Coordinator; • Ensure proper compliance with this General Order and DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection; • Provide for any special needs the victim may have; and • In the event that the victim is transferred from the lockup to a jail, prison, or medical facility, ensure that the receiving facility is informed of the incident and the victim's potential need for medical or social services, unless the victim requests otherwise.
State Police PREA Specialized Investigator(s)	• Respond to the scene and take command of the investigation; • Take all actions pursuant to DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection; • Inform the victim of his or her rights under relevant policies, federal and state laws; • Safeguard the custody of evidence; • Explain to the alleged victim the need for a forensic medical exam and offer the victim the option of undergoing one at no cost; • Offer the presence of a victim advocate or other staff member during the exam; • Interview the victim and any witnesses; • Submit report(s) of investigation pursuant to DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection; and • Document all referrals of allegations of sexual abuse or sexual harassment for criminal investigation.

PREA Coordinated Response Plan, continued

Position	Duties
Station Commander	• Submit, within four (4) days, a report of the incident to the Troop Commander, along with all other related reports.
Troop Commander	• Immediately notify the Division Commander; • Assign the PREA Coordinator to immediately assist the SPDU investigation and to conduct an Administrative Review of the incident; • Forward copies of the reports to the PREA Coordinator within seven (7) of their completion; and • Review and submit reports and recommendations to the Division Commander.
Reviewing Commissioned Officer	• Assist the SPDU; • Conduct an Administrative Review of the incident; and • Prepare a report for the Troop Commander within four (4) days. Note: The Administrative Review is to ensure that sworn members followed Department procedures during the incident.
Field Services Division Commander	• Review reports and take actions to prevent reoccurrences; • Submit reports to the Colonel/Superintendent for review and action; and • Maintain a file for PREA incident review pursuant to DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection.

Reporting

All employees shall immediately report to their immediate supervisor:

- Any knowledge, suspicion, or information regarding an incident of detainee sexual abuse and/or sexual harassment that occurred within a Department lockup;
- Any retaliation against detainees or Department employees who reported such an incident; and
- Employee neglect or violation of responsibilities that may have contributed to an incident or retaliation.

All allegations of sexual abuse, including third party and anonymous reports, shall be reported to a designated sexual abuse investigator who shall investigate the allegation pursuant to DET-07A Detainee Sexual Abuse and Sexual Harassment Investigations, Review and Data Collection.

Employees shall not reveal any information related to a sexual assault to anyone other than to the extent necessary to make treatment and investigatory decisions.

All verbal reports of sexual abuse and/or sexual harassment shall be documented by the immediate supervisor who receives a report of sexual abuse or sexual harassment pursuant to this policy.

Department employees may privately report sexual abuse and/or sexual harassment by contacting the PREA Coordinator, filing a complaint with the Office of Professional Integrity and Accountability, or utilizing the PREA third party contact number posted on the Department's website and on the PREA informational brochure.

Methods of reporting shall include: in-person, phone, mail, email, fax or any means by which the employee feels comfortable in reporting to a supervisor and/or the PREA Coordinator. Employees are expected to report any knowledge or suspicion of abuse. The methods of reporting are expected to vary based on the situation and the individual involved. Should there be any question as to the most appropriate method, the PREA Coordinator or Supervisor should be contacted.

Abuse Reports from Outside Facilities/ Agencies

An employee who receives an allegation that a detainee was sexually abused and/or sexually harassed while confined at a non-Department facility, shall notify through channels:

- The Colonel/Superintendent; and
- The Department PREA Coordinator.

Colonel/Superintendent shall:

- Notify the head of the facility or appropriate office of the agency where the alleged abuse occurred;
- Make notification, as soon as possible, but no later than seventy-two (72) hours after receiving the allegation; and
- Document such notification.

Training

All employees who may have contact with lockup detainees shall receive training regarding:

- The Department's zero-tolerance policy and detainees' right to be free from sexual abuse and sexual harassment;
- How to fulfill their responsibilities regarding prevention, detection, reporting, and response to sexual abuse and sexual harassment;
- The right of detainees and employees to be free from retaliation for reporting sexual abuse and sexual harassment;
- The dynamics of sexual abuse and sexual harassment in confinement;
- The common reactions of sexual abuse and sexual harassment victims;
- How to detect and respond to signs of threatened and actual sexual abuse;
- How to avoid inappropriate relationships with detainees;
- How to communicate effectively and professionally with detainees, including lesbian, gay, bisexual, transgender, intersex, or gender nonconforming detainees; and
- Compliance with relevant laws related to mandatory reporting of sexual abuse.

All employees shall annually review the PREA Standards Bulletin posted to DocuShare.

The Department shall provide each employee with refresher training annually to ensure that all employees know the agency's current sexual abuse and sexual harassment policies and procedures.

Training, continued

In years in which an employee does not receive refresher training, the Department shall provide refresher information on current sexual abuse and sexual harassment policies.

Every employee who may have contact with detainees shall acknowledge either in written or electronic format that they understands the Department's PREA policies and protocols and the PREA training they have received.

The Department shall maintain documentation confirming that employees, volunteers and contractors understand the training they have received.

PREA Coordinator

The Colonel/Superintendent shall:

- Designate a Detective Captain within Division of Investigative Services as the PREA Coordinator; and
- Ensure the PREA Coordinator has the authority to develop, implement, and oversee the Department's effort to comply with the PREA standards in all Department lockups.

The PREA Coordinator shall:

- Annually submit a status report of PREA compliance standards, investigative training requirements and reported/investigated incidents to the Colonel/Superintendent;
- Detail any corrective action required to ensure compliance with the PREA standard;
- Keep a current list of members who receive special training in sexual abuse investigations pursuant to Code of Federal Regulations (CFR) 28 CFR § 115.34; and
- Take necessary action to ensure Department compliance with the PREA standards subject to the Colonel's approval.

Hiring and Promoting Practices

The Department shall not hire or promote anyone who may have contact with detainees and shall not enlist the services of any contractor who may have contact with detainees who:

- Has engaged in sexual abuse in a prison, jail, lockup, community confinement facility, juvenile facility, or other institution (as defined in 42 U.S.C. 1997);
- Has been convicted of engaging or attempting to engage in sexual activity in the community facilitated by force, overt or implied threats of force, or coercion, or if the victim did not consent or was unable to consent or refuse; or

Hiring and Promoting Practices, continued

Has been civilly or administratively adjudicated to have engaged in the activity described in the paragraphs above.

The Department shall consider any incidents of sexual abuse and/or harassment in determining whether to hire or promote an employee, or to retain the services of any contractor, who may have contact with detainees.

Before hiring new employees who may have contact with detainees, the Department shall:

- Perform a criminal background records check on all applicants; and
- Make its best efforts to contact all prior institutional employers for information on substantiated allegations of sexual abuse, or any resignation during a pending investigation of an allegation of sexual abuse.

The Department shall ask all applicants and employees who may have direct contact with detainees about previous misconduct described in this section, in:

- Written applications and/or interviews for hiring or promotion; and
- Interviews or written self-evaluations conducted as part of reviews of current employees.

All employees shall disclose any of the misconduct described in this section.

Material omissions regarding such misconduct, or the provision of materially false information, shall be grounds for termination.

Any employee determined to have engaged in sexual abuse or sexual harassment of detainees as defined by policy shall be subject to discipline. The presumptive sanction for having engaged in prohibited behavior under this policy is termination.

Contractors and Volunteers

The Department shall perform a criminal background records check before retaining the services of any contractor or volunteer who may have contact with detainees and document the same. *See Vendor Acknowledgment PREA form.*

In the event that a contractor or volunteer has engaged in sexual abuse or has been convicted or adjudicated of having engaged in sexual abuse, they shall have no access or contact with detainees in Department custody.

The Department shall ensure that all volunteers and contractors who enter Department facilities and who may have contact with detainees have been trained on their responsibilities under the Department's sexual abuse and sexual harassment prevention, detection, and response policies and procedures including the Department's zero-tolerance policy regarding prohibited behavior.

The level and type of training provided to volunteers and contractors shall be based on the services they provide and the level of contact they have with detainees, but all volunteers and contractors who have contact with detainees, shall be notified of the Department's zero-tolerance policy regarding sexual abuse and sexual harassment and how to report such incidents. All volunteers and contractors who enter the Barracks and who may have contact with detainees shall sign an acknowledgement that they understand the Department's zero-tolerance policy and reporting requirements.

The Department shall maintain documentation confirming that volunteers and contractors understand the Department's PREA policy and information received.

Retaliation

The Department shall ensure that all detainees and employees who report sexual abuse or sexual harassment or cooperate with sexual abuse or sexual harassment investigations are protected from retaliation by other detainees or employees, and shall designate which employees or departments are charged with monitoring retaliation.

An employee who has knowledge, suspicion, or information regarding an incident of retaliation against detainees or employees who reported such an incident and any employee neglect that may have contributed to such retaliation, shall immediately report such incident or retaliation to their immediate supervisor.

Retaliation, continued

Supervisors who receive reports of retaliation shall employ multiple protection measures, which may include:

- Cell changes or transfers for detainee victims or abusers;
- Removal of alleged employees or detainee abusers from contact with victims;
- Providing emotional support services for detainees or employees who fear retaliation for reporting sexual abuse or sexual harassment or for cooperating with investigations; and/or
- Closely monitoring detainees or employees who fear retaliation.

Each Barracks Station Commander shall monitor all employee(s) who report sexual abuse or harassment to ensure that the employee(s) are not subject to retaliatory actions by other employees and shall document same.

Upgrades to Facilities and Technologies

When designing or updating holding cells, the Department will consider the effect of the design upon the ability to protect detainees from sexual contact.

When installing or updating video monitoring systems, the Department will consider how the technology may enhance the ability to protect detainees from sexual contact.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-07A**

Subject:

Detainee Sexual Abuse and Sexual Harassment Investigations, Review, and Data Collection

Policy

As the investigative agency for alleged sexual crimes committed on adults and juveniles held in a confinement setting by either the Department of Correction or Department of Youth Services, the Department of State Police shall ensure full compliance with the standards found within federal laws and mandates regarding the *Prison Rape Elimination Act* (2003).

This policy shall be made available through the Department's website and upon request.

Response

The Department shall adhere to the following requirements in regards to detainee allegations of sexual abuse and/or sexual harassment:

- Investigate allegations of sexual abuse and/or sexual harassment from the Department of Correction or Department of Youth Services;
- Investigate allegations of sexual abuse and sexual harassment from within the Department of State Police;
- Investigate allegations of sexual abuse and sexual harassment alleged by a detainee while detained at another facility;
- Follow uniform evidence protocol that maximizes the potential for obtaining usable physical evidence;
- Development of an internal protocol appropriate for juveniles where applicable;
- Offer all victims access without financial cost to forensic medical examinations performed by a Sexual Assault Forensic Examiner or qualified medical practitioner;
- Attempt to make a victim advocate from a rape crisis center available to the detainee;
- Accompany the victim through the forensic medical examination process and interviews; and
- Take appropriate measures to prevent retaliation against individuals who report and/or cooperate with an investigation.

Subject:	Number:
Detainee Sexual Abuse and Sexual Harassment Investigations, Review, and Data Collection	**DET-07A**

Special Training

Department Investigators shall receive special training in detainee sexual abuse and sexual harassment investigations according to Code of Federal Regulations (CFR) 28 CFR § 115.34, which shall include:

- Techniques for interviewing sexually abused or sexually harassed victims;
- Proper use of Miranda and Garrity warnings;
- Sexual abuse evidence collection in confinement settings; and
- The criteria and evidence required to substantiate a case for administrative action or prosecution referral.

Investigations

Department investigators when conducting an investigation into allegations of detainee sexual assault and/or sexual harassment, shall:

- Gather and preserve direct and circumstantial evidence, including any available physical and DNA evidence and any available electronic monitoring data;
- Interview alleged victims, suspected perpetrators, and witnesses;
- Review prior complaints and reports of sexual abuse and/or sexual harassment involving the suspected perpetrator;
- Notify their Division Commander through channels of the possible outcome when the evidence appears to support criminal prosecution; and
- Make relevant information regarding the status of the investigation available to the Department and/or requesting agency so that the detainee may be kept apprised of the investigation.

When there is probable cause to believe that a detainee had sexual contact with another detainee in a holding cell, or any Department employee had sexual contact with a detainee in a holding cell, the Department will make a criminal referral to the District Attorney's Office of jurisdiction or to the Attorney General's Office.

A criminal investigation will not be terminated because the alleged perpetrator separates from employment with the Department.

If an outside agency investigates allegations of sexual contact, the Department will cooperate with the investigators and remain informed about the progress of the investigation.

Note: See also Policy and Procedure DET-07 Detainee Sexual Abuse and Sexual Harassment for internal allegations.

Status Reports

Department Investigators who have conducted an investigation of a detainee's allegations of sexual abuse and/or sexual harassment shall:

- Make available to the requesting agency relevant information regarding the status of an investigation;
- Document that the detainee will be informed of the investigation status by the requesting agency; and
- Retain all written reports pertaining to the administrative or criminal investigation of alleged sexual abuse or sexual harassment in accordance with the Commonwealth's retention schedule or for as long as the alleged abuser is incarcerated or employed by the agency, plus five years, whichever is longer.

Sexual Abuse Incident Reviews

The PREA Coordinator in consultation with the Incident Review Team, which shall include the Station Commander, PREA Coordinator, and other pertinent individuals, shall conduct a sexual abuse incident review at the conclusion of every investigation into allegation of sexual abuse/harassment of a detainee in Department custody. Such review shall ordinarily occur within 30 days of the conclusion of the investigation. Such review will be conducted even when the allegation has not been substantiated, unless the allegation has been determined to be unfounded.

The review shall:

- Include input from supervisors and investigators as necessary;
- Consider whether the allegation or investigation indicates a need to change policy or practice to better prevent, detect or respond to sexual contact/abuse/harassment;
- Consider whether the incident or allegation was motivated by bias or gang affiliation;
- Examine the area where the incident allegedly occurred to assess whether physical barriers in the area may enable abuse;
- Assess the adequacy of staffing levels in that area during different shifts; and
- Assess whether monitoring technology should be deployed or augmented to supplement supervision by members.

The PREA coordinator shall submit a written report to the Colonel/Superintendent with findings and any recommendations for improvement.

The Department shall implement any recommendations for improvement or document its reasons for not doing so.

Subject:	Number:
Detainee Sexual Abuse and Sexual Harassment Investigations, Review, and Data Collection	**DET-07A**

Data Collection and Review

The PREA coordinator shall annually collect accurate, uniform data for every allegation of sexual abuse/harassment from each Barracks.

The incident-based data collected shall include, at a minimum, the data necessary to answer all questions from the most recent version of the *Local Jail Jurisdiction Survey of Sexual Violence* or other instrument developed by the Department of Justice and designated lockups.

The Department shall annually review data collected and aggregated in order to assess and improve the effectiveness of its sexual abuse prevention, detection, response policies, and training, including: identifying problem areas; taking corrective action on an on-going basis; and preparing an annual report of its findings from its data review and any corrective actions for each lockup, as well as the agency as a whole.

The PREA coordinator's annual report shall include a comparison of the current year's data and corrective actions with those from prior years and provide an assessment of the agency's progress in addressing sexual abuse. Upon approval of the Colonel, said report shall be made publicly available upon request, subject to redaction if appropriate.

The Department shall securely retain all incident based and aggregate data collected in accordance with all applicable data security policies and procedures.

All data collected shall be retained at least 10 years after the date of initial collection, unless federal, state, or local law requires otherwise.

Upon request, the Department shall provide the Department of Justice data from the previous calendar.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**DET-08**
Subject:	
Gender Identity and Expression	

Policy

The Department strives to ensure that everyone it serves is treated with dignity, respect, and professionalism. Department employees shall not engage in conduct that denigrates or shows hostility toward an individual because of their gender identity or gender expression.

Definitions

Adopted/Chosen Name: Non-birth name that an individual may use in self-reference. This may or may not be the individual's legal name and may or may not differ from the name on the individual's personal documents (i.e. driver's license, passport, etc.). Department employees should be aware that the use of an adopted/chosen name does not automatically equate to an attempt to hide one's legal identity, nor does it indicate that the individual is misrepresenting themselves.

Employee: A sworn member or civilian who works directly for the Department.

Gender Expression: External manifestations of gender identity such as an individual's name, personal pronouns, clothing, haircut, voice, and/or body characteristics.

Gender Identity: Gender identity is determined by an individual's self-identification and is different from an individual's sexual orientation. A person's gender-related identity, appearance or behavior, whether or not that gender-related identity, appearance or behavior is different from that traditionally associated with the person's physiology or assigned sex at birth. Gender-related identity may be shown by providing evidence including, but not limited to, medical history, care or treatment of the gender-related identity, consistent and uniform assertion of the gender-related identity or any other evidence that the gender-related identity is sincerely held as part of a person's core identity; provided, however, that gender-related identity shall not be asserted for any improper purpose.

Gender Non-Conforming: A person whose gender identity (i.e., internal sense of feeling male or female) is different from the person's assigned gender at birth.

Gender Non-Conforming Female: An anatomically born male who identifies as female. A *Gender Non-Conforming* female should be referred to as a female (i.e. she, her), regardless of medical history or the gender listed on identification documents.

Subject: Gender Identity and Expression	Number: DET-08

Definitions, continued

Gender Non-Conforming Male: An anatomically born female who identifies as male. A *Gender Non-Conforming* male should be referred to as a male (i.e. he, him, his), regardless of medical history or the gender listed on identification documents.

Intersex Individual: A person born with components of both male and female biological sex characteristics (genitalia, chromosomes, hormones, and secondary sex characteristics), or genitalia that are not clearly male or female.

Addressing an Individual

An individual may ask to be addressed differently from what his/her official identification documentation states. Therefore, when addressing individuals, Department employees shall adhere to the following:

- When uncertain which pronouns are appropriate, use the person's chosen name or respectfully ask the individual for clarification e.g., "How would you prefer to be referred to?";
- Address the individual by the name the individual chooses, regardless of whether or not the individual has obtained legal recognition of the chosen name;
- Use the titles and pronouns appropriate for the chosen name and/or gender expression (e.g., he/him for an individual identifying as male, she/her for an individual identifying as female, they/them for an individual identifying as another gender identity or whose gender identity is unknown, or as requested); and
- In all situations, make every effort to comply with the individual's requests in a non-judgmental, professional manner.

Official Documentation and Reports

An employee may observe that an individual's gender identity differs from the gender indicated on the individual's identification documents.

Employees encountering an individual wishing to be addressed differently from what is listed on official documents shall:

- Use the name and gender found on the individual's official documents in Department reports, i.e. incident reports, citations, and forms;
- Also document the individual's adopted/chosen name within the Department's Records Management System; and
- Use pronouns and descriptors consistent with the individual's gender identity when writing reports.

Searches

Department sworn members shall adhere to Massachusetts General Laws (MGL), Department Policy & Procedures, Department Rules & Regulations and constitutional provisions when conducting searches upon any individual.

When Department sworn members encounter *gender non-conforming* individuals, the members shall:

- Not perform a search or frisk for the sole purpose of determining an individual's gender;

Searches, continued

- Ask the individual what their preference is regarding the gender of the officer(s) searching the individual;
- Whenever practicable have two (2) officers of the preferred gender perform the search; and
- Document within the incident report the circumstances for the search, including the individual's preference regarding the gender of the officer(s) performing the search.

When an immediate cursory search for weapons is necessary for safety, the search may be conducted in the field by an officer of either gender.

Custody

If a gender non-conforming individual is being detained in a Department cell or vehicle, no other detainee(s) shall be housed in the same cell or placed or transported in the same vehicle if there are reasonable grounds to believe that the detainee's safety and security would be at risk.

Members transporting a gender non-conforming detainee shall radio their Station/Unit Desk Officer and have a Daily Administrative Journal (DAJ) entry made of the:

- Location;
- Preliminary charges against the detainee;
- Intended destination;
- Beginning odometer mileage, and upon arrival, the ending mileage; and
- If necessary, request for back up.

Gender non-conforming individuals may be held in Department custody pending bail, transported to another facility, or transported for court appearance as follows:

- The gender non-conforming individual shall be placed into a cell. If there are reasonable grounds to believe that the detainee's safety and security would be at risk, no other detainees shall be placed in that cell until the gender non-conforming individual is released from custody; or
- If there are other detainees in the cell(s), and there are reasonable grounds to believe that the gender non-conforming detainee's safety and security would be at risk, the gender non-conforming detainee shall be transported to the nearest station and be placed in a cell.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
December 6, 2021	**DET-09**
Subject:	
Juvenile Operations	

Policy

The Department shall ensure protection of Constitutional rights and compliance with Federal and Massachusetts laws and regulations regarding the detention of juveniles.

When appropriate, safe, and feasible in determining how to respond to juveniles, members should use de-escalation strategies in an attempt to problem solve and provide alternatives to arrest. Members should consider all approved diversion options and select the alternative which least restricts the juvenile's freedom and provides an alternative compatible with the best interests of the juvenile and the community. When interacting with juveniles, members should make every reasonable effort to prevent an incident from escalating.

Steps should be taken to determine if juveniles in custody of the Department are alleged to have been harmed or to be in danger of harm including, but not limited to 51A's – Neglect or Abuse, 111B's – Protective Custody, 94C – Narcotics Violations. Members shall adhere to mandated reporting requirements pursuant to SOC-07C.

When a juvenile is arrested or placed into custodial protection, the member and their supervisor shall immediately review the most current version of M.G.L. c. 119, § 39H and § 67 to ensure proper legal treatment.

Juveniles

Juvenile: A child who is less than (eighteen) 18 years of age.

Under Age 12	A juvenile who is less than twelve (12) years of age cannot be charged with a crime.
Age 12 to less than age 18	A summons is the *preferred* method for bringing all juveniles to court, unless there is reason to believe the juvenile will not appear upon issuing a summons.
Arrest Warrant	An arrest warrant will issue if the court has reason to believe the juvenile will not appear upon a summons, or if the juvenile has been summoned and did not appear, or if the juvenile violated the terms and conditions of probation.

Status Offender

Status Offender: A juvenile who engages in an unlawful activity, which, if they were an adult, would be classified as non-criminal. Examples of juvenile status offenders are:

- Child placed into protective custody;
- Youth curfew violations (where applicable); or
- A "Child requiring assistance" from six (6) to eighteen (18) years of age per M.G.L. c. 119, § 39H who:
  - Repeatedly runs away from home;
  - Repeatedly fails to obey the lawful and reasonable commands of the child's parent, guardian or legal custodian;
  - Repeatedly fails to obey the lawful and reasonable regulations of the child's school;
  - Is habitually truant; or
  - Is a sexually exploited child.

NOTE: The Runaway Assistance Program (RAP) is a program designed to assist Police Officers who are dealing with runaways during the hours that juvenile court is closed (evenings, weekends and holidays). RAP provides a safe place where police can bring a runaway child, age 17 and under. After consultation with probation, and if the Police Officer determines that a child cannot be safely delivered to a parent or other responsible adult (including DCF), the Police Officer (or dispatcher) may call Mass211 by dialing "2-1-1" from any phone, including cell phones and when prompted dials "1-1" to speak with a Runaway Assistance Program (RAP) Specialist who can assist the officer in identifying the address of the closest Emergency Service Program (ESP) and the subsequent steps for the member to safely place the child. All contacts and placements shall be properly recorded by the member and/or the Desk Officer in the DAJ.

Delinquent Child

Delinquent Child: A child between twelve (12) and eighteen (18) years of age who commits any offense against a law of the Commonwealth; **provided, however, that such offense shall not include:**

- A civil infraction;
- A violation of any municipal ordinance or town by-law; or
- A first offense of a misdemeanor for which the punishment is a fine, imprisonment in a jail or house of correction for not more than six (6) months or both such fine and imprisonment.

Non-Secure Detention

Any juvenile who is under the age of (eighteen) 18, a status offender, or a juvenile in protective custody under M.G.L. c. 111B, § 8, shall be held in accordance with the requirements specified for non-secure detention of status offenders. These requirements are:

- The area where the juvenile is held is in an unlocked, multipurpose section, such as a report writing room or office;
- The space is in no way designed for residential use;
- The juvenile is held long enough to complete identification, investigation, and processing and then shall be released to a parent, guardian, legal custodian, other responsible adult, or transferred to an alternative juvenile facility or court;
- The juvenile is under continuous visual supervision by a sworn member until released; and
- At no time is the juvenile to be handcuffed to any stationary object.

Note: A status offender may be handcuffed, but not to a stationary object, which shall not be considered "secure detention".

Juveniles under the age of fourteen (14), status offenders, or juveniles in protective custody shall not be placed in a cell.

Secure Detention

Secure detention is defined as physically detained or confined in a room, set of rooms, or a cell that has the ability to lock an individual within. Secure detention can result from either being placed in such a room and/or from being physically secured to a stationary object such as a cuffing rail/bench. Please note that at no time is a juvenile to be secured to a stationary object.

Alternative Enforcement Considerations

Members conducting enforcement of criminal and civil violations of Massachusetts law with juveniles should use the least coercive reasonable alternative where applicable. Options for enforcement may include the following and should be based upon the totality of circumstances present at the time of enforcement action:

- Release forthwith along with no further action; or
- Issuance of citation and/or summons in lieu of custody in accordance with Massachusetts law and Department policy; or
- Custody in accordance with Massachusetts law and Department policy.

Procedures for the Detention of Juveniles

Members shall adhere to the following when detaining juvenile(s):

- A juvenile may not be held in police custody for longer than six (6) hours;
- A juvenile in Department custody should only be held long enough for members to complete the identification and booking process. Once the identification and booking process is complete, the juvenile must be:
  - Transported to the juvenile court; or
  - Released to their parent/guardian/custodian; or
  - Transferred to the custody of the Overnight Arrest Program (after 1800hrs on weeknights and anytime on the weekends/holidays).
- A juvenile who is under the age of fourteen (14) shall not be placed in secure detention for any amount of time;
- No juvenile between fourteen (14) and eighteen (18) years of age shall be placed in a cell, unless the cell has been certified by the Department of Youth Services (DYS);
- A juvenile who is securely detained in Department custody must be separated by sight and sound from adults in custody;
- A juvenile, placed in Protective Custody for alcohol, **CANNOT BE SECURELY DETAINED** for any amount of time;
- A juvenile, placed in Protective Custody for controlled substances/toxic vapors, **MUST be transported to an appropriate emergency medical treatment facility;** and
- A juvenile, placed in custody in accordance with a Child Requiring Assistance (CRA) matter, **CANNOT be brought to the barracks.**

Juvenile Arrest Delinquent Offense

When a juvenile is placed under arrest, the Troop Duty Officer, or designee, shall immediately notify at least one (1) of the child's parents, or, if there is no parent, the guardian or custodian with whom the child resides or the Department of Children and Families (DCF).

If Arrest Occurs during Court Hours	Members must complete the booking process and then transport the juvenile to the Juvenile Court of jurisdiction.
If Arrest Occurs after Court Hours	The Troop Duty Officer, or designee, will make a determination whether to release or detain the juvenile based on the totality of the circumstance present, consistent with Department policy. There is no longer a statutory requirement for the police to contact a Juvenile Probation Officer, and as such, the Probation Department has ceased its on-call program.

Juvenile Arrest Delinquent Offense, continued

If Arrest Occurs after Court Hours	Release: If a juvenile has been arrested without a warrant and the Troop Duty Officer, or designee, determines that the juvenile should be released, such release shall be done upon the acceptance of the written promise from the parent, guardian, custodian, or a representative of DCF, who will ensure the juvenile's appearance in court. The Troop Duty Officer, or designee, will ensure that members utilize the SP 122 Written Promise form to obtain the required written promise. The released juvenile shall be advised that they must appear in the Juvenile Court of jurisdiction on the next business day. The Troop Duty Officer, or designee, shall ensure that the appropriate Juvenile Court and appearance date are noted on the SP 122 Written Promise Juvenile Form. Detain: If a juvenile between fourteen (14) and eighteen (18) years of age has been *arrested on a warrant* or if the Troop Duty Officer, or designee, *requests in writing that such a juvenile be detained*, the Troop Duty Officer, or designee, shall contact the Bail Magistrate/Bail Commissioner. In accordance with M.G.L. c. 119, § 67, a juvenile age twelve (12) or thirteen (13) *who has been arrested without a warrant* is prevented from being admitted to bail and therefore must be released to a parent, guardian, custodian, or a representative of DCF.
Bail	The Bail Magistrate / Bail Commissioner will set bail and/or terms and conditions of release based on the juvenile's current charge(s), circumstances of the arrest, criminal history and/or as directed by the arrest warrant.

Juveniles in police custody must be held sight and sound separate from adult detainees.

A juvenile charged with delinquency offenses *shall not be held* in a police lockup or otherwise securely detained for any *longer than six (6) hours*. If the juvenile is placed in a cell, the cell must be a DYS certified cell. All DYS certified cells shall be posted or marked.

The requirement not to release a defendant for six (6) hours when arrested for a violation of M.G.L. c. 209A or M.G.L. c. 265, § 13M (Domestic Assault or Domestic Assault and Battery) or § 15D (Strangulation or Suffocation), ***DOES NOT apply to juveniles***.

Juvenile Arrest Delinquent Offense, continued

A juvenile in Department custody should be held only long enough for members to complete the identification and booking process. Once the identification and booking process is complete, the juvenile must be either:

- Transported to the juvenile court, or
- Released to their parent/guardian/custodian/DCF representative, or
- Transferred to the custody of the Overnight Arrest Program (after 1800hrs on weeknights and anytime on the weekends/holidays).

The best practice is for the six (6) hour clock to start when the juvenile is placed in police custody and ends when custody is:

- Transferred to the juvenile court, or
- The juvenile is released to their parent/guardian/custodian/DCF representative, or

Custody is transferred to the Overnight Arrest Program.

Juvenile Unable to Make Bail / Unable to be Released

When a juvenile has been charged with a delinquency or youthful offender offense and is unable to make bail or is unable to be released and court is closed, the Troop Duty Officer, or designee, must contact the Department of Youth Services Central Referral Line at 617-474-8150 or 617-474-8179 to coordinate DYS placement (after 1800hrs on weeknights and anytime on weekends/holidays). The Troop Duty Officer, or designee, shall ensure that DYS is provided with information regarding the juvenile's arrest and is advised of the bail amount as it relates to the bail fee and bail.

If a juvenile is being held on a bail fee only ($40.00 - Personal Recognizance), DYS has no authority to hold the juvenile in its custody. The Troop Duty Officer, or designee, shall inform the bail magistrate / bail commissioner of this and arrangements will be made to release the juvenile without imposing a Bail Fee.

- If the juvenile is in the custody of DCF, DCF shall be notified via the DCF hotline, 800-792-5200, to take custody of the juvenile.
- If a parent, guardian or custodian refuses to take custody of a juvenile who is otherwise eligible to be released, the Troop Duty Officer, or designee, shall file a 51A and notify DCF via the DCF hotline for placement.

DYS will provide the Troop Duty Officer, or designee, with the location of the Overnight Arrest Program.

- If the juvenile is *suffering from any medical condition(s)*, including, but not limited to alcohol and/or drug impairment, suicidal tendencies, UOF requiring medical attention, they *must be medically cleared prior to placement*.
- The Troop Duty Officer, or designee, is responsible for obtaining any current medications for the juvenile.
- The Troop Duty Officer, or designee, must provide a copy of the Booking Sheet prior to placement.

Juvenile Unable to Make Bail / Unable to be Released, continued

It is the Department's responsibility to transport the juvenile to the Overnight Arrest Program.

It is also the Department's responsibility to transport the juvenile from the Overnight Arrest Program to the juvenile court of jurisdiction before 0900 hours.

Protective Custody of Juveniles Present Where Controlled Substances Are Unlawfully Kept or Possessed

M.G.L. c. 94c, § 36 requires: If a police officer finds a child present where said officer finds a substance which he reasonably believes to be a controlled substance listed in Class A, B, or C of section thirty-one kept or possessed in violation of any provision of this chapter, and if the police officer reasonably believes that the child has not reached his eighteenth birthday and that the child knew of the presence of such controlled substance, the police officer may lawfully take such child into protective custody for a period not to exceed four hours. Persons having custody of a child under this section shall make reasonable efforts to notify the child's parent or guardian or other person having lawful custody. Such persons shall be considered to be acting in the conduct of their official duties and shall not be held criminally or civilly liable for such acts. A child detained pursuant to the provisions of this section shall not be considered to have been arrested or to have a criminal record for any purpose; however, only a departmental record of custody shall be made by the officer indicating the circumstances of custody. The procedures and processes provided by this section for the care, protection, and custody of children are not exclusive but are in addition to all others provided by law.

Transportation of Juveniles

Juveniles may be:

- Transported in marked or unmarked vehicles.

Juveniles shall not be:

- Transported with adult detainees; or
- Transported to court or any other institution in patrol wagons pursuant to M.G.L. c. 119, § 34.

Jenkins Hearing

If a juvenile is arrested without a warrant and held in custody (to include while being held at the Overnight Arrest Program), for more than twenty-four (24) hours, they are entitled to a Jenkins *hearing* to determine whether or not there was probable cause to make the arrest and to continue to hold the juvenile.

- If the juvenile will be held for over twenty-four (24) hours, in order to facilitate a *Jenkins* determination of probable cause to continue to hold the juvenile, the Troop Duty Officer, or designee, must call a bail magistrate / bail commissioner.
- The bail magistrate / bail commissioner that set bail on the juvenile cannot be the same magistrate/commissioner who conducts the *Jenkins* hearing.

Special Considerations

Members may have to take extra steps to ensure that juveniles understand their rights. This may include explaining or repeating the *Miranda* rights, or explaining Department procedures or juvenile court procedures to the juvenile. Refer to INV-05 Special Protections for Juveniles for procedures regarding the interrogation of juveniles.

Barracks Juvenile Officers

Station Commanders shall:

- Designate a barracks court officer as the Juvenile Officer;
- Ensure that Juvenile Officers attend specialized training, if required;
- Ensure that M.G.L. c.119, § 39H and § 67 are followed.

Filing

Station/Section Commanders shall maintain a separate, secure file accessible only by authorized personnel, containing all of the identifying data of each juvenile arrest and any related reports.

Records involving criminal charges against juveniles shall be maintained separately from other records.

Access to electronic juvenile records shall require system access limited to authorized personnel utilizing password protection.

The retention and/or expungement of juvenile records shall be governed by the Massachusetts Public Records Law and/or a valid court order. The Department shall adhere to the Massachusetts Statewide Records Retention Schedule, including the disposition of juvenile records after attaining adult age. Expungement of barracks juvenile records shall be administered by the Station Commander pursuant to Department policy in accordance with the Massachusetts Statewide Records Retention Schedule. DAS shall administer the retention/expungement of juvenile records at the Department level.

Administrative Journal Records Reporting Juvenile Detentions

The Daily Administrative Journal (DAJ) shall:

- Contain all required information except the juvenile's name, address, date of birth (DOB), and any other identifying data; and
- Under the "name" section the word "JUVENILE" shall appear, followed by a sequential number starting with "#1" for the first juvenile arrested that year.

A separate record shall be maintained that links Juvenile Arrest Journal numbers and juvenile identifying information. This record shall not be released to the public and/or media.

Dissemination of juvenile records shall be authorized by the Station Commander, and/or a Supervisor, for a legitimate law enforcement purpose or by court order. The dissemination of a juvenile record shall be recorded in the DAJ identifying the agency record released, the entity to which the record was released, and ensuring a reference to only the JUVENILE#. The DAJ shall contain only the juvenile number and no other personal data.

Subject:	Number:
Juvenile Detention	**DET-09**

Reporting Juvenile Detention

Barracks that have cells approved for juvenile use are administratively required by the Executive Office of Public Safety & Security (EOPSS) to submit a monthly lockup docket, as directed within CJIS Extranet.

EOPSS may contact a barracks that has arrested a status or juvenile offender, to ensure compliance with the applicable holding laws. EOPSS utilizes the information to monitor the Commonwealth's compliance with state law and the Federal Juvenile Justice and Delinquency Prevention Act of 1974 and 2002. All members shall assist EOPSS as requested.

Subject:	
Protective Custody	

Policy

The Massachusetts State Police shall comply with the requirements of Massachusetts General Law Chapter 111B and Massachusetts General Law Chapter 111E when taking an incapacitated person into protective custody.

Definitions

Assisting Officer: Sworn member placing a person into protective custody.

Facility: Any public or private place, or portion thereof, providing services especially designed for the detoxification of persons.

Incapacitated: The condition of a person who, by reason of the consumption of alcohol and/or a controlled substance, toxic vapor, or other substance other than alcohol, is:

- Unconscious; or
- In need of medical attention; or
- Likely to suffer or cause physical harm or damage property; or
- Disorderly.

To place a person into protective custody, an officer needs probable cause to believe that the person is incapacitated.

Intoxication alone is not sufficient to warrant a finding of incapacitation.

Juvenile: A child who has not yet attained their eighteenth (18) birthday.

Protective Custody

Pursuant to M.G.L. c.111B, § 8: Any person who is incapacitated due to consumption of alcohol may be assisted by a police officer with or without the person's consent to the person's residence, to a facility, or to a police station.

Subject:	Number:
Protective Custody	**DET-10**

Protective Custody, continued

Pursuant to M.G.L. c.111E, § 9A: Any person who is incapacitated due to consumption of substance(s) other than alcohol may be placed into protective custody by a police officer without the person's consent for the purpose of immediately transporting the person to an acute care hospital or satellite emergency facility or otherwise immediately obtaining appropriate emergency medical treatment.

Procedure for Taking Person into Protective Custody

	111B § 8 (Alcohol)	**111E § 9A (Substance other than Alcohol)**
Determination of Incapacitation is a Two-Step Process	**Step One: Assessment of Incapacitation** A person who, by reason of the consumption of alcohol, is: • Unconscious, or, • In need of medical attention, or • Likely to suffer or cause physical harm or damage property, or • Disorderly is deemed incapacitated. **Step Two: Assessment of Intoxication** *Right to a Breathalyzer Test* (BT) - Any person assisted by a police officer to a police station shall have the right, and be informed in writing of said right, to request and be administered a breathalyzer test. *Presumption of Intoxication* - Any person who has a BT of (.10) or above is presumed intoxicated. *Sobriety Testing* - If any person has a BT of .06, .07, .08 or .09, police are authorized to administer sobriety testing in order to determine whether to release or hold the person.	**Step One: Assessment of Incapacitation** A person who, by reason of the consumption of substance other than alcohol, is: • Unconscious, or, • In need of medical attention, or • Likely to suffer or cause physical harm or damage property, or • Disorderly is deemed incapacitated. **Step Two: Assessment of Intoxication** A police officer may ask a person to consent to reasonable tests of coordination, coherency of speech, and breath to determine if the person is incapacitated. A police officer may place the person into protective custody when such tests or other information or observations indicate that the person is incapacitated.

Procedure for Taking Person into Protective Custody , continued

	111B § 8 (Alcohol)	**111E § 9A (Substance other than Alcohol)**
	Release Forthwith – Unless there are pending charges or a warrant, any person who has a BT (.05) or less shall be released from custody forthwith. *However*, if a minor registers *any* BT reading, the minor must be released to a parent, guardian, or responsible adult.	
Role of Police Officer when taking a person into Protective Custody:	A police officer shall assist an incapacitated person by bringing him or her to: • That person's residence; or • A police station (will have to notify facility); or • A facility (as defined above). *NOTE:* If a person is brought to a police station, that person has the right to: • Request and be administered a breathalyzer test; and • Make a phone call.	A police officer shall assist an incapacitated person by: • Immediately transporting the person to an acute care hospital or satellite facility; or • Obtaining appropriate immediate emergency medical treatment (EMT) for the person.
Notification of Facility	If any incapacitated person is assisted to a police station, the officer in charge, or designee, shall notify forthwith the nearest facility that the person is being held in protective custody. If suitable treatment services are available at a facility, the department shall thereupon arrange for the transportation of the person to the facility. The officer in charge, or designee, shall ensure that a Daily Administrative Journal (DAJ) entry indicates: • The name of the facility notified; and • If transportation was arranged.	N/A

Procedure for Taking Person into Protective Custody , continued

	111B § 8 (Alcohol)	111E § 9A (Substance other than Alcohol)
Juveniles	The parent, guardian or legal custodian of any juvenile to be held in protective custody at a police station, shall be notified forthwith upon his/her arrival at said station or as soon as possible thereafter. Any juvenile who is held in protective custody at a police station shall, upon request of his or her parent, guardian or legal custodian, be released to the custody of said parent, guardian or legal custodian. A juvenile placed in protective custody, for alcohol, cannot be securely detained for any amount of time. Members shall ensure that detention of juveniles shall conform to General Order DET-09 Juvenile Detention.	The parent, guardian or legal custodian of any juvenile placed into protective custody shall be notified as soon as practicable. A juvenile placed in protective custody, for controlled substances/toxic vapors, must be transported to an appropriate emergency medical treatment facility.
Time Restraints	**No adult shall be held more than 12 hours** - No person assisted to a police station shall be held in protective custody against a person's will; provided, however, that if suitable treatment at a facility is not available, an incapacitated person may be held in protective custody at a police station until a person is no longer incapacitated or for a period of no longer than twelve hours, whichever is shorter.	A person cannot be held in protective custody beyond the time required to complete the transport of the individual to an acute care hospital or satellite emergency facility or to obtain immediate emergency medical treatment. Legislation does not provide a time frame for how long transport would take to be completed or medical treatment sought.
Use of Force	Reasonable force may be used to take a person into protective custody.	
Search and Inventory Items	Officers may search the person and immediate surroundings for weapons. Any items seized will be inventoried and returned if lawfully possessed.	

Procedure for Taking Person into Protective Custody , continued

	111B § 8 (Alcohol)	111E § 9A (Substance other than Alcohol)
Documentation	An entry of custody in the report narrative shall be made indicating: • The date, time, place of custody; • The name of the assisting officer; • The name of the officer in charge; • Whether the person held in custody **exercised his or her right to make a phone call**; • Whether the person held in custody **exercised his or her right to take a breathalyzer test**, **and** the **results of the breathalyzer test if taken**; and • The name of the facility notified and if transportation was arranged. An SP 850 Protective Custody form demonstrating subject was read and understood these rights must be completed.	An entry of custody in the report narrative shall be made indicating: • The date, time, place of custody; • The name of the assisting officer; • The name of the officer in charge; and • The name of the facility to which the person was transported.
Status of Protective Custody	Not an arrest	
Additional Considerations	If a member subsequently places into protective custody a subject who has been bailed after having been arrested for OUI-Alcohol, the member shall process the subject according to MGL c. 111B and this General Order. Refer also to TRF-14 Operating Under the Influence.	If a subject has been revived using naloxone ("Narcan") and has regained consciousness, it may still be appropriate to place the subject into protective custody and transport that subject for medical attention, if the training and experience of the officer indicate that further medical attention is appropriate.

Procedure for Taking Person into Protective Custody , continued

	111B § 8 (Alcohol)	111E § 9A (Substance other than Alcohol)
Additional Considerations	If a member subsequently places into protective custody a subject who has been bailed after having been arrested for OUI-Alcohol, the member shall process the subject according to MGL c. 111B and this General Order. Refer also to TRF-14 Operating Under the Influence.	If a subject has been revived using naloxone ("Narcan") and has regained consciousness, it may still be appropriate to place the subject into protective custody and transport that subject for medical attention, if the training and experience of the officer indicate that further medical attention is appropriate.

Protective Custody of Children in the Presence of Controlled Substances

According to M.G.L. c. 94C § 36, members may place a child into Protective Custody for no more than (4) four hours if:

- The member(s) reasonable believe the child has not reached their (18^{th}) eighteenth birthday; and
- The child in the presence of a Class A, B, or C of c. 94c § 31; and
- The member(s) reasonable believe the controlled substance is in violation of c. 94C § 31; and
- The child knew of the presence of the controlled substance.

Persons having custody of the child shall make reasonable efforts to notify the child's parent, guardian, or person having lawful custody. The person shall be considered acting in the conduct of their official duties and should not be held criminally of civilly liable for such acts. **Note:** A child detained pursuant to the provisions on c. 94C § 36 shall not be considered to have been arrested or to have a criminal record for any purpose. Only a Departmental record of custody shall be made by the member(s) indicating the circumstances of the custody.

Non-Secure Detention

A juvenile in protective custody under MGL c. 111B, § 8, shall be held in accordance to the requirements specified for non-secure detention. These requirements are:

- The area where the juvenile is held is in an unlocked, multipurpose section, such as a report writing room or office;
- The space is in no way designed for residential use;
- The juvenile is held long enough to complete identification and processing, and then shall be released to a parent, guardian, legal custodian, other responsible adult;
- The juvenile is under continuous visual supervision until released; and
- At no time is the juvenile to be handcuffed to any stationary object.

Note: **A juvenile in protective custody shall not be placed in a cell.** A juvenile in protective custody may be handcuffed, but not to a stationary object, and shall not be considered in "secure detention".

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**GEN-01**
Subject:	
Personal Appearance	

Policy

As the principal law enforcement agency within the Commonwealth of Massachusetts, members shall present an image of the highest standard, order, and professionalism to the public.

Members shall correct any deficiencies in their personal appearance, uniform, or equipment as soon as practicable, unless otherwise specified in this Order.

Jewelry

No jewelry, pins, necklaces, or bracelets of any kind shall be worn with the uniform. Exceptions, if conservative, are:

- Wristwatch;
- Medic Alert bracelet;
- Rings; and
- Necklaces worn discreetly beneath the shirt.

Note: Earrings shall not be worn while in uniform; however, conservative earrings may be worn by members in plainclothes assignments.

Members shall not display implants or facial/body piercing, while on duty or representing the Department. Note: In some instances, implants may be acceptable if a licensed medical practitioner requires the medical procedure and the procedure is performed under the medical practitioner's supervision.

Facial/body piercings include, but are not limited to:

- Piercing of the face, tongue, nasal septum, lips or lip plate; or
- The deliberate expansion of a healed fistula (hole in the skin) for wearing body-piercing jewelry; or
- The transdermal or microdermal implants.

Exception:
Members who are on undercover assignment may display facial or body piercings, when authorized by their Division Commander.

Hygiene and Oral Hygiene

Members' personal care shall conform to the highest personal hygiene standards.

Members, when in any uniform or representing the Department, shall ensure:

- Teeth will be clean and free of foreign debris;
- There is an appearance of a full set of teeth; and
- Missing or broken teeth and/or loose orthodontics shall be replaced or repaired as soon as possible.

Members shall not display dental/oral modifications to their teeth or mouth area while on duty or representing the Department. Note: In some instances, dental/oral modifications or procedures may be acceptable if a licensed dental or medical practitioner requires the medical procedure and the procedure is performed under their supervision.

Dental/oral modifications include, but are not limited to:

- Tongue splitting or bifurcation;
- Abnormal filing of the teeth; and
- Dental veneers or laminates ornamented with designs, jewels, initials, or any other decoration.

Cosmetics

Cosmetics, if worn, shall be:

- Subdued and blended to match the natural skin color; and
- Conservative.

No false eyelashes or unnaturally colored contact lenses shall be worn.

No fingernail polish of any color shall be used when in uniform.

Tattoos and Body Modifications

Members shall comply with General Order GEN-01A Tattoos and Body Modifications.

Hair

Hair shall:

- Be clean, neat, and well groomed;
- Not touch the top of the uniform shirt collar, at the back, when standing with the head in a normal posture;
- Not interfere with the wearing of any issued headgear; or
- Not be dyed or tinted in an exaggerated or unnatural color.

Subject: Personal Appearance	Number: GEN-01

Hair, continued

Note: Wigs or hairpieces may be worn if they conform to the above standards.

Males in Uniform:
Hair shall be:
- Either tapered or blocked at the back of the neck; and
- Tapered or blocked at the sides but may not touch the ears.

Sideburns shall be:
- Neatly trimmed and rectangular;
- Trimmed horizontally, at a right angle;
- Of even width; and
- No longer than the midpoint of the tragus of the ear.

Faces shall be clean shaven except:
- Members assigned undercover, and with the approval of the Unit/Section Commander; or
- Members with a temporary medical condition, verified by the State Police Surgeon.

Note: Members with mustaches, beards, or goatees shall not appear in uniform.

Females in Uniform:
- Hair may extend over, but not below, the bottom of the ear, nor more than two inches forward of the ear;
- Conservative ponytails, braids, hair buns, etc., may be used if secured to the head; and
- Inconspicuous hair aids that blend in with the hair may be used.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**GEN-01A**
Subject:	
Tattoos and Body Modifications	

Policy

Pursuant to GEN-01 Personal Appearance, members shall present an image of the highest standard, order, and professionalism to the public.

Members of the Department shall maintain their personal appearance to the highest standards possible and in conformance with GEN-01 Personal Appearance.

All Sworn Members

No sworn member of the Department shall have ANY tattoo, scarification or brand that is considered extremist.

Extremist tattoos, scarifications or brands are those affiliated with, depicting, and/or symbolizing extremist philosophies, organizations, or activities. Extremist philosophies, organizations, and activities are those which advocate racial, gender and/or ethnic hatred or intolerance; advocate, create, or engage in illegal discrimination based on race, color, gender, gender identity, sexual orientation, ethnicity, religion, or national origin; and/or advocate violence or other unlawful means of depriving individual rights under the U.S. Constitution, Federal, or State law.

For purposes of this policy, the above prohibition on *extremist* tattoos, scarifications or brands shall also include indecent, sexist and racist tattoos, scarifications or brands:

- *Indecent* tattoos, scarifications or brands are those that are grossly offensive to modesty, decency, or propriety; shock the moral sense because of their vulgar, filthy, or disgusting nature or tendency to incite lustful thought; or tend reasonably to corrupt morals or incite libidinous thoughts.
- *Sexist* tattoos, scarifications or brands are those that advocate a philosophy that degrades or demeans a person based on gender or gender identity, but that may not meet the same definition of "indecent."
- *Racist* tattoos, scarifications or brands are those that advocate a philosophy that degrades or demeans a person based on race, ethnicity, or national origin.

All Sworn Members, continued

No sworn member shall have a tattoo, scarification, or brand on his or her face, neck or hands (wrist to fingertips).

NOTE: This prohibition pertaining to face and hands does not apply to members who have:

- Permanent commitment band(s) on the hand(s); and/or
- Permanent eyeliner, eyebrows or lipstick, if the permanent color is conservative and compliments the complexion and uniform.

However, under no circumstances shall any sworn member be allowed to add ANY additional permanent markings to his or her face.

Effective June 22, 2020, no sworn member shall add any additional tattoo, scarification or brand, regardless of size, normally visible while on-duty in ANY authorized uniform or attire.

Applicants

All applicants seeking sworn appointment to the Department shall be screened during applicant processing to assess compliance with this General Order.

If an applicant is found to be in violation of this General Order, then the applicant may, at his or her sole discretion, have the non-compliant tattoo, branding, or body art, or visible portion thereof, removed at his or her own expense. If an applicant expresses a willingness to remove a non-compliant tattoo, branding, or body art, his or her application for appointment will be suspended until the removal process is completed and re-evaluated for compliance. Removal of any markings will not per se absolve the applicant of being deemed as having such affiliation or adherence to said philosophies, organizations or activities that may be apparent in any phase of the selection process.

No applicant shall add any additional tattoo, scarification or brand, regardless of size, normally visible while on-duty in ANY authorized uniform or attire**.**

Prior to appointment to the Massachusetts State Police Training Academy, any applicant who has tattoos/body art/brands/scarifications, normally visible while on-duty in **ANY** authorized uniform or attire, shall submit to the Division of Administrative Services / Human Resources Section for inclusion in the applicant's personnel file:

- An SP 802A Applicant Identification and Reporting of Tattoos/Body Art/Brands/Scarifications

Applicants, continued

The SP 802A must contain the following information:

- The date the tattoo/body art/brand/scarification was received;
- A description and photograph(s) of the respective tattoo/body art/brand/scarification; and
- The size and location of the tattoo/body art/brand/scarification on the member's body that is visible while wearing the Department uniform.

Body Modifications

Body modification to any area of the body that is visible while on-duty in ANY authorized uniform or attire is prohibited.

The use of gold, platinum or other dental veneers or caps for the purpose of ornamentation while on-duty is prohibited. Teeth, whether natural, capped, or veneer shall not be ornamented with designs, jewels, initials, etc.

Body piercing jewelry not concealed by any authorized uniform or approved attire while on-duty is prohibited with the exception of earrings worn in compliance with GEN-01 Personal Appearance.

- The wearing of any facial jewelry to include, but not limited to tongue piercings, lip piercings, nose piercings, brow piercings by any sworn member of the Department while on-duty is prohibited.

Exception: Members who are on undercover assignment may display facial or body piercings when authorized by their Division Commander.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**GEN-02**
Subject:	
Uniforms	

Policy

Members of the Department (members) shall maintain their personal appearance and uniforms at the highest standards possible.

Only equipment and apparel issued or authorized by the Department shall be carried or worn.

Members of the Department shall be issued required uniforms and equipment as required by their position to be worn in accordance with this policy. Uniforms and equipment shall be issued to members by the Section/Unit with oversight of said item(s) and an inventory of each item issued shall be maintained by the issuing entity.

Sworn Department members required to perform work in civilian clothing shall receive an annual clothing allowance in accordance with the Collective Bargaining Agreement for Unit 5A of the State Police Association of Massachusetts.

State Police Cadets shall wear the issued uniform in accordance with TRN-05 State Police Cadet Program and adhere to applicable sections of this policy related to uniform care and appearance.

Upon separation from service, or in accordance with Rules & Regulations, Department members shall return issued uniforms and equipment to the Supply Section.

Cruiser Operation

While operating Department vehicles, all members are required to wear the authorized uniform, appropriate business attire, or attire specifically related to their position.

Members shall display their badge of office while operating a Department vehicle. Exceptions may be allowed for:

- Members assigned to the Division of Investigative Services (DIS), Division of Homeland Security and Preparedness (DHS) or to other assignments where the member's identity should not be revealed as authorized by their Station/Section/Unit Commander.

Subject: Uniforms	Number: GEN-02

General

Supervisors are responsible for continuous line inspections to ensure that members under their control maintain a professional appearance and correctly wear the uniform.

Whenever two (2) or more members are gathered in the same location, the members shall dress the same as the Officer in Charge (OIC) or Senior
Trooper, or as otherwise ordered.

While in uniform, members shall not:

- Participate in social functions, unless authorized to do so by their Division Commander;
- Wear unauthorized or non-issued clothing, parts, medallions, ornaments, or other appurtenances;
- Wear personal headphone devices, earphone devices, or cellular phone headsets;
- Consume alcoholic beverages;
- Use tobacco in any form, smoke e-cigarettes or vape pens, chew gum, or have any foreign object protruding from the mouth when they are:
    - In view of the public; and/or
    - In formation.

Members shall not permit any non-member to wear any part(s) of any issued Massachusetts State Police uniform assigned to them.

Members shall not wear any part of the uniform while off-duty, unless authorized to do so.

Replacement of Uniforms or Equipment

When items are worn out, damaged, destroyed through normal use, or do not fit, members may turn in items to the Troop Clerk and requisition a replacement.

When items are damaged or destroyed through negligence or misuse, the member shall replace the item(s) at their own expense.

The Supply Section and/or Troop Clerk shall inspect issued uniform parts returned due to promotion or separation from service. Uniform parts that have useable life remaining may be reissued if in good working order/condition in accordance with normal issuance procedures.

Cleaning and Maintenance

- Boots, shoes, and leather shall be highly polished;
- Brass shall be clean and highly shined;
- Clothing items shall be clean, stain free, and pressed;
- Necessary alterations or repairs may be done through the Troop Clerk; and
- Whenever an occasion causes deficiencies in personal appearance, uniform, or equipment, members shall avail themselves of the first opportunity to correct the condition.

Riot Gear

All members, unless undercover, shall carry all issued riot gear in the trunk of their cruiser.

The OIC at a riot or disturbance may designate the following items as optional:

- Necktie and tie clasp, cross-strap, name tag, badge of office, whistle and chain, and gas mask; and/or
- Use of force equipment as defined in *UOF-04 Use of Force Equipment.*

Summer and Winter Uniform Dates

The Summer Uniform shall be worn from:

- April 15th through October 14th.

The Winter Uniform shall be worn from:

- October 15th through April 14th.
  Note: The Winter shirt is optional for thirty (30) days before and after this period.

Note: Staff Officers while in any uniform shall wear the garrison cover at all times.

Full Dress (Class "A") Uniform

The Class "A" Uniform is for ceremonial or dress occasions. It consists of:

- Long sleeve shirt;
- Necktie and tie clasp;
- Blouse;
- Breeches;
- Field boots;
- Duty belt with only the holster and firearm, ammunition case, baton ring, handcuff case, and the cross-strap;
- Appropriate cover (the garrison cover during winter for all members; the straw campaign cover during summer for all members, except Staff Officers who shall wear the garrison cover);
- Black or white gloves, when authorized; and
- Authorized ribbons and medals.

Sunglasses, keepers, and extra handcuffs shall not be worn with the Class "A" uniform.

For designated periods of mourning, a black badge shroud shall be worn around the badge of office.

Summer Field Service (Class "B") Uniform

- Straw campaign cover shall be worn with cord trimmed to an appropriate length (not knotted) and as follows:
  - *Troopers*: Silver hat badge and silver acorns;
  - *Non-Commissioned Officers*: Silver hat badge and silver acorns;
  - *Commissioned Officers*: Gold hat badge and gold acorns;
  - *Command Staff*: Garrison cover with gold hat badge, gold fretting, and glossy gold hat band with black leather straps removed;
- Short sleeve shirt, top button unbuttoned, no undergarments or jewelry visible;
- Slacks;
- Jump boots;
- Body Worn Camera;
- Garrison belt;
- Duty belt with keepers, holster and firearm, OC spray, handcuff case, baton ring, ammunition case, and other authorized equipment;
- Sweater (optional) tucked into slacks with badge on left chest, name tag on right chest;
- Issued outerwear (optional); and
- No ribbons or medals, except service ribbon.

If the long sleeve shirt or issued sweater is worn, a necktie and tie clasp shall be worn without the cross-strap.

Winter Field Service (Class "B") Uniform

- Garrison cover shall be worn with:
  - *Troopers:* Silver hat badge and black leather strap on front and back;
  - *Non-Commissioned Officers*: Silver hat badge and silver hat band on front with black leather straps removed;
  - *Commissioned Officers*: Gold hat badge and gold hat band on front with black leather straps removed;
  - *Command Staff*: Gold hat badge, gold fretting, and glossy gold hat band with black leather straps removed;
- Long sleeve shirt, completely buttoned, with necktie and tie clasp;
- Breeches;
- Field boots;
- Body worn camera;
- Garrison belt;
- Duty belt with cross-strap, keepers, holster and firearm, handcuff case, club ring, ammunition case, and other authorized equipment;
  - Cross-strap shall be worn diagonally across the wearer's front and back, secured directly in front of and behind the holster.
- Sweater (optional), tucked into breeches with cross strap removed and badge on left chest, name tag on right chest;
- Issued outerwear (optional);
- Black gloves and balaclava (optional); and
- No ribbons or medals, except service ribbon.

Knit caps shall not be worn with the Winter Field Service (Class "B") uniform.

Summer Field Service (Class "C") Uniform

- Straw campaign cover shall be worn with cord trimmed to an appropriate length (not knotted) and as follows:
  - *Troopers*: Silver hat badge and silver acorns;
  - *Non-Commissioned Officers*: Silver hat badge and silver acorns;
  - *Commissioned Officers*: Gold hat badge and gold acorns;
  - *Command Staff*: Garrison cover with gold hat badge, gold fretting, and glossy gold hat band with black leather straps removed;
- Short sleeve Super shirt, top button unbuttoned, no undergarments or jewelry visible;
  Or
- Armorskin ballistic vest carrier with short sleeve base shirt worn underneath, top button unbuttoned, no undergarments or jewelry visible;
- Class C Slacks;
- Jump boots;
- Body worn camera;
- Garrison belt;
- Duty belt with keepers, holster and firearm, handcuff case, club ring, ammunition case, and other authorized equipment;
- Sweater (optional) tucked into slacks with badge on left chest, name tag on right chest;
- Issued outerwear (optional); and
- No ribbons or medals, except service ribbon.

If the long sleeve Super shirt or issued sweater is worn, a necktie and tie clasp shall be worn without the cross-strap.

If the Armorskin and long sleeve base shirt and is worn, a necktie without tie clasp shall be worn tucked underneath the Armorskin without the cross-strap.

Specialty Uniforms

When authorized to do so by their Division Commander, members may wear specialty uniforms. Only members who are performing a specialized function shall wear specialty uniforms.

The Division Commander of Standards and Training, or designee, may revise the duty uniform of personnel assigned to the Academy.

Issued Uniform Parts and Equipment

The **Badge of Office** shall be:

- Prominently displayed by wearing it on the left breast area of the outer uniform garment.

The **Headgear badge** shall be:

- Worn on all campaign covers and garrison covers.

Collar insignias shall be:

- Worn on summer and winter shirts and the dress blouse only;
- Placed with the Commonwealth ornament on the right hand side;
- Placed with the troop designation ornament on the left hand side; and
- Placed one (1) inch back from the leading edge of the collar and centered between top and bottom.

Service chevrons may be:

- Worn, one (1) for every two (2) years of service; and
- Worn on the left sleeve of the blouse, pointing downward with the lowest chevron centered one and one-half (1 ½) inches above the semicircular cuff edging.
  Note: Service chevrons shall not be worn by Commissioned and Non-Commissioned Officers.

Non-Commissioned Officer stripes shall be:

- Worn on both sleeves of all shirts, (except Specialty Uniforms and/or BDU's – worn on the collar), the dress blouse and outer garments except traffic vest and rain jacket;
- Aligned so that the points of the stripes face upward;
- Positioned on the right sleeve so that the point of the highest stripe touches the bottom point of the MSP patch; and
- Positioned on the left sleeve to mirror the location of the stripes on the right sleeve.

Commissioned Officers Rank Insignia shall be:

- Worn on both shoulders of all Class B shirts, Class C Super shirts, the Armorskin ballistic carrier, the blouse, and outer garments, except traffic vest and rain jacket (Specialty Uniforms – worn on the collar); and
- For Class B, centered between the shoulder seam and shoulder strap
- For Class C Super Shirt, the rank insignia should be cut down to 1 ½ inch by 1 ½ inch and placed a ½ in from the edge of the shoulder seam (Please refer to Class C wear PowerPoint presentation found in Power DMS).
- For Armorskin Ballistic Carrier, the outside edge of the rank insignia should be placed on the edge of the inside seam of the shoulder strap (Please refer to Class C wear PowerPoint presentation found in Power DMS).

Issued Uniform Parts and Equipment, continued

Name tags shall be:

- Prominently displayed on all outer uniform garments, except rain jacket and high visibility safety apparel;
- Affixed to the lower seam edge running horizontally across the right breast and centered over the button of the shirt/blouse pocket; and
- Positioned to appear centered between the lapel edge and shoulder seam.

Tie clasps shall be:

- Worn on the tie, clipped to the shirt, and horizontally even with the name tag.

The **chain, key and whistle** shall be:

- Worn suspended from the right epaulet button and attached to the right breast pocket button on the blouse or shirt;
- Worn with the chain under the name tag; and
- Worn in the following order from the member's right: chain-key-whistle.

Issued use of force equipment, ammunition, handcuffs, and portable radio shall be:

- Carried and secured in appropriate cases on the duty belt.

The **rain jacket** shall be:

- Worn during inclement weather**,** high visibility side displayed (see *Issued High Visibility Safety Apparel* section of this General Order), except for solemn or ceremonial occasions, where the black side shall be displayed. Note: No rank insignia shall be worn on the rain jacket.

The **traffic vest**:

- See *Issued High Visibility Safety Apparel* section of this General Order. Note: No rank insignia shall be worn on the traffic vest.

Promotion Instructions

Prior to the effective date of promotion, members shall report to the Supply Section to be issued appropriate uniforms and gear related to said rank. Unless specifically detailed below, uniforms and uniform parts shall remain the same as the next highest rank.

All Ranks

Patrol Jackets

Both reversible patrol jackets should be returned to the Supply Section for an exchange or for application of new rank insignia in the appropriate location(s).

Staff Officers and Commissioned Officers

Rank Insignia

The following ranks will be issued the respective cloth and brass rank insignia:

- **Colonel:** Silver Eagle;
- **Lieutenant Colonel:** Silver Oak Leaf;
- **Major:** Gold Oak Leaf;
- **Detective Captain:** Double Silver Bars;
- **Captain:** Double Gold Bars;
- **Detective Lieutenant:** Single Silver Bar; and
- **Lieutenant:** Single Gold Bar.

Cloth Rank Insignia shall be:

- Sewn onto both shoulders of all uniform shirts, except Class C Base shirt; (positioning for Class B & C mentioned above already)

Brass Rank Insignia shall be worn on:

- Blue side of patrol jackets;
- Dress blouse; and
- Sweater.

Promotion Instructions, continued

Gold Braiding

Detective Lieutenants/Lieutenants will be issued a dress blouse with the appropriate gold braiding already affixed.

The following ranks will be issued additional gold braiding to be affixed to the sleeve of the lieutenant dress blouse, resulting in:

- **Colonel:** Four (4) rows of one-half (1/2) inch braiding affixed one-eight (1/8) inch from each other;
- **Lieutenant Colonel:** Three (3) rows of one-half (1/2) inch braiding affixed one-eight (1/8) inch from each other;
- **Major:** One-half (1/2) inch braiding, then one-quarter (1/4) inch braiding, then one-half (1/2) inch braiding affixed one-eight (1/8) inch from each other;
- **Detective Captain/Captain:** Two (2) rows of one-half (1/2) inch braiding affixed one-eight (1/8) inch from each other.

Detective Lieutenants/Lieutenants

Detective Lieutenants/Lieutenants will be issued the following:

Uniforms

- Dress Blouse with the appropriate gold braiding already affixed;
- Slacks and Breeches with two (2), one-half (1/2) inch blue braiding sewn along each pant leg; and
- Long and short sleeve shirts.

Gold Accessories

- Chain / handcuff key / whistle;
- Collar ornaments;
- Duty Belt brass; and
- Tie clasp.

Gold MSP Patches

All blue MSP patches should be removed from the current issue, except rain jacket, and replaced with the gold patches. Troop Clerks may be consulted for alteration locations.

Gold Reflective Tape for Riot Helmet:

- One (1) gold strip of tape is to be placed horizontally on the back of the helmet from rivet to rivet; and
- One (1) gold strip of tape is to be placed starting on the crown of the helmet downward to the front visor.

Sergeants

Sergeant will be issued the following:

Cloth Non-Commissioned Officer Stripes Rank Insignia with dark blue stripes and light blue background which shall be affixed accordingly:

- Sewn onto the dress blouse and onto all uniform shirts;
- Worn on both sleeves of dress blouse, and all shirts;
- Aligned so that the points of the stripes face upward;
- Positioned on the right sleeve so that the point of the highest stripe touches the bottom point of the MSP patch; and

Promotion Instructions, continued

- Positioned on the left sleeve so as to mirror the location of the stripes on the right sleeve.

  Note: Cloth Non-Commissioned Officer Rank Insignia with light blue stripes and **dark** blue background are for winter sweaters and patrol jackets only.

Silver Reflective Tape for Riot Helmet:

- One (1) silver strip of tape is to be placed horizontally on the back of the helmet from rivet to rivet; and
- One (1) silver strip of tape is to be placed starting on the crown of the helmet downward to the front visor.

Issued High Visibility Safety Apparel

High Visibility Safety Apparel is comprised of fluorescent colored background material that has retro-reflective applications affixed to it, thus providing the wearer with a high degree of visibility during both daylight and darkness.

The following Department issued apparel shall be considered high visibility safety apparel:

- High visibility yellow traffic test;
- Civilian traffic vest;
- Reversible Rain Jacket with high visibility yellow side displayed; and
- Reversible Patrol Jackets with high visibility yellow side displayed.

Department Employees (sworn and civilian) are advised that issued high visibility safety apparel shall be:

- Worn in accordance with current state and federal laws.

Specific clothing worn by certain sections of the Department may be considered high visibility safety apparel, only if the article of clothing has an American National Standards Institute-International Safety Equipment Association (ANSI/ISEA) certified label affixed to it.

The Department realizes that members performing motor vehicle stops have discretion when balancing their need to be visible to approaching traffic and their need to ensure proper patrol procedures/officer safety during the course of the motor vehicle stop.

Employees (sworn and civilian) are not required to wear high visibility safety apparel when:

- A member is performing a motor vehicle stop; or
- A civilian employee is performing functions away from the roadway and traffic areas.

However, members who choose not to wear high visibility safety apparel during motor vehicle stops shall:

- Remain vigilant and understand that they are less likely to be seen by approaching motor vehicle traffic particularly:
  - In darkness; or
  - In periods of diminished visibility due to inclement weather.

Issued High Visibility Safety Apparel, continued

Employees (sworn and civilian) wearing uniforms or plain clothes shall wear high visibility safety apparel during all hours and lighting conditions when engaged in the following activities:

- Directing traffic;
- At all road and highway motor vehicle crash scenes;
- When working at lane closures and obstructed roadways;
- On all road and highway work zones and construction details including moving details (excluding dignitary protection); and/or
- Special or significant events when ordered by the OIC.

Eye Wear

Members performing a line function and wearing prescription lenses shall have:

- Safety lenses; and
- Conservative and secure frames.

Sunglasses may be worn for outside assignments only, and shall be of a conservative style.

Department Issued Ribbons and Medals

While in Class "B" uniform, Department members who have attained ten (10) years of service shall be allowed to wear over the left breast pocket of the shirt:

- The Department issued Service Ribbon (blue/white/blue); and
- If applicable, one (1) gold star for each additional five (5) years of service to be inserted onto the white section of the ribbon.

Department issued ribbons and medals shall be worn on the Class "A" uniform over the left breast pocket of the blouse. However, if the member has military awards, the Department ribbons and medals shall be worn over the right breast pocket of the blouse.

Memorial pins, medallions, insignias, or other ornaments shall not be worn, unless authorized by the Colonel/Superintendent.

Military Ribbons and Medals

Awarded ribbons and medals issued by the U.S. Armed Forces may:

- Be worn or displayed, in military fashion, while in Class "A" uniform over the left breast pocket of the blouse.

No military ribbons or medals shall be worn or displayed while in Class "B" uniform.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**GEN-04**
Subject:	
Military Courtesy	

Policy

The Department has been a paramilitary organization since its inception; the application of military courtesies shall continue to maintain this tradition.

Salutes

Salutes shall be given when members are both in uniform and covered, unless it would interfere with the performance of duty.

Salutes shall be given to a Staff Officer or a Commissioned Officer, and be smartly and promptly acknowledged by that member. In the case of Commissioned Officers, this rule shall only apply to members of superior rank.

Salutes shall also be given to the Governor, President and Vice President.

This policy shall also apply when meeting uniformed members of other police agencies and the Armed Forces.

Salutes in Formation

Members shall salute upon a command from the Commanding Officer when:

- In formation at a halt, the commands are "Attention", then "Present Arms" and the recovery command is "Order Arms"; and
- In a moving formation, the salute is only executed by the Commanding Officer leading the formation; the command for the formation is "Eyes Right" (or left), and then "Ready Front" as the salute.

Attention

Upon entering the office of the Colonel/Superintendent, a Lieutenant Colonel, or a Major, a member shall remove their cover and stand at attention.

Subject:	Number:
Military Courtesy	**GEN-04**

National Anthem

Members in uniform shall stand at attention and salute when the National Anthem is played:

- Facing the music (unless the National Flag is displayed); and
- Starting at the first note of the anthem, continuing to the last note.

If in civilian clothes, the right hand is placed over the heart in lieu of the salute.

National Flag

Unless it would interfere with the performance of duty, uniformed members wearing the appropriate cover, shall stand at attention facing the flag and salute when:

- It passes by on all public occasions, ceremonies, parades, etc. (The salute shall be given when the flag has arrived within a distance of six (6) paces and maintained until it has passed six (6) paces beyond); or
- It is carried into any building, room, or other place where members are present; or
- It is formally raised or lowered.

If in civilian clothes, the right hand is placed over the heart in lieu of the salute.

Pledge of Allegiance

Unless it would interfere with the performance of their duty, during the Pledge of Allegiance members shall:

- Stand at attention facing the flag and salute when in uniform wearing the appropriate cover; or
- Stand at attention facing the flag and place their right hand over their heart if in civilian clothes.

Display of Flags

The Flags of the United States and the Commonwealth shall be flown at all Department facilities. The National Colors shall be flown on the flag's own right, (on the right as facing the street), and slightly higher than the Commonwealth Flag.

Flags shall be flown:

- Every day when the weather permits; and
- At night if they are directly illuminated

The National Flag shall be flown at half-staff in honor of a member who dies while in the line of duty, from the notification of death until dusk of the day of interment.

Display of Flags, continued

The Flag of the Commonwealth shall be flown at half-staff when:

- The National Flag is at half-staff;
- As ordered by the Governor; or
- As ordered by the Office of the Superintendent.

On Memorial Day, the flags should be flown at half-staff until noon, and then raised.

To display flags at half-staff, the flags should be hoisted to the peak, and then lowered to half-staff.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**GEN-04A**
Subject:	
Ceremonial Tributes	

Policy

The protocols identified within this policy shall be adhered to during ceremonial tributes honoring Department members or when attending tributes with other agencies.

Request Procedure and Authorization

The Colonel/Superintendent shall authorize final approval for all Department tributes and requests from outside agencies. The Division of Field Services shall handle implementation, unless otherwise ordered.

Ceremonial Tributes

The Department may provide the following as determined by the Colonel/Superintendent:

Line of Duty Death

- Wake – Organized police walk-by, honor guard and/or color guard detail;
- Drill and Ceremonial Unit;
- Rifle Salute;
- Mounted Unit;
- Motorcycles;
- Air Wing;
- Vocalist and bugler(s);
- Department Pipes & Drums;
- Classmates of the Deceased;
- Specialty Unit/Team to which the member belonged;
- Minimum of forty (40) members; and
- All available members of the Command Staff.

Off-Duty Death

- Wake – Honor guard at wake consisting of member's troop/section;
- Drill and Ceremonial Unit;
- Motorcycles;
- Classmates of the Deceased;

Ceremonial Tributes, continued

- Vocalist, bugler and piper;
- Specialty Unit/Team to which the member belonged;
- Minimum of twenty (20) members; and
- Division Commanders or Designees.

Death of Immediate Family Member of an Active Member (spouse, child, brother, sister, parent of member or spouse)

- Four (4) members, provided for by the member's Station/Section/Unit, to cover calling hours, funeral detail, and the procession.

Retired Member(s)

- Two (2) members to be provided by the Division of Field Services to cover calling hours, funeral detail, and procession.

Active Public Safety Officers

The Colonel/Superintendent shall determine any ceremonial tributes provided for active public safety officers killed in the line of duty.

Funeral Attendance

The Department shall attempt to allow as many on-duty members as possible to attend the calling hours and funeral services of an active member.

Members to attend calling hours and funeral services in uniform shall:

- Wear the appropriate uniform-of-the-day as indicated on calling hours and funeral services announcements;
- Be authorized, when attending off-duty, to wear the uniform-of-the-day as indicated on calling hours and funeral services announcements; and
- While inside a funeral home or church carry their headgear under their left upper arm, unless directed otherwise or when participating as a member in the honor guard.

Honor Guard

Details at funeral homes should consist of at least four (4) members. The senior member should coordinate with the family liaison. Members shall wear the class "A" uniform, with a black badge shroud and white gloves, unless otherwise directed.

Funeral Processions

Upon leaving the funeral home or church, members should:

- Cover and form two (2) lines along the path where the casket is to be carried;
- The formation shall start at the funeral home or church and end at the hearse; and
- A proper interval shall be maintained between members.

Badge Shrouds

As designated by the Colonel/Superintendent, black badge shrouds shall be worn for thirty (30) days by all members in honor of an active member who dies in the line of duty.

Black badge shrouds shall be worn by all members in honor of an active member who dies off duty, from the date of the death notification until the interment.

Black badge shrouds shall be worn by uniformed members while appearing at a funeral or memorial service for active or retired members.

Funeral Escorts

Department vehicles escorting or following the funeral procession shall:

- Be operated at a speed consistent with that of the hearse and far enough ahead of the procession to control traffic; and
- Have all the emergency warning lights activated and left on during the entire escort.

Members assigned to traffic control duties where the funeral procession is passing by shall:

- If conditions allow, stand at attention and render the hand salute while the hearse is passing.

If the escort terminates at the entrance to a cemetery, church, or funeral home, the escorting members shall:

- Stand at attention in two (2) lines, face each other; and
- Render the hand salute until the hearse has passed by.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**GEN-05**
Subject:	
Communicable Diseases	

Policy

The Department shall provide its employees with equipment and information on communicable diseases to prevent exposure to dangerous and life-threatening diseases.

For the purpose of this policy only, the term employee shall refer to both sworn and civilian members of the Department.

Definitions

Airborne Exposure: Contact with bacteria, virus, chemical, smoke, or any foreign particle suspended in the environment.

Bodily Fluid: Liquid secretions such as blood, semen, vaginal secretions, saliva, vomit, urine, and feces.

Communicable Disease: Infectious illnesses and viruses that are transmitted through contact with bodily fluids, tissue, or breath of an infected individual.

Unprotected Exposure: Any bodily fluid or tissue that comes into direct contact with a mucous membrane (e.g., eyes, nose, and mouth) or non-intact skin (e.g., cuts, chapped skin). This includes a bite from a human or animal.

Communicable Disease Prevention

All employees should assume that all persons are potential carriers of communicable disease.

When coming into contact with people or evidence where the transfer of bodily fluids is a possibility, employees should wear protective clothing and equipment to minimize their exposure to disease. This includes:

- No eating, drinking, or smoking at a scene where bodily fluids are present;
- Wear disposable gloves when administering first aid or handling anything that has been exposed to bodily fluids (double gloves should be used, if necessary);
- Wear a protective mask, eye wear, and coveralls if available, in situations where bodily fluids may come into contact with the employee;
- Use the issued plastic mouth piece or other barrier resuscitation device when performing CPR;

Communicable Disease Prevention, continued

- Use extra care when handling contaminated sharp objects (e.g., wear protective gloves when conducting a search, or when handling sharp objects);
- Use a flashlight or baton to conduct an initial sweep of areas where sharp objects may be hidden;
- For transport or storage, place hypodermic needles in leak proof, rigid, puncture-resistant, shatterproof containers (needles should not be recapped, bent, broken or removed from the syringe); and
- All employees assigned to the Mass State Police Crime Lab (MSPCL) involved in the collection and handling of evidence shall follow Communicable Disease Prevention procedures identified in the current version of the Laboratory Safety Manual.

Disinfection Guidelines

If…	Then
Any unprotected skin surface comes in contact with bodily fluids	• Immediately and thoroughly wash the affected area with hot running water and soap for at least fifteen (15) seconds before rinsing and drying; • Use alcohol or waterless antiseptic hand cleaning gel when soap and water is unavailable; • Hand lotion should be applied after disinfection to prevent chapping and to seal cracks and cuts on the skin; and • When necessary, report to a medical facility for an examination or treatment.
You are wearing disposable gloves that come in contact with bodily fluids.	• Thoroughly rinse the glove before removing; and • Hands and forearms should then be washed as described above.
Uniform or clothing comes in contact with bodily fluid.	• Remove the uniform/clothing as soon as practical; • Place the contaminated uniform/clothing in a paper bag; • Any contaminated skin area should be cleaned as described above; and • Uniforms/clothing should be marked as contaminated and cleaned by: o Laundering in the usual manner; o Turning into the Supply Clerk for an exchange; or o Disposing according to the State Sanitary Code.

Disinfection Guidelines, continued

If…	Then
A Department vehicle becomes contaminated with bodily fluids.	• The Troop Supply Clerk shall arrange for a complete cleaning and disinfection, as soon as possible.

Non-disposable equipment becomes contaminated with bodily fluids.	• Wear protective clothing when cleaning;
	• Prepare a cleaning solution containing:
	  ○ One (1) part bleach to ten (10) parts water; or
	  ○ A fungicide or a micro bacterial disinfectant.
	• Wipe excess bodily fluids with disposable absorbent material;
	• Clean equipment with the prepared solution or disinfectant;
	• Dispose of the cleaning material according to the State Sanitary Code; and
	• Follow manufacturer's guidelines for proper disinfection/cleaning procedures.

Disposable equipment, (such as cleaning materials) contaminated with bodily fluids.	• Bag and dispose of according to the State Sanitary Code.
Evidence contaminated with bodily fluids is recovered.	• Place in paper bags and clearly mark as contaminated; • Allow items to dry out; • Take additional precautions as necessary; and • Consult with Crime Services Section for proper disinfection/handling procedures.

Transport and Custody

When transporting an individual who has bodily fluids on their person or has stated that they have a communicable disease:

Position	Duties
Members shall:	• Take all precautions to minimize the possibility of exposure to the bodily fluids; • Administer necessary first aid; • Transport this individual in a separate vehicle from other people; and • Notify the Desk Officer.
Desk Officers shall:	• Appropriately isolate the person; • Notify the Troop Duty Officer; and • Document the incident in the Daily Administrative Journal.

Reporting Unprotected Exposures

Members who have had an unprotected exposure while on duty should seek immediate treatment at an emergency room. Larger hospitals and teaching hospitals are often better able to assist with potential exposures.

The exposure shall be treated as an on-duty injury, and documented under the guidelines of ADM-11B Injury Reporting and Leave. In addition, a Department of Public Health Unprotected Exposure Form shall be filled out to document the exposure and:

- Taken to the medical facility where the member(s) is being treated, and
- E-mailed to the Health Unit at Healthandfitnessunit@pol.state.ma.us.

All employees assigned to the MSPCL involved in the collection and handling of evidence shall follow the exposure procedures identified in the current version of the Laboratory Safety Manual.

Department civilian employees shall seek guidance from their immediate supervisors who shall follow the procedures for sworn members.

Supplies

All Department cruisers and/or facilities should be stocked with the following communicable disease control supplies:

- Disposable and protective gloves;
- Puncture resistant containers and plastic evidence bags;
- Barrier resuscitation equipment, goggles, and masks;
- Liquid germicidal cleaner;
- Disposable towelettes with 70% isopropyl alcohol; and
- Waterproof bandages.

Health Unit Responsibilities

The Health Unit shall:

- Advise members about communicable disease and infection control matters;
- Conduct training pertaining to communicable disease and infection control matters;
- Distribute protective clothing and equipment; and
- Develop guidelines for the use of the equipment and providing care to the public.

Responsibilities

Position	Duties
Members	• Ensure that all assigned medical supplies are properly maintained; • Keep disposable and protective gloves readily available and easily accessible; • When an on-duty incident results in an unprotected exposure, notify the Desk Officer and follow the guidelines in this policy to minimize the risk of infection; and • No member shall refuse to handle or arrest any person.
Desk Officers	• Notify the Troop Duty Officer; and • Document the incident in the Daily Administrative Journal (DAJ).
Troop Duty Officer	• Ensure that any employee who has an unprotected exposure while on-duty receives proper first aid and medical treatment; • Assign a supervisor to investigate the exposure; • Document the incident in the DAJ; and • Ensure Notice of Injury Report is submitted forthwith per ADM-11B.

Commanding Officers	• Ensure that communicable disease control supplies are made readily available to all members of their Troop/Section/Unit;
	• In the case of an on-duty unprotected exposure, ensure that the employee receives:
	  ○ Assistance in reporting the exposure;
	  ○ Continued testing for evidence of infection; and
	  ○ Any emotional assistance or counseling as required.
	• Contact the District Attorney to ascertain if criminal charges are appropriate for intentional exposures.

May 25, 2023	**GEN-06**

Subject:

Drug Testing

Policy

In order to ensure public safety and promote public trust, it is the policy of the Department to maintain a drug-free work environment.

Purpose

The following compelling reasons justify the use of drug testing:

- **Public Trust**: Members who are sworn to enforce the law cannot be deemed to be above the law;
- **Public Safety**: The public expects members to have both the physical stamina and psychological stability to properly assume and perform required duties at all times;
- **Potential for Corruption**: Contact with controlled substances and people associated with them exposes members to increased opportunities for corruption;
- **Presentation of Credible Testimony**: A member who illegally uses or abuses drugs would be subject to impeachment through proof or an admission that they violated the law;
- **Morale and Safety in the Workplace**: Every member has the right to be secure in the knowledge that all members are capable of acting in a safe and effective manner; and
- **Loss of Productivity**: The use of controlled substances, and other forms of drug abuse, seriously impair physical and mental health and result in reduced job performance.

Scope

This Drug Testing policy applies to all sworn members of the Department.

Civilian employees may refer to the Code of Conduct or Commonwealth Employment Standards found in their respective collective bargaining agreement.

Medication Notification

All members shall notify their immediate supervisor when required to use medication that has the potential to impair their job performance.

- The member shall inform his/her supervisor of the known side effects of such medication and the prescribed period of use, and shall provide documentation of same;
- The supervisor shall document this information through the use of an internal memorandum to the appropriate Division Commander/Manager and shall send a copy to the Occupational Health Unit for review by the State Police Surgeon; and
- The member may be temporarily reassigned other duties, if appropriate.

Subject:	Number:
Drug Testing	**GEN-06**

Prohibited Activity

Members are prohibited from:

- Illegally possessing any controlled substance, under either state or federal laws;
- Ingesting any unlawful/dangerous drug under either state or federal laws; and
- Ingesting any controlled substance, unless prescribed by a licensed medical practitioner and deemed legal under state or federal law.

Sanctions

Discipline for members found to be in violation of this Drug Testing policy shall be in accordance with Article 37 of the State Police Association of Massachusetts (SPAM) Collective Bargaining Agreement, the Rules and Regulations for the governance of the State Police, and MGL c. 22C.

Members who refuse to be tested when so ordered, or refuse to enter an Employee Assistance Program or Rehabilitation Program after a positive test, are subject to termination.

Drug Testing Program

Consistent with this policy, the Department has implemented a drug testing program for sworn members consisting of:

- Drug testing based on reasonable suspicion;
- Random drug testing;
- Post incident drug testing; and
- Annual/biennial physical drug testing.

Employees on extended leave may be subject to drug testing upon their return to service as determined by the Colonel/Superintendent.

Note: The terms “reasonable,” “random,” and “post incident” are defined consistent with Article 37 of the SPAM Collective Bargaining Agreement and all drug testing procedures shall be conducted in accordance with this article.

All drug testing methodologies shall be performed under the U.S. Department of Health and Human Services’ Mandatory Guidelines for Federal Workplace Drug Testing.

Subject:

Automated External Defibrillators

Policy

The Department maintains Automated External Defibrillators (AED) to help save lives. Only Department members trained in the use of AED's may operate them.

Definitions

Automated External Defibrillator (AED): An electronic device that when used may:

- Radically reduce the occurrence of disability and death associated with cardiac emergencies through:
  1) An analysis of the heart's rythm; and
  2) If necessary, administration of an electrical shock.

The supervisor of the Health and Fitness Unit shall have oversight of AED training, maintenance, and the creation of a standard operating procedure.

Care and Maintenance

Members shall:

- Follow AED procedures prescribed by the Health and Fitness Unit; and
- Ensure AEDs are not stored in unattended vehicles for any duration, where extreme temperature fluctuations may damage the device pads.

Responsibilities for Stations/ Sections with AED

AEDs are considered permanently assigned equipment to the Station/Section. Commanding Officers shall:

- Ensure annually that each device is accounted for according to ADM-30 Asset Management;
- Contact the Health and Fitness Unit for repairs, parts, batteries, or other AED associated supplies as needed if applicable; and
- Monitor AEDs on at least a monthly basis to ensure they are in working order (including checking expiration of pads and battery function)

Subject: Automated External Defibrillators	Number: GEN-07

AED Utilization

AEDs shall only be utilized by members who are trained. Members who possess AED's shall have a copy of the Health and Fitness Unit's SOP regarding use, maintenance, and reporting procedures. Follow manufacturer's recommendations for usage and American Heart Association (AHA) protocols.

Each time an AED is utilized to monitor and/or shock an apparent victim of a cardiac arrest the following procedures shall be adhered to:

Position	Duties
Utilizing Member	• Advise the Desk Officer of AED utilization; and • Before securing from their shift, complete and forward the SP 600 AED Utilization Reporting Form to the Health Unit.
Station Desk Officer	• Document the AED utilization as a Medical Assist into the Daily Administrative Journal; • Do not include the patient name or other identifiers within the entry; and • Provide the incident number to the member who utilized the AED.
Supervisor of the Health Unit	• Ensure AED protocols were followed; and • Review SP 600 AED Utilization Reporting Form.

November 10, 2021	**GEN-08**
Subject:	
Ride-Along/Observer	

Policy

The Department may allow approved ride-along/observers to accompany on-duty sworn members for educational purposes.

Requesting Permission to Observe

Requests for an observer(s) to accompany an on-duty sworn member shall be made in writing to the Troop/Section/Unit Commander and detail each observer's:

- Full name;
- Date of birth;
- Address;
- Social Security Number;
- Organization affiliation (if any);
- Date(s) of observation requested;
- Troop/Section/Unit to be observed; and
- Any special considerations (e.g. request to record, request to carry firearm).

The above information shall be forwarded via a SP 629 Massachusetts State Police Ride-Along/Observers Request and Release Form to the appropriate Division Commander. All requests for ride-along/observers and accompanying forms shall be maintained by the Division Commander's Office.

Media Requests

Requests for a ride-along for media representatives shall be referred to and approved by Commanding Officer of Media Relations.

Responsibilities

Position	Duties
Troop/Section/ Unit Commander	• Ensure a background check (including CORI) is conducted on any observer before approving any ride-along/observation; • Approve or deny the request; • Forward any SP 629 to their Division Commander; • Consult with Media Relations, if appropriate; • If approval has been granted, then assign a sworn member to handle the ride-along/observation duty; • Ensure appropriate safety precautions are taken to minimize risk and to ensure the well-being of the observer (e.g. require ballistic vest to be worn); and • Detail any conditions the observer and/or assigned sworn member shall follow.
Supervisor	• Ensure adequate scheduled staffing is available; • Ensure appropriate safety precautions are taken to minimize risk and ensure well-being of the observer; • Ensure any directives by the Troop/Section/ Unit Commander are adhered to; • Investigate any issues that may arise from an observation assignment per Department policies; and • Provide a summary of the concluded assignment to the Troop/Section/Unit Commander.
Sworn Member	• Shall conduct themselves in a professional manner; • Adhere to mandates of SUP-03 Media Relations relative to Department operations, administration and individual rights; • Carefully monitor the assigned observer(s); • Immediately report to their supervisor any injuries or issues regarding the observer(s); • Comply with directives issued by the Troop/ Section/Unit Commander; and • Provide a summary of the concluded assignment to their supervisor.

Subject: Ride-Along/Observer	Number: GEN-08

Responsibilities, continued

Position	Duties
Observer	• Sign appropriate forms as required by the Department's Legal Section; • Obey all commands and safety directives issued by the escorting sworn member; • Shall wear seatbelts while traveling in state owned vehicles; and • Agree to not electronically record the observation unless prior written approval is granted by the Troop/Section/Unit Commander and Media Relations. Note: Firearms shall not be carried, unless they are a law enforcement officer and the Troop/Section/Unit Commander has specifically approved this request.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-01**
Subject:	
Criminal Investigations	

Policy

Investigations shall be conducted on all matters of a criminal nature that fall within the jurisdiction of the Department.

Criminal Investigation

All members assigned to investigate a crime and/or criminal activity shall:

- Be responsible for the thorough and methodical investigation of assigned cases; and
- Continue the investigation until the case is:
  - Solved or otherwise closed, or
  - Until it appears that further investigation would be of no significant value;
- Comply with applicable Constitutional requirements, state and federal laws, Department policies and current case law when conducting criminal investigations that may include, but not be limited to:
  - Interviews, including field interviews;
  - Interrogations; and
  - Confessions/Admissions;
- Ensure specifically that applicable rights including, but not limited to, Miranda, access to counsel and the six hour safe-harbor rule, are applied when required in accordance with state and federal laws as well as established case law. The investigator shall explain these rights to the suspect as required by the investigation and documented by the investigator as applicable;
- Ensure that interviews and interrogations conducted by members include the administration to subjects/suspects of Miranda rights in accordance with state and federal laws as well as established case law, document the administration of the rights and, when practicable, utilize the SP-124 Miranda Rights Warning & Waiver form, Miranda rights administration is required for custodial interrogations;
- Understand and apply the provisions of Commonwealth v. Hipolito Rosario, 422 Mass. 48 (1996), regarding the six-hour safe harbor rule as they relate to the right to arraignment without delay and custodial interrogations, including but not limited to:
  - Statements shall be taken from a defendant within six hours of arrest, or at any time if the defendant makes an informed and voluntary written or recorded waiver of their right to be arraigned without unreasonable delay.
  - The period of safe harbor questioning commences on arrest and concludes six hours later without regard to when court is in session, except:
    - If the defendant is incapacitated upon arrest because of a self-induced disability (e.g., consumption of drugs), the six-hour period commences only when the disability terminates; or

Criminal Investigation, continued

  - If interrogation during the six-hour period is not possible or must be suspended for reasons not attributable to the police, such as a natural disaster or emergency, the six-hour period should be tolled appropriately.
- It is most important to recognize that, but for the exceptions just noted, the period of safe harbor questioning commences on arrest and concludes six hours later without regard to when court is in session.

- Immediately inform a detainee of an attorney's attempt to reach them and to immediately relay the attorney's message to them, including, when applicable, a message advising them not to talk to investigators. An entry into the Daily Administrative Journal (DAJ) or investigative record shall document the name of the member receiving the call, the name of the calling counsel including their Board of Bar Overseers (BBO) number and the name of the member delivering the message. (*Commonwealth v. McNulty,* 458 Mass. 305);
- Utilize audio and/or video recording of interviews and interrogations where practicable;
- Record interviews and interrogations when using interpreter services, where practicable (*Commonwealth v. Glenis A. Adonsoto 475 Mass. 497*); and
- Comply with the requirements of the member's Division in processing subjects arrested with/without a warrant to include a written report for all subjects arrested.

Arrests With/Without Warrant

Members conducting an arrest based upon a warrant shall ensure:

- Confirmation of the warrant prior to arrest in accordance with DET-01 Warrant Management;
- Notification to the barracks of jurisdiction of arrest;
- Documentation of the arrest in the DAJ or ACISS to include the assignment of an incident/case number;
- Transport to the barracks or court of jurisdiction;
- Give a true copy of the warrant to a detainee who requests a copy within six (6) hours;
- Process the arrest in accordance with Department policy; and
- Completion of a written incident report documenting the arrest.

Members conducting an arrest without a warrant shall ensure:

- Probable cause for arrest is established prior to custody;
- The detainee is advised of the arrest charge(s);
- Notification to the barracks of jurisdiction of arrest;
- Documentation of the arrest in the DAJ or ACISS to include the assignment of an incident/case number;
- Transport to the barracks or court of jurisdiction;
- Process the arrest in accordance with Department policy; and
- Completion of a written incident report documenting the arrest.

Alternatives to Arrest

Alternatives to arrest may include citations, summonses, informal resolution, warnings or referral to other agencies. Discretion to arrest or not to arrest may be guided by a totality of the circumstances articulable by the member exercising an arrest alternative. Enforcement of criminal and/or civil law shall be guided by Department policy and applicable state and federal laws.

- Circumstances where alternatives to arrest may be appropriate include, but are not limited to:
  - Arrest may aggravate community conflict or precipitate serious disorder;
  - Urgent public emergency or more serious crime necessitating immediate resource allocation/response;
  - Minor offenses where a lesser discretionary method may provide enforcement and documentation of incident(s); and
  - Medical emergencies.

Search & Seizure

Search and seizure of persons/places/objects without a warrant shall be guided by Department policy, state and federal laws, Constitutional law and current case law. This may include, but not be limited to:

- Search by consent;
- Stop and frisk of person(s);
- Motor vehicle search;
- Crime scene(s);
- Exigent circumstances;
- Inventory searches of persons/vehicles/property; and
- Other situations authorized by state and federal constitutional provisions, including but not limited to;
  - Abandoned property;
  - Open field doctrine;
  - Plain view; and
  - Search incident to arrest.

Division of Investigative Services / Division of Homeland Security and Preparedness

The Division of Investigative Services (DIS) and the Division of Homeland Security and Preparedness (DHS) shall investigate crime and/or criminal activity as determined by the Colonel/Superintendent, District Attorney or Attorney General and in accordance with their section/unit standard operating procedure (SOP).

Cases Involving Human Death

The District Attorney, upon notification of a death, directs and controls the criminal investigation, in conjunction with the law enforcement agency of jurisdiction. (M.G.L. c.38 s.4)

Criminal Investigations by Division of Field Services Members

Members assigned to the Division of Field Services may initiate criminal investigations, if warranted, in situations where criminal activity is occurring.

In cases where DFS members encounter a situation that necessitates some form of investigation, members may conduct a preliminary investigation concerning those offenses referred to or within the jurisdiction of the Department.

Members, or their supervisors, shall immediately notify through prescribed channels, the appropriate DIS section/unit or DHS section/unit when:

- Circumstances existing at the scene of the incident/offense require the application of specialized investigative techniques; and/or
- When the demands placed upon the responding member clearly exceed the scope of their investigative authority or abilities.

The Troop Duty Officer may notify the on-call person of each DIS/DHS Section/Unit for immediate assistance utilizing the on-call schedule which shall be posted to PowerDMS Documents/Calendars prior to the start of each month by each Section/Unit commander.

Criminal Investigations

<u>The first member arriving at a crime scene shall:</u>

- Make scene safety the first priority;
- Initiate medical services if needed;
- Secure and preserve the integrity of the crime scene;
- Conduct a preliminary investigation:
- Relinquish their responsibility only when directed by a supervisor or to the designated DIS/DHS investigator assigned to conduct the criminal investigation.

<u>Preliminary investigative steps may include:</u>

- Determining if a crime has been committed;
- Maintaining and protecting the crime scene;
- Observing and recording all conditions, events and remarks;
- Arrange for the collection of evidence, ensuring that evidence is not lost, destroyed, or altered in such a manner as to eliminate its probative value pending the arrival of crime scene/evidence technicians;
  - Do not move or touch physical evidence unless absolutely necessary, to ensure its preservation;
  - If physical evidence is moved, a notation shall be made of its exact location and position at the scene.
- Locating, identifying and interviewing the complainant and witnesses;
- Witnesses shall be interviewed:
  - As soon as possible and in a quiet environment, where practicable; and
- Separately to ensure independent statements; and
- Identifying, locating and interviewing/interrogating suspect(s).

Performing other duties necessary to build a solid foundation for follow-up investigators.

Criminal Investigations, continued

If the perpetrator(s)/suspect(s) has left the scene, pertinent information shall be broadcast, as soon as is practicable, utilizing all means necessary. The member(s) conducting the preliminary investigation should not rely solely on their memory, but should make field notes of all pertinent information. These notes may be subject to discovery in any criminal or civil matter, and may be subject to the Massachusetts Public Records Law, M.G.L. c. 66, § 10.

At a minimum, the following information should be recorded:

- Date and time of arrival at scene;
- Weather conditions and visibility;
- Exact location, to include addresses, distance measurements, and/or latitude/longitude when possible;
- Approximate time of the commission of the crime, when it was discovered, and by whom;
- Identity, if possible, or obtain the best available description of the criminal suspect(s);
- Description of any vehicle(s) used by suspect(s);
- Information concerning any physical evidence discovered;
- Name, address of complainant, victim and/or witnesses;
- Identity of other law enforcement officers or civilians present;
- Results of any interviews conducted and statements taken from complainant, victim and/or witnesses; and
- Any other information which may be useful in the apprehension of the perpetrator(s) and subsequent prosecution.

The member conducting the investigation shall complete a written report of the incident.

Follow-up Investigative Steps

If necessary, at a minimum, investigating officers should consider the following step(s) in order to bring the criminal investigation to a close:

- Reviewing and analyzing all previous reports prepared in the preliminary phase, departmental records, and results from laboratory examinations;
- Conducting additional interviews and interrogations;
- Seeking additional information (from other law enforcement officers, informants, etc.);
- Planning, organizing, conducting searches, and collecting physical evidence;
- Conducting search warrants in accordance with applicable Department policy, M.G.L. and current applicable case law;
- Identifying and apprehending suspects;
- Determining involvement of suspects in other crimes;
- Checking suspects' criminal histories;
- Preparing a written report documenting investigative steps undertaken; and
- Preparing cases, to include all required reports, for court presentation.

Victim/Witness Assistance

The rights of victim(s)/witness(es) of crimes shall be guided by state and federal laws as well as the Commonwealth's Bill of Rights which can be accessed at: https://malegislature.gov/Laws/GeneralLaws/PartIII/TitleIV/Chapter258B.

To the extent possible, the confidentiality of victims/witnesses and their role in case development, consistent with applicable law, shall be prioritized by investigating member(s).

Additionally, the Department shall provide appropriate assistance to victims/witnesses who have been threatened or who, in the judgment of the Department, express specific, credible reasons for fearing intimidation or further victimization. This may include seeking guidance from and/or referral to the Victim/Witness advocate of the Attorney General's Office or the District Attorney's Office assigned to the case.

Most Victim/Witness services are provided by the Attorney General's Office or the District Attorney's Office. However, nothing prevents a member of the Department from providing victim/witness assistance during the preliminary investigation including:

- Providing referral information verbally or in writing to the victim/witness about applicable services, e.g., medical attention and victim advocacy;
- Advising the victim/witness about what to do if the suspect or the suspect's companions or family threatens or otherwise intimidates them;
- Informing victims/witnesses about the case number and subsequent steps in the processing of the case;
- Providing a telephone number that the victim/witness may call to report additional information about the case or to receive information about the status of the case; and
- Providing notification to the victim/witness of the suspect(s) arrest, the charges, the suspect's custody status and changes thereto.

Victim/witness assistance may be provided by a member of the Department during the follow-up investigation including:

- Re-contacting the victim/witness periodically to determine whether needs are being met, if in the opinion of the agency, the impact of a crime on a victim/witness has been unusually severe and has triggered above-average need for victim/witness assistance;
- Explaining to victims/witnesses the procedures involved in the prosecution of their cases and their role in those procedures, if not an endangerment to the successful prosecution of the case;

Victim/Witness Assistance, continued

- Scheduling line-ups, interviews, and other required appearances at the convenience of the victim/witness and, at the option of the agency, providing transportation, if feasible; and
- Returning promptly victim/witness property taken as evidence (except for contraband, disputed property, and weapons used in the course of the crime), where permitted by law or rules of evidence if feasible.

Operation Plans, Documentation & Reports

All investigative activities, including actions taken, shall be documented in an investigative report or application for legal process. This includes, but is not limited to; surveillance, execution of search/arrest warrants, undercover and/or confidential informant purchases of illegal narcotics, decoy operations, or interviews, as well as information obtained as a result of said actions.

Operation plans for actions, including but not limited to, search/arrest warrant executions, undercover or confidential informant narcotics purchases, or decoy operations should be filed when practicable through the appropriate chain of command unless articulable, extenuating circumstances dictate otherwise. Supervisory notification of said activities shall be made in advance, or as soon as practicable, of said activities in situations prohibitive of filing a formal operations plan.

Surveillance operations involving multiple agencies or law enforcement members beyond the Department should be filed through the appropriate chain of command.

Investigating members are strongly encouraged to document their observations during the course of an investigation. All relevant facts and information shall be included in the investigative report.

All documented observations shall be preserved by the individual member and shall be made available upon request of a supervisor.

Vice/Narcotics/ Organized Crime

Information received related to vice/narcotics/organized crime activities shall be recorded and maintained according to the receiving Station/Section/Unit consistent with other reports of criminal activity. The State Police Detective Unit (SPDU) of jurisdiction shall be notified of criminal activity of this nature that is beyond the scope of the receiving Station/Section/Units investigative capability.

Referral to MSP Station/Section/Units or outside agencies shall be documented in the DAJ or ACISS.

Information received from outside agencies shall be documented and routed to the SPDU of jurisdiction for further investigation as warranted.

The Station/Section/Unit Commander of the investigating unit shall ensure case information of a sensitive or extraordinary nature is provided, as

Vice/Narcotics/ Organized Crime, continued

warranted, and/or available to the Division Commander and/or Colonel/Superintendent.

Designated Rooms for Interviews and Interrogations

- Firearms and Electronic Control Weapons (ECWs) shall not be carried on a member's person during interviews and interrogations, excluding field interviews;
- Care should be taken to ensure that the interview/interrogation room is secured and free of items or hazardous materials that may be utilized to aid the escape of a detainee;
- Equipment necessary to conduct the interview/interrogation should be available in the room prior to initiating the interview/interrogation;
- Audio/video recording of interviews/interrogations shall be in accordance with federal/state statutes and regulations, current case law and Department policy;
- The minimum number of law enforcement personnel will be allowed in the interview/interrogation room and commensurate to the crime committed/investigated;
- Members utilizing said rooms shall have their portable radio on or other means of direct communication with the desk officer or another law enforcement member outside the room;
- Prior to the interview/interrogation, the room should be searched and cleared of any items that could be used as a weapon; and
- The individual being interviewed/interrogated should be provided access to restrooms, water, and/or comfort breaks as circumstances dictate.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-01A**
Subject:	
Case Management	

Policy

Case management is an ongoing process involving all members of the Department. Proper case management facilitates the scope and direction of an investigation, in addition to providing documentation for the Department and court proceedings.

Station/Section/Unit Commanders shall screen cases for investigation to include, but not be limited to:

- Screening of preliminary information received to determine the need for a follow-up investigation;
- Solvability factors related to individual cases to determine the continuation or suspension/termination of investigative efforts; and
- Assignment of personnel and resources to each individual case.

Complaint/ Information

All criminal information, including but not limited to, information relating to vice, drugs, and organized crime that is reported to the Department shall be evaluated for appropriate action. Minimum information required from the original source should include:

- Name;
- Address;
- Telephone number(s);
- Date of birth; and
- Nature of the complaint.

Routine handling of this information shall be relayed to the State Police Detective Unit (SPDU) of jurisdiction, a specialized unit within the State Police, or the local police department of jurisdiction.

Case Management

Case management is an ongoing process involving all members, and is used to maintain records in each case file including, but not limited to, preliminary investigative reports, records of statements, records of arrests, the results of examinations of physical evidence, and case status.

Minimum Complaint Information

For the Division of Field Services (DFS), every case assigned or initiated shall be entered into the Daily Administrative Journal (DAJ) to be maintained by all Stations/Sections/Units. Minimum complaint information to be generated and/or entered shall include:

- Incident number;
- Date of entry;
- Investigating member;
- Complainant's name and address;
- Nature of complaint; and
- If applicable, date and Department section/unit to which the investigative report was forwarded.

For the Division of Investigative Services (DIS) and the Division of Homeland Security and Preparedness (DHS) every case assigned or initiated shall be entered into ACISS Case Management. Barracks utilizing ACISS Case Management shall follow the minimum complaint information requirements of DIS/DHS. Minimum complaint information to be entered shall include:

- Date Initiated;
- Case Officer;
- Case Type;
- Case Description
- Case Status (open/closed/pending/suspended etc.); and
- Case Synopsis within the Case Initiation Report.

Case Number

For DFS barracks utilizing RAMS, all case numbers shall be generated by RAMS.

For Stations/Section/Units utilizing ACISS, all case numbers shall be generated by ACISS.

Case Responsibility

Assignment of a case shall be to a single member who shall:

- Be responsible for the reports on the case;
- Account for evidence; and
- Coordinate the investigative activity and information.

This does not preclude the assignment of additional personnel, nor does it impede the ability of the supervisor(s) to direct investigative efforts or reporting.

Case File

Department Stations/Section/Units shall maintain a case file system utilizing the case number as the primary filing method.

The accessibility to ACISS case files is based on the value assigned to the Case Dissemination field. The accessibility of RAMS case files is all users.

Records and reports relating to active vice, drug, and organized crime investigations shall be securely filed within ACISS case management, separate from the Department's central records system.

Case Dissemination

Within ACISS, Case Dissemination is the method for distributing case information after it has been created. Such dissemination will affect the security of the case. The main classifications of Case Dissemination are:

- **System Wide**: the record is visible to any operator in ACISS Web, regardless of their assignment or the record's assignment;
- **Chain of Command**: the record will be secured according to assignment within the security model. The only operators who can view the case are the Case Lead law enforcement officer, operators listed in the Additional Authorized Users screen, and anyone who has the appropriate security clearance for the case; and
- **Hidden**: the record will be treated as a hidden entity and follow existing access rules for hidden entities. Hiding a case also hides the reports within the case but does not hide Core Entities related to the case.

Case File Retention/ Purging Procedures

All case reports/records/files generated within or uploaded to ACISS or RAMS will be perpetually maintained electronically unless a court order directs the purging of particular case files.

Purging of any other records or case files shall be in compliance with the Secretary of the Commonwealth's retention schedule. Questions on file retention and purging shall be directed to the Department's Legal Section.

Hard copies of case files shall be maintained in secure areas with access limited to authorized personnel. Each MSP facility Officer-in-Charge shall be responsible for the secure storage of hard copies located therein. The central records facility of Department General Headquarters shall be secured and accessible only to authorized personnel. After-hours access shall be authorized and facilitated by the OIC of each facility and limited to members with the lawful authority to access said record(s).

Case File Retention/ Purging Procedures, continued

Release of and/or access to records shall be limited to Department members with an identified investigatory reason for accessing said record(s). Access outside of this limitation shall only be for a lawful reason with the approval of the Station/Section/Unit OIC.

Release of records to requesting law enforcement agencies shall be at the discretion of the OIC of the Department's facility of jurisdiction.

Release of records to the public shall only be made through a formal public records request to be filed with the Massachusetts State Police Legal Section / Public Records Unit. Exceptions to this requirement are provided in SUP-03 Media Relations.

Review/ Approval Process

Reports shall be:

- Reviewed by the reporting member for completeness and accuracy prior to submission;
- Reviewed by a supervisor after submission for completeness and accuracy prior to approval; and
- Returned to the investigating member for further investigation if necessary.

Case Suspension

Station/Section/Unit Commanders shall:

- Approve a request to suspend a case by recommendation of the case member when:
  - Every reasonable avenue of investigation has been pursued and exhausted;
  - There is a lack of further leads or solvability factors;
  - Investigative resources are unavailable due to current workload; and/or
  - The seriousness of the crime is insufficient to justify continued investigative efforts.
- Ensure that the suspension does not preclude the case from being reopened for any reason.

Note: Certain cases due to their serious nature are not eligible for suspended status (e.g., murder, rape, armed robbery).

Subject:	Number:
Case Management	**INV-01A**

Case Termination

Only the Station/Section/Unit Commander shall approve requests to close a case and should consider, at a minimum, the following criteria in determining if a case merits termination:

- Seriousness of criminal offense;
- Availability of investigative resources;
- Unfounded complaint;
- Complainant's refusal to cooperate;
- Referral to another agency;
- Declination by prosecutor;
- Adjudication completed; and
- Administrative closing.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**INV-02**
Subject:	
Confidential Informants	

Policy

The Department shall develop and use confidential informants, as well as other sources of information, as a means to detect, investigate, and prosecute violators of state and federal law.

Definition

Confidential Informant (CI): A person who provides specific information to a Department investigator, and wishes to keep his/her identity confidential.

This does not include "concerned citizens" who provide information on an informal or casual basis.

Special Circumstances

Certain persons should not be used as informants, except in special circumstances with the approval of the Unit Commander. Such persons include:

- Juveniles (a child who has not yet attained their eighteenth (18) birthday), without parental, guardian or legal custodian's approval;
- Persons wanted on warrants;
- Persons with a criminal record for perjury; or
- Persons with a history of serious mental disorder or defect.

Precautions shall be taken to protect the reputations and safety of CIs and investigators. Some CIs may require additional precautions:

- Addicts- should be carefully supervised and controlled;
- Parolees- should be avoided whenever possible. Parolees are prohibited from associating with felons and approval from the CI's parole officer is required.

Note: When meeting with CIs of an opposite sex or sexual preference, members shall ensure that at least two (2) members are present.

Registration of Informants

When a person indicates a willingness to cooperate and provide information, the Unit Commander or designee shall:

- Interview the person as soon as practicable;
- Investigate the background and suitability of the potential CI; and
- Forward the name and biographical data to the appropriate Detective Captain or Major for entry into the Confidential Informant Database.

The Detective Captain/Major shall:

- Check the CI's name against the Undesirable Informant List; and
- Notify the Unit Commander if the CI is currently cooperating and/or assigned to another section/unit.

The recruiting investigator shall:

- Prepare an SP 405 Informant Information Report when the person is approved to be a CI;
- Keep a copy of the SP 405 within the Unit; and
- Debrief the CI regarding their knowledge of other crimes.

Protecting Informant's Identity

The law recognizes the government's privilege not to reveal the identity of a CI. Protecting the identity of all CIs from disclosure is an important factor for two reasons:

1. The CI's safety from retaliation on the part of the criminals they helped implicate; and
2. Disclosure of their identity would prevent the CI from assisting on future investigations.

However, the privilege is not absolute, and should be respected as far as reasonably possible consistent with fairness to a defendant.

Informant Management

Units using CIs shall maintain a file for each CI, in a locked and secure location accessible only to the Unit Commander or designee. This file shall include:

- Code Name and Code Number designations;
- Biographical and background information;
- Criminal history records;
- SP 404 Standard Agreement Statement; and
- Other information deemed necessary by the Unit Commander.

Unit Commanders shall:

- Periodically review and evaluate all CIs' work performance, usefulness, reliability, desirability and records of payment;

Informant Management, continued

- Meet on a semi-annual basis with all registered informants, both confidential and named, and their controlling officers;
- Submit a determination of the status of the informant in writing to the Division of Investigative Services (DIS) Commander or Division of Homeland Security and Preparedness (DHS) Commander by January 15th and June 15th of every year; and
- Upon the termination of an informant, submit in writing to the DIS Commander or DHS Commander the reason for such termination.

Expenditures

Unit Commanders shall ensure expenditures related to a CI be recorded:

- On a SP 406 Confidential Expenditure Fund Voucher; and
- On a SP 407 Confidential Expenditure Fund Log as outlined in INV-02A Confidential Funds.

Unit Commanders shall:

- Not be required to maintain a SP 407 Confidential Expenditure Fund Log when assigned to the Office of the Attorney General, a District Attorneys Office, or a federal task force where there is an internal mechanism for tracking such Confidential Funds.

Undesirable Informants

The primary handler shall submit a report detailing the CI's undesirable conduct to their Unit Commander whenever a CI:

- Endangers officer safety;
- Deliberately gives false or misleading information; or
- Is otherwise determined to be undesirable for use as a CI.

The Unit Commander shall submit to the appropriate Detective Captain/Major:

- Documentation when a CI is terminated for being undesirable;
- A copy of the applicable SP 405; and
- A copy of the primary handler's report.

The Detective Captain/Major shall:

- Place the CI on the Undesirable Informant List maintained by DIS and DHS.

Promises to Informants

Members may:

- Inform the District Attorney or other agencies of the information provided by the CI and the investigation results;

Promises to Informants, continued

- Make recommendations to a District Attorney's Office, probation officer, or other criminal justice agency for a disposition on behalf of the CI; and
- Not make any promises to a CI concerning the outcome of a pending court case.

Note: The disposition of court cases is in the province of the District Attorney's Office and the Judiciary.

Precautions

Interactions and conversations with CIs should be kept to the minimum necessary for effective investigation purposes. Whenever possible and practical, meetings with CIs shall be:

- Attended by two (2) members; and
- With prior notification of the Unit Commander or a supervisor, or as soon as practicable after the meet.

A member who interacts with a known CI, when not on duty or not during the course of an investigation shall:

- Notify their supervisor as soon as practicable; and
- Document the reason for such interaction in the CI's file with a written report.

Whenever practicable, a CI should not report to the Unit's office in order to protect their identity and the identity of other undercover members. CIs shall not:

- Be introduced to more than a minimum number of undercover members, to ensure that CIs gain as little information as possible concerning undercover operations and unit activity.

Any member who uncovers information that a CI has engaged in unauthorized criminal activity shall immediately notify their Unit Commander or designee.

The Unit Commander or designee shall:

- Conduct an immediate evaluation of the information and take such action as they deem necessary; and
- Make every effort to prosecute the CI involved in any unauthorized criminal activity.

Search Warrants

Search warrant applications and their accompanying affidavits containing information from a CI shall be reviewed and approved by a supervisor before filing the application with the court of jurisdiction.

Subject: Confidential Informants	Number: INV-02

Division of Field Services

Members assigned to Field Services who are seeking to use an individual as a CI shall advise their Station Commander.

The Station Commander shall:

- Contact their Division Commander through channels for authorization to manage and register the CI; or
- Contact the appropriate DIS Unit Commander or DHS Unit Commander.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**INV-02A**
Subject:	
Confidential Funds	

Policy

Confidential funds may be used to further investigations, and shall be carefully monitored and supervised.

Expenditure of Confidential Funds

Confidential funds may be derived from the funding mechanisms of the Department, the Office of the Attorney General, and the respective District Attorneys' Offices. Grant monies, forfeiture funds, and funds from state and federal government agencies can be used as payment, if such use is not prohibited by state or federal law.

A Unit Commander may maintain a Confidential Expenditure Fund Account. Access to this account shall be restricted to the Unit Commander and/or supervisors.

The Unit Commander may expend monies from a Confidential Expenditure Fund Account for the following investigative purposes:

- The procurement of evidence;
- Payment to a registered confidential informant for information related to a current documented investigation actively being conducted by the Department;
- Investigative expenses; and,
- The purchase of consumable supplies and other equipment in furtherance of an investigation.

Members shall record expenditures from confidential fund accounts on a SP 406 Confidential Expenditure Fund Voucher and shall include the following information:

- Date of expenditure;
- Amount expended; and
- Supervisor's signature.

Members shall ensure the following information is also recorded on the SP 406 where applicable:

- Signature of the member, a witnessing member and the CI confirming receipt of funds.

Note: CI may use real or assumed name when signing receipt.

Subject: Confidential Funds	Number: INV-02A

Expenditure of Confidential Funds, continued

Unit Commanders shall maintain a SP 407 Confidential Expenditure Fund Log reflecting:

- The transaction number (expenditures only, from the SP 406);
- The amount of expenditure or deposit; and
- The balance of the account.

Accounting and Audits

Prior to the transfer of a Unit Commander, there shall be reconciliation of the accounting records and of the monies on hand with the incoming Unit Commander.

Each quarter, Unit Commanders shall review, evaluate, and analyze all records of expenditures to ensure funds are being used in a cost-effective manner.

An internal audit of all accounting records and accounting practices shall be conducted annually by the appropriate Division Commander.

An audit of Confidential Funds files may be conducted as directed by the appropriate Division Commander or as directed by the Colonel/ Superintendent.

Exceptions

Unit Commanders shall not be required to maintain a SP 407 Confidential Expenditure Fund Log under the following conditions:

- Members who are assigned to the Office of the Attorney General, a District Attorneys' Office, or a federal task force; and
- An internal mechanism exists for tracking Confidential Funds.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-03**
Subject:	
Prescription Monitoring Program	

Policy

Only members designated by the Department may access or use information contained within the Prescription Monitoring Program. Access to the system must be pursuant to a bona fide, specific controlled substance investigation or a related criminal investigation.

Any member, who violates this policy and/or state regulations related to the Prescription Monitoring Program may face disciplinary action, as well as loss of access to the Prescription Monitoring Program.

Purpose

The purpose of the Prescription Monitoring Program is to assist health care providers and investigative agencies in addressing drug diversion and the misuse and abuse of pharmaceutical controlled substances.

The Prescription Monitoring Program is a computer-based system that collects prescription data submitted by pharmacies on most prescriptions for controlled substances in Schedules II through V.

Massachusetts General Laws (MGL) c. 94C §24A established the Prescription Monitoring Program within the Department of Public Health (DPH) effective January 1, 2011. The DPH shall, upon request, provide data from the Prescription Monitoring Program to local, state and federal law enforcement or prosecutorial officials working with the Executive Office of Public Safety and Security engaged in the administration, investigation or enforcement of the laws governing prescription drugs; provided, however, that the data request is in connection with a bona fide, specific controlled substance or additional drug-related investigation.

Access to the Prescription Monitoring Program

The Department shall:

- Authorize sworn members assigned to the Division of Investigative Services (DIS) and the Division of Homeland Security and Preparedness (DHS) to access and use information obtained via the Prescription Monitoring Program in accordance with state regulations.

According to state regulations, any member granted access to the Prescription Monitoring Program shall:

- Successfully complete any and all required training; and
- Not share their passwords or codes with any other person.

Subject:	Number:
Prescription Monitoring Program	**INV-03**

Use of Data From the Prescription Monitoring Program

Data ascertained from the Prescription Monitoring Program:

- May only be used in furtherance of the official Department investigation for which it was requested;
- May only be shared with authorized personnel from other law enforcement agencies or with state and federal prosecutors who are working on the matter for which it was requested; and
- Shall not be disseminated to others.

Designated members are:

- Allowed to use the Prescription Monitoring Program and the associated data only in connection with the bona fide specific controlled substance related criminal investigation for which it was requested.

Members shall not use the data or information from the Prescription Monitoring Program:

- For the furtherance of any illegal act, including violation of any criminal or civil laws or regulations;
- For any political or commercial purpose;
- To libel or otherwise defame any person(s); or
- For any matter other than the one for which it was requested.

Prior to accessing the Prescription Monitoring Program, the member shall:

- Notify their supervisor;
- Open an investigation;
- Obtain a Department Case Number; and
- Write a short narrative that includes information leading to the belief that prescription drugs are being diverted for illegal purposes.

Supervisor Responsibilities

Responsibilities of DIS and DHS Supervisors shall include:

- Ensuring that members under their command comply with the provisions of this policy and MGL c.94C §24A;
- Monitoring members' use in order to ensure compliance; and
- Notifying the Prescription Monitoring Program Administrator when a designated member transfers from the unit.

References MGL c. 94C §24A.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**INV-05**
Subject:	
Special Protections for Juveniles	

Policy

Courts recognize the vulnerability of children. The Department shall ensure that juveniles are afforded special protections during interrogations.

Definitions

Interested Adult: An adult in a position, where he or she is an advocate or has the best interest at heart for the juvenile. The adult shall be eighteen (18) years of age or older and preferably be a parent or legal guardian, or an adult sibling, relative, friend, or attorney.

Juvenile: A child who has not yet attained his or her eighteenth (18) birthday.

Juveniles and Miranda

The duration of questioning and the number of members present should be as minimal as possible both to prevent a coercive atmosphere and to protect the juvenile's rights.

Before proceeding with a custodial interrogation of a juvenile, Miranda Warnings shall be given in accordance with the following table, and in the presence of the juvenile, their parent, guardian, or other interested adult.

The juvenile shall then be allowed to have a meaningful consultation with the adult. Written waivers are preferred.

If the Juvenile's Age is…	Then…
Under twelve (12) years of age.	No criminal charges can be filed. They shall not be questioned, unless a parent or interested adult is present.

Juveniles and Miranda, continued

If the Juvenile's Age is…	Then…
Twelve (12) years of age and not yet attained his or her fourteenth (14) birthday.	Criminal charges can be filed. The juvenile shall not be questioned, unless a parent or interested adult is present. The interested adult and the juvenile must have an actual opportunity to discuss their rights in private. Moreover, police *must* honor any request by the juvenile or adult to meet privately. Questioning can only commence when the juvenile and the adult indicate that they understand the rights and the consequences of waiving these rights; and when the juvenile expressly waives his or her rights.
Fourteen (14) years of age, but not yet attained his or her eighteenth (18) birthday; and a parent or interested adult is not available after reasonable efforts are made to contact them.	Criminal charges can be filed. The juvenile must be given the opportunity to have a meaningful consultation with an interested adult before he or she can waive Miranda rights. The best practice dictates that the interested adult and the juvenile be given the opportunity to confer in private. Moreover, police *must* honor any request by the juvenile or adult to meet privately. However, a statement *may* be taken if the juvenile demonstrates a high degree of intelligence, experience, knowledge, or sophistication in understanding the Miranda warnings and the consequences of waiving his or her rights and expressly waives his or her rights.

Subject: Special Protections for Juveniles	Number: INV-05

Special Considerations

Members may have to take extra steps to ensure that juveniles understand their rights. This may include explaining or repeating the Miranda rights, or explaining Department procedures or juvenile court procedures to the juvenile.

Other factors to consider are the juvenile's level of schooling, maturity, history of interaction with the juvenile justice system, and any mental or emotional conditions.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-07**
Subject:	
Non-Published Telephone Numbers	

Policy

Telephone company records shall only be obtained when necessary for the furtherance of a criminal investigation or in an emergency.

Statutes

Administrative Subpoena: Issued in the form of a demand letter for telephone company records and may only be authorized by the Attorney General or District Attorney of jurisdiction. Massachusetts General Laws (MGL) c.271, §17B.

Electronics Communications Privacy Act: Limits access to certain records maintained and stored by a common carrier such as a telephone company. The act sets forth the requirements needed to obtain such records. (18 USC, §2703)

Authority For Obtaining Records

In order to obtain telephone records, authority may only be granted by:

- Administrative subpoena authorized by the Office of the Attorney General or District Attorney of jurisdiction;
- State or federal grand jury or trial subpoena;
- State or federal warrant;
- State or federal court order; or
- Consent of the customer or subscriber to such disclosure.

Records Available

When a member has reasonable suspicion to believe that the service of a common carrier is being or may be used for an unlawful purpose, they may request, through the Office of the Attorney General or the District Attorney's Office of jurisdiction an administrative subpoena for release of records from the common carrier to include, but is not limited to:

- Listing of a non-published telephone number;
- Listing of all optional services;
- Telephone toll records and optional services;
- Telephone services, including non-published numbers; and
- A copy of the contract, listing, and monthly bills for a cellular phone and electronic paging.

Subject:	Number:
Non-Published Telephone Numbers	**INV-07**

Procedure

Members shall submit a request through proper channels to the Attorney General or District Attorney requesting a subpoena for the required information.

The request shall:

- Detail the grounds for the member's belief that the telephone is being used for an unlawful purpose; and
- Include the case number and the signature of the member's Commanding Officer.

Members shall also follow any written directives promulgated by the Office of the Attorney General or the District Attorney's Office of jurisdiction to request telephone records.

Members not assigned to the Office of the Attorney General or a District Attorney's Office shall contact, through proper channels, the appropriate State Police Detective Unit (SPDU) Commanding Officer for assistance in determining the policy of the respective jurisdiction.

Emergencies

Troop Duty Officers or Unit Commanders may authorize members to contact the Directory Assistance Operator in emergency situations, such as a serious motor vehicle accident or threat of imminent harm. The member shall:

- Request the operator contact the non-published customer; and
- Inform the customer to call back the member.

This alternative shall not be used to facilitate investigative inquiries, such as attempting to locate a witness.

Reports

Non-published numbers obtained pursuant to a criminal investigation shall be properly documented in the record of investigation in order to:

- Provide the information to the Criminal Information and Intelligence Section; and
- Eliminate duplicate requests to the common carrier, when possible.

When a non-published number is included in a report it shall be clearly noted as such, so that it is not released to the public via the record of investigation.

References: MGL c.271, §17B;
18 USC, §2703.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**INV-08**
Subject:	
Criminal Intelligence	

Policy

The Department shall share criminal intelligence among the criminal justice community in an effort to prevent and control crime while protecting the privacy and constitutional rights of individuals.

Definitions

Content Validity: Refers to the accuracy or truth of the information.

Criminal Information: Raw data, gathered by law enforcement agencies in the normal course of performing their duties, which is maintained as directed by statute or policy.

Criminal Intelligence Information: Information that has been evaluated and determined to be of value to criminal investigations.

Criminal Intelligence System: The equipment, facilities, and procedures used for the receipt, storage, exchange, dissemination, and analysis of criminal intelligence information.

Need-to-Know: The necessity to obtain or receive criminal intelligence information in the performance of official responsibilities as a law enforcement authority.

Reasonable Suspicion: When information exists that provides sufficient facts to believe that there is a reasonable possibility an individual or organization is involved in a definable criminal activity or enterprise.

Right-to-Know: The legal authority to obtain or receive criminal intelligence information pursuant to a court order, statute, or case law.

Source Reliability: Refers to the reliability of the source of the information.

Security

Criminal intelligence information shall be stored in a criminal intelligence database that prevents unauthorized access.

The criminal intelligence database shall provide an audit trail that tracks:

- What intelligence was accessed;
- Who accessed the intelligence; and
- The date and time when the intelligence was accessed.

Collection

Criminal intelligence information shall only be collected and maintained if there is reasonable suspicion to believe that an individual, group or organization is involved in criminal activity and the information is relevant to criminal conduct or activity.

Electronic surveillance shall only be conducted in accordance with all applicable state and federal regulations.

Photographic surveillance shall only be conducted in an effort to identify individuals or groups who are believed:

- To have participated in criminal activity;
- To be planning criminal activity; or
- Are currently engaged in criminal activity.

Each criminal intelligence submission shall be attributable to a credible source. All criminal intelligence information shall be forwarded to the Criminal Information and Intelligence Section (CIIS), as soon as possible, using one of the following methods:

- Direct Entry: Information entered by an authorized member into the criminal intelligence database directly from an authorized Department computer; and
- Indirect Entry: Information entered by CIIS on behalf of a member who does not have authorized access to the criminal intelligence database.

Note: CIIS may be contacted for guidance, clarification, and additional support to facilitate criminal intelligence submissions.

Collection, continued

Members who submit information for entry into the criminal intelligence database shall classify the source(s) as:

- Completely Reliable: The source is unquestioned or has been tested successfully in the past; or
- Usually Reliable: The source can usually be relied upon. The majority of information provided in the past has proved to be reliable; or
- Unreliable: The source has been determined to be unreliable in the past; or
- Reliability Unknown: The source cannot be judged. Its authenticity or trustworthiness has not yet been determined by either experience or investigative corroboration.

Members who submit information for entry into the criminal intelligence database shall classify the validity of the information as:

- Confirmed: Has been corroborated by an investigator or another reliable independent source; or
- Probable: Is consistent with past accounts; or
- Doubtful: Is inconsistent with past accounts; or
- Cannot Be Judged: Validity of the information cannot be judged, or its authenticity has not yet been determined.

Note: A source classified as "Reliability Unknown" combined with a content validity rating of "Cannot Be Judged" would not meet the burden of reasonable suspicion for inclusion into the criminal intelligence database.

Information concerning individuals or organizations not reasonably suspected of criminal activity that is entered into the criminal intelligence database, shall be marked as "non-criminal identifying information."

Restrictions

Information and criminal intelligence shall not be collected or developed solely on the basis of an individual or group's:

- Support of a particular cause;
- Race;
- Color;
- Religion;
- Gender;
- National origin or ancestry; or
- Political affiliation.

Information pertaining to the above listed factors shall only be collected and maintained if the information directly relates to criminal conduct, and there is reasonable suspicion that the subject is or may be involved in criminal activity.

Subject: Criminal Intelligence	Number: INV-08

Dissemination

Submitting Department entities are responsible for the review and evaluation of data entered into the criminal intelligence database and establishing dissemination levels. Criminal intelligence information shall only be disseminated:

- In the furtherance of an authorized law enforcement activity;
- To authorized law enforcement or criminal justice personnel; and
- On a "need-to-know" and "right-to-know" basis.

Review/Purge

Intelligence information held within the criminal intelligence database shall be:

- Reviewed on a continual basis;
- Purged when found to be obsolete or inaccurate; and
- Purged when information has not been updated or verified for five (5) years from date of entry.

The Commanding Officer of CIIS, when determining whether or not to purge intelligence records contained within the criminal intelligence database shall:

- When feasible, contact the member or agency which contributed the intelligence information to determine if any additional intelligence may be added to update the record;
- Purge the record from the system if there is no additional intelligence;
- Ensure only an administrative record of the purge is maintained; and
- Ensure there is no record of the original criminal intelligence information maintained within the system.

Polygraph Examinations

Policy

The Department shall use the polygraph with great selectivity, and then, only as an investigative tool.

Polygraph Examiners

Department Polygraph Examiners shall be designated by the Colonel/ Superintendent.

Polygraph Examiners must be graduates of institutions providing certified training for this purpose.

Restrictions on Polygraphs

In general, an employer cannot require, request or suggest that an employee or job applicant take a polygraph within or outside the Commonwealth. (Massachusetts General Laws (MGL c.149, §19B).

Polygraph examinations may not be used for any person applying for employment. Department recruit applications shall contain the following notice:

"It is unlawful in Massachusetts to require or administer a lie detector test as a condition of employment or continued employment." (MGL c.149, §19B(2)(b).)

At present, polygraph evidence is inadmissible in criminal trials and may not be used in a criminal trial for any purpose. (Commonwealth v. Mendes, 406 Mass.201, 212 (1989)).

Polygraph Examinations	**INV-09**

Administering an Examination

Under MGL c. 149, §19B law enforcement agencies are permitted to administer a polygraph examination when the polygraph is requested as part of a criminal investigation.

Submission to the polygraph examination must be a voluntary act on the part of the examinee, and the voluntary nature of the exam does not invalidate the constitutional rights of the examinee.

Prior to an examination, the examinee shall sign:

- A statement of voluntariness; and
- A witnessed waiver of any rights against the Polygraph Examiner and the Department.

Polygraph Examiners should include a copy of their certificate/qualifications in each case file, and if technical tools are used, they should be used in accordance with the examiners training.

Requesting an Examination

To request an examination, Department members shall contact the Polygraph Unit through appropriate channels.

Any requests from local, state or federal agencies shall be referred to the Polygraph Unit. The Polygraph Unit may decline to conduct an examination.

It is the responsibility of the requesting agency to provide the background of the case and transportation of the examinee to and from the place of examination.

Preparing for an Examination

The member requesting the examination is responsible for providing the Polygraph Examiner with pertinent information concerning the case including:

- Information that supports and justifies the use of the polygraph;
- Investigative reports;
- Evidence available and withheld from the subject;
- Background information on the subject;
- Statements made by the subject, complainants, and witnesses including alibis; and/or
- Newspaper articles or other general information concerning the case.

Members shall not:

- Interrogate a subject immediately before they are to take a polygraph; or
- Attempt to explain procedures that shall be used in the examination.

Subject:	Number:
Polygraph Examinations	**INV-09**

Internal Investigations

No member of the Department shall be subjected to a polygraph examination for a violation of written directives, except in cases of alleged criminal conduct.

Department Polygraph Examiners shall not be required to conduct examinations on members of the Department.

The Commander of the Polygraph Unit shall establish reciprocal agreements with other State Police agencies for examinations, when warranted, and as approved by the Colonel/Superintendent.

Department members may assist other state and local law enforcement agencies with internal investigations that involve allegations of criminal wrongdoing. Requests for examinations shall:

- Be in writing; and
- Contain a statement that the polygraph is for a criminal investigation.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-10**
Subject:	
Evidence Collection and Preservation	

Policy

The Department shall ensure that evidence is properly recognized, documented, collected, packaged, and stored; and shall ensure that a documented chain of custody is established for evidence recovered at every crime scene. Training shall be required for employees in the proper collection methods of evidence related to their assignment.

All evidence that comes into the possession of a member shall be entered into the evidence control function prior to the end of the member's shift unless exigent-documented circumstances prevent the return, or entering, of said evidence. In the event of an exigent-documented circumstance, the evidence shall be entered in at the next most practicable time. Such delay and the steps taken to safeguard the evidence in the intervening time shall be documented in the incident/investigative report. A descriptive inventory of the evidence shall be made verbally to the Troop Duty Officer, who shall then document it in the Daily Administrative Journal (DAJ). The Troop Duty Officer shall be the approving authority for any documented delay.

Definitions

Chain of Custody: The record documenting the location and person in control of evidence from the time of its collection to final disposition.

Evidence Room: Facilities used by the Department to store and preserve evidence.

Crime Lab Services

The Massachusetts State Police Crime Laboratory (MSPCL) provides forensic services to the Commonwealth. Members of the MSPCL are divided into several different units or sections and are trained and equipped to recognize, document, collect, preserve, and process many types of evidence and are available 24/7 to provide required services.

Crime Scene Response Unit (CSRU) is a unit comprised of forensic scientists available to respond to crime scenes. Services rendered shall be documented. Services include, but are not limited to:

- Documentation, collection and preservation of biological (DNA) evidence including blood, semen, and saliva;
- Documentation, collection and preservation of gunshot residue and trace evidence such as hairs, fibers, and paint; and
- Documentation, collection, preservation, and analysis of bloodstain patterns.

Crime Scene Services Section (CSSS) assists with the recognition, collection, processing, preservation, and documentation of many types of physical evidence. Services rendered shall be documented. Services include, but are not limited to:

- Documentation of crime scenes through photographs, videos, diagrams, and sketches;
- Collection and processing of footwear, tire track impression evidence, and latent print evidence; and
- Collection and preservation of other types of physical evidence.

Firearms Identification Section (FIS) is available to respond to crime scenes: Services rendered shall be documented. Services include, but are not limited to:

- Documentation, collection, and preservation of firearms and related evidence.

Other Services

Cyber Crime Unit is assigned to the Division of Homeland Security (DHS) and assists with the recognition, collection, preservation, and examination of computers and other digital evidence devices (e.g., cell phones, cameras, and digital storage media). This unit can provide field assistance by drafting search warrants for digital evidence crime scenes and digital evidence seizures.

Collision Analysis & Reconstruction Section (CARS) assists with the technical analysis of crash scenes. Services include:

- Documentation of crash scenes through diagrams and sketches;
- Documentation, collection, and preservation of crash-related evidence, including vehicle components such as airbags, lamps, tires, and bumpers;
- Vehicle inspections, including the documentation, collection, and preservation of Airbag Control Modules (ACM), Powertrain Control Modules (PCM), and vehicle media systems; and
- Forensic mapping and diagramming of crime scenes through the use of Unmanned Aircraft Systems (UAS).

Arriving at a Crime Scene

Evidence of a criminal nature may be encountered at any incident or call. When arriving at a scene, members should consider the nature of the incident or crime, the jurisdiction, and their investigative authority in the context of recovering evidence of a crime.

Subject: Evidence Collection and Preservation	Number: INV-10

Arriving at a Crime Scene, continued

Members arriving at a scene shall:

- Attempt to identify and control any dangerous situations or persons while bearing in mind the safety of the public and the officer;
- Ensure that medical attention is provided to injured parties;
- Take care when removing the injured or rendering the scene safe and secure; and
- Be mindful that any action taken may affect or alter a potential crime scene and should be documented; and
- Establish boundaries beyond the initial scope of the crime scene perimeter with the understanding that boundaries can be reduced, but cannot be easily expanded.

Crime Scene Evaluation

When a scene requires specialized investigative and forensic units, responding members shall:

- Secure the scene and treat the area as a crime scene;
- Evaluate the nature of the event or crime and the resources required to effectively respond to the situation; and
- Preserve the scene with the goal of preventing contamination and disturbance of potential evidence.

Members shall:

- Notify the Desk Officer or appropriate supervisor of all actual or potential crime scenes;
- Request assistance through the Desk Officer from other patrols, supervisor(s), investigative, or forensic units as necessary;
- Document and relay to appropriate supervisory, investigative, or specialized personnel relevant activities and observations made; and
- Document in an investigative report all information related to the crime scene including the notification of specialized units.

Desk Officers shall:

- Notify the Troop Duty Officer of complex crime scenes that require specialized assistance.

Troop Duty Officers shall:

- Request the assistance of specialized units when the scene requires skills or equipment beyond those of the initial responding member(s); and
- Document the specialized unit(s) notifications in the DAJ/ACISS.

Crime Scene Command and Control

Responding members shall:

- Remain in charge of the scene until command is transferred to a supervisor or to the responding specialized unit(s);
- Continue to provide assistance until released; and
- Document activities while at the scene and include these in a written report.

Subject: Evidence Collection and Preservation	Number: INV-10

Crime Scene Perimeter and Control

Members responding to a crime scene shall:

- Establish a crime scene perimeter;
- Establish boundaries beyond the initial scope of the crime scene perimeter with the understanding that boundaries can be reduced, but cannot be easily expanded;
- Control access to the scene to authorized personnel only; and
- Document the names of all persons who accessed the scene.

Recovery of Evidence

Crime scenes shall be documented prior to processing and searching. Documentation may include:

- Written description;
- Photographs and videos;
- Sketches and diagrams; and
- Three-Dimensional High Definition Surveying.

Members may collect any evidence that does not require assistance from specialized units. Members shall take steps to minimize the handling of evidence. Members shall:

- Wear gloves during evidence collection;
- Understand that when gloved, the handling of evidence may destroy or damage latent fingerprint and DNA evidence; and
- Package evidence in a manner to preserve and prevent spoilage or contamination.

All evidence shall include a detailed description and recovery location. The item labels shall be recorded on the outside of each packaged item and include:

- The case identifier/number;
- Seizing member's name and identification (ID) number;
- The date, location of seizure, and description of the item(s); and
- Initiation or continuation of a documented chain of custody on all evidence.

When multiple items are recovered from a single location, members shall sequentially number items for identification purposes.

When personnel from specialized units collect evidence, they shall adhere to their respective policies and directives.

Recovery of Evidence, continued

Members shall take appropriate precautions when collecting or storing biological matter or chemical substances that may pose serious health risks if handled improperly or unprotected.

- Evidence requiring refrigeration collected outside of the MSPCL operating hours shall be transferred to the locked refrigeration unit located in the Troop HQ of jurisdiction unless otherwise directed by a specialized unit Supervisor. This transfer shall be documented utilizing the appropriate chain of custody forms with notations in the DAJ of both the sending and receiving locations as well as notification to the evidence officer of the sending location;

The MSPCL provides evidentiary guidelines on the proper methods to collect and package different types of evidence. Members may contact the MSPCL for guidance on proper evidence collection and preservation.

Crime Scene Special Circumstances

DNA Evidence

Crime scenes often contain items of evidence that may be amenable to DNA testing.

- MSPCL CSRU should be contacted to assist at scenes when biological screening services are required or when assistance with biological evidence collection is needed.
- Members on scene shall be properly trained in and employ practices to prevent potential contamination of DNA evidence. Such practices include but are not limited to the use of proper Personal Protective Equipment, minimizing personnel within the scene, and collecting and packaging items of evidence using materials appropriate for the preservation and storage of biological material. (Refer to MSPCL Information Papers for proper packaging guidelines).

Photography and Video recording of Crime Scenes

Most crime scenes are documented by MSPCL CSSS. When alternative documentation is needed, the following steps should be followed:

- Take establishing photographs (overall), to depict the location using street signs, addresses, or other geographical information when possible.
- Take overall photographs of the exterior of the crime scene.
- Take overall photographs of the interior of the crime scene.
- Assign unique identifiers to items of evidentiary value when determined appropriate by scene personnel. Take additional photographs that include these markers.
- Take mid-range and close-up photos of items of interest.

Crime Scene Special Circumstances, continued

- Close up photographs for comparative quality photographs should include a scale and be taken with the film plane of the camera parallel to the evidence.
- Any photo or video documentation shall be noted in the scene report.
- Photo or video documentation evidence shall be processed in accordance with established procedures pursuant to policy, section/unit SOP, and applicable statutory/case law.

Fingerprinting of Crime Scenes

In cases where processing for latent prints is required, members shall utilize the services of the CSSS. In many instances, the evidence may be documented, collected, and submitted to the MSPCL for processing according to this policy.

DNA Collection of Known Source

- Materials and substances should be considered for collection from a known source for submission to the MSPCL for comparison with physical evidence collected.
- Collection of known source standards for DNA analysis shall be done in accordance with MSPCL procedures. Officers performing collection shall be trained by MSPCL personnel prior to performing these collections.

Evidence

Station/Section/Unit Commanders shall be responsible for receiving, storing, maintaining, releasing, and accounting of all evidence.

Commanders shall ensure that:

- Evidence is placed into the evidence room or other authorized secure location prior to the end of the member's shift;
- A written report detailing a full accounting of the property/evidence, the circumstances by which the property/evidence came into the agency's possession is completed;
- When analysis is required, evidence is promptly submitted to the appropriate facility;
    - Items with evidentiary value that are too large to be secured in the temporary evidence locker should be photographed to memorialize the original evidentiary state and be stored in an area that is secure and maintains the integrity of the evidence prior to processing.
- Evidence is packaged and labeled according to specific evidentiary requirements consistent with Department policy and MSPCL recommendations;
- Efforts are undertaken to identify and notify the owner or custodian of property in the agency's custody;
- Establish procedures for the temporary and final release of property items from the control of the property and evidence function;

Evidence, continued

- Evidence that comes into the possession of the Department that is of an exceptional, valuable, and/or sensitive nature shall require additional security measures based upon the real and/or recognized value including alternative authorized storage and/or Supervisory notification as necessary; and
- The temporary and final release of evidence shall be guided by court order.

Any member who recovers or receives evidence to be placed in the evidence room shall have evidence documented at the appropriate station using appropriate Department forms and recorded in the DAJ. The inventory shall be witnessed and shall include the following information for all items of evidence:

- Description of the item (including make, model number, and serial number, if any);
- Source (from whom or location obtained); and
- Name of person primarily responsible for collecting the item or items.

Evidence Lab Submission

For evidence being submitted to the MSPCL, members shall refer to the MSPCL Information Papers listed in the reference section below, accessible via https://www.mass.gov/how-to/submit-evidence-to-the-crime-lab, and contact the MSPCL Evidence Control Unit to schedule an appointment. Evidence shall be hand delivered to the MSPCL.

Submissions of drug evidence shall be accompanied by SP 295 Drug Submission Form.

Submissions of non-drug evidence shall be accompanied by the MSPCL Evidence Submission Form.

A copy of the police report should be provided at the time of submission, if available, or as soon as possible.

Receipts of evidence submission shall be obtained from the MSPCL by the submitting officer.

May 25, 2023	**INV-11**

Subject:

Controlled Substance Intake-Storage

Policy

The Department shall establish rigid protocols for all controlled substances held within its custody to preserve the integrity of the Department and its personnel.

Controlled substances shall not be stored in vehicles or personal storage areas. Members who come into the possession of controlled substances shall transport said controlled substances directly to their Station/Section/Unit for entry into the Evidence/Contraband/Property (ECP) control function. Exceptions to direct transport shall be guided by this policy.

All ECP that comes into the possession of a member shall be entered into the ECP control function prior to the end of the member's shift unless exigent-documented circumstances prevent the return, or entering, of said ECP. In the event of an exigent-documented circumstance, the ECP shall be entered in at the next most practicable time. Such delay and the steps taken to safeguard the ECP in the intervening time shall be documented in the incident/investigative report. A descriptive inventory of the ECP shall be made verbally to, and documented in the DAJ by the Troop Duty Officer, who shall be the approving authority for any documented delay.

A written report detailing a full accounting of the ECP and the circumstances by which the controlled substance(s) came into the Department's possession shall be completed, including the submission of affiliated evidence/property forms.

Through the assignment of responsibilities, processing procedures, storage requirements and continuous inspections, all levels of command shall ensure strict compliance with established controls and this policy.

Definitions

Chain of Custody: The record documenting the location and person in control of ECP from the time of its collection to final disposition.

Controlled Substances: All narcotics, drugs, and substances listed in Massachusetts General Laws (MGL) Chapter 94C.

Department Evidence Officer: A member appointed by the Colonel/Superintendent as the Narcotics Inspection Unit Commander who shall to act as custodian of all controlled substances seized in the course of any arrest or investigation by the Department.

Definitions, continued

ECP Custodian: Station/Section/Unit Commander responsible for receiving, storing, maintaining, releasing, and accounting of all evidence, contraband, found, unclaimed and abandoned property within their facility.

Narcotics Central Evidence Locker (CEL): A secure location located within the State Police Troop of Jurisdiction. Each CEL is staffed by the Narcotics Inspection Unit personnel. NIU personnel assigned to the CEL shall have direct control and responsibility for the handling, storage, and security of controlled substances seized by members located within their Troop Jurisdiction.

Narcotics Inspection Unit (NIU): The unit shall exercise administrative control and supervision of procedures concerning the marking, recording, storage, handling, disposal, and destruction of all controlled substances obtained or seized by members of the Department.

NIU Bunker: Narcotics Locker located at the State Police General Headquarters used to store controlled substances that have been transported from a Station/Section/Unit or Central Evidence Locker and are awaiting trial, destruction, or disposal.

Temporary Controlled Substance Evidence Locker: Temporary limited access storage area/locker within Department facilities for controlled substances that come into the possession of the Department.

Responsibilities

Position	Responsibilities
Narcotics Inspection Unit Commander	• Assume responsibility and duties specified in MGL c.94C, §47A, as the "Evidence Officer" for the Department; • Shall have command and control of the Narcotics Locker (NIU Bunker) located at General Headquarters; • Maintain oversight and/or access to all Department Temporary Controlled Substance Evidence Lockers.
Troop/Section Commanders	• Ensures the security and safeguarding of all controlled substances held in all Stations/Sections/Units under their command.
Station/Section/Unit Commander	• Has the responsibility as the "ECP Officer" of their Station/Section/Unit; • Has direct control and responsibility for the handling, storage, and security of controlled substances seized by members under their command; • Retains responsibility of all controlled substances and ensures adherence to Department Policy and Procedures; • Ensures that members under their command are trained and familiar with the appropriate handling and storage of controlled substances; and

Responsibilities, continued

	• Notifies the NIU or CEL forthwith to make arrangements for the transportation of the controlled substances according to NIU procedures. In addition, Station/Section/Unit Commander may: • Delegate the duties of the ECP Officer to any member under their command; and • Designate that member to serve as the "Assistant ECP Officer" for that Station/Section/Unit.
Investigating Member of Controlled Substance(s)	Upon arrival at the Station/Section/Unit the Investigating Member shall: • Log the controlled substance(s) into the Station/Section/Unit Daily Administrative Journal and in the Temporary Controlled Substance Evidence Locker Journal; Prior to the end of their shift the Investigating Member shall: • Tag each item or place each item in a Department Evidence bag with the information listed below. o Defendant's name(s); o Defendant's DOB; o Case number; o Date seized; o Location where seized; and o A brief description of the item, listing the quantities on the evidence packaging and chain of custody form. **NOTE:** Controlled substances to be submitted for testing shall be packaged separate from other ECP that *does not* require testing. • Indicate whether the controlled substance(s) have been transferred: o Directly to the ECP Officer, NIU Unit Commander/designee; or o The controlled substance(s) have been placed in the Temporary Controlled Substance Evidence Locker with entries made into the Temporary Controlled Substance Evidence Locker Journal. • Ensure that the SP 295 Drug Submission Form is completed. Note: See Controlled Substance Storage Area within this policy for controlled substances that are too large to fit into the Temporary Controlled Substance Evidence Locker.

Station/Section/ Unit ECP Officer

The Station/Section/Unit Commander or ECP Officer shall:

- Maintain the Temporary Controlled Substance Evidence Locker Journal issued by the Narcotics Inspection Unit;
- Ensure the Temporary Controlled Substance Evidence Locker Journal is kept near the Temporary Controlled Substance Evidence Locker;
- Check the Temporary Controlled Substance Evidence Locker Journal and Temporary Controlled Substance Evidence Locker during their shift for items that may have been deposited;
- Contact NIU and/or the CEL when controlled substances have been seized and are in the Temporary Controlled Substance Evidence Locker; and
- Ensure that the controlled substances are properly labeled and packaged by the Investigating Member and that they have completed the SP 295.

Note: Access to Controlled Substances placed into Division of Field Services Barracks Temporary Controlled Substance Evidence Locker shall be limited to the NIU Commander or designee.

Note: Assistant ECP Officers shall perform duties as directed by the Station/Section/Unit Commander.

Controlled Substance Storage Area

Temporary Storage

Each Station/Section/Unit shall:

- Be provided with a Temporary Controlled Substance Evidence Locker with twenty-four (24) hour access to all authorized personnel;
- Allow for the temporary secure storage of controlled substances; and
- Have available a Temporary Controlled Substance Evidence Locker Journal to enter all pertinent information.

The ECP Officer shall:

- Ensure that the Temporary Controlled Substance Evidence Locker remains securely locked at all times; and
- Prevent access to unauthorized personnel.

Permanent Storage

Permanent Storage of controlled substances shall:

- Be stored at the CEL of jurisdiction and the NIU Bunker with access limited to authorized personnel; and
- Not be stored in vehicles or personal storage areas.

Note: For training purposes, controlled substances may be stored at the Troop Headquarters K-9 Aid Storage Lockers with prior approval from the Troop Commander. These controlled substances shall be inspected and audited in accordance with the guidelines of this policy.

Guidance for Unusual Value or Size

The CEL of jurisdiction and/or the NIU Commander shall be called immediately for instructions and assistance when:

- Seized controlled substance evidence is too large to fit in the temporary Controlled Substance Evidence Locker; and
- When any marijuana plants are seized.

Controlled Substance Storage Area, continued

The ECP Officer shall:
Make arrangements with the NIU and/or the CEL of jurisdiction for the storage of items of significant value or unusual size that meet the following criteria:

Narcotics	Quantity
Marijuana	50 pounds or more
Cocaine	18 grams or more
Heroin	18 grams or more
Tablets/Pills	Approximately 1000 or more of Class A, B or C
Fentanyl	18 grams or more
Methamphetamine	18 grams or more

Controlled substances that appear to meet the above criteria shall:

- Not be held for more than seventy-two (72) hours at any Temporary Controlled Substance Evidence locker or CEL unless authorization is granted by the NIU Commander;
- Be documented on the appropriate forms/reports as "An Undetermined Amount of a Suspected Controlled Substance Pending Official Documentation from the Massachusetts State Police Crime Lab (M.S.P.C.L); and
- Be stored at the NIU Bunker at General Headquarters. If possible, the controlled substance should be submitted to the Crime Laboratory for analysis prior to being secured at the NIU Bunker.

The ECP Officer or Investigating Member shall:

- Notify the NIU or CEL forthwith to make arrangements for the transportation of the controlled substances according to NIU procedures.

Chain of Custody

Change In the Chain of Custody

The Investigating Member shall:

- Complete the SP 295; and
- Ensure the SP 295 is attached to controlled substances involved in a temporary change of possession outside the custody of the Station/Section/Unit ECP Officer.

Any change in the chain of custody of controlled substances shall:

- Be considered when controlled substances are required at judicial proceedings and are transferred to the Investigating Member from the Station/Section/Unit ECP Officer, CEL or NIU;
- Have entries made on the SP 295 and in the Temporary Controlled Substance Evidence Locker Journal (if applicable). In the event that additional space is required to accommodate entries on the SP 295 , additional SP 295's shall be used and recorded as "Page 1 of 2, Page 2 of 2 etc."; and
- Require copies of the SP 295 be retained and distributed as indicated on the form.

Chain of Custody, continued

Handling or Transporting Controlled Substances

Each time controlled substances are handled or transported, members shall:

- Ensure the presence and condition of the controlled substance by examining the material without opening closed containers or breaking any seals;
- Obtain the signature of the receiving party; and
- Document the date and location on the SP 295.

Inspection of Control Substance Packaging

All members involved in the movement of controlled substances at either the Station/Section/Unit, CEL or, NIU level shall:

- Inspect the packaging for signs of tampering; and
- Immediately notify the Station/Section/Unit Commander and the NIU Commander if the packaging appears to have been tampered with.

The Station/Section/Unit Commander shall:

- Notify through channels the Division of Standards and Training and request that an investigation be conducted.

Control Substance Packaging Opened

When any controlled substance evidence is opened during a court proceeding:

- A SP 655 Court Order to Open Secured and Closed Narcotic Evidence form shall be generated and kept with the opened evidence;
- The SP 655 shall include the name of the judge who requested it to be opened; and
- The SP 655 shall be signed by the Presiding Judge that ordered the evidence opened, or by either the Assistant District Attorney (ADA), or the Clerk Magistrate of the Court.

Note: The ECP Officer may complete the SP 655, however it shall only be signed by a judge, ADA, or clerk magistrate.

Inspections

Troop/Section/Unit Commanders shall:

- Conduct monthly line inspections of all Temporary Controlled Substance Storage areas under their control to ensure compliance with journal entries and access controls.

The NIU shall:

- Annually, or as directed by the Office of the Colonel/Superintendent, conduct official, unannounced, and random inspections of all Department Permanent Controlled Substance Storage Lockers to ensure compliance;
- Issue a written report with its findings and observations regarding the inspection conducted;
- Send a copy of this report to:
  - The Troop/Station/Section/Unit Commander (if applicable),
  - The supervisor of the CEL inspected; and
  - The NIU Commander

The Office of Professional Integrity and Accountability (OPIA) may:

- Conduct periodic checks of all Department Controlled Substance Lockers to ensure integrity of the system.

Subject: **Controlled Substance Intake-Storage**	Number: **INV-11**

Training

Station/Section/Unit ECP Officers, CEL and NIU personnel may:

- Be required to attend specified training conducted by the NIU Commander; and
- Include classroom and/or online academy training.

Audits

Whenever a new ECP Officer or Assistant ECP Officer is designated, an audit of controlled substances held in the temporary or permanent storage areas shall be conducted jointly with the outgoing and incoming ECP/Assistant ECP Officer. The results shall be documented in the Daily Administrative Journal. In the event no controlled substances are present due to a chain of custody transfer to the NIU, said audit shall document same.

Subject:

Evidence/Contraband/Property Intake-Storage

Policy

The Department shall establish procedures for all evidentiary, found, seized, recovered, impounded, abandoned, or unclaimed property including contraband held within its custody to preserve the integrity of the Department and its personnel. A written incident report shall document the circumstances by which said evidence/contraband/property (ECP) came into the Department's possession and detail each item including the submission of affiliated evidence/property forms.

All ECP that comes into the possession of a member shall be entered into the ECP control function prior to the end of the member's shift, unless exigent-documented circumstances prevent the return, or entering, of said ECP. In the event of an exigent-documented circumstance, the ECP shall be entered in at the next most practicable time. Such delay and the steps taken to safeguard the ECP in the intervening time shall be documented in the incident/investigative report. A descriptive inventory of the ECP shall be made verbally to, and documented in the Daily Administrative Journal (DAJ)/ACISS log by the Troop Duty Officer, who shall be the approving authority for any documented delay.

All levels of supervision shall ensure compliance with established procedures within this policy regarding processing, storage requirements, and audits/inspections.

Controlled substance seizure procedures shall adhere to INV-11 Controlled Substance Intake-Storage.

Currency seizure procedures shall adhere to INV-14 Seized Currency.

Definitions

Chain of Custody: The record documenting the location and person in control of evidence/contraband/property from the time of its collection to final disposition.

Contraband (excluding controlled substances): May be property that is not in and of itself unlawful for a person to acquire or possess; however may have been acquired by the Department because of its use in an unlawful activity or manner, because of its nature, or due to circumstances surrounding the person who acquired or possessed it.

Note: Contraband in these instances shall be evidentiary and documented when applicable according to *INV-10 Evidence Collection and Preservation*.

Definitions, continued

Evidence/Contraband/ Property (ECP): Items in the possession of the Department to be held in a secure manner. Includes all evidence, contraband, found, unclaimed and abandoned property.

ECP Custodian: Station/Section/Unit Commander responsible for receiving, storing, maintaining, releasing, and accounting of all evidence, contraband, found, unclaimed and abandoned property within their facility.

ECP Temporary Storage: Temporary limited access storage area/locker within Department facilities for ECP that comes into the possession of the Department.

Evidence Room: Facilities used by the Department to store and preserve ECP in a secure manner with limited access.

Found Property: Non-evidentiary property in the custody of the Department which has been determined to be lost or abandoned and is not known or suspected to be connected with any criminal offense.

Unclaimed/Abandoned Property: Any property with no known owner in the custody of the Department.

Responsibilities

Position	Duties
Troop/Section Commanders	• Ensure the security and safeguarding of all ECP held in all Stations/Sections/Units under their command.
Station/Section/Unit Commander	• Shall be designated as the "ECP Custodian" of their Station/Section/Unit; • Shall be responsible for receiving, storing, maintaining, releasing, and accounting of all ECP in accordance with this policy; • May delegate the duties of the ECP Custodian to any member under their command and designate that member to serve as the "Assistant ECP Custodian" for that Station/Section/Unit; • When applicable, make arrangements with the appropriate facility for: o ECP testing or analysis; and o Firearms to be tested by the Department's Firearms Identification Section. • Shall transport, or designate the Assistant ECP Custodian to transport, any item requiring analysis or testing;

Responsibilities, continued

	• Ensure that members under their command are trained and familiar with the appropriate handling and storage of all ECP; and • Document in the DAJ/ACISS log all attempts to notify the owner or custodian of property in the custody of the Department if the property was not seized from the property owner or custodian.
Investigating Member	Upon arrival at the Station/Section/Unit the Investigating Member shall: • Provide the Desk Officer with a complete inventory of all ECP to be logged into the DAJ/ACISS log; • Log the ECP in the Temporary ECP Journal; • Firearms and other weapons shall be entered into the current evidence tracking system in use at time of seizure (BEAST, ACISS or other system), or if no electronic system is in use, entered into the Firearms journal. Prior to the end of their shift the Investigating Member shall: • Place each item into a Department Evidence bag and/or tag items individually that do not fit into Department Evidence bag(s); • Completely fill out all required information on Department Evidence bags or tags; • Secure ECP in the Temporary ECP Locker; • Attach a copy of the incident report to the ECP; • Property that comes into the possession of the Department that is of an exceptional, valuable and/or sensitive nature shall require additional security measures based upon the real and/or recognized value including alternative authorized temporary storage and/or Supervisory notification as necessary; • ECP Seized vehicles shall be documented utilizing the same reporting requirements as other evidence;

Responsibilities, continued

	• ECP that is too large to fit into the Temporary ECP storage locker may be given directly to the primary or assistant ECP Custodian with the transfer documented in the DAJ as a change in the chain of custody.

ECP Storage Area Provisions

Station/Section/Units ECP Permanent Storage

The ECP Storage Locker shall:

- Be locked and alarmed with limited access allowing for proper monitoring and security thus preventing unauthorized entry;
- Provide extra security measures for items of exceptional, valuable or sensitive items including, but not limited to firearms, evidentiary currency or jewelry; and
- Be maintained to prevent damage to ECPthat may occur due to moisture or extreme room temperature fluctuations.

Evidence/contraband shall:

- Be stored within a secure area inside the State Police facility of jurisdiction;
- Not be stored in vehicles or personal storage areas; and
- Perishable items requiring refrigeration, including blood and bodily fluids shall be secured within the facility's identified refrigerator. The refrigerator shall be in either the secured ECP Locker, or other area only accessible to authorized personnel.
- Vehicles seized as evidence or in conjunction with a civil forfeiture proceeding shall be stored in a secure manner to preserve evidence and prevent unauthorized access. Seized vehicles may be stored off-site from the seizing State Police facility, but shall be secured in an area with measures in place to maintain the evidentiary integrity, especially before/while being processed; including but not limited to: Secure locked fenced-in area, video monitoring, and/or on a limited access property such as another secure State Police facility. State Police Officers from the Station/Section/Unit seizing such vehicle(s) shall have full access to the vehicle(s) if held at a non-State Police facility; and
- Bicycles seized shall be stored either within the ECP Storage Locker or in a secure area or secured in a manner preventing unauthorized access.

Troop/Section Storage Area

Troop/Section Commanders shall:

- Maintain an ECP storage area within their Troop/Section Headquarters;
- The Troop/Section storage area shall be under the control of the Cases and Reports Supervisor; and
- The storage area shall be used to store ECP that has been forwarded and awaiting destruction or disposal.

Temporary Locker

Station/Section/Unit ECP Temporary Storage

Each Station/Section/Unit that stores ECP shall:

- Be provided with a Temporary ECP Locker with twenty-four (24) hour access to all authorized personnel providing limited access temporary storage of ECP including firearms;
- Any Station/Section/Unit without a Temporary ECP Locker shall secure evidence/contraband/property that comes into their custody at the barracks or Troop HQ of jurisdiction adhering to all MSP policy reporting requirements;
- Have a Temporary ECP Journal and Firearms Journal/tracking system to enter all pertinent information;
- Secure Firearms/weapons, ensuring that the firearm is safe and empty;
- Transfer evidence requiring refrigeration collected outside of the Massachusetts State Police Crime Laboratory (MSPCL) operating hours to the locked evidence refrigeration unit located in the Troop HQ of jurisdiction unless otherwise directed by a specialized unit Supervisor. This transfer shall be documented utilizing the appropriate chain of custody forms with notations in the DAJ of both the sending and receiving locations as well as notification to the evidence officer of the sending location;
- In the event that an item is too large to fit into the Temporary ECP Locker, the Investigating Member shall:
  - Consult with the primary or assistant ECP Custodian, their Supervisor or Troop Duty Officer to locate another secure location.
  - Notify the ECP of the alternative storage location if the ECP was not present to identify said alternative storage location.

Items secured in the Temporary ECP Locker shall have an entry made into the Temporary ECP Journal listing:

- Investigating Member's name;
- Investigating Member's ID number;
- Defendant's name(s);
- Defendant's date of birth;
- Case number;
- Date seized;
- Location where seized; and
- A description of the item(s) including the number of items.

Chain of Custody

Change In the Chain of Custody

When the ECP Custodian or Assistant ECP Custodian transfers evidence, contraband, property or firearms to an Investigating Member for judicial proceedings, or official Department proceeding, it shall be considered a change of possession within the chain of custody. Both the ECP Custodian/Assistant ECP Custodian and Investigating Member shall:

- Ensure appropriate entries are made within the ECP Ledger or Firearms Journal/tracking system and the DAJ/ACISS log; and
- Ensure all appropriate Department forms are completed indicating the change in possession.

Documentation of Chain of Custody

The Investigating Member shall:

- Ensure the appropriate chain of custody forms are completed for the examination of all physical evidence;
- Ensure the appropriate chain of custody form(s) accompanies evidence or contraband whenever it is involved in a temporary change of possession outside of the custody of either the ECP Custodian or Assistant ECP Custodian and/or the Investigating Member;
- Ensure that a record is made into the Station/Section/Unit's ECP Ledger or Firearms Journal/tracking system and DAJ identifying the new custodian; and
- Ensure the record identifies the ECP accordingly.

Inspection of Evidence or Contraband

All members involved in the movement of evidence or contraband at the Station/Section/Unit, shall:

- Inspect the packaging for signs of tampering; and
- Immediately notify the Station/Section/Unit Commander if the packaging appears to have been tampered with.

Chain of Custody Forms

- *SP 145 Chain of Custody: Evidence/Contraband /Property Form*: Used for all evidence (excluding controlled substances), contraband, found/unclaimed or recovered property to show the chain of custody of the item/property;
- MSPCL Forms;
- The following forms shall be used when necessary, retained and copies distributed as indicated:
  - *Evidence Submission Form:* Evidence or contraband requiring analysis; and
  - *SP 295 Drug Submission Form:* Controlled Substances requiring analysis.

Troop/Section Supervisor of Cases and Reports

The Troop/Section Cases and Reports Supervisor shall:

- Sign and date the Station/Section/Unit ECP Ledger as the final receiver of the property;
- Ensure a red line be drawn diagonally through the ledger entry to indicate final disposition and case closed;
- Destroy ECP in an appropriate and acceptable manner in the presence of another Commissioned Officer;
- Submit a written report, through channels, to the appropriate Troop/Section Commanding Officer or designee, listing the final disposition of all ECP; and
- Adhere to 19-SM-03 Procedures for Disposition of Evidence, Contraband, and/or Controlled Substances.

Property to be Auctioned

Pursuant to Massachusetts General Law c. 22C, § 45-46, the Department may:

- Sell held properties at a public auction; or
- Destroy held property; and
- Only sell or destroy held property after six (6) months when there is no proven ownership of the property.

The Department may select a vendor to hold the public auctions in accordance with established procedures. Information and instructions regarding the auction vendor and procedures shall be posted on PowerDMS under Bulletins-*Public Auction Vendor*.

Prior to the auction, Media Relations shall promulgate a notice per M.G.L. c. 22C, § 45, to the required media news outlets and newspapers that contain the following information:

- The time and place of the auction; and
- Description of the property to be auctioned.

Returning Property to Owner

When property is disposed or returned to an owner, specific information shall be recorded on the SP 145 and shall be:

- Attached (original) to the report and retained at the Station/Section/Unit;
- Forwarded (copy) to the EPC Custodian or Assistant EPC Custodian for filing; and
- Forwarded (copy) to the Troop/Section Supervisor of Cases and Reports and retained on file.

Office of Professional Integrity and Accountability Unit (OPIA)

The OPIA Unit shall conduct periodic audits of all Department ECP Storage Lockers to ensure the integrity of the system.

Audits & Inspections

ECP Custodian Change Audit

- When there is a change in the ECP custodian, an audit of the ECP under control of the Station/Section/Unit shall be conducted and documented. This audit is to be conducted jointly by the newly designated ECP custodian and a designee of the applicable Station/Section/Unit Commander to ensure records are current, properly annotated and include the random sampling of ECP for verification; and
    - During the joint audit associated with evidence custodian transfers, a sampling of the total amount of ECP requiring extra security measures (e.g., firearms, evidentiary currency, jewelry), and property and evidence items under the Station/Section/Units care must be reviewed concerning documentation and accountability.
    - The following table shall be utilized to ascertain the random sample size of ECP requiring extra security measures. Locate the total amount of high-risk ECP currently stored using the number under "Pieces of Extra Security Measures ECP." The corresponding "Required Sample Size" should be applied when conducting the respective audit. If the exact number for "Pieces of High-Risk ECP" is not listed, the following higher number should be used.

Pieces of Extra Security Measures ECP Held	Required Sample Size
100	92
250	203
500	341
1,000	516
1,500	624
2,000	696
> 2,500	30%

    - A random sampling of all other ECP items should be included in the audit. The number of selected items for the sampling of all items should be a number that should be sufficient to ensure the integrity of the system and accountability of property. The person assuming custody of the property and evidence should ensure that records are current and properly annotated. All discrepancies should be

Audits & Inspections, continued

documented and reported according to the reporting guidelines of this policy before the assumption of property and evidence accountability by the newly appointed custodian.

Note: If an error rate of more than 5 percent is discovered when conducting the extra security measure ECP audit, a complete inventory of the extra security ECP must be performed.

- The documented audit shall be maintained by the ECP custodian of the Station/Section/Unit and provided to the Station/Section/Unit Commander.

Annual Audit

Annually, the Troop/Section Commander shall assign a supervisor, not routinely or directly connected with the control of ECP, to conduct and document an audit of the ECP held by each Station/Section/Unit under their Command to ensure records are current, properly annotated and include the random sampling of ECP for verification. This audit shall follow the same guidelines audit guidelines listed above.

- The documented audit shall be provided to the Station/Unit ECP custodian and Station/Unit Commander.

Semi-Annual Inspections

- Every six (6) months Station/Section/Unit Commanders with secure storage area(s) for ECP shall assign the supervisor responsible for the ECP control function, or their designee, to conduct and document an inspection of the secure storage area(s). The inspection shall include an examination of the storage area(s) to assess if they are being maintained in a clean and orderly fashion; verify Department directives related to the property management system are being followed (proper handling, storage and record-keeping, etc.); verify the ECP is being protected from damage or deterioration; and that property having no further evidentiary value is being disposed of promptly.
  - The documented inspection shall be provided to the Station/Section/Unit ECP custodian and Station/Section/Unit Commander. Remediation of deficiencies, if warranted, shall be directed and documented by the Station/Section/Unit Commander.

Unannounced Inspections

- At least annually, every Station/Section/Unit with an ECP storage room shall direct an unannounced inspection of the room be conducted and documented by a designee not routinely or directly connected with control of the ECP. This inspection is not intended to be a full inspection; but should inspect for cleanliness, orderliness and trace a few pieces of ECP to verify they are in the proper location as stated in the ECP logs; and

    - The documented inspection shall be provided to the Station/Section/Unit ECP custodian and Station/Section/Unit Commander.
- The Office of the Colonel/Superintendent may direct unannounced, random inspections of ECP storage areas to ensure compliance with Department policies.
    - These inspections shall be documented and maintained by the Office of the Superintendent and the Division Commander of DST.

Record Maintenance

- With the exception of unannounced inspections directed by the Office of the Colonel/Superintendent, the Station/Section/Unit Commander shall maintain a record of all audits, semi-annual inspections and unannounced inspections in a centralized location.

Reporting

- Audits or inspections that reveal missing ECP shall be reported through channels to the Division Commander of DST immediately upon receipt of the information.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-13**
Subject:	
Asset Forfeiture	

Policy

The Department shall adhere to state and federal forfeiture laws involving illegal activities.

Troop/Section Asset Forfeiture Officer

The Asset Forfeiture Officer (AFO) shall:

- Provide assistance to members regarding investigations when authorized by the Troop Duty Officer;
- Oversee forfeiture proceedings and manage seized assets until forfeited;
- Maintain a database and files of all seizures and forfeitures; and
- Act as a liaison with the Financial Evidence Officer (per INV-14 Seized Currency), and the Offices of the District Attorney, Attorney General, or U.S. Attorney.

Non-Field Services Sections/Units

This policy is applicable to all Department entities, except those assigned to the Offices of the District Attorney, Attorney General, U.S. Attorney, or a federal task force, and there is an internal mechanism for tracking such seized currency. Members shall follow the policy as set forth by that office or task force.

Troop/Section/Unit Commanders requesting to deviate from this policy shall forward written requests through channels to the Deputy Superintendent for approval.

Factors of Consideration

In some situations, one factor alone may be insufficient to justify a seizure and may require a combination of additional factors. Some factors are:

- Suspect is evasive, or gives implausible or false answers;
- Suspect has record of controlled substance charges;
- Suspect is carrying a large or unusual amount of currency;
- Suspect cannot explain where the currency came from, or what it is for;
- Suspect has a large sum of currency or an expensive vehicle and no means of income;
- Suspect denies ownership of currency;
- Currency is concealed in an unusual location; or
- A narcotics canine alerts on the currency, vehicle, or property.
  Note: A canine alert alone is not enough to establish probable cause for the seizure of currency.

Making a Seizure

Seizures may be made when there is probable cause to believe that the vehicle, currency, or other property is connected to the sale or distribution of controlled substances. This authority is allowed by Massachusetts General Laws (MGL) c.94C §47.

Members may seize currency when there is probable cause to believe that the currency is:

- Being used or was intended for use in the procurement, processing, delivery, or distribution of controlled substances;
- The proceeds of sales of controlled substances; or
- Involved in the furtherance of criminal enterprise.

Note: Currency seized shall be processed in accordance with INV-14.

Seizing a Vehicle

The Fleet Administrator has the authority to accept or reject vehicles on behalf of the Department. Any vehicle accepted by the Department, shall be delivered to the Fleet Section for inspection according to ADM-19.

A vehicle may be seized when…	A vehicle should not be seized if…
1. An operator, owner, or occupant of the vehicle is arrested for possession with intent to distribute or trafficking: • Ten (10) pounds or more of marijuana; • Any amount of heroin; • Any amount of cocaine; or • Other controlled substances, as outlined in M.G.L. c.94C, § 32A-G or 32I. 2. The owner knew or should have known that it was being used for such purposes.	• It is rented or leased (unless seized for evidentiary purposes); or • The owner had no knowledge that it was being used for illegal purposes. Note: The Troop AFO shall consult with the District Attorney's Office of jurisdiction and determine if there is a lien on the vehicle that an entity is willing to assume.

Use of Seized Assets

The Colonel/Superintendent may expend funds and proceeds from the Special Law Enforcement Trust Fund to:

- Defray the costs of extended investigations;
- Provide matching funds for grants; and
- Accomplish other law enforcement purpose(s).

Funds shall not be considered a source of revenue to meet operational expenses.

Troop Asset Forfeiture Process

Step	Action
1	The determination is made to seize the assets e.g., vehicle, currency, or other property.
2	All seized assets are to be secured according to Department policy.
3	The seizing member shall notify the Troop Duty Officer of the seizure.
4	The Troop Duty Officer shall notify: • The Troop AFO and may authorize call outs of the AFO after business hours; and • The Financial Evidence Officer of all currency seizures in accordance with INV-14.
5	The seizing member shall be assigned an incident/case number, complete a written report detailing the circumstances of the asset seizure, and prepare the necessary reports and forms.
6	The Troop AFO shall: • Confirm assets are secured with the investigating member; • Conduct an investigation to determine ownership and liens of the assets; and • Assist the Financial Evidence Officer.
7	If it is determined that the asset forfeiture proceedings shall not continue, the assets shall be returned, as soon as possible, to the lawful owner.
8	Motor vehicles seized shall be secured as directed by the Troop/Section Commander.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-14**
Subject:	
Seized Currency	

Policy

The Department shall establish rigid controls and strict accountability for all seized currency coming into its custody. A non-interest bearing cashless system shall be utilized to ensure that all seized currency is properly accounted for, secured, stored, and readily retrievable. Any changes in the custody of any seized currency shall be appropriately documented.

Applicability

This policy is applicable to all Department entities, except under the following conditions:

- Members assigned to Offices of the District Attorney, Attorney General, U.S. Attorney, or federal task force are exempt from this policy; and
- If a documented internal mechanism exists for tracking seized currency, this policy does not apply.

Troop/Section/Unit Commanders requesting to deviate from this policy shall forward written requests through channels to the Deputy Superintendent for approval.

Seized Currency

Members shall not seize less than three-hundred ($300.00) dollars from a defendant unless the currency is seized as evidence.

Seized currency shall not include:

- Non-evidentiary currency received during custodial processing;
- Currency used for controlled purchases of contraband; or
- Currency that has independent forensic value. (i.e., currency stained with blood, bodily fluids, or other evidentiary material)

Seized currency shall be processed at the appropriate sub-station in the Troop of jurisdiction.

Any seized currency that may be contaminated with any biological hazard, dangerous drugs, or chemicals shall be clearly labeled to warn of the threat. Any members handling potentially tainted currency shall utilize proper protective equipment to minimize the risk of exposure. Any other agency or entity who will handle the seized currency shall also be warned of the threat in writing by the member transferring the currency.

Responsibilities

Position	Duties
Desk Officer	• Visually observe currency drop safe at the start of shift for general condition and make entry into Daily Administrative Journal (DAJ)/ACISS system; • Make appropriate entries into DAJ system upon seizure and retrieval; • Assign a case/incident number to the Investigating Member; and • Notify Troop Duty Officer of the seizure and provide the RAMS or ACISS case number and the Investigating Member's name, ID number, and current duty assignment.
Investigating Member	• If practicable, when a member locates currency to be seized, they will immediately request another member or Law Enforcement Officer to act as a witness; o When no such witness is available, the member shall contact the appropriate Troop Duty Officer of jurisdiction requesting a DAJ entry be made; • If practicable, the packaged and labeled currency should be photographed on scene; • Return directly to the barracks of jurisdiction to process the seized currency in accordance with this policy; • Photograph or photocopy currency for evidentiary purposes, if feasible; • Currency will not be counted at the time of the seizure; • Package and seal currency in a Department evidence bag (evidence bags shall be labeled 1 of 1, 1 of 2, 2 of 2, accordingly), ensure both members initial the seal, ensure both members sign bag with ID numbers, include the corresponding RAMS or ACISS case number, and the notation, "An Undetermined Amount of U.S. Currency Pending an Official Count"; • When the currency is seized from a particular individual, the member will issue the individual an SP 418 Seized Custody Receipt with the notation, "An Undetermined Amount of U.S. Currency Pending an Official Count." If the individual refuses to sign the receipt or if the member determines that it is tactically unsound to allow the individual to sign, this fact will be noted on the receipt and in the member's corresponding report of the seizure;

Responsibilities, continued	Investigating Member, continued	• Prepare an SP 417 Currency Custody Form with the notation, "An Undetermined Amount of U.S. Currency Pending an Official Count"; • Deposit Department evidence bag with attached SP 417 Currency Custody Form and SP 418 Seized Currency Receipt into currency drop safe with witnessing member present; • File copies of SP 417 and SP 418 with the Station Commander and ensure copies are attached in the appropriate case file; and • Complete an incident report detailing the circumstances of the seizure.
	Troop Duty Officer	• Notify the Financial Evidence Officer by email of the seizure; • Make appropriate DAJ entries; and • Ensure an electronic copy of the GHQ Finance Section Bank Sweep Account deposit slip (as provided by the Financial Evidence Officer) is included in the appropriate case file.
	Financial Evidence Officer	• In the presence of another Commissioned Officer, retrieve seized currency from the currency drop safe, no later than next banking business day or as otherwise authorized by the Troop Commander; • Document any change in Custody on SP 417; • The seized currency should be photographed at this time using the Department issued camera in each barracks; • Ensure appropriate DAJ/ACISS entries are made; • In the presence of another Commissioned Officer, transport the seized currency to a local banking institution designated by the GHQ Finance Section; • Both Commissioned Officers will be present when the Department evidence bag(s) is/are unsealed and will witness the official count at the financial institution. The evidence bag(s) should be cut open at the bottom to remove the currency while preserving the bag(s) with the seals, initials, and signatures intact. The Financial Evidence Officer will maintain the original evidence bag(s) in his/her files; • Deposit currency into a cashless system (GHQ Finance Section Bank Sweep Account) on the same banking business day as retrieved; • Enter the amount of the seizure into the approved accounting program;

Responsibilities, continued

Financial Evidence Officer, continued	• Notify the Troop Commander, Troop Duty Officer, and the Investigating Member of the official count and ensure appropriate DAJ/ACISS entries are made; • Provide a copy of the deposit slip and any other related relevant documents that may exist (i.e., denomination breakdown) to the Investigating Member for electronic inclusion in the appropriate investigative case file; • Send copies of the SP 12 Incident Report to the Chief Financial Officer (CFO) of the District Attorney's Office of jurisdiction; • Maintain copies of SP 12s, SP 417s and SP 418s in a dedicated folder filed alphabetically and by year; • Copies of SP 417, SP 418, deposit slip/receipt should be provided electronically to Finance Section via MSPForfeiture@pol.state.ma.us; and • File open and closed cases separately.
Station Commander	• Maintain copies of SP 417 and SP 418 for inspections.
Troop Commander	• Maintain a book of deposit slips (in duplicate) for the GHQ Finance Section Bank Sweep Account. Deposit slips may be obtained from the Finance Section, Director of Finance. A two to three week advance order time is needed. • Assign a Commissioned Officer as the Financial Evidence Officer; • Maintain historical records of members provided with combination access; • Change access combinations as required; • Conduct and document quarterly audits; • Conduct investigations as appropriate; • Notify the Division Commander of any discrepancies; and • Upon appropriate request, forward a To/From to the Finance Section requesting return of seized funds.

Official Count

The final official amount shall be determined by the GHQ Finance Section Bank Sweep Account financial institution of deposit.

Troop/Section Commanders shall document and investigate any currency discrepancies that cannot be reconciled and report findings to the Division Commander.

Return of Seized Funds

Any person requesting the return of seized currency shall:

- Request the return in writing to the Troop Financial Evidence Officer; and
- Provide a copy of the court order, if applicable.

The respective Troop Commander or designee shall forward a To/From to the Finance Section requesting a refund.

Disposition of Currency

If no person makes a valid claim to found, unclaimed, or abandoned currency within six (6) months from the date the currency was turned into the Department, the funds shall be forwarded to the State Treasurer via the Department's Finance Section.

Prior to forwarding the funds to the State Treasurer, the Department may deduct all reasonable charges and expenses incurred in connection with the deposit and accounting of the currency. Such deductions shall be made by the Department's Finance Director and documented accordingly. Any claim for return of found, unclaimed, or abandoned currency after the funds have been forwarded to the State Treasurer, shall be made to the State Treasurer's Office.

All original documents relative to seized currency ordered forfeited through legal proceedings shall be forwarded to the Finance Section for the Special Law Enforcement Trust fund within sixty (60) days of adjudication.

Accounting and Audits

The Financial Evidence Officer shall maintain:

- Copies of documents relative to seized currency ordered forfeited through legal proceedings;
- A Department approved software accounting system;
- SP 12s, SP 417s, and SP 418s for currency received and records, documentation, or invoices of currency disbursements, including the financial institution where seized funds were deposited;
- Prior to any change of command of the Troop/Section/Unit Commander, Executive Officer, or Financial Evidence Officer, there shall be a documented reconciliation of the accounting records and current balances with the incoming member(s);
- A documented internal audit of all seized currency accounting records and practices shall be conducted annually by the appropriate Division Commander; and
- An audit of seized currency may be conducted as directed by the appropriate Division Commander or the Colonel/Superintendent.

Reports

Troop/Section/Unit Commanders shall:

- Submit a quarterly report from the approved accounting program to their Division Commander (due January 10, April 10, July 10, and October 10); and

Reports, continued

Submit a copy of the quarterly summary/statement for funds processed to the Chief Financial Officer (CFO) of the District Attorney's Office of jurisdiction and to the Finance section via MSPForfeiture@pol.state.ma.us.

Large/Bulk Seizures

For large/bulk seizures of currency that cannot fit into the the Currency Drop Safe, the Investigating Member shall immediately:

- During normal business hours notify the Troop Duty Officer to arrange for the Troop Financial Evidence Officer take possession of the currency for bank deposit in accordance with this policy; or
- Outside of normal business hours business hours, notify the Troop Duty Officer who shall notify the NIU Commander or designee to make arrangements for the transportation of the seized currency to the NIU bunker at General Headquarters in Framingham.

Currency Drop Safe

Currency drop safes shall be located and maintained at each sub-station as determined by the Division Commander. Only the Troop Commander, Executive Officer, and Financial Evidence Officer shall have authorized access to the currency drop safe and combinations. Whenever the currency drop safe is opened:

- Two (2) members shall be present at all times; and
- Access and retrieval information shall be entered into the station DAJ.

Drop Safe Combinations

Troop Commanders shall be responsible for the change of safe combinations under their command.

Whenever there is a change of command, transfer, or departure of a Troop Commander, Executive Officer, or Financial Evidence Officer, the access combination shall be changed.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**INV-15**
Subject:	
Field Interview and Observation Reports	

Policy

Members shall follow the established guidelines for the collection, security, and dissemination of information gathered through field interviews and observations.

Definitions

SP 73 Field Interview and Observation Report (FIO): An internal, Department report that documents information about a person, place, vehicle, event, occurrence, or any other known activity, observed by a Department member, that may be linked to suspicious or criminal activity or may be of interest to the law enforcement community.

Collection of Information

Information may be recorded on a SP 73 or any other format that is approved by the Criminal Information Section (CIS).

FIO reports are an important crime prevention and information gathering resource. Analysis of these reports is a valuable aid to investigators in uncovering leads that may result in the solving of crimes and the apprehension of criminal suspects.

The collection of information for FIO reports shall not be based solely on an individual's or group's:

- Support of a particular cause;
- Race;
- Color;
- Religion;
- Gender;
- National origin or ancestry; or
- Political affiliation.

Members collecting information for FIO reports shall not:

- Conduct random stops of persons or vehicles to gather information; or
- Employ or direct an individual to engage in any illegal activities.

Subject:	Number:
Field Interview and Observation Reports	**INV-15**

Public Contact

Members are encouraged to:

- Collect as much information based upon their own observations; and
- Gather as much information provided to them on a voluntary basis.

Members may:

- Detain a person or vehicle briefly when there is reasonable suspicion of criminal activity; or
- Stop and frisk a subject's outer garments for weapons when articulable facts or circumstances warrant such action, for the safety of the public and the member.

A person stopped by a member, who refuses to cooperate or answer questions, shall not be further detained without reasonable suspicion or probable cause.

SP 73 Field Interview and Observation Reports

FIO Reports should be accessible by every member while on duty. Additionally:

- Members should complete a report whenever a known criminal is observed or a person, place, vehicle, event, occurrence, or any other activity is observed that would indicate criminal activity or potential criminal activity;
- A separate FIO Report shall be completed for each member of a group and for each observation made; and
- Information shall be typed or printed in black ink and its content should be as complete as possible.

Procedures for completed FIO Reports:

- Provide a copy of the FIO to the Troop/Section/Unit of jurisdiction;
- Forward the original hard copy of the FIO Report to CIS; and
- If the information within the FIO Report is related to terrorism or homeland security contact:
  - CIS during normal business hours; or
  - The Communications Section OIC other than normal business hours.

Security and Retention

FIO Reports shall be secured at all times by CIS. A dissemination log shall be maintained for all requests for review and dissemination of information.

Subject:	Number:
Field Interview and Observation Reports	**INV-15**

Dissemination

Requests for information from the FIO database shall be made to the Commanding Officer of the CIS.

CIS shall only disseminate FIO information:

- In the furtherance of an authorized law enforcement activity;
- To authorized law enforcement or criminal justice personnel; and
- On a "need-to-know" and "right-to-know" basis per INV-08 Criminal Intelligence.

After review by either CIS, or the Communications Section OIC, information contained within an FIO Report determined to be critical, time-sensitive, or pertaining to public or officer safety shall be disseminated to law enforcement agencies, as appropriate.

Responsibilities

Requests for dissemination shall include the:

- Date and time of the request;
- Requesting Officer's name, rank, identification (ID) number and agency;
- Case number or reason for the request; and
- Name of the person(s) or incident(s) and information sought.

The CIS shall:

- Respond to requests for information from FIO Reports; and
- Document requests and dissemination of information.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**INV-16**
Subject:	
Electronic Recording of Interrogations	

Policy

Members shall, whenever it is practical, electronically record all custodial interrogations of suspects or interrogations of suspects conducted in places of detention.

Case Law

In *Commonwealth v. DiGiambattista*, 442 Mass. 423 (2004), the Supreme Judicial Court held that if the prosecution introduces a confession or statement that the police obtained during an interrogation of a defendant, who was either in custody or at a place of detention, and the police did not electronically record the statement, the defendant is entitled to a cautionary jury instruction.

Upon the defendant's request, the judge must instruct the jury that the State's highest court has expressed "*a preference that such interrogations be recorded whenever practicable and . . . that, in light of the absence of any recording of the interrogation in the case before them, they should weigh evidence of the defendant's alleged statement with great caution and care*." This jury instruction is required regardless of the reason that the police did not record the interrogation.

Definitions

Custody: Circumstances in which a reasonable person would believe that their freedom of action has been curtailed such that they are not free to leave.

Electronic Recording: Preservation of an interview/interrogation through the use of audio or audio/video recording equipment.

Interrogation: Occurs when an officer's questions, actions or words (other than those normally attendant to arrest and custody), are designed to elicit an incriminating response from a suspect.

Place of Detention: A secure facility where persons may be held in detention in relation to a criminal charge(s) (e.g., a state police barracks, prison, jail, a department of youth services secure facility).

Definitions, continued

Suspect: A person who has either been charged with a crime or a person for whom there is a reasonable basis to believe that they may in the future be charged with a crime. Witnesses, victims, and other persons who provide information to a member are not considered suspects, unless and until, there is reasonable basis to change their status.

Applicability

These guidelines require members to record, whenever it is practical, two (2) types of interrogations:

1. Custodial interrogations of suspects; and
2. Interrogations of suspects occurring at places of detention.

Wiretap Violations

The Massachusetts wiretap statute, Massachusetts General Laws (MGL) c. 272, § 99, generally prohibits anyone from secretly recording another person's oral statements. Accordingly, unless one of the narrow exceptions in the wiretap statute applies, a member who electronically records a suspect's interrogation shall do either of the following:

- Notify a suspect that their statements are being recorded; or
- Conduct the interrogation in such a way that it is obvious to the suspect that their statements are being recorded.

When the suspect knows, or reasonably should know, that they are being recorded, the member may record the interrogation without explicit consent to do so.

Creating a Clear and Complete Record

To the extent it is practical members should electronically record the entire interrogation of a suspect. To assist in the creation of the record, members shall do the following:

- Ensure that the recording device is functioning properly;
- Start the recording device;
- Inform the suspect that they are being recorded unless it is otherwise obvious;
- State the date, time, location, and names of persons present. If a video recording device is used which imprints the time on the tape or disk, verify that the correct time is displayed;
- State the full name of the suspect;
- Execute appropriate Department forms including Miranda warning and waiver, and waiver of prompt arraignment (if applicable);

Creating a Clear and Complete Record, continued

- If the member must suspend the recording for any reason, they shall make a record of:
  - The reasons for stopping (i.e., taking a break or a malfunction);
  - The time the recording device is turned off;
  - The time it is turned back on; and
  - What transpired while the recording device was turned off.
- If the member uses or refers to documents or other items during the interrogation, the member shall describe those documents or items on the record and mark them with a unique number (similar to an exhibit number at trial) and the member's initials. If the member is unable to write on the actual document or item, the member may write on a bag, envelope, or case in which the document or item is placed, or on a piece of tape which can be attached to the document or item; and
- Conclude the recording by stating the date and the time the interrogation is completed.

Suspect Refuses to be Recorded

Refusal Given Before the Recording Device is Activated:

- If it is practical, turn on the recording device to record the refusal;
- Identify the lead member and the suspect then state the date, time, and location, inform the suspect of any applicable rights and inform the suspect of the benefit to recording, including the fact that a recording will create a clear and complete record of what was said to the suspect, and what the suspect said during the interrogation;
- Ask the suspect on the record if they are willing to make an electronically recorded statement;
- Advise the suspect if, at any time, they change their mind and decide that they do want the interview to be recorded, they should let the member know and the member shall turn on the recording device; and
- If the suspect still refuses, turn off the device, execute a signed refusal form SP 609 Refusal Form, and proceed with the interview.

Suspect Refuses to Have Their Refusal Recorded

- Advise the suspect of the benefits of electronically recording any communications;
- If the suspect objects to having their refusal electronically recorded the member shall execute a SP 609; and
- The member may proceed without recording the refusal or the interrogation.

Suspect Refuses to be Recorded, continued

Suspect Refuses After the Recording Device is Activated

- If, during the course of a recorded interrogation, a suspect decides that they no longer want to answer questions unless the recording device is turned off, the member shall again advise the suspect of the benefits of recording the interrogation; and
- If the suspect still refuses, the member shall turn off the recording device execute a SP 609 and proceed with the interview.

Discretionary Decision Not to Record

A member may decide not to record an interrogation, even where it is practical to do so, if that member believes that:

- Recording the interrogation will jeopardize the safety of a member, the suspect, or any other person; or
- It is ill-advised under the circumstances to record the interrogation.

If a member decides not to record an interrogation, even where it is practical to do so, based upon the above factors, the member shall document in the case report, the reason(s) why the interrogation was not recorded.

Recording Devices

The member should choose a recording device that has removable media (e.g., tape, disk, memory card, etc.) which can be easily duplicated.

Recording Device Malfunctions

If the recording device malfunctions, the member conducting the interrogation shall make a decision whether and how to continue the interrogation and shall document what occurred.

If the recording device can be restarted or replaced immediately:

- State on the record that the device malfunctioned;
- State how long the device was not working, and
- Whether or not the suspect made any statements that were not recorded.

If the recording device cannot be restarted or replaced immediately:

- Include in the interview or case report the fact that the device malfunctioned;
- Ask the suspect whether they wish to continue the interrogation without a recording device, or whether they wish to suspend the interrogation until an operable recording device is available;

Recording Device Malfunctions, continued

- If the suspect consents to continuing the interrogation without a recording device, document the consent and the interrogation in some manner, such as in a signed written statement by the suspect or in the member's interview or case report; and
- Note whether or not the suspect made any statements that were not recorded.

Inoperable or Unavailable Recording Device

If there is no recording device available or the recording device is inoperable, the member should:

- Ask the suspect whether they wish to continue the interrogation without a recording device or suspend the interrogation until an operable recording device is available.

If it is impractical to defer the interrogation, and the suspect consents to continuing the interrogation without a recording device then:

- Include in the interview or case report the fact that no recording device was available; and
- Document the consent and the interrogation in some manner, such as in a signed written statement by the suspect, or in the member's interview, or case report.

If, under the circumstances, it is impractical to seek or obtain the suspect's consent to continuing the interrogation without a recording device, the ultimate decision to continue shall be made by the member on a case-by-case basis.

Preservation and Copying of Original Recordings

The member who conducted the interrogation shall preserve the original recording. Preservation steps include:

- Remove the storage medium from the recording device;
- Clearly label and appropriately store recordings and copies;
- If the interrogation is recorded digitally, the member shall preserve at least one (1) whole copy of the original recording file;
- As soon as it is practical, create at least one (1) exact copy of the original recording;
- Clearly label copies as such;
- Use copies, not original recordings, to make additional copies; and
- Copies, not the original, shall be used to prepare a written transcript, to comply with discovery obligations, and for all other purposes.

To the extent it is practical, statements from multiple suspects should not be recorded on the same tape or disk.

Storage

The member shall preserve all written forms, notes, or records of all statements by a suspect that were not electronically recorded in the original case file.

All electronically recorded interrogations shall:

- Be preserved according to the state records retention law and Department policy as criminal evidence; and
- Be stored in such a manner so as to easily differentiate between original recordings and copies.

Each original and copy shall be authenticated by the interrogator with the following information:

- Date and time of recording;
- Location of the interrogation;
- Name of person interrogated;
- Name of person(s) conducting the interrogation; and
- Departmental assigned case number or incident report number.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**INV-16A**
Subject:	
Eyewitness Identification	

Policy

The Department recognizes the importance of conducting and documenting eyewitness identification information in accordance with established guidelines, while recognizing that members are free to exercise discretion in adapting these guidelines to fit the unique circumstances of each case.

Eyewitness identification frequently plays an important role in Department investigations, and it is critical that eyewitness evidence be accurate and reliable in order to ensure that the highest possible quality of evidence is obtained.

Members conducting eyewitness identifications shall take steps to ensure that witnesses/victims are separated during the identification processes in the event multiple witnesses/victims are present simultaneously.

Members conducting eyewitness identifications shall follow reporting requirements including, but not limited to, documenting the process in an incident/investigative report.

Definitions

Blind Administration Procedure: A procedure during which the officer/investigator who conducts the lineup has no knowledge of who the suspect is, which reduces unintentional influences. **Whenever practical, this method should be used**.

Field Identification (Show-Up): An eyewitness identification procedure in which a single suspect is viewed by an eyewitness shortly after the commission of a crime for the purpose of identifying or eliminating a suspect in a criminal offense.

Filler: A person or photograph used in an eyewitness identification procedure not suspected of the offense but generally meets the description of the suspect.

Live Lineup: An eyewitness identification procedure in which the witness to a criminal offense is asked to identify one suspect from a group of persons.

Photo Lineup/Photo Array: An eyewitness identification procedure in which the witness to a criminal offense is asked to identify one suspect from a group of photographs.

Definitions, continued

Relative Judgments: Relative judgments occur when witnesses encounter a lineup in which the actual perpetrator is not in the lineup (i.e., the suspect is not the actual perpetrator). Research has shown that eyewitnesses tend to select the person who looks most like the perpetrator relative to other lineup members because they presume that the actual perpetrator will be in the lineup.

Sequential Identification Procedures: Sequential identification is a procedure where an eyewitness views only one member of a lineup or one photograph at a time. The witness must make a determination as to whether they can make an identification on each lineup member or photo before viewing the next lineup member or photo.

Simultaneous Identification Procedure: Simultaneous identification is a procedure that displays a group of individuals or group of photographs to a witness at the same time. This allows the witness to compare all individuals or photographs before determining if they can make an identification.

Guidelines and Eyewitness Advisory

Before any eyewitness identification procedure is conducted, members shall administer an eyewitness advisory, utilizing the SP 645 Eyewitness Advisement. The advisory provides clear, consistent, and forceful instructions to avoid relative judgment or any prejudicial action that may influence the witness.

The Massachusetts Supreme Court held in Commonwealth v. Silva-Santiago, 453 Mass. 782 (2009), that a photo array procedure was not per se suggestive where the police failed to use the standard advisements, sequential presentation, or a blind presenter. However, the court stated that it expects such procedures, especially the standard advisements, to be used in all future identification procedures.

Department members shall adhere to these guidelines and utilize the appropriate Department forms (see References) when conducting any eyewitness identification procedure, except for the following conditions:

- If the members are assigned to Offices of the District Attorney, Attorney General, U.S. Attorney or federal task force; and
- An internal mechanism exists for conducting eyewitness identification procedure.

Field Identification (Show-Up)

Members should document the circumstances warranting field identification according to SP 646 Show-Up Identification Procedure, which may include:

- The time and place of the crime;
- Factors matching witness description;
- Factors attracting police attention; or
- Exigent need including public safety and quick and/or efficient police investigation.

If multiple witnesses are involved, separate the witnesses and instruct them to avoid discussing details of the incident prior to the field identification.'

Whenever possible, the victim/witness should be transported to the location where the subject is located.

Members may assist in transporting witness(es) to the show up.

The subject may be transported to the victim/witness location under extenuating circumstances. In such instances, the subject should be transported in an unmarked vehicle, if available, to the victim/witness location. If possible, the subject should be transported in the front seat of the vehicle. If the subject is handcuffed, an effort should made to conceal the handcuffs.

Photo Lineup/Array

Whenever practical, members shall use a blind administration to present the photo lineup to the witness. Members shall:

- Utilize form SP 645 to administer the Eyewitness Advisory;
- Avoid saying anything that may influence the witness's selection;
- Use either the sequential or simultaneous presentation procedure;
- Show all the photographs to the witness even if identification is made when using the sequential procedure;
- Have the witness initial and date the photograph chosen if identification is made; and
- Record or document the victim/witness statement of certainty.

Members may use audio and/or video recording as necessary to memorialize the administration of the lineup/array. When utilized, the record(s) shall be maintained as part of the case file.

Advise victim/witness of the recording before proceeding and document in writing utilizing SP645 or on the recording their acknowledgement of the recording device(s).

Photo Lineup/Array, continued

To compose a photo lineup, consider the following:

- Select eight photographs;
- Include only one suspect in each array. The photo of the suspect may not unduly stand out;
- Select seven fillers who generally fit the given description of the suspect;
- Identify each photograph with a letter or number;
- Document the assigned letter/number and the name and date of birth of the subject of each photograph in a location not in view of the witness;
- Avoid using fillers that so closely resemble the suspect that a person familiar with the suspect might find it difficult to distinguish the suspect from the fillers;
- Create a consistent appearance between the suspect and fillers with respect to any unique or unusual feature (scars, tattoos, etc) used to describe the suspect by artificially adding or concealing the feature;
- Ensure that no identification or criminal information pertaining to the suspect or filler photographs is visible to the witness; and
- Document the name, police department and identification number of the officer who prepares the photo lineup.

Live Lineup Procedure

Whenever practical, members shall use the blind administration process to present a live lineup to the witness.

Members shall:

- Utilize form SP645 to administer the Eyewitness Advisory;
- Avoid saying anything that may influence the witness's selection;
- Use either the sequential or simultaneous presentation procedure;
- Show all the individuals to the witness even if identification is made when using the sequential procedure;
- If identification is made, have the witness initial and date the appropriate paperwork; and
- Record or document the victim/witness statement of certainty.

To compose a live lineup consider the following;

- Select six individuals;
- Use only one suspect in each live lineup;
- Select five fillers who generally fit the description of the suspect;
- The suspect must not unduly stand out;
- Identify each individual with a letter or number;
- Document the assigned letter/number and the name and date of birth of each individual in a location not in view of the witness;
- Ensure that no identification or criminal information pertaining to the suspect or filler is visible to the witness; and
- Document the name, police department and identification number of the officer who prepares the live lineup.

Live Lineup Procedure, continued

Members may use audio and/or video recording as necessary to memorialize the administration of the lineup/array. When utilized, the record(s) shall be maintained as part of the case file.
Advise victim/witness of the recording before proceeding and document in writing utilizing the SP 645 or on the recording their acknowledgement of the recording device(s).

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**INV-17**

Subject:

Travel/Immigration Status Inquiries and Investigations

Policy

Investigating and enforcing violations of federal immigration law is not a mission of the Massachusetts State Police. Accordingly, it is not appropriate for a member of the State Police to inquire about a non-citizen's immigration or travel status for the sole purpose of facilitating that person's detention or deportation by U.S. Immigration & Customs Enforcement (ICE).

However, a member of the State Police may inquire into a person's immigration or travel status if the inquiry is part of, and reasonably likely to facilitate, the investigation of a violation of state law, federal criminal law (excluding federal immigration law), or conduct independent of immigration status that poses a threat to public safety or order. A member of the State Police may also notify federal authorities of the imminent release of a subject consistent with the limits set forth in this General Order.

Definitions

Criminal Justice Information System (CJIS): A computerized system of criminal justice information, available twenty-four (24) hours a day and managed by the Commonwealth's Criminal History Systems Board.

Identification Document: An article/credential that is, or purports to be, issued by a government entity, that is relied upon to record or prove the identity of its bearer. Examples may include:

- A driver's license from any state or country;
- An ICE- issued identity/status card;
- A document issued by the Massachusetts Registry of Motor Vehicles (RMV), or other official governmental motor vehicle organization; and
- A passport issued by the U.S. State Department or any other sovereign nation.

Seizure: To take possession under compulsion of legal authority; to confiscate.

U.S. Immigration and Customs Enforcement (ICE): An agency within the Department of Homeland Security (DHS), its mission is to enforce the nation's immigration and customs laws.

Seizing Documents

Identification Documents may be seized from an individual only if they are:

- Contraband (including stolen, forged, or altered documents);
- The fruits or instrumentalities of a Massachusetts crime;
- Evidence of a Massachusetts crime; or
- Illegally possessed.

The seized documents shall be initially processed as required under INV-10 *Evidence Collection and Preservation*. Once the case is adjudicated, seized documents shall be promptly disposed of according to Department Policy and Procedure INV-11A *Property and Contraband*. Stolen passports seized for these purposes should initially be processed like any other evidence according to INV-10 & INV-11A. Once the case is adjudicated, passports should be forwarded to the originally intended holder, or the U.S. Department of State, Passport Services, **Consular Lost/Stolen Passport Section,** 1111 19th St. NW, Room 500, Washington, DC 20036.

State Residency

Foreign operators may drive in Massachusetts for up to one (1) year with their foreign license if they are a visitor. An operator with an out-of-state license may drive in Massachusetts at any time, provided they do not establish residency within the Commonwealth. However, pursuant to G.L. c. 90, § 8, once a foreign operator or an out-of-state operator becomes a Massachusetts resident, he or she must immediately obtain a Massachusetts driver's license.

A member may question an operator about his/her employment, current residence, and/or tax status, when the member possesses a reasonable suspicion that a person operating on a foreign or out-of-state license has established residency in Massachusetts and the member requires the information to aid in determining if the operator is in compliance with Massachusetts law.

Out-of-State Licenses

An out-of-state license should not be seized by a member unless this document is:

- Contraband;
- A fruit or instrumentality of a crime;
- Evidence of a crime; or
- Illegally possessed.

Seized licenses shall be processed in accordance with INV-10 & INV-11A.

Determining License Status

To determine if the operator has been living in Massachusetts for longer than one year, the following checks may be performed to aid in determining an operator's current status:

- A motor vehicle violations history check (KQ);
- A criminal history check (BOP);
- Utilize the CJIS screen titled "INS" to learn when the operator entered the U.S.;
- A RMV check to determine if the operator has any license status within Commonwealth; or
- The issuance a RMV "A" or "X" number.

Note: Massachusetts RMV issues an "A" number to individuals who are unlicensed within the Commonwealth, but have received a Massachusetts motor vehicle citation; an "X" number is issued to individuals who are unlicensed within Massachusetts, but own a Massachusetts registered motor vehicle.

Foreign Licensed Operators

Massachusetts shall only honor valid licenses from countries identified within the current Massachusetts Driver's Manual "A" Appendices: *Parties to the Road Traffic Convention and the 1943 Inter-American Automotive Traffic Convention*.

This publication is available to all members via the Massachusetts Registry of Motor Vehicles web site under:
Forms & Manuals→ Driver's Manual→ Appendices "A".

International Driver's License/ Permit

An international driver's license/permit is simply a translation of an operator's foreign driver's license into English. This document is not required to operate a motor vehicle in Massachusetts.

The international license/permit is not a substitute for a person's actual driver's license issued by their country of origin. An operator who is licensed in another country is required to carry only their valid foreign driver's license.

ICE Detainers

Department members are NOT authorized to stop, arrest, and/or take an individual into custody based solely on an ICE detainer.

If an individual is in Department custody pursuant to an arrest on criminal charges or a warrant, or for any other reason, the existence of an ICE detainer for that individual does NOT grant members of the Department authority to detain the individual for any period longer than they would otherwise be held in Department custody.

ICE Detainers, continued

Member Responsibilities

When a Department member conducts a NCIC/DCJIS query of an individual who is **already** in Department custody pursuant to arrest on criminal charges or a warrant and determines that the individual is the subject of an ICE detainer as defined in 8 C.F.R. § 287, the member shall **immediately** notify the Troop Duty Officer.

Troop/Duty Officer Responsibilities

The Troop Duty Officer shall instruct a Troop Dispatcher to contact ICE at (802) 872-6020 to notify ICE that an individual in custody is the subject of an ICE detainer.

The Troop Duty Officer shall monitor the status of an individual with an ICE detainer until the individual is released, transferred, or taken into custody by ICE. If ICE fails to take custody of the individual prior to the time when the individual would otherwise be released or transferred from Department custody, the individual shall be immediately released or transferred from Department custody. All such actions/inactions, and the reasons for the same shall be recorded in the appropriate daily administrative journal and/or reports.

Request for Voluntary Notification of Release

In certain circumstances, ICE will request, by providing *Form I-247A ("Immigration Detainer – Notice of Action")* that the Department **notify** ICE before an individual is released or transferred from Department custody. After receiving *Form I-247A* from ICE, the Troop Duty Officer shall notify ICE of the individual's impending release as early as possible and shall document the notification in the appropriate daily administrative journal and/or reports. Upon receipt of Form I-247A, the Troop Duty Officer shall also 1) relay a copy of the detainer form to any other law enforcement agency (including a jail, regional lockup, or state court) to which custody of the individual is transferred, and 2) shall notify ICE in the event of the individual's death, hospitalization, or transfer to another institution. **Under no circumstances will an individual be detained beyond the time s/he would normally be released from Department custody on the basis of the Department's receipt of *Form I-247A*.**

Bail Magistrate, Court, and District Attorney Notifications

In circumstances where an individual is eligible for bail, members shall notify the Bail Magistrate that the individual is the subject of an ICE detainer.

ICE Detainers, continued

In circumstances where an individual is transferred into the custody of the court system, the officer transporting the individual shall notify the court, district attorney's office, and other appropriate law enforcement agencies of the existence of an ICE detainer. This notification shall be documented in the appropriate daily administrative journal and/or reports.

Mandated Consular Reporting

Agreements with certain countries mandate that they be notified when their nationals are confined or detained regardless of the national's request.

When foreign nationals are involved in an incident, members shall consult "Consular Notification and Access" provided by the U. S. State Department, which is available to all members via the State Department website at: http://travel.state.gov/consularnotification

Seizure Procedures

If this occurs…	Then…
The operator is arrested for operating under the influence (OUI) of alcohol and fails a breath test, or refuses a breath test.	• Process as specified by M.G.L.; and • Seize Massachusetts licenses if appropriate. **Note**: If the operator is from out-of-state and possesses an out-of-state license, do not seize the license.
The operator has a suspended or revoked Massachusetts Driver's License.	• Seize the driver's license; • Complete a RMV Form 21188 – *Report and Affidavit of an Operating After Suspension/Revocation Incident*; • Forward both the license and Form 21188 to the RMV; and If the suspended or revoked operator is operating a vehicle registered to them, seize the registration plates and forward the plates to the RMV with Form 21188.
The operator possesses/uses a forged/altered license or any official document from the Massachusetts RMV or from another country or state's department of motor vehicles.	• Seize the forged or altered documents; • Notify the State Police Compliance Unit of this violation by utilizing RMV Form #T21193 – *Affidavit of Person Obtaining License*; and • Process seized documents in accordance with INV-10 & INV-11A. Note: The operator may be charged with G.L. c. 90, §24B, c. 90, §28, or c. 267, §1- (forgery statute).

Seizure Procedures, continued

If this occurs…	Then…
An operator presents a license from a foreign country.	See "Foreign Licensed Operators" Section.
A passenger in a vehicle presents a suspended or revoked Massachusetts license for identification purposes only.	• If the suspension/revocation is for OUI alcohol, seize the license and forward it to the RMV or destroy it; **however**, • If used for identification purposes only, the suspended/revoked license should not be seized.
The operator presents an out-of-state license, which is suspended, revoked, or expired in the operator's home state.	• Do not seize the license; • The operator may be charged with MGL Ch. 90, §10, unlicensed operation of a motor vehicle; and • Obtain the CJIS printout from the operator's home state to verify the suspension or revocation for court purposes.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**INV-18**
Subject:	
Mobile Identification Device Use	

Policy

This policy provides guidelines for the issuance, training, and use of Mobile Identification Devices.

Authorized and trained Members may access the Department's Automated Fingerprint Identification System and the Next Generation Identification system by the State Identification Section (SIS) for the use of Mobile Identification Devices to assist in the identification of individuals under appropriate circumstances and to provide for additional officer safety and situational awareness.

Definitions

Automated Fingerprint Identification System (AFIS): The computerized biometric matching system that stores identifying biometric templates and related demographics. The State AFIS maintains the following biometric information: known fingerprints and palm prints, latent fingerprints and palm prints, booking and tattoo photos, and iris images. SIS operates AFIS.

Biometrics: Distinctive, measurable physiological characteristics used to identify individuals. Commonly collected biometrics include fingerprints, palm prints, photographs (mug shots) and iris images.

Mobile Identification (ID) Device: A handheld scanning device that captures fingerprint images and utilizes a secure connection to submit them for search of selected fingerprint databases.

Mobile ID "HIT": Information returned from the Mobile ID search that an individual has been fingerprinted and/or that a highly probable matching record exists as indicated by a SID/CID from the state and/or a UCN from the FBI/NGI database(s).

> Note: Information returned from the Mobile ID search shall be confirmed by additional means subsequent to an arrest within a reasonable period of time. (e.g., confirmed by submitting booking fingerprints per DET-05 subsequent to an arrest).

NGI (Next Generation Identification): A biometric matching system operated by the FBI that creates a national electronic repository of biometric and criminal history information. Details on NGI can be found at: www.fbi.gov/services/cjis/fingerprints-and-other-biometrics/ngi

Definitions, continued

Repository for Individuals of Special Concern (RISC): A rapid search accessible to authorized law enforcement officers, available through a mobile fingerprint device. This search capability provides additional officer safety and situational awareness by providing access to the national repository of wants and warrants including Immigration Violator File (IVF) of the National Crime Information Center (NCIC), convicted sex offenders and known or appropriately suspected terrorists. This search is available only to authorized criminal justice personnel for criminal justice purposes in compliance with state and federal laws.

State Identification Number (SID) / Civil Identification Number (CID): A unique number associated with an individual's state fingerprint-supported identity. The SID is associated with a criminal identity and the CID is associated with civil identity.

Universal Control Number (UCN): A unique number associated with an individual's national fingerprint-supported identity. The UCN, formerly referred to as an FBI number, may be associated with either criminal or civil fingerprint records.

Issuance of a Mobile ID Device and Training

Department Members authorized to use Mobile ID Devices shall:

- Complete a Department-approved training course that includes:
  - Training based on manufacturer's recommendations and suggestions from the device vendor, or SIS;
  - Training on set-up, maintenance procedures, proper use guidelines, reporting requirements, and understanding of results.
- Demonstrate proficiency on the device operation;
- Ensure the issued devices are properly maintained in accordance with the manufacturer's recommendations; and
- Discontinue the use of any malfunctioning device and:
  - Notify their immediate supervisor, and SIS;
  - Ensure a malfunctioning device is returned to the device vendor, SIS or other designated entity for repair, as determined by SIS.

Subject:	Number:
Mobile Identification Device Use	**INV-18**

Use of a Mobile ID Device

Mobile ID Devices provide Department Members with the ability to obtain identification information or confirm the identity and criminal history of an individual. A Department Member may use a Mobile ID device when the individual ***consents***; and

- There is reasonable suspicion the individual has committed a crime; or
- The use of a scan will establish or nullify the individual's identity as the subject of an arrest warrant; or
- The individual provided a false or fictitious name, residential address, date of birth or other identifying information; and/or
- For officer safety and situational awareness.

Department Members shall be aware that:

- When consent is given, the individual may limit or withdraw consent at any time. The use of the Mobile ID Device is **no longer authorized** and must stop immediately once consent is withdrawn; and
- A member shall not coerce a subject to submit to the use of the Mobile ID Device.

The use of Mobile ID Device without the consent of an individual is permitted under specific circumstances which include, but are not limited to, the following:

- Subsequent to arrest or probable cause to arrest an individual;
- Pursuant to a valid court order;
- When specifically required by statute;
- When authorized by Department Standard Operating Procedure (SOP) or Policy and Procedure;
- During a medical emergency where the individual is unable to provide consent and identification; or
- The identification of a deceased individual.

The use of a Mobile ID Device shall:

- Be used to check the individual's fingerprint(s) against the existing database; and
- Not replace traditional booking fingerprinting procedures, however it may be used prior to traditional booking or fingerprinting procedures.

Subject:	Number:
Mobile Identification Device Use	**INV-18**

Prohibited Use of Mobile ID Devices

Mobile ID Devices assigned to Department Members shall not:

- Be used for random or generalized investigative or intelligence gathering;
- Be used without consent, or other legal justification;
- Be used for prohibited profiling, unlawful detentions, or unlawful searches; and
- Be used for inquiring about a person's immigration status, consistent with INV-17, for the sole purpose of facilitating that person's detention or deportation by U.S. Immigration and Customs Enforcement (ICE).

Responsibility

Department Members shall:

- Document within the investigative reports the specific circumstances relied upon for using the Mobile ID Device based on training, SOP, and policy as verification that an arrest was justified and appropriate; and
- Ensure any identification is confirmed by additional means that shall be documented in the investigative report.

December 6, 2021	**INV-19**
Subject:	
Use of Facial Recognition Technology	

General

Facial recognition technology involves the ability to examine and compare distinguishing characteristics of a human face through the use of biometric algorithms contained within a software application. This technology can be a valuable investigative tool to detect and prevent criminal activity, reduce fraud, prevent individuals from becoming victims of identity theft, reduce an imminent threat to health or public safety, and help in the identification of persons unable to identify themselves or deceased persons.

The Department has access to the Massachusetts Registry of Motor Vehicles (MA-RMV) facial recognition system via a memorandum of agreement to support the investigative efforts of law enforcement within and outside the Commonwealth of Massachusetts. The Department does not authorize the use of any other facial recognition technology. The use of other facial recognition technology is prohibited without prior approval from the Office of the Superintendent.

Purpose

The purpose of this policy is to provide Department personnel with guidelines and principles related to utilization of the MA-RMV facial recognition system. The requirements imposed by this policy are in addition to any policies, procedures, requirements, restrictions, or directives imposed by the MA-RMV related to utilization of their facial recognition system. All utilization of the MA-RMV facial recognition system is for official use only.

Definitions

Biometric Data: Computerized data relating to the physical, physiological or behavioral characteristics of a natural person, which allow or confirm the unique identification of such person, including, but not limited to, facial recognition, fingerprints, palm veins, deoxyribonucleic acid, palm prints, hand geometry or iris recognition.

Biometric Surveillance System: Any computer software that performs facial recognition or other remote biometric recognition.

Facial Recognition: An automated or semi-automated process that assists in identifying or verifying an individual or capturing information about an individual based on the physical characteristics of an individual's face, head or body, that uses characteristics of an individual's face, head or body to infer emotion, associations, activities or the location of an individual; provided, however, that "facial recognition" shall not include the use of search terms to sort images in a database.

Subject: Use of Facial Recognition Technology	Number: INV-19

Definitions, continued

Facial Recognition Search: A computer search using facial recognition to attempt to identify an unidentified person by comparing an image containing the face of the unidentified person to a set of images of identified persons; provided, however, that a set of images shall not include moving images or video data.

Facial Recognition Software: A category of biometric software that maps an individual's facial features mathematically and stores the data as a faceprint.

Match: For the purposes of this policy only, situations where investigative follow up has determined that probable cause exists to believe that two photos are in fact one in the same person.

Applicability

These guidelines apply to the Department's use of the MA-RMV facial recognition system.

These guidelines do not apply to the Department's acquisition, possession, and use of personal electronic devices, such as cell phones or tablets that utilize facial recognition technology for the sole purpose of user authentication.

These guidelines do not apply to the Department's acquisition, possession, and use of automated video or image redaction software; provided, that such software does not have the capability of performing facial recognition or other remote biometric recognition.

These guidelines do not limit the Department's ability to receive evidence related to the investigation of a crime derived from a biometric surveillance system; provided, that the use of a biometric surveillance system was not knowingly solicited by or obtained with the assistance of a public agency or any public official in violation of any section or subsection of this policy or relevant law.

Subject: Use of Facial Recognition Technology	Number: INV-19

Permitted Use

Any law enforcement agency requesting a facial recognition search within the MA-RMV Facial Recognition System shall only do so through a written request submitted to the Department. All requests received shall be forwarded to the Department's Fraud Identification Unit.

A law enforcement agency may request such a facial recognition search for the following purposes:

- To execute an order, issued by a court or justice authorized to issue warrants in criminal cases, based upon specific and articulable facts and reasonable inferences therefrom that provide reasonable grounds to believe that the information sought would be relevant and material to an ongoing criminal investigation or to mitigate a substantial risk of harm to any individual or group of people; or
- Without an order to identify a deceased person or if the law enforcement agency reasonably believes that an emergency involving substantial risk of harm to any individual or group of people requires the performance of a facial recognition search without delay. Any emergency request shall be narrowly tailored to address the emergency and shall document the factual basis for believing that an emergency requires the performance of a facial recognition search without delay.
- This subsection shall not apply to the department of state police when performing investigatory functions related to the issuance of identification documents by the registrar of motor vehicles.

Procedures for Use of MA-RMV Facial Recognition System

Only trained and authorized users assigned to the Department's Fraud Identification Unit may utilize the MA-RMV facial recognition system.

User names and passwords to the MA-RMV facial recognition system are not transferable, must not be shared, and must be kept confidential.

Fraud Identification Unit personnel who receive a request to utilize the MA-RMV facial recognition system must review the submitted photograph to determine its suitability for comparison purposes. Photographs that are not suitable will not be submitted for analysis via the MA-RMV facial recognition system and the requestor will be notified. The Department prohibits the use of facial recognition technology to analyze composite images.

Department personnel shall log all law enforcement requests for searches related to the MA-RMV facial recognition system in the appropriate Department database to include the following information:

- A copy of any written request made for a facial recognition search;
- A copy of any court order, if applicable;
- Date and time of the request;

Procedures for Use of MA-RMV Facial Recognition System, continued

- Number of matches returned, if any;
- The database searched;
- Name and position of the requesting individual and employing law enforcement agency;
- The reason for the request, including, but not limited to, any underlying suspected crime;
- The entity to which the request was submitted;
- Data detailing the individual characteristics included in the facial recognition request;
- Requester's case number, file number, or incident number;
- Such documentation shall not be a public record, except as provided by applicable state law; and
- The Department shall report such documentation quarterly to the Executive Office of Public Safety and Security (EOPSS).

Reporting to EOPSS

The Department shall document each facial recognition search performed and shall provide such documentation quarterly to the Executive Office of Public Safety and Security.

Such documentation shall include:

- A copy of any written request made for a facial recognition search;
- The date and time of the request;
- The number of matches returned, if any;
- The database searched;
- The name and position of the requesting individual and employing law enforcement agency;
- The reason for the request, including, but not limited to, any underlying suspected crime;
- The entity to which the request was submitted; and
- Data detailing the individual characteristics included in the facial recognition request.

Reservations

These guidelines are set forth solely for the purpose of internal Department guidance. They are not intended to, do not, and may not be relied upon to create any rights, substantive or procedural, enforceable at law by any party in any matter, civil or criminal, nor do they place any limitation on otherwise lawful investigative and legal prerogatives of the Massachusetts State Police, or the Commonwealth of Massachusetts.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
June 29, 2023	**INV-20**
Subject:	
Covert Audio Recordings	

Policy

Investigations utilizing covert surveillance/recording technology shall be conducted in accordance with applicable federal and state laws and regulations, and Department policy.

Authorized covert recordings shall only be made by trained Department members utilizing Department approved technology.

The use of monitoring technology for the purposes of officer safety, that does not generate any recorded or discoverable data is allowed. Members must familiarize themselves with all capabilities of the technology to ensure adherence to this policy.

The Department shall maintain records related to what covert recording technologies are approved for use and which members have been trained and authorized to use covert recording technology.

Definitions

Covert Audio Recording – An audio recording of the voice of one or more individuals without their knowledge or consent. This includes any video recording made in conjunction with an audio recording.

Non-Consensual Recording – A covert audio recording that is made without the knowledge and consent of any party to the conversation. *A wiretap warrant is required to make non-consensual recordings in all circumstances.*

One-Party Consensual Recording – A covert audio recording that is made with the knowledge and consent of at least one party, but not all parties, to a conversation.

All-Party Consensual Recording – An audio recording, commonly referred to as a two-party consensual recording, that is made with the knowledge of all participants in the conversation that is being recorded. All-party consensual recordings are <u>not</u> considered to be covert audio recordings and are not further contemplated in this policy. When made during the course of a criminal investigation, all-party consensual recordings shall be considered evidence, preserved in accordance with state records retention laws, and only deleted pursuant to the provisions of 19-SM-03 Procedures for Disposition of Evidence, Contraband, and/or Controlled Substances.

Covert Audio Recordings

Covert audio recording during the course of a criminal investigation is prohibited without documented supervisory approval.

Members seeking to utilize covert audio recording methods of any kind shall:

- Successfully complete any training on the covert recording technology that is required by their Division Commander prior to the use of the technology in a criminal investigation.
- Possess a full understanding of the capabilities of the covert recording technology to be employed prior to using the technology in a criminal investigation.
- Not initiate any covert recording prior to obtaining supervisory approval unless exigent circumstances exist. If initiation without prior approval is undertaken the recording member shall document the circumstances in a written report to be filed with their immediate supervisor upon expiration of said exigency.
- Indicate the intended use of covert recordings in operations plans.
- Obtain written authorization, when applicable, from a Supervisory Special Agent or Assistant United States Attorney, for use of Department equipment to make one-party consensual recordings in federal investigations.
- Prior to making any one-party consensual recordings in state investigations, either obtain a warrant pursuant to Commonwealth v. Blood 400 Mass. 61 (1987) or confirm that the prosecuting agency of jurisdiction does not believe that a warrant is legally required to make the intended recordings.
- Not utilize personal devices to create or store recordings of covert operations.
- Adhere to relevant federal law as well as the policy and procedures of the lead federal law enforcement agency when seeking to make one-party consensual recordings in a federal investigation.
- Secure a wiretap warrant when seeking to make non-consensual recordings in either state or federal investigations pursuant to Massachusetts General Laws c.272§ 99 and/or the Title III of The Omnibus Crime Control and Safe Streets Act of 1968.
- Document the existence and supervisory approval of all covert recording(s) within a written investigative report.
- Adhere to the notification requirements of ADM-16 Notifying Prosecuting Agencies Regarding Evidence with all covert audio recordings.

Creating a Clear and Complete Record

In order to ensure that the circumstances surrounding every covert recording are clear and fully documented, members shall:

- Not share covert recording accounts that are electronically assigned to specific members, since this can give the impression that the covert recording was made by the account holder rather than the member who actually made the recording. (This does not apply to covert recording technology that is intended to be shared and that does not save recordings in a virtual file/account assigned to a specific member.)
- Verify that the correct time is displayed on covert recording technology that imprints the date and time on the recording or in the metadata of the recording.
- Whenever practicable, record a preamble at the beginning of every covert recording that clearly indicates the date, time, location, name of the officer making or supervising the recording, code name of any confidential informant making or participating in the recording, and the case number for which the recording is being made.
- Document the date, time, location, name of the officer making or supervising the recording, code name of any confidential informant making or participating in the recording, and the case number for which the recording is being made within a written investigative report.
- Label the covert recording digital file that is created with the case number and a brief description of the event captured on the recording (e.g. 2023-000-0000 UC Buy from John Doe in Fitchburg 5-25-23 @ 0000 hrs.).

Supervisory Responsibilities

Supervisors receiving requests from personnel seeking to employ the use of covert recordings during an investigation shall:

- Confirm the technology is appropriate for the investigation; and
- Ensure the technology to be used has been approved by their Division Commander.
- Confirm personnel who will utilize the covert recording equipment are fully aware of its capabilities and have successfully completed any training on the technology that has been mandated by their Division Commander.
- Conduct ongoing reviews of covert recordings for adherence to applicable federal and state laws and regulations, and Department policy.

Subject:	Number:
Covert Audio Recordings	**INV-20**

Preservation and Storage

- Covert recordings shall be considered evidence, preserved in accordance with state records retention laws, and only deleted/destroyed pursuant to the provisions of 19-SM-03 Procedures for Disposition of Evidence, Contraband, and/or Controlled Substances.

- Whenever possible, an exact copy of the original recording shall be attached to an ACISS report in the ACISS case for which the recording was made. Uploading an exact copy of an original recording into ACISS in this fashion shall satisfy this provision to preserve the recording as evidence.

- In circumstances where it is not possible to upload an exact copy of the original recording into ACISS, members shall upload an exact copy of the original recording to a stable digital storage medium (e.g. hard drive, USB Drive, or CD/DVD) and enter this stable digital storage medium into evidence at an involved station/section/unit in accordance with INV-11A Evidence/Contraband/Property Intake-Storage.

- Pursuant to INV-01A Case Management, the assigned Case Officer is responsible for accounting for all the evidence in a case, including all covert recordings. The Case Officer is also responsible for coordinating with the prosecutorial authority to ensure that discovery obligations are met. Additionally, the production of all discovery to prosecuting agencies shall be documented in a Department report that is maintained within the case file.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**SOC-01**
Subject:	
Hazardous Materials	

Policy

Department personnel, unless properly equipped and trained, shall not be deployed into areas that have been contaminated or face an immediate and substantial threat of contamination with a hazardous material.

Hazardous material response training shall be provided to trainees during the Recruit Training Troop and subsequently to veteran Department members through annual awareness training.

Definition

Hazardous Materials: Chemicals, biological agents or organisms, or radiological substances that are damaging to health or property.

Responding Members

If…	Then members shall…
There is no known or potential presence of a hazardous material on scene; or There is a hazardous material on scene, but it is properly secured and poses no threat of release:	• Respond with due caution; and • Ensure that the Emergency Response Guidebook is accessible.
It is possible to ascertain from a safe distance the identity of a substance or cargo via use of placards or other identification:	• Relay information to the Desk Officer; and • Consult the Emergency Response Guidebook.
There is an immediate and substantial threat of the release of a hazardous material on scene:	• Consult the Emergency Response Guidebook for guidance as to maintaining a safe distance from the area of possible contamination.
Dangerous conditions are observed:	• Take immediate action to ensure their own safety, the safety of other responding officers or personnel, and the safety of the general public; and • Communicate the nature of the threat to the Desk Officer.

Desk Officer

Upon receiving a report of an incident that may involve a hazardous material, the Desk Officer shall make every reasonable effort to obtain available information from the scene.

The following information shall be obtained and relayed to responding members and to the Troop Duty Officer:

- The type of container/vehicle;
- Whether the container/vehicle is leaking;
- Department of Transportation (DOT) placards, labels or numbers;
- Carrier name and any information found in shipping papers;
- Local area road and weather conditions; and
- Other responding resources and/or agencies.

Upon receiving a report of an incident that may involve a hazardous material, the Desk Officer shall notify:

- Assigned patrol and other members in the area;
- Troop Duty Officer;
- Local police department;
- Local fire department; and
- Department of Fire Services-Regional Hazardous Materials Team: (877) 385-0822.

Desk Officer-Actual Release or Threat of Release

On receiving a report of an incident involving the actual release or threat of release of a hazardous material, the Desk Officer shall:

- Immediately notify the Troop Duty Officer;
- Notify available resources to include: local fire department, Department of Fire Services-Regional Hazardous Materials Team, Commercial Vehicle Enforcement Section, for initial emergency hazmat actions;
- Obtain expertise from the Emergency Response Guidebook regarding:
  - Scope of contamination; and
  - Minimum safe evacuation zone for unprotected individuals prior to deploying Department personnel; and
- Notify the Massachusetts Department of Environmental Protection at (888) 304-1133 and provide the following information:
  - Location;
  - Type and quantity of material released;
  - Suspected impacts if known (catch basin, wetlands);
  - Name, address, and phone number of carrier (if known);
  - Special conditions which responders should be aware of to facilitate the safe mitigation of the release; and
  - Any other information which may be helpful.

Troop Duty Officer

The Troop Duty Officer shall:

- Dispatch a supervisor to the scene;
- Notify the Troop Commander;
- Notify GHQ Communications at (508) 820-2121; and
- When applicable, notify the Commercial Vehicle Enforcement Section at (978) 369-1004, or if after hours, GHQ Communications at (508) 820-2121.

Patrol Supervisor

Supervisors shall establish an outer perimeter, referencing the Emergency Response Guidebook and available expertise to determine an appropriate distance from the incident.

Supervisors shall:

- Ensure that Department personnel are not deployed contrary to the provisions of this policy;
- Establish a command post upwind and uphill (if possible) and at a sufficient distance from the hazard; and
- Follow incident command procedures.

GHQ Communica-tions

If radioactive material is involved, the GHQ Communications Section shall notify the Department of Public Health Director of Radiation Control Program (617) 242-3055.

If no determination has been made as to who spilled the hazardous material, the GHQ Communications Section OIC shall notify the National Response Center (NRC) at (800) 424-8802.

Hazardous Materials Team

The head of the local fire department or designee shall activate the Department of Fire Services-Regional Hazardous Materials Team.

Available Official Expertise

The following are resources for information on hazardous materials:

- State expertise:
  - Department of Fire Services-Regional Hazardous Materials Team at (877) 385-0822;
  - Massachusetts Department of Environmental Protection at (888) 304-1133;
  - Department of Public Health Director of Radiation Control Program (617) 242-3055;
  - Bomb Squad; and
  - Commercial Vehicle Enforcement Section.

Subject:	Number:
Hazardous Materials	**SOC-01**

Available Official Expertise, continued

- Federal expertise:
  - CHEMTREC at (800) 424-9300; and
  - The National Response Center at (800) 424-8802 provides emergency chemical/biological assistance twenty-four (24) hours a day.

- Additional resources:
  - Querying MQ in the task field of the CJIS computer, and entering the placard information; and
  - Consulting the Emergency Response Guidebook.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**SOC-02**
Subject:	
Bomb Threats/Explosive Incidents	

Policy

The Bomb Squad is tasked with rendering safe any explosive (e.g., Improvised Explosive Device (IED), military or commercial explosives) within the Commonwealth of Massachusetts. The Fire and Explosion Investigation Unit (FEIU) Commander or designee is responsible for determining a response to any bomb threat.

The Department shall:

- Maintain and support a Bomb Squad comprised of members with specialized training, expertise, and equipment to include explosive detection K-9s.

The Bomb Squad shall:

- When assigned, assist officers from the Department and from other local, state, federal and military agencies to deal with potential life threatening explosive related incidents, chemical, biological, radiological and nuclear (CBRN) incidents as well as clandestine drug lab activity;
- Train first responders in explosives and IED recognition; and develop, under the direction of the Section Commander, a unit specific Standard Operating Procedure (SOP) which shall be maintained and updated as necessary.

Purpose

- To establish and define the role of the Bomb Squad within the Division of Investigative Services - Fire and Explosion Investigation Unit (FEIU), and to establish guidelines for utilization and activation of their members.

Response Guidelines

Since the validity of a bomb threat cannot be determined initially, the decision to evacuate or to re-occupy the threatened premises is the responsibility of the owner or manager of the premises or the head of the fire department or designee.

Department members shall not order an evacuation based only on a threat. If advice is sought from the Department, the recommendation should be to follow the Massachusetts Bomb Threat Response Guidance.

If a suspected explosive device or suspicious package has been located or if there is a perceived threat, the head of the fire department or designee has the authority to order an evacuation under MGL c.148.

Utilization of Bomb Squad

Bomb Squad Team members are available twenty-four (24) hours a day for:

- Rendering safe any explosive (e.g., IED, military or commercial explosives);
- Security sweeps for high profile events and visiting dignitaries;
- Response and technical assistance/advice for bomb threats;
- Weapons searches with Explosive K-9s;
- Homeland Security assignments;
- Retrieval and remediation of energetic materials to include ammunition, fireworks, gun powder, etc.; and
- Other special events/incidents as assigned.

Emergency Activation Protocol

Requests for the Bomb Squad shall be made to the Troop Duty Officer and shall include:

- Date and time of request;
- The name, rank, and agency name of the requesting officer;
- The name of the primary point of contact and a direct call-back number;
- The nature of the request;
- Primary and secondary Department members dispatched; and
- The exact location of the incident and any designated staging areas.

The Troop Duty Officer shall make appropriate Daily Administrative Journal entries.

Activation/ Contact

Type of Request	Contact
Emergency	• Troop Duty Office of jurisdiction.
Non-emergency	• During business hours contact the FEIU at 978-567-3310. • After business hours contact the Troop Duty Office of jurisdiction.

Authority

Any officer who encounters or seizes any bomb or other high explosive is required under MGL Chapter 266, § 102D(a) to make immediate notification to the State Fire Marshal. Bomb Squad members shall assume complete control and authority of any explosives render-safe procedure under Incident Command System (ICS) protocols.

While at an active scene, command and control of the scene shall be exercised only by:

- Bomb Squad Commander or designee;
- FEIU Commander or designee;
- Unified Commanders on scene (ICS);
- Division of Investigative Services Commander or designee; or
- Superintendent/Deputy Superintendent.

Response Protocols

All Department members shall take appropriate measures to ensure the safety of people and property while awaiting the arrival of the Bomb Squad.

The first on-scene or investigating member shall assess the situation and determine the need for additional resources including, but not limited to:

- Local Police/Fire Department(s) as well as additional Department resources to include: Crime Scene Services, State Police Detective Unit of jurisdiction, Commonwealth Fusion Center;
- Emergency Medical Services (EMS); and
- Traffic control.

To reduce the risk of detonation, members responding to an explosives threat or incident shall NOT:

- TOUCH, MOVE or DISTURB any suspicious objects, items or packages;
- Allow anyone within three-hundred (300) feet of a suspicious device;
- Allow anyone to be in the path of possible shrapnel or flying glass;
- Utilize electronic communication devices within close proximity to the unattended/suspected item; or
- Direct flashlight beams onto a possible device or use a camera flash (in order to prevent activation by photoelectric cell).

Never rule out the <u>possibility of a secondary or tertiary</u> device.

Responding members shall remain on the scene until properly relieved.

Evidence Considerations

Evidence and materials collection shall be coordinated by FEIU members. Evidence custody shall remain with the lead State Police case officer.

After Action Reporting

Following the completion of any critical incident, Bomb Squad members may be debriefed.

The Bomb Squad Commander or designee is responsible for the completion of any after action reports or Bomb Squad reporting as applicable. After Action Reports shall be forwarded to the Division of Investigative Services Commander for review.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Policy Date:	Number:
May 25, 2023	**SOC-03**
Subject:	
Emergency Planning	

Policy

The Department shall develop and implement an emergency operational response strategy to address potential public safety threat(s) or the actual occurrence(s) as identified in Homeland Security Presidential Directive 8 (HSPD-8).

Purpose

To maintain and ensure the Department's compliance with HSPD-8 with regards to emergency planning.

General Considerations

The Department must plan for foreseeable emergencies. Certain incidents require preplanning by Troop/Section Commanders within specific operational areas. Examples of these include:

- A general emergency that may result from a natural or man-made disaster, including civil disorder, acts of terrorism and / or other unusual occurrences;
- Disasters including floods, hurricanes, earthquakes, explosions, and tornadoes;
- Civil disorders including rioting and other acts of violence.
- Planning for special operations that require general emergency planning concepts; and
- Plans for application to site and situation specific circumstances when time allows, such as hostage or disturbances at correctional facilities.

Plans may be general initially and then become specific. In some circumstances, such as localized weather emergencies or dignitary protection details, certain information may not yet be known, but as much general information as possible should be preplanned with specifics inserted as the emergency occurs; emerging data or circumstances can be addressed as soon as they develop or can be predicted. Target areas and populations should be identified with equipment, personnel needs, the location of staging areas and emergency shelter locations identified beforehand.

General Considerations, continued

Planning for emergency operations promotes efficiency. Preplanning allows for immediate and decisive action that can minimize loss of life, reduce property damage and permit involved authorities to fulfill their responsibilities. Other efficiencies include:

- Emergency equipment can be acquired and readied for deployment;
- Personnel requirements can be more accurately predicted;
- Coordination procedures can be devised and tested;
- Different strategies and tactical options can be assessed;
- Contingency responses can be developed; and
- Durable intelligence information can be assessed before the emergency occurs.

General Plan Provisions

Emergency Plans should include the following provisions, as necessary:

- Communications;
- Situation Maps;
- Field Command Posts;
- Chain of Command (to include other agencies);
- Casualty information;
- Community Relations;
- Public Information;
- Rumor Control;
- Other Agency Support & Liaison;
- Military Support;
- Martial Law;
- Public Facility Security;
- Transportation;
- De-Mobilization Procedures;
- Court & Prosecutorial Liaison;
- Legal Authority;
- Post Occurrence (Aftermath) Duties; and
- After Action Incident Reports.

Responsibilities

Position	Duties
Colonel/ Superintendent	Shall: • Designate a Commissioned Officer as the Emergency Planning Officer; • Review and approve Emergency Operation Plans (EOPs) and Incident Action Plans (IAPs) submitted by the Emergency Planning Officer; and • Ensure that all EOPs written after October 2005 are National Incident Management System (NIMS) compliant.

Responsibilities, continued

Position	Duties
Emergency Planning Officer (EPO)	Shall: • Maintain all Department emergency response plans and standard operating procedures (SOPs) devised for nuclear facilities, prisons, natural or man-made disasters, and similar circumstances; and shall also retain copies of Troop emergency response plans devised for DOC facilities; • Study, draft and maintain appropriate contingency plans for foreseeable circumstances or events for which a Department response may be required; • Prepare EOPs and IAPs and submit them to the Colonel/Superintendent; • Coordinate the creation of EOPs and IAPs with Division Emergency Planning Coordinators; • Annually review and update the EOPs and IAPs; • Ensure that all EOPs written after October 2005 are NIMS compliant; • Coordinate Department contingency planning and liaison with the Massachusetts Emergency Management Agency (MEMA) and the Military Division of the Commonwealth; • Ensure plans for a Department response to terrorism and civil disorder are created and maintained; • Review Department emergency response plans at least annually and report the results of this review in a written report to the Division Commander of Homeland Security and Preparedness; and • Ensure the Department maintains a minimum of a 60 day supply of: Personal Protective Equipment (PPE), decontamination and cleaning products, and individual hand sanitizers, unless otherwise directed by the Colonel.

Responsibilities, continued

Position	Duties
Division Commanders	Shall: • Designate a Commissioned Officer as the Division Emergency Planning Coordinator; • Evaluate EOPs and IAPs through simulation exercises prepared by the Emergency Planning Officer; • Report deficiencies in EOPs and IAPs to the Emergency Planning Officer; and • Ensure that all EOPs written after October 2005 are NIMS compliant.
Troop/Section Commanders	Shall: • Designate a Commissioned or Non-Commissioned officer as the Troop/Section Emergency Planning Coordinator; • Evaluate EOPs and IAPs through simulation exercises prepared by the Emergency Planning Officer; • Report deficiencies through channels in EOPs and IAPs to the Emergency Planning Officer; and • Each Troop Commander shall develop, at a minimum, the framework of a plan to implement an initial response for the following types of incidents: o Natural or man-made disaster; o Civil disturbances and other unusual occurrences; o Hostage situations and barricaded persons; o VIP protection details; and o Other special events.
Troop/Section Emergency Planning Coordinator	Shall: • Assist the Division Emergency Planning Coordinator with the establishment of EOPs and IAPs; • Prepare and annually update, the Troop/Station/Section/Unit Emergency Planning Manual, EOPs and IAPs; and • Act as the liaison with the Division Emergency Planning Coordinator.

Emergency Planning Manual

The Department shall maintain and annually update an Emergency Planning Manual for the purpose of responding to and controlling hazardous situations through the prudent use of Departmental and external resources.

The Emergency Planning Manual shall be located at every State Police facility. It shall be updated annually, or as required.

The Manual shall include all current EOPs, IAPs, operational guidelines, on site operational instructions, personnel and equipment resource inventories and other necessary information, including but not limited to:

- Personnel and skills;
- State Police property and buildings;
- Supplies (food, fuel, clothing);
- Vehicles;
- Arrest/confinement procedures;
- Topographical maps;
- Support equipment;
- Incident Command Posts;
- Field Command Posts;
- Communications;
- Miscellaneous Equipment (generators, boats, etc.);
- Fleet vehicles;
- After action reporting;
- ICS Form 205;
- ICS Form 205A-OS;
- ICS Form 206; and
- Identified Staging Areas.

Drafting Emergency Plans

When drafting an emergency response plan or SOP:

- Describe all adverse elements;
- Use available intelligence summaries (Fusion Center); and
- Involve partner agencies with planning or operations, including but not limited to:

Local police departments;
Local fire departments;
MEMA;
Military Division of the Commonwealth;
MassDOT;
Massport;
Department of Corrections (DOC);
MA and Federal Courts;
Massachusetts Water Resources Authority(MWRA);
Department of Conservation and Recreation (DCR);
Mutual aid states (NESPAC);
Alcohol, Tobacco, and Firearms (ATF);
U.S. Secret Service;
Homeland Security;
Federal Bureau of Investigation (FBI);
National Transportation Safety Board (NTSB);
Federal Aeronautics Administration (FAA); and
U.S. Department of Defense.

Drafting Emergency Plans, continued

A plan should begin with a general assumption that an emergency will develop within the Commonwealth and:

- Normal procedures will not adequately protect life or property or preserve order; and
  - Will be beyond the capabilities of local authorities and shall require Department assistance; or
  - Will be beyond the capabilities of local authorities and the Department and may require National Guard or federal assistance to protect life and property and maintain order;

- That a national emergency may require the full resources of the Department to conduct emergency operations; and

- Immediate and decisive action is required to minimize loss of life, reduce property damage and permit involved authorities to fulfill their responsibilities.
  - Emergency equipment can be acquired and readied for deployment;
  - Personnel requirements can be more accurately predicted;
  - Intra-Department and interagency coordination procedures can be devised and tested;
  - Different strategies and tactical options can be assessed;
  - Contingency responses can be developed; and
  - Durable intelligence information can be assessed before the emergency occurs.

Planning Exercises

The expanding scope and sophistication of emergency operations, along with increased possibilities of acts of terrorism, require agency personnel to quickly act to stabilize and control emergency situations. Proactive emergency planning exercises for these circumstances shall be conducted as follows:

- Documented annual rehearsals and training exercises regarding emergency incidents are essential for all agency personnel to be fully prepared for actual occurrences and special operations;
- Training exercises may involve mock exercises, actual exercises, tabletop exercises, in-service training and/or Troop/Section/Unit training;
- These rehearsals will be used to evaluate the effectiveness, efficiency and applicability of emergency plans in different situations and will include the involvement of those agencies expected to participate in the actual incident;

Planning Exercises, continued

- The Division Commander, designated as lead by the Colonel/Superintendent, will determine the extent, scope, and format for the exercise;
- In the event of an actual implementation of an Emergency Plan due to a natural or man-made disaster incident, the actual implementation of the plan will replace any planned exercise;
- The After Action Incident Report required for all natural or man-made disasters will serve as the critique of the Emergency Plan; and
- A documented analysis and evaluation of any Incident Command System activation incidents, as well as all intra-agency training & rehearsals, will be prepared at least every three years by the Division Commander of Homeland Security and Preparedness or designee.

Annual Training

Troop/Section Commanders shall coordinate annual emergency operations/incident command training exercises. This exercise may be limited to Troop/Section drill, or may include outside agencies such as local police/fire departments, EMS teams, state level response teams, media, non-profit agencies and other entities related to the exercise. When conducted in conjunction with other agencies, the exercise may consist of a tabletop exercise, drill, emergency operations center simulation, or functional exercise involving actual response scenarios.

Troop/Section Commanders shall submit a summary of incident command training exercises conducted to the Emergency Planning Officer no later than October 1st of each year. Upon review by the Division Commander of Homeland Security and Preparedness, the summaries shall be forwarded to the Office of the Superintendent.

The Office of the Division Commander of Homeland Security and Preparedness shall maintain a file of all incident command exercises conducted and may recommend future training or exercises based on prior training or identified need.

Emergency Plan Availability

Any commander may request an existing emergency plan from the Emergency Planning Officer and/or from a Section/Troop headquarters.

Emergency plans containing confidential or sensitive information shall be securely maintained.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**SOC-03A**

Subject:

Emergency Operations Center (EOC)

Policy

The Department realizes the necessity of an effective response to public safety emergencies as a result of severe weather, terrorist activity, violent protest, natural and/or man-made disasters, through the prudent use of available resources.

Purpose

To provide guidance to personnel regarding the activation and operation of the Department's Emergency Operations Center (EOC).

State Police Emergency Operations Center

The Superintendent/Deputy Superintendent shall activate the EOC when deemed necessary. The EOC shall:

- Coordinate the deployment of Departmental resources in response to an emergency or incident;
- Coordinate the deployment of responding officers to an incident or an incident staging area;
- Direct the security level of response to a potential/actual threat; and
- Operate in conformance with established EOC Guidelines.

State of Emergency

Upon the declaration of a "State of Emergency" by the Governor, the Superintendent/Deputy Superintendent has the authority (within prescribed limits) to commit resources of the Department, or request resources from outside the Department, as deemed necessary, to mitigate the effects of the emergency and to minimize the disruption to public safety.

The Superintendent/Deputy Superintendent shall activate the EOC and shall establish the appropriate security level when necessary.

Upon the declaration of a "State of Emergency" after normal business hours the Watch Center Unit shall immediately notify:

- Superintendent/Deputy Superintendent;
- The EOC on-call personnel;
- Division Commanders; and
- Division of Homeland Security and Preparedness- Emergency Management Unit.

Security Level Guidelines

Upon authorization by the Superintendent/Deputy Superintendent, the EOC shall establish the appropriate security level when necessary. The EOC Director may add, delete, or modify the listed security level procedures in accordance with prevailing circumstances. Security levels and the corresponding response(s) within each level shall be determined by the specific credible information available at that time.

Security Level Procedures

Level	Tasks
I	• ID Check enforced at State Police facilities and identified sites; • Note and report suspicious circumstances, packages and activities; • Ensure building integrity and security; and • Exercise heightened caution when responding to calls for service.
II	*Includes Tasks Assigned At Level I and:* • Implement physical security measures and post security personnel as appropriate; • Identify all vehicles within operational and support areas; • Conduct cursory checks for suspicious items, persons and vehicles as necessary; • Verify and inspect all inbound deliveries and services; • Check delivery and service persons for authenticity with their respective companies; • Exercise extreme caution when responding to suspicious calls for service; • Monitor potential target areas; • All personnel shall wear ID cards in State Police facilities unless in duty uniform; and • Escort all visitors (non-MSP) in State Police facilities.
III	*Includes Tasks Assigned At Levels I , II, and:* • Erect barriers and obstacles (e.g. Jersey Barriers) to control traffic; • Suspend all non-essential contract work or deliveries; • Conduct detailed searches of all operational areas and vehicles; and • Limit or restrict parking around sensitive areas and buildings.

Subject:	Number:
Emergency Operations Center (EOC)	**SOC-03A**

Security Level Procedures, continued

Level	Tasks
IV	*Includes Tasks Assigned At All Levels and:* • Verify the identities of all personnel and need for access; • Deny access to all personnel not associated with local, state or federal agencies; and • Restrict/deny parking in controlled areas.

Responsibilities

Position	Duties
Superintendent/ Deputy Superintendent	Shall: • Review available information provided by the EOC; • Ensure that the Department is operating at the appropriate security level; • Notify the EOC in the event that conditions warrant a change to the existing security level; • Assign the EOC Director; • Authorize the EOC Director to disseminate security level changes throughout the Department; and • Ensure EOC guidelines are developed and kept current.
Emergency Operation Center Director	Shall: • Collect and analyze information regarding Department security levels during personnel redeployment; • Forward recommendations that warrant a change to the Security Level or procedures to the Superintendent/Deputy Superintendent; • Immediately notify the Division Commanders, Commonwealth Fusion Center, Watch Center Unit, and the Emergency Planning Officer of any changes to the security level; • Disseminate security level changes to each Division/Troop/Station/Section/Unit via radio, telephone, internet, fax or any other means as necessary; and • Develop EOC guidelines as directed by the Superintendent/Deputy Superintendent.

Responsibilities continued

Position	Duties
Division Commanders	Shall: • Ensure compliance with the appropriate security level and the established procedures; and • Ensure officers under their command are informed of changes to the security level.
Troop/Station/ Section/ Unit Commanders	Shall: • Notify members who are reporting for duty or members who are re-deployed of the current security level and the established procedure(s) in place.
Sworn/Essential/ Non-essential Personnel	Shall: • Familiarize themselves with the current security level and established procedures.
Commonwealth Fusion Center	Shall: • Provide information to the EOC to assist in situational awareness and development of a common operating picture; • Provide the EOC with a secure, comprehensive mechanism for the timely exchange of information if requested; • Provide the EOC with accurate and timely intelligence products such as bulletins, intelligence and informational briefings, and strategic assessments; • Provide the EOC with direct analytical support for events involving precursor criminal activity; and • Provide the EOC with awareness of priority intelligence requirements and of indicators of threats to the Commonwealth.
Watch Center Unit	Shall: • Provide notification of a State of Emergency as directed by this policy; • Act as the Department's point of contact during a State of Emergency until the EOC is functional; and • Provide assistance to the EOC as directed by the Division Commander of Homeland Security and Preparedness or designee.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**SOC-03B**
Subject:	
Response to Emergency Situations	

Policy

The Department realizes the necessity to effectively respond to public safety emergencies as a result of severe weather, terrorist activity, violent protest, natural and/or manmade disasters, through the prudent use of available resources.

Purpose

To provide guidance for the Department's response efforts to public safety emergencies.

Emergency Operations Center (EOC)

The Superintendent/Deputy Superintendent shall activate the Emergency Operation Center (EOC) when deemed necessary. The EOC shall:

- Coordinate logistics for Troop/Station/Section/Unit personnel redeployment; and
- Operate under established EOC Command Coordination guidelines.

Stages of Personnel Redeployment

The Superintendent/Deputy Superintendent shall authorize the EOC to initiate the following action during the potential threat or occurrence of an emergency/incident.

	If…	Then…
Stage I Redeployment of Personnel	A threat or occurrence of an emergency or incident raises the potential for a shift to be held over or the redeployment of sworn personnel…	• Alert personnel of potential shift hold over and/or prepare for deployment; • Temporarily re-deploy an appropriate number of sworn personnel within the affected Troop(s) and Division; and • Hold over an appropriate number of on-duty sworn personnel.

Stages of Personnel Redeployment, continued

	If…	Then…
Stage II Redeployment of On-Duty Personnel	A threat or occurrence of an emergency or incident creates a situation that is expected to require additional sworn personnel deployment beyond Stage I deployment	• Re-deploy sworn on duty personnel as appropriate from the: o Division of Field Services; o Division of Investigative Services; o Division of Standards and Training; and o Division of Administrative Services.
Stage III Redeployment of All Sworn and Essential Personnel	A threat or occurrence of an emergency or incident requires a full deployment of sworn and essential personnel.	• Deploy all available sworn and essential personnel as necessary; and • The Superintendent/ Colonel may initiate the cancellation of time-off and establish extended work hours as appropriate.

Declaration of State of Emergency

Upon the declaration of a "State of Emergency" by the Governor, sworn and essential civilian personnel (excluding personnel on suspension, injury, or other approved leaves) shall immediately:

- Contact their duty assignment supervisor or other supervising officer within the chain-of-command for specific instructions.

The Superintendent/Colonel may initiate the cancellation of time-off and establish extended work hours as appropriate pursuant to Unit 5A State Police Association of Massachusetts Collective Bargaining Agreement Article 8 § 1D.

Security Level Guidelines

Upon the authorization by the Superintendent/Deputy Superintendent, the EOC may establish a specific security level in conjunction with personnel redeployment or when circumstances dictate. The EOC Director may add, delete or modify security level procedures when necessary. Refer to SOC-03A for security level guidelines.

Responsibilities

Position	Responsibilities
Division Commander	Shall: • Ensure compliance with the appropriate security level procedures; and • Ensure officers under their command are informed of changes to the security level.
Troop/Station/ Section/ Unit Commander	Shall: • Notify members who are reporting for duty or members who are re-deployed of the current security level and the established procedures in place.
Sworn/Essential/ Non-essential Personnel	Shall: • Familiarize themselves with the current Security Level and established procedures.
Incident Management Assistance Team	Shall: • Provide statewide incident management support for all Department emergency operations, on a 24-hour basis; and • Provide Incident Command System (ICS) compliant framework/systems to Incident Commander(s) (IC) when requested.

Emergency Response ICS Framework

The Incident Command System (ICS) provides the basis for response once an incident or event requires more than a single agency response, is multi-jurisdictional, extends into multiple operational periods, or requires the assistance of highly trained and specialized resources to assist in the tactical response and/or management of the incident or preplanned event. Refer to SOC-03D Incident Command System (ICS).

First On Scene

The initial arriving member is critical for assessing the nature and extent of incidents, and for initiating ICS-based response when needed. Upon arrival at the incident, the initial arriving Critical Incident Responder/Supervisor becomes the IC until they are relieved or command is transferred. The initial arriving Critical Incident Responder/Supervisor should ensure that the following critical tasks are initiated:

- Determine nature & scope of incident;
- Establish command & a Command Post (CP). Announce CP location by radio;
- Establish communications with dispatch, Troop Duty Officer and assigned officers;
- Identify and secure the Hot Zone(s). Announce location(s) by radio;
- Establish inner & outer perimeters. Announce locations by radio;

First On Scene, continued

- Request resources as needed. Cancel outstanding request(s) upon arrival of requested resource(s);
- Establish and secure a staging area between the inner & outer perimeters. Announce location by radio;
- Designate a Staging Area Manager. Announce by radio;
- Consider the needs of special populations, including but not limited to:
  - schools,
  - hospitals,
  - nursing homes, and
  - known disabled persons;
- Reassess each step periodically; and
- Designate a Public Information Officer ("PIO") who shall establish and announce by radio the Media Staging Area in consultation with the IC.
  - All media inquiries shall be directed to the PIO ("Speak with one voice").

Incident Commander

Depending on the circumstances, the IC may be a Police, Fire/Rescue, EMS, federal, or other official. Where substantial police and fire/rescue objectives or resources are involved, a Unified Command will often be created, including senior fire and police officials, as well as officials from other public or private sector agencies / organizations with a major stake in the incident.

- NOTE: In the event of a Hazardous Materials incident, a Unified Command must be established. (SARA Act, 1986).

Direction from Incident Commander

All personnel responding to a critical incident, request for assistance, mutual aid request or responding to any critical incident requiring interagency assistance are subject to the direction and control of the IC regardless of the IC's rank, department or agency. This command structure continues for the duration of the event and until the IC is relieved or command is transferred. Supervisors from all departments and agencies are responsible for implementation of this requirement.

Uncontrolled Deployments

Uncontrolled deployments (sometimes referred to as self-deployment or self-dispatching), although initiated with good intentions, can create confusion, cause significant problems at crime and emergency scenes, and can lead to the destruction or inadmissibility of evidence, or injuries to self-dispatching individuals or assigned personnel. These and other forms of unauthorized and/or unreported presence at incidents/events, and unauthorized departures are inconsistent with ICS principals, and may not be eligible for compensation or reimbursement.

Uncontrolled Deployments, continued

The highest-ranking supervisor responding from each agency is responsible for the control and coordination of all personnel from that agency and will coordinate that agency's response with the IC. The responding supervisor is responsible for deploying only the amount of personnel needed and requested by the IC. Department members shall not self-deploy to incidents.

Incident Command Post

The IC shall establish an Incident Command Post ("ICP," can be a building or vehicle) and advise dispatch of that location. Dispatch shall advise all on-scene and responding personnel of that information. The IC shall remain at and operate from the ICP. The IC may move the ICP if its location is threatened by expanding circumstances or hazards. If moved, its new location must be announced immediately to all personnel and to dispatch.

Liaison Officer

The IC shall designate a Liaison Officer, who shall be the point of contact between all Critical Incident Responders and the IC. The Liaison Officer shall meet and brief all responding Agency Representatives at a location to be determined, such as the ICP or the Staging Area.

Staging Area

The IC shall establish a Staging Area between the inner and outer perimeters. It should be large enough to accommodate the required resources and close enough to the incident to make tactical deployments effective and timely. All responding resources shall respond to the Staging Area for check-in unless otherwise directed by the IC. Resources should not respond to the ICP unless directed to do so by the IC or their designee.

Staging Area Manager

The IC shall designate a Staging Area Manager (SAM), who shall have authority for check-in and accountability of Critical Incident Responder arrivals and departures. The SAM will remain in and operate from the Staging Area. All Critical Incident Responders shall report immediately upon arrival to the SAM, and remain in the Staging Area until properly assigned.

Dispatch Notifications

Dispatch shall notify critical incident responder agencies of:

- the location, type and known extent of the emergency;
- the name, rank and agency of the IC;
- the location of and directions to the ICP and the Staging Area;
- the name and agency of the SAM; and
- the name, agency and location of the Operations Section Chief (if a Unified Command is established).

Requesting Assistance

When requesting critical incident assistance, IC, SAMs and dispatchers should scale requests properly.

- Avoid issuing generalized calls for help; and
- Specify by name which agencies are being asked for assistance, how many personnel and any specialized skills needed (e.g.: negotiators, search-and-rescue, entry-team, etc.), along with requested special equipment types.

Reporting to Staging Area

All arriving Critical Incident Responders shall immediately report to the SAM located at the Staging Area for check-in. The SAM shall record the names, rank, agency, specialty, and equipment brought with them on NIMS ICS 211 Check-In-Form or other document.

After arrival and check-in at the Staging Area, one supervisor from each responding agency should report to the ICP or other location designated by the IC or Liaison Officer. That individual will serve as the responding agency's representative. That person should have authority delegated from their agency to make decisions on the deployment of their agency resources.

The SAM must carefully consider where arriving personnel are to park their vehicles. Blocking of streets, bridges, underpasses, etc., may hinder rapid arrival of essential emergency vehicles. Arriving personnel shall park where designated by the SAM.

Arriving personnel shall remain at the Staging Area until assigned by the IC or relieved.

Demobilization

Personnel located at the Staging Area who intend to demobilize from the incident shall contact the SAM and await SAM authorization before departing.

Demobilization, continued

Agency Representatives wishing to demobilize their resources from the incident shall contact the Liaison Officer and await Liaison Officer authorization before departing; demobilization must be accomplished through and according to the direction of the SAM.

A proper demobilization plan shall be completed to accurately record departing personnel and resource check-out time, notation of any apparent physical injuries or critical incident stress-related concerns, and include notations of any damaged or lost equipment. NIMS ICS 221 Demobilization Check-Out Form or other suitable document should be utilized.

Unified Command

A determination must be made promptly whether to continue under an IC, or via establishment of a Unified Command. If a Unified Command is established, a single, coordinated Incident Action Plan (IAP) must be agreed upon, and an Operations Section Chief designated by agreement to implement it. The IC remains in command until relieved by the Unified Command.

The IC or Unified Command must delegate the Planning Section Chief (PSC) to begin or expand the planning process by developing a single consolidated Incident Action Plan with appropriate NIMS ICS 204 Assignment forms for each responding resource that will be assigned to a Division or Group Supervisor, or Strike Team or Task Force Leader.

ICS Support

All supervisors from Critical Incident Responder agencies have a continuing duty to support ICS-based operations, particularly with regard to unity of command, for the duration of the incident or event.

MPAC: 81.2.5.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**SOC-03C**
Subject	
Response to Civil Disturbances	

Policy

The Department realizes the necessity of an effective response to any civil disturbance through the prudent deployment of available Departmental resources.

Department members assigned to a civil disturbance or planned mass demonstration duty shall ensure all issued riot gear is accessible and operational, including a riot helmet with the member's identification number clearly displayed. Any deficiencies noted upon assignment arrival shall be immediately reported to the on-scene supervisor.

Department members shall receive initial training, and annual training thereafter, related to Department response to civil disturbances.

According to Massachusetts General Laws c.269 §1:

- An unlawful assembly exists when five or more persons, being armed with clubs or other dangerous weapons, or ten or more persons, whether armed or not, are unlawfully, riotously, or tumultuously assembled; and
- An "Order to Disperse" shall be given to persons unlawfully assembled before any action can be taken against them.

Definitions

Commission: The Massachusetts Peace Officer Standards and Training (POST) Commission as established in M.G.L. c.6E § 2.

De-escalation Tactics: Proactive approaches to stabilize a law enforcement situation so that more time, options, and resources are available to gain voluntary compliance and reduce or eliminate the need for force. These approaches may include, but not be limited to:

- Verbal persuasion;
- Warnings;
- Slowing down the pace of an incident;
- Waiting out an individual;
- Creating distance between the member and a threat;
- Requesting additional resources, including, but not limited to licensed medical or mental health professionals, as defined in M.G.L. c. 111 § 51 ½ (a), when appropriate, to address a potential medical or mental health crisis; and
- Issuing a summons as an alternative to arrest where feasible.

Kettling: Confinement or corralling by law enforcement of a group of demonstrators or protestors in a small area without any means of egress as a method of crowd control, management or restraint.

Tear Gas or Other Chemical Weapons (CW): Any weapon that contains chemical compounds that temporarily make people unable to function by causing irritation to the eyes, mouth, throat, lungs, and skin, or that otherwise restrain a person by causing pain. This shall not include oleoresin capsicum (OC) spray.

Civil Disturbances Initial Inquiries

Whenever any law enforcement agency requests the assistance of the Massachusetts State Police for mass demonstrations, civil disorders, riots, etc., a request to such effect shall be made through channels to the Office of the Superintendent/Deputy Superintendent. The following minimum information is required:

- Requesting department, rank and name of the caller;
- Name of authorizing official and a call-back number;
- Specific facts surrounding the incident:
  - Location;
  - Number of officers on-scene/enroute;
  - The reason or purpose for the disturbance; and
  - Number of people causing the disturbance and whether armed, violent, or hostile.

Planned Mass Demonstration

When the Department obtains advance knowledge of a planned mass demonstration, the Operations Officer in the Troop of Jurisdiction shall:

- Diligently attempt in good faith to communicate with organizers of the event before the event occurs in an effort to establish reliable channels of communication between Department members and event participants;
- Discuss and establish logistical plans to avoid or, if necessary, to de-escalate potential or actual conflict between law enforcement officers and mass demonstration participants; and
- Be designated as the Department officer-in-charge of de-escalation planning and communication to carry out the above plans for the planned mass demonstration.

Civil Disturbances Response

The "Order to Disperse" shall be given by the Incident Commander (IC) at the scene. The restoration of public peace should be accomplished first through persuasion. If necessary, force may be employed.

The use of Kettling as a means of crowd control, crowd management, or crowd restraint is prohibited.

Crowd control objectives:

- Protect life and property;
- Contain and isolate the disturbance;
- Disperse as expeditiously as possible;
- Prevent re-grouping or re-entry; and
- Identify and take action against law violators.

Officers shall keep in mind the limitations imposed upon the Department in private business sector strikes in accordance with ADM-04 State Police Authority.

Responsibilities

Position	Duties
Responding Officer	Shall: • Report with the current duty uniform and riot gear; • Report to the IC on-scene for instructions when responding in plainclothes; • Be issued additional restraining devices, as necessary, by the Supply Section; • Field search detainees prior to entering an established Field Processing Area; and • Submit all appropriate reports using the incident case number as issued by the IC.
On-scene Department Incident Commander	Shall: • Order or verify that an "Order to Disperse" (PowerDMS- Bulletins-Dispersal Order) was issued to all persons to immediately and peaceably disperse; • Take necessary action if the crowd fails to disperse after being ordered to do so; • Request additional personnel and support through the Division Commander of Field Services; • At no time attempt to accomplish a police objective, unless sufficient forces are present to support such objective; • Establish a Field Processing Area when necessary; • Assign officers (e.g., security, intake, booking, evidence control, photo/ fingerprint, court officer, clean-up, etc.) as needed, to maintain a Field Processing Area; and • Prepare and submit an "After Action Report" within 24 hours after termination of all Departmental activities.

Responsibilities, continued

Position	Duties
Division Commander of Field Services	Shall: • Ensure adequate uniformed personnel and tactical support remain in the affected area during and after order is restored for such period of time as deemed necessary by the Colonel/Superintendent; and • Ensure any further disruptions are addressed as expeditiously as possible.

Use of Chemical Munitions During Civil Disturbances

Use of chemical munitions is governed by STOP Team SOP's in accordance with 550 CMR 6.08 (3-4), specifically:

- A member shall not discharge or order the discharge of tear gas or any other chemical weapon, discharge or order the discharge of a kinetic impact device or rubber pellets from a propulsion device to control or influence a person's behavior unless:
    - De-escalation tactics have been attempted and failed or are not feasible based on the totality of the circumstances; and
    - The measures used are necessary to prevent imminent harm and the foreseeable harm inflicted by the tear gas or chemical weapon, kinetic impact device, rubber pellets is proportionate to the harm.
- If a law enforcement officer utilizes or orders the use of kinetic impact devices, rubber bullets, Conducted Energy Devices (e.g. Taser) , Chemical Weapons(CW), or Electronic Control Weapons (e.g. Taser) against a crowd, the law enforcement officer's appointing agency shall file a report with the Commission detailing all of the measures that were taken in advance of the event to reduce the probability of disorder and all de-escalation tactics and other measures that were taken at the time of the event to de-escalate tensions and avoid the necessity of using said weapon(s), including a detailed justification of why use of said weapon(s) was objectively reasonable.

Use of Canines During Civil Disturbances

Use of Canines is governed by the Canine Unit SOP's in accordance with 550 CMR 6.08 (4-5), specifically:

- A member may not order the release of a dog to control or influence a person's behavior unless:
    - De-escalation tactics have been attempted and failed or are not feasible based on the totality of the circumstances; and
    - The measures used are necessary to prevent imminent harm and the foreseeable harm inflicted by the release of the canine is proportionate to the harm.
- If a law enforcement officer utilizes or orders the release of a dog against a crowd, the law enforcement officer's appointing agency shall file a report with the POST Commission detailing all of the measures that were taken in advance of the event to reduce the probability of disorder and all de-escalation tactics and other measures that were taken at the time of the event to de-escalate tensions and avoid the necessity of using said weapons, including a

Use of Canines During Civil Disturbances, continued

detailed justification of why use of said weapons was objectively reasonable.

- Canines should not be utilized for crowd control, restraint, or management of peaceful demonstrations, but may be deployed for crowd control, restraint, or management of peaceful demonstrations in isolated circumstances related to bomb detection, pursuit of suspects in buildings, and related situations. Utilization does not include circumstances in which the canine remains on a short lead in close proximity to the handler and is well behind the line of contact between law enforcement and civilian personnel.

Mass Arrests Logistics

The following procedures, and requirements of DET-06 Detainee Monitoring, shall be used when a situation requires multiple arrests:

- Normal arrest procedures shall be used for all arrested individuals;
- All arrested individuals shall be subject to the appropriate bail procedures;
- Arrested individuals shall be expeditiously taken to a Field Processing Area;
- For record keeping purposes and whenever feasible, the arresting officer’s name shall be written on the photograph of each individual they have arrested;
- As soon as possible, transport arrested individuals to an appropriate place of temporary confinement or released after booking as directed by judicial authorities;
- Food, water, medical and sanitation needs shall be tended to as soon as reasonably possible;
- The face sheet/arrest report and Detainee Property Inventory Form shall be sent with the transporting officer to the place of confinement or release;
- The court of jurisdiction and the appropriate District Attorney's office shall be apprised of the situation; and
- Contraband or evidence shall remain with an assigned Evidence Control Officer.

Subject:	Number:
Response to Civil Disturbances	**SOC-03C**

After Action Report

An After Action Report shall be prepared by the IC assigned to the scene. It shall begin with a numerical, chronological listing of all arrested individuals and shall contain, at a minimum:

- Number and source of complaints;
- Verbatim instructions given to the crowd and the name of the officer giving them;
- Department personnel on scene and their respective duties;
- Names of arresting officers and individuals arrested;
- Contraband and evidence seized;
- Damage to private/public property;
- Injuries to police/public; and
- Private/public agencies/personnel involved.

Subject:

All Hazards Incident Command Framework

Policy

Members shall use the incident management strategies outlined in this policy for all multi-agency and multi-jurisdictional responses. In addition, and when applicable, members are encouraged to use these strategies for responses to incidents involving only the Department.

Purpose

To provide guidance for the Department's response efforts to emergencies and incidents.

Incident Command System Defined

Incident Command System (ICS) is an "all risk" emergency incident management system used for managing a wide variety of emergencies.

The Federal Emergency Management Agency (FEMA) defines ICS as: "An incident management system consisting of procedures for organizing personnel, facilities, equipment, and communications at the scene of an emergency."

ICS provides a common organizational structure, or framework, within which participating agencies can work toward accomplishing common goals and objectives. While the system works well in all types of emergency incidents, its primary benefit is found in managing incidents of a multiagency or multi-jurisdictional nature.

The federal government requires an ICS to be used at the scenes of hazmat incidents. This regulation has been promulgated by the Occupational Safety and Health Administration (OSHA) at 29 CFR 1910.120.

Major Components of the Incident Command System

- Common Terminology: Responding agencies can communicate at the scene of an emergency only if they have a common understanding of the terminology used by the various emergency responders. Common names are established and used for personnel, equipment, and facilities operating in and around the incident area.

- Modular Organization: An incident management system is valuable only if it can adapt to changing conditions at the scene of an incident. A common characteristic of emergency situations is that they seldom remain constant; the incident often will expand or contract. A modular organizational structure will allow the incident response to grow in direct proportion to the complexity of the incident. Conversely, the structure of the response can be scaled back as conditions improve and resources are no longer needed.

- Integrated Communications: Effective communications at the scene of an incident are essential for proper incident management. Whenever possible, responding agencies should be able to talk directly to each other through common radio channels. Furthermore, command personnel must be able to personally interact to formulate effective response strategies.

- Command Structure: ICS recognizes the key ingredient to any emergency response is to have an effective command structure to manage personnel and other resources. The command function may be organized in one of two ways:

    - A *single command* involving one person may be used when there is no overlap of jurisdictional boundaries or when a single commander is designated by the agency with overall management responsibility for the incident. This person is normally referred to as the Incident Commander (IC).
    - Under a *unified command* structure, all involved agencies contribute to the command process by sharing management responsibility. A unified command structure is the preferred method when responding to emergencies of a multiagency or multi-jurisdictional nature. Even with a unified command structure, however, one person will still be in overall charge of the event.
- Span of Control: Span of control is defined as the number of subordinates one supervisor can manage effectively. ICS recommends that one person can properly supervise no more than three to seven subordinates, with the optimum number being five. Command officers must anticipate span of control problems and prepare for them as the modular organizational structure of the incident response expands.

- Consolidated Action Plan: ICS requires every emergency response to have a consolidated action plan.
    - For small incidents, this may be something as simple as the IC having a cognitive plan. For large scale events, the incident response may require a written plan, even as the event is unfolding.

Major Components of the Incident Command System, continued

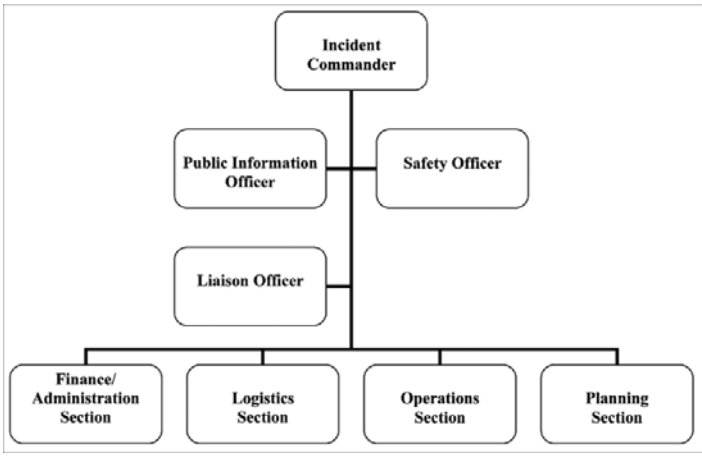
- ICS requires all plans to address strategic goals and tactical objectives.
  - Strategic goals are broad in nature.
  - Tactical objectives are the tasks that must be accomplished to achieve strategic goals. Objectives are specific and measurable.

- Designated Incident Facilities: ICS recognizes that designated incident facilities can greatly assist the IC in managing the incident. For instance, a Command Post is designated to serve as the on-scene location from which all incident operations are directed. Similarly, staging areas are established to designate where available resources should report for assignment. Other facilities are established as the need arises.

- Comprehensive Resource Management: The IC is responsible to ensure all resources currently available are used effectively and efficiently. Resource management requires that the safety of personnel is given the highest priority. The IC must continually evaluate and adjust the deployment of resources at all incidents. If additional resources are needed to manage the incident, the IC must ensure they are obtained in a timely manner.

Incident Command System Functional Areas

The organizational structure of ICS requires the establishment of five key functional areas. In a small, single command structure, the IC will be able to perform all five functions. In a large scale event, however, the IC will designate section chiefs to manage the responsibilities of the various areas.



Command

Incidents are commanded by an IC, normally from the agency having primary jurisdiction, who is responsible for the management of all incident operations. As previously discussed, command may be established either through a single or unified command structure. The IC is responsible for the following activities:

- Assessing incident priorities;
- Determining strategic goals and tactical objectives;
- Developing and implementing the incident action plan;
- Developing an appropriate organizational structure;
- Managing resources;
- Coordinating overall emergency activities;
- Ensuring scene safety, proper liaison with other agencies; and disseminating information to the news media.

Incident Command System Functional Areas, continued

NOTE: In some large scale events, the IC must delegate authority to ensure the above responsibilities are properly addressed. Any functions not specifically delegated by the IC remain the responsibility of the IC. Any one or all of the functional areas depicted in the following diagram may be established as the need arises.

Operations Section

The Operations Section is responsible for the management of all tactical operations at an incident. The most common reason for staffing operations is to relieve span-of-control concerns for the IC. Some incidents may become so complex that the IC may no longer be able to solely supervise all operational aspects of an incident. An Operations Section Chief will be able to assist the IC by:

- Assisting in development strategic goals and tactical objectives for the incident;
- Developing operational plans;
- Requesting or releasing resources through the IC;
- Consulting with the IC about the overall incident action plan;
- Keeping the IC informed of the progress of the incident and the status of resources; and
- Supervising the Staging Area Manager.

Incident Command System Functional Areas, continued

Planning Section

The Planning Section is responsible for the collection, evaluation, dissemination, and use of information about the development of the incident and the status of resources. Planning includes an assessment of the current situation and a projection of future conditions. Members in the Planning Section maintain information about resources committed to the incident and projected resource requirements. The modular nature of ICS also allows the planning function to be expanded in scope to include the following Subdivisions or Units:

- Resource Unit: The Resource Unit provides answers to the following questions which are important to the IC: What resources (personnel and equipment) are currently committed to the incident? Where are these resources assigned? Are all personnel accounted for at shift changes? Are additional resources necessary? Where can they be obtained?

- Situation Analysis Unit: Members in the Situation Analysis Unit analyze the incident as it progresses. They help the Planning Section Chief and the IC develop a consolidated action plan and determine if the plan is being followed and whether the plan of action is having the desired effect. Members of this Unit will also offer alternatives to the IC in those situations where the original plan must be modified.

- Documentation Unit: The Documentation Unit is responsible for recording the incident and protecting all documents relevant to the incident. Examples include Incident Reports, Communication Logs, CLEAN Messages, Injured Employee Statements, correspondence, and directives from various sources. In all incidents, thorough documentation is essential to permit proper after-action analysis. In major emergency incidents, a member should be assigned to collect information for the After-Action Report while the incident is still ongoing. This will ensure the availability of appropriate documentation for reporting purposes and will also ensure a timely completion of the After-Action Report.

- Demobilization Unit: The Demobilization Unit should begin preparing for the orderly and controlled withdrawal of resources from the scene of the emergency while the incident is still unfolding. This will ensure that resources are properly managed and that the scene is returned to a state of normalcy as soon as possible after the incident has terminated.

Incident Command System Functional Areas, continued

- Technical Specialists: Technical specialists should be included in the planning function whenever expertise is needed beyond the levels maintained by the IC and their immediate subordinates. Examples include hazmat personnel, engineers, industry representatives, explosives technicians, and radiation experts.

- CISM: Crisis Incident Stress Management Team personnel should also be included in the planning function.

Logistics Section

The Logistics Section is responsible for providing facilities, services, and materials to sustain the incident response. The logistical needs of the members assigned to an incident will grow in direct proportion to the size, duration, and complexity of the incident. The Logistics Section Chief may elect to establish functional Units to perform the following roles:

- Communications Unit: The Communications Unit will perform a vital role by developing and overseeing the operation of the communications infrastructure. Members of this Unit will ensure that proper equipment is available and that it is performing to acceptable standards. They will maintain the operational readiness of all radio, telephone, and CLEAN System communications at the Command Post and other incident facilities.

- Facilities Unit: The Facilities Unit will ensure the availability of adequate buildings and shelter for incident operations. Included in this category are such matters as Command Post location and operation, feeding and housing areas, sanitary facilities for field operations, and other fixed facilities necessary for the successful management of the incident.

- Procurement and Supply Unit: This Unit orders the equipment and supplies required for incident operations and maintains ongoing inventory and control of these resources. Examples in this category include clerical supplies such as paper and pens, as well as tactical supplies such as ammunition and tear gas.

- Food Unit: Incidents that operate for an extended period of time will require the procurement of food for participating personnel. In smaller incidents, this role may be handled within the Procurement and Supply Unit, e.g., when sandwiches are obtained for a 12-hour operation. However, for incidents that may extend for days, the IC and Logistics Section Chief may elect to contract food services from a local vendor. A Food Unit within the Logistics Section would be responsible for making the necessary arrangements.

Incident Command System Functional Areas, continued

- Other Service and Support Units: Other service and support Units can be added to the Logistics Section as the need arises.

Finance/Administrative Section

The Finance/Administrative Section is responsible for tracking all incident costs and evaluating the financial considerations of the incident. Financial considerations for a major Department mobilization can be extensive, especially when the Department tries to seek reimbursement for the operation or when detailed records must be prepared for budgetary or planning purposes. The Section Chief has the responsibility to document all incident costs and to provide guidance to the IC on financial issues that impact incident operations. As with other functional areas, the Finance/Administrative Section can be subdivided into Units to manage matters such as timekeeping, billing, and cost accounting.

Expansion: Not all of the above functional areas may be needed during an incident response. However, IC(s) must be prepared to expand their organizational structure if the need arises.

Incident Priorities

A member serving in the capacity of the IC has numerous duties and responsibilities to perform. These responsibilities will vary depending upon the nature of the incident and the number of available resources. One aspect of the emergency response that will not vary, however, is the recognition of three incident priorities. *Regardless of the nature of the incident, the following priorities WILL ALWAYS be addressed in an emergency incident response:*

- Life Safety: Life safety is the first priority for any emergency incident. This includes not only the safety of any victims involved in the incident, but also the safety of response personnel and populations surrounding the incident scene. IC(s) must place life safety above all other considerations of emergency incident management.

- Incident Stabilization: The IC's second priority is to formulate a strategy to stabilize the incident. Incident stabilization involves the development of a plan to minimize the effect the incident may have on the surrounding area and populations (e.g., with incidents of civil disorder, this priority will involve isolation of the perpetrators and containment of the disorder to prevent it from spreading; a hazmat response team might stabilize an incident by containing the spill at the scene of a crash and preventing runoff into nearby waterways).

Incident Priorities, continued

- Property Conservation: Property conservation involves achieving strategic goals and meeting tactical objectives at an incident while minimizing property damage and inconvenience to uninvolved citizens. While this priority is clearly important, it should not weigh as heavily with the IC as the previous priorities of life safety and incident stabilization. Nevertheless, an emergency incident cannot be considered successfully managed if the IC does not give this priority proper consideration.

NOTE: In addition to the above priorities, restoration of traffic flow for incidents occurring on or around highways must be considered when normal traffic patterns are disrupted. Major highway incidents often create substantial disruptions to traffic, and it is the responsibility of the IC to restore normal or limited traffic flow around the scene as soon as possible. Refer to TRF-05 Traffic Incident Management for additional guidance.

Incident Command Summary

When using the ICS, members must be cognizant that the system is a management tool. ICS does not replace sound command decision making at the scene of an incident; it does not avoid the need for proper training and education; and it does not eliminate the need for establishing positive interagency relationships. The system does provide a broad management framework under which one agency or many agencies can operate at the scene of an emergency.

ICS makes the best use of available resources. Resources are essential to the management of any emergency incident. Some incidents, such as a minor non-reportable motor vehicle crash, can be managed with no resources other than the member assigned to make a record of the crash. Other incidents, such as a major civil disturbance, may require hundreds of personnel resources and dozens of pieces of equipment to successfully resolve the incident. ICS helps the on-scene commanders manage the resources at their disposal.

ICS does not, in any way, cause an agency to relinquish authority at the scene of an incident. On the contrary, this system recognizes the valid role that all emergency response agencies play at the scene of an incident. ICS further establishes a system in which the various responders can perform their individual roles in a unified manner with the other agencies represented at the scene.

Incident Command Summary, continued

ICS can be effective only when all members of an organization practice ICS principles in their day-to-day responses to emergency situations. ICS works best when members apply the principles taught in training to small, frequently occurring events, such as traffic collisions and minor crime scenes. As a result of this constant repetition and familiarity, members are then better able to manage the large-scale events such as civil disturbances and motor vehicle crashes involving multiple fatalities. ICS operating principles become so well established that they soon become an integral part of all incident management.

ICS Support

All supervisors from Critical Incident Responder agencies have a continuing duty to support ICS-based operations, particularly with regard to unity of command, for the duration of the incident or event.

For incidents falling within the primary jurisdiction of the Department, the highest ranking Department member at the scene shall assume the role of IC. However, to ensure command continuity, the temporary involvement of a higher-ranking member at the scene will not automatically require that member to assume the role of IC. If, in the opinion of the higher ranking member, the situation dictates that he/she remain at the scene, then the higher ranking member shall assume the role of IC.

Supervisors shall monitor the status of all incidents and ensure that an appropriate management strategy is employed.

ICS Training

The Commandant of the State Police Academy shall ensure Basic Incident Command System training is made part of the Recruit Training Curriculum.

May 25, 2023	**SOC-03E**

Subject:

Emergency and Continuity Plan Requirements

Policy

In accordance with SOC-03 Emergency Planning, and SOC-03D All Hazards ICS Framework, the Department shall maintain written plans for responding to critical incidents including, but not limited to, natural and man-made disasters, pandemics, civil disturbances, mass arrests, bomb threats, hostage/barricaded person situations, acts of terrorism, and other unusual incidents. These plans will follow standard Incident Command System (ICS) protocols and National Incident Management System (NIMS) which include functional provisions for: Command, Operations, Planning, Logistics and Finance/Administration.

Sworn members shall receive annual training on the All-Hazards Plan of the Department.

Purpose

To provide specific guidance for the Department's plans for emergencies and continuity of operations.

Emergency Planning Manual Content

The Emergency Planning Manual is a collection of all of the Department's major emergency plans. The Emergency Planning Manual shall include:

- All current Emergency Operating Plans (EOPs);
- Incident Action Plans (IAPs);
- Operational guidelines;
- On-site operational instructions; and
- Personnel, equipment, and resource inventories.

Emergency Operation Plan Content

The EOPs should contain general objectives reflecting the overall strategy for responding to and managing critical incidents. These plans define the scope of preparedness and incident management activities required of the Department and are flexible enough for use in all emergencies. These plans include resource inventories and other necessary information, including but not limited to:

- Personnel and skills;
- Department property, buildings, and vehicles;
- Supplies (food, fuel, clothing);
- Arrest/confinement procedures;

Emergency Operation Plan Content, continued

- Topographical maps;
- Support equipment;
- Incident Command Posts;
- Field Command Posts;
- Communications;
- Miscellaneous Equipment (generators, boats, etc.); and
- Forms including After-Action reporting, ICS Forms 205, ICS 205A-OS, ICS 206, and Identified Staging Areas.

ICS Command Structure Integration

EOPs shall integrate the ICS Command Structure pursuant to established Department SOC policies and NIMS framework recognizing that all functions without an appointed Section Chief are the responsibility of the Incident Commander.

The following functions are part of the ICS system and the roles/responsibilities of each when activated include, but are not limited to the following:

Command Function

- Activating the incident command system;
- Establishing a command post;
- Initiating the notification and mobilization of additional agency personnel;
- Obtaining support from other agencies;
- Establishing a staging area, if necessary;
- Providing public information and maintaining media relations;
- Maintaining the safety of all affected personnel; and
- Ensuring a documented after action report is prepared.

Operations Function

- Establishing perimeters;
- Conducting evacuations;
- Maintaining command post and scene security;
- Providing for detainee transportation, processing, and confinement;
- Directing and controlling traffic; and
- Conducting post-incident investigation.

Planning Function

- Preparing a documented incident action plan including, when applicable, what will trigger implementation of the plan;
- Gathering and disseminating information and intelligence; and
- Planning post-incident demobilization.

ICS Command Structure Integration, continued

Logistics Function

- Communications;
- Transportation;
- Medical support to include support for emergency response personnel;
- Supplies; and
- Specialized team and equipment needs.

Finance/Administration Function

- Recording personnel time;
- Procuring additional resources;
- Recording expenses; and
- Documenting injuries and liability issues.

Continuity of Operations Plans

To ensure the Department is prepared to provide required services, even if affected by significant emergency, Stations/Sections/Units shall follow a Continuity of Operations Plan (COOP) to ensure the continued performance of essential functions during a wide range of potential emergencies.

In the event of an incident requiring relocation of services, the Station/Section/Unit Commander shall notify their Division Commander who shall communicate the incident and needs to the Colonel/Superintendent. This notification shall include details on the incident, affected services, operational impacts, operational requirements, personnel requirements and other information required to provide the resources necessary to continue the operations of the affected Station/Section/Unit.

The Division Commander shall, at the direction of the Colonel/Superintendent, coordinate with the Division of Administrative Services who will coordinate and approve requests for recovery planning resources that fall outside the scope of an individual Station/Section/Unit to ensure the relocation is safe, effective and the interruption to normal operations is minimal. The security and protection of evidence storage areas and data infrastructure shall be prioritized.

Recovery Planning

Station/Sections/Units should coordinate with the Division of Administrative Services the pre-positioning of minimum essential equipment at an alternate identified facility when advance warning of an emergency is received.

Personnel Issues: Commanders should plan to provide critical information to both essential and non-essential staff to inform employees on how to prepare themselves and their families prior to an emergency.

Evidence/Contraband/Property (ECP): Commanders should plan for the security and integrity of all ECP and take steps to mitigate the impact to ECP operations.

Recovery Planning, continued

Vital Records and Communications

Commanders shall provide for the protection and availability of electronic and hardcopy (as applicable) of documents, references, records, information systems, and databases.

Safekeeping of systems and data is critical to alternate operations, so Commanders should:

- Identify vital records, systems, and data (hard copy and electronic) critical to performing functions including:
  - Emergency operating records – plans and directives, orders of succession, delegations of authority, staffing assignments; and
  - Legal and financial records – personnel records, Social Security records, payroll records, retirement records, insurance records, contract records;
- Plan for protection, duplication, and movement of records;
- Ensure accuracy and currency of records, update as necessary;
- Ensure procedures for documenting operations when COOP is activated;

Communication systems are critically important, and are often severely impacted in times of disaster. Commanders should plan for the loss of one or more routine communications system and have an alternate or workaround identified. Commanders should also be aware that in time of disaster cellular communications systems are often the first system to fail.

Reconstitution and Termination

The Colonel/Superintendent, or designee, shall communicate to affected personnel the termination of alternate operations and returning to a non-emergency status at the primary facility at the conclusion of the incident. This communication should inform all personnel that the emergency no longer exists and provide instructions for resumption of normal operations.

Guidance and Assistance

Additional guidance documents to help prepare Emergency Operation and Continuity of Operation plans are available through the EPO.

Responsibilities

Position	Duties
Colonel/ Superintendent	Shall: • Ensure a designee reviews and approves Department-wide Emergency and COOP plans as maintained by the EPO.
Division Commanders	Shall: • Ensure the Division's planning personnel annually review and update Division Emergency and COOP plans; • Review and forward revisions of Division Emergency and COOP plans to the EPO; and • Review quarterly status reports of the Division's emergency equipment inventory.
Troop/Section/ Unit Commanders	Shall: • Conduct a quarterly inspection (January/April/July/October), for operational readiness of equipment designated for use in support of their EOP/COOP plans as specified by the EPO, and document all inspections in the records management system(s) as required by the EPO; and • Notify their respective Division Commander of any deficient inspection results.
Emergency Planning Officer (EPO)	Shall: • In accordance with SOC-03, maintain copies of all Emergency plans and also maintain copies of relevant COOP plans; • Provide updated Emergency and COOP planning initiatives to Division planning personnel as available; • Annually request Divisions review and update as necessary existing Emergency and COOP plans. • Revise Department COOP priorities to coincide with Division updates; • In concert with the Division of Administrative Services, ensure a master database of the emergency equipment necessary to carry out the Department's Emergency and COOP plans is maintained and updated quarterly. This shall include a detailed inventory, location and status of said equipment; • Annually issue a list of equipment deemed necessary to maintain the Department's continuity abilities and response to emergencies, and ensure quarterly inspections are carried out on the equipment by the appropriate Station/Section/Unit Commanders; and • Notify the Division Commander of Administrative Services of any emergency equipment deficiencies.

Subject:	
Lost/Missing Person Searches	

Policy

Every incident involving a lost and/or missing person shall be treated as a potential emergency event that may require a rapid and coordinated response of specialized personnel and equipment.

Members should understand that every lost and/or missing person incident has the potential of being or becoming a criminal investigation; members shall treat the scene of each incident as a potential crime scene.

If the missing person is identified as a child of age seventeen (17) or younger and there is evidence of abduction, notify the AMBER Alert Activator and follow procedures in accordance with SOC-04A AMBER Alert Activations.

Public notifications/messaging for missing persons not fitting Amber Alert criteria shall be coordinated through channels to Media Relations.

Stage One Response Protocol

Upon receiving a report of a lost/missing person and/or receiving a request for Department assistance in locating a lost/missing person, the Desk Officer shall immediately gather as much information as possible, including, but not limited to:

- Reporting person's information;
- Name, age, and address of the missing person;
- Description of appearance/clothing;
- Activity at time of disappearance;
- Place Last Seen (PLS);
- Physical or general health condition;
- Any mental or cognitive deficiencies (e.g., Alzheimer disease, dementia, or autism);
- Does the missing person have an electronic tracking transmitter;
- Involvement of any weapon;
- Requesting agency point of contact including their call back telephone number; and
- Action(s) taken so far.

Stage One Response Protocol, continued

Position	Duties
Desk Officer	• Dispatch the appropriate patrols; • Notify the Troop Duty Officer of all requests; • Broadcast all pertinent information over the radio; and • Make appropriate Daily Administrative Journal (DAJ)/ACISS entries.
Troop Duty Officer	• Dispatch a supervisor to the scene; • Dispatch K-9 to the scene; • Advise the Air Wing of the situation and ascertain availability if services are required; • Dispatch an available SERT member working in the Troop to the scene; • If the missing person is equipped with an electronic tracking transmitter, dispatch Department members equipped with electronic tracking receivers; • Dispatch other resources as needed; • Ensure that a SP 622 Lost/Missing Person Questionnaire is completed by on-scene personnel; • Conduct an assessment of the "search urgency" by reviewing the current information. The following conditions may indicate a high search urgency: o Child under twelve (12) years of age; o Adult over seventy (70) years of age; o Mentally challenged individuals; o Physical conditions or health issues; o Extreme or deteriorating weather conditions; o Time of day; o Forecast weather conditions; o Persons determined to be at risk to themselves; and o Other pertinent factors; • Make appropriate DAJ/ACISS entries; and • Notify the Troop Commander

Stage Two Response Protocol

A Stage Two Response Protocol is based upon the need for a more comprehensive response as determined by:

- The requesting agency;
- The responding members; or
- Based upon a search urgency analysis.

The Troop Duty Officer shall request, through the GHQ Communications Section, that the Special Operations Commander or designee be contacted for a Stage Two Response. The Special Operations Commander or their designee must approve the request prior to any Stage Two Response activation orders.

When authorized, the Special Operations Commander or designee shall activate additional resources as needed (e.g., SERT, IMAT, Air Wing, K-9, Mounted, etc.).

Outside agencies (e.g., Environmental Police, Department of Conservation and Recreation, etc.) may be authorized by the Troop Duty Officer after consultation with the Special Operations Commander or designee.

Other resources (e.g., Civilian Search and Rescue Teams, Volunteers, etc.) shall only be authorized by the Special Operations Commander or designee.

Follow-up Investigation

The on-scene Supervisor or a Department member acting as the primary investigator will ensure there is follow-up contact with the reporting party or source of information. Follow up searches may be warranted for evidence or other circumstances dictated by the incident.

The State Police Detective Unit (SPDU) of jurisdiction will be notified in the following instances:

- The missing person is not located after an extended period of time;
  - The extended time period is situationally dependent upon circumstances directly related to the specific incident.
- The person is missing under suspicious circumstances;
- There is evidence of a potential crime;
- The missing person was located and has sustained serious bodily injury that has or may result in death; and
- Other reason(s) as determined by the on scene Supervisor.

The missing person should be entered into CJIS and NCIC by the primary investigating agency. Once located, the missing person should be removed from those databases by the primary investigating agency.

May 25, 2023	**SOC-04A**
Subject:	
AMBER Alert Activation	

Policy

The Department is the sole entity within the Commonwealth permitted to initiate an America's Missing Broadcast Emergency Response (AMBER) Alert for cases of child abduction where the child's life is in imminent danger of serious bodily harm, injury, or death and specific criteria supporting the AMBER Alert activation has been met.

MSP Operations at GHQ, 508-820-2121, is the single point of contact for AMBER Alert Activations in the Commonwealth, whether responding officers are local officers or Massachusetts State Police members.

AMBER Alert Criteria

AMBER Alerts shall only be activated when:

- A law enforcement officer has determined that a child, seventeen (17) years of age or younger has been abducted;
- The child is believed to be in danger of serious bodily harm or death; and
- There is enough descriptive information to believe an AMBER Alert will help locate the child.

Note: AMBER Alerts are not intended for missing child incidents, runaways, or child custody situations – unless the above three criteria have been met. If these conditions are not met, refer to SOC-04 Lost/Missing Person Searches.

Preliminary Response

Responding local law enforcement or Massachusetts State Police shall be referred/transferred to MSP Operations at GHQ (508-820-2121) during the preliminary investigation of a potential or progressing child abduction scenario that may meet AMBER Alert criteria.

The on-duty MSP Watch Center Lieutenant shall speak with the requesting officer/agency and complete the Massachusetts AMBER Alert Activation Form, then notify the AMBER Alert Activator.

Subject:	Number:
AMBER Alert Activation	**SOC-04A**

Duties & Responsibilities

Position	Responsibilities
First Responding State Police Officer	• Conduct an initial scene assessment to determine if AMBER Alert Criteria has been met; • Verify witness(es) observations to the abduction; • Notify the Desk Officer with specific information and request an immediate AMBER Alert Activation; • Remain at the scene until relieved by a Supervisor; and • Complete an incident report detailing the response.
Desk Officer	• Dispatch the appropriate patrols; • Notify the Troop Duty Officer of jurisdiction with the specific information for an AMBER Alert Activation; • Broadcast pertinent information via the radio; and • Document the Request for an AMBER Alert Activation request from the responding Trooper/Officer into the Daily Administrative Journal (DAJ)/ACISS.
Troop Duty Officer	• When the MSP is the law enforcement agency (LEA) of jurisdiction, contact the MSP Watch Center. **Note:** The Watch Center Officer in Charge (OIC) shall complete the AMBER Alert Activation Form; • Assign a supervisor to respond to the scene, who shall maintain contact with the Troop Duty Officer; and • Advise the Troop Dispatch Center of the pending AMBER Alert request.
Watch Center OIC	• Maintain situational awareness of AMBER Alert activations and potential activations; • Provide relevant information on potential and actual AMBER Alert Activations to Media Relations; • Complete intake process by filling out the AMBER Alert Activation Request form based on information provided by LEA having jurisdiction for all potential AMBER Alert requests; • Notify the AMBER Alert Activator with the specific information received from the AMBER Alert Activation Request Form; • Assist AMBER Alert Activator and facilitate the AMBER Alert request process; • Assist AMBER Alert Activator and investigators with investigative and intelligence support; • Notify the Division Commanders of Field Services, Homeland Security and Investigative Services when an AMBER Alert Activation has been authorized; and • Notify the State Police Detective Unit (SPDU) of jurisdiction on-call officer and the Violent Fugitive

Duties & Responsibilities, continued

	Apprehension Section (VFAS) of jurisdiction on-call officer when an AMBER Alert Activation is pending and/or has been authorized.
MSP Operations at GHQ (Formerly MSP Communication)	• Enter the information into NCIC upon AMBER Alert **activation**, if not already completed by the investigating agency or Troop of jurisdiction; and • Execute the AMBER Alert Activation Checklist at the direction of the AMBER Alert Activator.
AMBER Alert Activator	• Review the Massachusetts Child AMBER Alert Activation Request Form information; • Contact the Troop Duty Officer or requesting LEA if further information is needed to support an activation; • Authorize the AMBER Alert Activation when specific criteria warrant such activation; • Notify the submitting Troop or LEA of jurisdiction when the AMBER Alert Activation is authorized or denied; • Only when an AMBER Alert Activation has been authorized, provide notification to WBZ Radio; • Consider notification to other States, if necessary; • Complete an initial incident report on all activations; and forward the original to the Division Commander of Investigative Services and a copy to the AMBER Alert Program Coordinator; and • Ensure that all relevant notifications are made.
SPDU of Jurisdiction On-Call Officer	• Respond to the scene and conduct an investigation if the Department is the agency of jurisdiction; or • Respond to the scene and act as a liaison between the local LEA of jurisdiction and the AMBER Alert Activator when an AMBER Alert is pending and/or has been authorized.
Violent Fugitive Apprehension Section (VFAS) of Jurisdiction On-Call Officer	• At the request of the AMBER Alert Activator, respond to the scene and provide assistance when an AMBER Alert is pending and/or has been authorized.
Media Relations	• Remain in close contact with AMBER Alert Activator, MSP GHQ Operations and Watch Center OIC to gather accurate developing information relevant facts and circumstances of the potential abduction and potential AMBER Alert Activation, to include the victim, suspect, vehicle, last known location and any other pertinent information;

Duties & Responsibilities, continued

Media Relations, continued	• Once confirmed that a suspected abduction has occurred, and in coordination with the LEA of jurisdiction and the Watch Center OIC (and prior to an MSP decision on potential AMBER activation) release relevant information about the suspected abduction via traditional and social media. This step is undertaken even prior to a decision being made on activation in the interest of expediency, so that members of the public may be alert for sightings of the child/suspect/vehicle at the soonest possible time; • Continue to monitor investigative developments and update traditional media and social media accordingly; • Upon the decision to activate an AMBER Alert, update traditional and social media with information that an AMBER Alert has been officially activated; and • Upon location of the child and/or deactivation of the AMBER Alert, make appropriate updates via traditional and social media.
AMBER Alert Program Coordinator	• Oversee the AMBER Alert Program within the Department; • After any AMBER Alert activation, assemble representatives involved in the activation to coordinate and prepare the after-action report in conjunction with the AMBER Alert Activator; • Submit findings of the after-action report through channels to the office of the Superintendent; • Maintain a database on all activations and after-action reports; • Conduct Program outreach in coordination with Media Relations about the Program; and • Convene the Massachusetts Child AMBER Alert Committee to meet annually as needed.
Director of Telecommunication	• Establish training guidelines for 911 call takers and dispatchers on the Amber Alert plan in consultation with the State 911 Department.
Superintendent	• Assign a Division of Investigative Services Deputy Division Commander, as the AMBER Alert Program Coordinator; and • Assign Commissioned Officers from the Division of Investigative Services, Division of Homeland Security, and Mass State Police Crime Lab (MSPCL) as the AMBER Alert Activators.

Subject:	
Special Considerations	

Policy

In accordance with international, federal, and state laws, the following are entitled to special considerations and/or immunities:

- Diplomatic and consular officers;
- Foreign Nationals;
- Individuals requesting political asylum;
- Military personnel; and
- Elected officials.

Diplomatic and Consular Officers

Diplomatic Immunity

Diplomatic Immunity is a principle of international law accorded to duly-accredited diplomatic officers, their families, and their servants that afford them qualified exemptions from local jurisdictional prosecution.

Federal law grants members of foreign diplomatic missions and consular posts privileges and immunities in their offices, private residences, as well as in their papers and correspondence.

Members may consult the U. S. Department of State publication ***Diplomatic or Consular Immunity****- Guidance for Law Enforcement and Judicial Authorities* for further information: *https://www.state.gov/wp-content/uploads/2019/09/19-04499-DipConImm v2 web.pdf*

For urgent telephone inquiries outside normal business hours, please call the Diplomatic Security Command Center at 866-217-2089.

Identification

Foreign nationals who enjoy privileges and immunities possess a valid diplomatic passport issued by their country with a diplomatic "A" or "G" visa.

Other formal documents of identity issued by the U.S. State Department includes a (3¾" x 2½") card with photo which depicts:

- Blue border - Diplomatic officers and their families;
- Green border - Embassy administrative and technical staff and their families; or
- Red border - Consular officers, employees and their families.

Vehicle Registration

The State Department has revised the diplomatic and consular license plates. These plates may or may not designate consular or diplomatic codes to correspond to the owner's privileges and immunities.
Members may consult the U. S. Department of State publication ***Diplomatic or Consular Immunity***- *Guidance for Law Enforcement and Judicial Authorities* for further information: *https://www.state.gov/wp-content/uploads/2019/09/19-04499-DipConImm_v2_web.pdf*

Members shall:
Not tow or boot any vehicle bearing a diplomatic or consular license plate, however, the vehicle may be moved to the nearest safe location for reasons of public safety.

Diplomatic Immunity Incidents

The following individuals shall not be detained, handcuffed, or arrested:

- Diplomatic agents or their administrative and technical staff;
- Diplomatic level staff of the United Nations; or
- Family members of any of the above.

Exception: Reasonable restraints may be applied in emergency circumstances involving self-defense, public safety, or the prevention of serious criminal acts.

Incidents involving foreign diplomatic and consular personnel shall be fully documented to assist the State Department in subsequent prosecution or expulsion.

Civil Infractions

No person is exempt from being issued a citation for a civil motor vehicle violation.

Diplomatic Immunity and OUI

If…	Then…
Operating Under the Influence and has a diplomatic "A" or "G" visa.	Sobriety tests may be offered but not compelled. Do not allow the person to drive, however, a member may: • Transport operator to a police station to arrange for safe transport; or • Contact a taxi, friend, or relative of the individual to drive, or assist in making arrangements.

Notifications

When any foreign diplomatic official, members of their family, or staff are involved in any State Police action the Troop Commander shall:

- Immediately notify their Division Commander; and
- Notify the State Department at (202) 895-3682 or call the telephone number listed on the reverse of the subject's identity card issued by the U.S. Department of State, if after regular business hours.

Foreign Nationals

Introductions

The State Department requires assistance from state and local police in carrying out certain international obligations arising from the arrest, detention, or death of foreign nationals (citizens of other countries).

For the purposes of consular notification, foreign nationals include lawful permanent resident aliens of the United States who have a resident alien registration card (commonly known as a "green card").

When foreign nationals are involved in an incident, members shall consult *"Consular Notification and Access"* provided by the Department of State, and are available to all stations via the web site at:

- https://travel.state.gov/content/travel/en/consularnotification.html

International Drivers Licenses

Some foreign nationals, while in the United States, may legally drive using their country's license for up to one (1) year from the person's date of entry into the country, unless they establish permanent residency or employment in this country.

Massachusetts shall only honor valid licenses from countries identified within the current Massachusetts Driver's Manual Appendices:

- *Parties to the Road Traffic Convention and the 1943 Inter-American Automotive Traffic Convention*.

This publication is available to all members via the Massachusetts Registry of Motor Vehicles web site under:

- Forms & Manuals→ Driver's Manual→ Appendices "A".

This also applies to private vehicle registrations, when accompanied by a plaque indicating the country of origin.

An operator with a valid driver's license from Germany or Switzerland shall be considered to be duly licensed to operate in Massachusetts.

Foreign Nationals Arrest or Detention

Position	Duties
Member	• Immediately notify a supervisor of the arrest or detainment of a foreign national.
Supervisor	• Inform the detainee of the detainee's right to have their government notified; • Notify the Troop Duty Officer of the detention and of the notification of the detainee's rights; and • Subject to laws and Department procedures, allow consular officers to visit and converse with the detainee.
Troop Duty Officer	• Notify the Troop Commander; and • If the detainee requests, or if it is mandated, notify the appropriate consulate or embassy without delay, and document the notification.

Mandated Reporting

Agreements with certain countries mandate that they be notified when their nationals are confined or detained regardless of the national's request. These countries are listed in *"Consular Notification and Access"* provided by the Department of State, and are available to all stations via the web site at: https://travel.state.gov/content/dam/travel/CNAtrainingresources/CNA%20Manual%205th%20Edition_September%202018.pdf

Station Commanders shall ensure that the Consular Notification and Access List is updated and available in the guidebook.

Questions

Members who have questions regarding Consular Notification may contact U.S. Department of State at (202) 485-7703 or after regular business hours the Department of State Operations Center at (202) 647-1512.

Ship and Aircraft Incidents

If a ship or aircraft registered in a foreign country crashes within the United States, the nearest consular offices of that country shall be notified immediately.

Deaths of Foreign Nationals

Article 37 of the Vienna Convention on Consular Relations requires that if federal, state or local government officials become aware of the death of a foreign national in the United States, they must ensure that the nearest consulate of that national's country is notified of the death. Members who become aware of such incidents in the course of their duties shall make appropriate notification in a timely manner.

Requests for Political Asylum

Asylum

Asylum is defined as protection and immunity from extradition granted by the United States to a foreign national who is unable or unwilling to return to their country of nationality because of persecution or a well-founded fear of persecution on account of race, religion, nationality, membership in a particular social group, or political opinion.

Request for Asylum

If approached by a foreign national seeking asylum

Step	Action
1	Prevent attempts at forced repatriation, and try to make the person feel comfortable and safe: • Offer protection; and/or • Invite the person to the nearest Department station or facility.
2	Obtain personal data/history: • Name, nationality, date and place of birth, and any documents; • Whether person is alone or with a group; and • Whether person has family, friends, or relatives nearby.
3	Notify a supervisor and the Troop/Section/Unit Commander of the situation.
4	Notify U.S. Immigration and Customs Enforcement (ICE) Boston office (617) 565-3100/3104 to transfer the case.

Elected Officials

National Senators and Congressional Representatives

U.S. Senators and Representatives shall in all cases, except treason, felony, and breach of peace, be privileged from arrest during their attendance at the session of their respective houses, and in going to and returning from the same; and for any speech or debate in either house, they shall not be questioned in any other place. *(U.S. Constitution Article 1, section 6, clause 1.)*

Massachusetts State Senators and State Representatives

No member of the House of Representatives or Senate shall be arrested, or held to bail while going to, returning from, or attending the General Assembly. (Massachusetts Constitution Part 2 C.1 §3 Articles 10 & 11.)

If…	Then…
A Senator or Representative, as outlined above, is en route to an official function associated within the scope of their duties:	• Release forthwith; and • Take action at a later date.
OUI or endangering public safety:	• Normal arrest process.

Elected Officials

Notification

The Troop Commander shall immediately notify the Division Commander and the Office of the Superintendent when any elected or appointed official is arrested or detained for a crime.

Military Personnel

Exceptions To License Requirements

Members shall be aware that Massachusetts General Laws (MGL) c.90, s.5B, s.9B, and s.10 allow several exceptions to license and registration requirements for members of the Armed Forces and their spouses.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**SOC-06**

Subject:

Administration of Naloxone Hydrochloride (Narcan)

Policy

This policy shall establish protocol for Department members in order to reduce life-threatening emergencies of fatal opioid overdoses, where medical professionals are not readily available, by administering naloxone hydrochloride.

Department members shall assist any person who may be suffering from an opioid overdose. Department members trained in accordance with this policy shall make every reasonable effort, to include the use of naloxone combined with First Responder Training, to revive the victim of any apparent drug overdose.

Definitions

Mucosal Atomization Device: Used to deliver a mist of atomized medication that is absorbed through the nasal mucosa into a person's blood stream and into the brain and cerebrospinal fluid.

Naloxone Hydrochloride or Narcan: An opioid receptor antagonist and antidote for opioid overdose administered in intramuscular, intranasal or intravenous forms. The intranasal form, using prefilled syringes compatible with Mucosal Atomization Device, is permitted for use by first responders under Massachusetts Office of Emergency Medical Services Statewide Protocol Standing Orders.

Opioids: Medication that reduces the intensity of pain signals to the brain and affects those brain areas controlling mood, memory, reward and emotion, which diminishe the effects of a painful stimulus, but also can result in addiction. Opioids at high doses reduce the drive to breathe, which can result in inadequate oxygen to the brain and overdose. Medications that fall within this class include hydrocodone, oxycodone, morphine, codeine, and related drugs e.g., heroin potent illicit derived from morphine that is prohibited for medical use in the United States.

Subject: Dispensing of Naloxone Hydrochloride (Narcan)	Number: SOC-06

Definitions, continued

Opioid Overdose: An acute condition including, but not limited to, decreased level of consciousness, respiratory depression, coma, or death resulting from the consumption of an opioid, or another substance with which an opioid was combined, or that a layperson would reasonably believe to be an opioid-related drug overdose that requires medical assistance.

Universal Precautions: An approach to infection control to treat all human blood and certain human body fluids as if they were known to be infectious for HIV, HBV and other blood borne pathogens.

Training

Department members issued Naloxone Hydrochloride (Narcan), shall:

- Be trained by the Department's Medical Unit on responding to persons suffering from an apparent opioid overdose and the use of Narcan; and
- Receive refresher training every two (2) years that may be done in conjunction with First Aid/CPR Training.

Training shall follow recommendations from the Office of Emergency Medical Services (EMS) - Department of Public Health, *Administrative Requirements Manual AR-2-100* as amended.

Issue of Narcan

Department members who are authorized shall:

- Carry a Narcan kit with a Mucosal Atomization Device according to EMS Statewide Treatment Protocols;
- Follow Narcan and First Responder training conducted by the Department's Medical Unit;
- Store their Narcan kit with their first aid kits, however, during extreme hot and cold temperatures or when on extended leave, Narcan kits should be removed from vehicles and maintained at room temperature (59-86 degree F) away from direct sunlight;
- Report missing, damaged or expired Narcan kits to their immediate supervisor;
- Dispose of MAD syringes and Narcan vials in a biohazard sharps container; and
- Request replacement Narcan kits through channels to the Department's Medical Unit.

Subject: Dispensing of Naloxone Hydrochloride (Narcan)	Number: SOC-06

Issue of Narcan, continued

Immediate Supervisors shall:

- Document in writing any reports of missing, damaged or expired Narcan kits; and
- Forward the documentation through channels to their Division Commander's Office for further action in coordination with the Officer-In-Charge (OIC) of the State Police Medical Unit.

Use of Narcan

When dispensing Narcan Department members shall:

- Maintain universal precautions;
- Follow training received from the Department's Medical Unit on protocols and procedures for the administration of Narcan;
- Ensure SP 900 Naloxone Hydrochloride (Narcan) Administration Incident Record is completed for each Narcan administration and forward through channels to the Department's Medical Unit.

Medical Unit

The Department's Medical Unit shall:

- Ensure Department members receive training in the dispensing of Narcan according to EMS and the Statewide Treatment Protocols;
- Authorize and supply members with Narcan kits as needed;
- Ensure SP 900 Naloxone Hydrochloride (Narcan) Administration Incident Record is forwarded to the identified Medical Director of the Naloxone Hydrochloride (Narcan) Program; and
- Keep training records of all Department members authorized to dispense Narcan.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**SOC-07**
Subject:	
Domestic Abuse	

Policy

The Department shall adhere to the Massachusetts Domestic Violence Law Enforcement Guidelines 2001.

Definitions

Abuse: For the purposes of this policy, abuse is defined by Massachusetts General Laws (MGL) c.209A, §1 as the occurrence of one or more of the following acts between family or household members:

- Attempting to cause or causing physical harm;
- Placing another in fear of imminent serious physical harm; or
- Causing another to engage involuntarily in sexual relations by force, threat, or duress.

Family or Household Members: Persons who:

- Are or were married to one another;
- Are or were residing together in the same household;
- Are or were related by blood or marriage;
- Have a child in common regardless of whether they have ever married or lived together; or
- Are or have been in a substantive dating or engagement relationship, including same sex relationships.

Response

Domestic abuse situations are considered a high priority and require that members immediately respond to the scene. Notifications shall be made to the department of jurisdiction as appropriate with an offer made of Department assistance.

The State Police Detective Unit (SPDU) of jurisdiction shall be notified of all domestic abuse cases involving serious bodily injury or injury which results in a death.

Response, continued

Position	Duties
Desk Officer/ Dispatcher	• Whenever possible, two (2) members should be dispatched to the scene; o Provide available information as requested: o Provide information about the existence of any warrants or protective orders, or record of criminal history; o Provide any other relevant information of prior incidents or likelihood of firearms being present; and o Provide any record of Firearms Identification Cards and/or Licenses To Carry Firearms issued to resident(s); and • Notify the Troop Duty Officer. Note: A response shall not be terminated based on a follow-up call from the complainant.
Responding Member(s)	Whenever there is reason to believe that a family or household member has been abused, or is in danger of being abused, members shall: • Arrest the abuser where probable cause exists; • Request medical treatment if appropriate; • Activate the Emergency Judicial Response System (EJR); • Remain on the scene; • Immediately provide the abuse victim with copy of a SP 500 Abused Persons Notice of Rights; • Assist victim and dependent children to a safe place; • Provide referral information for programs, shelters, and counseling to victims; and • Inform victim that abuser may be eligible for bail.

Supervisor Responsibilities

Supervisors shall ensure the provisions of MGL c.209A, as well as these guidelines, are adhered to:

- That an incident report has been filed, even in cases where no arrest was made; and
- That calls which are received as allegations of domestic abuse or a domestic disturbance are not reclassified because no probable cause to arrest existed. Incident reports shall be filed in those cases as well.

Supervisor Responsibilities, continued

If upon review of an incident report, it is believed that probable cause exists, the supervisor shall:

- If required, ensure that a follow-up investigation is conducted;
- Ascertain that appropriate referrals are provided to the victim; and
- Ensure that criminal charges are initiated according to MGL c.209A.

Notice of Rights

The investigating member shall immediate provide abuse victims with adequate notice of rights. The notice shall consist of:

- Handing the victim a copy of SP 500; and
- Reading the victim their rights.

When the victim's native language is not English, every attempt shall be made to provide the statement in their native language.

Confidentiality

A plaintiff's residential address and workplace address shall appear on the court order and be accessible to the defendant unless the plaintiff specifically requests that this information be withheld from the order.

Members assisting in emergency abuse prevention orders shall be cognizant of victims' confidentiality rights and requests.

Service of Orders

Service of orders shall be made in hand, unless otherwise ordered by the court. Orders shall be:

- Served promptly upon receipt. If service is initially unsuccessful, the Department shall continue to attempt service until it is completed. Service of orders shall not be delayed in order to be served by a specialized officer or unit; and
- Returned to the court promptly.

The victim's safety shall be considered in the timing of the service of the order. Members should encourage the victim to contact an advocate (either through the District Attorney's (DA) Office of jurisdiction, SAFEPLAN, or the local battered women's program) in order to develop a safety plan around the service of the order.

Troop/Station/Section/Unit Commanders shall maintain a record of all attempts at service.

Out of State Orders

Persons who violate out of state abuse orders, or violate Massachusetts abuse orders in another state, may be charged criminally for contempt in the Commonwealth of Massachusetts.

- In assessing probable cause, a member may presume the validity of the protection order issued by another jurisdiction when the member has been provided with:
  - A copy of the order by any source; and
  - A statement by the victim that such order remains in effect.

A protective order issued in another jurisdiction (as defined in MGL c.209A, §1) shall be given full faith and credit in the Commonwealth. Therefore, members shall make a warrantless arrest of any person, when the member has probable cause to believe there is a violation of an emergency, temporary or permanent vacate, refrain from abuse, stay away or no-contact order, or judgment issued by another jurisdiction.

Firearms

In domestic abuse incidents, members shall seize all firearms in accordance with SOC-07A Domestic Abuse Arrest/Investigations.

Vacate Orders and Court Orders to Retrieve Belongings

Once a vacate, no contact, stay away, or refrain from abuse order is issued, members shall not accompany any party to the property without specific judicial authorization. A vacate order may include the following requirement:

- The defendant shall not damage any of the plaintiff's belongings, or those of another occupant, and shall not interfere with any utilities or mail delivery to the plaintiff.

The defendant in the vacate order may be allowed to retrieve their belongings under the following conditions and shall:

- Have a court order allowing for the retrieval; and
- Not be allowed to use this as a means of harassing the victim.

The victim/defendant shall have prior notice by the Department, and shall agree to the timing of the retrieval.

Note: Members need to keep in mind that certain behaviors by the victim or the defendant, while at the residence, may constitute a violation of the protective order. Repeated visits may also constitute a violation. The purpose of the restraining order is to keep the defendant away from the plaintiff. If the defendant repeatedly returns to collect their belongings, it is defeating the purpose of the protective order.

Vacate Orders and Court Orders to Retrieve Belongings, continued

In cases where one party has a court order that allows them to return to a residence in order to retrieve their belongings, members shall:

- Accompany the victim to ensure the order is executed: and
- Ensure the victim is free from harassment or abuse by the defendant.

Referral Information

Troop/Station/Section/Unit Commanders shall ensure that referral information for programs, shelters, and counseling for victims are identified within their respective jurisdictions and available within the guidebook.

Confidential Programs Locations

A domestic abuse program is defined as any refuge, shelter, office, safe home, institution, or center established for the purpose of offering assistance to victims of abuse through crisis intervention, medical, legal, or support counseling.

The location and street address of all domestic abuse programs are absolutely confidential and shall not be revealed in any criminal or civil proceeding.

Under no circumstances shall law enforcement officers release information to anyone, other than another law enforcement officer or a victim, regarding the location of a domestic abuse program.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**SOC-07A**
Subject:	
Domestic Abuse Arrest/Investigations	

Policy

The Department shall respond and investigate allegations of domestic abuse while ensuring the rights and safety of all those involved.

Arrest Guidelines

The safety of the victim and any children shall be paramount in any decision to arrest, and in the timing of the arrest. The decision to arrest shall be based on whether or not probable cause exists that a crime occurred, not on whether or not the victim wishes to seek complaints or wishes to testify at a future date.

Mandatory Arrest: Members shall make a warrantless arrest of any person the member witnesses or has probable cause to believe has violated an emergency, temporary or permanent vacate, refrain from abuse, stay away or no-contact order, or a judgment, suspension, surrender and/or a protection order issued by any jurisdiction.

Arrest Preferred: When there are no refrain from abuse, vacate, stay-away, or no-contact orders or judgments in effect, arrest shall be the preferred response whenever a member witnesses or has probable cause to believe that a person has committed:

- A felony;
- An assault and battery of a family or household member in violation of Massachusetts General Laws (MGL) c.265, §13A;
- A misdemeanor involving abuse, as defined in MGL c.209A;
- An assault and battery or permits another to commit an assault and battery upon an elder or a person with a disability in violation of MGL c.265, §13K;
- An assault and battery with or without a dangerous weapon on an individual under the protection of an abuse prevention order, as defined in MGL c.265 §13A(b)(iii) and 15A(c)(iii); or
- An assault on an individual who is known to be pregnant, or there is reason to know is pregnant.

Arrest Guidelines, continued

When probable cause to arrest exists and the suspect has fled the scene, the member shall:

- Have the Desk Officer/Dispatcher advise area patrols and all local police departments as appropriate;
- Attempt to make a warrantless arrest; and
- Seek an arrest warrant from the appropriate court, as soon as possible.

A statement from a police department that probable cause to arrest exists shall be honored by another police department. When probable cause exists to believe a crime involving abuse occurred, members shall not advise the victim to seek complaint applications on their own.

Investigations

Members responding to domestic abuse calls shall follow the guidelines established in SOC-07 Domestic Abuse and ensure an investigation includes:

- Information about the suspect's ownership, access to, or presence of any firearms, and their location;
- Relationships of all parties at the scene, including names and DOB of children present, or those in the household;
- The phone number of the victim’s residence and include the number within the incident report so the bail bondsman or court personnel may inform the victim of the defendant’s release on bail; and
- Informing the victim that if they intend to leave the residence, and desire to be informed of the abuser’s release on bail, they must provide a contact number.

Members shall be aware that thorough documentation of the crime scene condition is critical to the prosecution.

Defendant Information

Members shall provide information regarding a defendant's dangerousness to the Prosecutor for use at arraignment such as:

- Criminal history;
- Restraining, no-contact or other protective orders currently in effect against the suspect;
- Possession of, or past use of weapons;
- Threats of serious physical harm against the victim, other family members, or pets; or
- Attempts or threats to commit suicide.

Arrest of a Caretaker

In cases involving abuse of a child**,** a person with a disability, or an elder, members shall:

- Address the issue of whether or not the victim can be left alone safely, if the abuser is arrested; and
- Contact the respective protective agency in order to arrange for temporary care, if the child, person with a disability, or the elder cannot be left alone.

In situations involving allegations of abuse of children, the disabled, or the elderly refer to SOC-07C Abuse of Children/Disabled/Elderly.

Substantive Dating Relationship

Members shall gather enough information to determine whether or not a substantive dating relationship exists and examine the following factors when making this determination:

- The length of time of the relationship;
- The type of relationship;
- The frequency of interaction between the parties; and
- If the relationship has been terminated by either person, the length of time that has elapsed since the termination of the relationship.

If it is determined that a substantive dating relationship exists or did exist, then the member shall:

- Take proper action, including arrest when appropriate, regardless of whether the victim seeks a restraining order.

In cases where there is no substantive dating relationship, another crime such as stalking or criminal harassment may have been committed.

Dual Arrests

Dual arrests, like the issuance of mutual restraining orders, are strongly discouraged because they trivialize the seriousness of domestic abuse and increase the danger to victims. In the majority of cases, an effective investigation will reveal the dominant aggressor. Members shall:

- Attempt to identify the dominant aggressor bearing in mind the difference between offensive and self-defense injuries; and
- Take action based on that determination.

A member arresting both parties is required by law to submit separate and detailed arrest reports indicating the basis for the dual arrest.

Members investigating an incident of domestic violence shall not discourage requests for law enforcement intervention by threatening, or otherwise indicating all parties will be arrested.

Incident Reports

Incident reports shall be made whether or not an arrest results. Upon request to the Department, reports shall be made available to the victim at no cost. Prosecution and subsequent legal action can be greatly aided by documentation and description of:

- Physical injuries; and
- Photographs of the injuries.

Members shall note the presence of children in the household and other information gained through the investigation.

Confidentiality

The Department shall ensure the confidentiality of domestic abuse victims by safe guarding certain information including, but not limited to:

- Information regarding the identity of a victim or children;
- Any medical information;
- Statement by witnesses; or
- Keeping a separate record of the victim's home and work address and phone numbers if the victim will be seeking to hide from the abuser.

Victims of domestic abuse have a strong privacy interest in this type of information whether contained in the initial incident report or supplemental reports. Domestic abuse reports shall only be released to the victim and the District Attorney's Office of jurisdiction. Any other requests for a domestic abuse report shall be forwarded to the Department's Legal Section.

Firearms

Firearms at the scene of a domestic abuse incident.

If…	Then…
The responding members are informed that a firearm or weapon has been involved in the dispute.	• Seize the weapon as evidence of the crime.
The weapon is not reported to have been involved in the dispute.	• Request that the firearm or weapon be placed in the Department's custody temporarily.

A consent search is permitted by law in all jointly controlled or accessible areas. Members shall:

- Take temporary custody of the firearm or weapon to alleviate the threat of serious violence; and
- Ascertain whether a firearm is lawfully possessed.

Firearms, continued

If the member determines that the weapon cannot be seized, then:

- A judge can order the defendant to surrender all firearms, and their Licenses To Carry (LTC) Firearms including their Firearms Identification Card (FID); or
- The issuing authority may revoke or suspend the LTC or FID, which would then allow for the seizure of the firearms.

In all domestic abuse cases, the investigating member shall advise the licensing authority that the subject of the license is suspected of abuse. Notice may be made by mailing or faxing a copy of the incident report to the local licensing authority after authorization from the Department's Legal Section.

Abuse Prevention Orders

Upon issuance of any order under MGL c.209A Abuse Prevention Orders, *that specifically mandates that all firearms be surrendered*, members shall:

- Immediately take possession of all firearms, rifles, shotguns, machine guns, and ammunition, including any LTC and FID, owned or controlled by the subject of the order; and
- Ensure that the court order has been completely vacated prior to returning weapons and permits.

Violations of Orders

In the interest of immediacy and the statutory mandate to arrest, members shall:

- Make a warrantless arrest of any person the member witnesses or has probable cause to believe has violated an order, including a violation which stems from the possession of weapons.

Seizure and Storage of Firearms

Every department within the Commonwealth shall honor another department's request for assistance in seizing the above listed items regardless of which department is named within the order. The department named within the order shall be responsible for the storage of the seized items or the delegation of storage to an authorized facility.

Orders Against Law Enforcement Officers

In cases involving police officers that are defendants in Abuse Prevention Orders which require the surrender of all firearms**,** the defendant must relinquish all firearms, including departmental weapons, to the department serving the order.

Federal Firearms Provisions

The Colonel/Superintendent shall be notified whenever a member identifies a case involving certain circumstances of which federal action can be taken. Members shall be cognizant of the following federal provisions:

Persons Named in Protective Orders
Under the Federal Crime Control and Law Enforcement Act of 1994, it is unlawful for an individual subject to a permanent restraining order involving intimate partners to receive, ship, transport, or possess guns (including handguns, rifles, and shotguns) or ammunition, that traveled through interstate commerce.

Misdemeanors Involving Domestic Violence
Under 18 USC § 922(g)(9), it is unlawful for any person convicted of certain misdemeanor crimes involving domestic violence to ship, transport, possess, sells, or otherwise dispose of, or receive firearms or ammunition.

Federal Felon in Possession Of A Firearm
Under 18 USC § 922(g)(1), "Felon in possession of a firearm," it is unlawful for any person who has been convicted in any court of a crime punishable by imprisonment for a term exceeding one year to possess any gun or ammunition.

Property

The relationship of the parties and their property interests complicate domestic abuse situations. When a party to a domestic dispute is accused of removing, or attempting to remove property from the dwelling, or is accused of damaging or destroying property, the member shall:

- Conduct an investigation to determine the civil or criminal consequences; and
- Take appropriate action if criminal (e.g. malicious destruction of property).

Police Officers from Other Jurisdictions

In cases involving police officers from other jurisdictions, the investigation shall follow the guidelines established within this policy and SOC-07. The supervisor shall:

- Immediately notify the OIC of the employing department;
- Ensure information is entered into the RAMS system and/or ACISS, the Daily Administrative Journal and other appropriate reports;
- Secure the local weapon until returned to the involved Department; and
- Forward a copy of the report to the Chief of Police of the involved officer, through the Department’s Legal Section

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

2101

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**SOC-07B**
Subject:	
Domestic Abuse Involving Members	

Policy

The Department shall ensure that all reports of alleged domestic abuse by members are thoroughly investigated.

The Department shall respond and investigate allegations of domestic abuse while ensuring the rights and safety of all those involved.

Involved Member

Any member, upon being notified that they are a defendant in any protective order or modification thereof, or upon becoming aware that they have been accused of abuse, shall:

- Immediately notify their duty assignment supervisor (pursuant to Rules and Regulations), naming the investigating department, if any;
- Surrender Department issued License To Carry (LTC) Firearms and/or weapons and any other state or federal firearms licenses to the responding supervisor; and
- Within twenty-four (24) hours, make written notification, through channels, to their Division Commander. A copy of the protective order or modification shall also be attached to the documentation.

Responding Member

All members responding to incidents of alleged domestic abuse involving members of the Department shall:

- Take immediate action to ensure the safety of the victim;
- Call a supervisor of higher rank than the involved member to the scene;
- Remain on the scene until relieved by the responding supervisor;
- Ensure that all provisions of Massachusetts General Laws (MGL) 209A are followed, including arrest, when necessary; and
- Submit a detailed report of observations and statements made, prior to the end of their shift.

Responding Supervisor

Whenever a member is alleged to have committed abuse, a supervisor of higher rank than the accused member shall be assigned to conduct a criminal investigation. When a protective order is issued, or when the supervisor has reason to believe that the member committed abuse, the supervisor shall immediately:

- Relieve the accused member from duty;
- Seize all Department issued use of force weapons, pursuant to Departmental Rules and Regulations;
- Seize all other firearms and/or weapons at the scene;
- Seize member's LTC, and any other state or federal firearms licenses;
- Notify the member's Troop/Section Commander;
- Seize Department issued vehicle and conduct a vehicle inventory;
- Identify outstanding protective orders against the accused member;
- Ensure that all provisions of MGL 209A are followed, including arrest and further investigation, when appropriate;
- Forward LTC and any other state or federal firearms licenses to the Administrative Investigator;
- Complete an incident report prior to the end of their shift and forward to the Troop/Section Commander; and
- Ensure the complaint has been documented in a To/From format and fax to the Division of Standards and Training (DST) prior to the end of their shift.

Division Commander's Responsibilities

When an abuse prevention order is issued, or when there is reason to believe that the member committed abuse, the Division Commander shall:

- Assign a Commissioned/Staff Officer to conduct an administrative investigation;
- Immediately ensure that the accused member is or has been relieved from duty pursuant to Departmental Rules and Regulations;
- Convene a Duty Status Hearing, pursuant to Department Rules and Regulations; and
- Review reports and initiate additional investigations as necessary.

Administrative Investigation

In all incidents where a member has been accused of abuse, a thorough administrative investigation shall be conducted by a Commissioned/Staff Officer, preferably of higher rank than that of the accused member. The investigation shall include, but not be limited to the following:

- Identify all outstanding and expired protective orders against the accused member;
- Collect and review all reports, affidavits, and records pertaining to the allegations of abuse; and
- Interview the victim and other witnesses.

Administrative Investigation, continued

Other duties of the Administrative Investigator include:

- Working with the criminal investigator (if any) to ensure that the provisions of MGL 209A are adhered to, including criminal action or arrest when appropriate;
- Ensuring appropriate referral information has been given to the victim regarding battered women's programs, emergency shelter, counseling services, and court based advocacy services;
- Forwarding all available documents to the Duty Status Board;
- Attending all court proceedings and maintaining contact with any assigned prosecutor or probation officer; and
- Forwarding copies of all reports to the Internal Affairs Section upon completion of the investigation.

Division of Standards and Training

In domestic abuse cases involving Staff Officers, the DST Commander shall notify the Colonel/ Superintendent.

Complaint Notification to DST

In addition to any other required reports, all complaints of domestic abuse involving members shall be documented and submitted to the Division of Standards and Training (DST).

Member	Action
Member Receiving Complaint	**Internal Complaints** Internal personnel complaints originating within the Department, shall: • Be documented in a To/From format; • Faxed to the Division of Standards and Training within twenty-four (24) hours from the date of the To/From; • Submit a copy through channels to the appropriate Troop/Section/Unit Commander; and • Forward the original copy to the Division of Standards and Training.
Administrative Investigation	The Commissioned/Staff Officer conducting the administrative investigation shall: • Document the complaint in a To/From: • Fax to DST at 508-820-2149 within 24 hours of receipt; • Forward a copy through channels to the appropriate Troop/Section/Unit Commander; and • Forward the original to DST.

2105

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**SOC-07C**
Subject:	
Abuse of Children/Disabled/Elderly	

Policy

The Department shall investigate all allegations regarding the abuse of children, the disabled, and the elderly, to ensure the safety and rights of all those involved.

Mandated Reporting

Investigating members shall make mandated reports by immediately contacting the designated agency with an immediate oral report, and shall submit a report in writing **within forty-eight (48) hours** after the initial oral report. Members shall contact:

- Department of Children and Families (DCF) whenever they have reasonable cause to believe that a child under the age of eighteen (18) has been abused or neglected. The member shall:
  - Call to make an oral report Monday-Friday during the hours of 9:00 A.M. to 5:00 P.M. to the nearest DCF Office found at the bottom of the revised DCF form *"Report of Child(ren) Alleged to be Suffering from Serious Physical or Emotional Injury by Abuse or Neglect"*; or
  - Call to make an oral report after 5:00 P.M. Monday-Friday and twenty-four (24) hours on weekends and holidays to the Child-At-Risk-Hotline 1-800-792-5200; and
  - Submit the written report by either by mail, email or fax within forty-eight (48) hours to DCF. To assist in the written notification of child abuse/neglect, DCF has establish a form *"Report of Child(ren) Alleged to be Suffering from Serious Physical or Emotional Injury by Abuse or Neglect"*. This form can be obtained from DocuShare under Bulletins or from the DCF website: www.mass.gov/dcf .
- Disabled Persons Protection Commission whenever they have reasonable cause to believe that a caretaker has abused/neglected a disabled person, between the ages of eighteen (18) and fifty-nine (59). At any time call (800) 426-9009.
- Executive Office of Elder Affairs whenever they have reasonable cause to believe that someone age sixty (60) or older has been abused/neglected. At any time call (800) 922-2275.

Subject:	Number:
Abuse of Children/Disabled/Elderly	**SOC-07C**

Notifications

Troop Duty Officers shall notify the State Police Detective Unit of jurisdiction in cases where abuse of children, the disabled, and/or the elderly involve serious bodily injury or results in death.

Arrest of a Caretaker

In cases involving abuse of a child, a disabled person, or an elderly person, members shall:

- Address the issue of whether or not the victim can be left alone safely, if the abuser is arrested; and
- Contact the respective protective agency in order to arrange for temporary care, if the child, the disabled person, or the elderly person cannot be left alone.

Department of State Police
General Order

Policy Date:	Number:
July 22, 2022	**SOC-08**
Subject:	
Missing/Abandoned/Runaway Children	

Policy

The Department shall thoroughly investigate all reports of missing children. Every child reported missing to the Department will be considered at risk until significant information to the contrary is confirmed. Incidents involving missing, abandoned and/or a runaway child shall be treated as a potential emergency event that may require a rapid and coordinated response of specialized personnel and equipment. Every lost and/or missing child incident has the potential of being or becoming a criminal investigation; members shall treat the scene of each incident as a potential crime scene.

Jurisdictional conflicts are to be avoided when a child is reported missing. Questions concerning parental custody occasionally arise in relation to missing-child reports. It shall be the policy of this agency to accept the report of a missing child even if custody has not been formally established. The safety of the missing child(ren) is paramount, members will initiate an investigation when it can be shown the child has been removed, without explanation, from their last known location. If custody has not been established by the Court, then the law-enforcement responsibility is to ensure the child is safe only.

If the missing child is identified as being age seventeen (17) or younger and there is evidence of abduction, the Amber Alert Coordinator shall be notified.

Definitions

Abandoned: A child whose parents or guardians abscond from their legal responsibilities to care for their child. – MGL c. 119 §39.
Note: Does NOT include newborn infants, 7 days of age, or less, that are voluntarily placed with a hospital, police department or manned fire station. – MGL c. 119 §39 ½ "Baby Safe Haven Act"

Juvenile: A child who has not attained their 18th birthday. May also be referred to as "child" for purposes of this policy.

Lost, Injured or Otherwise Missing: A child who has disappeared under unknown circumstances.

Runaway: A child, often a teenager, who leaves home voluntarily for a variety of reasons.

Definitions, continued

Thrownaway: A child whose caretaker makes no effort to recover the child after running away, has been abandoned or deserted, or who has been asked to leave their home and not allowed to return.

Zone of Safety: National Center for Missing and Exploited Children state that the zone of safety for a child will vary depending on the age of the child and their developmental stage. In the case of an infant, for example, the zone of safety will include the immediate presence of an adult custodian or the crib, stroller, or carriage in which the infant was placed. For a school-aged child the zone of safety might be the immediate neighborhood or route taken between home and school.

Risk Factors and Response

A missing child will be considered at risk when the below factors are present:

- Not attained their 14th birthday; AND/OR
- Believed or determined to be experiencing one or more of the below circumstances:
  - Is out of the zone of safety for their age and developmental stage;
  - Has identified cognitive challenges;
  - Is drug dependent, including prescribed medication and / or illegal substances;
  - Has been absent from home for more than 24 hours prior to notification of law enforcement;
  - Is in a potentially life threatening situation;
  - May be in the company of other identified individuals who may be engaged in behavior(s) that may-endanger the child's welfare;
  - Is absent in a way inconsistent with the established patterns of behavior and the deviation cannot be readily explained; and/or
  - Is involved in a situation causing a reasonable person to conclude the child should be considered at risk.

The presence of risk factors, or other extenuating information, involved in the report of a missing child will qualify as a child at risk and an expanded investigation, including the use of all appropriate resources, will immediately commence.

If appropriate, existing interagency response protocols – including the AMBER Alert system and / or other immediate community notification methods, if available – should be considered.

Subject: Missing/Abandoned/Runaway Children	Number: SOC-08

Responsibilities

Position	Duties
Desk Officer / Dispatcher	The Desk Officer or designee, including but not limited to the dispatcher, should conduct the following upon receiving a report of a missing child. • Determine if circumstances of the report meet the definition of a missing child; • Dispatch a member to the scene of the report; • Notify the Duty Officer; • Transmit a description of the child over the Troop radio system; • Notify the local police department of jurisdiction. o Ascertain if the local police department of jurisdiction is in need of State Police assistance. o Record the request or declining of State Police services in the Daily Administrative Journal (DAJ) and advise responding member(s); o Notify the Troop Duty Officer of the notification and subsequent local police department acceptance or declination of services. o Provide assistance as requested by the local law enforcement agency. • Search Department RMS systems and other records management for related information, specifically any records such as those pertaining to the family, the place where the child was last seen, and the child's residence; • Safeguard all pertinent records in accordance with record retention regulations and investigative needs; • Activate established protocols for working with the media – including activation of the AMBER Alert system and / or other immediate community notification methods when appropriate; and • Make appropriate entries in the DAJ.

Responsibilities, continued

Position	Duties
Responding Member(s)	• Respond promptly to the scene; • Interview the parent(s) or person who made the initial report; • Obtain a detailed description of the missing child including recent photo(s) and/or video(s). • Complete the SP-622 Lost / Missing Person Questionnaire; • Confirm the child is in fact missing; • Verify the child's custody status; • Identify the circumstances of the missing episode; • Make an initial assessment of the type of incident; • Identify the missing child's zone of safety for their age and developmental stage; • Inquire if the child has access to the Internet, cell phone, and / or other communications device; • Conduct an immediate, thorough search of the scene. Refer to SOC-04 Lost / Missing Person Searches; • Determine when, where, and by whom the missing child was last seen; • Interview the individual(s) who last had contact with the missing child; • Identify and separately interview everyone at the scene; • Obtain a description of the suspected abductor(s) if applicable, and other pertinent information; • Determine the correct NCIC Missing Person File category and ensure notification is promptly entered; • Provide detailed descriptive information to the Troop Dispatcher for broadcast updates; • Seal / protect scene, area of child's home, and areas of interest as potential crime scenes; and • Prepare necessary reports and complete appropriate forms. o Responding members shall complete an incident report. o The Department of Children and Families (DCF) shall be notified; and • Should the incident indicate abuse or neglect, a 51a shall be filed.

Responsibilities, continued

Position	Duties
Troop Duty Officer	• Assign a supervisor to respond to the scene; • Make appropriate DAJ entries and SAM notification as warranted; • Notify the Troop Commander if the child is not immediately located; • Assist in the activation of the AMBER Alert system as requested; • Notify the State Police Detective Unit (SPDU) if appropriate; • Coordinate between partner agencies and deploy resources as needed; and • Notify Media Relations.
Supervisor Responsibilities	• Obtain a briefing and written reports from the first responder(s) and other agency personnel at the scene; • Determine if additional personnel and resources are needed to assist in the investigation; • Initiate activation of the Amber Alert System if warranted; • Initiate immediate community notification methods, such as reverse 911 notification system(s); • Establish a command post and other ICS protocols; • Organize and coordinate search efforts; • Ensure all required notifications have been made; and • Ensure the child is entered into NCIS as missing.
Division of Investigative Services	• When warranted, and upon request, the SPDU of jurisdiction shall meet with the investigating member(s) and initiate or assist with an investigation of the circumstances surrounding the missing child. If such investigation is initiated, the SPDU of jurisdiction shall communicate relevant information to the initiating investigating member(s).

Unidentified Persons

A member assigned to the report of an unidentified person, whether living or deceased, who appears to be a child, shall:

- Obtain a complete description;
- Enter the unidentified child's description into the NCIC Unidentified Person File;
- Use all available resources to aid in the identification of the child; and
- Cancel all notifications after identification is confirmed.

Recovery or Return of Missing Child

A member assigned to the recovery or return of a missing child shall:

- Verify the located child is, in fact, the reported missing child;
- Secure intervention services, if appropriate;
- Arrange the return of the child to their legal guardian or an appropriate children's shelter in the case of a runaway or missing child who has been located and who is not wanted on a warrant or other law violation;
- In the case of a runaway from another jurisdiction who has been located and a warrant exists or an NCIC missing-person "hit" is verified, place the child in custody and transport them to the appropriate facility for admission; and
- Notify DCF and the local police department of jurisdiction of the recovery/return.

Safe Haven Exception

In accordance with MGL Chapter 119 § 39½, in the event a parent voluntarily abandons an infant 7 days of age or less at any MSP facility, a member will:

- Immediately take custody of the newborn;
- Notify EMS and have the infant transported to the hospital to be evaluated;
- Follow EMS to the hospital and ensure that DCF is notified of such abandonment;
- Enter all appropriate information into the DAJ; and
- Complete an incident report.

If the infant shows signs of abuse, the Member is required to submit a 51A form under MGL Chapter 119. (Voluntary abandonment of an infant shall not by itself constitute either a finding of abuse or neglect or a violation of criminal law.)

Safe Haven Exception, continued

The Member accepting a newborn infant will make every effort to solicit the following information from the parents leaving the newborn infant:

- Name of newborn infant;
- Name and address of parent placing the newborn infant;
- Birthplace of newborn infant;
- Information relative to newborn infant's medical history and their biological family's medical history if available;
- Any other information that might reasonably assist DCF or the court in current or future determinations of the best interests of the child; and
- Whether parent plans on returning to seek future custody of infant.

The Member receiving the newborn infant will encourage the parent to provide the information but the parent will not be required to provide such information.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**SOC-09**

Subject:

Terrorism/WMD Incidents

Policy

The preservation of life and the prevention of injury shall be recognized as high priorities in responding to terrorist incidents, including those involving Weapons of Mass Destruction.

Terrorism

Terrorism is the unlawful use of force or violence against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives.

WMD

Weapons of Mass Destruction (WMD) can be chemical, biological, radiological, nuclear or explosive (CBRNE) weapons that have potential for creating mass casualty incidents.

SP 2810 Form

All Members shall keep a copy of the SP 2810 Crime Scene Threat Assessment Worksheet folded inside the Emergency Response Guidebook in their cruiser. Copies of SP 2810 shall be maintained at each Department facility or within the Emergency Response Guidebook to be accessible to Desk Officers and Troop Duty Officers.

Responding Members

When ...	Then ...
Responding to routine calls for service:	• Respond with due caution; callers may lack a complete understanding of the situation and may not convey the existence of on-scene hazards.
There is the potential that a terrorist or WMD event is occurring:	• Ensure the safety of all responders and the public; and • When possible, review SP 2810 and relay pertinent information to the Desk Officer.

Subject:	Number:
Terrorism/WMD Incidents	**SOC-09**

Responding Members, continued

When ...	Then ...
Relaying information from the SP 2810:	• Utilize the most secure channel of communication at your immediate disposal; and • If it is necessary to relay information via radio, request a Code 1.
On-scene hazards threaten life or health:	• The preservation of life and the prevention of injury shall be of the highest priority.
Members inadvertently encounter a potentially contaminated area:	• Avoid contact; • Minimize exposure; • Never purposefully touch, taste or smell any object, package, or container, etc.; • Warn others; • If possible, isolate area; and • Stay upwind and uphill.
Issues arise concerning the crime scene or the securing of evidence:	• Contact the Troop Duty Officer for guidance.

Desk Officer

If ...	Then ...
A report is received involving a potential terrorist or WMD event:	• Transmit the most detailed information possible to all responding members; and • Relay all available information from the scene to the Troop Duty Officer, assigned patrols, local police, and fire departments.
A report is received involving a potential terrorist or WMD event:	• Relay all available information from the scene to GHQ Communications and the Troop Commander (who shall contact the Division Commander); • Contact the local fire department to activate Department of Fire Services-Regional Hazardous Materials Team (877)385-0822; • Contact the Department State Police Detective Unit (SPDU) of jurisdiction; and • Ensure that the area hospitals are advised.

Troop Duty Officer

If ...	Then ...
The incident involves a suspected explosive device or a suspicious package:	• Contact the Bomb Squad; and • Refer to SOC-02 Bomb Threat/Explosives Incidents.
The incident involves a hazardous material:	• Contact the local fire department to activate Department of Fire Services-Regional Hazardous Materials Team (877)385-0822; and • Refer to SOC-01 Hazardous Materials.
Issues arise concerning the crime scene or the securing of evidence:	• Contact the SPDU of jurisdiction; and • The Division of Investigative Services (DIS) representative shall be designated the officer-in-charge.

GHQ Communications Section

If ...	Then ...
A report is received involving a potential terrorist or WMD event:	In addition to duties required by other written directives, the GHQ Communications Section shall notify: • The Office of the Superintendent; • The Division of Investigative Services and Field Services Commanders; • Media Relations; • The Commonwealth Fusion Center; • Massachusetts Emergency Management Agency (MEMA); and • Department of Fire Services-Regional Hazardous Materials Team; and • The National Guard Civil Support Team, if needed.
The incident involves a suspected explosive device or a suspicious package:	• Contact the Bomb Squad; and • Refer to SOC-02 Bomb Threat/ Explosives Incidents.

Subject:	Number:
Terrorism/WMD Incidents	**SOC-09**

GHQ Communications Section, continued

If ...	Then ...
The incident involves a hazardous material:	• Contact the local fire department to activate Department of Fire Services-Regional Hazardous Materials Team (877)385-0822; and • Refer to SOC-01 Hazardous Materials.

DIS

If…	Then…
A preliminary investigation into a reported potential terrorist or WMD event reveals a hoax or an unsubstantiated incident:	• The Division of Investigative Services shall prepare an after action report within forty-eight (48) hours in order to make use of "lessons learned."

2118

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**SOC-10**
Subject:	
Clandestine Drug Laboratory Response	

Policy

The Department recognizes the inherent dangers of clandestine drug laboratories and sets forth the following procedures to be followed by all Department members. These procedures are in compliance with Federal Occupational Safety and Health Administration (OSHA) Standards and are designed to limit dangers to Department members and the public.

Purpose

To define the role of the Clandestine Laboratory Enforcement Team (CLET) and establish guidelines for the utilization and activation of team members.

Definitions

Clandestine Lab (Clan Lab): The operation at any location consisting of chemicals, mixtures, or processes designed or intended to synthesize, extract or convert illegal or controlled substances to include but not be limited to:

- Methamphetamine, Ecstasy, LSD, Fentanyl, THC and other illegal drugs.

Clandestine Laboratory Enforcement Team (CLET): A multi-agency team of law enforcement officers and certified chemists who have completed the Drug Enforcement Agency (DEA) Basic Clandestine Laboratory Certification School.

Site Safety Officer: A CLET member who has completed the DEA Advanced Site Safety School. The Site Safety Officer is responsible for the safe operation and adherence to DEA procedures at clan lab sites.

Utilization of CLET

CLET is available when requested to assist members from the Department and those from other local, state, and federal agencies for:

- Known or suspected clan labs or their investigations;
- Execution of search warrants at clan lab locations;
- Training personnel relative to clan labs; and
- Other special events as assigned by the Commander of the Division of Investigative Services or designee.

Subject: Clandestine Drug Laboratory Response	Number: SOC-10

CLET Activation Protocol

Requests for CLET services shall be made to the Troop Duty Officer and shall include:

- The name, rank, and agency name of the requesting officer;
- The name of the primary point of contact and a call-back number;
- The nature of the request; and
- The exact location of the incident and any designated staging areas.

The Troop Duty Officer shall contact:

- the Department's CLET Leader, or designee; and
- the on-call member of the State Police Detective Unit of jurisdiction.

The CLET Leader, or designee, shall:

- Assess the situation;
- Activate the necessary Department's CLET members, to include the Department's chemists, and
- Contact the DEA CLET Coordinator.

Note: The CLET Leader shall maintain the current list of certified CLET members.

Activation/ Contact Number

During business hours: contact MSP Fire and Explosion Investigation Unit (978)567-3310.

After business hours: contact Troop Duty Office.

Authority

No member of the Department shall enter a known/suspected clan lab site unless:

- Authorized by a CLET Site Safety Officer; or
- Imminent or immediate danger exists to others.

CLET members shall assume complete control and authority of all identified clan lab sites.

While engaged in clan lab operations, CLET members shall take direct orders only from the:

- CLET Leader or designee;
- Site Safety Officer;
- DEA Clan Lab Coordinator;
- Division of Investigative Services Commander or designee; or
- Colonel/Superintendent.

Operational Protocols

Department Members

Department members who discover or are advised of a suspected clan lab shall:

- Immediately notify the Troop Duty Office;
- **NOT** attempt to touch, turn off, adjust or otherwise manipulate any switches, controls or other materials within the suspected clan lab;
- Secure the area around the suspected clan lab and remain at a safe distance from the lab; and
- Remain on the scene until properly relieved.

CLET Leader

The CLET Leader, or designee, after assessing the situation, shall determine the need for additional resources including, but not limited to:

- Local Fire Department(s);
- MSP Bomb Squad;
- Department of Fire Services Hazardous Materials Team;
- Emergency Medical Services (EMS); and
- Traffic mitigation and controls.

CLET Members

CLET members shall:

- Assist and advise on-scene Incident Commander by recommending actions, coordinating resources, and/or providing appropriate documentation related to an on-going incident; and
- Provide assistance by coordinating internal or external agency resources that can be utilized to respond, mitigate, and/or recover from an incident in accordance with Incident Command System (ICS) protocols.

The Site Safety Officer shall coordinate and work with Department and CLET members from other agencies to respond to mitigate and recover Clandestine Drug Laboratory scenes in accordance with CLET Standard Operating Procedure (SOP).

Evidence Considerations

The collection of evidence, contraband and materials shall be coordinated by CLET members in consultation with chemists (either state or federal).

The Department member or local officer who is the case officer shall ensure evidence preservation and custody.

Subject: Clandestine Drug Laboratory Response	Number: SOC-10

After Action Reporting

Following the completion of any critical incident, CLET members shall conduct a debriefing.

The CLET Leader, the Site Safety Officer, or designee, is responsible for the completion of any after action reports or CLET reporting as applicable. After Action Reports shall be forwarded to the Division of Investigative Services Commander or designee for review.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

2122

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**SUP-01**
Subject:	
Jurisdiction/Mutual Aid	

Policy

The Department shall ensure that its members are informed of the limits of their police authority and shall work in cooperation with other law enforcement agencies.

Jurisdiction

The Department has sole and/or concurrent jurisdiction within the territorial boundaries of the Commonwealth.

Limits on Jurisdiction

No member may be used or called upon for service at any industrial dispute unless actual violence has occurred therein, and then only by written order of the Governor.

Members shall not exercise police powers on a reservation or other property of the United States of America unless requested by the person in charge of the reservation or property.

Members have no police powers in any Massachusetts Correctional Institution (MCI) facility, except by direction of the principal officer.

New England State Police Administrators Compact

The Commonwealth of Massachusetts has entered into a mutual aid agreement with State Police agencies in adjoining states. The agreement, known as the New England State Police Administrators Compact (NESPAC), provides for:

- Cooperation and assistance in detecting and apprehending those engaged in criminal activity;
- Establishing and maintaining an information sharing system to be accessed by participatory agencies;
- Mutual aid and assistance in the event of police emergencies; and
- The granting of powers, duties, rights, privileges, and immunities of police personnel when rendering such aid.

Subject:	Number:
Jurisdiction/Mutual Aid	**SUP-01**

Requests for Mutual Aid

When approved by the Colonel/Superintendent, Department personnel or other resources may be provided at no cost to other law enforcement agencies.

When any other law enforcement agency requests mutual aid from the Department, the initial request should contain:

- Nature and duration of the request;
- Contact information for requesting department's officer-in-charge (OIC); and
- Expenditures, if any, which shall be borne by the requesting agency.

The Troop/Section/Unit Commander or designee shall be responsible for determining which personnel shall be dispatched to the incident while maintaining adequate Department services within their command.

Requests by the Department

In the event of an unusual, natural, or man-made emergency situation, the Colonel/Superintendent shall request authorization from the Executive Office of Public Safety and Security:

- To seek assistance from any appropriate state/federal agency;
- To seek assistance from the Massachusetts National Guard; and
- To grant personnel from outside the Department powers as a State Police Officer.

State of Emergency

Upon declaration of a "State of Emergency" by the Governor, all members (excluding personnel on suspension, injury, or other approved leaves) shall immediately contact their duty assignment supervisor, or other supervising officer within their chain-of-command, for specific instructions.

After Action Reporting

The Commanding Officer/OIC rendering assistance shall make a complete and accurate accounting which shall include, at a minimum:

- Number/names of members assigned, and time expended;
- Specific action taken; and
- Equipment utilized.

Subject:	Number:
Jurisdiction/Mutual Aid	**SUP-01**

After Action Reporting, continued

The Colonel/Superintendent may require a Division Commander or a Troop Commander to complete an After Action Report on significant incidents to determine if:

- Established Rules & Regulations, Policies & Procedures, orders and directives were followed;
- Available resources (personnel, equipment, etc.) were utilized in the most effective and efficient manner possible;
- Whether there is any deficiency or inadequacy in training, supervision, or policy which needs correction, enhancement, or adoption; and
- Conclusion(s), opinion(s), and recommendation(s).

2125

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**SUP-03**
Subject:	
Media Relations	

Policy

The Department shall provide the media and the public with information on Department operations and administration while ensuring that individual rights are protected.

On-scene supervisor(s) of incidents with a large scale media presence shall establish a media staging area to facilitate effective communication through Media Relations who shall be the primary point of contact and dissemination of information between the Department and media organizations.

Employees assigned to Media Relations shall receive proper training of the basic guidelines, skills and knowledge needed to capably perform the duties of a Law Enforcement Public Information Officer.

Dissemination of Information

Employees shall treat official business of the Department as confidential. Information shall only be disseminated according to established procedures. Employees shall not:

- Disseminate information in violation of Rules and Regulations*;* or
- Disseminate information prohibited by this policy; or
- Disseminate information prohibited by federal or state law, or a court order.

Driver's Privacy Act

The release of information obtained through any state motor vehicle database shall not be released to non-law enforcement personnel.

Significant News or Events

The Office of the Colonel/Superintendent or Media Relations shall be the authorized source for the dissemination of all press releases.

When a member is involved in an incident or significant event that may be considered of interest to the public, the member or the Desk Officer shall contact Media Relations to provide the necessary information.

Examples of such incidents or events may include, but are not necessarily limited to:

- A significant arrest or investigation;
- Search or rescue;
- Motor vehicle crash with fatal or life-threatening injuries;
- Large scale Department law enforcement operations, or

- Incidents involving the Department and other public service agencies involved in a mutual effort.

Any inquiries from the media about such types of incidents shall be referred to Media Relations.

Media Relations

Troop/Section/Unit Commanders shall assist Media Relations with:

- Coordinating news conferences;
- Preparing and conducting news releases in the absence of a Media Relations member; and
- Positive news stories involving the Department.

Information for Dissemination

Information generally appropriate for members to disclose to the media and the public includes:

- Typical crash information:
  - Names of the occupants involved, if over eighteen (18) years of age;
  - Cause of crash if known; and
  - Degree of injuries- minor, serious, or no injuries occurred. Note: Do not give out specific injuries of any occupant due to privacy rights.
- Road and weather information;
- Information from the public log (except for prohibited information as outlined within this policy);
- The time and place of arrest;
- An arrested adult's name, age, town, charges and bail status; and
- The name and rank of the investigating and arresting members (except for undercover officers), assisting agencies and the length of the investigation.

Division/Troop/Section Commanders shall:

- Approve, coordinate and/or release information concerning confidential investigations, operations, and emergency/crisis situations to Media Relations.

It is preferred that the Office of the Attorney General (AGO), District Attorney (DA) Offices, the Office of the State Fire Marshal (OSFM), or other outside agencies generate news releases regarding a crime or arrest of concern to that specific office, in coordination with Media Relations, when members of the Department are involved.

Members assigned to the AGO, DA, OSFM, or other agencies shall:

- Not become unilaterally involved in media relations efforts unless approved by the Office of the Colonel/Superintendent or Media Relations.

If the AGO, DA, OSFM, or other agencies choose not to make a news release, Media Relations may do so when authorized by the Office of the Superintendent.

Media Interviews

Media interviews shall be conducted by the highest ranking or most experienced member on-duty in the order of:

- Media Relations;
- Troop/Section/Unit Commander;
- Troop/Section/Unit Duty Officer; or
- A Supervisor, with training or experience in giving interviews.

Note: Troopers shall not be compelled to do television or radio interviews against their wishes.

After consultation with Media Relations personnel, members may give limited interviews:

- To accredited news personnel at the scene of a vehicle crash or criminal incident, if there is no interference to the ongoing investigation; or
- Concerning information regarding road and weather conditions.

Members shall wear the uniform of the day, including the appropriate cover. Members working in a plain clothes assignment shall be appropriately dressed.

All other interviews shall be approved/coordinated through Media Relations.

Prohibited Information For Release

Employees **shall not** release or give out information on:

- The prior criminal records or driver's history of a person, or the existence or nonexistence of a prior criminal record except:
  - To other federal, state, or municipal law enforcement agencies as authorized by the Criminal Offender Record Information (CORI) laws; or
  - To warn the public of imminent danger from such a person; or
  - In connection with serious or violent offenses, to expedite the location and apprehension of such a person.
- The identity of a deceased victim before confirmation has been received that the next of kin has been notified according to ADM-13 Notification of Medical Examiner and/or Next of Kin;
- Information related to victims of domestic abuse in accordance with SOC-07A Domestic Abuse Arrest/Investigations;
- The name or address of a juvenile (refer to INV-05 Juvenile Operations for definition) who is a suspect, defendant, complainant, or victim;
- The name or biographical information of the victim of a sexual crime;
- The name or photograph of an undercover officer;
- The existence or contents of any confession, admission, or statement given by a suspect, however, it may be stated that the defendant denies the charges. Note: This does not apply to statements made by the defendant to representatives of the news media or general public;

- Opinions about the guilt, innocence, character, or reputation of a suspect;

Prohibited Information For Release, continued

- Statements predicting or influencing the outcome of the trial;
- The results, refusal, or failure to submit to any examinations or tests;
- Statements or opinions concerning the credibility or testimony of prospective witnesses;
- Information that may adversely affect an investigation or prosecution of a case;
- Information about ongoing litigation;
- Any medical information;
- Causes of death until officially determined by the Medical Examiner;
- Disabled individuals per MGL c.41 §98F; or
- Other information as outlined in the Rules and Regulations.

Photographs

The news media may photograph a person in custody. However, members shall not:

- Pose prisoners for news photographs;
- Allow prisoners to be photographed in Department facilities; or
- Allow prisoners to be photographed in other facilities against the wishes of the owner.

Members should not interfere with photographing or televising of a defendant in a public area, unless such activities:

- Interferes with their official duties; or
- Violate a court order.

Media Relations shall be contacted:

- Before the release of any photograph of Department employees; and
- Before the release of any photograph of a suspect or defendant.
  Note: Members shall be mindful that booking photos may be considered part of a subject's CORI record and the release of these photos must be approved by MSP Legal.

The release of photographs of Department undercover officers shall only be approved by the Colonel/Superintendent or the Deputy Superintendent.

Access to Crime And Crash Scenes

Representatives of the news media shall not be permitted to interfere with investigations or the efficient flow of traffic. However, news media representatives may be:

- Granted access to crime or emergency scenes; and
- Allowed to locate their vehicles and equipment at points nearer to a scene than permitted by normal traffic.

Subject: Media Relations	Number: SUP-03

Access to Crime And Crash Scenes, continued

Permission for media access to a scene occurring in a private dwelling or other area generally not open to the public shall:

- Be obtained from lawful authority over the premises including government entities, such as the Turnpike or Port Authority; and
- Be controlled by a supervisor in command of the scene ensuring the particular needs of the investigation take precedence.

Note: Most accredited news reporters and photographers have identification cards that are issued by their respective employer.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**SUP-04**
Subject:	
Employee Assistance Unit	

Policy

The Department has a responsibility to ensure the safety of our employees and to contribute to their psychological and physical well-being. The Department shall offer to its employees and their families, professional assistance, training, peer counselling, and professional referrals as needed and requested. These same services are available to other state, county, and local law enforcement agencies and their families.

Availability

The Employee Assistance Unit (EAU) is available (24) hours a day by calling (978) 975-0794 or the GHQ Communications Section at (508) 820-2121. The EAU is available to:

- All Department employees and family members; and
- State, County, and Local law enforcement agencies and their families.

Members of the EAU are available:

- To meet employees, members of other agencies, and their families who request assistance at a mutually acceptable time and location;
- To provide telephone support to those listed above;
- To provide training to recruit training classes;
- To provide specialized training upon request; and
- To oversee training and credentialing of, and coordinate responses by, MSP Peers for Critical Incident Stress Management (CISM) responses.

Responsibility

Employee Assistance Unit members shall:

- Not represent themselves to any third party as the Department's agent for purposes of adjudication, placement or disposition; and
- Not be held responsible for decisions made by any employee receiving EAU services that prove to be in violation of Department rules, regulations, policies, or procedures.

In no event shall a member's involvement with the Employee Assistance Program abrogate their responsibility to conform or comply with rules, regulations, policies and procedures.

Accordingly, and in furtherance of EAU's commitment to recovery and good health, EAU members shall:

- Remind anyone receiving such services that compliance with rules, regulations, policies, and procedures must remain a primary factor in all personal decisions.

Subject: Employee Assistance Unit	Number: SUP-04

Confidentiality

It is critical for the success of the Employee Assistance program that confidentiality of case information be maintained. The members assigned to the EAU shall ensure that information obtained from an employee, member of another agency, or their families remains confidential, **unless failure to disclose such information could cause a clear and present danger to the safety or security of an individual, the public, or the Department**.

Members of the EAU, as part of the Massachusetts State Peer Support Network and working within the umbrella of the MSP EAU, operate with privileged communication under MGL. c. 233, § 20O.

Reports

Written and oral reports shall contain only that information that is pertinent to an ongoing evaluation.

Every effort shall be made to avoid any undue invasion of privacy.

Procedure

Supervisors should remain alert for signs of unhealthy stress in their employees, particularly when involved in a highly traumatic incident. Reactions to stress may appear immediately after an incident; however, they may not appear for hours, days, or even weeks later.

Supervisors should notify the EAU as soon as possible, but no later than eighteen (18) hours following occurrences of:

- Critical incidents that may evoke extraordinary emotion;
- On or off duty death, serious injury, or serious illness of an employee or family member;
- Unusual death or violence to a child, or a victim known by an employee;
- Use of force incidents involving death or serious injury;
- Fatal accidents involving Department vehicles, or pursuits;
- A prolonged rescue situation that ends in failure;
- When an employee's work performance appears to be affected by stress; or
- Any time a supervisor believes that the employee may benefit from EAU assistance

In any highly traumatic incident where an employee is affected, or is likely to be affected, supervisors should:

- Assign a support employee, preferably a friend, to the employee for close contact;
- When possible, assign the employee to a role within the incident where there is a decreased risk of unnecessarily traumatizing the employee;
- Isolate and remove the employee from the scene of the incident, if needed and operationally possible;

Subject: Employee Assistance Unit	Number: SUP-04

Procedure, continued

- Ensure against unnecessary repetition of statements and accounts of the incident by the affected employee;
- Assist the employee in preparing the official report; and
- Monitor the employee's condition closely over the following weeks and months for signs of unhealthy stress.

Employees may be referred to the EAU when they may not be aware of the adverse impact of an event on them, or suppress the need for emotional/psychological care.

Administrative Leave/ Temporary Modified Duty

Any employee directly involved in a high-risk situation that may adversely affect personal or professional conduct may be placed on Administrative Leave or Administrative Duty by the Colonel/Superintendent. EAU should be notified when a sworn member is to be relieved of duty and when practicable, accompany the member's supervisor who is affecting relief. This reassignment shall be clearly noted to the employee as not being punitive in any way.

The EAU may recommend members for placement on Temporary Modified Duty as approved by the Colonel/Superintendent. This is a management action used to deal with stress for the individual and the organization, and allows the member to refocus and cope with the situation in a healthy and positive manner.

Commanding Officers shall consult with the EAU prior to the employee resuming regular duties.

Department of State Police
General Order

Effective Date:	Number:
February 17, 2023	**SUP-04A**

Subject:

Critical Incident Stress Management Team

Policy

The CISM Team is managed by the Employee Assistance Unit. Members of the Critical Incident Stress Management Team will be volunteers who are and remain in good standing with the Department.

The Department will determine the number of personnel assigned to the CISM Team. As needed, the Department will publish an open announcement requesting interested candidates apply to become a member of the CISM Team. Selections to the Team will be at the discretion of the Department.

CISM Team member activity shall be monitored and approved by the Employee Assistance Unit (EAU) Commander and/or designee. When services are requested and approved, CISM Team members shall assist members from other local, state, and federal first responder agencies.

The EAU Commander or designee shall utilize a CISM Team and provide direction to that team in a manner consistent with the International Critical Incident Stress Foundation (ICISF) guidelines.

The CISM Team shall maintain membership with the Massachusetts State Peer Support Network (MSPSN).

CISM Team members agree to resign from the Team at the request of the EAU Unit Commander

Purpose

To establish and define the role of the Critical Incident Stress Management (CISM) Team within the Department and establish guidelines for activation and utilization of its resources.

To lessen the impact of a critical incident and enhance the coping abilities of involved members through emotional and tangible support, with the goal of maintaining employee wellness and operational readiness.

Definitions

Critical Incident: For purposes of this General Order, a critical incident is defined as an event resulting in psychological stress or trauma to an emergency service provider because of an emergency service provider's response to an incident. A critical incident is further defined as an incident that necessitates an EAU response and a member is in need of peer support (e.g., serious motor vehicle crash, a serious injury or fatality involving a civilian, death or serious injury of a member, officer involved shooting, severe trauma or death of a child, and mass casualty event).

Critical Incident Stress Management Team members: Department sworn members and non-sworn members from all ranks and Divisions shall be trained and certified in CISM under the ICISF guidelines and consistent with MSPSN requirements. MSP CISM Team members are not counselors or therapists but serve as a peer support network. MSP CISM Team members work as CISM members secondary to their primary assignment within the Department.

Utilization of Resources

Any Department employee shall have the right to access CISM services and request CISM support from a Team member with whom they are comfortable. In such case, CISM Team member shall notify EAU Commander or designee of such request and services rendered.

Operational Protocols

CISM Team members shall:

- Be a "Certified Emergency Service Provider" as defined by M.G.L. Ch. 329 Of the Acts of 2018: "*An Act Relative to Critical Incident Intervention by Emergency Service Providers."*
- Respond to a critical incident or provide peer support when authorized by the EAU Commander or designee.
- Not self-deploy to an incident, however, if the CISM Team member is already on scene or becomes involved and identifies a need to provide services, they shall provide the necessary services and notify the EAU Commander or designee as soon as practicable.
- Be appropriately dressed to be on scene and equipped with proper issued protective gear.
- Respond to a designated staging area and report to CISM Team Commander or their designee.
- Recognize and refer to the EAU, cases that are beyond their scope of training.

Confidentiality

All interactions by MSP CISM Team members with Department personnel during any type of intervention shall be kept strictly confidential.

Department of State Police
General Orders

Effective Date:	Number:
May 25, 2023	**SUP-05**

Subject:

State Police Chaplain Corps

Policy

The State Police Chaplain Corps:

- Is a voluntary support service;
- May assist, but is not intended to replace or impede, the efforts of the Department's Employee Assistance Unit (EAU) and/or the Office of the Ombudsman; and
- Shall provide non-denominational spiritual support and counseling as sought, regardless of gender, gender identity, sexual orientation, race, ethnicity, religious preference, affiliation, or beliefs.

All members of the State Police Chaplain Corps shall take and affirm an Oath of Office prior to the initial performance of duties.

Purpose

To establish guidelines for the responsibilities, organization, and qualifications of chaplains assigned to the Massachusetts State Police Chaplain Corps.

Oath of Office

I solemnly promise that I will faithfully and diligently perform the duties of Police Chaplain for the Department of the Massachusetts State Police, and that I will provide ministry to the officers of the department and to the citizens of the community as I am called upon.

I will strive to set an exemplary standard of ethical and moral conduct and not use my position of Police Chaplain to proselytize or to gain personal advantage and will minister to all persons without religious or other bias.

I will acknowledge those appointed in a position of authority within the department and will serve them with loyalty, and will be supportive of the officers with whom I serve and will be subject to their authority when on duty and will accept the responsibility willingly and without reservation, so help me God.

Requests for Service

The Office of Superintendent shall:

- Coordinate requests for services of the State Police Chaplain Corps with the Director of the State Police Chaplain Corps.

Administrative and Programmatic Oversight

Administrative oversight shall:

- Be conducted by a Commissioned Officer assigned to the Office of the Superintendent.

Programmatic oversight shall:

- Be conducted by the Commanding Officer of the EAU or designee.

Availability

The State Police Chaplain Corps provides services that are available twenty-four (24) hours a day for Department employees when seeking guidance and comfort or at times of illness, injury, or death.

The Department Chaplains may be contacted through the:

- Communications Center at 508-820-2121;
- Department Telephone Directory;
- The EAU; or
- The Ombudsman.

State Police Chaplains shall respond to a critical incident or crime scene when:

- Officially notified by the Department; and
- Render services to only those employees requesting such service.

Upon arriving at a scene, State Police Chaplains shall:

- Immediately identify themselves as a State Police Chaplain, and display the issued Department Identification Card to Officer-In-Charge (OIC) or designee;
- Only enter an active scene when prior approval has been granted from the OIC or designee; and
- As soon as practicable, notify the Commanding Officer of EAU or designee as to such response.

Subject: State Police Chaplain Corps	Number: SUP-05

Responsibilities

State Police Chaplains shall be available to provide support and guidance to Department employees. Their duties shall include, but not be limited to:

- Visits to injured or hospitalized personnel;
- Participation at funeral services;
- Provision of counseling at the request of an employee;
- Assistance in making serious injury or death notifications upon request of the Department;
- Maintenance of strict confidentiality of all Department matters;
- Provision of follow-up assistance to employees of the Department at times of crisis; and
- Participation in Department functions as requested, (i.e. promotional ceremonies, award ceremonies, etc.).

Designation

The Colonel/Superintendent may designate individuals as State Police Chaplains and shall determine the appropriate number of chaplains.

State Police Chaplains shall serve at the discretion of the Colonel/Superintendent on a voluntary basis and shall not receive compensation.

The Colonel/Superintendent shall designate a Chaplain as Director of the Chaplain Corps to oversee the duties and responsibilities of assigned State Police Chaplains and the program.

Qualifications

Qualifications for State Police Chaplains are:

- Affiliation with a recognized, organized religion;
- Demonstration of sufficient experience in community pastoral and parish work;
- Possession of a Bachelor of Arts and Masters of Divinity degree from an accredited college or seminary;
- Possession of a valid Massachusetts Driver's License and access to a properly registered and insured motor vehicle;
- Successful completion of a background investigation (no individual with a past criminal conviction for any offense shall be designated a Department Chaplain); and
- Attend training(s) as required by the Commanding Officer of EAU.

Director of the Chaplain Corps

The Director of the State Police Chaplain Corps shall:

- Coordinate and monitor the activities of the Chaplain Corps; and
- Conduct bi-annual meetings to share information, discuss goals and objectives, and other issues of interest.

Binding Written Agreements	

Policy

All Memorandum of Understandings, Mutual Aid Agreements, or any other type of binding written agreements (collectively referred to as "MOUs") between the Department and outside organizations, including any state or federal agency, shall only be authorized and signed by the Colonel/Superintendent.

MOU Process

Position	Responsibilities
Troop/Section/Unit Commander	• Carefully review the MOU; and • If approved, forward to their Division Commander.
Division Commander	• Review the forwarded MOU; • Either approve the MOU or recommend changes to the language or terms; • Forward the approved MOU to the Chief Administrative Officer; and • Be responsible for the MOU oversight and renewal.
Chief Administrative Officer	• Review the forwarded MOU; • If need be, return the MOU and supporting documentation to the Division Commander with any recommendations; • Forward a copy of any MOU that pertains to a grant program to the Fiscal Grants Manager and the Strategic Planning Section; and • Forward the approved MOU to the Chief Legal Counsel.

MOU Process, continued

Position	Responsibilities
Chief Legal Counsel	• Review the forwarded MOU; • Submit the reviewed MOU with any recommendations to the Colonel/ Superintendent; • If approved by the Colonel/ Superintendent forward the MOU to the outside agency for signature; • Return a copy of the approved and signed MOU package to the Division Commander and Chief Administrative Officer; and • Retain all signed original MOU documentation for archives.
Colonel/ Superintendent	• Approve all MOUs involving the Department; and • Return signed MOUs to the Chief Legal Counsel.

Written Agreement Sign-Off Sheet

The SP 480 Written Agreement Sign-Off Sheet shall be:

- Attached to all MOU's;
- Submitted through channels; and
- Signed off by all appropriate employees prior to signature by the Colonel/Superintendent.

Property Inventory

Commanding Officers shall ensure that any property acquired as the result of an MOU shall be inventoried and treated in accordance with ADM-30 Asset Management.

Control and Authority

All MOUs for Department law enforcement services shall clearly identify the nature and extent of services to be provided and shall stipulate that the Colonel/Superintendent maintains control and authority over all Department personnel including, but not limited to:

- Hiring;
- Discipline;
- Transfers;
- Promotions;
- Assignments;
- Training; and
- Dismissal.

Subject:	Number:
Binding Written Agreements	**SUP-06**

Services Provided	All MOUs shall include provisions for services provided, but not limited to: • Training; • Equipment; • Facilities; • Functions and activities to be performed; and • Duties and responsibilities.
Financing and Budget	Fiscal accounting shall be clearly articulated to avoid confusion and misunderstandings and shall include, but not be limited to the following: • Salaries, indirect costs, and fringe benefits; • Training and equipment costs; • Maintenance of cost accounting records; • Issuance of fiscal reports; • Time and manner of payment for services; and • Procedures for the disposition of revenues generated by Department law enforcement activity.
Records	MOUs shall specify the types of records required, the frequency of reporting, and the means for maintaining them.
Duration	All MOUs shall include: • Effective beginning and termination dates or conditions; • Procedures for modification or amendment; and • Procedures for termination, if necessary.
Employee Rights	Participation in any MOU shall not penalize the rights of any Department employee.

General Order

Effective Date:	Number:
July 22, 2022	**SUP-12**
Subject:	
Office of the Ombudsman	

Policy

The Ombudsman Program provides a confidential, neutral, and informal process to help resolve work-related issues. It is a dispute resolution system that offers employees formal and informal options for addressing work-related problems and concerns. Although the program is an alternative channel of communication, it is designed to complement, not replace or circumvent the Department's formal resolution options.

Definitions

Confidential Communications: Communications, or a source of communication, which are intended to be held in secret.

Privileged Communications: Communications that occur in a context of legal or other recognized professional confidentiality.

Office of the Ombudsman

The Office of the Ombudsman reports to the Colonel/Superintendent. The primary role of an Ombudsman is to act as a designated neutral in order to facilitate fair and equitable resolutions regarding work-related problems and concerns.

An Ombudsman shall:

- Attempt to provide informal conciliation, when appropriate;
- Not use the names of individuals without their permission;
- Exercise discretion on whether to act upon a concern of an employee;
- Maintain objectivity and impartiality; and
- Keep professionally current and competent in areas that relate to the role of an Ombudsman and the practices of the Department.

The Ombudsman shall attempt to identify options within the Department to resolve issues brought forth. This includes creating innovative solutions, when possible, or referring individuals to other available Department processes.

Availability

An employee may contact an Ombudsman and leave a confidential voice message at 508-988-7025.

Subject: Office of the Ombudsman	Number: SUP-12

Responsibility

An Ombudsman shall:

- Not represent themselves to any third party as the Department's agent for purposes of adjudication, placement or disposition; and
- Not be held responsible for decisions made by any employee receiving Ombudsman services that prove to be in violation of Department rules, regulations, policies, or procedures.

In no event shall a member's involvement with an Ombudsman abrogate their responsibility to conform or comply with rules, regulations, policies and procedures.

Accordingly, and in furtherance of an Ombudsman commitment to recovery and good health, Ombudsman shall:

- Remind anyone receiving such services that compliance with rules, regulations, policies, and procedures must remain a primary factor in all personal decisions.

Confidentiality

Communications with the Office of the Ombudsman are considered privileged. That privilege cannot be waived, **unless failure to disclose information that was obtained from an employee could cause a clear and present danger to the safety or security of any individual, the public, or the Department.**

Complaints and Department Investigations

The Ombudsman has the responsibility to consider the concerns and rights to privacy of all parties potentially involved in a dispute. The Ombudsman does not take action on calls, letters, or other communications that are anonymous.
However, the Department shall be notified of any alleged criminal conduct committed by an employee.

No acts of reprisal or retaliation shall be tolerated against any employee of the Department as a result of contact with the Office of the Ombudsman.

Records

The Office of the Ombudsman does not keep case records for the Department and maintains only those notes necessary to manage an ongoing case. The Office of the Ombudsman adheres to the Standards of Practice and the Code of Ethics of The International Ombudsman Association (IOA).

To protect the principle of privileged communications, the Department shall vigorously resist any effort to compel testimony or obtain notes or other records from an Ombudsman. To ensure maximum legal protection, the Ombudsman shall immediately contact the Legal Section upon knowledge or receipt of any document indicating efforts to compel testimony or obtain documentation.

Subject: Office of the Ombudsman	Number: SUP-12

Records, continued

The Office of the Ombudsman shall:

- Prepare a quarterly and annual statistical report for the Office of the Superintendent; and
- Protect the confidentiality and anonymity of the involved parties within submitted reports.

Supervisors

Supervisors shall:

- Ensure that employees under their supervision are aware of the Office of Ombudsman's confidential services in assisting with work-related problems;
- Provide support and commitment to the role and function of the Department's Ombudsman; and
- Be accessible to the Ombudsman to help in the resolution of work-related problems, as necessary.

Employees

Contacts with the Office of the Ombudsman need not be reported to a supervisor, as the program is accessible outside of the chain of command. An employee may contact the Office of the Ombudsman when seeking:

- Accurate information about Department policies, procedures, practices, or other issues;
- Informal advice on matters that they prefer to discuss without being "on the record"; and
- Assistance with work-related problems.

An employee who seeks the assistance of an Ombudsman may withdraw from the process at any time.

Contacts with an Ombudsman are voluntary and shall not jeopardize the employee's job security or promotional opportunities.

Special Operations Command and Control

Purpose

To define the command and control of Special Operations and to provide guidance to Department members who are involved in any incident that involves (or may involve) the utilization of any Special Operations resource.

Policy

Special Operations may be comprised of the following Sections/Units/Teams:

- Special Tactical Operations Team;
- Crisis Negotiations Team;
- Mounted Unit;
- Canine Unit;
- Underwater Recovery Team;
- Special Emergency Response Team;
- Motorcycle Unit;
- Commercial Vehicle Enforcement Section;
- Collision Analysis and Reconstruction Section;
- Traffic Programs Section; and
- Motor Vehicle Regulatory Section.

The Colonel/Superintendent reserves the right to modify the Special Operations' Sections/Units/Teams.

For the purpose of command and control, members of Special Operations Sections/Units/Teams shall be accountable to one chain of command while performing Special Operations functions or assignments.

All Department personnel must be cognizant of the fact that tactical operations are inherently hazardous and require specific understanding of the risks, risk management, and the various capabilities and limitations of Department resources. Special Operations Section/Unit/Team Commanders and their members are specially trained and equipped to meet specific standards applicable to their assigned positions within the various disciplines.

Continued on next page

Activation Protocol and Response Procedures

Any emergency request for Special Operations resources shall include:

- The requesting agency's name;
- The requesting party's name and rank;
- The name and direct call-back number of the primary point of contact;
- The nature of the request; and
- The exact location of the incident and any designated staging areas.

Position	Responsibilities
Responding Member(s)	• Assess the situation, taking any actions necessary to eliminate immediate danger to others; • Contain and isolate the suspect(s) in the immediate area; • Advise the Desk Officer and request resources as necessary; • Gather and report as much tactical information as possible; and • If applicable, assume command and control until relieved by proper authority.
Station Desk Officer	• Advise Troop Duty Officer of request; and • Log entries into Daily Administrative Journal.
Patrol Supervisor	• Establish and secure perimeter as soon as possible; • Order evacuations, if necessary; • Establish liaison with local agency at scene; and • Ensure that only a single chain of command has control of the inner perimeter or scene.
Patrol Supervisor	**Additionally for significant events**: • Coordinate activities with outside jurisdictions (federal, state, municipal); • Establish a Command Post away from bystanders and the news media; • Assign a member as the media liaison until members from the Media Relations Section arrive; • Communicate accurate and current information on a regular basis to Troop Duty Officer; and • Upon conclusion of the incident, preserve the crime scene.

Continued on next page

Activation Protocol and Response Procedures, continued

Position	Responsibilities
Troop Duty Officer	• Notify GHQ Communications Section; • Dispatch Patrol Supervisor if necessary; • Log request in Daily Administrative Journal; • Notify Troop Commander. • Notify appropriate Special Operations Section/Unit/Team Commander or designee of the request; and • Activate/notify Special Operations Section/Unit/Team members and others as requested by Section/Unit/Team Commander or designee.
Special Operations Section/Unit/Team Commander or designee	• Contact initial requesting party to determine appropriate response; and • Brief the Special Operations Commander /designee to obtain operational approval.
Special Operations Commander/ designee	• Approve/deny activations/deployments; and • Contact Division of Field Services Commander.
Division of Field Services Commander	• Notify the Office of the Superintendent when appropriate; and • Activate other resources as needed.

Risk Management

Special Operations missions involve the likelihood of encountering potentially life-threatening hazards. All Special Operations Section/Unit/Team members shall exercise the best possible operational risk management strategies to:

1. Identify and assess hazards;
2. Develop controls to reduce hazards or risks; and
3. Use strategies to mitigate risk exposure and to safeguard the public and public safety personnel.

Removal from Assignment

Any member assigned to a non-biddable position with a Special Operations Section/Unit/Team may be removed at the discretion of the Colonel/Superintendent or designee.

Public Relations Requests

Requests for Special Operation resources for ceremonial, static or operational demonstrations, public relations displays, or other events shall be made in writing and approved by the Commander of the Division of Field Services.

Continued on next page

After Action Reporting

When so directed, Special Operations Section/Unit/Team Commanders are required to submit mission/incident specific After Action Reports to the Special Operations Commander/designee for review.

All After Action Reports shall be in a format approved by the Special Operations Commander.

Subject:	
Special Tactical Operations (STOP) Team	

Policy

The Special Tactical Operations (STOP) Team shall:

- When requested and approved, assist members from the Department, local, state, and federal agencies; and
- Develop, under the direction of the STOP Team Commanding Officer, team specific Standard Operating Procedure (SOP) that shall be created, maintained, and updated as directed by the Special Operations Commander.

Purpose

To establish and define the role of the Special Tactical Operations Team within the Division of Field Services-Special Operations and establish guidelines for activation and utilization of their resources.

Definitions

Incident Command Post: A location where members may safely and effectively manage a scene, ideally equipped with a telephone, parking area, rest room, and effective radio communications for tactical team members.

Inner Perimeter: The immediate area of operations where violence or hostile actions are most likely to occur.

Outer Perimeter: A designated area outside the immediate area of operations which limits access and prevents harm to others.

Utilization of Resources

The STOP Team is available for:

- Emergency or critical incidents that may require a specialized response.

Operational Protocols

The designated Incident Commander (IC) shall:

- Attempt to isolate and contain the incident by establishing the initial inner and outer perimeter; and
- Continually assess the situation in conjunction with the STOP Team Commander or designee to determine the need for additional resources and to adjust tactics as required to resolve the incident.

Subject:	Number:
Special Tactical Operations Team	**TOP-02**

Operational Protocols, continued

Inner Perimeter:

- First responding members in the inner perimeter shall normally be replaced by STOP Team members once they arrive at the scene; and
- The Special Operations Commander or designee and STOP Team Commander or designee shall determine what personnel are required to safely manage the outer perimeter and scene.

Outer Perimeter:

- No Department member on the outer perimeter shall discharge their weapon once the STOP Team has assumed control and authority of the Inner Perimeter unless:
  - Ordered by the STOP Team Commander or designee; or
  - When necessary upon the threat of death or serious bodily harm.

Building Entry:

When the STOP Team has made entry into a building, all other responding Department members shall:

- Not aim, fire, or discharge a firearm into the building; and
- Take a position of cover.

The STOP Team Commander or designee shall:

- Have the primary responsibility to determine the type of equipment (including weapons) used by the STOP Team members.

Command and Control

When engaged in STOP Team operations, missions, and/or training the command and control concerning deployment and operational tactics utilized shall be:

- Determined by the STOP Team Commander or designee; or
- The Special Operations Commander or designee.

Evacuations/ Witnesses

In some instances, it may be necessary to evacuate nearby civilians. Witnesses or those who may provide situational awareness and/or intelligence may be requested to remain at or near the Command Post.

Crisis Negotiation Team	

Policy

The Crisis Negotiation Team shall:

- When requested and approved, assist members from the Department and those from other local, state, and federal agencies; and
- Develop, under the direction of the Team Commanding Officer, team specific Standard Operating Procedure (SOP) that shall be created, maintained and updated as directed by the Special Operations Commander.

Purpose

To establish and define the role of the Crisis Negotiation Team within the Division of Field Services-Special Operations and establish guidelines for activation and utilization of their resources.

Definitions

Incident Command Post: A location where members may safely and effectively manage a scene, ideally equipped with a telephone, parking area, rest room, and effective radio communication for team members.

Negotiator: A specially trained member of the Crisis Negotiation Team who utilizes crisis management techniques in an effort to stabilize extremely dangerous and volatile circumstances.

Utilization of Resources

The Crisis Negotiations Team is available for:

- Crisis, hostage, or barricaded incidents that can potentially be resolved through dialogue; and
- Other special events/incident as assigned by Special Operations Commander or designee.

Operational Protocols

Crisis Negotiations Team shall:

- Utilize a philosophy of containment and negotiation;
- Assume control of the negotiations process once they arrive on-scene;
- Manage any personnel or individuals involved in the negotiations process; and
- Report to and remain operationally accountable to the Incident Commander.

Operational Protocols, continued

Useful information related to the operational area include:

- The layout of the building;
- Size and Number of rooms/spaces;
- Ventilation, food, and water supplies; and
- Observation points, approach, and escape routes.

Useful information related to perpetrator(s) and/or hostage(s) include:

- Names, number, age, gender, size, and physical condition;
- Behavior and emotional state (rational, tolerant, aggressive, ambivalent, etc.);
- Criminal record/weapons access/ownership;
- Purpose of act (terrorist, criminal, mentally disturbed); and
- Any stated plans, demands, or motivation.

Additional Response Guidelines

In addition to the response protocols outlined in TOP-01 Special Operations Command and Control, members shall follow these additional guidelines.

Position	Duties
Responding Member(s)	• Assess the situation, taking no aggressive action unless there is an immediate danger to others; • Contain and isolate the suspect(s) in the immediate area; • Attempt to slow the pace of events, and open and establish communication with suspect(s); and • Gather and report as much tactical information as possible.
Patrol Supervisor	• Request through the Troop Duty Officer the Crisis Negotiation Team; and • Designate a member to research utility shut-offs, if necessary;
Incident Commander	• Work with the Crisis Negotiation Team; • Attempt to maintain as much control as possible over the movements and behavior of the suspect(s); and • Attempt to defuse the situation while affecting the safe release of any hostages.

Subject:	Number:
Crisis Negotiation Team	**TOP-03**

Evacuations/ Witnesses

Purpose

To establish the role of the Mounted Unit within the Division of Field Services-Special Operations and establish guidelines for activation and utilization of their resources.

Utilization of Resources

The Mounted Unit is available for:

- Patrol and law enforcement services;
- Search and rescue;
- Crowd Control; and
- Other special events/incidents as assigned by the Special Operations Commander or designee.

Operational Protocols

The Mounted Unit Commander or designee shall:

- Determine the use of animals and equipment during inclement weather; and
- Consult with the Incident Commander regarding search patterns and/or other Special considerations.

Canine Unit	

Policy

The Canine Unit shall:

- When requested and approved, assist members from the Department and those from other local, state, and federal agencies; and
- Develop, under the direction of the Unit Commanding Officer, a unit specific Standard Operating Procedure (SOP) that shall be created, maintained and updated as directed by the Special Operations Commander in accordance with ADM-07 Written Directives, Schedules and Forms.

Purpose

To establish and define the role of the Canine Unit within the Division of Field Services-Special Operations and establish guidelines for activation and utilization of their resources.

Utilization of Resources

The Canine Unit is available for:

- Conducting building searches for hidden offenders;
- Assisting in the arrest of dangerous or violent offenders;
- Tracking/locating suspect(s), lost and/or missing person(s);
- Locating criminal evidence or hidden instrumentalities;
- Locating cadavers;
- Detecting the presence of concealed narcotics, explosives, or arson related accelerants;
- Crowd control;
- Homeland Security related missions; and
- Other special events/incidents as assigned by the Special Operations Commander or designee.

Subject:	Number:
Canine Unit	**TOP-05**

General Protocols

- Only that amount of force that reasonably appears necessary to apprehend or secure a suspect shall be used. Handlers and their dogs are required to adhere to procedures that properly control their potential use of force and channel their specialized capabilities into legally reasonable crime prevention and control activities;
- Canine handlers are responsible for determining whether a situation justifies canine use and the appropriate special measures that should be taken;
- Employees shall not pet a canine except with the permission of the canine handler;
- No employee is to tease or agitate any canine unless performed as part of a training exercise;
- The canine shall not enter any State Police facility except for a specific police purpose;
- Whenever a canine is used in a special situation, Incident Commanders shall confer with canine handlers and members shall heed the directions of the canine handler;
- Canines shall not be handled by anyone other than their assigned handler, except in emergency situations;
- **No** commands shall be given to a canine by anyone other than the canine handler except in emergency situations; and
- **No** employee shall enter a canine cruiser while a canine is present, except at the direction and in the presence of the canine handler.

Building Search Protocols

Canines may be utilized for locating suspects in buildings or other structures. To optimize building searches, and if possible, the:

- Perimeter should be secured by the requesting patrol personnel;
- Owner should be contacted to ascertain the layout;
- Tenants, workers, or unnecessary personnel should be removed;
- Heating, air-conditioning, or other blowing units should be shut off so as not to interfere with the canine's scent;
- Entrances and exits should be monitored, and communications limited once entry is made by the search team; and
- Canine handler shall ensure notification has been made to all personnel prior to deploying a canine into any building or structure.

Tracking Protocols

Canines may be utilized for tracking. To facilitate tracking:

- Identify and mark the location where the subject was last seen;
- Avoid foot or vehicular movement in the immediate area;
- Set-up an initial perimeter to be searched; and
- Protect all items of clothing that shall be used for scent acquisition purposes.

Drug Detection Protocols

Public Facilities: Random exploratory sniffing of luggage, packages, or other inanimate objects may be conducted in public facilities such as:

- Airports/Transportation terminals (bus, train, marine);
- Commercial vehicle weigh stations; and/or
- Government buildings.

Public Schools: The use of drug detection canines in public schools is permitted only when authorized by the Division of Field Services Commander or designee, and if:

- The school administrator and the local police chief, if applicable, request and approve such use; and
- A search is limited to inanimate objects in public areas and the exterior of student lockers, unless reasonable suspicion exists to gain admission to an area.

Motor Vehicles: Drug sniffing canines may be used to sniff motor vehicles during:

- A commercial vehicle inspection; and/or
- A valid motor vehicle stop when reasonable suspicion exists to believe that the operator or passengers are in possession of illegal narcotics.

Use of Canines During Civil Disturbances

Use of Canines is governed by the Canine Unit SOP's in accordance with 550 CMR 6.08 (4-5), specifically:

- A member may not order the release of a dog to control or influence a person's behavior unless:
    - De-escalation tactics have been attempted and failed or are not feasible based on the totality of the circumstances; and
    - The measures used are necessary to prevent imminent harm and the foreseeable harm inflicted by the release of the canine is proportionate to the harm.
- If a law enforcement officer utilizes or orders the release of a dog against a crowd, the law enforcement officer's appointing agency shall file a report with the POST Commission detailing all of the measures that were taken in advance of the event to reduce the probability of disorder and all de-escalation tactics and other measures that were taken at the time of the event to de-escalate tensions and avoid the necessity of using said weapons, including a detailed justification of why use of said weapons was objectively reasonable.
- Canines should not be utilized for crowd control, restraint, or management of peaceful demonstrations, but may be deployed for crowd control, restraint, or management of peaceful demonstrations in isolated circumstances related to bomb detection, pursuit of suspects in buildings, and related situations. Utilization does not include circumstances in which the canine remains on a short lead in

close proximity to the handler and is well behind the line of contact between law enforcement and civilian personnel.

Canine Bites and Injuries

In the event that a Department canine bites or injures any party, the canine handler shall contact the Troop Duty Officer, who shall immediately dispatch a supervisor and Crime Scene Services to the scene to conduct an investigation in accordance with UOF-03 Use of Force Reporting and take color photographs.

The supervisor shall forward appropriate information including the SP 376 Use of Force Report to the Division of Field Services Commander and Canine Unit Commander prior to end of their shift.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TOP-06**
Subject:	
Underwater Recovery Team	

Policy

The Underwater Recovery Team (URT) shall:

- When requested and approved, assist members from the Department and those from other local, state, and federal agencies; and
- Develop, under the direction of the URT Commander, a team specific Standard Operating Procedure (SOP) that shall be created, maintained and updated as directed by the Marine Unit or Planning, Preparedness, and Response Section Commanders in accordance with ADM-07 Written Directives, Schedules and Forms.

Purpose

To define the role of the URT within the Division of Homeland Security and Preparedness and establish guidelines for activation and utilization of their resources.

Utilization of Resources

The URT is available for:

- Underwater sweeps for hazardous or improvised explosive devices;
- Active search and rescue;
- Water-safety and survival instruction;
- Evidence location and recovery;
- Body location and extrication;
- Vehicle/vessel location and recovery;
- Underwater survey for security purposes;
- Underwater obstruction identification and removal;
- Homeland Security related missions; and
- Other special events/incidents as assigned by the Division of Homeland Security and Preparedness Commander or designee.

Operational Protocols

Because of the inherent risks involved in diving operations:

- Under most circumstances, no dive shall be undertaken until a diving supervisor and at least two (2) divers are present and prepared to dive;
- The URT Commander or designee at the scene shall make the final determination as to whether a mission shall be undertaken or terminated due to factors including safety, weather, currents, and sea state. The URT Commander or designee shall confer with the Marine Unit Boat Captain when conducting URT operations from vessels; and
- The URT Commander or designee shall be authorized to grant home based post mission gear decontamination and preventative maintenance.

Witnesses

In some instances, it may be necessary to evacuate nearby civilians. Witnesses or those who may provide situational awareness and/or intelligence may be requested to remain at or near the Command Post.

Command and Control

When engaged in URT operations, missions, and/or trainings, the command and control concerning deployment and operational tactics utilized shall be determined by the:

- URT Commander or designee

Activation Procedures

The URT is available for activation 24 hours a day.

For Emergency activations of the URT, contact the following:

- The Troop Duty Office of jurisdiction;
- GHQ Communications Section at 508-820-2121; or
- The Marine Unit (0700-2300) at 617-740-7820.

General Order

Effective Date:	Number:
May 25, 2023	**TOP-07**
Subject:	
Air Wing	

Policy

The Air Wing shall:

- When requested and approved, assist members from the Department and those from other local, state, and federal agencies; and
- Develop, under the direction of the Air Wing Commanding Officer, a unit specific Standard Operating Procedure (SOP) that shall be created, maintained and updated as directed by the Planning, Preparedness, and Response Section Commander in accordance with ADM-07 Written Directives, Schedules and Forms.

Purpose

To define the role of the Air Wing within the Division of Homeland Security and Preparedness and establish guidelines for activation and utilization of their resources.

Utilization of Resources

The Air Wing is available for:

- Search and rescue for lost, missing, or endangered persons;
- Photographic and video missions, documentation and video downlink;
- Motor vehicle enforcement and patrol;
- Incident command situations;
- Drug eradication efforts, including surveillance;
- Transportation of specialized equipment and personnel;
- Transportation of government officials;
- Criminal investigations;
- Dignitary protection;
- Fire services support;
- Homeland security related missions; and
- Other special events/incidents as assigned by the Division of Homeland Security and Preparedness Commander or designee.

Subject:	Number:
Air Wing	**TOP-07**

Operational Protocols

The Colonel/Superintendent, or designee, shall authorize all requests for out-of-state travel in department aircraft.

In accordance with Federal Aviation Regulations, the Air Wing Commander or flight crew members may decline, cancel, or terminate any request or mission due to factors including:

- Safety, weather, distance;
- Type of request beyond aircraft or members capability;
- Availability;
- Mechanical maintenance of the aircraft; or
- Determination that use of aircraft is not the appropriate resource after operational risk management assessment is completed.

This policy shall not preclude the use of the aircraft in any other circumstances at the direction of the Air Wing Commander consistent with the Air Wing SOP.

Command and Control

When engaged in Air Wing operations, missions, and/or training, the command and control concerning deployment and operational tactics utilized shall be determined by the:

- Air Wing Commander or designee; or
- Division of Homeland Security and Preparedness Commander or designee.

References: ADM-07 Written Directives, Schedules and Forms.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TOP-07A**
Subject:	
Small Unmanned Aircraft Systems (UAS)	

Policy

UAS missions shall:

- Not facilitate the use of any weapons and/or dispersal payloads;
- Comply with the United States Constitution, the Massachusetts Declaration of Rights, and all relevant and applicable laws and regulations; and
- Comply with all applicable Department Policies and Procedures, Rules and Regulations, and unit-specific Standard Operating Procedures (SOPs).

Purpose

The purpose of UAS Missions are:

- To define the operation of small Unmanned Aircraft Systems (UAS) in the National Airspace System (NAS) within the Department of State Police;
- To establish guidelines for the utilization and activation of UAS; and
- To develop, under the direction of the Department UAS Program Manager, unit-specific SOPs that shall be created, maintained and updated, as directed by the UAS Program Manager.

Definitions

Remote Pilot Certificate: A person acting as a Remote PIC of a UAS in the NAS under 14 CFR 107 must obtain a Remote Pilot Certificate with a UAS rating issued by the Federal Aviation Administration (FAA) prior to UAS operation.

Remote Pilot- in- Command (Remote PIC): A person who holds a remote pilot certificate with a UAS rating and has final authority and responsibility for the operation and safety of a UAS operation conducted under 14 CFR 107.

Small Unmanned Aircraft (UA): A UA weighing less than 55 pounds, including everything that is onboard or otherwise attached to the aircraft, and can be flown without the possibility of direct human intervention from within or on the aircraft.

UAS Program Manager: A Department member designated by the Colonel to oversee implementation, management, training, documentation and adherence to current FAA regulations for all Department-owned UAS. The UAS Program Manager shall create unit-specific SOPs and ensure the safe operation of all Department UAS.

Definitions, continued

Visual Observer (VO): A person acting as a flight crew member who assists the small UA remote PIC to see and avoid other air traffic or objects aloft or on the ground.

Utilization of Resources

Consistent with this policy, applicable laws and unit-specific SOPs, Department authorized UAS may be utilized for missions including, but not limited to, the following:

- Search and rescue for lost, missing, or endangered persons;
- Photographic and video documentation missions;
- Motor vehicle crash investigations / crash scene mapping;
- Criminal investigations and crime scene mapping;
- Tactical response missions (e.g., hostage rescue/barricaded subject);
- Providing an aerial visual perspective to assist officers in providing direction for crowd control, traffic incident management, special circumstances, and temporary perimeter security;
- Fire Services support;
- Homeland Security-related missions; and
- Other special events/incidents as assigned by the Division Commander, Unit Commander and/or UAS Program Manager or designee, consistent with and as permitted by law.

Prohibited Uses

Department UAS shall not be used for the following:

- To target a person based solely on individual characteristics, such as, but not limited to race, ethnicity, national origin, religion, disability, gender or sexual orientation;
- To harass, intimidate or discriminate against any individual or group; and/or
- To conduct personal business of any type.

Privacy

A UAS shall not be intentionally used for viewing, recording or transmitting images and/or video in a criminal investigation at any location or property where a person has a *reasonable expectation of privacy* unless:

- A warrant or court order has been approved for the search of the property;
- Consent by the owner or person responsible for the property is obtained; or
- Exigent circumstances exist, including but not limited to: search and rescue missions, tactical missions, crash scenes, crime scenes, fire scenes, hazmat scenes and natural disasters.

Subject: Small Unmanned Aircraft Systems (UAS)	Number: TOP-07A

Licensing, Certification and Registration

The Department UAS Program Manager shall:

- Ensure that all unit-specific remote pilots hold a Remote Pilot Certificate with a UAS rating issued by the FAA under 14 CFR 107; and
- Ensure that all UAS are registered with the FAA as required by 14 CFR 107.

Operational Protocols

The UAS Program Manager, the appropriate Unit Commander or the Remote PIC may decline, cancel, or terminate any UAS request or mission due to:

- Safety, weather, visibility;
- Type of request is beyond the UAS or member's capability;
- Availability;
- Mechanical maintenance of the UAS;
- Determination that use of UAS is not the appropriate resource after operational risk management or resource assessment is completed; or
- Determination that use of the UAS is in violation of this policy or Massachusetts General Laws.

All UAS missions will be flown in compliance with all current FAA Regulations including but not limited to 14 CFR 107. The Remote PIC has final authority and responsibility for the operation and safety of a UAS operation conducted under 14 CFR 107.

Training

The Department UAS Program Manager or designee shall:

- Ensure that all training and licensing is compliant with current FAA regulatory requirements including but not limited to 14 CFR 107.

Department members selected to be Remote PICs shall:

- Be properly trained and licensed as required by 14 CFR 107;
- Satisfy and maintain all the conditions of the Certificate of Authorization (COA) issued by the FAA if applicable;
- Have working knowledge of the airspace intended for operations and Air Traffic Control communication requirements; and
- Have the ability to obtain and interpret weather information.

Department members selected to be Visual Observers (VO) shall:

- Be properly trained according to standards set by the UAS Program Manager or designee that comply with FAA current regulatory requirements if any; and
- Satisfy and maintain all the conditions of the COA issued by the FAA if applicable.

Subject: Small Unmanned Aircraft Systems (UAS)	Number: TOP-07A

Mission Approvals

UAS mission requests shall be authorized by either:
- The appropriate Unit Commander or designee;
- The UAS Program Manager or designee; or
- The appropriate Division Commander.

Note: The Remote PIC has final authority and responsibility for the operation and safety of a UAS operation conducted under 14 CFR 107.

Authorized Equipment

Only Small UAS approved by the UAS Program Manager shall be authorized for use by members of the Department and/or for Department use.

Accident Notification and Investigation

In the event of a crash/incident involving fatalities, injuries, property damage, damage to the UAS or UAS fly-away, the Remote PIC shall:
- Report the crash/incident immediately to the appropriate Unit Commander and UAS Program Manager or designee;
- When applicable, notify the FAA in compliance with 14 CFR 107; and
- Complete and submit an incident report to the UAS Program Manager and appropriate Unit Commander.

The UAS Program Manager shall:
- Review all documentation and reports;
- Complete a summary report with conclusions and recommendations; and
- Forward all documentation through channels to the Colonel/Superintendent.

Digital Data preservation

All digital data including but not limited to photographs, video, and/or flight data shall be processed and maintained according to existing Department policies and preservation of evidence procedures.

Statistics, Records and Audits

The Department UAS Program Manager shall:
- Ensure that yearly statistics are kept for all UAS missions; and
- Ensure that flight and training records are properly maintained by the appropriate Unit Commander responsible for the use of the unit-specific UAS and forwarded to the UAS Program Manager.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**TOP-08**
Subject:	
Marine Unit	

Policy

The Marine Unit shall:

- When requested and approved, assist members from the Department and those from other local, state, and federal agencies; and
- Develop, under the direction of the Marine Unit Commanding Officer, a unit specific Standard Operating Procedure (SOP) that shall be created, maintained and updated as directed by the Planning, Preparedness, and Response Section Commander.

Purpose

To define the role of the Marine Unit within the Division of Homeland Security and Preparedness and establish guidelines for activation and utilization of the Unit's resources.

Utilization of Resources

The Marine Unit is available for:

- Patrol and law enforcement services;
- Search and rescue;
- Waterborne surveillance/undercover operations;
- Underwater recovery (dive) operations support;
- Homeland security related missions; and
- Other special events/incidents as assigned by the Division of Homeland Security and Preparedness Commander or designee.

Operational Protocols

The Marine Unit Commander shall assign authorized Marine Unit members who are designated and trained to:

- Operate State Police vessels and their associated motors, trailers, and equipment.

For all Marine Unit missions a member shall be designated as Boat Captain per the Unit's SOP. The Boat Captain shall:

- Be responsible for the safety of the vessel and all individuals on-board.

The Marine Unit and the designated Boat Captain(s) shall:

- Collaborate with the Underwater Recovery Team Commander or designee to ensure a safe and efficient environment for all dive operations.

Subject:	Number:
Marine Unit	**TOP-08**

Command and Control

When engaged in Marine Unit operations, missions, and/or training, the command and control concerning deployment and operational tactics utilized shall be determined by:

- Marine Unit Commander or designee; or
- The Division of Homeland Security and Preparedness Commander ordesignee;

The Marine Unit retains administrative control and limited operational control over the Underwater Recovery Team (URT). The URT Commander retains tactical control during dive operations.

The Marine Unit has a stable of Reserve Officers comprised of sworn personnel that have been properly vetted and periodically assist the Marine Unit in carrying out tasking. The Marine Unit chain of command exerts operational and tactical control over these members only when they are assigned to the Marine Unit for specific missions.

Activation Procedures

The Marine Unit is available for activation 24 hours a day. The Marine Unit is staffed in Boston from 0700-2300 all year round. The Quabbin Reservoir Marine Patrol is staffed from 0700-Dusk from April-October. The Marine Unit is available in an on-call basis from 2300-0700. The Marine Unit monitors the Statewide Radio channel "State" and work with Station G for the tracking of resources and personnel. Emergent situations should be reported to the Marine Unit as soon as possible in order to prepare personnel and resources for rapid deployment.

For emergency activations of the Marine Unit contact the following:

- Station G over the State channel; or
- The Troop Duty Office of jurisdiction (to contact on call Trooper); or
- GHQ Communications Section: 508-820-2121; or
- The Marine Unit (07:00-23:00): 617-740-7820

Subject:	
Incident Management Assistance Team	

Policy

The Incident Management Assistance Team (IMAT) shall:

- When requested and approved, assist members from the Department and those from other local, state, and federal agencies; and
- Develop, under the direction of the Unit Commander, a team specific Standard Operating Procedure (SOP) which shall be created, maintained and updated as directed by the Division of Homeland Security and Preparedness (DHS) Deputy Division Commander.

Purpose

To define the role of the IMAT within the DHS and establish guidelines for activation and utilization of its resources.

Utilization of Resources

The IMAT is available for:

- Large scale law enforcement operations;
- Lost or missing persons search and rescue missions;
- Extended recovery operations;
- Homeland Security-related missions; and
- Other special events/incidents as assigned by the DHS Deputy Division Commander.

Operational Protocols

IMAT members shall assist and advise on-scene Incident Commanders in the coordination and command and control of personnel and assets during the response to, mitigation of, and/or recovery from, an incident in a manner consistent with the Incident Command System (ICS) and the National Incident Management System (NIMS).

Responsibilities

Position	Responsibilities
IMAT Coordinator	• Shall be a commissioned officer from the DHS; • Shall be supported by members of the DHS IMAT; • Shall review the qualifications of all potential members and select Troop IMAT members who will also be available to the Department as IMAT members; • Maintain a list of all Department IMAT members, in combination with DHS IMAT members and Troop IMAT members; • Shall assist the Troop IMAT Officer in planning for IMAT support at planned Troop events; • Shall assist the Troop IMAT Officer with responses to unplanned Troop events; • At the request of the Troop IMAT Officer, shall provide the requesting Troop with IMAT support from the list of Department IMAT personnel for planned and unplanned events; • Shall plan IMAT training for all Department IMAT members; and • Shall identify and recommend IMAT equipment purchases through channels to the Colonel/Superintendent.
Division of Field Services Troop IMAT Officer	• Shall be a Commissioned Officer that is appointed by the Troop Commander from the Division of Field Services (DFS); • Shall identify and recommend to the Department's IMAT Coordinator a team of 5 subordinates as members of the Troop's IMAT; • Shall attend Troop planning meetings and report on anticipated IMAT staffing requirements to the Department's IMAT Coordinator; and • Shall make immediate notification to the Department IMAT Coordinator of Troop IMAT responses to unplanned events.

Responsibilities, continued

Position	Responsibilities
Department IMAT Members	• Shall provide the Department IMAT Coordinator with their current qualifications for selection and retention as Department IMAT members; • Shall respond to requests for Troop and Department IMAT responses; • Shall attend Department IMAT Training; and • Shall assist their Troop IMAT Officer when requested.

Special Emergency Response Team	

Policy

The Special Emergency Response Team (SERT) shall:

- When requested and approved, assist members from the Department or other local, state, and federal agencies; and
- Develop, under the direction of the Team Commanding Officer, team specific Standard Operating Procedure (SOP) that shall be created, maintained and updated as directed by the Special Operations Commander.

Purpose

To establish and define the role of the Special Emergency Response Team within the Division of Field Services-Special Operations and establish guidelines for activation and utilization of their resources.

Utilization of Resources

SERT is available for:

- Search and rescue efforts;
- Special event crowd management;
- Area security operations;
- Evidentiary searches;
- Fugitive searches;
- Prison and civil disturbances;
- Extended recovery operations support;
- Wilderness searches requiring advanced land navigation techniques;
- Homeland Security related missions; and
- Other special events/incidents as assigned by the Special Operations Commander or designee.

Civil Disturbance Response

SERT is a principal asset in response to planned mass demonstrations and civil disturbances. SERT actions will be in accordance with SOC-03C Response to Civil Disturbances, UOF-01 Use of Force and SERT SOP.

Operational Protocol

Search patterns and/or other tactical considerations shall be:
Determined by the Incident Commander; after
Consultation with the SERT Commander or designee.

Purpose

To establish and define the role of the Emergency Management Unit within the Division of Homeland Security and Preparedness and establish guidelines for activation and utilization of the Unit's resources.

Utilization of Resources

The Emergency Management Unit is available for:

- Multi-agency resource management and coordination;
- Assistance and/or support with exercise planning and evaluation;
- Major event coordination support;
- Natural disaster response, recovery and mitigation coordination;
- Emergency evacuation coordination support;
- Advanced incident management training;
- Homeland security related missions; and
- Other special events and/or incidents as assigned by the DFS Special Operations Commander or designee.

Operational Protocols

The Emergency Management Unit shall:

- Serve in a liaison capacity between the Department and the Massachusetts Emergency Management Agency (MEMA) and other local, state, federal, and private emergency management partners;
- Ensure the liaison position is staffed when requested by the Director of MEMA during the activation of the State Emergency Operations Center; and
- Reports through channels to the Colonel/Superintendent.

Subject:

Behavioral Observation and Suspicious Activity Recognition Unit (BOSAR)

Policy

The Behavioral Observation and Suspicious Activity Recognition Unit (BOSAR) shall:

- Have a strategic and interactive security platform, utilized in public settings, with the goal of identifying and disrupting individuals with hostile intent, as soon as possible in order to eliminate, or minimize, any harm to the public; and
- Be activated in any type of security function, location, or event. More importantly, its principals can be applied to daily law enforcement assignments.

Purpose

The main purpose of the BOSAR Unit is to serve as the primary plainclothes asset within the Department's large scale event security package. The main purpose of the BOSAR Unit is for officers to observe or detect "hostile" activity as soon as possible in order to eliminate, or minimize, any harm to the public.

Utilization of Resources

The BOSAR Unit is available for:

- Special event security;
- Fixed target security;
- SEAR Events and national media event security;
- Inaugurations;
- Dignitary visits;
- Large crowd attended events;
- Civil disturbances and/or protests;
- Area security operations;
- Homeland Security related missions; and
- Other special events/incidents as assigned by the Department, the Division of Homeland Security and Preparedness, and/or the Division of Investigative Services Commander, or the Department's designee.

Operational Protocols

Upon identifying a target for additional observation based on the target's activity and/or behavior, undercover officers should advise their BOSAR group supervisor and/or fellow team members as soon as practical and as soon as their concerns rise to the level that warrant additional assistance, surveillance, and/or action. Further, if an officer believes there ultimately is no concern or threat, that information should be communicated as well in

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-01**
Subject:	
Mission, Goals, and Objectives	

Policy

All members are responsible for facilitating the safe and expeditious flow of traffic.

Mission

To develop and implement data-driven, multidisciplinary strategies to maximize the safety of the users of the roadway system.

Traffic Law Enforcement

Goal

Minimize the incidence of offenses committed on the roadways and to promote voluntary compliance with traffic laws.

Objectives

- Minimize the number of crashes and the resulting fatalities, injuries, and property damage through uniform, consistent, and active enforcement;
- Maximize training, selective enforcement, and criminal enforcement to reduce the number of driver errors, traffic violations, and the overall crime rate; and
- Maximize the utilization of traffic data, crash reports, and citation information as key identifiers for personnel deployment and selective traffic enforcement.

Uniform Enforcement

Members shall enforce the motor vehicle laws of the Commonwealth in a uniform manner. Enforcement actions shall be guided by the Massachusetts General Laws, Code of Massachusetts Regulations, Federal Regulations, Department Policies and other lawful regulations related to the identified violation(s).

Uniform Enforcement, continued

The policy of uniform enforcement shall include, but not be limited to, the following traffic violations:

- Moving and non-moving violations;
- Reckless/aggressive operation violations;
- Hazardous and non-hazardous violations;
- Speed violations;
- Equipment/safety violations;
- Multiple violations;
- Violations resulting in traffic collisions;
- Operation of a vehicle by a driver under the influence of alcohol/drugs;
- Operation of a vehicle after driving privileges have been suspended or revoked;
- Public carrier/commercial vehicle violations;
- Off-road vehicle violations;
- Pedestrian and bicycle violations; and
- Newly enacted laws and/or regulations.

License Re-examination Referrals

Members shall notify the Registry of Motor Vehicles (RMV) when they identify operators who pose a risk to public safety as a result of their driving behavior or medical condition. Forms can be accessed via *PowerDMS/Department Forms/Traffic Programs Forms.*

Members should submit RMV form *Request for Immediate Threat License Suspension/Revocation* for any operator whose continued operation would constitute an immediate threat to the public safety.

Members should submit RMV form *Request for Medical Evaluation* for any operator that is physically or mentally incapable of safely operating a motor vehicle.

Traffic Crash Management

Goal

Minimize the incidences of loss of life, personal injury, and property damage resulting from crashes.

Objectives

- Maximize planning and coordinate programs by systematically obtaining pertinent data about collisions;
- Minimize the severity of personal injuries and safeguard the lives and well-being of persons involved in collisions by providing basic medical and other emergency services;
- Minimize the number of driver errors and traffic violations by determining the cause(s) of collisions and taking appropriate enforcement action; and
- Minimize secondary crashes and/or delays by clearing crash scenes as rapidly as possible.

Traffic Direction and Control

Goal

Minimize delays to motorists resulting from crashes, construction, or other impediments.

Objectives

- Maximize the presence of personnel and equipment at locations and times conducive to enhancing traffic safety and flow;
- Maximize the expeditious flow of traffic by maintaining a high degree of officer and cruiser visibility while on patrol or specific assignment;
- Minimize and prevent collisions by eliciting the assistance of transportation officials and other law enforcement agencies to resolve problems as quickly and efficiently as possible;
- Maximize the direction of traffic through the use of signs, signals, and mechanical devices to regulate, coordinate, and detour traffic; and
- Maximize inter-agency relationships by sharing knowledge and information with other law enforcement, transportation, and academic officials involved in the transportation system so as to be better able to identify opportunities and resolve problems as quickly and efficiently as possible.

Traffic Safety Education

Goal

Maximize the knowledge of motorists through Department announcements, direct motorist contact and provide information on risks, losses, and hardships associated with unsafe driving practices and/or equipment deficiencies.

Objectives

- Maximize the awareness among the general public of the risk of damage, economic losses, and hardships associated with crashes and/or arrests resulting from unsafe driving;
- Minimize crashes and traffic violations committed by the general public through comprehensive training and education programs in unison with media informational efforts; and
- Maximize the public's safety by providing education on the importance of safety precautions, and promoting good driving practices such as wearing safety belts.

Traffic Ancillary Services

Goal

Maximize service to motorists in need of aid or information in a timely manner.

Objectives

- Maximize public safety by diligently patrolling assigned areas and rendering assistance when needed;
- Minimize the dangers to a stranded motorist by obtaining appropriate and timely assistance;
- Maximize public acceptance and respect by courteously providing information; and

- Maximize public awareness of traffic safety information through Department Public Service Announcements (PSA's) and community relations efforts.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**TRF-02**
Subject:	
Patrol	

Policy

The Department shall provide twenty-four (24) hour a day patrol coverage of state and interstate highways, as well as other areas of primary jurisdiction. The Department shall also be available to assist other agencies when required.

Patrol Function

The purpose of the patrol function is to:

- Protect life and property;
- Respond to emergencies and other calls for service;
- Investigate crimes;
- Ensure the safety of motorists and pedestrians; and
- Assist other members, police departments, and government agencies.

Deployment

Members may be deployed based upon the documented need for services. Criteria to be used for the assignment of personnel include, but are not limited to:

- Crime: Number of crimes, type, and severity;
- Calls For Service: Number of specific incidents, time, and type;
- Jurisdiction: Geography and demographics of the area;
- Crash Data: Number of crashes, type and severity;
- Roads: Type and miles of roadways; and
- Coverage: Sufficient patrols are available to ensure officer safety.

Roll Call

Supervisors or Station Desk Officers should conduct a roll call with shift members, preferably at the start of each shift. Roll call information may include items such as:

- Review of Department written orders and directives;
- Administrative messages;
- Legal updates;
- Patrol information; and
- Investigative and intelligence bulletins.

Patrol Responsibilities

The safety of members and the public are a paramount concern at all times.

Members shall;

- In accordance with TRF-07, Motor Vehicle Stops, prior to approaching any vehicle or engaging in patrol activities, members with access to an MDT, shall ensure related registration information is electronically documented and/or the location and registration information is broadcast to the desk officer and/or dispatcher via the radio system as soon as practicable. Members without access to an MDT shall broadcast the location and registration information to the desk officer and/or dispatcher via the radio system. Departures from this requirement may be authorized by supervisors when specific operational concerns exist AND must be documented via DAJ/Record of Investigation or To/From. The nature and duration of departure shall be documented;
- Maintain high visibility for general deterrence of criminal and traffic violations;
- In accordance with Department policy and MGL, identify and take appropriate enforcement action when applicable;
- Familiarize themselves with their patrol area including the location of hospitals, local police departments, and other such facilities;
- Utilize various routes of travel to promote the visibility concept and to minimize predictability;
- Remain in their assigned patrol area, unless otherwise authorized or directed;
- When practicable, check vehicles encountered parked within their patrol and/or traveled area, on the highway, and in rest areas (see ADM-46 Sexual Activity in Public Places), particularly at night and during periods of extreme or inclement weather to ascertain if the motorist/occupants are in need of assistance;
- Perform first responder duties by providing trained basic medical care until the arrival of more qualified emergency medical personnel;
- When appropriate, utilize issued fire suppression equipment until the arrival of fire services;
- Be alert to and report hazards within their patrol area, such as: road debris, inoperative traffic lights, missing traffic signs, fallen trees, or icy roads;
- If the condition or hazard is of an emergency nature, the member should remain at the scene until the situation has been resolved, or the member is relieved by another member, entity, or as ordered;
- Deliver emergency messages as approved by a Supervisory member to include, but not be limited to, next-of kin notifications in accordance with ADM-13 Notification of Medical Examiner and/or Next of Kin or other time sensitive law enforcement related message;
- Respond to alarms at Department and/or Commonwealth properties in accordance with established procedures;

Patrol Responsibilities, continued

- Maintain radio communication with barracks of jurisdiction advising the desk officer of self initiated activity that may require additional resources; and
- Monitor radio communications of local law enforcement, as practicable, and provide assistance in accordance with Department policy and MGL advising the desk officer of any self-initiated response.

Supervisors shall provide support to members to ensure their safety and efficiency while on patrol.

Desk Officer Responsibilities

Desk Officers shall be responsible for the following, but not limited to:

- Record member's Code 4 and Code 5 information when member's are signing on/off duty from assigned patrol areas. The Daily Administrative Journal (DAJ) entry should always accurately reflect what the member's Automated Vehicle Locator (AVL) will record;
- Enter the proper Roll Call information into the DAJ including member's patrol assignment and status;
- Monitor the proper radio channel(s) to maintain communication with Department members;
- Answering incoming phone calls to include:
  - Identifying location reached, rank and name (e.g. *State Police Holden-Trooper Smith*);
  - Classifying the nature of the incoming call as emergency/non-emergency; and
  - Communicating the Department's response to the call to the caller;
- Dispatch member(s) to incidents as necessary to provide safety and security to member(s) and the public. When available, a patrol supervisor should be requested to respond to incidents that may require a command element;
- Immediately dispatch members, including requesting local law enforcement, to emergency requests for assistance or activated emergency alarms from Department members;
- Notify or request assistance from the appropriate police department, fire department, emergency medical services or other resources as needed;
- Dispatch member(s) to address reported hazards/situations;
- Make appropriate notifications and request required assistance through the Massachusetts Department of Transportation Highway Operations Center;
- Record information in the DAJ on calls for service including, but not limited to the following:
  - Citizen reports of crimes;
  - Calls for service that are not crime related;
  - Incidents resulting in member(s) being dispatched or assigned; and/or
  - Incidents involving arrests, citations, or summonses as requested by initiating member.

Desk Officer Responsibilities, continued

- Each request for service or self-initiated activity entered into the DAJ should include, where applicable:
  - Date, time and location of request;
  - Type of incident reported;
  - Approximate time of dispatch and identification of member(s) assigned as primary and backup;
  - Name and address of complainant, if possible;
  - Approximate time of the member(s) arrival and return to service; and/or
  - Disposition or status of reported incident; and
- Communicate pertinent information to the Troop Duty Officer as appropriate.

Assisting Motorists

All members, regardless of duty assignment, shall be constantly alert for motorists who appear to need assistance. Whenever a disabled motor vehicle is observed, members should stop, unless a call or assignment prohibits them from doing so.

- Members are not required to perform mechanical work, change flat tires, jump-start vehicle batteries, unlock doors, etc.

If a disabled vehicle presents a clear and present danger, may create further traffic problems, and/or may increase the possibility of a traffic crash, it may be pushed off the primary roadway and onto the shoulder, median, or breakdown lane. When pushing a disabled vehicle, members shall:

- Ensure that sufficient care is taken to prevent unnecessary damage to both the disabled motor vehicle and Department motor vehicle; and
- Use only Department vehicles modified with extended front push bumpers, unless extenuating circumstances exist.

Depending upon time of day, weather, location of the vehicle or other variables, members should remain with the disabled vehicle and its occupants until assistance arrives, or they are assigned to a higher priority call for service.

- Members may allow stranded motorists and/or occupants to remain in a Department vehicle for safety and warmth; and/or
- Members may transport operators and/or occupants to another location for their safety or to a location where arrangements may be made for further assistance.

When encountering an unattended/abandoned motor vehicle members should:

- Stop and conduct a visual check of the vehicle; and
- Conduct an RMV and CJIS/NCIC inquiry into the status of the vehicle.

Assisting Motorists, continued

If the vehicle is properly registered and does not appear to be stolen or pose a risk to public safety, a courtesy check sticker should be completed and affixed to the vehicle, on the upper left corner of the rear glass or where it can be readily identified by other members. A log note shall be made in the DAJ by the reporting member, or the Desk Officer if the reporting member does not have immediate access to an MDT.

When asked to provide directions, guidance, or general information, members shall conduct themselves in a courteous and professional manner.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-03**
Subject:	
Selective Traffic Enforcement	

Policy

The Department shall use special enforcement patrol duties as an effective technique to meet highway traffic safety goals and objectives.

The Troop Traffic Programs Officer shall document and report quarterly to the Traffic Programs Section Commanding Officer selective traffic enforcement activities conducted. This report shall be submitted no later than the last day of each quarter.

Annually, no later than December 31st, the Traffic Programs Section shall document an annual review of Department selective traffic enforcement activities.

Selective Traffic Enforcement

The primary purposes of selective traffic enforcement are to:

- Regulate traffic flow;
- Reduce traffic crashes; and
- Improve the safety of roads and highways.

Assignments shall be based upon:

- Crash data;
- Frequency of traffic violations;
- Traffic volume;
- Citizen complaints; and
- Any other pertinent information.

Traffic law enforcement depends upon the public and judicial acceptance of Department efforts. Selective enforcement shall be applied in a fair, impartial and unbiased manner to create a climate of compliance with motor vehicle laws.

The selective enforcement performance standards for members shall be based upon the goals and objectives of the mission.

It is important to understand that both a quantitative and a qualitative emphasis are integral parts of selective enforcement.

Troop Commanders

Troop Commanders may utilize any of the following selective enforcement techniques, or combinations thereof, based upon the Traffic Program Officer's and/or Traffic Program Section's reports:

- Aerial patrol by the Air Wing;
- Directed patrol utilizing Community Action Team(s);

- Speed reduction with speed measuring devices;
- Removing intoxicated drivers through saturation patrols, sobriety checkpoints, and other approved methods;

Troop Commanders, continued

- Commercial vehicle enforcement conducted by the Commercial Vehicle Enforcement Section (CVES);
- Joint operations in unison with other law enforcement agencies; and
- Providing education and information through electronic and print media releases and public presentations on traffic safety.

Traffic Programs Section

The Traffic Programs Section and other Department resources shall provide assistance and guidance to Troop Commanders on the selective enforcement activities to be conducted. This shall occur on a monthly basis and may include:

- Analysis of traffic crash investigations/reports data;
- Analysis of traffic enforcement activities data;
- Comparative analysis between traffic enforcement and crash data;
- Determining selective enforcement activities and programs success; and
- Review and revision of selective enforcement objectives.

Troop Traffic Programs Officer

The Troop Traffic Programs Officer is responsible for providing the traffic analysis for their respective Troop in conjunction with the Traffic Programs Section and other Department resources as stated above. The summaries shall include:

- Time and location of crashes;
- Causal factors; and
- Types of violations noted.

Station Commanders

Station Commanders shall utilize this traffic information for the scheduling of members for selective enforcement.

- Routine patrol assignments shall be planned based upon available Department resources in order to maximize the patrol effort of members not specifically assigned to other duties; and
- The assignment and deployment of members to selective enforcement should complement rather than replace regular patrols.

Department of State Police
General Order

Effective Date:	Number:
December 6, 2021	**TRF-04**
Subject:	
Motor Vehicle Pursuits	

Policy

A motor vehicle pursuit is justified when the necessity of the apprehension of a suspect outweighs the risk created by the pursuit.

Members shall continuously evaluate all circumstances surrounding a pursuit. If the degree of danger to the public, the pursuit member(s), and/or the suspect(s) is greater than the necessity for immediate apprehension, a pursuit should not be initiated, or if in progress, should be terminated.

Definitions

Deadly Force: Use of force intended to inflict, or reasonably be expected to cause, death or serious physical injury.

Densely Populated Area: An established city or town that is thickly settled and/or comprised of a business district marked by compactness, pedestrian and vehicular traffic.

Objectively Reasonable: This term means that, in determining the necessity for and appropriate level of force, officers shall evaluate each situation in light of the known circumstances, including, but not limited to, the seriousness of the crime, the level of threat or resistance presented by the subject, and the danger to the officer, subject, or community. The reasonableness of a particular use of force must be judged from the perspective of a reasonable officer on scene, rather than with the 20/20 vision of hindsight. Determining reasonableness of force must allow for the fact that police officers are often required to make instantaneous judgments in circumstances that are tense, uncertain and rapidly evolving. The force used must be reasonable under the circumstances known to the officer at the time force is used. *Graham v. Connor* 490 U.S. 386 (1989)

Serious Bodily Injury: Injury that involves a substantial risk of death, permanent or protracted disfigurement, or extended loss or impairment of the function of a body part or organ.

Vehicular Pursuit: An active attempt by an officer in an authorized emergency vehicle to apprehend a fleeing suspect who is actively attempting to elude the police.

Prohibited Pursuits

Members **shall not** pursue a fleeing vehicle into another state, UNLESS:

- The reason for attempting to stop the motor vehicle is a felony **AND**
- The member is specifically authorized by the Troop Duty Officer to continue the pursuit into another state.

Pursuits of motorcycles, mopeds and motorized scooters **are prohibited** unless:

- the suspect poses an imminent threat of death or serious bodily harm to the public or officers; **AND**
- The member is specifically authorized by the Troop Duty Officer to continue the pursuit.

The Troop Duty Officer shall:

- Immediately assume command and control when circumstances result in a request for a CODE 1 regarding pursuit of a motorcycle, moped or motorized scooter; and
- Terminate the pursuit, unless the suspect poses an imminent threat of death or serious bodily harm to the public or officers.

Initiating a Pursuit

If a violator fails to stop when signaled to do so and operates in such a manner as to avoid capture, members must first recognize the potential risk to public safety before initiating a pursuit. Consideration should be given to tactics that reduce the opportunity for a suspect to evade apprehension.

If the degree of danger to the public, the pursuit member(s), and/or the suspect(s) is greater than the need for immediate apprehension, a pursuit should not be initiated or, if in progress, should be terminated.

Factors to consider include:

- Offense;
- Density of the populated area;
- Volume of vehicular and pedestrian traffic;
- Probability of apprehension;
- Type of vehicle being pursued;
- Availability of assistance;
- Speed and driving behavior;
- Presence of passengers;
- Location, visibility, weather, road conditions, and the time of day; and
- Other circumstances or conditions which mitigate or aggravate hazards associated with the pursuit.

Termination of Pursuits

Members shall immediately terminate a pursuit when any of the following conditions exist:

- When a pursuit for a civil infraction, misdemeanor or non-violent felony enters into a densely populated area or heavily congested roadway;
- If radio communications with the Troop Duty Officer cannot be established or lapse during the pursuit;
- When the initiating member or Troop Duty Officer evaluates or determines that the totality of the circumstances or risk of continuing the pursuit are outweighed by the risk to public safety; and/or
- When ordered to do so by the Troop Duty Officer or any Department member holding the rank of Captain and above.

Termination orders shall be immediately acknowledged.

When a member terminates a pursuit, he/she shall immediately deactivate all emergency visual and audible systems.

Pursuit Responsibilities

Position	Duties
Primary Pursuit Member	Shall: • Request a **CODE 1** and broadcast cruiser number, location, direction of travel, speed and traffic conditions; • Activate all emergency visual and audible systems; • Provide the original reason for the attempt to stop the motor vehicle, a vehicle description, and the visible-number of occupants in the vehicle; • Continuously broadcast the location, direction, speed, and road conditions; • Operate cruiser in accordance with General Order ADM-19A Vehicle Use and Maintenance, M.G.L. c. 89, s. 7B and continuously evaluate the risk to public safety; • Advise the Troop Duty Officer of any crashes; • Ensure that rendering assistance to injured parties takes precedence over the continuation of the pursuit; and • Conduct a comprehensive follow-up investigation in the event the operator eludes apprehension.
Barracks Desk Officer	Shall: • Verify the Troop Dispatcher has notified the Troop Duty Officer of the pursuit; • Receive, record, and coordinate information on the pursuit and the pursued vehicle with the Troop Duty Officer, Dispatcher and other law enforcement agencies; and • Ensure that all pertinent information regarding the pursuit is entered into the Daily Administrative Journal (DAJ) and forwarded to the Troop Duty Officer.

Pursuit Responsibilities, continued

Position	Duties
Assisting Pursuit Member(s)	Shall immediately: • Notify the Troop Duty Officer of their participation in the pursuit; • Maintain a safe distance behind the primary unit, but be close enough to provide aid; and • Assume radio communication if and when required. <u>Only three (3) State Police vehicles should engage in an active pursuit.</u> The Troop Duty Officer may permit additional State Police members to assist in a pursuit if he/she determines extenuating circumstances which warrant additional assistance. State Police vehicles not directly engaged in the pursuit, but in close proximity to the pursuit, shall immediately notify the Troop Duty Officer. These members shall position themselves on alternate/parallel roadways to provide assistance in the event the suspect eludes the pursuit member(s) or flees on foot; or as otherwise directed by the Troop Duty Officer.
Troop Duty Officer	Shall: • Immediately initiate a **CODE 1**; • <u>Personally broadcast</u> that they have assumed "command and control" of the pursuit; • Ascertain the cruiser number(s) of the involved member(s); location, direction of travel, speed, and traffic conditions; • Determine the original reason for the attempt to stop the motor vehicle; • Obtain the vehicle description, including plate number, if known, and number of occupants; • Continuously evaluate the risk to the public, and the pursuit member(s), as such risks relate to the necessity for immediate apprehension;

Pursuit Responsibilities, continued

Position	Duties
Troop Duty Officer	• Utilize State Police Air Wing (if available); • Direct State Police K-9 units to respond to the general area (if available); and • Direct State Police assets with tire deflation devices to respond to the general area, if available, and deploy device when applicable. **<u>Mandatory Termination</u>** In the event the pursuit member fails to transmit the required information to the Troop Duty Officer, said Troop Duty Officer shall terminate the pursuit. If the degree of danger to the public, the pursuit member(s), and/or the suspect(s) is greater than the necessity for immediate apprehension, a <u>pursuit should not be initiated, or if in progress, should be terminated</u>. **<u>Authority</u>** Regardless of the rank of the pursuit member, the Troop Duty Officer shall remain in command and control of the pursuit for the entire duration. **<u>Inter-Troop Pursuits</u>** The Troop Duty Officer of jurisdiction shall assume command and control once the pursuit enters their Troop. Adjoining Troop Duty Officers shall be notified of pursuits that are in close proximity to their jurisdiction and may enter into their area of responsibility. When a pursuit enters into a different Troop, the originating Troop Duty Officer shall remain in command and control until the adjoining Troop Duty Officer personally broadcasts that they have assumed "command and control" of the pursuit. **<u>Note:</u> Only the Troop Duty Officer from the originating Troop shall complete the pursuit evaluation.**

Pursuit Responsibilities, continued

Position	Duties
Troop Duty Officer	**Inter-Jurisdictional Pursuits** Troop Duty Officers shall notify other law enforcement agencies when a State Police pursuit is within their primary jurisdiction. The Troop Duty Officer shall factor into their pursuit continuation consideration any additional information provided by the other law enforcement agency. The Troop Duty Officer shall specifically state to the other law enforcement agency whether they are requesting their assistance or whether it is a courtesy notification with NO participation requested. Troop Duty Officers shall be responsible for the notification(s) but may authorize a designee to conduct the notification on their behalf. **Out of State Pursuits** If a felony has been committed, the Troop Duty Officer may authorize the pursuit member(s) to continue to pursue into another state. If this occurs, the Troop Duty Officer shall immediately: • Notify the law enforcement agency of jurisdiction and request their assistance; • Require that the first out-of-state law enforcement vehicle that joins the pursuit become the primary pursuit vehicle; • Direct the Massachusetts State Police vehicle to become a backup unit; and • Direct the MSP member(s) involved to return to the Commonwealth as soon as the pursuit investigation is terminated. **Crash/Injury Investigations** The Troop Duty Officer shall assign a supervisor to investigate all crashes and injuries associated with a State Police pursuit. A supervisor from the Troop in which the crash/injury occurred will be assigned the investigation.

Other Law Enforcement Agency Pursuits

Once a law enforcement agency notifies the State Police that they are in pursuit the caller must be identified and specifically asked:

- Whether they are making a request for State Police assistance; or
- Making a courtesy notification with NO State Police participation requested.

Once a request for assistance is made, the Troop Duty Officer shall determine if the State Police shall participate. If approval is granted, State Police member(s) shall act as a secondary unit to the other agency's officer unless otherwise directed by the Troop Duty Officer.

All State Police members directly or indirectly involved in a pursuit initiated by another law enforcement agency shall adhere to all of the requirements established in State Police General Orders, as well as Rules and Regulations.

Pursuit Driving Tactics

Reckless/Hazardous Driving – Members shall not duplicate the reckless operation displayed by fleeing suspects. Members are strictly prohibited from wrong way operation.

Deliberate Contact – A form of forcible stopping using a Department vehicle to intentionally make contact with a violator's vehicle in order to functionally damage or force the violator's vehicle to stop.

- Deliberate contact may be considered a use of deadly force;
- May only be initiated when the violator poses an imminent threat of death or serious bodily harm to the public or members;
- Should only be utilized when all other attempts to stop the violator's vehicle are, or would likely be, unsuccessful;
- Shall be utilized only when authorized and ordered by the Troop Duty Officer, Troop Commander or sworn Command Staff Member;
    - The exigent application of deliberate contact prior to authorization must be warranted by the immediacy of the exigency. (Ex: vehicle driving towards a crowd)
- All deliberate contact incidents shall be investigated as a use of force incident in accordance with UOF-03 Use of Force Reporting.

Tire Deflating Devices – Should be considered as an effective option for bringing a pursuit to conclusion for passenger vehicles only. The use of these devices is prohibited for motorcycles, mopeds, motorized scooters, buses, and trucks. (Refer to TRF-21 for additional details.)

Caravanning - Only three (3) State Police vehicles should engage in active pursuit. The Troop Duty Officer may permit additional State Police members to assist in a pursuit if he/she determines that extenuating circumstances warrant additional assistance.

Pursuit Driving Tactics, continued

Units Paralleling – Additional State Police members may operate with emergency visual and audible systems activated and assist by paralleling the pursuit or pre-position themselves at likely avenues of escape. These assisting units should refrain from direct/active pursuit unless specifically authorized by the Troop Duty Officer.

Passing – Attempts to pass another police vehicle are strictly prohibited, unless the police vehicle is disabled or ordered by the Troop Duty Officer.

Spacing – All units in pursuit shall space themselves at a safe distance to ensure proper braking and reaction time.

State Police Motorcycles – SHALL NOT be involved in a pursuit.

Unmarked State Police Vehicles – Members operating unmarked State Police vehicles shall only engage in pursuits if the vehicles are equipped with emergency visual and audible systems. Members shall allow a marked/semi-marked unit to assume the primary pursuit position at the earliest opportunity. The unmarked vehicle shall then become the assisting unit until an additional marked/semi marked State Police vehicle can assume the secondary role. Once three (3) marked/semi marked State Police vehicles have become actively involved in the pursuit, the unmarked vehicle should disengage from the pursuit unless specifically authorized by the Troop Duty Officer to continue involvement in the pursuit.

Non-Department Vehicles – Members are prohibited from initiating or engaging in an ongoing pursuit in a Non-Department Vehicle, unless an imminent threat of death or serious bodily harm to the public or officer(s) exists and/or so ordered by the Troop Duty Officer of jurisdiction.

Post Pursuit Documentation and Review

Position	Duties
Primary Pursuit Member	• Provide the Troop Duty Officer with relevant information so they can complete the electronic RAMS Pursuit Evaluation Form; and • Complete a written incident or arrest report.
Troop Duty Officer	• Ensure that the Desk Officer has entered all pertinent information into the DAJ and the entry is forwarded to Troop Headquarters; • Complete all required entries in the Troop Headquarters DAJ; • Ensure that the Troop Headquarters DAJ entry is included in the Daily AM Report; • Complete the electronic RAMS Pursuit Evaluation; and • Ensure a follow-up investigation occurs for suspects who elude apprehension.
Deputy Superintendent	• Appoint members to the Pursuit Review Committee.

Subject: Motor Vehicle Pursuits	Number: TRF-04

Post Pursuit Documentation and Review, continued

Pursuit Review Committee Members	• Examine each pursuit and ensure compliance with this policy and report their findings to the Deputy Superintendent; and • Refrain from reviewing any pursuits in which they were personally involved.

The Pursuit Review Committee shall conduct and document an annual analysis of all pursuits in accordance with Accreditation standards including, but not limited to identifying patterns or trends discovered and indicate whether training or policy revisions are needed.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-04A**
Subject:	
Foot Pursuits	

Policy

Members shall continuously evaluate all circumstances surrounding a pursuit. If the degree of danger to the public, the pursuing member(s), and/or the suspect(s) is greater than the necessity for immediate apprehension, a pursuit should not be initiated, or, if in progress, should be terminated.

Criteria for Foot Pursuits

Mere flight by an individual not otherwise suspected of criminal activity shall not serve as the sole justification for engaging in a foot pursuit, or for committing significant Department resources.

Alternatives to Foot Pursuits

Foot pursuits are inherently dangerous and require heightened officer safety, situational awareness, and sound tactics.

Members should consider, if the situation allows, removing the keys from the ignition of Department vehicle and/or the suspect's vehicle before commencing the tracking of the suspect(s).

In deciding whether or not to initiate or continue a foot pursuit, a member should continuously consider reasonable alternatives to pursuit based upon the circumstances and resources available, including:

- Containment of the area;
- Saturation of the area with additional patrol personnel;
- K-9 support;
- Air Wing support;
- Apprehension at another time if the identity of the suspect is known or other information is available that would likely allow for later apprehension; and
- The need to immediately apprehend the suspect does not reasonably appear to outweigh the risk in continuing the pursuit.

The team concept of using two (2) or more officers should be used whenever possible.

If extenuating circumstances warrant continuation of a foot pursuit, it is generally recommended that a single member keep the suspect in sight from a safe distance and coordinate containment.

Termination of Foot Pursuit

Unless there is an immediate threat to another officer/member or the public, members should not initiate or continue a foot pursuit under the following conditions:

- The member has no portable radio, no means of communicating or loses communications with other members or barracks of jurisdiction;
- The member is alone and the suspect has fled into the woods or an unoccupied building;
- When two (2) or more officers/members become separated, lose means of communication with one another, or obstacles separate them to the degree that they cannot immediately assist each other should a confrontation take place;
- The member loses possession of their weapon or other essential equipment;
- When the member cannot articulate their location through means of landmarks or other identifiable means for responding members;
- When pursuing multiple suspects and the pursuing member(s) do not reasonably believe that they would be able to control the suspects should a confrontation occur; and/or
- When ordered to do so by the Troop Duty Officer.

Foot Pursuit Responsibilities

Position	Duties
Primary Pursuit Member	Upon the initiation of a foot pursuit, member(s) shall contact the barracks of jurisdiction, request a **CODE 1** and at a minimum, provide the following information: • Member's identification (cruiser number, call sign or name) and exact location; • If the member is in civilian attire, they should broadcast they are not in uniform and if possible a description of their outer garments; • Reason for the pursuit and current direction of travel; • Number and description of suspects; and • Whether the suspect is known or believed to be armed.

Foot Pursuit Responsibilities, continued

Position	Duties
Barracks Desk Officer	Shall: • Immediately notify the Troop Duty Officer of a foot pursuit; • Utilize technology including Automated Vehicle Locator (AVL) and mapping to coordinate containment perimeters with responding assets; • Direct additional barracks resources to the area to provide assistance; • Receive, record, and coordinate information on the pursuit and the pursued-suspect with the Troop Duty Officer and other law enforcement agencies; and • Ensure that all pertinent information regarding the pursuit is entered into the Daily Administrative Journal (DAJ)/ACISS.
Troop Duty Officer	Shall: • Immediately initiate a **CODE 1**; • Ascertain the member's identification (cruiser number, call sign or name) and last known location; • Determine the reason for the pursuit and current direction of travel; • Obtain the number and description of suspects; • Utilize State Police Air Wing (if available); • Direct State Police K-9 Units to respond to the area (if available); • Direct additional State Police tactical resources to respond to the area (if applicable); and • Ensure that all pertinent information regarding the pursuit is entered into the Daily Administrative Journal (DAJ)/ACISS. **<u>Mandatory Termination</u>** In the event the pursuing member fails to transmit or there is a loss of communication, the Troop Duty Officer shall terminate the pursuit upon next contact with the pursuing member who shall immediately acknowledge the termination order. Additional resources shall continue to respond to the area until the well-being of the pursuing member is verified and/or as directed by the Troop Duty Officer. If the degree of danger to the public, the pursuing member(s), and/or the suspect(s) is greater than the necessity for immediate apprehension, <u>a pursuit should not be initiated, or, if in progress, should be terminated.</u>

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-05**
Subject:	
Traffic Incident Management	

Policy

The Department shall use Traffic Incident Management protocols to minimize the congestion and delay caused by highway incidents.

Traffic congestion causes safety concerns due to the increased risk of secondary crashes.

Every effort should be made to minimize this risk, in addition to the impact to public safety and the inconvenience to motorists of the Commonwealth.

Applicability

Every incident requires that certain Traffic Incident Management activities be performed. Even if the incident is minor, Traffic Incident Management protocols are applicable to some degree.

The system, whenever possible, should be applied to:

- Create familiarity with the system;
- Be prepared for escalation; and
- Increase awareness of the risks that exist in all incidents.

Goal and Objectives

Goal

Use "Quick Clearance" to restore the normal traffic flow as quickly and safely as possible.

Objectives

- Coordinate and expedite emergency response to incidents;
- Save lives, preserve property and minimize damage to the environment through the use and implementation of standard procedures and/or agreements;
- Improve incident scene management to facilitate quick clearance;
- Provide timely, accurate information to other agencies and roadway users about roadway conditions and alternate routes through the use of media, the Massachusetts Department of Transportation Highway Operations Center, and other systems; and
- Minimize the impact of non-recurring incidents through the use of pre-planned alternate routes.

Unified Command

Incidents occur without regard to jurisdictional boundaries requiring a well-integrated, unified command approach to managing the incident scene.

Roadway crashes, fires, and hazardous material incidents usually require a multi-jurisdiction, multi-agency response. Individual agency responsibilities and authority are normally confined by jurisdiction or function by statute.

Unified Command requires all responding agencies to have a functional responsibility that contributes to:

- Ensuring safety of ALL emergency responders;
- Determining overall incident objectives;
- Ensuring joint planning;
- Implementing strategy chosen for clearing the incident;
- Ensuring integrated tactical operations are conducted;
- Maximizing all assigned resources; and
- Re-opening the affected roadway as quickly and efficiently as possible to minimize traffic congestion delays resulting from the incident.

Traffic Incident Management Response Framework

Department members shall perform certain duties and responsibilities, such as first-on-scene or incident command, as necessary.
The following responsibilities are critical to initiating the appropriate response and successfully managing an incident:

Perform First-On-Scene Duties

- All members, when first arriving on the scene of a roadway crash, shall ensure the scene is safe and be prepared to assume the first-on-scene duties.

Evaluate the Incident

- Type of incident and potential number of injured, traffic conditions, lanes that are blocked, best access to the scene:
    - If a commercial vehicle (bus or truck) is involved, the Department of Transportation number is required.
    - In case of hazardous material releases: the type, estimated amount, tank rupture, and placard number is required.

Initiate Communication of the Incident

- Provide a brief description of the incident and if lane(s) of travel are required to be temporarily closed. Provide the exact location to include: route number, direction, town, exit number, mile marker, or landmark. Communicate the evaluation and the need for additional emergency and external resources to the barracks of jurisdiction.

Secure the Scene

- Secure the scene by whatever means available (cruiser, issued flares, etc.) to prevent further injury or property damage to the motoring public.

Perform First Responder Duties

- Provide trained basic medical care (e.g. CPR, first aid) until the arrival of more qualified emergency medical personnel.

Traffic Incident Management Response Framework, continued

Control Scene Access/Egress

- This may include providing escorts for emergency vehicles and equipment necessary for clearing the scene of the injured and any obstructions or hazards in accordance with TRF-22 Escorts and Relays.

Assume Incident Command (IC) Duties until Relieved

- The senior member at the scene shall assume Incident Command (IC) duties until the appropriate IC agency or higher ranking member arrives. In the event that an actual or serious threat of fire, explosion, or HazMat is encountered, the responsibility for the "immediate scene" shall fall to the Senior Local Fire Department Official. Department personnel should be aware that IC shall be transferred back to the Department once the fire, threat of fire or Hazardous Material has been removed and the scene deemed safe.

Support Unified Command as Necessary

- Paramount to the successful management of any critical incident is cooperation among all of the agencies participating in the operation. Department members shall be aware that IC might be rotated with an official of another agency (such as Fire or the Massachusetts Department of Transportation).

Implement Alternate Routes

- Redirect the flow of traffic from the incident when necessary. Members are reminded that when alternate routing is initiated, which may affect local communities, additional personnel may be needed to augment the local police department at strategic locations to safely move large volumes of traffic within the local community. The police department(s) of jurisdiction impacted shall be notified by the desk officer when alternative routing/traffic diversion may impact their area(s) of operation. When available, pre-planned traffic diversion plans should be utilized.

Assist the Public Information Coordinator

- The Department's Media Relations may dispatch qualified personnel to the scene of major incidents, if available, to support on-scene personnel. The IC should designate a Public Information Coordinator, normally a member from Media Relations when available, to interface with the media at the incident and identify a designated staging area for the media.

Conduct Incident Investigation

- The assigned patrol of jurisdiction, initial responding member or a member designated by the Incident Commander (IC) shall complete any and all reports required pursuant to established Department policy and procedure.

Traffic Incident Management Response Framework, continued

Participate in After-Action Review/Debriefing

- All applicable Department personnel involved should be made available for any after-action review to discuss their roles and actions during the management of the entire incident.

Traffic Control

When conducting manual traffic control, members should ensure that their presence and purpose are clear and obvious, and that they use traffic direction and control signals that are easily understood to ensure the safe and efficient flow of traffic.

Members conducting manual traffic direction/control at crash investigations or other roadway or critical incidents shall:

- Wear issued traffic vest or coat with high visibility side out and employ a flashlight when warranted;
- Adapt methods to changing and/or adverse road and weather conditions;
- Position themselves in a safe location so they are aware of and visible to oncoming traffic;
- Stand straight, with a military-like bearing facing traffic, and be alert to their duties and conditions around them;
- Use clear and simple hand/verbal signals to direct traffic;
- Start or stop one lane of traffic at a time on multiple lane roads, before proceeding to start or stop the next lane of traffic; and
- Request additional resources when necessary to ensure the safety of Department members and the public.

At the scene of critical incidents, members should assist by diverting vehicles around or away from the incident and allow medical and fire personnel room to operate. Roadway closures should be as short as possible and quick clearance techniques shall be employed whenever practicable.

Temporary traffic control devices, including portable signs, moveable barriers, and other apparatus, may be deployed to assist members in the safe and efficient flow and control of traffic. This is mainly applicable for pre-planned events, or long-term road closures.

Utilization of pre-planned traffic diversion plans may reduce the length of the road closure.

Motor Vehicle Stops	

Policy

Necessary precautions shall be taken for every motor vehicle stop to ensure the safety of all. Members shall use these guidelines as well as their training and experience to determine specific actions for each situation.

Bias-Based Policing

All motor vehicle stops shall be in compliance with ADM-47 Bias-Based Policing.

Marked Cruiser Motor Vehicle Stops

Members in marked cruisers shall:

- Activate the emergency lights and siren, as necessary;
- Select a safe location, if possible, to stop a violator; and
- Position the cruiser behind the violator at a safe and reasonable distance, or as circumstances require.

Unmarked or Low-profile Cruiser Motor Vehicle Stops

Members operating unmarked/semi-marked cruisers should be aware that motorists might not recognize them as police officers and may refuse or be reluctant to stop. These motorists may drive to areas with increased population, illumination or to a local police station before feeling safe enough to stop.

Members should:

- If in uniform, wear the appropriate cover while signaling the motorist to stop during the contact;
- Request assistance from a marked cruiser if the motorist does not comply; and
- Advise the Troop of jurisdiction or GHQ Communications Center of the situation as people may use cellular phones to call 911 to ascertain the member's authenticity.

Felony Stops

Members making felony or high risk stops shall conduct the stop in accordance with established training guidelines, and if practical:

- Contact the barracks of jurisdiction Desk Officer giving the location, direction of travel, description of the vehicle, the number of occupants, and the reason for the stop;
- Request a Code 1;
- Position the cruiser in a manner that provides protection and cover; and
- Wait for backup to arrive prior to initiating the stop.

Assisting members should not give additional commands, unless necessary for officers' safety. They should remain in position to cover the primary member, who should issue the instructions to the vehicle occupant(s).

Approaching a Vehicle

When approaching a vehicle, members shall be aware of their environment and alert to oncoming traffic. Members shall:

- If in uniform, wear the appropriate cover, unless exigent circumstances are present;
- Ensure the portable radio is on;
- Approach in a manner that affords maximum protection; and
- Remain alert for any sudden or suspicious movement within the vehicle.

Operator Contact

Members shall:

- Speak to the operator from a safe position;
- In accordance with ADM-35 Body-Worn and Cruiser-Mounted Cameras, BWC/CMC members shall make every effort to inform civilians that they are being recorded at the earliest opportunity unless there is an immediate threat to the member's life or safety, making BWC/CMC notification impossible or dangerous. BWC/CMC members should make every effort to notify civilians with language such as "Ma'am/Sir, I am advising you that our interaction is being recorded."
- Request documentation related to the stop;
- Inform the operator of the reason for the stop;
- Remain professional and courteous;
- Avoid unnecessary conversation that may lead to verbal confrontations; and
- Assist the operator to safely re-enter the traffic flow.

Member Safety

Prior to approaching any vehicle or engaging in patrol activities, members with access to an MDT, shall ensure related registration information is electronically documented and/or the location and registration information is broadcast to the desk officer and/or dispatcher via the radio system. Members without access to an MDT shall broadcast the location and registration information to the desk officer and/or dispatcher via the radio system.

Subject: Motor Vehicle Stops	Number: TRF-07

Member Safety, continued

To maximize safety, the operator and occupants of the stopped vehicle shall be instructed to remain in the vehicle except for:

- An arrest;
- Situations where the member has specific articulable facts and reasonable suspicion that cause the member to be apprehensive for their safety or that of the public;
- Specialized enforcement functions;
- When conducting a field interview; or
- Other situations as necessary.

If a member is stopping a vehicle which they have articulable reason(s) to believe may pose a threat to the member or the public, they shall follow the felony stops procedure.

Subject:	
Traffic Citations	

Policy

Traffic citations shall be issued in accordance with Policy and Procedure ADM-04 State Police Authority and Massachusetts General Law (MGL) c. 90C.

Issuance of Citation

The specific enforcement action taken should be predicated upon the offense. Traffic enforcement action should be taken at the time and place of the occurrence, unless:

- The vehicle could not be stopped;
- Additional time or information is necessary to determine the nature of the violation or identity of the operator; or
- Other extenuating circumstances exist at the time of the violation.

Members shall fill out all applicable fields within a citation including:

- The gender of the operator identified utilizing provided information;
- One applicable authorized code when identifying the operator's race; and
- If a non-inventory motor vehicle search is conducted the appropriate block shall be checked "yes or no."

Under no circumstances shall the race block contain unauthorized codes, remain unfilled, or contain inappropriate notations.

Issuing Member's Responsibilities

Members issuing citations shall:

- Utilize electronic citations as a primary means of issuing Massachusetts Uniform Citations. Paper citations may be utilized as an alternate means of issuing a Massachusetts Uniform Citation violation if the electronic citation is not available;
- Complete appropriate sections of the traffic citation accurately and legibly;
- Notify the violator of the specific violation(s) of law and whether the result of the violation is a civil citation, a warning, a criminal summons, or an arrest;

Issuing Member's Responsibilities, continued

- When applicable, explain the rights and requirements imposed by law to the violator upon arrest or issuance of the citation, prior to release. This shall include any optional or mandatory court appearance, whether a violator is allowed to enter a plea or pay a fine by mail, in person or on-line at the Registry of Motor Vehicles or court, and any other information that must be provided to the violator prior to release. An informational packet can augment but cannot substitute for the above information being provided verbally by members;
- For violations involving foreign diplomats/consular officials, military personnel, legislators and out of state residents, adhere to SOC-05 Special Considerations as appropriate;
- For violations involving juveniles, the issuance of citations shall be guided by M.G.L. and other Commonwealth regulations in effect at time of violation;
- Record citation information in the MSP MV Stop / Citation Data Entry located in CJIS Web as soon as practicable, but prior to placement of the physical citation in an unrestricted location;
- Forward the paper citations to the appropriate court/barracks of jurisdiction at or prior to the completion of their tour of duty. If unable to submit due to extenuating circumstance(s) the member shall submit upon the first next available time;
- Ensure the paper Department copy of the citation is submitted to the appropriate court officer; and
- Store completed paper citations in an identified secure area or within control of the barracks desk officer pending retrieval by the court officer on the next business day.

Members assigned to a barracks within the Division of Field Services shall utilize the station code of their assigned barracks in the approved format (e.g., A-1 Andover is SA-1). Members assigned to a section or unit not in Field Services shall use the station identifier approved by their Division Commander.

Court Officer's Responsibilities

Court Officers shall:

- Forward paper warning copies to the Registry of Motor Vehicles (RMV) forthwith;
- Mail or deliver paper civil infraction copies to the Registrar not later than the end of the sixth (6^{th}) business day after the date of the violations;
- Forward criminal complaint/summons to the court of jurisdiction no later than the end of the sixth (6^{th}) business day after the date of the violations; and
- File the paper Department copy.

Supervisor's Responsibilities

Supervisors shall:

- Review citations for accuracy, legibility, and compliance with statutory requirements; and
- Ensure that unacceptable/unprofessional patterns are immediately addressed.

Station/Section/ Unit Commander's Responsibilities

Station/Section/Unit Commanders shall:

- Maintain a control journal for all citation books received and issued;
- Review citations for accuracy, legibility, and compliance with statutory requirements;
- Review the citation data entered into the Citation Entry application by members under their command;
- Submit monthly/quarterly compliance reports as directed by the Traffic Stop Data Collection Technical Support Manual located on DocuShare;
- Ensure all paper citation copies are classified, distributed, and delivered to the RMV and the appropriate court(s), as required by statute;
- Retain all Department paper citation copies in barracks files for a period of three (3) years unless otherwise notified by the Legal Section; and
- Ensure that unacceptable/unprofessional patterns are immediately addressed.

Troop Traffic Programs Officer's Responsibilities

Troop Traffic Programs Officers shall:

- Maintain and forward up-to-date traffic/legal information as appropriate;
- Maintain a control journal for the issuance of citation books; and
- Maintain Monthly Troop Traffic Law Enforcement Statistical Summaries prepared in accordance with the requirements of the Division of Field Services.

Troop/Section Commander's Responsibilities

Troop/Section Commanders shall:

- Review monthly/quarterly compliance reports to ensure that the members under their command are in compliance with the provisions of this policy; and
- Ensure that unacceptable/unprofessional patterns are immediately addressed.

Division Commander's Responsibilities

Division Commanders shall:

- Establish internal guidelines for procedural review to ensure that the personnel under their command are in compliance with the provisions of this policy.

Recreational Vehicles

Members shall take appropriate enforcement action for violations committed by operators of off-road recreational vehicles (snowmobiles, dirt bikes, all-terrain vehicles, etc.,) observed and/or reported to them.

All MGL c. 90B violations shall be entered upon the standard RMV citation, or an application for complaint may be made with the District Court of jurisdiction.

The standard uniform citation can be utilized as a complaint application for a recreational vehicle operated on a public way in violation of MGL c. 90B §25.

Note: If needed, under the Executive Office of Energy and Environmental Affairs, the Massachusetts Environmental Police may be called for assistance at (800) 632-8075.

Voidance of Citations

Paper Citation Voiding

If an error is made while writing a paper citation, or if a citation becomes accidentally damaged, it may be administratively voided by the issuing member. The member shall:

- Print "VOID" on all copies of the citation;
- Provide a full explanation in writing (To/From) before the end of their tour of duty and submit it to their first line supervisor for review; and
- Record the voided citation in the MSP MV Stop / Citation Data Entry located in CJIS Web.

If satisfied with the explanation provided, the supervisor shall approve the "VOIDED" citation and the explanation for such action. The voided citation and explanation shall be returned to the Registrar forthwith.

eCitation voiding

If an error is made in the issuance of an eCitation, it may be administratively voided by the issuing member. The member shall:

- Provide a full explanation in writing (To/From) before the end of their tour of duty and submit it to their first line supervisor for review;
- The supervisor, if satisfied with the written explanation, shall electronically void the citation; and
- The To/From, shall be kept on file at the barracks and shall constitute the record of justification for the citation voidance. In order to ensure the Department retains the original To/From and to comply with records retention obligations, the To/From ***shall not*** be forwarded to the Registrar and/or the Merit Rating Board (MRB).

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**TRF-09**
Subject:	
Towing	

Policy

Public safety is the Department's primary concern and shall guide the application of this policy. When authorized to remove vehicles, members shall remove such vehicles to a location which shall ensure the safety and well-being of the occupants, security of the vehicle, and allow for safe and efficient flow of traffic.

All members and approved Tow Service Providers (TSPs) shall adhere to and comply with the Department of State Police SP-357 Tow Service Agreement (for those Troops/Tow Zones operating under the legacy Agreement), and/or the Massachusetts State Police Tow Contract (for those Troops/Tow Zones which have transitioned to the new Tow Contract).

Category I services are defined as Towing/Recovery/Service of vehicles or combinations ≤ 10,000 GVWR/GCWR, such as Passenger Automobiles, Light Trucks/Vans, Trailers, Motorcycles, Mopeds, or Motor Scooters.

Category II services are defined as Towing/Recovery/Service/HAZMAT of vehicles or combinations >10,000 GVWR/GCWR, such as Commercial Trucks, Truck Tractors, Tractor/Trailer Combinations, Trailers, Machinery, Campers/Motor Homes/Recreational Vehicles, and Buses.

Note: For those Troops under the legacy Tow Service Agreement providing for towing under Category II (Medium Duty) specifications, they shall abide by that Agreement.

Members assigned to Troop F shall adhere to Massport towing regulations.

Purpose

To establish and define guidelines for State Police members engaged in towing vehicles.

Causes for Removal

Members are authorized to remove (or cause to be removed) a vehicle found upon any way, or on private property without the consent of the property owner, when the vehicle is:

- Stolen or taken without the owner's consent;
- Disabled as to constitute an obstruction to traffic and/or is an obvious hazard;
- Improperly parked or standing in violation of a state or municipal law or regulation (i.e. within the limits of any State Highway for a period of time exceeding 24 consecutive hours);
- Not validly registered or insured in violation of law;
- In its current condition, is too hazardous or dangerous to be driven; and/or
- Impounded/towed pursuant to MGL or state or federal court order.

Additionally, members are authorized to remove (or cause to be removed) a vehicle found upon any way, or on private property without the consent of the property owner, when the operator is:

- Arrested;
- Not properly licensed;
- Impaired by the consumption of alcohol, drugs or any other substance, or by any medical condition;
- Unable or otherwise unfit to safely operate the vehicle,

AND

- There is no alternative operator present who could assume lawful custody of the vehicle; and
- After inquiry by the member, the owner or authorized driver cannot direct the member to dispose of the vehicle in some lawful and reasonable manner[1].

Additionally, members are authorized to remove (or cause to be removed) any vehicle found upon a road/state highway when adverse weather conditions or other emergency reasons necessitate the removal in the interest of public safety, or when requested by the Massachusetts Department of Transportation, or other agency having jurisdiction over maintenance of the roadway.

Any vehicles located on private property in situations not addressed above, including abandoned vehicles on private property, are a civil matter between the property owner and the vehicle owner, and shall be addressed as per MGL c.266 §120D.

Public safety is of paramount importance when considering the time, manner, and method of off-loading and/or towing a large vehicle. The key determinants are current and impending road, weather, and traffic conditions.

All crash/recovery scenes should be cleared as quickly as possible in order to return the highway to its normal traffic flow. If necessary, cargo may be pulled/pushed to adjacent shoulders/medians before the vehicle is towed.

[1] If the operator has refused a breathalyzer, the member must impound the vehicle for a minimum of 12 hours pursuant to M.G.L. c. 90, §24(1)(a)(4)(f)(iii).

Causes for Removal, continued

The off-loading and/or towing of large trucks involved in crashes and recoveries on high density/congested roadways should be avoided during peak commuter hours, as it may contribute to additional delays and/or secondary crashes.

Responsibilities of the Member Towing a Vehicle

Prior to notifying the tow company, members shall inquire whether the owner or authorized driver can direct the member to dispose of the vehicle in some lawful and reasonable manner, unless the operator has refused a breathalyzer test, in which case the vehicle shall be impounded for a minimum of 12 hours. Members shall also inquire if there is a preference for a particular tow company or roadside service organization. Factors to be considered with regard to the reasonableness of the manner proposed include, but are not limited to:

- Weather conditions;
- Whether traffic conditions require immediate removal;
- Time of day;
- Whether the situation requires expediency; and
- Whether the removal of the vehicle as proposed by the owner or authorized driver would be unreasonably long in the opinion of the on-scene officer(s)' and safety dictates its removal.

When no request for preference is expressed, the member shall inform the Station Desk Member who will dispatch a TSP from the Station's Tow Company List that is approved to provide the required service. For troops/tow zones operating under the new Tow Contract, the next-in-line TSP for that zone will be dispatched.

In the case of an incident which overlaps multiple tow zones within one barrack's area, or multiple barracks' areas, selection and dispatch of a TSP will be made by the barracks entering the call in RAMS.

Depending upon time of day, weather, or other variables, the member shall remain with a disabled vehicle and its occupants until assistance arrives, or until the member is assigned to a higher priority call for service. The member may transport the occupants to a safer location to make their own arrangements, if it is agreeable to the occupants.

If the member at the scene makes an informed observation that a particular on-scene TSP is unable to safely remove a vehicle he/she may request the services of the next in line approved TSP. If there is no next in line, the closest available approved TSP capable of handling the job shall be contacted.

When applicable, members shall inventory the towed vehicle in accordance with TRF-10 Vehicle Inventory.

Responsibilities of the Member Towing a Vehicle, continued

A towed motor vehicle shall only be placed on an investigative hold pursuant to:

- Melanie's Law (12 hour hold for Operating Under the Influence of Alcohol arrest with a breathalyzer refusal);
- Probable cause that the towed motor vehicle is a piece of evidence;
- Pending the application for and execution of a search warrant; or
- A directive from the District Attorney's Office, Attorney General's Office, or United States Attorney's Office.

A towed vehicle may not be held beyond ten (10) days, unless otherwise ordered in writing by a Court, the District Attorney's Office, the Attorney General's Office, or the United States Attorney's Office.

Any request for an investigative hold must be communicated to the TSP at the time of the tow. This notice will be documented on form SP-357C, with a copy maintained at the barracks of jurisdiction. The SP-357C shall be approved by a supervisor for all investigative holds, other than for Melanie's Law. In addition, the member must provide a copy of the approved written notice to the TSP prior to the end of his/her shift.

Responsibilities of the Station Desk Member

The Station Desk Member shall appropriately record the following via RAMS:

- The registration number and state;
- The location from which the vehicle was towed from including time and date;
- Make and description of the vehicle;
- The cause for removal;
- The name or identification number of the member or proper authority requesting such removal; and
- The towing company name, and the location to which the vehicle was moved.

Furthermore, the Station Desk Member shall properly classify tows/calls for service that are not provided by a contracted TSP, such as: owner request, motor clubs or help vans.

The member requesting the tow shall notify or cause to be notified, the owner of record as soon as possible, of the location of the vehicle and the reason for which it was towed.

Responsibilities of the Station Commander

The Station Commander shall ensure the effectiveness of the towing process by monitoring personnel and TSP resources operating under his/her command. The Station Commander shall:

- Establish separate lists for Category I and Category II operations;
- Establish a tow rotation within each tow zone having multiple TSP's;
- Rectify any substantiated claims of a missed or skipped call of a TSP;
- Request staging of tow trucks in specific areas for unusual demands for service;
- Assist TSP's with the administration of this policy and the associated towing contract(s);

Responsibilities of the Station Commander, continued

- Maintain records (SP-357C) of all vehicles held for investigative purposes;
- Ensure adequate log entries are made via RAMS; and
- Appoint a Station Tow Member to assist with the administration of this policy.

Responsibilities of the Station Commander ***in Troops/Tow Zones operating under the legacy Tow Service Agreement***

Station Commanders shall establish a Station Tow Company List based upon fair and equitable standards including, but not limited to: minimum response times, the maximum allowable number of tow companies, and the provisions of this policy.

Fair and equitable standards shall include, but not be limited to, the following:

- A consideration of the financial and administrative burden of maintaining and administering the Station Tow Company Lists;
- The public interest and necessity for the prompt removal of wrecked, crashed, and disabled vehicles from the roadway;
- The maximum number of tow companies on a Station Tow List shall not exceed ten companies unless authorized by the Troop Commander; and
- Any additional factors that a Station Commander deems reasonably necessary.

Station Commanders shall appoint a Station Tow Member to assist with the administration of this policy and to maintain records of all tow agreements and associated documents.

Station Commanders, in conjunction the Division of Administrative Services, will direct an investigation be conducted related to any SP-358 received alleging violations of the Tow Service Agreement SP-357.

Station Commanders shall be responsible for the oversight of station tow companies in their station areas and may suspend, terminate, and/or place on probation any station tow company consistent with the requirements of the State Police Tow Service Agreement SP-357.

Subject: Towing	Number: TRF-09

Responsibilities of the Troop Commander

The Troop Commander shall ensure the effectiveness of the towing process by monitoring personnel and TSP resources operating under his/her command. The Troop Commander shall:

- Order an immediate indefinite suspension without advance notice for an event where a TSP's actions have resulted in a threat to public safety or resulted in criminal action being sought against the company or any of its representatives;
- Notify the Division of Administrative Services of any suspensions ordered via the SP-358 process; and
- May establish amended Tow Zones for special events, natural or man-made disasters, states of emergency, weather events, or other unforeseen events in order to maximize public safety and reduce response times.

Complaints

All complaints, or allegations of violations of the Tow Service Agreement or Massachusetts State Police Tow Contract generated by members of the Department, the public, or a Tow Service Provider shall be immediately documented via an SP-358.

Complainants may obtain and submit a SP-358 by the following means:

- Accessing the State Police Tow Portal at https://www.mass.gov/state-police-towing
- Mail or hand-deliver to: Division of Administrative Services, 470 Worcester Rd., Framingham, MA 01702;
- Via email to towingresponsereports@pol.state.ma.us;
- By calling the Division of Administrative Services at (508) 988-7018; or
- Via fax to (508) 820-2359.

Subject: Towing	Number: TRF-09

Responsibilities of the Division of Administrative Services

The Division of Administrative Services (DAS) will provide administrative and fiscal oversight of all tow issues related to Troops/Tow Zones which have transitioned to the Massachusetts State Police Tow Service Contract. DAS shall:

- Establish and validate Tow Zones based upon input from Station Commanders relative to the number of crashes, requests for service, traffic volume, high-demand events or venues, and other measurable demands for service. Tow Zones shall remain fixed for the duration of the Tow Service Contract period. Tow Zones shall either be assigned to one specific approved TSP or to several TSPs based upon the contract award. If multiple companies are awarded a single zone, each shall be assigned on a per-incident rotation schedule;
- Recieve requests for inclusion in the Tow Contract;
- Evaluate new applications for Tow Contracts;
- Conduct independent, random audits of tow bills submitted by TSPs;
- Conduct initial and annual announced inspections of TSPs and prospective TSP's financial, insurance and employee records, as well as equipment and facility compliance;
- Conduct random unnanounced inspections of TSP's financial, insurance and employee records, as well as equipment and facility compliance; and
- Investigate all complaints forwarded via SP-358 regarding TSPs and this policy, determine violations of the Tow Contract, and take appropriate corrective action, if warranted.

Responsibilities of Tow Service Providers

TSPs must follow all applicable federal, state and local laws, and remain in compliance with the Tow Service Agreement (SP-357) and/or Massachusetts State Police Tow Contract at all times. Failure to maintain these standards may result in the immediate removal from all Department tow lists without advance notice.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**TRF-10**
Subject:	
Vehicle Inventory	

Policy

Any vehicle towed, or in the custody of the Department, shall be inventoried and properly documented in order to protect:

- The vehicle and its contents;
- The Department and tow company against false claims of lost, stolen, or vandalized property; and
- The member(s) and the public from dangerous items that might be in the vehicle.

When to Inventory a Vehicle

An inventory is a non-investigative procedure in which the contents of a vehicle are itemized, and the condition of the vehicle is noted.

The Department shall inventory any vehicle towed, removed, or impounded:

- As outlined within TRF-09 Towing;
- When involved in a crash, and the owner is unable to care for it;
- Pursuant to a lawful arrest when the vehicle would be left unattended; or
- As a seizure.
  - The vehicle is subject to statutory forfeiture or lawful seizure pursuant to a governmental interest, such as:
    1. A seizure pending forfeiture;
    2. Company or corporation distress warrant; or
    3. The vehicle was used in the commission of a crime, as an instrument of a crime, or is stolen.

The inventory process should be conducted at the scene before towing the vehicle. If the scene is not safe or practical, the process may be done at another location, however the inventory shall be done within a reasonable period of time.

Inventory Not Necessary

A motor vehicle inventory need not be taken if the vehicle is:

- Legally parked and locked;
- Abandoned and locked;
- Removed by a third party as outlined in TRF-09; or
- Disabled with the operator and/or occupants present

Subject:	Number:
Vehicle Inventory	**TRF-10**

Inventory Procedure

The standard inventory procedure shall consist of a detailed inspection of the interior and exterior of the vehicle for damaged and missing parts, as well as to locate and record the contents of the vehicle. The following areas shall be inventoried:

- The interior of the vehicle;
- The glove compartment and trunk (unless they are locked and there is no key available); and
- The exterior of the vehicle for missing or damaged parts.

The inventory listing of personal items and valuables shall extend to all storage areas and compartments that are accessible to the operator or occupants. This encompasses:

- All open areas, including the floor areas, the area in and around the instrument panel and the rear deck above the rear passenger seat, the open area under the seats, the glove compartment and trunk, and other places where property may be kept.

All closed but unlocked containers shall be opened, and each article inventoried individually.

Locked containers shall be inventoried as a single unit.

If an owner and/or operator requests to remove or entrust their possessions to another person, without it impeding the towing or impoundment process, such request may be granted, unless the member has probable cause to seize the items.

Search Warrants

A search warrant shall be obtained before the search of a locked container or forcing open a locked glove compartment or trunk, unless:

- Consent to open the container is obtained from its owner; or
- The member has probable cause to believe that such locked container shall put the member or others at immediate risk of injury or loss of life.

Responsibilities

Positions	Duties

Members	• Locate and secure any monies or articles of value that cannot be secured by the tow company;
	• Accurately record on the motor vehicle inventory form a complete listing of the general condition of the vehicle and its contents;
	• File the form in the barracks of jurisdiction;
	  o Records shall be kept for one (1) year; and
	  o Filed by date.

Subject:	Number:
Vehicle Inventory	**TRF-10**

Responsibilities, continued

Positions	Duties
Members	• A copy of the form may be filed with any report of investigation; • Make, or cause to be made, any necessary administrative journal entries; • Ensure that all articles taken for safekeeping are stored in an appropriate container and secured in the barracks of jurisdiction or with the owner; and • An article of value may be left with the vehicle, if the owner so requests, by storing it in the trunk.
Station Commanders	• Provide a central location for members to file the motor vehicle inventory forms, and periodically review the forms for compliance with this policy; and • Ensure that property secured during the inventory procedure is returned to the rightful owners, as appropriate, and not kept longer than necessary.
Troop Commanders	• Strictly enforce the motor vehicle inventory procedure in order to avoid arbitrary application of the policy.

Department of State Police
General Order

Effective Date:	Number:
June 27, 2023	**TRF-11**
Subject:	
Automatic License Plate Recognition	

Policy

The availability and use of Automatic License Plate Recognition (ALPR) technology provides opportunities to increase public and officer safety and to enhance the effectiveness of law enforcement agencies. The use of ALPR technology shall be approved by the Colonel/Superintendent or designee.

The Department shall only utilize ALPR technology in furtherance of official and legitimate law enforcement operations and public safety. All Department employees shall abide by the guidelines set forth herein when using ALPR systems.

Purpose

To establish guidelines and procedures for the proper use and application of ALPR technology within the Department of State Police, and to provide guidelines and principles for the collection, access, use, dissemination, and retention of ALPR information to ensure that this information is used only for legitimate law enforcement purposes and the privacy, civil rights, and civil liberties of individuals are not violated.

Definitions and Acronyms

Alert: A visual and/or auditory notice that is triggered when the ALPR system receives a potential hit on a license plate.

ALPR Data: Data generated by ALPR devices, including the license plates observed by the ALPR device, the date and time of reads, the ALPR device that sourced the reads, and related data.

Automatic License Plate Recognition (ALPR): Automatic license plate recognition (also commonly referred to as automated license plate reader) technology uses cameras to capture images of license plates and computer algorithms such as Optical Character Recognition (OCR) to convert the images to readable text data. ALPR systems can also compare the recognized license plates to Hot Lists such as Criminal Justice Information System (CJIS) and National Crime Information Center (NCIC) Hot File databases.

Exigent Circumstances: Emergency situations involving imminent and immediate threat to the safety, health, and well-being of an individual or the public based on specific, reasonable intelligence. Such emergency situations shall include, but are not limited to, terrorist threats, Amber Alerts, Silver Alerts, kidnappings, missing persons, and felons traveling to or from a crime scene.

Definitions and Acronyms, continued

Hit: A match between a license plate observed by an ALPR camera and a record maintained on a Hot List.

Hot List: License plate numbers of vehicles of interest, such as stolen vehicles or stolen plates, vehicles associated with missing or endangered persons, AMBER & Silver alerts, kidnappings, wanted fugitives, and others of specific interest to law enforcement that have a license plate number associated to them, including vehicles which are the subject of ongoing public safety or criminal investigations that are entered by the Department or an authorized officer.

Non-Departmental ALPR Systems: ALPR systems which are not managed, purchased, or subscribed to by the Department.

Optical Character Recognition (OCR): The technology that supports the automated reading and digitizing of images of license plates that are captured by the ALPR System.

Authorized Uses

This policy is provided to support authorized uses of ALPR information. Authorized uses shall include the following:

- Enhance the Department's AMBER/Silver and other law enforcement alerts programs, situation awareness, and real-time response capability by deploying ALPRs to more rapidly identify and locate vehicles related to potential child abductions, kidnappings, missing persons, or other emergency situations or serious crimes;
- Support the Department's homeland security mission through the investigation, prosecution, and prevention of terrorist incidents and the protection of critical infrastructure and locations that allow for travel and the free flow of commerce from subjects who intend to damage or disrupt the systems;
- Support law enforcement response to critical incidents and the protection of high-profile public events or locations which may be a potential target of a terrorist attack or mass-casualty incident;
- Protect the safety of the motoring public and alert law enforcement in real-time that a particular license plate (e.g., a stolen vehicle or a vehicle associated with a wanted individual) is in close proximity to an ALPR to dramatically reduce the recovery time of stolen vehicles, aid in the removal of unsafe vehicles and operators from the roadway, and assist in locating dangerous and wanted individuals;
- Support the Department's public safety mission through the investigation and prosecution of suspected criminal (including terrorist) incidents;
- The follow-up investigation of motor vehicle pursuits which have been terminated for public safety reasons or when an unlawfully fleeing subject escaped apprehension;
- Support local, state, federal, and tribal public safety agencies through the use of ALPR technology as allowed by this policy; and
- Support other lawful Department public safety operations, as directed by the Colonel/Superintendent or designee.

Prohibited Uses

The Department will prohibit access, use, or dissemination of ALPR information for:

- Any purpose that knowingly violates the Constitutions or laws of the United States or the Commonwealth of Massachusetts, including the protections of the Fourth Amendment;
- Based solely on an individual's or organization's religious, political, or social views or activities; their participation in a particular noncriminal organization or lawful event; or their race, ethnicity, citizenship, place of origin, age, disability, gender, gender identity, sexual orientation, or other classification protected by law;
- Non-law enforcement or personal purposes;
- The purpose of prohibiting, infringing upon, or deterring individual activities protected by the First Amendment, such as freely practicing one's religion, freedom of speech and peaceful assembly, freedom of the press, and the right to petition the government for the redress of grievances;
- Harassing, targeting, and/or intimidating any individual or group by means of camera placement or data use in a discriminatory manner;
- The sole purpose of locating or removing persons due to their citizenship or immigration status; and
- Any other access, use, disclosure, or retention that would violate applicable law, regulation, or policy.

ALPR Administrator

The Division Commander of the Division of Homeland Security and Preparedness shall:

- Designate a Commissioned or Non-Commissioned Officer as the ALPR Administrator; and
- Ensure the ALPR Administrator has oversight for the ALPR System deployment, operations, and maintenance.

The ALPR Administrator shall:

- Manage access to the ALPR system and conduct or authorize training for designated personnel in the use and operational protocols of the ALPR system;
- Coordinate with all Divisions and appropriate personnel to ensure that resources are available and deployed to meet Departmental needs;
- Maintain proficiency and familiarity with ALPR technology and systems, coordinate with other law enforcement agencies, and assist with investigations involving ALPR;
- Ensure that designated, trained personnel install equipment, check equipment on a regular basis to ensure functionality, and remove from service any equipment that falls outside expected functionality until deficiencies are corrected;
- Conduct testing and evaluation of ALPR systems and coordinate the purchase, deployment, and installation of ALPR systems and equipment;
- Conduct intermittent audits of ALPR system usage to ensure functionality and policy compliance; and
- Ensure that any substantive changes in policy or law are the subject of in-service training or bulletins.

Legal Considerations

In additional to the procedural safeguards outlined by this policy, members should conduct ALPR inquiries in the least intrusive manner as necessary and appropriate for the particular circumstances and should consider consulting with a prosecutor of jurisdiction regarding the potential need for legal process prior to accessing extensive or widespread ALPR data in active criminal investigations that do not involve exigent circumstances. See Commonwealth v. McCarthy, 484 Mass. 493 (2020).

Search Procedures

The Commonwealth Watch Center (CWC) and Commonwealth Fusion Center (CFC) shall serve as the primary ALPR resource for the Department. Search requests submitted to the CWC/CFC shall include, at a minimum:

- Case number or reference;
- Type of investigation or reason for request;
- Plate number(s) and vehicle description (if available);
- Requested search time period; and
- Requested search area (devices or region).

Searches of the ALPR system shall also observe the following guidelines:

- Properly complete justification fields;
- Limit search parameters to be reasonable and consistent with the geographic and temporal needs of the incident or investigation; and
- Document the parameters of the search.

The member who conducts or requests the search is responsible for ensuring that the procedures herein are followed. CWC/CFC may deny or refer to the ALPR Administrator any requests that they believe to be overly intrusive or otherwise inconsistent with law, policy, or best practices.

Manual Hot List Entries

Manual entries of a license plate onto a Hot List may include vehicles associated with:

- AMBER or Silver Alerts;
- Missing child, missing person, or kidnapping broadcasts or bulletins;
- Incapacitated or endangered persons;
- Be-On-Look-Out (BOLO) broadcasts or other public safety alerts;
- Investigation of terrorist or criminal offenses; or
- Wanted persons, arrest warrants, or search warrants.

Manual entries onto a Hot List shall be:

- Entered with the vehicle description, if available;
- Entered with a case number or reference;
- Updated or removed when information changes, is no longer current, or is no longer necessary or reasonable;
- Given special attention to rental and short-term use vehicles;
- Given special attention to incidents that may be quickly resolved;
- Entered with an automatic expiration date no longer than thirty (30) days; and
- Approved by a supervisor, except in exigent circumstances.

Manual Hot List Entries, continued

Designated and trained ALPR system users may conduct manual Hot List entries. All others should contact the Commonwealth Watch Center for assistance. The member who enters or requests a manual Hot List entry shall be responsible for ensuring that the information is removed per the guidelines above.

Mobile Operations

Department members operating a cruiser that is equipped with a mobile ALPR System shall:

- Ensure, at the start of each shift, that the ALPR system is activated and online, unless such use is incompatible with the member's duties at the time, the system is malfunctioning, or authorized by a supervisor;
- Ensure, upon activation of the ALPR system, that the ALPR system has been updated with the most current hot lists available;
- Verify, prior to use, the aim of the ALPR camera(s) to ensure it is focused on the correct lanes of traffic;
- Ensure ALPR equipment is cleaned and maintained according to the manufacturer's recommendations; and
- Notify the ALPR Administrator of any malfunctions promptly.

Hit/Alert Confirmation

Prior to initiation of a stop or enforcement action based upon an ALPR hit or alert, members shall confirm the hit or alert, to include:

- *Verify the plate:* Visually verify that the vehicle plate matches the ALPR system's interpretation;
- *Verify the state:* Visually verify that the state of the vehicle plate matches the state of the plate in the Hot List information; and
- *Verify the status:* Verify the current status of the plate that generated the hit/alert (e.g., is the vehicle still stolen), through:
    - Criminal Justice Information System (CJIS);
    - National Crime Information Center (NCIC);
    - Department's Records Management System (RMS); or
    - Another appropriate source of data.

Use of Non-Departmental ALPR Systems

In the course of their official duties, members may contact other law enforcement agencies to request assistance with information, records, or data from non-departmental ALPR systems.

Supervisors and analysts assigned to the Commonwealth Watch Center/Commonwealth Fusion Center and the ALPR Administrator may access non-departmental ALPR systems for official law enforcement purposes as authorized by this policy. Other members, through their position with the Department, shall not obtain accounts with non-departmental ALPR systems unless authorized by the Division Commander of the Division of Homeland Security and Preparedness.

Members shall be mindful that non-departmental ALPR systems may use different technology, retention, and quality assurance standards than the Department's ALPR system. Members shall be mindful to preserve, export, or obtain copies of records or reports that are of known relevance to an incident or investigation prior to the expiry of the records.

Requests for Equipment and Accounts

Requests for the deployment or issuance of ALPR equipment or system accounts shall be directed through channels to the ALPR Administrator.

The ALPR administrator will approve, deny, or forward requests for deployment, equipment, and accounts as authorized under this policy, based upon the state-wide needs of the ALPR program, the availability of suitable equipment and personnel, and/or as directed by the Division Commander of Homeland Security and Preparedness.

Data: PII, Sharing, and Retention

License plate numbers and date/time location records collected by an ALPR do not identify the individual operating or associated with a vehicle. Investigators may be able to link an individual to a vehicle through, or in combination with, additional information from other sources, such as a check of vehicle registration records or other investigative steps. It is thus the investigative process that may identify individuals and not solely a reliance on the information obtained from the ALPR system's automated observation of license plate characters. The Department protects all ALPR information as personally identifiable information (PII) because ALPR information may be combined with other information to identify a unique individual.

The Department and members shall not share ALPR data with or provide ALPR data to any person, entity, or agency, other than a law enforcement agency with an originating agency identifier (ORI) making a request for official purposes, unless such disclosure is authorized by law or court order or is required by rules of Massachusetts or federal courts governing discovery in criminal matters.

Data contained in the ALPR system may include data contributed by other law enforcement agencies. Agencies that are authorized to share data with the Department and/or access the Department's ALPR system shall be subject to the provisions of this policy or any superseding MOU or agreement in regard to use of the Department's ALPR system. Such outside agencies are responsible for their own designation, management, and supervision of that agency's system users, equipment, and any other systems or databases.

The ALPR system does not collect or retain video or audio recordings or intentional photographs of any individuals.

Retention of data shall be determined by the Department of Criminal Justice Information Services (DCJIS) policy. Members shall be mindful to preserve, export, or obtain copies of records or reports that are of known relevance to an investigation or prosecution prior to the expiry of the records.

2233

Data: Quality Assurance

Original ALPR information will not be altered, changed, or modified in order to protect the integrity of the data. Any changes will be maintained as a separate and additional record, and such record will be identified as having been modified.

The Department will correct, notate, delete, or refrain from using ALPR information the Department originated and found to be erroneous or deficient. Originating agencies external to the Department are responsible for reviewing the quality and accuracy of the ALPR information provided to the Department and must take reasonable steps to correct or amend the information upon learning that it is inaccurate or deficient. The Department will advise the appropriate points of contact, in writing or electronically, if the Department's ALPR data is found to be erroneous or deficient.

The Department will ensure that appropriate protocols are utilized by the ALPR system to allow for the verification of the accuracy of ALPR read times, which may include the use of a watermark or other observable system indicator. In the event that system time is not verifiably synchronized for a particular read, the reported time should be corroborated using other data or observations to ensure accuracy prior to use in an investigation or legal proceeding.

Data: Security & Audit

The following shall apply to ALPR system and information security:

- Access to the Department's ALPR system will be granted only to sworn or civilian personnel whose positions and job duties justify such access, who have successfully completed a pre-employment background check, and who have completed appropriate training as designated by the ALPR Administrator, to include discussion of best practices and privacy considerations;
- Usernames and passwords to the ALPR system are not transferrable, must not be shared by Department personnel, and must be kept confidential; the only exception to this requirement is for mobile ALPR systems in pool cruisers in use by outside agencies, in which case the credentials can be used to activate the in-car camera system only and not to access or search the database; in such case the agency must maintain another tracking mechanism to identify the specific system operator, if needed;
- Queries made to the Department's ALPR system will be logged into the system identifying the user initiating the query. All user access and queries, including participating agencies' access, are subject to monitoring, review, and audit at any time;
- Abuse of the Department's ALPR system will result in termination of system access and progressive disciplinary action; and
- The Department will ensure that ALPR data is stored in a secure manner, on CJIS-compliant systems or servers, in a manner that ensures that it cannot be added to, modified, accessed, or purged except by personnel authorized to take such actions.

Policy Review

Existing technology may progress, and new technology may develop, giving rise to both legal and technological changes. The Department will monitor and assess the appropriateness of this policy and make amendments as necessary.

The ALPR Administrator shall:

- Annually review this General Order and the procedures contained herein; and
- Make recommendations for any necessary amendments through channels to the Colonel/Superintendent or designee.

Reservations

These guidelines are set forth solely for the purpose of internal Department guidance. They are not intended to, do not, and may not be relied upon to create any rights, substantive or procedural, enforceable at law by any party in any matter, civil or criminal, nor do they place any limitation on otherwise lawful investigative and legal prerogatives of the Massachusetts State Police or the Commonwealth of Massachusetts.

Department of State Police
General Order

Effective Date:	Number:
November 10, 2021	**TRF-12**
Subject:	
Crash Investigations	

Policy

To establish guidelines for traffic crash reporting and investigations.

Definitions

Commercial Motor Vehicle: A motor vehicle used in commerce, and designed or used to transport passengers or property, which has a gross vehicle weight rating (GVWR) of 10,000 or more pounds, or which is designed to transport more than eight (8) passengers (including the driver), or which transports hazardous materials and is required to be placarded in accordance with federal law.

Crash: A motor vehicle collision with any other vehicle, object, or person.

Crash Investigation: The systematic recording and examination of the involved vehicles, the roadway, and human factors, to determine the cause of the collision, contributing factors, and determination of violations of law.

Crash Reconstruction: The technical analysis of all available information and physical evidence to determine how and potentially why the crash occurred.

Crash Reporting: The basic data collection needed to identify the operators and the particulars of every crash referred to in Massachusetts General Laws (MGL) c.90 § 26.

Eligible Person: A resident of Massachusetts who is an operator or an occupant of a vehicle that strikes a deer.

Serious Bodily Injury: Injury that involves a substantial risk of death, permanent or protracted disfigurement, or extended loss or impairment of the function of a body part or organ.

Reporting Requirements

Members shall conduct an on-scene investigation and complete Registry CRA-65 Motor Vehicle Crash Police Report whenever a crash results in:

- A death;
- Personal injury;
- Any violation of law exists to include impairment due to alcohol or drugs;
- Any damage occurs to a Federal/State/Municipal vehicle; or
- Property damage per MGL c. 90 § 26 to include hit and run crashes.

Reporting Requirements, continued

For crashes not meeting the above requirements members should assist the operator(s) with the exchange of any pertinent information while continuously managing and expeditiously clearing the crash scene consistent with TRF-05 Traffic Incident Management. Members may utilize a SP 256 Crash Data Exchange Form to facilitate the exchange of pertinent information.

Station Desk Officer

Desk Officers shall:

- Dispatch members as needed to respond to the scene of any reported crash;
- Make an entry into the Daily Administrative Journal (DAJ) on all calls for service with appropriate findings;
- Make every attempt to identity callers for investigative purposes;
- Contact the Massachusetts Department of Transportation (Mass DOT) to respond with necessary equipment (such as arrow boards, cones, curiosity screens, message boards, signage, etc.);
- Notify the Troop Duty Officer of any crash where extended lane closures are anticipated and/or any crash involving serious or fatal injuries;
- Ensure Media Relations is made aware of any serious injury or fatal crash by faxing the SP 640 Serious Crash Fact Sheet directly to Media Relations and GHQ Communications; and
- Ensure the Registrar of Motor Vehicles is notified of all crash fatalities through the CJIS "FATAL" screen.

Responding Members

All responding member(s) shall:

- Exercise sound judgment in proceeding to the scene, but should respond expeditiously, to prevent any issues between the subjects involved or any secondary crashes from occurring;
- Position the cruiser and/or flares in such a manner as to provide maximum protection for the crash scene;
- Advise dispatch and/or the Troop Duty Office of any lane closures;
- Render first aid to injured subjects, pending arrival of emergency medical personnel;
- Direct traffic safely around the crash scene;
- Retain charge of the scene pending the arrival of the assigned patrol, department of jurisdiction, or any supervisory personnel;
- Ensure damaged vehicles are towed consistent with TRF-09 Towing;
- Prior to departing the crash scene, ensure roadway is clear of debris e.g., flares, cones; and
- Expedite quick road clearance consistent with TRF-05 Traffic Incident Management.

Primary Investigating Member's Responsibilities

In addition to the above duties the primary investigating member should:

- Conduct a preliminary investigation and comply with all reporting procedures;
- Take appropriate enforcement action when sufficient evidence exists;
- Notify the Desk Officer if the crash results in serious injury or death;
- When applicable, utilize findings and measurements determined by the Collision Analysis and Reconstruction Section (CARS) member as the official record for reference throughout the investigation;
- Request the Desk Officer make an entry into the DAJ documenting the time the crash was cleared and when traffic flow returns to normal; and
- Submit a CRA-65 Motor Vehicle Crash Police Report to a supervisor, within ten (10) days for approval.

Troop Duty Officer

Upon notification of a crash resulting in serious injury or death, notify:

- CARS;
- Crime Scene Services;
- The District Attorney's Office of jurisdiction; and
- Media Relations.

Troop Duty Officers shall follow the CARS call-out protocol set forth by the CARS Commander.

Note: Ensure that Mass DOT has been contacted to respond with necessary equipment whenever CARS members are responding to crashes on limited access highways.

Station Commander

Station Commanders shall:

- Review all reports for accuracy, completeness, and legibility; and
- Ensure the reports are forwarded to the Registrar of Motor Vehicles within fifteen (15) days.

Crash Reported at Construction Sites

When a crash occurs at the scene of a construction detail under the control and jurisdiction of the Department, the Desk Officer shall:

- Dispatch a patrol to investigate and take appropriate action; or
- Assign the member working the detail to investigate if that member is not involved in the crash, and when no patrol is available.

Reports for Death or Serious Injury

Motor vehicle crashes occurring on a public way resulting in death or serious injury require an incident report that may include:

- Observations from eye witnesses;
- Observations of hospital personnel;
- Forensic evidence of operation such as fingerprints, hair, blood, clothing fibers, etc. that place the occupant(s) accordingly;
- Seat positions;

Reports for Death or Serious Injury, continued

- Damage to the interior of the vehicle consistent with injuries to any occupant(s);
- Evidence from occupant protection devices such as seat belts and air bags;
- Evidence of contact with glass by any occupant in the vehicle;
- Any other pertinent information or evidence; and
- Preliminary findings from the CARS Reconstructionist.

Off-Road/ Recreation Vehicles

Off road recreational vehicle crashes occurring on public ways shall:

- Be investigated and reported on the standard CRA-65 Motor Vehicle Crash Police Report; and
- The standard uniform citation can be utilized as a complaint application for a recreational vehicle operated on a public way in violation of MGL c. 90B § 25.

Note: If needed, under the Executive Office of Energy and Environmental Affairs, the Massachusetts Environmental Police may be called for assistance at (800) 632-8075.

Crashes occurring on private property that involve a motor vehicle, or an off-road recreational vehicle, and resulting in death or serious injury shall:

- Be investigated and reported following the same reporting requirements and procedures set forth for death and serious injury crashes.

Crashes involving only property damage that occur on private property, not open to the general public, shall not require an investigation.

Collision Analysis and Reconstruction Section (CARS)

CARS may be used for the following purposes:

- When any crash involves a fatality;
- When any serious injury crash involves a strong possibility of criminal charges being filed;
- When any Department vehicle collision involves serious injury/death;
- When any serious injury occurs at a work zone where a member is working a paid detail;
- When any Department pursuit results in serious injury or death;
- Upon request by another police department/agency;
- Upon request of the District Attorney's Office, Fire Marshal's Office, or Attorney General's Office for assistance in forensic mapping of crime scenes; and
- As directed by the Troop/Section Commander.

CARS shall:

- Assist the primary investigator and shall not assume full responsibility for any investigation, unless ordered to do so by the Troop/Section Commander; and
- Forward an approved copy of the final report to the primary investigator for proper filing.

Local Cruiser Crash Investigations

Upon a request for a crash investigation involving a local police department, the request shall:

- Be made by the officer-in-charge (OIC) of the requesting department to the Troop Duty Officer.

Troop Duty Officers shall:

- Assign a supervisor (preferably of a higher rank than the officer involved) to conduct a crash investigation.

Investigating Members shall:

- Conduct an investigation and determine the cause;
- Take immediate enforcement action as necessary;
- Prepare an incident report; and
- Submit the incident report together with a CRA-65 Motor Vehicle Crash Police Report for review to the Troop Commander within seventy-two (72) hours of the crash.

Troop Commanders shall:

- Upon approval, forward a copy of the crash investigation to the local police department chief or designee for final disposition.

Crashes/ Commercial Motor Vehicles

Troop Duty Officers shall notify the Commercial Vehicle Enforcement Section (CVES) of all commercial motor vehicle crashes when they:

- Cause a major disruption of normal traffic;
- Involve serious injury or a fatality;
- Cause extensive property damage;
- Involve hazardous or radioactive materials;
- Involve violation(s) of law; or
- Are requested by the investigating member.

The "Truck and Bus Information" section of the CRA-65 Motor Vehicle Crash Police Report shall be completed by the primary investigator with CVES assistance.

Crashes with Deer and Disposition

Members should be aware that 321 CMR 2.04 allows an eligible person, to salvage the deer in accordance with certain stipulations. Members should:

- Ascertain if there is an eligible person who wishes to take possession of the deer;
- Advise the eligible person to immediately notify the Massachusetts Environmental Police;
- Ensure an entry is made into the DAJ that includes the name, address, and telephone number of the eligible person; and
- Notify Mass DOT if no eligible person is available or wishes to take possession of the deer carcass.

Release of Crash Reports

Private Individuals/Businesses

Private individuals, whether representing a business or themselves, are required to obtain crash reports from the Registry of Motor Vehicles.

Instructions for obtaining crash data can be found on the internet at: https://www.mass.gov/doc/rmv-request-for-copy-of-crash-report-form/download

State Employees/Representatives

Members shall release unredacted crash reports to:
Employees of MassDOT when an official(s) appears in person and is properly identified.

Representatives of private companies under State contracts responsible for repairs may be allowed to access information and records related to crashes available at Department facilities, under the following conditions:

- For the purpose of identifying monetary liability in crashes which resulted in damage to the infrastructure of the State highway system;
- Crash reports shall be accessed and copied only under the supervision of a Department member; and
- The Station Commander, or designee, shall be responsible for blacking out, the dates of birth and operator license numbers of all parties contained within the crash report.

Specific questions or concerns about the applicability of the Public Records Law or any other statute authorizing or restricting access to such material should be directed to the Department's Legal Section at (508) 820-2311.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-14**
Subject:	
Operating Under the Influence	

Policy

Members establishing probable cause of a subject operating a motor vehicle under the influence of alcohol and/or drugs should effect the arrest of said subject unless articulable extenuating circumstances prevent taking the subject into custody and necessitate an alternative means of enforcement at the time of the identified offense(s).

Definitions

Advanced Roadside Impaired Driving Enforcement (ARIDE): Training course intended to bridge the gap between SFST and DRE training providing officers with additional knowledge related to drug impairment.

Breath Test Operator (BTO): A member certified to administer a breath test in accordance with 501 CMR 2.00.

Drug: Any substance, when taken into the human body, which impairs the mental or physical abilities of the person taking it. This definition does not include the ingestion of ethyl alcohol.

Drug Recognition Expert (DRE): A person certified by the International Association of Chiefs of Police (IACP) as a Drug Recognition Expert whose primary function is to determine:

- Whether the subject actually is impaired; and if so,
- Whether the impairment is drug- or medically-related; and if drugs,
- The category or combination of categories of drugs that is the likely cause of the observed impairment

Officer-in-Charge of Instruments (OIC): A BTO, designated by a Station/Unit Commander responsible for maintaining the station/unit breath test devices. The OIC shall be trained in accordance with 501 CMR2.00.

Office of Alcohol Testing (OAT): Established within the Department of State Police Crime Laboratory that oversees the State's Breath Test Device Program and Breath Test Operator Training.

Preliminary Breath Test Device (PBT): A breath test device used to administer a screening test capable of quantifying the amount of alcohol in a breath sample or calibration standard.

Roadside Assessment: Test(s) designed to assist in the detection of impairment by a cause other than alcohol administered to a subject prior to arrest.

Definitions, continued

Standardized Field Sobriety Test(s) (SFST): Test(s) administered to a subject prior to arrest designed to assist in the detection of impairment due to alcohol.

Standardized Field Sobriety Test(s)

SFST(s) should be administered by the investigating member, if able, in accordance with training and the procedures outlined in the SFST Manual.

ARIDE trained members, when available, should provide additional roadside assessments to assist in determining possible drug categories contributing to impairment.

If available, a PBT Device, used as a Field Sobriety test, shall be administered as the last test.

Post Arrest Breath Tests

All post-arrest breath tests shall be conducted:

- By a certified BTO, however refusals may be entered by either a certified BTO or by a Department member not certified as a BTO;
- In accordance with 501 CMR 2.00 and Massachusetts General Laws (MGL) c. 90 § 24;
- In accordance with training and operational procedures developed by the OAT; and
- At one of the following locations:
  - The barracks of jurisdiction in which the arrest was made; or
  - At any barracks or other police department having an operational breath test device; or
  - The Department's Breath Alcohol Testing (BAT) vehicle.

Breath Test Results

Upon the successful completion of a breath test, the detainee will be notified of the results.

If the results are a 0.08% BAC or higher:

- Criminal charges shall be filed; and
- License seizure *only if* the detainee is in the possession of a Massachusetts driver's license.

If the results are between 0.079% and 0.060% BAC:

- Criminal charges shall be filed; but
- No seizure of license.

If the results are 0.059% BAC or less:

- There shall be a permissible inference that such detainee was not under the influence of intoxicating liquor, and they shall be released from custody forthwith per MGL c. 90 § 24, unless
  - Other charges, including but not limited to, OUI-Drugs support continued investigation and/or detention.

Subject:	Number:
Operating Under the Influence	**TRF-14**

Blood Tests

The preferred confirmatory test for OUI Alcohol is the breath test, but:

- Subjects arrested for OUI Alcohol and being treated at a medical facility licensed under MGL c. 111 § 51 may be offered an opportunity to submit to a blood test in lieu of a breath test; and/or
- Subjects arrested for OUI Alcohol and/or Drugs, may consent to a blood test to be taken at a medical facility licensed under MGL c. 111 § 51.

Specimen Collection

The collection of blood or urine samples related to an OUI case will:

- Be the responsibility of the arresting member or designee for oversight of the collection process; and
- Adhere to recovery of evidence guidelines contained within INV-10 Evidence Collection and Preservation.

OUI Drugs cases shall include the following forms with the case file:

- SP 603 Toxicology Request Form;
- SP 604 DRE Face Sheet (Preliminary) or Member's incident report (SP-12); and
- Evidence Submission Form (ESF).

DRE Evaluations

A DRE evaluation should be administered, when available and practicable, for subjects arrested for OUI Drugs or combination OUI Drugs/Alcohol.

DRE Request Criteria	An investigating member may request a DRE when: • The detainee is under arrest charged with Operating Under the Influence in violation of Massachusetts General Laws (MGL) c.90 § 24 and drug use is suspected; or • Blood Alcohol Concentration is not consistent with observed impairment; or • Any serious personal injury crash or fatal crash where impairment due to drugs is suspected.
Requesting a DRE	Members shall make a request for the assistance of a DRE to the Troop Duty Officer through the Troop Dispatcher.
Release from Custody	A detainee bailed from an operating under the influence charge may only be released to an unimpaired adult who agrees to take responsibility for the bailed detainee. The DAJ/ACISS shall reflect the identity of the person to whom the detainee was released. If a responsible adult is not available, the bailed detainee shall be placed into protective custody in accordance with DET-10, Protective Custody.
Protective Custody	The Arresting Member or Desk Officer placing a bailed detainee into protective custody shall: • Process the subject according to MGL c. 111B; • Re-enter the protective custody into the DAJ/ACISS; and • Ensure an SP 850 Protective Custody form is completed with a separate report and log entry made.

Responsibilities

Position	Duties
Arresting Member <u>OUI Alcohol</u>	• Advise the detainee of their rights and consequences as outlined in the Statutory Rights and Consent Form during the booking process; • If certified as a BTO, administer the breath test; • If not a certified BTO, ensure the breath test is administered by a certified BTO; • Complete all required documents and reports; • Ensure the detainee is provided suspension notification(s) if they fail the evidential breath test or refuses to submit to a breath test; • Pursuant to Melanie's Law, notify the tow company of a mandated 12-hour hold on a detainee's vehicle upon the breath test refusal of a detainee arrested for OUI Alcohol; and • If OUI Drugs is suspected, request a DRE evaluation.
<u>Combination OUI Alcohol/Drugs</u>	• Detainee's exhibiting signs of impairment for a combination of OUI Alcohol & Drugs shall be processed following procedures for OUI Alcohol; • If BAC is greater or equal to .08% continue with OUI Alcohol procedures unless the member believes a DRE evaluation would be beneficial; • If BAC is less than .08% and impairment is not consistent with BAC level, request a DRE and consider immediate threat; • If breath test is refused, request a DRE; • If impairment due to a combination of alcohol and drugs is suspected, both offenses shall be considered for charging; and • Complete all required documents and reports.
<u>OUI Drugs</u>	• Request a DRE; • Statutory Rights and Consent Form shall not be utilized; • Complete all required documents and reports; and • If warranted, follow Immediate Threat license suspension procedures.

Responsibilities, continued

Position	Duties
Breath Test Operator	• Administer a breath test in accordance with Chapter 90, §24 and 501CMR 2.00; • If the detainee refuses to submit to a breath test, ensure that the refusal is entered into the BATS; • If data entered into BATS is found to be incorrect, complete a BATS Data Correction Form, and fax to the RMV and OAT; • Complete all required documents and reports; and • Ensure detainee is provided suspension notification(s).
Drug Recognition Expert	• Ensure a call is assigned in the Daily Administrative Journal of the barracks of jurisdiction as a Call For Service: DRE Response/Eval; • Conduct an evaluation consistent with the twelve (12) step protocol as set out in the DRE Program; • Ensure that a parent, guardian, or legal custodian is present for juveniles who are under the age of eighteen (18) years; • Complete a Drug Influence Evaluation Narrative within the DRE system of record; • Submit a report for approval only to a MSP DRE Instructor holding the rank of NCO or higher; and • Submit approved DRE Face Sheet and Evaluation Narrative as a supplemental report to the court of jurisdiction;
Desk Officer	• Notify the bail commissioner and advise if the detainee requests to exercise their rights per MGL c. 263 § 5A; • Enter pertinent information related to the arrest and testing information into the DAJ/ACISS; and • Adhere to all requirements set forth in DET-06 Detainee Monitoring.
Supervisor	• Ensure compliance with this policy and the completion of all required documents and reports.
Troop Traffic Programs Officer	• Document date, time and location of each OUI related arrest and crash within their Troop.
Station/Unit Commander	• Designate OIC of Instruments and ensure they perform all assigned duties regarding Station/Unit breath test devices.

Responsibilities, continued

Position	Duties
Troop Commander	• Oversee OUI enforcement efforts within their Troop jurisdiction.
Officer-in-Charge: Instruments	• Provide guidance and assistance to BTOs and members entering refusal data; • Ensure detainee right to operate has been suspended if they fail the evidential breath test or refuses to submit to a breath test; • Ensure Station/Unit breath test devices, supplies, and current reference manuals are maintained and readily accessible; • Troubleshoot breath test devices and perform periodic tests as prescribed by OAT; • Maintain calibration stations for members who have been issued PBTs; • Coordinate with OAT and members for breath test devices certifications, calibration, repairs, and loaner/replacement units; • Maintain Station records of all periodic tests performed as prescribed by OAT; and • Testify as the Keeper of Records when required in-prosecutions within their jurisdiction.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-14B**
Subject:	
Preliminary Portable Breath Test Devices	

Policy

Members shall utilize only devices approved and issued by the Traffic Programs Section which shall be operated and maintained in accordance with approved Department training.

Purpose

To provide guidance for the proper use, documentation, and maintenance of Preliminary Breath Test (PBT) instruments.

Definitions

Officer-in-Charge (OIC): The keeper of the breath test records for instruments assigned to their individual barracks or unit.

Office of Alcohol Testing (OAT): Established within the Massachusetts State Police Crime Lab (MSPCL) that oversees the State's Breath Test Device Program and Breath Test Operator training.

Preliminary Breath Test Device (PBT): A breath test device used to administer a screening test that is capable of quantifying the amount of alcohol in a breath sample or calibration standard.

Preliminary Breath Test Operator: A member trained to administer preliminary breath test.

Calibration and Certification

OIC and members issued a PBT Device shall:

- Successfully complete an operator training program;
- Adhere to Department of State Police guidelines for PBT Device maintenance and operation;
- Perform accuracy checks monthly according to Department of State Police guidelines;
- If not working properly, ensure that a PBT Device is taken out of service immediately;
- Notify Traffic Programs of a PBT Device taken out of service and in need of repair thus following repair arrangements made by OAT; and
- Ensure the PBT Device is certified annually, at the Office of Alcohol Testing, as directed by the Traffic Programs Section.

Subject:	Number:
Preliminary/Portable Breath Test Devices	**TRF-14B**

Records

OIC and members issued a PBT Device shall:

- Ensure records are maintained within their assigned barracks/unit per Department of State Police training; and
- Forward copies of the monthly accuracy checks to the Traffic Programs Section.

Traffic Programs Section

The Traffic Programs Section shall maintain an inventory of all issued PBT Devices and the inventory shall include:

- The member's barracks or unit assigned;
- Model and serial number of each PBT Device; and
- The Department Inventory Control number.

Testimony

Members should be aware that the following elements may be required in court testimony:

- Date, time, test number, subjects name and result of the blood alcohol contents percentage (BAC %);
- Department SP 691 Preliminary Breath Test (PBT) Log;
- The PBT Device was operating properly;
- The PBT Device was properly calibrated and certified;
- The training, qualifications and certification of the member; and
- PBT Device was the last field sobriety test administered.

Limitations

The acceptance of PBT Devices within the court system is dependent upon the member's:

- Proper care and effective use of the PBT Device;
- Appropriate PBT Device training and certification; and
- Use in combination with Standardized Field Sobriety Tests.

Department of State Police
General Order

Effective Date:	Number:
May 25,2023	**TRF-15**

Subject:

Sobriety Checkpoints

Purpose

The primary purpose of Sobriety Checkpoints is to deter impaired driving, not to increase arrests. Police generally arrest impaired drivers detected at checkpoints and publicize those arrests, but arrests at checkpoints should not be used as a measure of checkpoint effectiveness.

Key Considerations

In the preparation and execution of any Sobriety Checkpoint, the following considerations shall receive special attention:

- When utilized, Sobriety Checkpoints shall be conducted in conformance with judicial guidelines;
- Motorist safety shall be prioritized;
- Motorist inconvenience shall be minimized;
- The action undertaken shall be in accordance with a written plan devised by supervisory personnel and developed prior to implementation of the checkpoint;
- Advance public notice shall be given to reduce motorist surprise, fear, and inconvenience; and
- A trained Commissioned Officer shall be in charge.

Site Safety

The Officer In Charge (OIC) of the Sobriety Checkpoint shall ensure compliance with the following Work Zone Safety Guidelines:

- Physical barriers shall not be used;
- Sufficient warning signs shall be placed ahead of the checkpoint to provide advance notice for on-coming vehicles;
- Signs should be illuminated or constructed of highly reflective material;
- Sufficient reflectors, or cones should be used to control traffic safely;
- Auxiliary and/or sufficient street lighting should be in place to illuminate the checkpoint;
- There shall be sufficient law enforcement presence to reduce fear and apprehension, minimize inconvenience, and ensure compliance;
- All officers shall be in an authorized uniform;
- All officers shall comply with work zone safety guidelines regarding the wear of an issued traffic vest or high visibility jacket;
- Officers shall position themselves so motorists can easily observe them;
- Visual stop/start commands should be given by either the officer or by signage;
- Marked cruisers shall be utilized as site safety vehicles;
- All safety vehicles shall have operable visual emergency warning devices; and

Site Safety, continued

- Safety vehicles shall be positioned in compliance with the pre-determined plan.

Vehicles shall be waved through the Sobriety Checkpoint without stopping when:

- Traffic is backed up to the safety officer;
- A commercial vehicle with a gross vehicle weight rating (GVWR) greater than 10,000 pounds causes sight obstructions;
- Vehicles transporting flammable liquids (including compressed gas as a motor fuel), hazardous materials or explosives as the cargo or a part thereof shall be allowed to pass through the checkpoint without stopping; and/or
- Due to articulable reasons, the member in a safety vehicle deems safety of the motorists would be best served by allowing traffic to pass.

Site Selection

Individual site selection shall be made based upon selective enforcement identifiers of alcohol related traffic crashes or prior OUI violations such as:

- Time;
- Day of the week; and
- Location.

Site selection data for each Sobriety Checkpoint shall be retained by the Troop Traffic Programs Officer for a minimum period of five (5) years.

Safety considerations for the site location should include:

- Motorist/officer safety;
- Sight visibility;
- Traffic volume and pattern;
- Operator reaction time; and
- Operator stopping distance.

Parking lots, rest areas, or wide shoulders immediately adjacent to the Sobriety Checkpoint should be available and accessible for use as a screening area. This will ensure that vehicles can be directed out of the normal flow of traffic without creating a traffic safety hazard.

Advance Notification

The OIC shall coordinate activities with Media Relations to ensure that:

- Announcements to the appropriate electronic and print media shall be made, at a minimum, three (3) business days prior to the implementation;
- The press release provides the overall purpose of the Sobriety Checkpoint, thereby allowing the Department to gain the public acceptance, support, cooperation, and voluntary compliance of the endeavor;
- The press release specifies the county the Sobriety Checkpoint shall be conducted in, but does not detail the precise location or hours of implementation; and
- Any inquiries pertaining to the Sobriety Checkpoint are referred to the appropriate Troop Commander.

Operational Plans

Individual Sobriety Checkpoint plans shall be prepared in advance of the date of actual implementation. These plans shall include, at a minimum:

- Date;
- Time and duration;
- Site selection and justification;
- Set patterns of vehicles to be stopped;
- Personnel, assignments, and responsibilities;
- Training for this particular sobriety check-point;
- Field sketch detailing the Sobriety Checkpoint logistics and site configuration;
- Notifications; and
- Equipment and materials needed.

These plans shall be strictly adhered to. There shall be no arbitrary or random modification of Sobriety Checkpoint procedures.

Officers may make suggestions for changes due to extenuating circumstances, but only the OIC can authorize and approve any changes in plans.

All officers shall be briefed and trained on details of the specific plan prior to the start of each Sobriety Checkpoint.

Operational plans shall be maintained at the Troop Headquarters and retained for a minimum period of five (5) years. A copy shall be forwarded to the Traffic Programs Section.

Site Configuration

Site configuration shall be as follows:

- Each Sobriety Checkpoint shall have a clearly marked warning sign;
- All signs, signals, markers, traffic cones, or reflectors shall be placed in accordance with the Work Zone Safety Guidelines;
- The position of the cones, or reflectors should guide vehicles to the appropriate lane of travel and are parallel to the stop location; and
- The position of the cones, or reflectors around the stop location should provide as much protection to the officers in that location as possible.

Stopping Vehicles

The selection of vehicles to be stopped shall be either:

- Every vehicle; or
- An objective set pattern, e.g., every other, every third vehicle, or other set number desired.

Vehicles stopped at the greeting officer should be met for a period of one (1) minute or less.

If there is reasonable suspicion, based upon articulable facts, that the operator and/or passenger(s) is committing or has committed an OUI violation or other violation of law, that vehicle should be directed from the normal flow of traffic and the offender(s) checked further.

Subject	Number
Sobriety Checkpoints	**TRF-15**

Cruisers

All Department vehicles shall be placed at Sobriety Checkpoint in such a manner as the OIC deems appropriate for safety purposes.

Personnel

The number of uniformed officers needed for a Sobriety Checkpoint may vary according to site and may take into consideration visible authority, motorist safety, and minimizing inconvenience.

There shall only be one (1) Commissioned Officer as the OIC of a Sobriety Checkpoint.

Responsibilities

Position	Duties
Division Commander of Field Services	• Annually, confer with the Traffic Programs Section regarding the efficiency of Sobriety Checkpoints; • Make a determination as to whether or not such checkpoints shall be utilized as a component of the OUI Countermeasures Program; and • Issue a Division Commander's Order directing all Troop Commanders to gather intelligence regarding potential sites for the deployment of checkpoints during the coming year, if such checkpoints are to be utilized.
Troop Commanders	• Shall designate a Commissioned Officer to conduct the site selection and operational planning for each Sobriety Checkpoint; • Approve the written operational plan and site selection; and • Designate a Commissioned Officer to be the OIC of the Sobriety Checkpoint.

Responsibilities, continued

Position	Duties
Sobriety Checkpoint OIC	Shall ensure: • The safety of all motorists and officers at the checkpoint; • Motorists are directed to the screening area by at least one (1) officer; • At least one (1), preferably two (2) officers interact with motorists during the screening process; • Motorists not arrested are released as quickly as possible; and • Arrested motorist's vehicles are inventoried and towed, if applicable, in accordance with TRF-14; and • If practical, the vehicle may be released to a licensed and sober operator, before towed from the screening area, if the detainee submits to a breath test.
Safety Vehicle Officer(s)	Shall: • Assist with the setup of the work zone prior to the start of the checkpoint; • Observe traffic for vehicle operation indicating OUI; • Observe traffic to forewarn other officers and motorists of approaching dangerous drivers; • Observe traffic for violations of law and notify the OIC; • Ensure that visual warning devices are activated; and • Monitor traffic for backup. Note: Speed measuring devices may be used by the safety officer.

Subject	Number
Sobriety Checkpoints	**TRF-15**

Responsibilities, continued

Position	Duties
Sobriety Checkpoint Greeting Officers	Shall: • Be courteous and polite when interacting with motorists. The element of voluntariness reduces the intrusiveness of the procedure; • All contacts should be kept brief, with a short greeting such as "Good evening, this is a State Police Sobriety Checkpoint. Sorry for the inconvenience, thank you." The inconvenience to motorists must be minimized; • If reasonable suspicion that an OUI offense or any violation of law has occurred, direct the vehicle to the screening area; and/or • Ensure the safety of motorists being checked further by directing them to an appropriate location to park in the OUI screening area.
Sobriety Checkpoint Screening Officers	Shall: • Minimize the inconvenience of motorists by screening them for OUI as efficiently as possible and administering the Standard Field Sobriety Tests, roadside assessments and/or preliminary breath test device (PBT); and • If probable cause is established for OUI, the member shall arrest the subject, barring extenuating circumstances dictating alternative enforcement action(s).

2256

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-16**

Subject:

Speed Measuring Devices

Purpose

The Department shall use speed measuring devices as part of the strategy to reduce motor vehicle crashes and enhance public safety within the Commonwealth.

Members shall only use Department issued speed measuring devices for which they are trained and maintain a current certification.

Definitions

Calibrated: When the device is taken to a contractor that issues a calibration certificate which verifies proper functionality.

LIDAR Device: A speed measurement device that uses light detection and ranging to measure multiple distances and calculate speed.

RADAR Device: A speed measurement device that uses radio detection and ranging to measure relative changes in motion and calculate speed.

Tested: A procedure that checks on the functionality of the device as recommended by the manufacturer and training.

Tracking History: An essential process that confirms observations that a specific vehicle and operator did in fact commit the violation.

Use

The safety of the member, violator, and motoring public shall be of concern whenever selecting locations and conditions for speed enforcement operations.

Testing, Calibration & Certification

All members using a LIDAR Device, RADAR Device, or any other speed measuring device should successfully complete the National Highway Safety Administration's Core operator training program and receive specific certification in the respective speed measurement category prior to use.

- Members should reference manufacturer's guidelines for the maintenance and operational procedures of the device(s);
- Members shall test their speed measurement device prior to usage to ensure accuracy.
    - If the device fails an external or internal test it shall be taken out of service immediately until repaired; and
- LIDAR and RADAR devices shall be calibrated annually, as directed by the Traffic Programs Section.

Records

Calibration certificates shall be maintained by the Station/Unit Commander or designee and the Traffic Programs Section. The Traffic Programs Section will be notified of all maintenance and calibration of speed measurement devices used by members of the Department.

Speedometer

Speedometers should be checked by using a speed measuring device:

- Periodically;
- After cruiser service, specifically including transmission work or new tires;
- Via Speed Measurement Technology; or
- Via GPS Technology.

Speed Measurement Accountability

The Station/Unit Commander or designee shall maintain an inventory of all speed measuring devices under their control.

The inventory shall include:

- Serial number of all devices and associated equipment;
- The Department Inventory Control Number;
- Member assigned the device; and
- Spare devices that are unassigned.

Tracking History

Members should utilize the practice of Tracking History when conducting speed measurement and avoid independent reliance on the device.

Tracking history varies slightly on each type of device used but generally consists of:

- Identification of target vehicle;
- Estimation of Speed of target vehicle;
- Estimation of Range in feet when measurement taken;
- Check Environment for anything that could affect results;
- Pitch;
- Clarity;
- Steady Readout; and
- Consistent with visual estimate.

Limitations

The effective use of speed measuring devices and their acceptance by the public and courts is dependent upon the member's:

- Understanding the factors that limit the effectiveness of the device;
- Appropriate training and certification; and
- Proper care and use of the equipment.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

2259

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**TRF-17**
Subject:	
Emergency Roadblocks	

Policy

Situations may arise which necessitate the utilization of an emergency roadblock. To ensure the safety of the public and Department members, many factors have to be considered prior to implementation of a roadblock.

Only Commissioned Officers may approve and authorize the implementation of an emergency roadblock.

Definitions

Roadblock: A deliberate obstruction by physical means at one or more selected points on a roadway.

Activation and Implementation

Many factors need to be considered before the implementation of a roadblock. The decision to use a roadblock shall be based upon:

- The seriousness of the known or alleged crime;
- The number of members available to be assigned;
- The sufficiency of information and descriptions of wanted persons and vehicles;
- The elapsed time between the known or alleged criminal act and the time of reporting to the Department or other law enforcement agencies; and
- Any other pertinent facts.

Upon implementation of an emergency roadblock:

- A Patrol Supervisor shall be dispatched and shall assume command at the scene of the roadblock; and
- If available, the Air Wing should provide assistance.

Fixed Roadblocks

Fixed roadblock barricades may consist of any strong structure augmented by any combination of signs, signals, markers, reflectors, or flares, and may include the strategic positioning of cruisers on the roadway.

- No member shall remain in a cruiser utilized as a fixed roadblock; and
- Firearms may be made ready for use.

Circle System

The Circle System is designed to completely contain the suspect in a given area by blocking every possible avenue of escape.

Typically two (2) circles are established; an inner circle and an outer circle. The radius of the circles is determined by the estimated time that has elapsed from the commission of the crime. The locations of blocking points are then determined by using the crime scene as the center point and drawing circles around that point.

- The inner circle is the area immediately surrounding the crime scene; and
- The outer circle is set up to apprehend the fugitive if they get through the inner circle.

Incident Commanders/Supervisors shall assign members to:

- Patrol the area between the two circles;
- Staff blocking points established at major intersections and highways;
- Stop all traffic and interview each operator; and
- Use cover-contact techniques as appropriate.

Observation Techniques

It may be more desirable to slow traffic in order to enable members to check vehicles and occupants without bringing traffic to a complete stop.

Department vehicles should be parked at forty-five (45) degree angles with the traffic flow. In this position members can observe traffic and maintain mobility.

Blocking Two-Lane Roads

To stop traffic traveling in only one direction, Department vehicles should be:

- Parked at a forty-five (45) degree angle with the traffic flow;
- Partially on the roadway; and
- Blocking the lane to be stopped.

Light traffic can be stopped in both directions with this system. However, in heavy traffic it may be necessary to set up this blocking method on both sides of the road. This second roadblock should be close enough, (i.e., approximately seventy-five (75) yards away) and in sight of the first roadblock.

If signs and other warning devices are used, consideration should be given to the sight and stopping distances and the need for the element of surprise.

Subject:	Number:
Emergency Roadblocks	**TRF-17**

Blocking Roads at Night

At night, the member assigned as the contact officer shall:

- Stay off the roadway and out of oncoming headlights;
- Wear safety vest or high visibility clothing;
- Ensure roadblock lighting does not blind oncoming motorists; and
- Use cover-contact techniques as appropriate.

Blocking Multi-Lane Roadways

The blockade procedure for one side of a multi-lane highway is basically the same as for a one or two lane roadway.

A major difference is in the placement of signs and other warning devices.

- Because of greater speeds, the signs should be placed further away from the cruisers to allow motorists time to stop safely;
- If used, at least two (2) signs should be placed on both sides of the roadway facing towards oncoming traffic; and
- Flares and other warning devices should be arranged to funnel traffic into one or more lanes.

Post Incident Documentation and Review

A written report detailing the incident and the tactics used will be completed by the on scene Patrol Supervisor. The report will be forwarded through channels to the Division of Field Services Commander for an Administrative Review.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

2262

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRF-20**
Subject:	
Department Vehicle Crashes	

Policy

The Department shall document, within the Records Activity Management System (RAMS), all Department vehicle crashes in accordance with this policy.

The Department shall objectively investigate all vehicle crashes to ensure that each crash investigation reflects the Department's commitment to impartiality and integrity.

Definitions

Cruiser Crash: A motor vehicle crash involving any Department vehicle, or any vehicle assigned to Department personnel, including civilian personnel.

Damage to a Department Vehicle: Non-crash damage, e.g. broken window or vandalism to an unattended vehicle. This includes windshield damage incurred as a result of debris from an unidentified or natural source.

Registry of Motor Vehicle (RMV) Forms: Department operators shall:

- Identify themselves as operator number one; and
- List the operator's address as:
  Department of State Police
  470 Worcester Road
  Framingham, MA 01702; and
- The owner's name and address shall be listed in accordance with the vehicle's registration.

Note: When a crash involves more than one Department operator, the investigating supervisor shall determine the numerical designation of each operator, such as Operator Number One, Operator Number Two, and so on.

Type I Crash: A minor cruiser crash not meeting any of the conditions of a Type II crash.

Type II Crash: A vehicle crash involving:

- Any injury or fatality to any party; or
- The issuance of a citation/criminal complaint; or
- Estimated damage over $1000 to any vehicle or property due to a crash; or
- Any civilian employee operating a Department vehicle.

Damage to Department Vehicle

Employees discovering/incurring damage to their assigned Department vehicles shall:

- Notify the sub-station of jurisdiction and request an entry to be made into the Daily Administrative Journal (DAJ);
- Report the damage, as soon as practicable, to their immediate supervisor and the Fleet Administrator per ADM-19A Vehicle Use and Maintenance.

Note: Any damage to a vehicle caused by a person arrested or a person summonsed to court shall be reported to the Fleet Section, in order to collect restitution. The investigating officer shall document the damage and take out appropriate criminal charges.

Type I Procedure

Employee	Duties
Member Involved in Crash	*Preliminary Procedures* • Immediately report the crash to the sub-station of jurisdiction; • If the Department vehicle was damaged, and no crash occurred, have photographs taken (not necessarily at the scene); • Ensure queries of license and registration data are done through the Registry databases and take appropriate action as necessary (See Type II); • Complete and submit within RAMS, the SP 425 Preliminary Documentation of Cruiser Crash prior to the completion of tour of duty; and • Completed reports shall be reviewed by the member's Station/Unit Commander prior to submission to Troop/Section Major; and • Complete and mail the original Registry form CRA-23, to the Registry of Motor Vehicles (RMV) within five (5) days. *Completed Documentation* • Completed documentation shall include: o To/From reporting the circumstances, to include the date the Registry CRA-23 was forwarded to the RMV; o A copy of the Registry CRA-23; and o Troop Mechanic's report and photographs. • Completed documentation shall be forwarded to their Troop/Section Major within five (5) days.

Type I Procedure, continued

Employee	Duties
Desk Officer	• Document the crash within the DAJ as a Type I Cruiser Crash activity; and • Notify the Troop Duty Officer.
Troop Duty Officer of Jurisdiction	• Document the crash within the DAJ; • Authorize operator to document crash; or • Assign a supervisor to investigate, preferably of higher rank than the member involved, from the Division of Field Services. **Note: Whenever a supervisor is assigned to investigate a cruiser crash, Type II procedures shall be followed.**
Involved Member's Station/Unit Commander	• Shall review reports for accuracy and completeness prior to submission to the Troop/Section Major.
Troop/Section Major	*Preliminary Documentation* The Troop/Section Major of the involved member shall: • Review the SP 425 upon receipt or no later than one (1) business day following the crash; • Ensure the Cruiser Crash is reclassified within RAMS from a Type I to a Type II if warranted; • Consult with the Major of jurisdiction within the Division of Field Services, to assign a supervisor to conduct a Type II Investigation when so determined; • Ensure that only a supervisor shall issue any citations related to the cruiser crash. *Completed Documentation* Upon receipt of all documentation the Troop/Section Major shall within RAMS: • Fill out the appropriate section of the SP 377; • Make findings and recommendations; and • Forward all documentation to the involved member's Division Commander within twenty-one (21) days of the crash.

Crash in Personal Vehicle

On-duty Department employees involved in a crash while operating their personal vehicles shall immediately inform their duty assignment supervisor of the crash when:

- They are authorized to operate their personal vehicle within the scope of their duties; and
- They are entitled to mileage pay for that travel.

Within five (5) days of the crash, the employee shall provide their duty assignment supervisor with a copy of the RMV CRA-23 and all other pertinent documentation and forward a copy to the Legal Section.

When a Department employee is injured in a crash that meets the criteria listed above, the injury shall be investigated as an on-duty injury.

Type II Procedure

Employee	Duties
Employee Involved in Crash	• Immediately report the crash to the sub-station of jurisdiction; • Preserve the scene, if safety and traffic concerns allow; • Members shall not take any enforcement action except to prevent parties from unlawfully leaving; • Complete and mail the Registry CRA-23 to the RMV within five (5) days; • Ensure their Station/Unit Commander has reviewed completed reports prior to submission; and • Complete and forward the following printed reports to the investigating officer within five (5) days (unless incapacitated): o To/From reporting the circumstances, to include the date the Registry CRA-23 was forwarded to the RMV; o A copy of Registry CRA-23; and o Commonwealth's Form 1 Notice of Injury (if injured).
Desk Officer	• Document the crash within the DAJ as a Type II Cruiser Crash activity; and • Notify the Troop Duty Officer.

Type II Procedure, continued

Employee	Duties
Troop Duty Officer of Jurisdiction	• Document the crash within the DAJ; • Assign a supervisor from within the troop to investigate, preferably of higher rank than the member involved. • If appropriate, notify the involved employee's Troop/Section Major or designee; and • Make arrangements for other assistance at the scene (Photographs, crash reconstruction, etc.).

Investigating Supervisor	*Preliminary Investigation*
	• Take command of the crash scene and investigation;
	• Have photographs taken of the scene and/or the damage;
	• Ensure queries of license and registration data are done through the Registry databases;
	• Take appropriate action on violations of law (e.g. citations);
	• Complete and submit the SP 425 within RAMS, prior to the completion of tour of duty; and
	• Complete and forward SP 624 Initial Injury Report if necessary. (Refer to ADM-11B Injury Reporting)
	
	Completed Investigation
	Forward reports to Troop Commander within fifteen (15) days from the date of the crash:
	• Registry CRA-65;
	• SP 209 Supplementary Cruiser Crash Report;
	• Troop Mechanic's Report and photographs of damage;
	• If applicable, towing bills;
	• If applicable, the SP 37 Statement In Support of Claim, Section 8;
	• All other reports, photographs, copies of citations, etc; and
	• If employee is incapacitated complete:
	  ○ SP 37 Sections, 1-7, and
	  ○ Commonwealth's Form 1.

Type II Procedure, continued

Employee	Duties
Involved Member's Station/Unit Commander	Shall review reports for accuracy and completeness prior to submission to the investigating supervisor.
Troop Commander of Crash Jurisdiction	*Preliminary Investigation* The Troop Commander shall: • Review the SP 425 upon receipt or no later than one (1) business day following the crash. *Completed Investigation* The Troop Commander shall within RAMS: • Make findings and recommendations; • If applicable, fill out the appropriate sections of the SP 37; • If applicable, fill out the appropriate sections of the SP 377 in RAMS; • Send a copy of the SP 37 and Commonwealth's Form 1 to Occupational Health if appropriate; and • Forward the completed report to the involved member's Division Commander within twenty-one (21) days of the crash.

Involved Employee's Division Commander

Division Commanders shall:
- Review all Type I and II reports including findings and recommendations;
- Complete appropriate sections of SP 377 in RAMS;
- Take corrective action when appropriate;
- Submit completed reports to the Division of Standards and Training within thirty (30) days of the crash; and
- Send a copy of the completed reports to the Fleet Section.

Division of Standards and Training

The Division of Standards and Training Commander or designee, shall:
- Complete appropriate section of SP 377 in RAMS;
- Ensure reports are complete and are filed within the Records Section; and
- If reports are not complete, return to the Division Commander for reconciliation.

The Commanding Officer or designee, of the Emergency Vehicle Operation Center (EVOC) shall within RAMS:
- Fill out and submit the appropriate section of the SP 377 when remedial training is completed.

Records Section The Records Section shall maintain all copies of reports and investigations upon receipt from the Division of Standards and Training.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**TRF-21**
Subject:	
Tire Deflation Devices	

Policy

The Department may use tire deflation devices in specific circumstances to reduce the speed and duration of pursuits in order to reduce the risk of injury to persons and/or damage to property.

Definitions

Channelizing: A technique where objects are placed in the anticipated path of a pursued vehicle in order to alter its direction.

Tire Deflation Device: A device that, when driven over, causes one or more tires of a vehicle to safely deflate.

Utilization of Tire Deflation Devices

Tire Deflation Devices shall:

- Be readily accessible;
- Only be deployed by a member trained in its use;
- Only be deployed if the device has a recovery cord; and
- Not be used to stop a motorcycle, moped, motorized scooter, tractor trailer, bus carrying passengers, or vehicle with less than four (4) wheels unless:
    - The suspect and/or vehicle poses an imminent threat of death or serious bodily harm to the public or officers; or
    - When specifically authorized and ordered by the Troop Duty Officer, Troop Commander or a Sworn Command Staff Member.

Site Selection

Tire deflation devices should not be used at intersections or in locations where geographic configurations (such as curves and steep embankments) increase the risk of injury to the suspect or occupants of other vehicles.

Deployment Notification

A tire deflation device should only be deployed when:

- The pursuing member has been informed of the location of deployment; and
- Has acknowledged this information on the radio.

Subject: Tire Deflation Devices	Number: TRF-21

Covert Deployment

Situations where it is prudent to covertly disable a vehicle with a tire deflation device may include:

- Stolen vehicles;
- Serious felony arrest warrants and/or charges; and
- Hostage or kidnapping situations.

Recovery of Tire Deflation Device(s)

A deployed tire deflation device(s) shall be safely removed from the roadway after the fleeing vehicle passes. Members shall not enter into the travel lane until all traffic is clear and it is safe to retrieve the device from the roadway. The deployed device(s) shall not be left unattended in the roadway.

Duty of Pursuit Member(s)

On approach to the deployment area the pursuing member(s) shall proceed cautiously and adjust the cruiser speed as necessary to:

- Allow time for the removal of the tire deflation device; or
- Respond to sudden evasive or unpredictable maneuvers by the fleeing vehicle.

After clearing the deployment area, member(s) may increase cruiser speed, as necessary.

Reporting

Members shall report all deployments:

- To the Troop Duty Officer of jurisdiction; and
- To the Emergency Vehicle Operations Center (EVOC) via SP 601 Tire Deflation Device Evaluation Form.

Members shall also complete a supplemental report detailing the incident and tactics utilized in the deployment.

The Troop Duty Officer shall report the use of a tire deflation device and the results in the Daily Administrative Journal (DAJ) and in the electronic RAMS Pursuit Evaluation.

Maintenance of Tire Deflation Device

Members assigned tire deflation devices shall maintain them according to the manufacturer's guidelines and specifications.

Non-functioning parts/units shall be forwarded to the EVOC Coordinator for replacement, unless otherwise indicated.

Subject:	Number:
Tire Deflation Devices	**TRF-21**

Damage to Vehicles or Property

The Troop Duty Officer shall assign a supervisor to investigate any related damage to any other vehicle or property.

Third party owners of any damaged vehicle or property shall be advised to contact the Legal Section for guidance in filing a claim at (508) 820-2311.

Department of State Police
General Order

Effective Date:	Number:
July 22, 2022	**TRF-22**
Subject: **Escorts, Relays and VIP/Dignitary Security**	

Policy

The Department may authorize escorts or relays to provide added security, expedite the delivery of special items, and ensure the safe and efficient movement of traffic.

General Guidelines

The Division of Field Services Commanding Officer shall have operational control of all escorts and relays.

Routine requests for escort or relay services shall be approved as outlined below. All emergency requests for escort or relay services shall be forwarded to the Troop Duty Officer.

Members shall not initiate or commence any escort or relay without permission from the Troop Duty Officer.

Routine Requests

If the request is for…	**Then the request should be forwarded to…**
• Any subdivision of the United States Government; • Executive Security; • Political or high-profile figures; or • Nuclear, radiological, biological, hazardous, and/or sensitive materials.	Troop "S" Commanding Officer or designee.
• Funerals, parades, etc.; • Public safety vehicles; or • Other instances where an escort or relay is in the public interest.	Troop Commander or designee.
• Oversize vehicles; or • Unusual cargo.	Troop Detail Officer

Routine Requests, continued

Whenever possible, the request shall be in writing and include the trip route and any other pertinent information. Notification of an escort or relay shall be made to any affected Troop.

Emergency Requests

Legitimate requests for unscheduled Department escort or relay services may include:

- Protection of life;
- Medical personnel;
- Exigent medical need;
- Other law enforcement agencies; or
- Valuable cargo, which may include blood, life-saving medicines, human organs and tissues, or other materials as required by law.

The Troop Duty Officer shall notify the GHQ Communications Section of every escort or relay that extends beyond the Troop area.

Emergency escort of ambulances or private vehicles should be avoided except when a life is in jeopardy or under exigent circumstances. Permission to escort shall be sought immediately from the Troop Duty Officer.

Escort of Nuclear, Radiological, Biological and/or Sensitive Materials

The movement of nuclear, radiological, biological and/or other sensitive materials in and through the Commonwealth may require the utilization of an escort.

When an escort is recommended by the Massachusetts Department of Public Health, the Commanding Officer of Troop "S" or his/her designee shall develop an Operations Plan that will ensure the following steps are undertaken:

- Notify the Division Commander of Field Services;
- Notify the Division Commander of Homeland Security and Preparedness;
- Notify the Division Commander of Investigative Services;
- Notify the Emergency Management Unit;
- Assign a Commissioned Officer from Special Operations as the escort Incident Commander / OIC;
- Ensure that Commercial Vehicle Enforcement Section (CVES) personnel provide appropriate inspections of the vehicle(s) to be escorted. CVES personnel will accompany the escort for the duration of the escort;
- Contact the Division Commander of Homeland Security and Preparedness to request a dedicated Air Wing unit to provide aerial surveillance for the duration of the escort if deemed necessary;
- Assign Special Tactical Operations (STOP) Team personnel to coordinate appropriate security measures. STOP Team personnel will, as appropriate, utilize armored or other assigned vehicles during the escort;

Escort of Nuclear, Radiological, Biological and/or Sensitive Materials, continued

- Assign the Motorcycle Unit, as appropriate, to facilitate the movement of the escort; and
- Assign other Special Operations assets as appropriate.

The Emergency Management Unit shall coordinate the escort with the following entities, as appropriate:

- Special Operations Commanding Officer;
- CVES;
- Air Wing;
- STOP Team;
- Motorcycle Unit;
- Criminal Information and Intelligence Section - Commonwealth Fusion Center;
- Troop Commanders of each Troop through which the escort will travel;
- Communications Section;
- Fiscal Section;
- State Police agency for adjoining state(s) through which the escort will travel;
- Police department of the receiving/departing community;
- Police department of adjoining communities, as appropriate;
- Massachusetts Department of Public Health Radiation Control Program;
- Shipping/receiving company; responsible financial party; and
- Additional notifications, as appropriate.

The Criminal Information and Intelligence Section Commanding Officer, or his/her designee, shall assign personnel to:

- Conduct open source research related to the shipment;
- Query internal databases to determine if the Commonwealth Fusion Center has any relevant information pertaining to the shipment;
- Contact a representative of the U.S. Department of Homeland Security's Intelligence and Analysis Section to determine if DHS has any relevant information pertaining to the shipment;
- Contact a representative of the Federal Bureau of Investigation's Boston Field Office to determine if the FBI has any relevant information pertaining to the shipment;
- Contact a representative of the Boston Regional Intelligence Center to determine if the BRIC has any relevant information pertaining to the shipment; and
- Report all results and significant findings to the Emergency Management Unit's Commanding Officer.

Troop Commanders of each Troop through which the escort travels shall:

- Provide notification to communities, as appropriate; and
- Provide uniformed personnel, as appropriate, to facilitate the movement of the escort through the Troop.

Communications Section shall:

- Assign a SOPs channel for escort personnel to utilize.

Escort of VIP or Dignitary

The movement of political or high-profile figures, in and through the Commonwealth, may require the utilization of an escort.

When a VIP or dignitary escort is requested and authorized, the Commanding Officer of Troop "S" or his/her designee shall develop an Operations Plan that will ensure the following steps are undertaken when applicable:

- Notify the Division Commander of Field Services;
- Notify the Division Commander of Homeland Security and Preparedness;
- Notify the Division Commander of Investigative Services;
- Notify the Emergency Management Unit;
- Assign a Commissioned Officer from Special Operations as the escort Incident Commander / OIC;
- Contact the Division Commander of Homeland Security and Preparedness to request a dedicated Air Wing unit to provide aerial surveillance for the duration of the escort if deemed necessary;
- Assign Special Tactical Operations Team personnel to coordinate appropriate security measures. STOP Team personnel will, as appropriate, utilize armored or other assigned vehicles during the escort;
- Assign the Motorcycle Unit, as appropriate, to facilitate the movement of the escort; and
- Assign other Special Operations assets as appropriate.

The Special Operations Commander or Designee shall coordinate the escort with the following entities, as appropriate:

- Special Operations Commanding Officer in charge of escort/relay;
- Air Wing;
- STOP Team;
- Motorcycle Unit;
- Criminal Information and Intelligence Section-Commonwealth Fusion Center;
- Troop Commanders of each Troop through which the escort will travel;
- Communications Section;
- Fiscal Section;
- State Police agency for adjoining state(s) through which the escort will travel;
- Police department of the receiving/departing community;
- Police department of adjoining communities, as appropriate; and
- Additional notifications, as appropriate.

Troop Commanders of each Troop through which the escort travels shall:

- Provide notification to communities, as appropriate; and
- Provide uniformed personnel, as appropriate, to facilitate the movement of the escort through the Troop.

Communications Section shall:
Assign a SOPs channel for escort personnel to utilize.

Subject: Escorts, Relays and VIP/Dignitary Security	Number: TRF-22

Escort Request for Charitable Events

At least thirty (30) days in advance, organizers of a legitimate charity shall provide the Paid Detail Officer of jurisdiction a written plan and sign a SP 618 Motorcycle Escort Waiver. The Troop Major may allow exceptions to the thirty-day notice under extraordinary circumstances.

The written plan shall contain:

- The date of the event, routes of travel, and the anticipated number of participants;
- Number of Department members requested for escort;
- Notification to local and state authorities, and media in writing;
- Proof of the required one million dollar bond to cover the event; and
- Acknowledgement that participants shall obey all traffic laws during the duration of the event.

Outlaw Motorcycle/ Criminal Gangs

The Paid Detail Officer shall consult with the Criminal Information and Intelligence Section if it appears that the event organizers, or likely participants, have any association with criminal activity.

Outlaw motorcycle/criminal gangs shall be barred from obtaining Department escorts.

Promulgated By: Christopher S. Mason, Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**TRN-01**
Subject:	
Training Administration	

Policy

The Department shall provide training that will develop the skills necessary for the safe, professional and effective performance of its personnel, and that is designed to promote and maintain the professionalism and operational readiness of the Department.

The Department shall ensure that all employees successfully complete compulsory training and annual in-service training as required by law and the Colonel/Superintendent.

The Department shall provide documented training related to the roles and responsibilities of promoted sworn members and civilian employees promoted to supervisory roles.

State Police Academy

The State Police Academy is commanded by the Deputy Division Commander of Standards and Training, who is responsible for ensuring that all training is conducted in accordance with Department directives and applicable laws.

Academy Staff Responsibilities

The Academy Staff shall:

- Identify, develop, and evaluate training and educational programs;
- Assist in the development of lesson plans for all Department training courses;
- Provide necessary training to Department employees and the law enforcement community;
- Meet all federal, state and Department mandated training requirements;
- Provide training to develop the skills necessary for the safe, professional and effective performance of its employees;
- Provide career development opportunities for employees; and
- Maintain training records for employees, including attendance records.

Lesson Plans

- Lesson plans are required for all training courses conducted by the Department;
- Lesson plans shall include, at a minimum:
  - A statement of performance and job-related objectives;
  - The content of the training and specifications of the instructional techniques; and
  - Identification of tests related to the instruction;
- Lesson plans shall be approved and signed/initialled by the Commandant of the Academy, or designee, prior to administration of the training; and

- Upon approval, lesson plans developed by Department members shall remain the intellectual property of the Massachusetts State Police.

Attending Training

Employees assigned to all training programs shall:

- Report at the specified time and location with the proper uniform/attire and materials;
- Be returned to their duty assignment for failing to report as directed and may be subject to disciplinary action;
  - Employees with a scheduling conflict due to court or approved time off shall notify their first line supervisor to request to reschedule the training; and
- Attend non-mandatory training programs only as approved in accordance with Departmental guidelines.

Note: Changes in work schedules for the purpose of training shall be in accordance with the Collective Bargaining Agreement.

Training Requests

Massachusetts State Police personnel requesting to attend a training program that has *any* costs associated with it and/or is held outside of the Department shall comply with the following:

- ***At least forty-five (45) days prior*** to the anticipated date of the requested training, ***each traveler*** shall refer to the Travel/Training Guide, located in the State Police Document Management System, and electronically submit, through channels to their Division Commander:
  - A To/From requesting approval;
  - A completed *SP 371 Travel Training Endorsement Sheet;*
  - A completed *Commonwealth of Massachusetts Travel Authorization Form* (TAF Form Primary);
    1. ***NOTE***: *Section 9 "Travel Itinerary and Justification*" must include a ***thorough*** explanation of how the training will benefit the Commonwealth;
    2. ***NOTE***: *Section 10 "Expenses"* must be completed even if the cost of the Travel/Training will be paid by personal funds, Commonwealth funds, or federal/ Other State Funds;
  - If the travel and/or training is funded by a private entity, a completed *Disclosure by Non-Elected Public Employee of Travel Expenses Serving a Legitimate Public Purpose* form;
    1. ***NOTE:*** Each traveler must estimate and account for expenses in the "Itemization and explanation of amounts offered" section when travel/training is funded by a private entity; and
  - **All** supporting documentation (i.e. training fees and agenda; lodging and transportation estimates; meal reimbursement rates and other appropriate expenses as specified in the member's appropriate Collective Bargaining Agreement.)

- When estimating expenses, it is the responsibility of the traveler to ascertain and account for taxes and fees associated with hotel reservations, car rentals, etc. It is also the responsibility of the traveler to minimize all costs associated with travel and training.

Training Requests, continued

- If the training is out-of-state, personnel should review on PowerDMS the Executive Office of Administration and Finance *Out Of State Travel Guidelines.*

The Division Commander, or designee, within five (5) days of receipt of the training request shall forward approved requests and accompanying documentation to:

- The Deputy Superintendent; and
- The Department's Leave Coordinator per ADM-11E Leaves of Absence.

State Police Academy Coordinated/ No Cost Training

Massachusetts State Police personnel requesting to attend training that is coordinated by the State Police Academy and has no costs associated with it **need not** submit To/From and travel forms as described in the previous section. Instead, personnel interested in attending such training shall complete the *MSP Professional Development Registration* form which will be attached to the State Police Academy e-mail that announces such training. Personnel shall submit the **completed** registration form to the State Police Academy.

Expense Reimbursement

Reimbursement for expenses shall be made only if prior written approval has been received from the Deputy Superintendent.

In order to be reimbursed for expenses, *each* traveler must submit to the Fiscal Section a completed *Employee Travel/Training/ Reimbursement Voucher Input Form* along with all necessary receipts and paperwork.
Note: The reimbursement amount should not exceed the previously authorized expenditure.

Testing

Instructors shall use competency based testing with performance objectives designed to measure the participant's ability and knowledge of course related skills. Participants shall be advised of minimum acceptable standards prior to the administration of such tests.

Remedial Training

Employees who fail to meet required standards of performance shall be required to participate in documented remedial training, as soon as possible.

The goal of remedial training is to ensure that employees demonstrate the knowledge, ability, and skills to achieve an acceptable level of performance.

Employees, who fail to attend assigned remedial training, and/or who fail to achieve acceptable levels of performance, shall be subject to disciplinary action.

Records

In order for the Department to maintain complete and accurate training records, commencing January 1, 2012, members shall:

- Forward copies of training certificates or records of attendance for non-Department training to:
  - The State Police Academy (SPA); and
  - Their Station/Section/Unit Commanding Officer.
- Ensure that copies of certificates or records of attendance for any future non-Department trainings are forwarded to:
  - The State Police Academy (SPA); and
  - Their Station/Section/Unit Commanding Officer.

Note: If available, members are encouraged to forward training records acquired before January 1, 2012, to their Commanding Officer and the SPA for insertion into their Individual Training files.

Station/Section/Unit Commanding Officers shall:

- Ensure that all members under their command have an Individual Training File that is retained and updated within the Station/Section/Unit; and
- Ensure that the Individual Training File is administratively forwarded together with the member's Attendance Calendar(s) and the Employee Evaluation System (EES) Fact File when, transferred out of the Station/Section/Unit.

The Academy Commandant shall be responsible for maintaining current Department training records. Such records shall include, but not be limited to:

- Name, rank, ID#, and duty assignment of Department employees attending all training programs;
- Name and agency of non-department personnel attending all training programs;
- Attendance records;
- Name of instructor and course lesson plan;
- Individual records of performance evaluations administered with associated results; and
- The type of certificates, received, if any

All lesson plans, attendance records and testing results are filed and retained indefinitely.

Training for Civilian Employees

In Accordance with TRN-04 Professional Development, the Director of Human Resources shall develop and maintain guidelines related to the training and education of civilian employees.

All newly appointed civilian employees shall receive training in the following areas, at a minimum:

- Mission, goals and objectives of the Department;
- Applicable Department policy, procedure, rules, regulations and guidelines (e.g. workplace violence, harassment);
- Department Accreditation program/process;
- Department expectations and the civilian employees performance evaluation program;
- Working conditions of hired position; and
- Responsibilities and rights of employees.

Civilian positions requiring pre-service and in-service training shall be identified by the Director of Human Resources.

The Department shall provide training to civilian employees in accordance with law, Department policy and as requested by the Director of Human Resources. The Academy shall coordinate the presentation of training to civilian employees, as requested by the Director of Human Resources.

Subject:

Recruit Training

Policy

Prior to assuming duties as a sworn State Police Trooper, recruits shall be assigned to, and satisfactorily complete, a recruit training class. This class shall be held at the State Police Academy and fulfill the requirements as prescribed by Massachusetts General Laws and the Colonel/Superintendent.

Recruit Handbook

The Academy Commandant shall, prior to the commencement of a recruit training class, prepare and distribute to each recruit a handbook containing the following information:

- Recruit performance expectations;
- The rules and regulations governing the conduct of recruits while assigned to the Academy; and
- The method for determining the final overall average score of each recruit which shall be used to establish the class standing of each trainee.

Recruit Class Curriculum

The Academy Commandant shall develop a recruit class curriculum including, but not limited to:

- Constitutional principles, criminal law and procedure, motor vehicle law;
- Department operations, Rules and Regulations, Policies and Procedures;
- Use of force, including firearms;
- Emergency vehicle operations;
- CPR/First Responder training;
- Principles of leadership;
- Report writing, court testimony and communications skills;
- Cultural diversity and ethics; and
- Physical fitness and wellness.

Authorized Use of Recruits

The Colonel/Superintendent may authorize the use of recruits assigned to the State Police Academy to tasks not requiring law enforcement powers.

Subject:	
Field Training Program	

Policy

The Department shall provide a Field Training Program for recent Recruit Training Troop (RTT) graduates to transition from the controlled learning environment of the Academy to the responsibilities and duties of a State Trooper.

Field Training Program

The Field Training Program shall be twelve weeks in duration, or as prescribed by the Colonel/Superintendent. Successful completion of the program is contingent upon satisfactory attendance and performance.

Probationary Troopers may be assigned to three (3) Field Training Officers (FTOs), on different shifts, as set forth in the Field Training Program. Exceptions may be made for specific operational and training reasons.

Excessive absenteeism shall be reported to the Field Training Administrator and may result in termination of the Probationary Trooper.

Academy Commandant

The Academy Commandant is responsible for the administration of the Field Training Program. The Academy Commandant shall coordinate the selection of an appropriate number of FTOs through the Division of Field Services.

Prior to the commencement of the Field Training Program, the Academy Commandant shall develop and provide training to Station Commanders and FTOs. This training shall, at a minimum:

- Provide an overview of the current Academy recruit training program reinforcing:
  - The mission of the Department;
  - Fundamental training values;
  - Department goals and objectives; and
  - Instructions on the administration and reporting requirements of the Field Training Program.

Subject: Field Training Program	Number: TRN-03

Field Training Administrator

The Academy Commandant shall designate a member of the Academy Staff as the Field Training Administrator. The Field Training Administrator shall be responsible for:

- The management of the Field Training Program;
- The development and distribution of the Field Training Program Manual; and
- Coordinating the selection of FTOs with Troop Field Training Coordinators.

Troop Commander

The Troop Commander shall:

- Appoint a member to serve as the Troop Field Training Coordinator; and
- Allow the Troop Field Training Coordinator to modify their work schedule to effectively manage the Field Training Program.

Troop Field Training Coordinator

The Troop Field Training Coordinator shall:

- Administer the Field Training Program;
- Act as the liaison with the Field Training Administrator; and
- Review the Daily/Weekly Observation Reports on a weekly basis.

Station Commander

Station Commanders shall:

- Administer the Field Training Program within their sub-station;
- Review and approve all submitted FTO evaluations;
- Forward the approved evaluations to the Troop Field Training Coordinator; and
- Immediately notify the Troop Field Training Coordinator of any issues that arise during the Field Training Program.

Field Training Officer

The FTO performs a critical role in the development of the new trooper and shall be responsible for:

- Providing an effective learning environment through leadership and experience;
- Providing an opportunity to realistically apply the knowledge, ability, and skills acquired during academy training;
- Providing an example that promotes professionalism, public respect, and confidence;
- Complying with the procedures established in the Field Training Program; and
- Assessing the performance of Probationary Troopers and providing remedial instruction as necessary.

FTO's shall receive training in the FTO program both upon initial FTO assignment and subsequently prior to the graduation of any RTT for which the member will be assigned as an FTO.

Subject:	Number:
Field Training Program	**TRN-03**

Field Training Program Manual

The Field Training Program Manual shall:

- Be provided to Station Commanders and FTOs prior to the commencement of the Field Training Program;
- Clearly define the responsibilities of the FTO; and
- Provide specific direction concerning the knowledge, ability, and skills to be taught, performed and assessed.

Selection Process

The identification and selection of the FTOs is critical to the success of the Field Training Program.

Selection Process

- Station Commanders shall recommend to the Troop Commander members who demonstrate integrity, character, and commitment to the Field Training Program;
- Troop Commanders shall approve and forward the final list of FTOs to the Commander of the Division of Field Services; and
- The Division of Field Services Commander shall forward the names of the approved FTOs to the Academy Commandant.

Evaluations

Station Commanders and FTOs shall ensure that all written evaluation forms are submitted in accordance with the Field Training Program Manual.

All deficiencies that may impact the ability of the Probationary Trooper to safely and successfully complete the Field Training Program shall be brought to the attention of the Station Commander immediately.

Completion of Program

After twelve (12) weeks, the Station Commander shall forward a recommendation to the Field Training Administrator which shall include a conclusion as to:

- The Probationary Trooper is capable of working on their own; or
- An extension of the Field Training Program is necessary; or
- Termination of employment is appropriate.

The Troop Commander shall forward all recommendations for termination to the Colonel/Superintendent, through channels after consultation with the:

- Field Training Officer(s);
- Station Commander;
- Troop Field Training Coordinator; and
- Field Training Administrator.

Subject:	
Professional Development	

Policy

The Department recognizes the necessity of continuous education and training in order to maintain and enhance the knowledge, abilities, and skills of its sworn and civilian employees.

This shall be accomplished, in part, through an ongoing professional development program to include annual in-service training.

Compulsory Training

The Department shall provide compulsory training to all members.

The Deputy Division Commander of Standards and Training, shall:

- Ensure that an annual training assessment is conducted to identify the training and educational needs of the Department;
- Ensure the Academy Staff develops a training curriculum, based on annual training assessment; and
- Forward the training curriculum, through channels, for review and approval by the Colonel/Superintendent.

Members shall attend/receive compulsory training annually on dates assigned. Members who fail to attend may be subject to discipline.

In-service training may be conducted at the State Police Academy, any site approved by the Colonel/Superintendent, or through approved alternative means of communicating essential training/information to Department members.

Online Academy

The Online Academy Unit within the Academy shall:

- Be responsible for the development and distribution of online training, including, but not limited to, legal updates.

Members are encouraged to submit recommendations for training topics to the Online Academy Unit.

Subject:	Number:
Professional Development	**TRN-04**

Professional Development

The Department shall identify and develop training programs to be presented internally which shall provide its sworn and civilian employees with the opportunity to expand or enhance their knowledge, abilities, and skills in specialized areas, or upon promotion.

The Academy Staff shall be responsible for:

- Development and/or administration of courses in accordance with the procedures outlined in TRN-01 Training Administration;
- Maintaining a current schedule of professional development courses on the intranet website;
- Maintaining accurate attendance records for members who have attended training; and
- Forwarding to respective Troop/Section Commanders the accurate attendance records for members who have attended training upon completion of training.

Lesson plans, attendance records and grades shall be maintained indefinitely

Sworn and civilian employees may attend trainings or seminars intended to improve their professional abilities. Sworn and civilian employees requesting to attend professional development courses shall adhere to the procedure outlined within TRN-01 Training Administration. Authorization to attend may be granted based upon the applicability of the program and available Department resources.

Training Records

For the Department to maintain complete and accurate training records, commencing, January 1, 2012, members shall:

- Forward copies of training certificates or record of attendance for non-Department training to:
  - The State Police Academy (SPA); and
  - Their Station/Section/Unit Commanding Officer.
- Ensure that copies of certificates or records of attendance for any future non-Department trainings are forwarded to:
  - The State Police Academy (SPA); and
  - Their Station/Section/Unit Commanding Officer.

Note: If available, members are encouraged to forward training records acquired before January 1, 2012, to their Commanding Officer and the SPA for insertion into their files.

Station/Section/Unit Commanding Officers shall:

- Ensure that all members under their command have an Individual Training File that is retained and updated within the Station/Section/Unit; and
- Ensure that the Individual Training File is administratively forwarded together with the member's Attendance Calendar and the Employee Evaluation System (EES) Fact File when transferred out of the Station/Section/Unit.

Department of State Police
General Order

Effective Date:	Number:
November 22, 2022	**TRN-05**
Subject:	
State Police Cadet Program	

Policy

In accordance with M.G.L. c. 22C, § 10A the Colonel/Superintendent has established a State Police Cadet Program within the Department. The Program consists of a selection process for each Cadet Class, training at the State Police Academy, in-service training, and a series of rotating work assignments for a minimum of one year. Upon successful completion of the Program and passage of the Civil Service entrance examination, State Police Cadets may receive appointment to a Recruit Training Troop.

Purpose

To attract qualified candidates to a career in law enforcement, expose them to the operations and objectives of the Department, and encourage them to pursue a position as a Massachusetts State Police Trooper.

Goal

The underlying objectives of the Cadet Program are to provide young women and men with an alternative pathway to become sworn members of the Massachusetts State Police, as well as to increase recruitment, retention, and enhance diversity of personnel within the Department.

Cadet Academy and Training

The Academy Commandant shall develop a Cadet Class curriculum that will provide training related to the subject matter and skills utilized by the Department. The Academy Commandant determines the minimum acceptable standards for the Cadet Class as approved by the Colonel/Superintendent.

Cadets shall receive in-service training throughout the duration of the Cadet Program as determined by the Cadet Program Coordinator.

Cadet Training and Field Manual

Prior to the commencement of a Cadet Class, the Academy Commandant shall prepare and distribute to each Cadet a State Police Cadet Training and Field Manual containing, at a minimum, the following information:

- Cadet Academy performance and conduct expectations
- Cadet Standard Operating Procedures
- Cadet Code of Conduct / Cadet Rules of Conduct
- Cadet Program Policy

Cadet Program Directors

The State Police Cadet Program Directors shall consist of a Cadet Program Coordinator and a Cadet Program Administrator. The Cadet Program Coordinator shall be a commissioned officer and the Cadet Program Administrator shall be a civilian employee.

Duties

A Cadet is a civilian employee of the Department and shall not have any power of arrest other than that of an ordinary citizen. Cadets shall not carry firearms and/or any other use of force equipment.

Cadets may assist sworn members or civilian employees with any duties not requiring law enforcement powers as authorized by the Colonel/Superintendent.

Cadets may provide support to Department employees by performing administrative tasks, and providing supplemental aid as directed and assigned during operations and special occasions. Examples of such occasions include, but are not limited to, rendering non-sworn assistance during search and rescue missions, serving as support during large-scale events, or helping with the agency response to public safety emergencies resulting from extreme inclement weather or criminal activity.

Cadets may be permitted to participate in a patrol observation at the discretion of the Station/Section/Unit Commander and participating sworn member.

Cadets shall not perform any operational functions pertaining to detainees to include, but not be limited to, booking of detainees, cell checks, suicide watch, searches, and escorts.

Cadets shall not be involved in the collection of evidence, whether physical or testimonial or the evidentiary chain of custody processes.

Work Rotations

Cadets shall be assigned to various work assignment rotations throughout the Department as approved by the Colonel/Superintendent.

The Cadet Program Directors shall coordinate with Division Commanders to determine appropriate work assignments, work schedules, and duration of assignments.

Work Schedule and Physical Fitness

Cadets shall be assigned to work an eight and one-half hour work shift including a thirty-minute unpaid meal period to be taken as close to the middle of the work shift as possible. Cadets are not permitted to work through their meal period in order to arrive late to or leave early from their work shift.

Cadets are expected to participate in health maintenance in keeping with established standards for State Police Cadets for no longer than one hour during their scheduled work shift.

Supervision and Evaluations	Cadets will be assigned to the Station/Section/Unit Commander or Civilian Manager of their assigned work rotation. Station/Section/Unit Commanders and Civilian Managers will be responsible for Cadet evaluations, which will subsequently be reviewed by the Cadet Program Directors. Utilizing the series of rotation evaluations, the Cadet Program Directors will complete semi-annual, and annual evaluations, as well as an overall evaluation for each Cadet at the end of his/her tenure with the Program. Cadets' weekly HR/CMS payroll will be reviewed and approved by the Cadet Program Directors. Dual notification is required for all time off requests. Cadets shall submit requests for time off to the Cadet Program Directors and shall notify their Station/Section/Unit Commander, Civilian Manager or their designee.
Responsibilities of Sworn and Civilian Personnel	Sworn and civilian personnel shall create a professional work environment for Cadets to learn the operations and objectives of their work assignments. Such an environment will be fostered by providing exposure to and demonstration of various job tasks, and by encouraging mentorship by sworn and civilian personnel for the Cadets. Sworn and civilian personnel may provide positive or negative observations regarding a Cadet's performance to the Cadet's assigned Station/Section Unit Commander and/or the Cadet Program Directors.
Adherence to Rules, Regulations, and Policies	Cadets shall adhere to all Rules and Regulations and Policies and Procedures as required for all civilian employees of the Department as well as any Rules, Regulations and/or Policies or written directives specifically applicable to Cadets. Cadets shall also adhere to the State Police Cadet Training Manual including Cadet Rules of Conduct and SOPs for Cadets.
Extended Leave of Absence	Cadets on any approved leave of absence to include but not limited to FMLA, Military Leave, and Injured on Duty shall have to extend their time as a Cadet to fulfill the minimum twelve (12) month requirement for the Cadet Program if the twelve (12) months has not already been met. Cadets on any extended leave of absence will be referred to the Cadet Review Board.
Drug Testing	Cadets will be subject to random, reasonable suspicion, and post-incident drug testing. Refer to Cadet Drug Testing SOP.

Cadet Review Board (CRB)

The five (5) member Board will meet on an as needed basis to consider and act on any Cadet disciplinary or job performance issues. The Board will make written recommendations to the Colonel regarding any Cadet disciplinary or employment issues.

- Three (3) Commissioned Officers, one (1) of which will be the Department's Diversity Officer
- One (1) Department Human Resources Section Representative
- One (1) Department Civilian Manager

The Board will be made up of appointed members, along with appointed alternates, in order to maintain member familiarity with the Cadet Program practices and precedent.

In addition to the five Board members, the Cadet Coordinator or their designee shall act as the Board Facilitator. The Facilitator will be responsible for obtaining all needed documentation, and arranging testimony, when necessary, for the board to properly render a decision regarding business before it.

All meeting minutes and actions of the board will be maintained in ACISS by a Commissioned Officer member of the board assigned as Secretary for that particular meeting of the Board.

One Commissioned Officer will be assigned as the President for each meeting of the Board for the purpose of presiding over the meeting and maintaining decorum, seeking input from members, seeking outcome proposals by members, and after a meeting of the Board, declaring the Board's findings.

The Board will meet quarterly or as needed.

Uniform

Cadets shall wear the issued uniform unless alternate attire authorized by Station/Section/Unit Commander or designee and approved by the Cadet Program Directors.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**UOF-01**
Subject:	
Use of Force	

Policy

Members are authorized to use only that force which is objectively reasonable, in accordance with all applicable federal and state laws and regulations and the contents of this policy to:

- Effect the lawful arrest or detention of an individual;
- Prevent the escape from custody of an individual; or
- Prevent imminent harm, and the amount of force used is proportionate to the threat of imminent harm.

Members should assess each situation to determine which action shall best bring the incident under control, using only that amount of force that is reasonably necessary.

Members are authorized to use deadly force in accordance with applicable federal and state laws and regulations and the contents of this policy in order to protect themselves or others from an immediate threat of death or serious bodily harm.

If feasible, some clear, verbal warning shall be given before any use of force (UOF). Such warning should include identifying the member as a law enforcement officer where it is not readily apparent (e.g., at night; member is in plainclothes; member is in an unmarked vehicle.)

Members ***shall not use*** a chokehold or other tactics that restrict or obstruct an individual's breathing or oxygen or blood flow to an individual's head or neck. Members shall not be trained to use a lateral vascular neck restraint, carotid restraint or other action that involves the placement of any part of the Member's body on or around an individual's neck in a manner that limits the individual's breathing or blood flow.

Except to temporarily gain, regain or maintain control of an individual and apply restraints, a Member ***shall not*** intentionally sit, kneel, or stand on an individual's chest, neck, or spine, and shall not force an individual to lie on their stomach.

A Member ***shall not*** obstruct the airway or limit the breathing of any individual, nor shall a Member restrict oxygen or blood flow to an individual's head or neck. An individual placed on their stomach during restraint should be moved into a recovery position or seated position as soon as possible.

Subject	Number
Use of Force	**UOF-01**

Policy, continued

When it is objectively reasonable that a subject is under the control of law enforcement, the UOF shall terminate.

When safe, and tactically feasible, members shall always provide appropriate medical response and proper medical aid to individuals who are exhibiting signs of, or complaining of, injury or illness, including following a UOF or other law enforcement action.

Definitions

Actively Resistant Individual: An individual who uses physical strength and/or body movement to resist a Department member. Examples of active resistance include pulling, turning, or walking away from an officer.

Aggravated Assaultive Individual (Serious Bodily Harm/Death): An individual who engages in conduct that is likely to produce death or serious bodily harm to a Department member or another individual.

Assaultive Individual (Bodily Harm): An individual who attempts to injure a Department member or another person or engages in conduct that has the potential to injure a Department member or another person.

Chokehold: The use of a lateral vascular neck restraint, carotid restraint or other action that involves the placement of any part of a law enforcement officer's body on, or around, an individual's neck in a manner that limits the individual's breathing or blood flow with the intent of, or the result of, causing bodily injury, unconsciousness, or death.

Commission: The Massachusetts Peace Officer Standards and Training (POST) Commission as established in M.G.L. c.6E § 2.

Compliant Individual: An individual who is fully cooperative with a Department member.

Deadly Force: UOF intended to inflict, or reasonably be expected to cause, death or serious physical injury.

- Members may not use deadly force against an individual who poses only a danger to themselves.
- Deadly force shall not be used at any point in time when there is no longer an objectively reasonable belief than an individual currently and actively poses an immediate threat of serious bodily harm or death, even if deadly force would have been justified at an earlier point in time.

De-escalation Tactics: Proactive approaches to stabilize a law enforcement situation so that more time, options, and resources are available to gain voluntary compliance and reduce or eliminate the need for force. These approaches may include, but not be limited to:

- Verbal persuasion;
- Warnings;

Definitions, continued

- Slowing down the pace of an incident;
- Waiting out an individual;
- Creating distance between the member and a threat;
- Requesting additional resources, including, but not limited to, licensed medical or mental health professionals, as defined in M.G.L. c. 111 § 51 ½ (a), when appropriate, to address a potential medical or mental health crisis; and
- Issuing a summons as an alternative to arrest where feasible.

Force: The amount of physical effort, however slight, required by police to compel compliance by an unwilling individual.

- Physically escorting or handcuffing an individual with minimal or no resistance does not constitute a UOF for the purposes of 550 CMR 6.03.
- UOF ***does include*** the pointing of a firearm or Electronic Control Weapon at an individual, and the use of OC spray on an individual or directed towards an individual.

Less-Lethal Force: Any physical UOF, other than deadly force, to control, restrain, or overcome the resistance of another.

- Members are authorized to use less-lethal force in accordance with all applicable federal and state laws and regulations and the contents of this policy.

Objectively Reasonable: This term means that, in determining the necessity for and appropriate level of force, officers shall evaluate each situation in light of the known circumstances, including, but not limited to, the seriousness of the crime, the level of threat or resistance presented by the subject, and the danger to the officer, subject, or community. The reasonableness of a particular use of force must be judged from the perspective of a reasonable officer on scene, rather than with the 20/20 vision of hindsight. Determining reasonableness of force must allow for the fact that police officers are often required to make instantaneous judgments in circumstances that are tense, uncertain and rapidly evolving. The force used must be reasonable under the circumstances known to the officer at the time force is used. *Graham v. Connor* 490 U.S. 386 (1989)

Officer-Involved Injury or Death: Any event during which an officer:

- Discharges a firearm, actually or proximately causing injury or death to another;
- Discharges any stun gun. actually or proximately causing injury or death to another;
- Uses a chokehold, actually or proximately causing injury or death of another;
- Discharges tear gas or other chemical weapon, actually or proximately causing injury or death of another;
- Discharges rubber pellets from a propulsion device, actually or proximately causing injury or death of another;

Definitions, continued

- Deploys a dog, actually or proximately causing injury or death of another;
- Uses deadly force, actually or proximately causing injury or death of another;
  Fails to intervene, to prevent the use of excessive or prohibited force by another officer who actually or proximately causes injury or death of another; or
- Engages in a physical altercation with a person who sustains serious bodily injury, or requests, or receives medical care as a result.

Passively Resistant Individual: An individual who is non-violent and uncooperative but does not use physical strength or body movement to resist a Department member and does not pose an immediate threat to the member or the public.

- A law enforcement officer shall only use the amount of force necessary against an individual who is engaged in passive resistance to effect the lawful arrest or detention of said individual and shall use de-escalation tactics where feasible, including issuing a summons instead of executing an arrest where feasible.

Proper Medical Aid: Immediate first aid treatment, including CPR, administered on the scene of an incident/injury within the scope of the member's training. Additionally, medical aid includes the summoning of emergency medical services to assist in any condition or treatment that may escalate outside of the scope of the capabilities of the member(s) providing immediate first aid or requiring transportation to a medical facility based on the condition of the person receiving aid.

Reportable Incident: Shall include:

- Pointing of a firearm or Electronic Controlled Weapon (ECW) at an individual;
- Application of force through the use of deadly or less-lethal weapons;
- On-duty discharge of any weapon outside of a training range specifically designed for that purpose;
- Off-duty discharge of a Department weapon outside of a training range specifically designed for that purpose;
- Department issued ECW activation, drive stun and/or probe, on or off duty, as defined in UOF-06 Electronic Control Weapons;
- Compliance or striking techniques are used;
- Use of OC spray on an individual or directed toward an individual; or
- UOF which actually, or proximately, caused or is reported to have caused injury or death to another.

Sensitive Population Groups: Sensitive population groups include those who reasonably appear to be, or are known to be, children, elderly, medically infirm, pregnant, or users of a cardiac pacemaker.

Serious Bodily Injury: Injury that results in or involves a substantial risk of death, permanent or protracted disfigurement, or extended loss or impairment of the function of a body part or organ.

De-Escalation Mandates

A member shall not use *force* upon another individual unless:

- De-escalation tactics have been attempted and failed or such tactics are not feasible based on the totality of the circumstances and such force is necessary and proportionate to:
    - Effect the lawful arrest or detention of an individual;
    - Prevent the escape from custody of an individual;
    - Prevent imminent harm and the amount of force used is proportionate to the threat of imminent harm, while protecting the safety of the member(s) or others; or
    - Defend against an individual who initiates force against a member;
    - Provided, however, that a law enforcement officer may use necessary, proportionate and non-deadly force in accordance with the regulations promulgated jointly by the POST commission and the Municipal Police Training Committee.

A member shall not use *deadly force* unless:

- De-escalation tactics have been attempted and failed, or such tactics are not feasible based on the totality of the circumstances; and
- Such force is necessary to prevent imminent harm to an individual, and the amount of force used is proportionate to the threat of imminent harm, and;
    - The imminent harm poses an imminent danger of death or serious bodily injury to the member or another individual;
    - The member attempts as many de-escalation tactics as feasible under the circumstances, including utilizing barriers where feasible; and
    - The member uses only the amount of force that is objectively reasonable.

Subject	Number
Use of Force	**UOF-01**

Duty to Intervene & Report

If a member observes another officer using, or attempting to use, physical force, including deadly force, beyond that which is necessary or objectively reasonable based on the totality of the circumstances, they shall intervene to prevent the use of unnecessary or unreasonable force, regardless of the rank of the officer so observed, unless intervening would result in imminent harm to the member or another individual.

Failure to intervene may subject a member to disciplinary action, civil liability, and/or criminal prosecution.

Per MGL c. 6E §10 (a) (xv): The Commission shall, after a hearing, revoke an officer's certification if the Commission finds by clear and convincing evidence that the officer failed to intervene, or attempt to intervene, to prevent another officer from engaging in prohibited conduct or behavior, including, but not limited to, excessive or prohibited force in violation of MGL c.6E §15.

Per MGL c.6E §10 (d)(viii): The Commission may, after a hearing, order retraining for any officer if the Commission finds substantial evidence that a law enforcement officer: fails to intervene to prevent another law enforcement officer from engaging in prohibited conduct or behavior, except a failure to intervene in conduct that mandates revocation pursuant to said subsection (a).

Reports of abuse by law enforcement personnel including, but not limited to, law enforcement officers, shall be made without fear of retaliation, or actual retaliation.

Any harassment, intimidation or retaliation against any law enforcement officer who either intervened to prevent or stop an excessive force incident, or made, intended to make, or is required to make a report regarding the witnessed excessive force incident shall be reported immediately to an appropriate supervisor and will not be tolerated. Any such actions may result in de-certification by the Commission.

Retaliation is prohibited against any employee who observes and reports an instance of using physical force, including deadly force, beyond that which is necessary or objectively reasonable based on the totality of the circumstances. This includes the discharge of the employee, any change to their official rank, grade or compensation, denial of a promotion or taking any other adverse action against said employee, or threatening to take any such action for providing information to the Department or testifying in any Department hearing or at any court proceeding resulting, or for providing information to the POST or testifying in any POST proceeding resulting.

Duty to Intervene Reporting Requirements

Position	Requirements
Observing Member	• Report the incident to an immediate on-duty Supervisor, not involved in the incident, as soon as reasonably possible, but no later than the end of the member's shift. This reporting shall documented in the daily administrative journal to include the name of the Supervisor the initial report was made; and • Within 24 hours of the initial report, absent extenuating-documented circumstances, submit to the Supervisor whom the initial report was made, a detailed written report describing the incident consistent with uniform reporting protocols.
Supervisor	• Notify the Troop Duty Officer of jurisdiction of the report; • Conduct and document a preliminary investigation to gather the pertinent facts and information required for a follow-on investigation; • Prepare a detailed written report documenting the member's report, steps taken by the Supervisor upon receipt of the member's report, and subsequent investigative actions; and o The reporting member's written report shall be included in the Supervisor's report. o If the reporting member is unable to provide a written report, due to extenuating-documented circumstances, the Supervisor shall utilize the initial report as the foundation for their subsequent written report. • Submit their written report to their Troop/Section Commander within 24 hours.
Troop Duty Officer	• Assign a Supervisor to conduct an investigation, if the observing member reports the incident to the Troop Duty Officer directly; • Document the initial report in the Troop HQ Daily Administrative Journal; and • Notify the Troop/Section Commander of the initial report upon receipt.
Troop/Section Commander	• Notify their Division Commander and the Division Commander of DST upon receipt of the initial report notification.
Division Commander-DST	• Initiate an investigation in accordance with Department guidelines.

Use of Force Responses

(Note: *UOF responses need not be exercised in progression*.)

Determining the level of force necessary may depend on resistance levels and circumstances. Factors in this decision include, but are not limited to:

- Subject vs. member - relative to age, size, physical condition, skill level;
- Subject's drug and alcohol use;
- Weapons - type, proximity;
- Seriousness of offense;
- Exigent circumstances; and
- Number of potential assailants vs. number of law enforcement officers on the scene.

If the subject is…	Then the response may include…
Compliant	• Verbal commands
Passively Resistant	• Verbal commands; and/or • Contact control techniques.
Actively Resistant	• Verbal commands; • Contact control techniques; • Compliance techniques; • Distraction techniques; • Oleoresin Capsicum (OC) Spray, according to training; • Laser activation of Electronic Control Weapon (ECW) according to training; • Warning Arc of Electronic Control Weapon (ECW) according to training; and • Drive Stun deployment of Electronic Control Weapon (ECW) according to training.
Assaultive-Bodily Harm	• All of the above responses; • Striking techniques; • Probe deployment of Electronic Control Weapon (ECW) according to training; and • Any other Department approved less-lethal force equipment.
Aggravated Assaultive - Serious Bodily Harm /Death	• All of the above responses; and • Deadly force.

Use of Force

Verbal Commands
Commands and gestures designed to:
- Effect compliance; and
- Express the member's intent.

Contact Control Techniques
Touch techniques (carrying and guiding) not designed to produce pain compliance.

Compliance Techniques
Techniques authorized by the Department that may be used to achieve compliance and/or control of an actively resistant or assaultive subject.

In exigent circumstances, other compliance techniques may be used.

Distraction Techniques
Techniques intended to temporarily break the mental focus of an actively resisting individual and create an opportunity for the member to apply a compliance or control technique. Distraction techniques may be similar to striking techniques, but they differ in *intent* and *intensity*. The *intent* is to take the subject's focus off of their chosen method of resistance so that the member can bring them under control, unlike a striking technique, where the intent is to stop an assault. The *intensity* is, therefore, less than it would be with a striking technique. The intensity of the distraction technique should be limited so as not to create substantial trauma or lasting injury.

OC Spray
OC spray may be used in situations involving:
- Assaultive subjects; or
- Actively Resistant subjects when:
  - Verbal commands have failed to bring about compliance; and
  - Subject has signaled their intentions to actively resist.

OC spray shall not be used on passive resisters who offer **NO** physical resistance.

Striking Techniques
Striking techniques may be used on an assaultive subject to achieve compliance and/or control.

Striking techniques may include the use of issued equipment (e.g., baton, flashlight), as well as hands, feet, elbows, or knees.

In exigent circumstances, other instrumentalities may be used.

Electronic Control Weapons (ECW)
Department Members are authorized to use ECW in accordance with Department training and UOF-06 *Electronic Control Weapons.*

Subject	Number
Use of Force	**UOF-01**

Use of Deadly Force: Preventing Escape	Members are authorized to use deadly force to prevent the escape of a suspect when the member has probable cause to believe that:
	• The arrest is for a felony; and
	• The member believes that the force employed creates no substantial risk of injury to innocent persons; and either:
	  ○ The crime for which the arrest is made involved conduct including the use or threatened use of deadly force; or
	  ○ There is a substantial risk that the individual to be arrested will cause death or serious bodily harm / serious physical injuries if the suspect's apprehension is delayed; and
	• If feasible, some clear, verbal warning has been given.

A member <u>may</u> discharge a firearm for:	• The lawful performance of duties; • On or off duty training at a range, specifically designed for that purpose and using only Department authorized ammunition; or • Rendering harmless an animal that represents a threat to public safety or is seriously injured and suffering.
A member **<u>SHALL NOT</u>** discharge a firearm:	• As a warning.

Subject	Number
Use of Force	**UOF-01**

Discharge of a Firearm At a Moving Motor Vehicle	**Members shall:** • As a first course of action, remove themselves from the path of a moving vehicle or position of vulnerability; and • Understand and consider that: o Bullets fired at moving vehicles are unlikely to stop or disable the motor vehicle; o Bullets fired may miss the intended target or ricochet and cause injury to themselves, other officers, or innocent persons; or o If the bullets disable the operator, the vehicle may crash and cause injury to themselves, other officers, or innocent persons. **A member SHALL NOT discharge a firearm:** • To merely disable a fleeing vehicle; or • At, into, or from a moving vehicle, **UNLESS,** based on the totality of the circumstances, including the risk of safety to other persons in the area, such discharge is objectively reasonable, necessary to prevent imminent harm to a person and the discharge is proportionate to the threat of imminent harm and only if the following conditions exist: o An individual in the vehicle is threatening the member or another person with deadly force by means other than the vehicle; or the vehicle is operated in a manner deliberately intended to strike a member or another person, and all other reasonable means of defense have been exhausted or are not present or practical, which includes moving out of the path of the vehicle; o Member(s) have not intentionally positioned themselves in such a way as to create a likelihood of being struck by an occupied vehicle (e.g., surrounding a vehicle at close proximity while dismounted); o The member is not discharging the firearm strictly to disable the vehicle; and The circumstances provide a high probability of stopping or striking the intended target.

Ready Position	When the member reasonably believes that there is a potential threat of serious bodily harm/serious physical injuries or death, the firearm may be placed at the ready position: • Trigger finger is alongside of the frame except when ready to engage; and • In a safe direction, below the line of sight, so as not to impede member's vision.

Subject	Number
Use of Force	**UOF-01**

Use of Force Equipment and Training	The Colonel/Superintendent shall authorize the specific UOF equipment and training to be used by members. Members are responsible for keeping their equipment clean and operational at all times. All members shall successfully complete training and be certified in the specific UOF equipment prior to being authorized to carry or use such force options and/or equipment.

Investigations/ Reporting

The reporting and investigation of UOF by a member shall be in accordance with UOF-03 Use of Force Reporting, initiated upon any UOF reportable incident.

Temporary Relief from Duty

A member, whose action(s) or UOF in an official capacity results in death or serious bodily injury shall:

- Be placed on administrative leave in accordance with Article 6. A duty status board shall be convened to review the actions of the member and recommend the appropriate duty status.

Promulgated By: John E. Mawn Jr., Colonel/Superintendent

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**UOF-02**
Subject:	
Use of Force Response	

Policy

The Department shall immediately respond to the scene and conduct an investigation when a use of force results in:

- A death;
- Serious bodily injury; and/or
- Any reportable discharge of a firearm per UOF-03 Reports.

Firearm discharge not requiring an investigation:

- Authorized testing in a properly controlled environment (e.g. Armorer, Ballistician); or
- A firearm is discharged at a range, specifically designed for training and using only Department authorized ammunition; or
- Rendering harmless an animal that is seriously injured and suffering.

For the purpose of this policy, the term "member" shall apply to sworn members of the Department; the term "employee" shall apply to civilian non-sworn members of the Department.

Definitions

Deadly Force: Use of force intended to inflict, or reasonably be expected to cause, death or serious physical injury.

Less-Lethal Force: Any physical use of force, other than deadly force, to control, restrain, or overcome the resistance of another. 550 CMR 6.03

Serious Bodily Injury: Injury that results in or involves a substantial risk of death, permanent or protracted disfigurement, or extended loss or impairment of the function of a body part or organ.

Officer-Involved Use of Deadly Force Investigation

Fatal

When a Department member is involved in a use of deadly force resulting in a fatality, the District Attorney's Office or State Police Detective Unit (SPDU) of jurisdiction shall direct the investigation.

Non-Fatal

When a Department member is involved in a use of deadly force **not** resulting in a fatality, the Division of Investigative Services (DIS) Major who oversees the area where the incident occurs shall assign a Commissioned Officer from DIS to conduct an investigation.

Force Investigation Response and Support Team (FIRST)

The Force Investigation Response and Support Team (FIRST) shall:

- Be comprised of Commissioned Officers designated by the Colonel/Superintendent;
- Be assigned to regional teams; and
- Assist the DIS Commander.

FIRST Activation

Upon notification of an incident resulting in the use of deadly force, the Communications Section shall notify:

- The DIS Commander or designee; and
- The SPDU Commander of jurisdiction.

The DIS Commander or designee shall dispatch the FIRST.

FIRST Duties

The DIS Commander or designee shall determine the duties of the FIRST which may include:

- Verify that the following has occurred:
  - The scene is safe and secure;
  - A perimeter has been established;
  - Threats have been eliminated; and
  - Any suspect(s) have been secured.
- Verify that all proper notifications are made, through channels to the Colonel/Superintendent;
- Identify a controlled area for on-scene interviews and conduct interviews where appropriate;
- Verify that individuals are advised of their rights; and
- Coordinate with the assigned DIS investigator to notify next of kin of all law enforcement and/or civilian victims in accordance with ADM-12 Serious Injury/Death of a Member, if necessary.

Weapons Seizure

The first responding Supervisor shall:

- Immediately seize or take custody of involved weapons and magazines (if applicable);
- Transfer custody of the seized weapon to the Firearms Identification Section (FIS); and
- Assist the FIS and Crime Scene Services personnel in the processing of evidence.

Crime Scene Services

Crime Scene Services shall:

- Respond to the scene and coordinate all Crime Scene Services activities with the assigned DIS investigator;
- Gather all evidence at the scene in accordance with INV-10 Evidence Collection/Preservation; and
- Map, photograph, and videotape the scene, if necessary.

Interviews

Interviews with involved Department members shall be:

- Conducted by a Commissioned Officer, as directed by the assigned DIS investigator.

Interviews with civilian witnesses may be:

- Conducted by Commissioned and/or Non-Commissioned Officers as directed by the assigned DIS investigator.

Troop/Section Commanders

The Troop/Section Commanders of jurisdiction shall:

- Establish intra-agency cooperation in conjunction with the assigned DIS investigator.

Firearms Identification Section

If a firearm is involved, a member of the FIS shall:

- Respond to the scene, take custody of any involved firearms, and begin a firearms related investigation; and
- Notify the Armorer when a Department firearm is removed from service.

If appropriate, a temporary firearm shall be issued by the Armorer or designee, as specified in ADM-20 Weapons Management.

Members Using Force

A member involved in a use of force incident resulting in death or serious bodily injury shall:

- Surrender use of force equipment **only** to a Department Supervisor;
- Absent an injury, incapacitation, or other exigent circumstances:
  - Submit a detailed written report not less than twenty-four (24) hours, nor more than forty-eight (48) hours after the incident; or
  - Submit to an interview by a Commissioned Officer involved in the investigation, in lieu of a written report, subject to all rights under applicable laws and collective bargaining agreements; and
  - Submit a SP 376 Use of Force Report to the assigned DIS Investigator, within twenty-four (24) hours of the incident.
- Submit to a follow-up interview, if necessary; and
- Be allowed to contact a union representative, if desired.

Temporary Relief from Duty

Sworn Department Members:
A sworn member whose action(s) or use of force in an official capacity results in death or serious physical injury shall:

Be placed on administrative leave with pay in accordance with Article 6. A duty status board shall be convened to review the actions of the member, and recommend the appropriate duty status.

When involved in a shooting a sworn member shall be placed on Administrative Leave with pay for up to five (5) work days.

Civilian Department Employees:
Civilian employees of the Department whose actions, in an official capacity, have resulted in death and/or serious physical injury of another party may be removed from their assignment and placed on administrative leave with pay pending an administrative review and/or investigation conducted in accordance with the Commonwealth Human Resources Division's regulations and policies and any applicable collective bargaining agreement.

Medical Evaluations

A member shall undergo a medical evaluation by the State Police Surgeon prior to returning to duty from any period of Administrative Leave following a shooting, or when a member's actions result in a death.

Employee Assistance Unit

Members and employees are strongly encouraged to contact the Employee Assistance Unit (EAU) for additional support and assistance.

Follow-up counseling and assistance shall be provided by the EAU as needed.

The EAU shall also assist members and employees in obtaining support resources outside the Department.

Responsibilities and Protocol

Position	Responsibilities
All Members at Scene	• Administer and secure medical aid after any use of force, if necessary; • Protect and secure the scene; • Ensure the Desk Officer has been notified; • Speak only to Department investigators, unless otherwise ordered by a member of the Command Staff; and • May consult an attorney.
Desk Officer	• Dispatch necessary assistance to the scene; • Notify Troop Duty Officer and Station Commander; • Make appropriate Records Management System entries; and • Refer media inquiries to the Media Relations Section or the District Attorney's Office.
Troop Duty Officer	• Dispatch to the scene a Supervisor who is at least one rank higher than the involved member; • Notify Troop Commander; • Notify appropriate DIS on-call representative; • Notify GHQ Communications Duty Officer; • Make appropriate Records Management System entries; and • Refer media inquiries to the Media Relations Section or the District Attorney's Office.
Supervisors	• Ensure EMS has been notified and determine the condition of all members and civilians at the scene; • Ensure involved weapon(s) have been seized and secured; • Ensure the area has been secured and limit entry to the scene; • Record and document all members present at the scene in the on-scene access control log; • Keep Troop Duty Officer informed; and • Refer media inquiries to the Media Relations Section or the District Attorney's Office.

Responsibilities and Protocol, continued

Position	Responsibilities
GHQ Communications	• Notify Colonel/Superintendent; • Notify DIS Commander or designee; • Ensure appropriate DIS on-call representative has been notified; • Notify Media Relations Section; and • Notify Employee Assistance Unit.
Lead DIS Investigator	• Assume control of the scene; • Coordinate actions with the Troop Commander and/or DIS Commander or designee; • Before interviewing or requesting written statements, advise the involved member(s) of their rights, if the member is suspected of violating the law; and • Review and submit a SP 376.
Troop Commander of Jurisdiction	• Notify Division Commander of involved member(s); • Proceed directly to scene in incidents of death or serious bodily injury; and • Assist the media pending arrival of the Media Relations Section.
Division Commander of Member(s) Involved	• Appoint a Commissioned Officer to conduct an Administrative Review of the final report issued by the assigned DIS Supervisor responsible for the investigation. • Note: The Administrative Review is to ensure that members followed Department procedures during the incident.
Colonel/ Superintendent	• Notify Executive Office of Public Safety and Security (EOPSS).

General Order

Effective Date:	Number:
May 25, 2023	**UOF-03**
Subject:	
Use of Force Reporting	

Policy

All incidents involving the use of force (UOF) shall be documented.

Members shall adhere to the Duty to Intervene and Report mandates of General Order UOF-01, Use of Force.

The Department shall report to the National Use of Force Data Collection Database when actions by a member resulted in the death or serious bodily injury of an individual, or when a member, in the absence of death or serious bodily injury, discharged a firearm at, or in the direction of an individual.

Definition

Commission: The Massachusetts Peace Officer Standards and Training (POST) Commission as established in M.G.L. c.6E § 2.

Deadly Force: Use of force intended to inflict, or reasonably be expected to cause, death or serious physical injury.

Force: The amount of physical effort, however slight, required by police to compel compliance by an unwilling individual.

- Physically escorting or handcuffing an individual with minimal or no resistance does not constitute a use of force for the purposes of 550 CMR 6.03.
- Use of force ***does include*** the pointing of a firearm or Electronic Control Weapon at an individual, and the use of OC spray on an individual or directed towards an individual.

Less-Lethal Force: Any physical use of force, other than deadly force, to control, restrain, or overcome the resistance of another.

Reportable Incident: Shall include:

- Pointing of a firearm or Electronic Control Weapon (ECW) at an individual;
- Application of force through the use of deadly or less-lethal weapons;
- On-duty discharge of any weapon outside of a training range specifically designed for that purpose;
- Off-duty discharge of a Department weapon outside of a training range specifically designed for that purpose;
- Department issued ECW activation, drive stun and/or probe, on or off duty, as defined in UOF-06 Electronic Control Weapons;
- Compliance or striking techniques are used;

Definition, continued

- Use of OC spray on an individual or directed toward an individual; or
- Use of force which actually, or proximately, caused or is reported to have caused injury or death to another.

Serious Bodily Injury: Injury that results in or involves a substantial risk of death, permanent or protracted disfigurement, or extended loss or impairment of the function of a body part or organ.

Use of Force Reporting

Any reportable incident, as defined above, shall be reported to the Station Desk Officer of jurisdiction and documented within the Records Management System.

The involved member(s) shall:

- Submit a SP 376 *Use of Force Report* along with the SP12 or To/From within twenty-four (24) hours of the incident, absent an injury, incapacitation, or other circumstances, with approval from their Division Commander; and
- TASER X2: Ensure that Station/Unit Commander or Designee is provided access to ECW for downloading purposes.
- TASER 7: Place the battery in a dock within 24 hours of a reportable incident and ensure data upload is completed.

A member who knowingly makes an untruthful statement concerning a material fact or knowingly omits a material fact from a use of force report may be subject to de-certification by the Commission.

Use of Force Review

Supervisory/Administrative reviews of UOF incidents shall not be conducted by a member involved in the use of force incident under review.

Supervisors shall:

- Ensure members submit a SP 376 along with the SP12 or To/From;
- Review every SP 376 and SP12 or To/From; and
- Forward all reports to the Division Commander, through channels with findings and recommendations as to the necessity of further investigation of the incident no later than 5 business days from receipt of the SP 376.

Station/Unit Commander or Designee Shall:

- Ensure that ECW data is downloaded per manufacturer instructions; and
- Ensure that data from ECW download is consistent with reports submitted by involved member(s).

The Troop Commander and/or Detective Captain of jurisdiction:

- Shall assign a Commissioned Officer to conduct an administrative review of the use of deadly force; or
- May assign a Commissioned Officer to conduct an administrative investigation of the use of less-lethal force.

Use of Force Review, continued

Division Commanders shall:

- Forward a copy of all reports, through channels, to the Division of Standards and Training; and
- Forward a copy of all reports to the Use of Force Review Committee.

Division of Standards and Training Commander may:

- Provide a copy of each report involving the discharge of a firearm to the Director of Firearms Training.

Use of Force Review Committee

The Deputy Superintendent shall appoint members of the UOF Review Committee. The UOF Review Committee shall evaluate each use of force incident and forward their findings and recommendations to the Deputy Superintendent.

Use of Force Review Committee Evaluation

The Committee shall determine that the UOF was:

- Within Department guidelines; or
- Outside Department guidelines.

The Committee's evaluations and recommendations shall include:

- Tactics and training considerations;
- Supervision considerations;
- Department directives; and
- The need for further Department action.

Classifications of weapons discharge include:

- Intentional: deliberate discharge;
- Unintentional: when a member does in fact depress the trigger and causes the firearm to discharge without consciously or deliberately wanting to do so; or
- Accidental: restricted to the description of a mechanical flaw, shortcoming, or breakdown of a firearm that occurs from such causes as excessive wear, corrosion, mechanical design, or a part breakage, which would allow the weapon to discharge without the shooter depressing the trigger; and
- Other findings as necessary.

Use of Force Reports Records

The Committee shall maintain in the Deputy Superintendent's Office, a secure file of all UOF Reports, investigations, and reviews.

The Committee shall prepare an annual report analyzing Department UOF reporting. The report shall summarize annual UOF statistics, the findings on any patterns or trends identified and a finding on whether any changes are needed in agency policies, practices, equipment, or training. The annual report shall be provided to the Colonel/Superintendent.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**UOF-04**
Subject:	
Use of Force-Equipment	

Policy

Members on-duty shall carry and use only Department issued use of force (UOF) equipment for which they have received Department approved training and maintain a current certification.

Definition

Gun Safe: a safe, gun safe, gun case, lock box, or other device that is designed to be or can be used to store a firearm and that is designed to be unlocked only by means of a key, a combination, or other similar means in accordance with M.G.L. C. 140 §131.

Use of Force Equipment: All equipment approved by the Colonel/ Superintendent and issued by the Department including, but not limited to, firearms, ammunition, Oleoresin Capsicum (OC) Spray, batons, Electronic Control Weapons (ECW), and/or any other equipment used to effect control and compliance of a subject.

Purchase/ Issuance

Title	Duties
Colonel/ Superintendent	• Shall approve all UOF equipment issued and utilized by the Department; and • Shall authorize, in writing, the Division of Administrative Services (DAS) to purchase all UOF equipment issued and utilized by the Department.
Division of Administrative Services (DAS)	• Is solely responsible and solely authorized to purchase any and all UOF equipment issued and utilized by the Department; and • Shall purchase any and all UOF equipment issued and utilized by the Department pursuant to the written authorization of the Colonel/Superintendent or designee.

Purchase/ Issuance, continued

Title	Duties
Armorer	• Shall test and recommend UOF equipment, including ammunition, through channels to the Office of the Superintendent or designee; • Issue and maintain UOF equipment; • Document and retain all records related to UOF equipment; • Maintain and update the UOF Master Equipment List approved by the Colonel/Superintendent; • Inspect and approve all weapons authorized to be used in the performance of duty before issuance; • Inspect and re-issue UOF equipment, turned in by members, that is operational and in good working order; and • Replace UOF equipment as needed.

Inspections

All UOF equipment shall be inspected for condition and operational readiness, only by a supervisor trained to inspect such equipment. Inspection(s) shall be documented in the appropriate Department database.

Supervisors shall:
- Remove from service any UOF equipment found to be defective; and
- Notify the Armorer when a Department firearm or ECW is removed from service.

Title	Duty	Occurrence
Commanders/ Supervisors	Direct/conduct an inspection of all UOF equipment of those under their supervision.	Quarterly
UOF Instructors/ Armorer	Conduct and document an inspection of all UOF equipment as applicable.	Initial issuance and/or requalification.
Office of Professional Integrity & Accountability	Conduct an inspection of all UOF equipment.	As appropriate

Maintenance

All UOF equipment shall be kept clean and operational at all times.

Issued firearms shall be cleaned promptly after training:
- In a safe location and manner; and
- Prior to leaving any range.

Only the Armorer and personnel authorized by the Armorer shall repair or modify any UOF equipment or parts.

ON DUTY Carry/Security

While on duty:

- Uniformed members shall carry issued sidearms secured in an issued holster; and
- Non-uniformed members shall carry issued sidearms secured in an issued holster, or otherwise authorized holster, as approved by the Colonel/Superintendent.

When carrying issued firearms, members shall do so in a safe and secure manner:

- Sidearms shall be fully loaded with a round in the chamber and the weapon de-cocked, if equipped;
- Desk Officers shall carry their sidearm in their holster on their person;
- Firearms shall not be left unattended in any non-secure location such as a desk drawer or file cabinet; and
- Firearms and ECWs **shall not** be carried on a member's person during the booking process, including (but not limited to) booking, fingerprinting, and the administration of the breath test.

OFF DUTY Carry/Security

Only Department issued/trained/approved firearms, ammunition and UOF equipment are authorized for members performing official police duties and responsibilities off-duty.

Members are not required to carry any Department issued firearm, ammunition or UOF equipment while off-duty.

Members carrying a firearm, ammunition or UOF equipment not issued/trained/approved by the Department shall comply with the licensing restrictions set forth in M.G.L. C. 140 §131 and MSP Policy, Rules & Regulations.

Indemnification of off-duty use of force actions shall be determined in accordance with M.G.L. C. 258 §9A.

When carrying a Department issued firearm off duty, the following items shall be in the member's possession:

- The member's Department's Badge of Office;
- The member's Department's Identification Card; and
- The member's active License to Carry a Firearm.

When issued firearms are not being carried, they shall be secured with the issued firearm lock and/or in a gun safe, inaccessible to children and others.

OFF DUTY Carry/Security, continued

Members are not authorized to carry their Department issued ECW while off-duty.

When off-duty, members shall secure Department issued ECWs in a manner consistent with the securing of a firearm and in accordance with all applicable Massachusetts Laws. Members must ensure that Department issued ECWs are inaccessible to children and others.

Firearms in Vehicles

Firearms shall not be left unattended in any vehicle, unless the vehicle is a Department issued vehicle for which the Department has authorized a gun safe or other device designed to secure the weapon and the firearm is secured in such a device. When a member stores a firearm in such a device within an unattended Department vehicle, the device shall be locked and secured, the vehicle's windows shall be closed, and the vehicle's doors shall be closed and locked.

Examples of properly secured weapons:

Patrol Rifle:

- The patrol rifle shall be secured in the Department installed gun rack in accordance with the patrol rifle standard operating procedures.

Shotgun:

- The shotgun shall be secured in the Department installed gun rack, in accordance with shotgun standard operating procedures; and
- If equipped, the key lock shall be engaged when the vehicle is unattended.

STOP Team:

- Firearms shall be secured in accordance with STOP Team standard operating procedures.

Vehicle Safe Requests:

Members requesting to install a gun safe within Department vehicles shall:

- Submit a written request for approval to their Division Commander articulating the need for such a device;
- If approved, coordinate with the Fleet Administrator regarding the professional installation of the safe and regarding the location of installation within the vehicle; and
- Agree, in writing, to assume all responsibility for:
  - The loss or theft of the safe; and
  - Any damage caused to the vehicle associated with the installation or removal of the safe.

, continued

The Armorer shall:

- Determine and approve the make and model of all gun safes to be issued by the Department; and
- Advise the Fleet Administrator of the gun safes authorized for purchase.

Division Commanders shall forward all gun safe requests, whether approved or denied, to the Fleet Administrator.

Soft Body Armor

Soft body armor shall be issued to members with the intent that it be worn as often as possible, while on duty.

Members who decline to wear the issued soft body armor shall submit a letter to the appropriate Division Commander stating their reasons. Issued soft body armor a member declines to wear shall be stored and readily accessible in the member's cruiser.

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**UOF-05**

Subject:

Use of Force Training

Policy

The Department shall provide training and instruction to every member to become proficient in the use of issued weapons and control techniques.

Training and proficiency testing shall be provided by instructors certified in the weapon(s) and/or technique(s) they are providing instruction/testing on.

All members shall successfully complete approved training, qualify and be certified with weapons and techniques prior to use.

The Department shall provide pre-service training to trainees and annual training to sworn members on de-escalation tactics.

Training protocols shall adhere to, or exceed, applicable federal and state laws and regulations for members to become, and remain in, good standing as law enforcement officers. The Department's training protocols shall include substantive instruction on the agency's use of force (UOF) policies and procedures, de-escalation techniques, and related legal updates.

Members ***shall not use*** a chokehold or other tactics that restrict or obstruct an individual's breathing or oxygen or blood flow to an individual's head or neck. Members shall not be trained to use a lateral vascular neck restraint, carotid restraint or other action that involves the placement of any part of the Member's body on or around an individual's neck in a manner that limits the individual's breathing or blood flow.

Except to temporarily gain, regain or maintain control of an individual and apply restraints, a Member ***shall not*** intentionally sit, kneel, or stand on an individual's chest, neck, or spine, and shall not force an individual to lie on their stomach.

A Member ***shall not*** obstruct the airway or limit the breathing of any individual, nor shall a Member restrict oxygen or blood flow to an individual's head or neck. An individual placed on their stomach during restraint should be moved into a recovery position or seated position as soon as possible.

Instructors shall document and provide to the Academy Director of Training all training records including, but not limited to, approved lesson plans, dissemination and instruction of applicable policies, attendance records, proficiency-test results and related training materials.

Definitions

Chokehold: The use of a lateral vascular neck restrain, carotid restraint or other action that involves the placement of any part of a law enforcement officer's body on, or around, a person's neck in a manner that limits the person's breathing or blood flow with the intent of, or the result of, causing bodily injury, unconsciousness or death.

Deadly Force: Use of force intended to inflict, or reasonably be expected to cause, death or serious physical injury.

- Members may not use deadly force against an individual who poses only a danger to themselves.
- Deadly force shall not be used at any point in time when there is no longer an objectively reasonable belief than an individual currently and actively poses an immediate threat of serious bodily harm or death, even if deadly force would have been justified at an earlier point in time.

De-escalation Tactics: Proactive approaches to stabilize a law enforcement situation so that more time, options, and resources are available to gain voluntary compliance and reduce or eliminate the need for force. These approaches may include, but not be limited to:

- Verbal persuasion;
- Warnings;
- Slowing down the pace of an incident;
- Waiting out an individual;
- Creating distance between the member and a threat;
- Requesting additional resources, including, but not limited to, licensed medical or mental health professionals, as defined in M.G.L. c. 111 § 51 ½ (a), when appropriate, to address a potential medical or mental health crisis; and
- Issuing a summons as an alternative to arrest where feasible.

Force: The amount of physical effort, however slight, required by police to compel compliance by an unwilling individual.

- Physically escorting or handcuffing an individual with minimal or no resistance does not constitute a use of force for the purposes of 550 CMR 6.03.
- Use of force ***does include*** the intentional pointing of a firearm or Electronic Control Weapon at an individual as an attempt to control that individual's movements, and the use of OC spray on an individual or directed towards an individual.

Less Lethal Force: Any physical use of force, other than deadly force, to control, restrain, or overcome the resistance of another.

Definitions, continued

- Members are authorized to use less lethal force in accordance with all applicable federal and state laws and regulations and the contents of this policy.

Specialized Firearms: Any firearm other than the primary duty pistol(s).

Training

Prior to being authorized to carry a lethal/less-lethal weapon, the instructor shall ensure members receive direction on access to, and instruction in the Department's UOF policies including, but not limited to:

- De-Escalation Tactics;
- Use of reasonable/necessary force;
- Use of deadly force;
- Warning shots (firearms training only);
- Authorized less-lethal weapons; and
- Rendering aid after the use of weapons and/or force.

The issuance and/or policy access direction, and instruction shall be documented in the UOF lesson plan.

At least annually, all Department members authorized to carry weapons shall receive in-service training on the Department's UOF policies, de-escalation tactics and demonstrate proficiency with all approved deadly weapons and electronic controlled weapons issued to the member. The administration of the training shall be documented and records maintained by the State Police Academy (SPA).

At least biennial (every 2 years) all Department members shall receive current in-service training and testing with less-lethal weapons including baton, Oleoresin Capsicum Spray (OC), any other less lethal weapons and weaponless control techniques. The administration of the training shall be documented and records maintained by the SPA.

- Members that are unable to qualify with less-lethal weapons or techniques will receive remedial training and demonstrate proficiency in same prior to resuming official duties.

Safety is of paramount importance. Regardless of a member's rank, certified UOF instructors shall be in command of all personnel and equipment during training.

Training shall, as closely as practicable, reflect the conditions with which members are likely to be confronted. This training shall include comprehensive instruction in:

- The Department's UOF directives and applicable standard operating procedures;
- Legal updates;
- Proficiency and safe weapons handling skills; and
- Safety, storage, and maintenance of UOF weapons and equipment.

Failure to Qualify with Firearms

Those members who fail to meet initial qualification and firearms handling standards shall receive immediate remedial assistance. Members may receive two (2) additional opportunities to qualify within the same day; unless the Supervisor of Firearms Training determines that it would be unsafe or impractical to do so.

In the event a member fails to achieve qualification standards after remedial assistance, the Division of Standards and Training Commander, or designee, shall immediately notify the Deputy Superintendent.

Firearms Remedial Training

Member(s) failing to initially qualify shall be assigned to the Range for the Remedial Training Program.

The Remedial Training Program shall consist of three phases designed to assist the remedial shooter in attaining firearms qualification standards. The content of the remedial program shall be determined by the Supervisor of Firearms Training.

- Phase 1 Remedial Training shall consist of one (1) training day;
- Phase 2 Remedial Training shall consist of two (2) training days; and
- Phase 3 Remedial Training shall consist of two (2) training days.

If a member fails to achieve firearms qualification standards after Phase 1 Remedial Training, the member shall be assigned to the Phase 2 Remedial Training.

If a member fails to achieve firearms qualification standards after the Phase 2 Remedial Training, the member shall be:

- Evaluated by the State Police Surgeon to determine if any physical limitation(s) exist that would prevent him/her from achieving the firearms qualification standards; and
- Assigned to the Phase 3 Remedial Training at the State Police Academy for more in-depth assistance.

When participating in any phase of the Remedial Training Program, it is mandatory that a member successfully complete two (2) consecutive runs of the qualification course.

If proficiency is not established at the end of the Remedial Training Program:

- The member shall immediately surrender all firearms and cruiser keys to the Supervisor of Firearms Training;
- The Supervisor of Firearms Training shall immediately secure the firearm(s) and cruiser and advise the Division of Standards and Training (DST) Commander or designee; and

Firearms Remedial Training, continued

- The DST Commander or designee, shall place the member on administrative leave with pay, and shall proceed with an administrative hearing in accordance with Articles 5 and 6 of the Rules and Regulations.

The Three Phase Remedial Training Program shall constitute reasonable efforts by the Department in an attempt to achieve qualification by a member.

Failure to qualify with issued firearms shall result in administrative action, up to and including termination of employment.

Specialized Firearms-Failure to Qualify

In the event that a member fails to achieve firearms qualification standards with Specialized Firearms after remedial training, the member shall:

- Be required to surrender such specialized firearms to the Supervisor of Firearms Training; and
- Be assigned to a one (1) day Specialized Firearms Remedial Training Program.

If proficiency is not established at the end of the Specialized Firearms Remedial Training Program, the member may:

- Receive additional remedial training at the discretion of the Colonel/Superintendent.

Qualification/ Other Use of Force Weapons

The DST Commander, or designee, shall establish standards for qualification with other UOF weapons prior to issuance.

Responsibilities

Position	Duties
Supervisor of UOF Training	• Conduct necessary training and testing; and • Maintain documentation on UOF training and proficiency, to include UOF policy training.
Division Commander of DST or designee	• Approve instructors; • Recommend training standards; and • Maintain program records.
Division Commanders	Ensure all members are trained as required.
Deputy Superintendent	Authorize all UOF training prior to implementation.
Colonel/Superintendent	Establish qualification standards.

2326

Department of State Police
General Order

Effective Date:	Number:
May 25, 2023	**UOF-06**
Subject:	
Electronic Control Weapons (ECW)	

Policy

The Department shall provide proper, current guidance and direction on the use of Electronic Control Weapons (ECWs).

Only those Department members who have successfully completed the Department's initial ECW training and subsequent in-service ECW training are authorized to use an ECW.

Members are authorized to use only that force which is objectively reasonable, in accordance with all applicable federal and state laws and regulations, and the contents of this policy to:

- Effect the lawful arrest or detention of an individual;
- Prevent the escape from custody of an individual; or
- Prevent imminent harm, and the amount of force used is proportionate to the threat of imminent harm.

ECWs may be used by authorized, trained and certified Department members in accordance with all applicable federal and state laws and regulations, and the contents of this policy. Members shall use reasonable force to control individuals who are violent, exhibiting threatening or potentially violent behavior, or physically resisting arrest or detention.

Members should assess each situation to determine which action shall best bring the incident under control, using only that amount of force that is reasonably necessary.

If feasible, some clear, verbal warning shall be given before any use of force. Such warning should include identifying the member as a law enforcement officer where it is not readily apparent (e.g.: at night; member is in plainclothes; member is in an unmarked vehicle.)

A member shall not use ***force*** upon another individual unless:

- De-escalation tactics have been attempted and failed or such tactics are not feasible based on the totality of the circumstances and such force is necessary and proportionate to:
    - Effect the lawful arrest or detention of an individual;
    - Prevent the escape from custody of an individual;
    - Prevent imminent harm and the amount of force used is proportionate to the threat of imminent harm, while protecting the safety of the member(s) or others; or

Policy, continued

- Defend against an individual who initiates force against a member.

If deployed, ECW cycles shall be limited to the minimum number of deployments necessary and should last no longer than necessary to bring an individual under control.

When it is objectively reasonable that a subject is under the control of law enforcement, the use of force shall terminate.

Members shall adhere to the Duty to Intervene and Report mandates of General Order UOF-01, Use of Force.

When safe, and tactically feasible, members shall always provide appropriate medical response and proper medical aid to individuals who are exhibiting signs of, or complaining of, injury or illness, including following a use of force, which includes the use of an ECW, or other law enforcement action.

Definitions

Actively Resistant Individual: An individual who uses physical strength and/or body movement to resist a Department member. Examples of active resistance include pulling, turning, or walking away from an officer.

Aggravated Assaultive Individual (Serious Bodily Harm/Death): An individual who engages in conduct that is likely to produce death or serious bodily harm to a Department member or another person.

Assaultive Individual (Bodily Harm): An individual who attempts to injure a Department member or another person or engages in conduct that has the potential to injure a Department member or another person.

Compliant Individual: An individual who is fully cooperative with a Department member.

Deadly Force: Use of force intended to inflict, or reasonably be expected to cause, death or serious physical injury.

- Members may not use deadly force against an individual who poses only a danger to themselves.
- Deadly force shall not be used at any point in time when there is no longer an objectively reasonable belief than an individual currently and actively poses an immediate threat of serious bodily harm or death, even if deadly force would have been justified at an earlier point in time.

De-escalation Tactics: Proactive approaches to stabilize a law enforcement situation so that more time, options, and resources are available to gain voluntary compliance and/or reduce or eliminate the need for force. These approaches may include, but not be limited to:

- Verbal persuasion;
- Warnings;

Definitions, continued

- Slowing down the pace of an incident;
- Waiting out an individual;
- Creating distance between the member and a threat;
- Requesting additional resources, including, but not limited to, licensed medical or mental health professionals, as defined in M.G.L. c. 111 § 51 ½ (a), when appropriate, to address a potential medical or mental health crisis; and
- Issuing a summons as an alternative to arrest where feasible.

Drive Stun Deployment: In Drive Stun mode, the ECW is a pain-compliance facilitator rather than an electro-muscular disruptor. Drive stun occurs when the ECW is held against the subject, whether or not probes are deployed. Drive stun may be utilized in response to active resistance or assaultive behavior.

Electronic Control Weapon (ECW): A weapon that uses electricity to override voluntary motor responses or applies pain in order to gain compliance or overcome resistance. ECWs are designed to incapacitate without causing serious physical injury or death.

ECW Activation: Any time an ECW is turned on, exclusive of training and routine maintenance/readiness checks.

ECW Cycle: Occurs when probe deployment delivers energy to an individual.

Force: The amount of physical effort, however slight, required by police to compel compliance by an unwilling individual.

- Physically escorting or handcuffing an individual with minimal or no resistance does not constitute a use of force for the purposes of 550 CMR 6.03.
- Use of force ***does include*** the intentional pointing of a firearm or Electronic Control Weapon at an individual as an attempt to control that individual's movements, and the use of OC spray on an individual or directed towards an individual.

Laser Activation: The ECW is turned on, activating the light and/or laser beam. Laser activation may be utilized as a warning technique if drive stun deployment and/or probe deployment is objectively reasonable.

Definitions, continued

Less-Lethal Force: Any physical use of force, other than deadly force, to control, restrain, or overcome the resistance of another.

- Members are authorized to use less-lethal force in accordance with all applicable federal and state laws and regulations, the contents of General Order UOF-01 and the contents of this policy.

Objectively Reasonable: This term means that, in determining the necessity for and appropriate level of force, officers shall evaluate each situation in light of the known circumstances at the time, including, but not limited to, the seriousness of the crime, the level of threat or resistance presented by the subject, and the danger to the officer, subject, or community. The reasonableness of a particular use of force must be judged from the perspective of a reasonable officer on scene, rather than with the 20/20 vision of hindsight. Determining reasonableness of force must allow for the fact that police officers are often required to make instantaneous judgments in circumstances that are tense, uncertain and rapidly evolving. The force used must be reasonable under the circumstances known to the officer at the time force is used. *Graham v. Connor* 490 U.S. 386 (1989)

Passively Resistant Individual: An individual who is non-violent and uncooperative but does not use physical strength or body movement to resist a Department member and does not pose an immediate threat to the member or the public.

- A Member shall only use the amount of force necessary against an individual who is engaged in passive resistance to effect the lawful arrest or detention of said individual and shall use de-escalation tactics where feasible, including issuing a summons instead of executing an arrest where feasible.

Probe Deployment: In probe deployment mode, the ECW uses electricity to override voluntary motor responses. Probe deployment occurs when probes deploy from an ECW, whether or not the probes strike their intended target. This includes follow-up drive stuns when a single probe is attached to an individual. Probe deployment may be utilized in response to assaultive behavior.

Proper Medical Aid: Immediate first aid treatment, including CPR, administered on the scene of an incident/injury within the scope of the member's training. Additionally, medical aid includes the summoning of emergency medical services to assist in any condition or treatment that may escalate outside of the scope of the capabilities of the member(s) providing immediate first aid or requiring transportation to a medical facility based on the condition of the person receiving aid.

Reportable Incident: Shall include:

- The intentional pointing of a firearm or ECW at an individual;
- Application of force through the use of deadly or less-lethal weapons;
- On-duty discharge of any weapon outside of a training range specifically designed for that purpose;

Definitions, continued

- Off-duty discharge of a Department weapon outside of a training range specifically designed for that purpose;
- Department issued ECW activation, drive stun and/or probe, on or off duty, as defined in UOF-06 Electronic Control Weapons;
- Compliance or striking techniques are used;
- Use of OC spray on an individual or directed toward an individual; or
- Use of force which actually, or proximately, caused or is reported to have caused injury or death to another.

Sensitive Population Groups: Sensitive population groups include those who reasonably appear to be, or are known to be, children, elderly, medically infirm, intellectually disabled, pregnant, or users of a cardiac pacemaker.

Serious Bodily Injury: Injury that results in or involves a substantial risk of death, permanent or protracted disfigurement, or extended loss or impairment of the function of a body part or organ.

Warning Arc: The ECW is activated and the arc switch is depressed, activating the electrical arc. A warning arc may be utilized as a de-escalation or warning technique if drive stun deployment and/or probe deployment is objectively reasonable.

ECW Readiness

Department members issued and authorized to use a ECW shall:

- Ensure the ECW is carried in an approved holster on the side of the body opposite the service handgun;
  NOTE: members not assigned to uniformed duty may use other Department-approved holsters and carry the weapon consistent with Department training.
- Ensure the ECW is fully armed with the safety on in preparation for immediate use;
- Ensure the ECW cartridges are loaded in a manner consistent with training;
- Ensure cartridges are replaced following the manufacturer's expiration requirements;
- Ensure only manufacturer-approved battery power sources are used for the ECW;
- Prior to each regular tour of duty shift, confirm that the ECW is functioning properly by performing all tests as defined in training;
- Not make any modifications or repairs on the ECW unless authorized in writing by the Armorer; and
- TASER 7: Ensure battery packs are docked:
  - At least once every 30 days;
  - When the battery reaches 20% capacity or lower; or
  - Within 24 hours of an activation, as defined in General Order UOF-03, Use of Force Reporting.

Subject	Number
Electronic Control Weapons	**UOF-06**

Activation

In accordance with applicable federal and state laws and regulations, the contents of General Order UOF-01 Use of Force, and this policy, and when it is objectively reasonable to do so, Department members are authorized to utilize an ECW to arrest and/or detain an individual that has and/or continues to exhibit behavior that leads the member to believe the individual is actively resisting or assaultive and will resist being arrested or detained.

ECW Use of Force Response Table

If the subject is:	Then the response may include:
Actively Resistant	Laser Activation Warning Arc Drive Stun
Assaultive – Bodily Harm	Laser Activation Warning Arc Drive Stun Probe Deployment
Aggravated Assaultive – Serious Bodily Harm/Death	Laser Activation Warning Arc Drive Stun Probe Deployment NOTE: Department members are not required to use a weapon of less-lethal force if use of deadly force is objectively reasonable.

Situations in which the ECW may be activated in accordance with the above table include but are not limited to:

- When an individual uses force or violence against the member or another person(s);
- When an individual exhibits violent, threatening, or potentially violent behavior;
- When an individual actively resists an arrest or detention;
- When an individual flees in order to avoid arrest or detention in circumstances where the member would pursue on foot and physically effect the arrest or detention;
- When an individual expresses intent and has the means to commit suicide or inflict serious bodily harm to themselves or others and ECW activation does not create additional risk;
- To protect Department members or others against an aggressive animal; and
- In the course of Department-authorized training exercises or demonstrations.

Department members shall:

- Give the individual a warning prior to activating the ECW, unless doing so would place any member or person(s) at risk;

Activation, continued

- Adhere to the Department's training regarding warnings, which may include clear verbal warnings, display of the ECW, laser painting, display of a warning arc, or a combination thereof;
- When feasible, an announcement should be made to other members or personnel on the scene that an ECW is going to be activated;
- Not intentionally activate more than one ECW at a time against an individual;
- Be aware that an individual subjected to an ECW Cycle may not be able to respond to commands during or immediately following an ECW Cycle exposure;
- ECW cycles should be limited to the least number of exposures and should last no longer than necessary to bring an individual under control; Each 5-second cycle is considered an independent use of force and must be objectively reasonable and be documented in writing;
- Avoid continued ECW use as an attempt to facilitate compliance if circumstances indicate that drive stun deployment is ineffective as a pain-compliance technique;
- Be aware that pain compliance may not be effective against an individual in a mental health crisis state, under the influence of a mind-altering substance, or when extremely focused;
- Consider potential risk(s) to third-parties or bystanders when activating ECWs;
- Be aware that a subject's heavy clothing may impede the effectiveness of ECWs;
- Aim, to the degree possible, for the following target areas:
  - Lower center mass below the chest
  - Back
  - Legs

  Note: Consistent with training and to the extent possible, Department members should avoid sensitive areas such as the eyes, face, head, throat, neck, breasts, groin and genitals.

Department members shall *not* use the ECW:

- On individuals who passively resist as defined within this policy;
- On a handcuffed or secured detainee;
  EXCEPTION: ECW, in limited situations, may be used on a handcuffed or secured detainee if an individual exhibits overtly assaultive, self-destructive, or violently resistive behavior that cannot reasonably be controlled by other readily available means.
- In any environment where the member reasonably believes that a flammable, volatile, or explosive material is present, including but not limited to OC spray with volatile propellant, gasoline, natural gas, propane;
- When the individual is immersed or partially immersed in a body of water;
- In any situation where the member has a reasonable belief that the individual might fall resulting in death or serious physical injury, and the circumstances presented do not justify that risk; or

Activation, continued

- On individuals in physical control of a vehicle in motion (e.g., motor vehicles, trucks, motorcycles, ATVs, bicycles, scooters) unless exigent circumstances exist.

Sensitive Population Group

Department members shall be aware of general concerns when an ECW is used on a sensitive population group individual. Department members are not prohibited from using an ECW on sensitive population group individuals, but use is limited to those exceptional circumstances where the potential benefit of using the ECW (i.e., injury reduction) reasonably outweighs the risks and concerns.

ECW Post-Activation

After a probe deployment in which the probe(s) became embedded in the subject's body, Department Members shall seek medical attention for the individual and ensure that the embedded ECW probe(s) are removed by qualified medical personnel.

In any case of Drive Stun deployment or Probe deployment from an ECW on an individual, members shall:

- Transport the individual to an emergency care facility for evaluation and/or treatment if any of the following apply:
    - The individual requests medical attention or there is an obvious need for medical attention;
    - The ECW was deployed in a sensitive area (e.g., eye, face, head, throat, neck, breasts, groin, genitals);
    - The individual is part of a sensitive population group;
    - More than three ECW cycles were deployed on the individual or the ECW was deployed for continuous cycles amounting to 15 seconds or more; or
    - More than one ECW device has been deployed on an individual.
- Use restraint techniques that minimize risk of impairing a subject's respiration.
- Make reasonable efforts to protect the subject's privacy.

Internal Reporting

Department members who intentionally point an ECW at an individual or activate an ECW (drive-stun or probe deployment) shall:

- Adhere to General Order UOF-03, Use of Force Reporting;
- Report ECW activations to the Station Desk Officer of jurisdiction;
- Ensure ECW activations are documented within the Daily Administrative Journal/Department Records Management System; and
- TASER X2: Ensure that Station/Unit Commander is provided access to ECW for downloading purposes.
- TASER 7: Place the battery in a dock within 24 hours of a reportable incident and ensure data upload is completed.

<u>The involved member(s) shall:</u>

- Submit a SP-376 Use of Force Report within 24 hours of a reportable incident as defined in UOF-03; and

- TASER 7: Place the battery in a dock within 24 hours of a reportable incident and ensure the data upload is completed.

Internal Reporting, continued

Supervisors shall:

- Ensure involved member(s) submit a SP 376;
- Review every SP 376; and
- Forward reports to the Division Commander, through channels with findings and recommendations as to the necessity of further investigation of the incident.

Station/Unit Commander or Designee shall:

- Ensure that ECW data is downloaded per manufacturer instructions; and
- Ensure that data from ECW download is consistent with reports submitted by involved member(s).

External Reporting

The Use of Force Review Committee shall:

- Collect Department information regarding the use of ECW;
- Ensure the Executive Office of Public Safety and Security (EOPSS) *ECW Use Reporting Form* is completed and submitted as required by EOPSS in accordance with M.G.L. c. 140, § 131J and St. 2004, c. 170, §2;
- Forward a copy of the EOPSS *ECW Use Reporting Form* to the Deputy Superintendent.

Off-Duty Considerations

Members are ***not authorized*** to carry their Department issued ECW while off duty. When off-duty, members shall secure Department issued ECWs in a manner consistent with the securing of a firearm and in accordance with all applicable Massachusetts Laws. Members must ensure that Department issued ECWs are inaccessible to children and others.

Training

At least annually, all Department members authorized to carry weapons shall receive in-service training on the Department's UOF policies and demonstrate proficiency with all approved deadly weapons and ECW's issued to the member. The administration of the training shall be documented and records maintained by the State Police Academy (SPA). Training and proficiency testing shall be conducted by certified instructors.

Department members shall be trained in accordance with the lesson plan provided by the manufacturer approved by EOPSS in accordance with M.G.L. c. 140, § 131J.

Department members shall be trained in accordance with all applicable federal and state laws and regulations, the contents of General Order UOF-01, and the contents of this policy.

Department of State Police
Rules & Regulations

Effective Date:	Number:
November 10, 2021	**Appendix "A"**
Subject: **DISCIPLINE GUIDELINES**	

Class

A	1. 2. 3.	***FIRST OFFENSE***: Suspension of not less than thirty (30) days up to and including termination. ***SECOND OFFENSE:*** Suspension of not less than ninety (90) days up to and including termination. ***THIRD OFFENSE:*** Termination.
B	1. 2. 3.	***FIRST OFFENSE***: Suspension of not less than five (5) days nor more than thirty (30) days. ***SECOND OFFENSE:*** Suspension of not less than ten (10) days nor more than sixty (60) days. ***THIRD AND SUBSEQUENT OFFENSE(S):*** Suspension of not less than thirty (30) days up to and including termination.
C	1. 2. 3.	***FIRST OFFENSE:*** Written reprimand up to and including suspension of not more than five (5) days. ***SECOND OFFENSE:*** Suspension of not less than one (1) day nor more than fifteen (15) days. ***THIRD AND SUBSEQUENT OFFENSE(S):*** Suspension of not less than fifteen (15) days up to and including termination.
D	1. 2. 3.	***FIRST OFFENSE:*** Written reprimand up to and including suspension of not more than two (2) days. ***SECOND OFFENSE:*** Written reprimand up to and including a suspension of not more than five (5) days. ***THIRD AND SUBSEQUENT OFFENSE(S):*** Suspension of not less than ten (10) days up to and including termination.

INTERPRETATIVE NOTES FOR APPENDIX "A"

1. When determining the number of prior offenses under the Guideline, the Trial Board shall consider only those offenses, which occurred on or after March 19, 1997, for which the member was found guilty and which were scheduled in a Class equivalent to or, superior to, the Class of the subject offense; provided however, a member's complete and entire disciplinary history including all offenses, if any, committed before March 19, 1997, shall be considered as aggravating or mitigating factors, as the case may be, when recommending discipline.

2. The Trial Board may recommend loss of accrued vacation/personal/holiday time as an alternative to suspension. Such recommendation shall not be considered a departure from the Guideline provided the number of days so recommended is consistent with the Guideline.

3. Not-withstanding the Class Schedule, members may be charged and prosecuted for any action violating a Rule and/or Regulation.

4. Rules and Regulations which have been ranked within the Class Schedule (i.e., A-B-C-D) denote violations which, predicated on the circumstances, encompass a broad scope of behavior ranging from the most egregious to the most negligible. Ranked Articles shall be scheduled in accordance with Rule 6.4.1 except as otherwise authorized by Rule 6.9.

Department of State Police
Rules & Regulations

Effective Date:	Number:
November 10, 2021	**Article 1**

Subject:
REGULATIONS FOR THE GOVERNANCE OF THE STATE POLICE

1.0 REGULATIONS FOR THE GOVERNANCE OF THE STATE POLICE

1.1 AUTHORIZATION AND SEVERABILITY

For the purpose of these Rules and Regulations the Massachusetts Department of State Police shall hereinafter be referred to as the "Massachusetts State Police". Uniformed members shall hereinafter be referred to as "members" or “sworn members.”

The Massachusetts State Police's Rules and Regulations are issued pursuant to Massachusetts General Law Chapter 22C. These Rules and Regulations cancel and supersede all previous Massachusetts State Police Rules and Regulations. Causes of actions arising from events transpiring prior to March 19, 1997, shall be governed by Rules and Regulations then in effect.

If any article, section, sub-section, sentence, clause, or phrase of the Rules and Regulations is for any reason held to be unconstitutional, contrary to law, or otherwise inoperative, such decision shall not affect the validity of any other part of these Rules and Regulations.

1.2 INTRODUCTION

In the United States it is essential that the Criminal Justice System upon which public safety depends be administered in a manner which promotes public respect, confidence and acceptance.

The problems associated with the delivery of police services are many, as they reflect the complex interactions and changes of modern society. Accordingly, rules cannot be drafted that shall prescribe, in specific detail, the manner in which all duties of Massachusetts State Police members are to be performed. Consequently, all members should be guided in their decision-making processes by subscribing to certain fundamental principles.

1.2, continued These principles are as follows:

1.2.1 Members shall endeavor to elevate the standing of the Law Enforcement profession in the public mind and to strengthen public confidence in the Massachusetts State Police.

1.2.2 Members shall encourage all other members of the Massachusetts State Police to fully appreciate the responsibilities of their office.

1.2.3 Members shall endeavor to develop and maintain the public's support and cooperation.

1.2.4 Members shall promote the concept of teamwork for the benefit of all.

1.2.5 Members shall strive for full coordination of effort in all official relationships.

1.2.6 Members shall provide high quality problem solving and community-oriented police services.

1.3 CODE OF ETHICS

All members and civilian employees shall abide by this code of ethics which is a reflection of the organizational values of the Massachusetts State Police and is adopted as a general performance standard for all members and civilian employees.

1.3.1 We shall respect the diversity of, and be sensitive to, all people.

1.3.2 We shall accept our responsibility to the public by being punctual in our engagements and expeditious in the performance of duty.

1.3.3 We shall regard our office as a public trust and, in the discharge of our duties, be mindful of our primary obligations to serve the public efficiently and effectively.

1.3.4 We shall administer the law in a just, impartial, and reasonable manner, affording the same reasonable treatment to all cases.

1.3.5 We shall recognize the limitations of our authority and at no time use the power of our office for our personal advantage.

1.3.6 We shall be true to our obligations as custodians of public property.

1.3.7 We shall not diminish our integrity or limit our effectiveness by accepting gratuities or favors from persons, businesses, corporations, or other entities.

1.3, continued

1.3.8 We shall cooperate fully with other public officials to assure the safety and general welfare of the public. We shall not permit jealousies or personal differences to influence our ability to cooperate with others in our official business.

1.3.9 We shall add to our effectiveness by enhanced training, diligent study, and sincere attention to self-improvement, including physical readiness. We shall welcome the opportunity to disseminate practical and useful information relating to matters of the public's safety and welfare.

1.3.10 We shall bear faithful allegiance to our government and be loyal to our profession. We shall accept as an obligation our responsibility to support the Constitutions of the United States and the Commonwealth of Massachusetts.

1.3.11 We shall fervently seek out and report the truth.

Subject:	
ORGANIZATIONAL VALUES	

2.0 ORGANIZATION VALUES

The value statements of the Massachusetts State Police are:

2.1 Maintenance of the highest standards of integrity and ethics.

2.2 Excellence and teamwork in the performance of duty.

2.3 Protection of Constitutional Rights.

2.4 Problem solving for continuous improvement.

2.5 Continuous planning for the future.

2.6 Performing public service and law enforcement tasks so as to provide leadership to the police profession.

Promulgated by: Christopher S. Mason, Colonel/Superintendent

Department of State Police
Rules & Regulations

Effective Date:	Number:
November 10, 2021	**Article 3**

Subject:

REGULATIONS ESTABLISHING THE DUTIES OF SWORN MEMBERS AND CIVILIAN EMPLOYEES

3.0 REGULATIONS ESTABLISHING THE DUTIES OF MEMBERS

To attain the Massachusetts State Police organizational goals and to implement the regulations of the Massachusetts State Police, the following duties are established for the Superintendent, Deputy Superintendent, Supervisory members, other uniformed members appointed under M.G.L. c. 22C, and civilian employees of the Massachusetts State Police.

For the purpose of this Article, the term "member" shall refer only to sworn members. The term "employee" shall refer to both sworn members and civilian employee(s).

3.1 SUPERINTENDENT

The Superintendent of the Massachusetts State Police shall hold the rank of Colonel and shall be the executive and administrative officer of the Massachusetts State Police. They shall promulgate all Rules, Regulations, Policies, Procedures, Orders, and Directives governing the Massachusetts State Police including, but not limited to, discipline, organization, government, administration, training, and compensation.

3.2 DEPUTY SUPERINTENDENT

A Lieutenant Colonel shall be designated by the Colonel/Superintendent as the Deputy Superintendent and shall be the second-in-command of the Massachusetts State Police. They shall exercise such authority and supervision over functions of the Massachusetts State Police as the Colonel may assign and during the absence of or when so designated by the Colonel/Superintendent shall perform the official duties of the Colonel/Superintendent.

3.3 STAFF OFFICERS

Staff Officers, with the exception of the Colonel/Superintendent, shall be appointed by the Colonel/Superintendent and shall exercise such authority and supervision over the functions of the Massachusetts State Police as maybe assigned.

3.3.1 The term Staff Officer shall include the following ranks:

- Colonel/Superintendent
- Lieutenant Colonel/Deputy Superintendent
- Lieutenant Colonel
- Major

3.3.2 The Colonel/Superintendent shall fill vacancies in the ranks of Lieutenant Colonel/Deputy Superintendent, Lieutenant Colonel and Major with those officers who are eligible for such promotions. Officers so appointed may be returned to their previous rank, or to the rank of Captain, at the discretion of the Colonel/Superintendent.

3.4 COMMISIONED OFFICERS

A Commissioned Officer shall exercise such authority and supervision over the functions of the Massachusetts State Police as may be assigned by senior supervisory members or proper authority.

3.4.1 The term Commissioned Officer shall include the following ranks:

- Detective Captain
- Captain
- Detective Lieutenant
- Lieutenant

3.4.2 The Colonel/Superintendent shall fill vacancies in the ranks of Detective Captain from officers holding the rank of Captain and shall fill vacancies in the rank of Detective Lieutenant from officers holding the rank of Lieutenant. Any officer so appointed to the rank of Detective Captain or Detective Lieutenant on or after July 1, 1994, may be returned to their previous rank at the discretion of the Colonel/Superintendent.

3.5 NON-COMMISIONED OFFICERS

A Non-commissioned Officer shall exercise such authority and supervision over the functions of the Massachusetts State Police as may be assigned by senior supervisory members or proper authority.

3.5.1 The term Non-commissioned Officer shall include the following rank:

- Sergeant

3.6 COMMAND RESPONSIBILITY

Unless otherwise ordered by the Colonel/Superintendent or Lieutenant Colonel/Deputy Superintendent, the senior Staff Officer, Commissioned Officer, Non-commissioned Officer or other senior member present shall be in command.

3.6.1 Senior member status shall be determined by:

- Rank
- Length of service in rank
- As names in order of appointment or promotion

3.6.2 At the scene of a homicide, suspicious death, suicide, or unattended death, the member designated by the Division of Investigative Services Commander of jurisdiction shall assume immediate command. Orders concerning the investigation shall be given by no member of the Massachusetts State Police except the Colonel/Superintendent or a senior supervisory member within the Division of Investigative Services.

3.7 SUPERVISORY MEMBERS

Supervisory members shall include Staff Officers, Commissioned Officers, and Non-Commissioned Officers, and shall be responsible for adherence to all State Police Rules, Regulations, Policies, Procedures, Orders, and Directives. They are responsible and accountable for the maintenance of discipline and shall provide leadership, supervision, and continuous training and serve as an example to ensure the efficiency of all operational areas. They have the responsibility to positively influence other members and to motivate them to perform at a high level of efficiency. They have the responsibility for the performance of all members placed under them and, while they can delegate authority and functions, they cannot delegate responsibility. Supervisory members shall:

3.7, continued

3.7.1 Lead, direct, train, supervise, and evaluate employees in their assigned duties.

3.7.2. Provide leadership and guidance in developing loyalty to the Massachusetts State Police and dedication to the police profession.

3.7.3 Perform specific duties and functions as assigned by senior supervisory employees or proper authority.

3.7.4 Support employees who are properly performing their duty, deal fairly and equitably with all employees and, when necessary, correct them in a dignified manner.

3.7.5 Cooperate with all Massachusetts State Police employees and other governmental agencies.

3.7.6 Recommend remedial or disciplinary action for inefficient, incompetent, or unsuitable employees.

3.7.7. Ensure that Rules, Regulations, Policies, Procedures, Orders, and Directives of the Massachusetts State Police are enforced and adhered to by employees under their charge.

3.7.8 Remain accountable for any failure, misconduct, or omission by employees under their charge.

3.7.9 Report violations of law committed by employees, through channels, to the Colonel/Superintendent. Report violations of Massachusetts State Police Rules, Regulations, Policies, Procedures, Orders, and Directives committed by employees, through channels, to the Division Commander and as appropriate to the Colonel/Superintendent.

3.7.10 During any temporary absence or disability of a member of the Massachusetts State Police, which prevents the performance of their duties, the command shall devolve to the next higher rank, unless otherwise ordered by a senior supervisory member or proper authority from within the same Division or Troop/Section/Unit.

3.7.11 Any unusual occurrence that may have an adverse impact upon the Massachusetts State Police shall be reported, through channels, to the Division Commander and, as appropriate, to the Colonel/Superintendent.

3.7, continued

3.7.12 Any unusual occurrence that may result in a question of the Department's liability and/or result in heightened community or media interest shall be reported, through channels, to the Division Commander and, as appropriate, to the Colonel/Superintendent.

3.8 **UNIFORMED MEMBERS APPOINTED UNDER M.G.L. c. 22C**

All uniformed members appointed under M.G.L. c. 22C shall conduct themselves, at all times, in a fashion consistent with all Rules, Regulations, Policies, Procedures, Orders, and Directives. Members shall:

3.8.1 Render the highest order of police service to the citizens.

3.8.2 Obey all laws and promptly execute all lawful orders, including orders from a Supervisory member relayed through a member/employee of equal/lesser position.

3.8.3 Know and conform to all applicable law, State Police Rules, Regulations, Policies, Procedures, Orders, and Directives.

3.8.4 Receive, record, and respond to all complaints and requests for service.

3.8.5 Provide security and care for all persons and property coming into their custody.

3.8.6 Maintain a military-like bearing and courtesy at all times.

3.8.7 Notify the appropriate Division Commander, in writing through channels, when aggrieved by treatment or actions of a senior employee not amounting to a specific violation of any Rule, Regulation, Policy, Procedure, Order, or Directive. Such complaint shall then be forwarded promptly, through channels, to the Office of the Colonel/Superintendent with recommendations.

3.8.8 Be on-duty or subject to recall twenty-four hours a day. A member may be recalled from leave or vacation when necessity demands. On hearing of a state of emergency, as declared by the Governor, all members (excluding personnel on suspension, injury, or other approved leaves) shall immediately contact their duty assignment supervisor, or other supervising officer within the chain-of-command, for specific instructions.

3.8.9 All members, without exception and regardless of rank, assignment, or duties regularly performed, shall be subject to all duties of the Department, including, but not limited to, emergency duties.

3.8, continued

3.8.10 During the period immediately following a member's date of initial enlistment, when the probationary member is being trained by a senior member ("break in"), no such probationary member shall wear a State Police uniform or part(s) thereof while commuting to and from their duty assignment in a private vehicle unless authorized by the Troop Commander.

3.9 **CIVILIAN EMPLOYEES**

Civilian employees shall perform their assigned duties promptly and efficiently and shall:

3.9.1 Obey all laws and execute all lawful orders/directives. Clarification of conflicting/illegal-orders/directives received by a civilian employee shall be addressed through their immediate supervisor. If the conflicting/illegal-order/directive is received from their immediate supervisor then clarification shall be sought through a higher level supervisor within their chain of command.

3.9.2 Be bound by those Rules, Regulations, Policies, Procedures, Orders, and Directives of the State Police as determined by the Colonel/Superintendent.

3.9.3 Follow orders/directives from a supervisory member, supervisor or manager relayed through a member/employee of equal/lesser position.

3.9.4 Be known as Trainees upon beginning recruit training at the Massachusetts State Police Academy.

3.9.5 Upon hearing of a state of emergency, as declared by the Governor, immediately contact their duty assignment supervisor, or other supervising officer within the chain-of-command, for specific instructions, if said employee is designated as Emergency or Rotating Emergency Personnel (excluding personnel on suspension, injury, or other approved leaves).

3.9.6 Abide by the applicable Code of Conduct or Commonwealth Employment Standards established by the Commonwealth of Massachusetts Human Resources Division and the employees Collective Bargaining Agreement.

3.9.7 Be attired in a manner appropriate to the employee's job responsibilities and work unit of the employee.

Subject:	
TITLE AND RANK, PAYROLL, PROMOTIONS	

4.0 TITLE AND RANK, PAYROLL, PROMOTIONS

4.1 The order of titles and ranks in the Massachusetts State Police shall be as follows:

- Colonel/Superintendent
- Lieutenant Colonel/Deputy Superintendent
- Lieutenant Colonel
- Major
- Detective Captain
- Captain
- Detective Lieutenant
- Lieutenant
- Sergeant
- Trooper

4.2 The pay scale for the members and trainees of the Department of State Police appointed under the provisions of M.G.L. c. 22C is fixed and established in accordance with the following titles and ranks:

- Colonel/Superintendent
- Lieutenant Colonel/Deputy Superintendent
- Lieutenant Colonel
- Major
- Detective Captain
- Captain
- Detective Lieutenant
- Lieutenant
- Sergeant
- Trooper First Class
- Trooper
- Trainee

4.3 In the event the Colonel/Superintendent elects to fill a vacancy or vacancies s/he shall issue a Personnel Order pronouncing his/her intention to do so, and shall thereafter fill such vacancy or vacancies within sixty days after such Order is issued.

4.4 The Colonel shall promote individuals to promotional vacancies within sixty days, unless the Colonel, as executive and administrative head of the Massachusetts State Police in charge of the administration and organization thereof, issues a written order to the Division of Administrative Services within sixty days specifying that one or more of the following reasons exists which shall prevent the filling of such vacancies in the near future:

- The abolishment and/or consolidation of a division, bureau, section or unit of the Massachusetts State Police;
- Insufficient funding as appropriated by the General Court for the administration, organization, government, training, compensation,equipment, and maintenance of the Massachusetts State Police; or
- The assignment, reassignment or transfer of any uniformed member within or among a division or divisions of the Massachusetts State Police, and/or the staffing needs of any such division or divisions with consideration given to any completed or ongoing staffing study and/or any change in duties within a particular rank.

4.4.1 No orders issued by the Colonel pursuant to Rule 4.4 shall continue in effect for more than 180 days, unless the Colonel issues a new order to the Division of Administrative Services stating the specific reasons for extending such order.

Department of State Police
Rules & Regulations

Effective Date:	Number:
November 10, 2021	**Article 5**
Subject:	
RULES OF CONDUCT	

5.0 RULES OF CONDUCT

For the purpose of this Article, the term "member" shall refer only to sworn members. Civilian employee applicability shall be specifically stated.

5.1 VIOLATION OF RULES

Members shall not commit, nor cause to be committed, any act(s) or omit any act(s) which constitute(s) a violation of any Massachusetts State Police Rule, Regulation, Policy, Procedure, Order, or Directive.

5.1.1 All members and civilian employees of the State Police are required to familiarize themselves with the Rules, Regulations, Policies, Procedures, Orders, and Directives as may be issued or established by the Colonel/Superintendent. Members and civilian employees are also required to familiarize themselves with Orders and Directives as may be issued or established by senior supervisory members or proper authority.

5.2 UNBECOMING CONDUCT

Members shall conduct themselves at all times in such a manner as to reflect most favorably upon themselves and the Massachusetts State Police. Conduct unbecoming shall include that which brings the Massachusetts State Police into disrepute or reflects discredit upon the person as a member of the Massachusetts State Police, or that which impairs the operation, efficiency, or effectiveness of the Massachusetts State Police or the member.

5.2.1 Members shall not associate with individuals they know or should know are engaged in criminal activities unless in the performance of duty or upon official police business.

5.2.2 Members shall not frequent or remain at any place where they know or should know criminal activity is occurring unless in the performance of their duty or upon official police business.

5.3 GENERAL CONDUCT

Members shall maintain a level of conduct in their personal and business affairs which is in keeping with the highest standards of the law enforcement profession. Members shall not participate in any act which impairs their ability to perform as members of the State Police or causes the State Police to be brought into disrepute.

5.4 CONFORMANCE TO LAWS

5.4.1 Members shall obey all laws of the United States and of any country, state, or local jurisdiction in which the members are present.

5.4.2 A finding of responsible, continuance without a finding, or conviction due to alleged violation(s) of any law shall be prima facie evidence of a violation of this section.

5.4.3 Members who have been arrested or indicted, members against whom a criminal complaint, restraining order, or warrant for arrest has issued, and members who know or have reason to believe that they have been identified as a suspect in any criminal investigation shall notify their duty assignment supervisor forthwith of said incident or belief. Members are further required to provide a copy of any order modifying any previously issued permanent or temporary court order.

5.4.4 Members must possess a valid unrestricted Massachusetts driver’s license. Members who know or have reason to believe that their driver's license has expired, or has been suspended, revoked, or restricted shall notify their duty assignment supervisor forthwith. For the purposes of this Article, a corrective lens requirement shall not be considered a restriction.

5.4.5 Members must possess a valid unrestricted Massachusetts firearms license. Members who know or have reason to believe that their firearms license has expired, or has been suspended, revoked or restricted shall notify their duty assignment supervisor forthwith.

5.5 REPORTING FOR DUTY

5.5.1 Members shall report for duty at the time and place required by assignment or orders and shall be physically and mentally fit to perform their duties. They shall be properly equipped, attired, and cognizant of information required for the proper performance of duty so that they may immediately assume their duties as required by Massachusetts General Laws and Massachusetts State Police Rules, Regulations and Policies. A notice issued by any court shall constitute an order to report for duty under this section.

5.5, continued

5.5.2 Members shall perform any law enforcement duty that may be required of them by any senior member or proper authority. This shall be in addition to the specific duties and responsibilities previously assigned by the provisions of any State Police Rule, Regulation, Policy, Procedure, Order, or Directive.

5.5.3 A member assigned to a patrol or post shall not leave the patrol or post except for police necessity or personal necessity. If required to quit such patrol or post, members shall first receive permission to leave from their duty assignment supervisor or proper authority.

5.6 NEGLECT OF DUTY

Members shall not engage in any activities or conduct any personal business or affairs which would cause them to neglect or be inattentive to duty.

5.7 FICTITIOUS ILLNESS OR INJURY REPORT

Members shall not feign illness or injury, falsely report themselves ill or injured, or otherwise deceive or attempt to deceive any member of the State Police as to the condition of their health or their need for sick leave.

5.8 UNSATISFACTORY PERFORMANCE

5.8.1 Members shall maintain sufficient competency to properly perform their duties and assume the responsibilities of their positions. Members shall perform their duties in such a manner as will maintain the highest professionally accepted performance standards in carrying out the functions and objectives of the State Police.

5.8.2 Unsatisfactory performance may be demonstrated by a lack of knowledge of the application of laws required to be enforced; an unwillingness or inability to perform assigned tasks; the failure to conform to work standards established for the member's rank, title, or position; the failure to take appropriate action on the occasion of a crime, disorder, or other condition deserving State Police attention; or by an absent without leave.

5.8.3 In addition to other indicators of unsatisfactory performance, repeated infractions of State Police Rules, Regulations, Policies, Procedures, Orders, Directives or any combination of such infractions shall be considered prima facie evidence of unsatisfactory performance.

5.9 EMPLOYMENT OUTSIDE OF THE DEPARTMENT

5.9.1 Members may engage in off-duty employment subject to the following limitations:

- Such employment shall not interfere with the member's State Police employment; and
- Members shall refer to the Outside Employment Guide located in the State Police document management system and electronically submit a written request for off-duty employment through channels to the Colonel/Superintendent whose approval must be granted prior to engaging in any such off-duty employment.

5.9.2 Such employment shall not create any conflict of interest or violate M.G.L. c. 268A or any other law.

5.9.3 Approval may be denied at the discretion of the Colonel/Superintendent when it is determined that outside employment may present a conflict of interest, or it may:

- Render the member unavailable for an emergency;
- Physically or mentally exhaust the member to the point that their performance may be affected;
- Require special consideration be given to scheduling of the member's regular duty hours and/or court related appearances;
- Bring the member and/or the State Police into disrepute; or
- Impair the operation, efficiency, or effectiveness of the State Police.

5.9.4 Members who want to act as officials; judges or referees at public competitions or exhibitions shall refer to the Outside Employment Guide located in the State Police document management system and electronically submit a written request through channels to the Colonel/Superintendent for approval and must be granted such approval prior to engaging in any such activity.

5.10 ALCOHOLIC BEVERAGES

5.10.1 Members shall not, nor shall they permit, any person, including any member, to store or bring into any State Police facility or vehicle alcoholic beverages or controlled substances except that which is held as evidence or in the course of official duties, unless authorized by the Colonel/Superintendent.

5.10.2 Members shall not possess or use any controlled substance except when prescribed by a licensed medical practitioner for a legitimate medical purpose. When a controlled substance is prescribed that may impair the member's ability to perform their official duties, said member shall notify their duty assignment supervisor forthwith.

5.10.3 Members shall not consume alcoholic beverages while in uniform.

5.10, continued

5.10.4 Members shall not consume alcoholic beverages while on-duty except in the performance of duty and while acting under specific orders from a supervisory member or proper authority. Members shall not appear for duty, or be on-duty, while under the influence of alcoholic beverage(s) to any degree whatsoever, or with an odor of any alcoholic beverage(s) on their breath.

5.11 USE OF TOBACCO, GUM, AND OTHER FOREIGN OBJECTS

5.11.1 In accordance with M.G.L. c. 22C, no member or trainee appointed or hired after January 1, 1988 shall smoke any tobacco product. No member in violation of this Article shall continue in employment with the Massachusetts State Police.

5.11.2 No member or civilian employee shall smoke any tobacco product or possess any lit tobacco product in any Departmental building. No member or civilian employee shall smoke any tobacco product or possess any lit tobacco product in any Department vehicle, unless the vehicle is assigned to the member or employee and the member or employee is alone in said vehicle.

5.11.3 Members, when in uniform, shall not use tobacco, chew gum, or have any foreign object protruding from the mouth when they are:

- In view of the public; and/or
- In formation.

5.12 INSUBORDINATION

5.12.1 Members shall promptly obey any lawful order conveyed to them by any senior member or proper authority. For the purpose of this Article an order can be written or verbal.

5.12.2 Members shall not assault, strike, threaten, draw or lift up any weapon, or feign violence against any employee of the Massachusetts State Police.

5.12.3 Members shall not use threatening or insulting language or behave in any insubordinate or disrespectful manner toward any employee of the Massachusetts State Police.

5.13 CONFLICTING OR ILLEGAL ORDERS

5.13.1 Members who are given an order which may be in conflict with any Rule, Regulation, Policy, Procedure, Order, or Directive shall inform the issuing senior member or proper authority of the conflict. Unless the senior member or proper authority alters or retracts their order, said order shall stand. Under these circumstances, the responsibility for the conflict shall rest solely on the senior member or proper authority issuing said order.

5.13.2 Members shall not obey any order which they know or should know would require them to commit an act in violation of law. Any member who is given an order which they believe in good faith would result in a violation of law, shall inform the issuing senior member or proper authority of the possible violation, and if the order stands or, as revised, still calls for an act in violation of law, the member shall be allowed reasonable time to confer with a more senior supervisory member or proper authority within their Division. If after conferring with such senior supervisory member or proper authority, the order is not overturned, and the member refuses to obey such order, the member shall be accountable for any violations of these Articles.

5.13.3 Whenever there seems to be a conflict, or doubt as to the meaning, of written Massachusetts State Police Rules, Regulations, Policies, Procedures, Orders, or Directives, application shall be made in writing through channels to the Colonel/Superintendent for an explanation or possible correction.

5.14 GIFTS, GRATUITIES, BRIBES, OR REWARDS

In accordance with M.G.L. c. 22C, any member who directly or indirectly receives a reward, gift, or gratuity on account of his official services shall be subject to criminal sanctions and discharge from office. Awards of plaques, citations, or other articles of appreciation recognizing meritorious service or accomplishment that have no significant monetary value are not contemplated by this Rule.

5.14.1 Members shall not solicit or accept from any person, business, corporation or other entity or organization any gift (including but not limited to money, property whether tangible or intangible, food, beverage, loan, promise, service, entertainment, or any other thing or service of value) for the direct or indirect benefit of said member or the Massachusetts State Police if it may be reasonably inferred that the person, business, or organization:

- Seeks to influence action of an official nature or seeks to affect the performance or non-performance of an official duty; or
- Has an interest which may be substantially affected, directly or indirectly, by the performance or non-performance of an official duty.

5.15 ABUSE OF POSITION

5.15.1 Members shall not use their official position, official identification cards, or badges:

- For personal gain; or
- For obtaining privileges not otherwise available to them unless necessary in the performance of duty; or
- For avoiding consequences of illegal acts.

5.15.2 Members shall not lend to another person their issued uniform parts, equipment, identification cards or badges nor permit such identification cards and badges to be photographed or reproduced without the specific approval of the Colonel/Superintendent.

5.15.3 Members shall not authorize the use of their names, photographs, likenesses or official titles which identify them as members of the Massachusetts State Police in connection with testimonials or advertisements for any commodity, commercial enterprise or political purpose.

5.15.4 Members shall not become directly or indirectly involved with any arrangements, agreements, or compromises between criminals and their victims without first receiving permission from their duty assignment supervisor and consulting with the appropriate prosecuting attorney.

5.15.5 Members shall not become directly or indirectly involved with any arrangements, agreements, or compromises between criminals and any member involving restitution for lost wages, lost details or any other payment or benefit from said criminal or said criminal's agent without first receiving permission from their duty assignment supervisor and consulting with the appropriate prosecuting attorney.

5.15.6 Members shall not withhold information of any type whatsoever in order to impede or hinder an ongoing investigation, or to delay the start of such an investigation.

5.16 ENDORSEMENTS AND REFERRALS

Members shall not, in their official capacity, recommend or suggest in any manner the employment, procurement or support of any product, service, charity, or proposed law or regulation unless first authorized by the Colonel/Superintendent.

5.17 IDENTIFICATION

5.17.1 Members shall carry their issued badge(s) and photo identification card(s) on their person at all times, except when impractical or dangerous to their safety or to an investigation. They shall furnish their name, current duty assignment, and identification number to any person requesting that information when they are on- duty or while acting in an official capacity, except when the withholding of such information is necessary for the performance of Massachusetts State Police duties or is authorized by a senior supervisory member or proper authority.

5.17.2 Members who are under suspension for five or more consecutive days must turn in their issued badge(s), identification card(s), and weapon to their Division Commander before the commencement of the suspension. Members who are under suspension for thirty or more consecutive days must turn in all their issued equipment to the Supply Section before the commencement of the suspension. If any issued equipment is missing or unsuitable because of neglect or willful abuse, immediate full payment must be made to the Fiscal Section. Suspended members shall be deprived of all Massachusetts State Police powers and privileges and must not represent themselves as members of the Massachusetts State Police.

5.17.3 No member shall cause to be produced, or possess, or distribute any business card with the member's title and Massachusetts State Police information thereon, unless for an official law enforcement purpose.

5.17.4 If at a civil disturbance or other incident where the senior supervisory member has ordered helmets be worn, the helmet worn shall visibly display the member's full and accurate State Police identification number.

5.17.5 Civilian employees of the Department shall be issued an official Department photo identification card. They shall furnish their name, current assignment, and identification number to any person requesting that information when they are on duty or while acting in an official capacity, except when the withholding of such information is necessary for the performance of certain Massachusetts State Police duties or is authorized by a senior supervisory member or proper authority.

5.18 PAYMENT OF DEBTS

For the purpose of this Article a just debt or support obligation must be recognized as such by a court of competent jurisdiction before administrative action may be initiated.

5.18.1 Members shall not undertake any financial obligation which they know or should know they will be unable to meet.

5.18, continued

5.18.2 Members shall pay all just debts.

5.18.3 Members shall provide the necessary and adequate support for their immediate family and legal dependents.

5.19 POLITICAL ACTIVITY

Members are prohibited from using their official capacity to influence, interfere with, or affect the results of any election for public office. This section is not meant to interfere with the lawful activities of the collective bargaining unit representatives. In accordance with law and these Rules and Regulations, members are prohibited from:

5.19.1 Assuming active roles in the management, organization, or financial activities of partisan political clubs, campaigns, or parties;

5.19.2 Serving as officers of partisan political parties or clubs;

5.19.3 Serving in any elected public office, becoming a candidate for any public office or campaigning for any candidate seeking any public office;

5.19.4 Organizing, selling tickets to, or actively participating in a fund-raising function for a partisan political party or a partisan or non-partisan candidate;

5.19.5 Addressing a political gathering in support of, or in opposition to, a partisan candidate;

5.19.6 Engaging in prohibited partisan political activities on the Federal, state, county, or municipal level;

5.19.7 Serving as election judges or clerks or as a clerk or judge of any board or registry.

5.20 CIVIL ACTIONS

If any member shall bring a civil action, or directly or indirectly commence negotiations for settlement for damages for personal injuries incurred while in the performance of their duty, they shall immediately notify the Colonel/Superintendent, through channels and in writing, and file with the Colonel/Superintendent copies of any complaint(s) or allegation(s), and any notification of settlement(s), and also the final disposition of the action or negotiation.

5.21 RESIDENCE

Members shall reside within the territorial boundaries of the Commonwealth of Massachusetts. Any change regarding a member's domicile or mailing address, shall

5.21, continued be reported immediately, in writing, on a change of address form, to their supervisor who shall forward same to the Director of Human Resources.

5.22 TELEPHONE

Members shall, at all times, provide to their duty assignment supervisor a telephone number or numbers allowing for direct access and immediate contact.

5.23 DISSEMINATION OF INFORMATION

5.23.1 The intent of this section is to protect the members and the Massachusetts State Police against wrongful dissemination of information or its commercialization and is not intended to prevent distribution of legitimate news through proper channels.

5.23.2 Members shall treat official business of the State Police as confidential. Information regarding official business shall be disseminated only to those for whom it is intended, in accordance with established Procedures.

5.23.3 Members may remove or copy official records or reports from a State Police installation only in accordance with established Procedures.

5.23.4 Members shall not divulge the identity of any person(s) giving confidential information, except as authorized by their supervisory member or proper authority.

5.23.5 Members shall not make known any proposed action or movement of the State Police, or the contents of any Order or Directive, to persons not immediately concerned with its execution.

5.23.6 Members shall not comment for publication, nor be interviewed, nor make public speeches on police business, except by permission of the Colonel/Superintendent. Requests for talks, interviews and public speeches shall be directed to the Colonel/Superintendent through the Public Information Section.

5.23.7 No member or civilian employee shall make any type of "records inquiry" either orally, in writing, electronically, or through computer except upon official police business. The results and contents of such checks shall not be disseminated to any person or entity except in conformance with law and Massachusetts State Police Policy and Procedure, and in the course of official police business.

5.23, continued

A "records inquiry" includes obtaining information found in the records of the Registry of Motor Vehicles, and records and information available through NLETS, NCIC, CJIS, court, probation, conviction and corrections records wherever found, Massachusetts State Police records, and any other database or case records management system maintained for law enforcement or public safety purposes that is not accessible to the general public.

5.23.8 Members shall not, directly or indirectly, seek notoriety through the public media.

5.23.9 Members shall not, directly or indirectly, publicly criticize or ridicule any official action of the Massachusetts State Police or any member.

5.23.10 Members shall not directly or indirectly represent the Massachusetts State Police, nor identify themselves as a member of the Massachusetts State Police, when expressing opinions on matters outside the scope of their employment.

5.24 INTERVENTION

5.24.1 Members shall not intervene in investigations being handled by other members or by other governmental agencies unless ordered to intervene by a supervisory member or proper authority or where the situation and circumstances warrant such intervention.

5.24.2 Members shall not undertake any investigation or other official action not part of their regular duties without obtaining permission from their immediate supervisor unless the exigencies of the situation requires immediate Massachusetts State Police action. In that event, their action(s) and the reason(s) therefore shall be reported as soon as possible to their immediate duty supervisor or proper authority.

5.25 ABUSE OF PROCESS

Members shall not knowingly make untrue statements or accusations at any stage of an administrative hearing, civil proceeding or criminal proceeding, or process or application leading thereto.

5.26 USE OF EQUIPMENT

5.26.1 Members shall utilize Massachusetts State Police equipment only for its intended purpose and shall not willfully or through neglect, abuse, spoil, damage, lose, or wrongfully dispose of Massachusetts State Police equipment.

5.26, continued

5.26.2 Members shall be liable for the replacement of any Massachusetts State Police property damaged, lost or destroyed by negligence or misuse.

5.26.3 All Massachusetts State Police equipment issued to members shall be maintained in proper working order.

5.26.4 No member or civilian employee shall use Massachusetts State Police telephones, computers, postage, copiers, facsimile machines, modems, cruisers or other Massachusetts State Police supplies and equipment except for official business.

5.26.5 Members and civilian employees shall operate Massachusetts State Police vehicles in a cautious manner, and in conformance with Massachusetts State Police Policy and Procedure and applicable law.

5.26.6 Members and civilian employees shall not permit non-employees to ride in Massachusetts State Police vehicles unless due to police necessity, or where permission has been granted by the member or civilian employee's supervisor or proper authority.

5.26.7 Ride-along(s) for non-Department personnel for instructional or informational purposes shall not be permitted unless approved in advance by the member's Troop/Section/Unit Commander or designee.

5.26.8 Members shall not leave the Commonwealth of Massachusetts while on duty, or while in any Massachusetts State Police vehicle, or be in uniform while out of state, except when on official police business with permission of their supervisor or proper authority.

5.26.9 Members shall not permit any non-member to wear any part(s) of any issued Massachusetts State Police uniform assigned to them.

5.27 TRUTHFULNESS

5.27.1 Members and civilian employees shall be truthful at all times.

5.27.2 Upon the order of the Colonel/Superintendent, their designee, supervisory member, or proper authority, members and civilian employees shall truthfully answer all questions specifically directed and narrowly related to the scope of employment and operations of the Massachusetts State Police which may be asked of them. An invocation of constitutionally protected rights shall not be a violation of this Rule.

5.27.3 No member or civilian employee shall, in the course of their official duties, execute, file or publish any false written report, minutes or statements, knowing the same to be false.

5.28 OFFICIAL CORRESPONDENCE AND OFFICIAL BUSINESS

5.28.1 Members must transact all their official correspondence and official business through their Commanding Officer.

5.28.2 Massachusetts State Police stationery shall only be used for official Department business.

5.29 INTERCESSION FOR MEMBERS

5.29.1 No member shall directly or indirectly cause any person, not their duty assignment supervisor, to intercede on their behalf with supervisory members or proper authority for the purpose of seeking preferential treatment, or for transfer, re-transfer, assignment or promotion.

5.29.2 No member shall directly or indirectly cause any person, other than their duly authorized counsel where permitted, to intervene with supervisory members or proper authority relative to any official Massachusetts State Police proceeding(s) begun under these Rules and Regulations.

5.29.3 A member against whom a complaint has been made shall not attempt, directly or indirectly, by threat, persuasion, payment or promise of money, or other means to secure the withdrawal or abandonment of such complaint, or to prevent the testimony of witnesses, and shall not at any time before final judgment cause any person to intercede personally, or by letter, or in any other manner, directly or indirectly, in their behalf, with the Colonel/Superintendent or with a member of the Trial Board.

Department of State Police
Rules & Regulations

Effective Date:	Number:
November 10, 2021	**Article 6**

Subject:

REGULATIONS ESTABLISHING DISCIPLINARY PROCEDURES AND TEMPORARY RELIEF FROM DUTY

6.0 REGULATIONS ESTABLISHING DISCIPLINARY PROCEDURES AND TEMPORARY RELIEF FROM DUTY

6.1 TEMPORARY RELIEF FROM DUTY

6.1.1 A supervisory member shall temporarily relieve from duty and place on Administrative Leave with pay, for a period of NOT more than one workday, any member who is unfit for duty. "Unfit for Duty" may include any physical, mental or emotional condition which may, in the judgement of the supervisory member, render the member incapable of adequately performing his/her duties or causing the member to perform duties in such a way as to embarrass or discredit the Department or jeopardize the safety of himself/herself or any other person or property. A written report of the incident shall be forwarded, through channels, to the Division Commander forthwith and a copy of this report shall be made available to the relieved member. The supervisory member shall also secure any issued weapon(s), identification cards and/or other equipment in the relieved member's possession when necessary for the safety of the member or other persons.

6.1.2 Any member placed on Administrative Leave with pay in accordance with Rule 6.1.1 or Policy and Procedure UOF-03, or any member failing to meet the medical or physical fitness standards as required by law and Rules and Regulations, or any member manifesting symptoms of a physical, mental or emotional dysfunction shall, when so ordered by the Colonel, be examined or re-examined, as the case may be, by the Massachusetts State Police Surgeon to determine said member's fitness for duty. During the pendency of said examination or re-examination until otherwise ordered by the Colonel, said member shall be placed on appropriate leave or duty status. The Massachusetts State Police Surgeon shall examine said member forthwith and recommend to the Colonel in writing a duty status as follows:

6.1, continued

- Full Duty; or
- No Duty, member may use sick, vacation, personal or other accrued time as allowed by the collective bargaining agreement; or
- Temporary Modified Duty.

6.1.3 A Troop/Section/Unit Commanding Officer, through channels, may recommend to a Division Commander that a member who:

- Is the subject of a criminal investigation, is arrested or indicted or has a criminal complaint or warrant issued against him/her; or
- Is the subject of an internal investigation; or
- Engages in a strike or prohibited job action; or
- Has failed to attend and successfully complete compulsory training as mandated by the Colonel; or
- Is the subject of a court order directing said member to refrain from abusing a family or household member, or to refrain from threatening or endangering the health, safety or welfare of a family or household member.(For the purpose of this sub-part "family or household member" shall be defined in accordance with M.G.L. c. 209A §1).

Be placed on Administrative Leave with pay for a period NOT to exceed five work days. Power to issue such relief shall be vested solely in the Division Commander, with the approval of the Colonel/Superintendent. Administrative Leave shall not involve loss of pay initially; however, loss of pay relating to this period of Administrative Leave may be later imposed along with other disciplinary action. The supervisory member shall secure any issued weapon(s), identification cards and/or other equipment in the relieved member's possession when appropriate.

6.2 DUTY STATUS HEARING

6.2.1 A Division Commander, with the approval of the Colonel/Superintendent, may convene a duty status hearing relative to the member's duty status if:

- The member is the subject of a criminal investigation, is arrested or indicted or, if a criminal complaint or warrant is issued against the member; or
- The member is the subject of an internal investigation; or
- The member engages in a strike or prohibited job action; or
- The member has failed to attend and successfully complete compulsory training as mandated by the Colonel; or
- The member is the subject of a court order directing said member, to refrain from abusing a family or household member or to refrain from threatening or endangering the health, safety or welfare of a family or household member. (For the purpose of this sub-part "family or household member" shall be defined in accordance with M.G.L. c. 209A §1); or
- Exceptional circumstances exist which warrant such duty status hearing.

6.2, continued

6.2.2 The duty status hearing shall be conducted by a Board consisting of three staff and/or commissioned officers appointed by the Colonel. The Board shall expeditiously gather sufficient facts of satisfactory reliability to make a fair determination relative to the member's appropriate duty status.

6.2.3 The duty status hearing shall be under the full control of the Board, and no person, whether an official of the Massachusetts State Police or not, shall bepermitted to be present or take part without the unanimous consent of the Board.

6.2.4 The Duty Status Board shall, after a review of the facts presented, make findings and recommend to the Colonel/Superintendent whether the member should be:

- Continued on full duty;
- Placed on restricted duty;
- Suspended with pay; or
- Suspended without pay.

The Board may supplement its recommendation with a referral to the State Police Surgeon to evaluate a member’s fitness for duty, and/or a referral to the Employee Assistance Unit; provided however, said referral shall be rationally related to the incident which gave rise to the Duty Status Hearing.

6.2.5 All Duty Status recommendations shall be subject to the approval of the Colonel/Superintendent. The Colonel shall impose a Duty Status consistent with the Board's recommendation, provided however, the Colonel/Superintendent may impose a different Duty Status if facts, circumstances, evidence, aggravating or mitigating factors or any othermatters so dictate. Once approved by the Colonel, such order shall be embodied in Personnel Orders. A member's failure to strictly adhere to such order(s) shall be cause for the Duty Status Board to reconvene and reconsider the member's duty status. Failure to adhere to such order(s) may also result in independent administrative action.

6.2.6 Restricted duty shall consist of any type of limited duty approved by the Colonel/Superintendent, and shall continue in full force and effect until such time as otherwise recommended by the Duty Status Board and approved by the Colonel.

6.3 LETTER OF COUNSELING

6.3.1 After investigation a Division Commander may order that a letter of counseling be placed in a member's personnel file.

6.3.2 A letter of counseling is a formal document specifying the member's deficiency (ies).

6.3.3 If the Division Commander orders that the letter of counseling be placed in the member's personnel file, the Division Commander shall forward a copy of the letter of counseling to the member through channels. A member shall be allowed to have placed in his/her personnel file a written response or counter-statement to any letter of counseling. A letter of counseling cannot be the subject of appeal.

6.3.4 Letters of counseling shall expire one year from the date of issue. A member may request that a letter of counseling be removed from their personnel folder upon its expiration. Whenever a second or subsequent letter is filed prior to the expiration date of any preceding letter, the member may request that the letters on file be removed on the expiration date of the most recent letter.

6.3.5 This section does not limit the use of any other disciplinary procedure enumerated in these Rules and Regulations.

6.4 CHARGES AND DISPOSITION WITHOUT HEARING

Troop/Section/Unit Commanding Officers may, after investigation, recommend through channels to the Division of Standards and Training that disciplinary action be brought against members under their charge for violations of law and/or State Police Rules, Regulations, Policies, Procedures, Orders, and Directives. Such recommendations shall contain a copy of the charge form.

6.4.1 The Division of Standards and Training shall review all requests for disciplinary action and recommend to the Deputy Superintendent that charges be preferred if warranted.

6.4.2 Upon recommendation from the Lieutenant Colonel/Deputy Superintendent that a member complained against be exonerated, the Colonel/Superintendent, may, in writing, exonerate the member. Copies shall be given to the member and the appropriate Division Commander.

6.4, continued

6.4.3 When a Troop/Section/Unit Commanding Officer is notified that the Colonel/Superintendent has approved the charges and recommends corrective or disciplinary action, the Troop/Section/Unit Commanding Officer shall serve a copy of the charge form and waiver if deemed appropriate on the member against whom charges are to be preferred. The charge form shall include:

- The particular Article or Articles alleged to have been violated and the corresponding class schedule as determined in accordance with Appendix "A";
- The date or dates upon which and the place or places at which the alleged acts or omissions occurred; and
- A statement of the alleged acts or omissions.

6.4.4 One copy of the charge form shall be given to the member and the original shall be forwarded, through channels, to the Division of Standards and Training.

6.4.5 Members may waive their right to a hearing by a Trial Board and may accept such discipline as the Colonel/Superintendent may offer and prescribe, including discharge.

6.4.6 In the event a member does not elect to waive the right to a Trial Board, the Colonel/Superintendent shall issue an order, in writing, for disciplinaryaction in accordance with Rule 6.7. Copies shall be given to the member and the appropriate Division Commander.

6.5 HEARING ON CHARGES

6.5.1 A member who has served for one year or more and has been formally charged in accordance with Departmental Rules and Regulations shall be tried by a State Police Trial Board appointed by the Colonel/Superintendent. Alternatively, the member may request that s/he be tried by a Board consisting of the Colonel. Any request for a hearing before the Colonel shall be made in writing and subject to the Colonel's approval.

6.6 DEPARTMENTAL PROSECUTOR

6.6.1 The Lieutenant Colonel/Deputy Superintendent shall appoint a Commissioned Officer as the Departmental Prosecutor. The Department Prosecutor shall present evidence, call witnesses, and cross-examine witnesses on behalf of the Department.

6.7 TRIAL BOARDS

6.7.1 A State Police Trial Board shall hear cases regarding violations of Rules, Regulations, Policies, Procedures, Orders, or Directives. A Trial Board hearing shall be a formal administrative proceeding

6.7.2 A Trial Board shall consist of three staff and/or commissioned officers appointed by the Colonel/Superintendent. The Board shall be presided over by a President, as designated by the Colonel/Superintendent. The President shall designate a member of the board as Secretary.

6.7.3 No member of a Trial Board shall sit in a hearing in which a member of his/her own Troop/Section/Unit is either a complainant or defendant; nor, shall s/he sit in on any other case in which his/her personal or official relations to either party or to counsel might properly raise a question of impartiality. Said member shall be excused and replaced by an alternate.

6.7.4 The charged member, prior to the hearing date, may request a continuance. Continuances may be granted by the Colonel/Superintendent. No continuance shall be granted within seventy-two hours of the Trial Board Hearing unless extenuating circumstances warrant the granting of such continuance. If criminal charges are pending against the charged member, the hearing may be postponed until after the criminal disposition.

6.7.5 The hearing shall be under the full control of the Board, and no person, whether an official of the Department or not, shall be permitted to bepresent or take part without the unanimous consent of the Board.

6.7.6 The charged member is entitled to be represented by counsel, but counsel shall not be provided by the Massachusetts State Police. All proceedings shall be recorded. The charged member shall have the right to present evidence, to call witnesses on his/her behalf, and to cross-examine witnesses against him/her. Witnesses shall testify under oath or affirmation. The Trial Board is not bound to follow strict rules of evidence.

6.7.7 Upon the completion of the testimony presented by the prosecution and defense, the Board shall accept evidence from the Department prosecutor of prior offenses/disciplinary history. Any such records or evidence submitted shall be used only after the charges have been adjudicated by the Trial Board and for the sole purpose of recommending discipline under Rule 6.9. Should the member wish to

6.7, continued

address the Board on the issue of any such priordiscipline, the Board shall hear any such additional arguments.

6.7.8 The Trial Board, by a majority vote and in writing shall summarize the evidence, and make findings of fact. The Trial Board shall enter a determination of "Guilty" or "Not Guilty" for each charge/specification. In the event that the Trial Board finds guilt by a preponderance of the evidence on one or more of the charges, the Trial Board shall consider the evidence presented by the Department prosecutor pertaining to the accused member's prior offenses/disciplinary history, and shall make recommendations for administrative action in accordance with Rule 6.9. The Board shall forward said findings to the Lieutenant Colonel/Deputy Superintendent. Should the Board recommend increased discipline under the Discipline Guidelines, the Trial Board should note the same in its recommendation, referring to specificprior offenses. In the event the Trial Board finds the member not guilty, such finding shall be final and conclusive, except as otherwise provided by law.

6.8 DEPUTY SUPERINTENDENT'S ACTION

6.8.1 Upon receipt of the trial record, the Lieutenant Colonel/Deputy Superintendent shall review all summaries, findings, reports, and recommendations received.

6.8.2 If the Trial Board's decision is adverse to the accused member, the Lieutenant Colonel/Deputy Superintendent shall forward a copy of the proposed decision to the member provided, however, a request was made to file objections with the Colonel seven (7) days prior to the hearing date. Absent such a written request, the provisions of this section shall be deemed waived. The accused member shall have seven (7) days from receipt of the proposed decision to file written objections to the Colonel.

6.8.3 After receipt and review of written objections as provided in Rule 6.8.2, the Lieutenant Colonel/Deputy Superintendent shall make, in writing to the Colonel/Superintendent, any recommendations as may be determined by thefacts of the case and forward the Trial Board decision, written objections and recommendations to the Colonel/Superintendent.

6.9 JUDGEMENTS AND DISCIPLINE

6.9.1 The Trial Board shall recommend discipline in accordance with Rules 6.9.2, 6.9.3 and 6.9.4.

6.9.2 Recommendations for discharge, suspension, loss of accrued vacation/personal/holiday time, and reprimands (s) in Personnel Orders shall be made in accordance with the Appendix "A" Guidelines. All disciplinary recommendations made by the Trial Board shall fall within the parameters of the Appendix "A" Guidelines; provided however, the Trial Board may supplement its recommendation with a petition to theColonel/Superintendent requesting that s/he consider a departure from said guidelines. In the event the Trail Board elects to file a supplemental petition, such petition shall state in writing facts, circumstances, evidence, aggravating or mitigating factors, or any other matters that may warrant such consideration.

6.9.3 Notwithstanding Rule 6.9.2, the Trial Board may recommend other additional discipline as it deems appropriate including, but not limited to alternative duty (6.9.8), transfer, limiting paid details or overtime, and reduction in one or more titles of rank.

6.9.4 The Trial Board shall recommend discipline for each offense for which the member is found guilty; provided however in the event of multiple offenses the Board shall further recommend whether such discipline should be imposed consecutively or concurrently. All such recommendations shall be forwarded to the Lt. Colonel/Deputy Superintendent in accordance with Rule 6.8.

6.9.5 All judgments of guilt entered or, discipline recommended by the Trial Board or recommendations made in accordance with Rule 6.8.2, shall be subject to the approval of the Colonel/Superintendent and, when so approved, shall be final and conclusive except as otherwise provided bylaw. Disciplinary action imposed by the Colonel/Superintendent, shall be in writing, duly entered upon the record and embodied in Personnel Orders and a copy thereof placed in the member's personnel file.

6.9.6 In the event the Trial Board finds a member not guilty, such finding shall befinal, conclusive and binding on all parties. In the event the Trial Board finds a member guilty and the Colonel/Superintendent finds material error in the procedure, judgment, or disciplinary recommendation of a Trial Board, the Colonel may order a new Trial Board, or direct that one or more charges against the accused be

6.9, continued

dismissed or impose discipline in accordance with Rule 6.9.5 and 6.9.7.

6.9.7 The Colonel/Superintendent may impose discipline that departs from the Guidelines if facts, circumstances, evidence, aggravating or mitigating factors, or any other matters so dictate. In the event the Colonel/ Superintendent departs from the Guidelines, the Colonel/Superintendent shall put forth in writing his/her justification for such departure.

6.9.8 If alternative duties are recommended by the Trial Board and approved by the Colonel/Superintendent, they shall be performed under the direction of the member's Troop/Section/Unit Commanding Officer. When the disciplinary action has been completed, the Troop/Section/Unit Commanding Officer shall so certify in writing to the Lieutenant Colonel/Deputy Superintendent.

Subject:

REGULATIONS ESTABLISHING ENLISTMENT, DISCHARGE AND RESIGNATION

7.0 REGULATIONS ESTABLISHING ENLISTMENT, DISCHARGE AND RESIGNATION

7.1 ENLISTMENT

7.1.1 No trainee or member shall procure his appointment or enlistment or continue in enlistment by means of any willful misrepresentation or misstatement.

7.1.2 Enlistment within the Massachusetts State Police is dictated by the terms of M.G.L. c. 22C §10.

7.1.3 During the first twelve months following a member's initial enlistment members shall be retained on a probationary status. During the probationary period, the Colonel/Superintendent may, as allowed by law,discharge any member.

7.1.4 As condition precedent to a member's continued enlistment, said member shall undergo an in-service medical and physical fitness examination and shall meet such in-service medical and physical fitness standards as provided by law and as prescribed by the Colonel/Superintendent.

7.2 DISCHARGE

7.2.1 An HONORABLE discharge may be given to members of the Massachusetts State Police:

- Upon retirement in good standing; or
- Upon separation for illness or injury incurred through no fault of the member, in the actual performance of duty, and where the member's record of service merits such discharge.

7.2, continued

7.2.2 An ORDINARY discharge may be given under honorable conditions to members of the Massachusetts State Police:

- Resigning at their own request.

7.2.3 A GENERAL discharge may be given to members of the Massachusetts State Police not complying with conditions applicable to an honorable or ordinary discharge. A GENERAL discharge shall mean the complete and final severance from any duty with the Massachusetts State Police.

7.2.4 A DISHONORABLE discharge may be given to any member of the Department who is;

- Discharged following a Trial Board, or is discharged after having waived their right to a Trial Board;
- Separated from service while a Trial Board is pending or before completion of the full and complete discipline imposed following aTrial Board;
- Separated from service after being charged with or convicted of a criminal offense; or
- Separated from service while the subject of an administrative orcriminal investigation.

7.2.5 A member of the Department who has been dismissed from the State Police after a hearing before a Trial Board, or who resigned while charges were pending against that member, shall not be reinstated by the Colonel/ Superintendent. Any member granted a GENERAL or DISHONORABLE discharge shall not be reinstated by the Colonel/Superintendent.

7.3 RESIGNATION

7.3.1 Members of the Massachusetts State Police who resign voluntarily shall submit their resignations to the appropriate Division Commander, in writing, at least one month in advance of the anticipated date of separation. The Division Commander shall notify the Personnel Section forthwith.

7.3.2 A member shall remain subject to State Police Rules, Regulations, Policies, Procedures, Orders and Directives until their resignation or retirement is effective.

7.3.3 All resignation requests shall be investigated by the member's Troop/Section/Unit Commanding Officer. All Troop/Section/Unit Commanding Officers shall state in their endorsement on all resignations whether or not the member should be recommended for future reinstatement. When a member resigns after charges have been preferred or while charges are pending, the Troop/Section/Unit Commanding Officer shall state in their recommendations what the specific charges are and the reason for same

Subject:	
REGULATIONS ESTABLISHING THE BOARD ON CLAIMS	

8.0 REGULATIONS ESTABLISHING THE BOARD ON CLAIMS

8.1 Under the authority granted by M.G.L. c. 22C, there is established within the MassachusettsState Police a Board on Claims for physical injuries.

8.1.1 The Board on Claims shall hear cases of claims relating to injuries incurred by any member or trainee (while in training) actually performing police services or while such member or trainee is traveling to and from a duty assignment.

8.1.2 The Board on Claims shall be appointed by the Lieutenant Colonel/Deputy Superintendent with the approval of the Colonel/Superintendent and shall consistof three members as follows:

- Two staff and/or commissioned officers of the Department; and
- The State Police Surgeon.

8.1.3 One staff or commissioned officer shall be designated by the Lieutenant Colonel/ Deputy Superintendent as the President.

8.1.4 One staff or commissioned officer shall be designated by the President of the Board on Claims as the Secretary.

8.1.5 The members of the Board on Claims shall review all appropriate and available information relating to any claim of physical injury alleged by a member or traineeto have occurred in the line of duty.

8.1.6 The Board on Claims shall be conducted in an informal manner and may proceedin any manner as it deems fair and appropriate. The Board on Claims may obtain any investigative reports, documents, and bills of debit that may relate to the claim.

8.1.7 The Board on Claims may require an employee to undergo additional evaluation asappropriate.

8.1.8 At the conclusion of a Board on Claims hearing, the panel, in writing, shall summarize the claim and make findings.

8.1.9 The President of the Board of Claims through channels and in writing, shall notify the member or trainee of any action taken.

8.1.10 The Department shall be reimbursed forthwith by any member or trainee for the sums as have been paid to the injured member or trainee, or on his/her behalf, as injury related costs and wages, provided that the injured member has been reimbursed by the person(s) or organization(s) responsible for the accident or injury.

Rules & Regulations

Effective Date:	Number:
November 10, 2021	**Article 9**
Subject: **REGULATIONS ESTABLISHING EXAMINATION APPEAL**	

9.0 REGULATIONS ESTABLISHING EXAMINATION APPEAL

9.1 The Colonel/Superintendent or his/her designee shall administer the appeal process for recruit entrance exams and promotional exams as established by Massachusetts State Police Rules, Regulations, Policy, Procedure, Order, or Directive and applicable law.

9.2 The appeal process for recruit candidates shall include the following elements:

9.2.1 The marking of an applicant's answers to the questions on such entrance examination.

9.2.2 A finding by the Colonel/Superintendent that an applicant does not meet the entrance requirements for such examination or that such applicant does not meet age requirements.

9.2.3 The suitability of a question to test the fitness of such member to performthe primary and dominant duties of the position for which the examination was held.

9.3 An Appeals Board consisting of three staff and/or commissioned officers appointed by the Colonel shall review all promotional examination appeals and make written recommendations to the Colonel.

9.4 Appeals regarding promotional examinations shall be limited to the following:

9.4.1 A finding by the Colonel that a member does not meet the requirementsfor such examination.

9.4.2 The marking of a member's answers to the questions on such promotional exam.

9.4, continued

9.4.3 The suitability of a question to test the fitness of such members to performthe primary and dominant duties of the rank for which the examination was held.

9.5 In determining appeals filed pursuant to Rule 9.4.1, the Board shall utilize Departmental records to determine whether a member meets the requirements set forth in M.G.L. c. 22C.

9.6 In determining appeals filed pursuant to Rule 9.4.2 the Board shall consider the following:

- Does the question contain any material typographical or syntax errors?;
- Is the keyed answer correct according to the master answer sheet?;
- Is the intended key the best of the available choices?; and
- Was the marking of the member's answers to the questions correctly recorded?

9.7 In determining appeals filed pursuant to Rule 9.4.3, the Board shall determine, (1) whether the question was drawn from recommended source material and, (2) whether the question and the source material reasonably test the fitness of a member to perform the primary and dominant duties of the rank for which the examination was administered. When determining whether the question and the source material reasonably test the fitness of a member to perform the primary and dominant duties of the rank for which the examination was administered, the Board shall observe, and be guided by, the current job classification specifications for such rank.

9.8 The Colonel shall establish in Departmental Orders the time and manner when appeals shall be filed. All appeals shall be in writing.

Representative Patrick Brennan, Chair of the House Committee on Transportation
Senator Dick Mazza, Chair of the Senate Committee on Transportation
Date: September 27, 2018
Re: Statutory Compliance of Automated License Plate Recognition Systems in Vermont
Cc: Thomas Anderson, Commissioner of the Department of Public Safety

Introduction

Automated License Plate Recognition system (ALPR) units are mounted on police vehicles, traffic lights, and street signs. The units automatically record images of license plates and enter the license plate numbers as well as GPS coordinates and other information into a database. The database can later be searched, and the information retrieved can help law enforcement locate where vehicles were at a specific time and place. Many states regulate the use of ALPR systems, mostly through access and data retention policies.[1] Such policies are generally driven by privacy concerns and vary widely. For example, New Hampshire law requires that ALPR records be deleted within three minutes of their capture, while Colorado allows records to be retained for three years.[2]

Act No. 175 of 2018 requires the State Auditor's Office (SAO) to examine requests for ALPR historical data that resulted in a release of information by the Vermont Intelligence Center (VIC) to the requester from July 1, 2016 through June 30, 2018. The objective of the examination is to determine whether requests and releases of historical ALPR data complied with the requirements of 23 V.S.A. § 1607.[3]

Highlights

- SAO reviewed all sixty-four requests for historical ALPR data that resulted in the release of information reviewed during the period specified in Act 175. Fifty-seven appeared to comply with 23 V.S.A. § 1607, while seven did not.
- Six of seven releases of information that did not comply with statute provided historical data older than six months, which requires the requester to obtain a warrant or there must be pending criminal charges.
- One request did not provide specific and articulable facts, as required by law.

1 "Automated License Plate Readers: State Statutes Regulating Their Use," National Conference of State Legislatures, available here.

2 "Automated License Plate Readers: State Statutes Regulating Their Use," National Conference of State Legislatures, available here.

3 Act 175 of 2018

Statute and VIC

Law enforcement agencies can request ALPR historical data to aid their investigations. Historical data "means any data collected by an ALPR system and stored on the statewide ALPR server…" operated by the VIC.[4] 23 V.S.A. § 1607 states that to be approved, "the request must provide specific and articulable facts showing that there are reasonable grounds to believe that the data are relevant and material to an ongoing criminal, missing person, or commercial motor vehicle investigation or enforcement action." The request must include the name of the requester, the requester's law enforcement agency, and the law enforcement agency's Originating Agency Identification (ORI) number. Furthermore, as noted above, statute specifies that historical data older than six months may only be released if it is related to pending criminal charges or a warrant has been issued.[5]

According to the VIC, analysts rely on the information on the ALPR Request Form when determining whether to approve a request for historical data. Specifically, they ensure that there is a case number, the approval of the supervisor of the requesting law enforcement officer, and that the written request does not appear to be "fishing" for information. The VIC notes that "specific and articulable facts" and "reasonable grounds" are subjective standards, and each request is examined with the context provided on the form. Furthermore, VIC specified that it does not determine whether information is necessary for an investigation and does not verify the information provided by the requester.[6] [7]

Compliance with Statute

From July 1, 2016 to June 30, 2018, VIC approved 339 requests for a search of historical data made by local, state and federal law enforcement agencies, 64 of which resulted in the release of information to the requester.[8] As specified by Act 175, SAO examined the 64 that resulted in the release of historical data. SAO did not assess the accuracy of the information on the ALPR Request Forms provided by the VIC. For example, we did not verify statements made by law enforcement officers; our analysis assumes that professional law enforcement provided accurate information on the ALPR Request Forms. Further, we did not examine requests that were approved but did not result in the release of historical information.[9]

4 23 V.S.A. § 1607

5 23 V.S.A. § 1607

6 Statute does not require that VIC determine whether information provided on the form is relevant to an investigation and does not require that the VIC verify information provided by the requester. SAO includes this information to provide relevant context about how VIC carries out its duties.

7 August 2018 discussion with VIC.

8 Specifically, the VIC approved the request for information based on information provided by a law enforcement agency with an ALPR Request Form, and found information in the ALPR database relevant to the ALPR request. In many cases, requests are approved but no relevant information is found in the database, and as a result no information is released to the requesting law enforcement agency.

9 VIC only releases historical data after approving the request and if relevant data is found in the database.

aud.auditor@vermont.gov♦ www.auditor.vermont.gov

We examined ALPR Request Forms for each element that is required by statute. Most met the requirements in 23 V.S.A. § 1607. However, requests for historical data varied widely in the level of detail provided. Some offered a narrative explaining why historical data would be useful to an investigation, while others provided very little information. For example, one case provided details about a crime that occurred at a certain location, a witness to that crime, the type of vehicle the witness described, and how the ALPR historical data might be useful to the active investigation. In contrast, another request merely stated that the information was to track a certain vehicle of "drug traffickers from [city name]." Appendix A includes further examples of the variation in level of detail provided by law enforcement on ALPR Request Forms.

Seven requests and subsequent information releases did not comply with statute. Six requests resulted in the release of historical data older than six months, which statute specifies requires a warrant or pending criminal charges.[10] The releases of historical data older than six months occurred in 2016 and 2017, and data released were up to eighteen months old. The ALPR Request Forms did not include or reference a warrant or pending criminal charges.

VIC agreed that they were not in compliance with the statute, which went into effect on July 1, 2016, and they stated that they were not in compliance until "mid-2017." Subsequently, the VIC retrained their analysts and changed their request review procedures to include a review of each ALPR by a second analyst.[11]

Of the seven requests that resulted in the release of historical data but did not comply with statute, one lacked specific and articulable facts. The request, made by a local police department, stated that the request was for a "Drug investigation," and identified a vehicle but provided no other details. This does not meet a standard of "specific and articulable facts" that would provide reasonable grounds to believe that the data are relevant to an ongoing investigation because the request simply states that there is a drug investigation but does not explain why the data would be relevant to the investigation itself.

Conclusion

Of 64 releases of historical data reviewed by SAO, 57 appeared to comply with 23 V.S.A. § 1607, while seven did not. Six of seven provided information older than six months without a warrant or a pending criminal charge, while one request provided no "specific and articulable" facts. While 11 percent of reviewed cases did not comply with statute, 89 percent met the statutory requirements.

The legislature could take a variety of actions to safeguard ALPR historical data. As mentioned, statute requires that the requester "provide specific and articulable facts showing that there are reasonable grounds to believe that the data are relevant and material" to ongoing investigations. The legislature

10 Act 169 of 2015 amended 23 V.S.A. § 1607 to specify that no historical data older than 6 months be released without a search warrant or pending criminal charges. The relevant section of Act 169 went into effect on July 1, 2016. All reviewed requests came at least three months after the provisions in Act 169 went into effect.

11 September 5, 2018 email with VIC.

132 State Street ♦ Montpelier, Vermont 05633-5101
802.828.2281 ♦ Toll-Free in VT only: 877.290.1400 ♦ Fax: 802.828.5599
aud.auditor@vermont.gov♦ www.auditor.vermont.gov

could further specify how “specific and articulable facts” and “reasonable grounds” are defined. Such a definition might be developed in consultation with local and state law enforcement agencies to create a workable definition for law enforcement balanced against privacy concerns.

Furthermore, the legislature could require historical data requesters to attest that the information they have provided on an ALPR Request Form is accurate and truthful to the best of their knowledge. Finally, the legislature could require the VIC to annually conduct an internal audit of their ALPR system process to ensure statutory compliance and improve the procedure.

We appreciate the assistance of VIC and DPS staff during this review.

Appendix A: ALPR Request Form Details Examples

Requests for historical data varied widely in the level of detail provided. Some offered a narrative explaining why historical data would be useful to an investigation, while others provided very little information. Here we have provided six redacted examples of the information provided by law enforcement agencies on ALPR Request Forms. In addition to the information provided below, ALPR Request Forms often include specific vehicle information.

1. “Investigation into multiple ATM robberies spanning multiple counties in the State of Vermont. The suspect has been associated with VT registration: [license plate, make of vehicle] The first ATM robbery occurred [date] and the latest was on [date].”

2. “Vehicle reported to be a stolen rental car. Possibly involved in frequent trips between [City] and VT.”

3. “Suspects vehicle in car theft.”

4. “The following vehicle may be involved in drug trafficking from [state] to the Vermont. The intended suspect to the investigation is [name, date of birth] and the vehicle was rented from [car rental company]. The projected search of the system of VT and [state] is to verify information given from a cooperating subject that he is traveling to and from [state] frequently to traffic heroin and cocaine back to VT in this vehicle.”

5. “Historical Query on individual’s vehicle to see if it has been seen in Vermont over the last year or so. Individual is associated with known marijuana smugglers and may be participating in the movement of illicit drugs.”

6. “[Name] is suspected of selling heroin in the [town 1] and [town 2] area. He is also possibly linked to a fatal overdose in [town 2].”

Massachusetts Department of State Police
Automated License Plate Recognition (ALPR) System
Memorandum of Understanding and Agreement

THIS AGREEMENT, made and entered into this 3rd day of May, 2023 by and between the Department of State Police, hereinafter referred to as "Department," and the Chicopee Police Department, a public entity, hereinafter referred to as "Agency," collectively referred to as "Parties."

WHEREAS, the Department contracts the services of one or more vendors to host an Automated License Plate Recognition (ALPR) database to store ALPR data; and

WHEREAS, the Parties provide public safety services within their respective jurisdictions; and

WHEREAS, the Parties have found it to be of mutual benefit to provide for the most efficient utilization of their resources and services in the application to public safety efforts within their respective jurisdictions; and

WHEREAS, the Parties are committed to cooperation and coordination in providing the highest level of public safety services to the public, guided by the principle that performing cooperatively is in the best interest of the public; and

WHEREAS, the Agency desires to use the ALPR system contracted and managed by the Department to facilitate the storage of ALPR information generated by the Agency; and

WHEREAS, the Agency desires to share law enforcement information owned by the Agency under the conditions set forth in this Agreement.

NOW, THEREFORE, for and in consideration of the covenants contained herein, IT IS HEREBY AGREED, by and between the Parties as follows:

1. PURPOSE:

The purpose of this Agreement is to provide a standardized approach and method of storage, retention, sharing, and access of ALPR data between the Department and Public Safety Agencies hosting ALPR data on the Department's ALPR system.

2. COSTS:

The Department shall be responsible for the costs of purchasing and maintaining the ALPR system as long as such funding is available to the Department and authorized by the appropriate authorities of the Commonwealth. Participating agencies shall be responsible for the costs of purchasing, servicing, maintaining, repairing, and/or licensing the ALPR equipment used by their respective agency. The Department shall not be responsible for any costs incurred by the Agency for the purchasing, servicing, maintaining, repairing, and/or licensing of the ALPR equipment owned or used by the Agency. The Agency shall inspect the Agency's ALPR equipment on a regular basis and document each inspection. Any irregularities or malfunctions of any ALPR equipment owned by the Agency or of any ALPR information shall be reported to the Department immediately and shall be addressed and repaired by the Agency as soon as reasonably possible.

3. DATA ACCESS AND SECURITY REQUIREMENTS:

a. System Availability: The Department will work with the vendor(s) to keep the ALPR system software and servers online and available with downtime limited to necessary system maintenance activities or to any outages that are beyond the control of the Department.

b. Data Sharing: ALPR data contributed by the Agency will be accessible for official purposes to all Agencies that have entered into an ALPR Agreement with the Department. The Agency shall not otherwise share ALPR data with or provide ALPR data to any person, entity, or government agency, other than a law enforcement agency, unless such disclosure is authorized by policy or court order or unless such disclosure is required by the Massachusetts Rules of Criminal Procedure or Rules of Superior Court governing discovery in criminal matters.

c. Security Requirements: The Department and the Agency agree to enforce and maintain security requirements for the information stored in the ALPR system as specified in the Agreement. The Agency agrees that the information hosted in the ALPR system shall be used for law enforcement purposes only and that only law enforcement agency employees that have been subject to appropriate background screening shall be allowed access to the system.

   Background screenings must be fingerprint-based and include check of both the state and national criminal history repositories. If a felony conviction of any kind is found, access to ALPR system shall not be granted. The Agency agrees not to share

passwords, user logins, or allow the ALPR software to be otherwise used by Agencies who have not entered into an Agreement with the Department allowing such activity.

An employee of the Agency may operate an ALPR unit that is connected to the Department's ALPR system or access the Department's ALPR system software only if the person has been designated as an authorized user by the Chief of the Agency or designee, and has received training from the Agency or the Department on the proper use and operation of ALPRs and any policy or procedures governing the use of ALPRs and ALPR data issued or adopted by the Agency.

4. IMPLEMENTATION OF POLICY:

The Agency shall, within 30 days of execution of this Agreement, adopt the Department's General Order TRF-11 as the policy and procedure document that will govern the Agency's use of and interaction with the Department's ALPR system. The Agency agrees that it has been provided with physical or electronic copy of General Order TRF-11, has had sufficient time to read, review, and understand the document in its entirety, and agrees to be bound by the provisions contained therein. The Department agrees to inform the Agency of any updates or modifications to General Order TRF-11, and the Agency understands and agrees that any updates to General Order TRF-11 will be binding upon the Agency unless the Agency elects to terminate the Agreement and withdraw from participation in the Department's ALPR system.

5. BENEFITS TO AGENCY:

a. Data Links: The centralized storage of ALPR data will provide a solution to the problem of inaccessible or irretrievable information due to disconnected ALPR systems and the difficulty in sharing information across jurisdictional boundaries.

b. Reduction of Costs: The centralized storage of ALPR data will reduce the financial burden to the Agency that is associated with purchasing and maintaining ALPR software.

6. RECORDS AND REPORTS:

The Department protects all ALPR information as personally identifiable information (PII) because ALPR information may be combined with other information to specifically identify a unique individual. As such, all information retained in the Department's ALPR system is the sole property of the Department. The Agency agrees that information stored in the ALPR system for the Agency may be subject to disclosure under certain circumstances. The Agency will refer to the Department for review all information requests for Agency information, including, but not

limited to, public records requests, court orders, legal motions, subpoenas, and/or summonses. The Department's Legal Department shall determine the best manner of responding to all requests for Agency information.

7. RETENTION

All ALPR information obtained by the Agency from the Department's ALPR system shall be retained pursuant to the Department's General Order TRF-11.

8. AMENDMENTS:

Any changes and additions to this Agreement shall be made by written amendments to this Agreement and shall not be effective until approved in writing by the Parties. A joint review of this Agreement may be requested at any time by either of the Parties to identify needed changes, which may be amended by written mutual agreement of the Parties.

9. DURABILITY:

This Agreement shall become operational and effective upon execution by the Parties. Parties may terminate the Agreement at any time by giving written notice to the other Parties at least thirty (30) days prior to the effective date of termination. The Agreement may also be terminated by the Department without prior notice to the Agency in the event of executive, legislative, or judicial mandate which requires the unanticipated discontinuation or modification of the ALPR program. In the event of such termination, the Department will notify the Agency as soon as practicable.

10. BENEFITS:

The Parties shall agree that the provisions of this Agreement are not intended to directly benefit and shall not be enforceable by any person or entity not a party to this Agreement. This Agreement is not intended to confer any legal rights or benefits on any person or entity other than the Parties of this Agreement.

11. INDEMNIFICATIONS:

Parties shall defend, indemnify, and hold harmless every other party and its officers, agents, employees, and representatives from any and all losses, liability, damages, claims, suits, actions and administrative proceedings, and demands and all expenditures and cost relating to acts or omissions of the indemnitor, its officers, agents, or employees arising out of or incidental to the

performance of any of the provisions of this Agreement. Parties do not assume liability for the acts or omissions of persons other than their respective officers, its employees, agents, and MOU officers.

The Agency releases the Department from any liability relating to the loss or destruction of data contributed by the Agency. The Agency further releases the Department from any liability relating to the loss of the Agency's access to the ALPR system due to system outage, commercial vendor failure or malfeasance, or executive, legislative, or judicial mandate which requires the unanticipated discontinuation or modification of the ALPR program. The Agency further releases the Department from any liability relating to the release of data or information contributed by the Agency pursuant to a lawful procedure or order.

12. ASSIGNMENT PROHIBITED:

Parties to this Agreement may not assign any right or obligation pursuant to this Agreement. Any attempted or purported assignment of any right or obligation pursuant to this Agreement shall be void and of no effect.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement on the date as written below.

Colonel John E. Mawn, Jr. Massachusetts State Police	Representative: Deputy Chief Eric Watson Agency:

Department of State Police
DIVISION COMMANDER'S ORDER

Issue Date	**Number**
September 13, 2023	**2023-DHS-013**
Subject: **ALPR Data Retention & Access**	

The Division of Homeland Security and Preparedness is responsible for the administration of the Department's Automatic License Plate Recognition (ALPR) system. The availability and use of ALPR technology significantly enhances public safety by augmenting the operational and investigative effectiveness of law enforcement agencies.

The use of ALPR technology is governed by General Order TRF-11 "Automatic License Plate Recognition". In addition, the use of ALPR systems shall be subject to the guidelines set forth in this Order unless superseded by General Order TRF-11.

Pursuant to General Order TRF-11, the retention of ALPR data collected by the Department shall be determined by the Department of Criminal Justice Information Services (DCJIS) policy. Furthermore, ALPR systems operated by the Department shall be configured to restrict data visibility for a maximum duration of sixty (60) days from the date of the initial request.

Users requesting to access records beyond sixty (60) days, shall contact the Commonwealth Watch Center, the ALPR Administrator, or other administrator authorized by the Division Commander of Homeland Security and Preparedness. The request will be reviewed on a case-by-case basis. In the absence of exigent circumstances, the user may be required to revise their request, consult with a District Attorney's Office of jurisdiction, or to submit legal process to obtain the requested records.

OLR RESEARCH REPORT

November 6, 2012 2012-R-0482

AUTOMATIC LICENSE PLATE RECOGNITION SYSTEMS

By: Duke Chen, Legislative Analyst II

You asked for information on automatic license plate recognition (ALPR) systems, specifically if (1) Connecticut has had any proposals banning their use, (2) any states ban or limit them, and (3) any countries have banned them.

SUMMARY

Generally, ALPR systems automatically capture an image of a vehicle's license plate and compare the plate with one or more databases of vehicles ALPR systems can be deployed in police cars or mounted at an intersection and be used to find stolen or uninsured vehicles. But there are concerns about inaccurate data and privacy when it comes to ALPR use.

We were unable to find any proposed legislation in Connecticut that would ban ALPR systems, but there has been at least one proposal limiting the data retention period

At least two states, New Hampshire and Maine, have laws limiting ALPR technology. New Hampshire has, with certain exceptions, a general ban. Maine only allows certain public safety agencies to use the technology. These agencies can retain the information for up to 21 days In addition to these state laws, New Jersey, through an Attorney General Directive, provides a guideline for its law enforcement agencies, which includes limiting their data retention to five years.

We were unable to find any countries that completely ban ALPR systems.

ALPR

Law enforcement agencies throughout the nation are increasingly using ALPR technologies to enhance their enforcement and investigative capabilities. They use the technology to expand their collection of relevant data and expedite the time consuming process of license plate comparisons

The database expansion combined with the rapid results of the scans allows law enforcement to find uninsured or stolen cars more quickly and efficiently.

How ALPR Works

ALPR systems (1) automatically capture an image of a vehicle's license plate, (2) convert the image into alphanumeric characters, and (3) compare the number with the database of interest. All of this occurs in seconds, which allows law enforcement to quickly determine if the car is stolen, uninsured, or wanted for other law enforcement reasons.

Concerns About the Technology

There are concerns about inaccurate data and privacy with the use of ALPR technology If inaccurate data is added to the databases, there could be false hits due to the faulty data.

There are also privacy concerns about law enforcement agencies recording the location of a person's car. In addition to the privacy concerns arising from the scans themselves, there are concerns about how long the data is retained

CONNECTICUT

We were unable to find any proposed legislation that would have banned ALPR systems. But, there has been at least one proposal to limit the data retention of ALPR technology.

In 2012, the public safety committee held a public hearing on HB 5391 The bill would have required law enforcement agencies that use ALPR systems to expunge the data from the system within 14 days after collection, unless the data was relevant and material to an ongoing criminal investigation or prosecution.

After the public hearing, the Public Safety Committee referred the bill to the Insurance Committee. The Insurance Committee approved a substitute bill by a 15-4 vote and referred it to the House floor, where no further action was taken.

OTHER STATES

New Hampshire

New Hampshire generally bans surveillance on highways, including the use of ALPR systems (N.H. Rev. Stat. Ann. § 236:130). This prohibition includes the state as well as private citizens.

The New Hampshire law does allow for certain exceptions, including certain investigatory, traffic, and security purposes.

Any person violating these provisions is guilty of a violation, which is punishable by up to a $1,000 fine. Other entities violating these provisions are guilty of a misdemeanor, which is punishable by up to a $1,200 fine

Maine

Maine only allows its departments of Transportation and Public Safety and law enforcement agencies to use ALPR systems for certain public safety purposes (Me. Rev. Stat. Ann. 29-A, § 2117 A)

2398
The law provides that the data that is collected is confidential and can only to be used by law enforcement in carrying out its duties. Furthermore, the data collected or retained may not be stored for more than 21 days.

A violator is guilty of a class E crime, which is punishable by up to six months imprisonment and a $1,000 fine

New Jersey

Through a New Jersey Attorney General Directive, law enforcement in the state must adhere to certain guidelines (http://www.state.nj.us/oag/dcj/agguide/directives/Dir-2010-5-LicensePlateReadersl_120310_pdf)

These guidelines include limitations on when ALPR systems may be deployed, used, and who is qualified for such use. In addition, each department that uses an ALPR system must keep a record of when and where it was deployed, if it was mobile or fixed, and if any data was transferred or stored

The guidelines also require all records of ALPR activity to be maintained for five years and be readily accessible for audit. After the five years, the data must be purged from the system.

DC ro

Massachusetts Department of State Police
Automated License Plate Recognition (ALPR) System
Memorandum of Understanding and Agreement

THIS AGREEMENT, made and entered into this 30 day of MAY, 2023 by and between the Department of State Police, hereinafter referred to as "Department," and the Braintree Police Department, a public entity, hereinafter referred to as "Agency," collectively referred to as "Parties."

WHEREAS, the Department contracts the services of one or more vendors to host an Automated License Plate Recognition (ALPR) database to store ALPR data; and

WHEREAS, the Parties provide public safety services within their respective jurisdictions; and

WHEREAS, the Parties have found it to be of mutual benefit to provide for the most efficient utilization of their resources and services in the application to public safety efforts within their respective jurisdictions; and

WHEREAS, the Parties are committed to cooperation and coordination in providing the highest level of public safety services to the public, guided by the principle that performing cooperatively is in the best interest of the public; and

WHEREAS, the Agency desires to use the ALPR system contracted and managed by the Department to facilitate the storage of ALPR information generated by the Agency; and

WHEREAS, the Agency desires to share law enforcement information owned by the Agency under the conditions set forth in this Agreement.

NOW, THEREFORE, for and in consideration of the covenants contained herein, IT IS HEREBY AGREED, by and between the Parties as follows:

1. PURPOSE:

The purpose of this Agreement is to provide a standardized approach and method of storage, retention, sharing, and access of ALPR data between the Department and Public Safety Agencies hosting ALPR data on the Department's ALPR system.

2. COSTS:

The Department shall be responsible for the costs of purchasing and maintaining the ALPR system as long as such funding is available to the Department and authorized by the appropriate authorities of the Commonwealth. Participating agencies shall be responsible for the costs of purchasing, servicing, maintaining, repairing, and/or licensing the ALPR equipment used by their respective agency. The Department shall not be responsible for any costs incurred by the Agency for the purchasing, servicing, maintaining, repairing, and/or licensing of the ALPR equipment owned or used by the Agency. The Agency shall inspect the Agency's ALPR equipment on a regular basis and document each inspection. Any irregularities or malfunctions of any ALPR equipment owned by the Agency or of any ALPR information shall be reported to the Department immediately and shall be addressed and repaired by the Agency as soon as reasonably possible.

3. DATA ACCESS AND SECURITY REQUIREMENTS:

a. System Availability: The Department will work with the vendor(s) to keep the ALPR system software and servers online and available with downtime limited to necessary system maintenance activities or to any outages that are beyond the control of the Department.

b. Data Sharing: ALPR data contributed by the Agency will be accessible for official purposes to all Agencies that have entered into an ALPR Agreement with the Department. The Agency shall not otherwise share ALPR data with or provide ALPR data to any person, entity, or government agency, other than a law enforcement agency, unless such disclosure is authorized by policy or court order or unless such disclosure is required by the Massachusetts Rules of Criminal Procedure or Rules of Superior Court governing discovery in criminal matters.

c. Security Requirements: The Department and the Agency agree to enforce and maintain security requirements for the information stored in the ALPR system as specified in the Agreement. The Agency agrees that the information hosted in the ALPR system shall be used for law enforcement purposes only and that only law enforcement agency employees that have been subject to appropriate background screening shall be allowed access to the system.

   Background screenings must be fingerprint-based and include check of both the state and national criminal history repositories. If a felony conviction of any kind is found, access to ALPR system shall not be granted. The Agency agrees not to share

passwords, user logins, or allow the ALPR software to be otherwise used by Agencies who have not entered into an Agreement with the Department allowing such activity.

An employee of the Agency may operate an ALPR unit that is connected to the Department's ALPR system or access the Department's ALPR system software only if the person has been designated as an authorized user by the Chief of the Agency or designee, and has received training from the Agency or the Department on the proper use and operation of ALPRs and any policy or procedures governing the use of ALPRs and ALPR data issued or adopted by the Agency.

4. IMPLEMENTATION OF POLICY:

The Agency shall, within 30 days of execution of this Agreement, adopt the Department's General Order TRF-11 as the policy and procedure document that will govern the Agency's use of and interaction with the Department's ALPR system. The Agency agrees that it has been provided with physical or electronic copy of General Order TRF-11, has had sufficient time to read, review, and understand the document in its entirety, and agrees to be bound by the provisions contained therein. The Department agrees to inform the Agency of any updates or modifications to General Order TRF-11, and the Agency understands and agrees that any updates to General Order TRF-11 will be binding upon the Agency unless the Agency elects to terminate the Agreement and withdraw from participation in the Department's ALPR system.

5. BENEFITS TO AGENCY:

a. Data Links: The centralized storage of ALPR data will provide a solution to the problem of inaccessible or irretrievable information due to disconnected ALPR systems and the difficulty in sharing information across jurisdictional boundaries.

b. Reduction of Costs: The centralized storage of ALPR data will reduce the financial burden to the Agency that is associated with purchasing and maintaining ALPR software.

6. RECORDS AND REPORTS:

The Department protects all ALPR information as personally identifiable information (PII) because ALPR information may be combined with other information to specifically identify a unique individual. As such, all information retained in the Department's ALPR system is the sole property of the Department. The Agency agrees that information stored in the ALPR system for the Agency may be subject to disclosure under certain circumstances. The Agency will refer to the Department for review all information requests for Agency information, including, but not

limited to, public records requests, court orders, legal motions, subpoenas, and/or summonses. The Department's Legal Department shall determine the best manner of responding to all requests for Agency information.

7. RETENTION

All ALPR information obtained by the Agency from the Department's ALPR system shall be retained pursuant to the Department's General Order TRF-11.

8. AMENDMENTS:

Any changes and additions to this Agreement shall be made by written amendments to this Agreement and shall not be effective until approved in writing by the Parties. A joint review of this Agreement may be requested at any time by either of the Parties to identify needed changes, which may be amended by written mutual agreement of the Parties.

9. DURABILITY:

This Agreement shall become operational and effective upon execution by the Parties. Parties may terminate the Agreement at any time by giving written notice to the other Parties at least thirty (30) days prior to the effective date of termination. The Agreement may also be terminated by the Department without prior notice to the Agency in the event of executive, legislative, or judicial mandate which requires the unanticipated discontinuation or modification of the ALPR program. In the event of such termination, the Department will notify the Agency as soon as practicable.

10. BENEFITS:

The Parties shall agree that the provisions of this Agreement are not intended to directly benefit and shall not be enforceable by any person or entity not a party to this Agreement. This Agreement is not intended to confer any legal rights or benefits on any person or entity other than the Parties of this Agreement.

11. INDEMNIFICATIONS:

Parties shall defend, indemnify, and hold harmless every other party and its officers, agents, employees, and representatives from any and all losses, liability, damages, claims, suits, actions and administrative proceedings, and demands and all expenditures and cost relating to acts or omissions of the indemnitor, its officers, agents, or employees arising out of or incidental to the

performance of any of the provisions of this Agreement. Parties do not assume liability for the acts or omissions of persons other than their respective officers, its employees, agents, and MOU officers.

The Agency releases the Department from any liability relating to the loss or destruction of data contributed by the Agency. The Agency further releases the Department from any liability relating to the loss of the Agency's access to the ALPR system due to system outage, commercial vendor failure or malfeasance, or executive, legislative, or judicial mandate which requires the unanticipated discontinuation or modification of the ALPR program. The Agency further releases the Department from any liability relating to the release of data or information contributed by the Agency pursuant to a lawful procedure or order.

12. ASSIGNMENT PROHIBITED:

Parties to this Agreement may not assign any right or obligation pursuant to this Agreement. Any attempted or purported assignment of any right or obligation pursuant to this Agreement shall be void and of no effect.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement on the date as written below.

Chorus Intelligence Suite

Discover • Link • Solve

Chorus

Discover • Link • Solve

One intelligence platform to empower your entire organization to tackle the biggest crime types, including:

- Gang and organized crime
- Violent crime
- Mass gatherings/civil unrest
- School safety issues
- Gun crime
- Human trafficking
- Narcotics

The current state of Policing

What we know

- Crime detection rates are low and have deteriorated.
- Online crime is now by far the most prevalent crime type.
- There are increased demands to tackle organized crime via collaboration and data sharing.
- Law enforcement is faced with resourcing issues and cannot meet demand.
- Funding issues now require law enforcement to do more with less.

What we're doing about it

We have developed the Chorus Intelligence Suite (CIS) to support analysts, investigators and front-line officers in conducting end-to-end digital investigations via **one platform, one dashboard and one login**. Intuitive tools can be used by all to combine analytical data with OSINT and internal data, to easily identify patterns, spot connections and open further lines of inquiry.

Increase detection rates

Combine analytical data with OSINT and internal data to never miss a connection

Empower multiple roles

Enable investigators and front-line officers to easily get answers from data

Save money

Connect disparate systems into one platform to find the data that you need

Collaborate & share

Collaborate and share cases with colleagues, partners and external organizations

Optimize efficiency

Store, index, search, analyze and report on ALL data in one place

Safe and secure

A Software as a Service (SaaS), platform, which protects anonymity

The Chorus Intelligence Suite

Be empowered at every stage of a digital investigation to realize the full potential of your data.

Case management & sharing — Page 5

Store and share all your investigative data in a central and fully secure digital hub.

Federated search & enrichment — Page 6-7

Query any entity and search across your internal files, consented data and over 200+ social media platforms to fast track the attribution process.

Secure open-source capture — Page 8

Capture any webpage, image or video in a single click from a secure and anonymous environment.

Internal data integration — Page 9

Securely upload any internal or unstructured, disparate legacy files into the CIS to centralize your investigative data.

Data cleansing & analysis — Page 10-11

Drag and drop any digital data into the CIS to be automatically cleansed and formatted, saving 97% of your time.

Evidential reporting — Page 12

Overlay internal, external and consented data to interrogate in multiple ways and generate courtroom-ready reports.

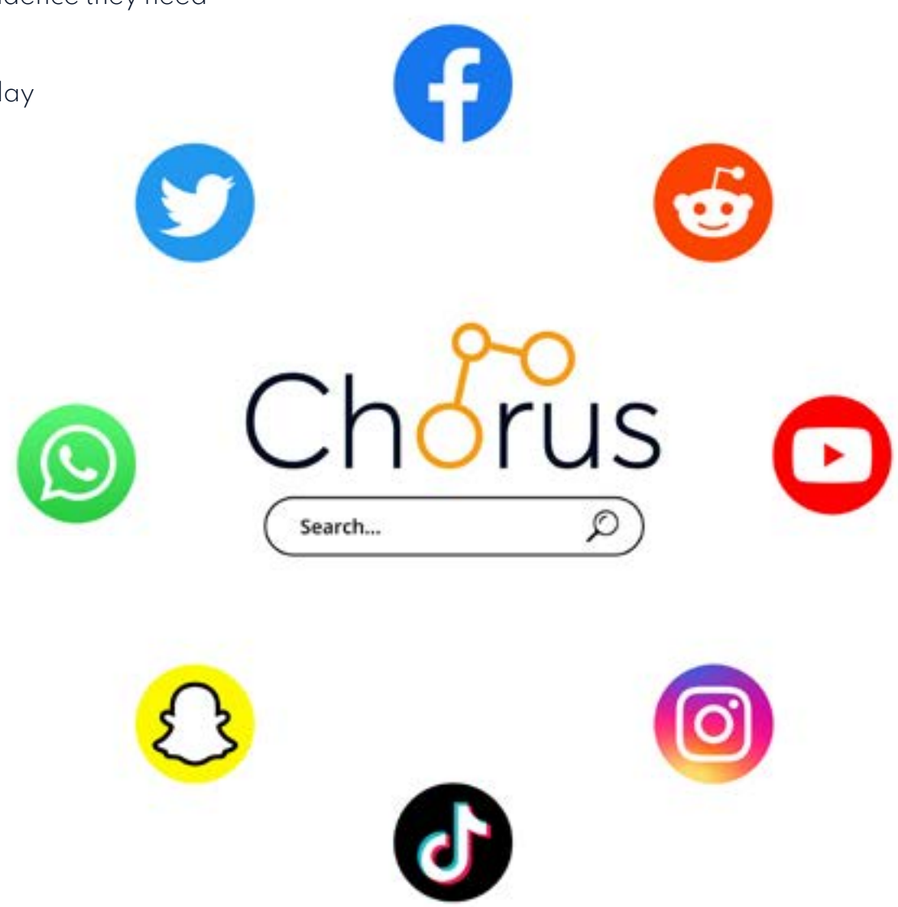
Case Management & Sharing

Search an entity from an internal file against your operational and historical files to see if it has previously appeared.

Key capabilities include:

- **Create and collaborate** - Securely access the CIS from any browser to quickly and easily create, view and collaborate on cases. Any data that is uploaded or captured within the CIS can be indexed and searched.
- **Bulk search data for cross-case analysis** - Search across your operational and historical files.
- **Apply audit and access controls -** Choose who can view and edit cases, depending on their security level. Maintain audit logs to document when any searches, web captures and activities are performed, by whom and when.
- **Redact and report** - The CIS recognizes keywords, phone numbers or names from captured digital evidence, which can be automatically or manually redacted before generating a report.

CJIS Compliant



Federated Search & Enrichment

Bulk search across internal files, consented data and 200+ social media networks

The CIS features a leading entity enrichment tool. Query any entity, such as a name, phone number, email address and/or alias and search across all of your data sources to fast track the attribution process.

Federated and bulk searches can be performed across a number of data connectors, providing analysts, investigators and front line officers with the evidence they need to progress lines of inquiry.

Expand upon open-source intelligence in multiple ways and overlay with other forms of digital data in one interactive dashboard, to spot immediate connections.

"Evidence has now gone digital. We must get a grip on the vast tide of criminal data and find a way to use it to our advantage. Having one tool that helps us analyze this digital evidence and find answers makes a huge difference.

- Major Crime Investigator

OSINT Powered by

SHADOWDRAGON

Key features include:

- **Bulk search across internal files, consented data and 200+ social media networks –** Including Facebook, Instagram, Twitter, LinkedIn, Snapchat, TikTok, Telegram, eBay, Cash App, YouTube, WhatsApp, TruthSocial and many more.
- **Search hashtags –** For people, places, upcoming events, mass gatherings, etc. to monitor emerging threats, optimize public safety and manage resourcing.
- **Go anonymous –** Leverage your covert social media accounts in an anonymous and secure environment.
- **Auto-matching –** Identify data in one case that has been previously captured in another.

Key benefits include:

- **Never miss a connection -** Customize your connectors relevant to your search query to perform bulk searches and reveal instant unknown intelligence.
- **Enrich your investigations -** Expand on data sets of relevance and perform advanced searches to interrogate further.
- **Get the full picture -** Overlay and visualize all of your digital data in multiple ways and in one dashboard, to spot connections.
- **Stay ahead of the game –** Ensure that key new information is captured immediately via watchlist alerts.

Entity enrichment and attribution tool

Secure Open-Source Capture

Capture internet intelligence instantly

The CIS features an advanced browser extension capable of capturing web pages, social media accounts, images and videos, in just one click.

Key evidence can then be stored as searchable files within your case in the CIS. Key capabilities include:

- **Go anonymous -** Log in to your covert accounts within the CIS and ensure your online footprint is hidden via a fully IP-obfuscated environment.
- **One-click capture -** Capture any digital intelligence, such as a webpage, social media account, image or video, in just one click. Choose to capture the whole page or just what is visible on the screen.
- **Redact, store and report -** Captures are stored as a searchable PDF or file within your case. Automatically redact names, numbers or any keyword from your captured evidence and add to a report.

One-click Capture

Internal Data Integration

Uncover hidden intelligence across your internal data

Securely upload any internal or unstructured, disparate legacy files into the CIS to centralize your investigative data.

Internal data integration will always ensure that your historic intelligence is always utilized. Key capabilities include:

- **Make your legacy data searchable** - Upload disparate data files via a secure upload portal. The CIS supports a range of file types including image-based PDFs that are fully searchable via OCR. All uploaded data will be indexed and made searchable.
- **Discover unknown connections** - Perform a cross-case analysis to determine if an entity, such as a name, phone number and/or address appears in any of your operational or closed cases.
- **Custom integrations supported** - Chorus can tailor specific integrations where the requirement exists. For example, a Record Management System (RMS) or any other line of business systems can be integrated and made searchable in the CIS.

Centralize internal and unstructured data

2409

Data Cleansing & Analysis

The most advanced data cleansing & analysis engine in the world

The CIS features an intuitive, self-serve, analytical dashboard to empower multiple roles, such as analysts, investigators and front-line officers, to get answers from their data, instantly.

Drag and drop any digital data files to be automatically cleansed and formatted.

Visualize, enrich and report on your data in multiple ways to spot connections and follow lines of inquiry.

Visualize, enrich and expand

Bring the data of your investigation to life through advanced visualization.

Overlay all relevant data for your case in one interactive dashboard to easily identify patterns around the time of an offense (e.g., plot phone and vehicle activity) on a map and overla with RF surveys and CCTV footage to understand the bigger picture.

Ingest and cleanse

Drag and drop any digital data into the CIS, to be automatically cleansed and formatted, saving 97% of your time.

Data types include: CDR's, ALPR, Handset Downloads, RF Surveys, Chat, Instant Messaging and more.

97%
time saved

Intelligent reporting

Choose from over 45 reports to query the most frequently asked investigative questions.

Produce maps, timelines, event schedules and charts to visualize the results in multiple ways (e.g., report on a suspects top 10 interactions or identify potential meetings between entities).

Evidential reporting

Overlay internal, external and consented data to interrogate and report in multiple ways

Generate courtroom ready reports

Present your digital evidence in a plethora of different formats and generate pre-populated or custom reports to courtroom ready standards.

- **Visualize, enrich and expand** - Generate interactive timelines, maps, pivot tables, heat charts and matrices to interpret your data in a multitude of ways to spot connections.

- **Intelligent Interrogation** - Choose from over 45 pre-populated reports to query the most frequently asked investigative questions, or set parameters and filters to answer your own custom query (e.g., Report on an individual's top 10 interactions or identify potential meetings between entities).

- **Customized reporting** - Easily combine your evidential data in a pre-configured or customized report. All evidential reports can be consolidated with individual disclosure reports; detailing a full audit log of how you collected, stored and captured data.

> "Chorus proved to be a valuable tool during the investigation and preparation for court."

Demo and free trial

Help us, help you. Trial the Chorus Intelligence Suite

Our promise

To assess and realize the maximum benefits of the Chorus Intelligence Suite, we offer free trials for all our products, to be used on your own live cases. All we ask is that you provide feedback on your experiences, so we can inform our development roadmap.

Our entire organization is geared towards fully supporting you.

You will be assigned a Business Development Manager to scope your trial and to ensure your objectives are captured.

You will benefit from a dedicated Customer Success Manager to help you get the best out of the software. They will work with you to capture feedback, give you hints and tips, organize your implementation and schedule your training.

Our helpdesk will also be on hand to help you with any technical support.

Trial the CIS

A dedicated Customer Success Manager to support you every step of the way

Why Chorus?

About us

Chorus Intelligence is a trusted supplier of data cleansing, analysis, search and entity enrichment software for law enforcement, government agencies, financial and corporate institutions across the globe.

Made up of one platform and a single user interface, the Chorus Intelligence Suite (CIS) can be used by all, no matter your role, to get answers from your data.

Founded in 2011, Chorus is used by 80% of UK police forces, all counter-terrorism units and many government agencies.

Tailored training

Chorus provides accredited training courses to help our customers get maximum value out of the CIS. The courses have been designed and written by experienced intelligence analysts who are experts in the Chorus Intelligence Suite.

Our experts

We combine former law enforcement analysts, investigators and open source experts with software developers that specialize in police and financial data.

Easy deployment

Chorus offers simple and secure cloud deployment to meet your custom requirements.

We partner with Amazon Web Services (AWS) Gov to offer a web-based, public cloud. We recommend AWS for organizations looking for a quick and easy set up.

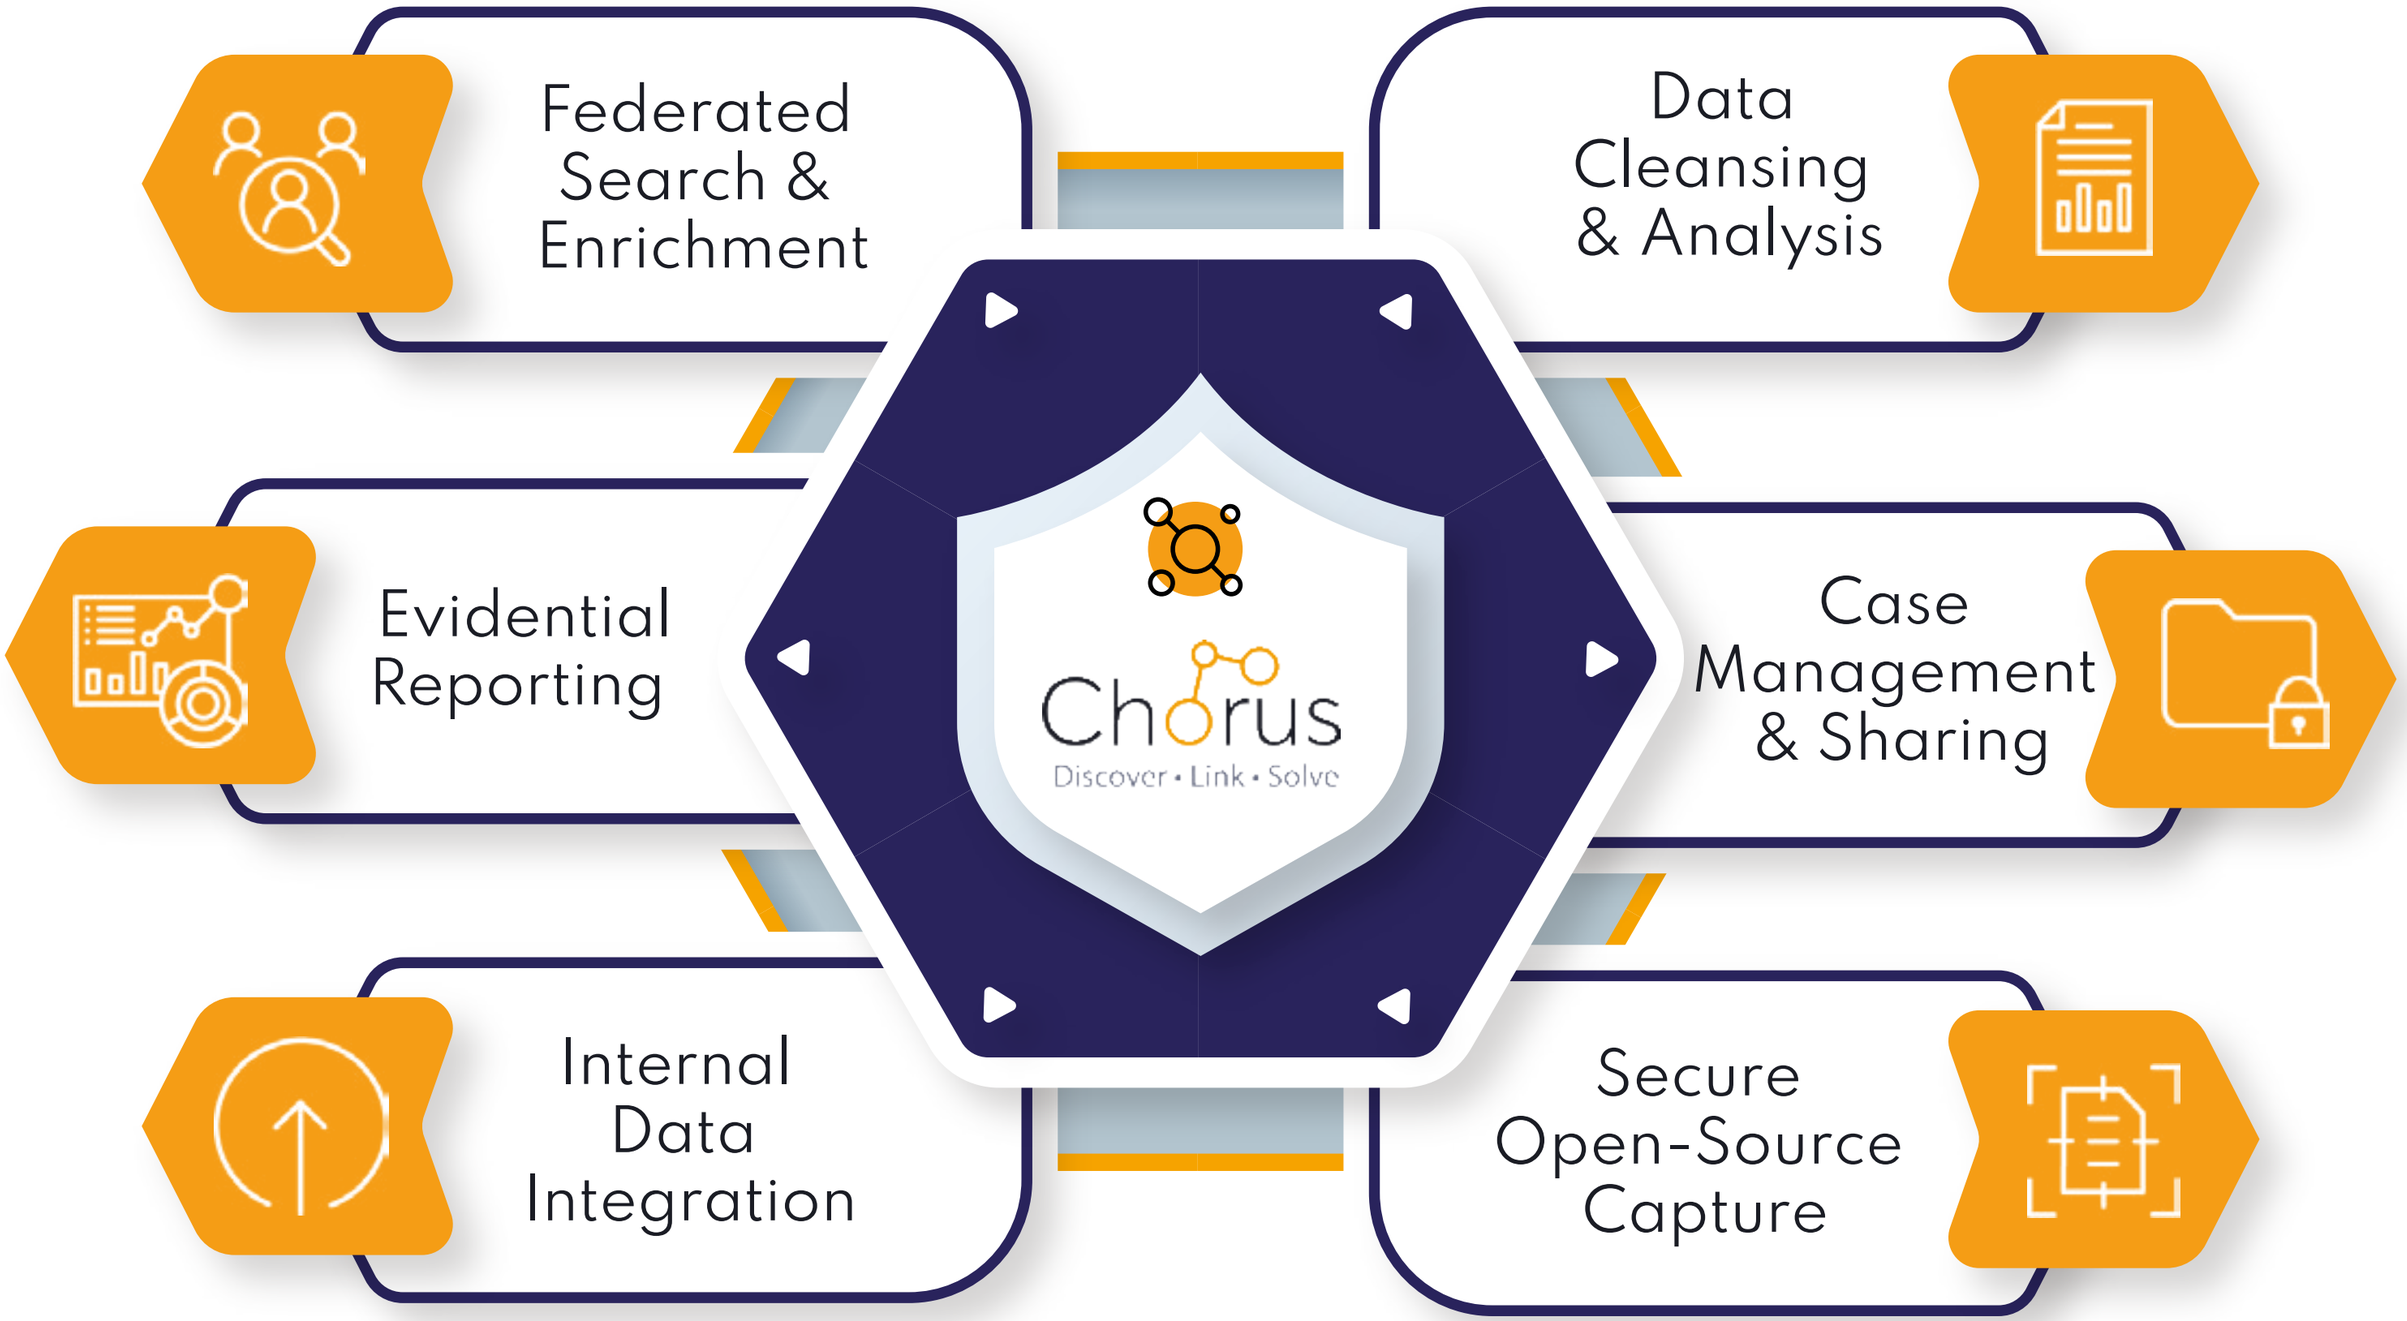
What our customers say

Trusted by North American law enforcement, over 80% of UK police forces and government agencies.

"We set out to re-engineer our analytical capabilities and sought a solution that would support us in maximizing our operational effectiveness and time efficiency, while providing the best possible return on investment. The CIS will enable us to achieve this and set a precedent for intelligence-led, data-driven policing going forward."

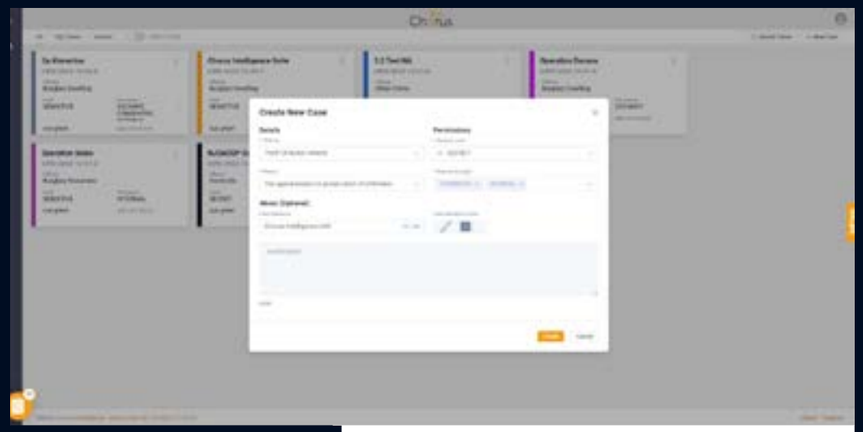
- Chief Paul Neudigate, Virginia Beach Police Department

"The time spent analyzing data has been cut to a fraction of that used prior to having Chorus available."



- Investigator

"Without Chorus, the work I undertook would have been much more difficult and protracted, adding considerable time delays to the investigation and stress to the victims."



- Lead Analyst

"Chorus is by far the most significant aid to intelligence technology this century."

- Investigator

Citigraf overview

Genetec Citigraf™

Citigraf Real-Time Crime Center provides situational intelligence to improve public safety. An effective public safety strategy involves proactively dealing with crime. Disorganized and siloed data inhibits collaboration across teams and slows down incident response times. Therefore organized, and consolidated data is crucial for a proactive approach to policing. Genetec Citigraf™ is a real-time situational awareness support system that unifies data streams and operations across city departments. Citigraf disseminates timely information and provides greater situational awareness to law enforcement agencies.

The open nature of our platform will enable the RTCC to consolidate policing data across department and regardless of the subsystems or sensors used. The end goal is for your staff to have access to the data they need, wherever they need, from one simple and intuitive platform. Additionally, our auditing and cybersecurity tools ensure the system is only used for its intended purpose and that all data collected and shared remains secure.

Our feature set, partnerships, and existing integrations give you a flexible toolbox that you can scale to your needs and a platform on which you can build future operational improvements.

Advanced GIS & ESRI mapping

Citigraf supports vector-based maps (ESRI/ArcGIS, Google, Bing, PDF), PTZ control and field of view, and customizable entity states.

Real-time situational awareness & investigations

Gather context for first responders by correlating data from sensors, cameras, and other systems in one simple map-driven user interface.

Post-incident investigations

Use video playback in correlation with ALPR, video analytics, and other sensor data to quickly gather insights about past incidents.

Video analytics

Ingest video analytics from cameras, including forensic search. Run server-based video analytics with direction control, object detection, stopped vehicle detection, camera integrity, people counting, and privacy protection. Integrate with third-party video analytics, such as Briefcam.

Video management

Supported by our globally top-ranked video management system. Benefit from possible integration to thousands of camera models for video streaming and control, edge video analytics, and varied functionalities for both streaming and playback.

License plate recognition

Leverage rich data from your Genetec Sharp and third-party ALPR cameras to provide additional situational awareness.

System federation

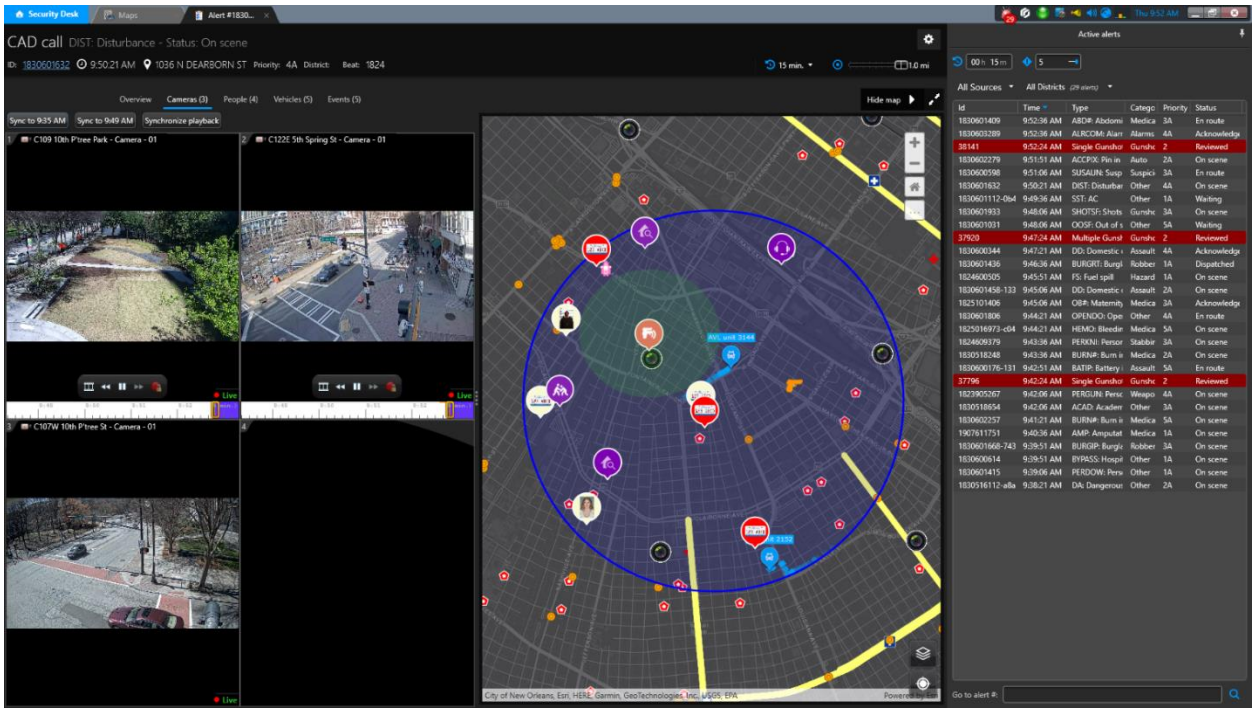
Connect multiple Genetec systems on a single front-end and federate other ALPR systems for greater investigation capabilities.

Interfaces for all user types

Unlimited users can access Citigraf on desktop, mobile, and/or web client.

Active directory (ADFS)

Allow single sign-on for user accounts across all Genetec platforms.



Community Connect integration

Integrate your Community Connect program by displaying the location of privately-owned cameras on your mapped interface, and the video streams of the cameras connected to your systems for both streaming and playback.

Citigraf™ Overview

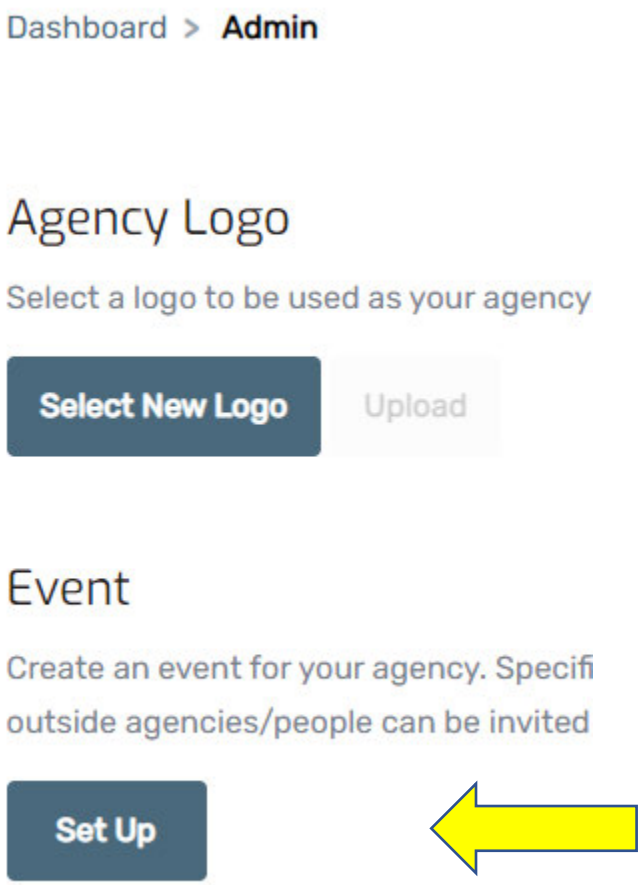
CNC LIVE How to Create an Event



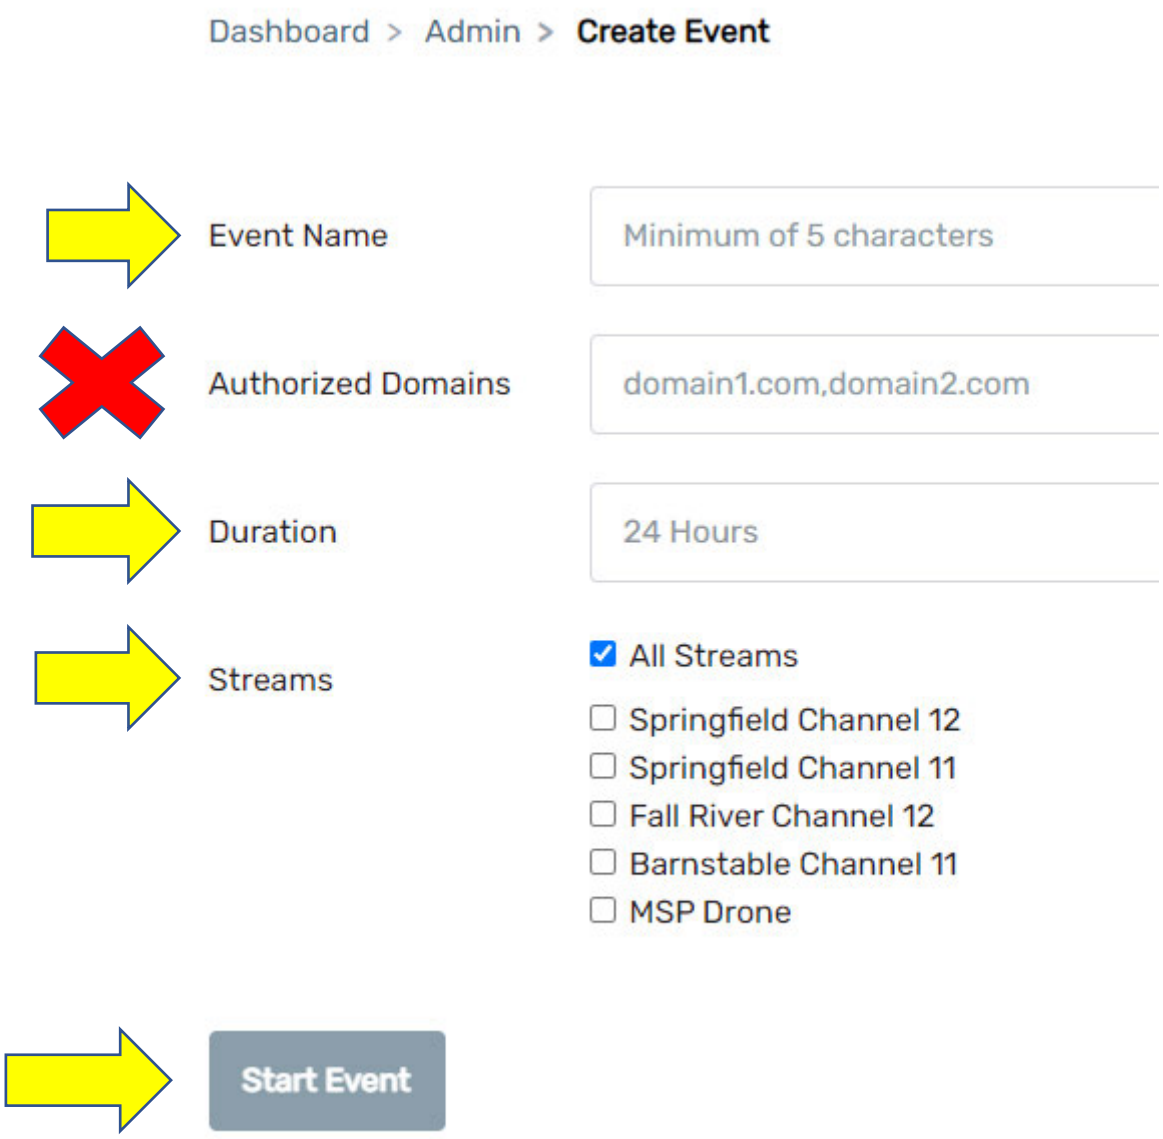
Through CNC Live MSP Air Wing personnel have the ability to grant temporary access to a user (Duty Officer, Patrol Supervisor or Local Officer) to view the Air Wing video feed. The Lieutenants in the Watch have the ability to serve as a backup in this function or primary if the Air Wing needs assistance.

Prior to "creating an event," Watch Lieutenants should check with the Air Wing and see if they have already created an event. Anytime the Air Wing is flying they will have someone on the ground monitoring, so that trooper is the primary for creating an event. The Air Wing feed is in real time. All Lieutenants in the Watch have Admin rights, so they have the ability to create temporary access to the video feed for a finite period.

First - Log into CNC live, once on the "Home Screen," **click on your name in the upper righthand corner of the screen**, that will open up a "sidebar." **Click on "Admin" <u>below your name in the sidebar</u>**, that will open up a new screen. (See below)

You are now on the Dashboard – Admin page. On the left-hand side of the screen you will see "Event" and under that is "Set up" in bold. **Click on the "Set Up" box**. (See below)

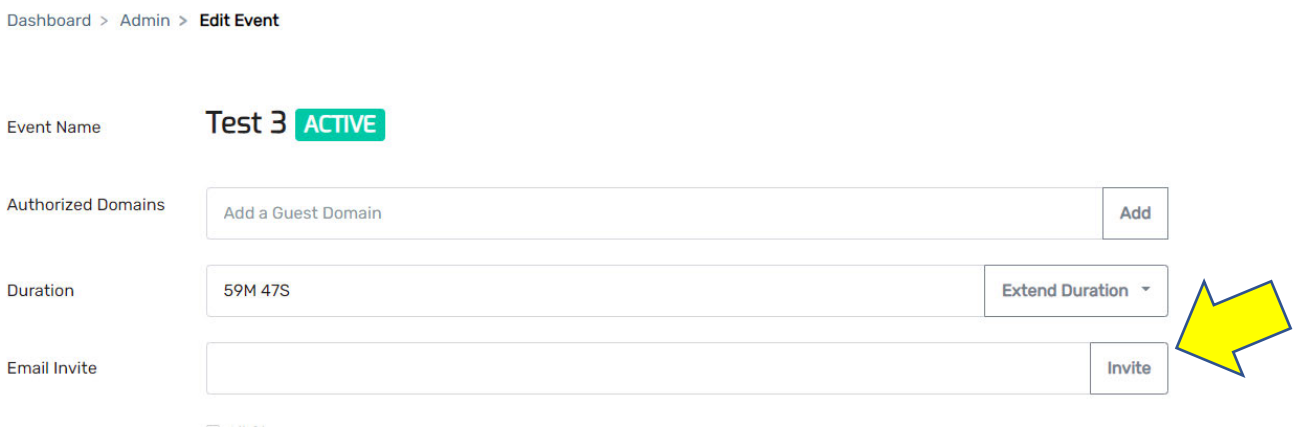
This will take you to a new page, Dashboard – Admin – Create Event, where you can "edit / update / or create a new event."



Next to "Event Name," **create an event name** (must be more than 5 characters)

Leave the "Authorized Domains" box alone. Don't enter anything here!

Next to "Duration," a dropdown will appear and **select the duration**



Next to "Stream," **check the Streams or channels you anticipate using**

Click the "Start Event" box at the bottom of the screen. (See below)

This will create a pop-up window asking if you want to start your event, **click the "Confirm" box**.

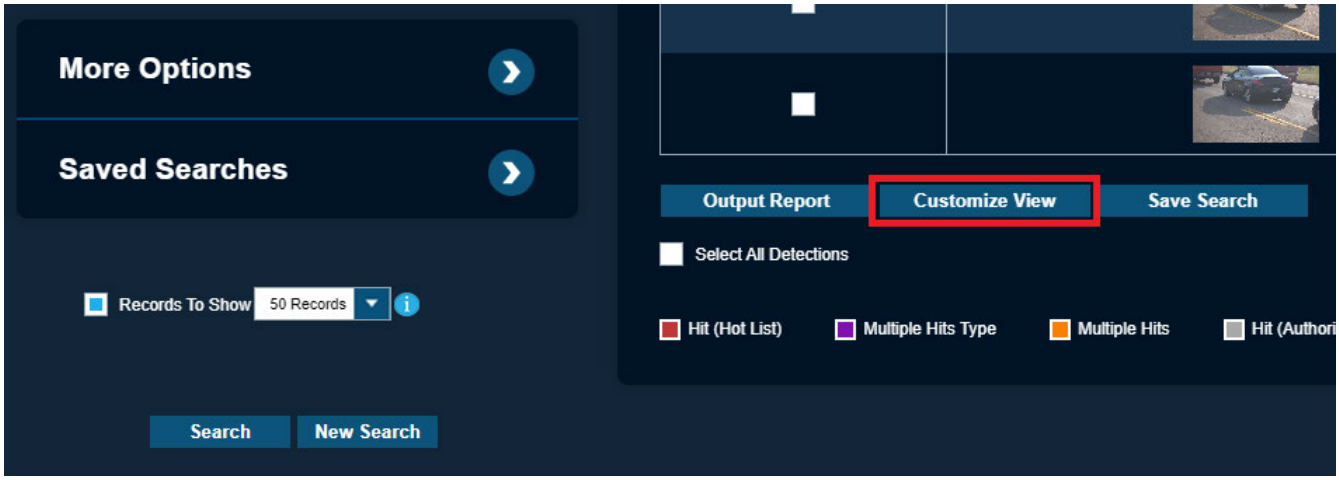
This will open a new page, Dashboard – Admin – Edit Event, the third box down says, "Email Invite." Next to the "Email Invite" box, **type in the user's email** and **click "Invite"** at the end of the box.

The user will then get an email and all they need to do is click the box that says, "View Event." Once they click the view event button, a CNC Live webpage will open containing the user's email in the "Email box" and a code in the "Key" box.

The user will **click the "Log In" box**. The user will then see the Streams or Receivers you previously selected.

You can send additional invitations by adding emails to the "Email Invite" box on the Dashboard – Admin – Edit Event page and clicking "Invite."

VIGILANT VEHICLEMANAGER QUICK GUIDES

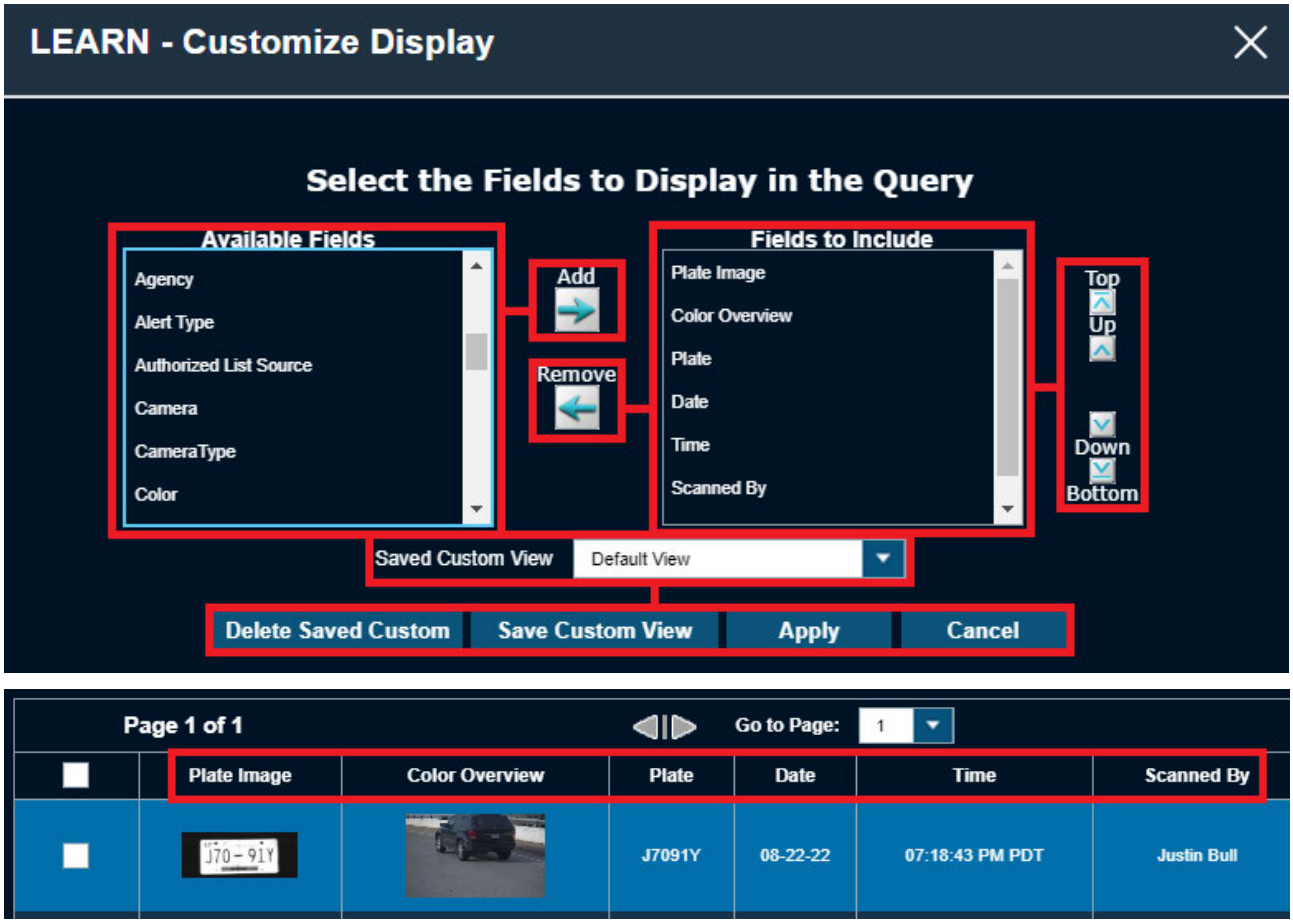


CUSTOMIZING QUICKSEARCH VIEW

This guide describes how Users can use the **Customize View** feature of QuickSearch to add or remove types of information from the QuickSearch results to make the presented information more useful at a glance.

- **Customize View** is a feature of VehicleManager that can be used to change the types of information presented on most pages that have search results.
- **QuickSearch** is the main search utility for LPR records in VehicleManager.

Custom views can be saved and selected later to create presets for different purposes.

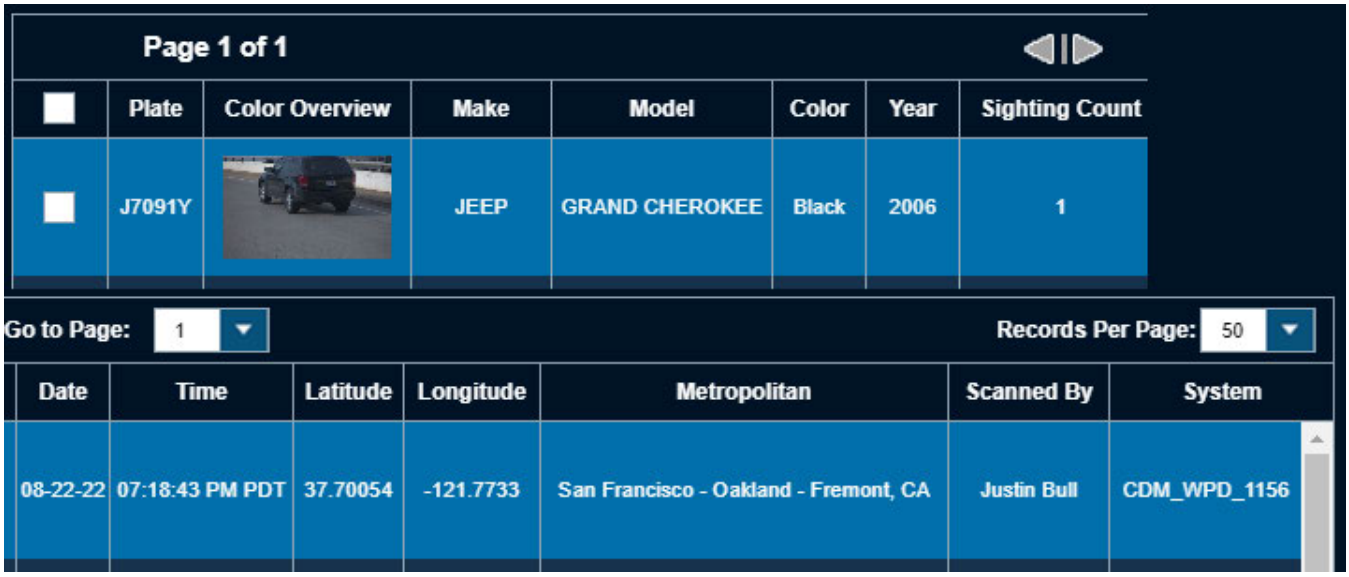


LOCATING CUSTOMIZE VIEW IN QUICKSEARCH

1. Login to Vigilant VehicleManager and navigate to **License plate query** → **Quick search**.
2. Click **Search**. Click on **Customize View**.

© 2023, Motorola Solutions. All rights reserved. MOTOROLA, MOTO, MOTOROLA SOLUTIONS, and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of their respective owners.

USING CUSTOMIZE VIEW WITH QUICKSEARCH



1. Under **Available Fields**, click on the information type to add to the QuickSearch results. Click **Add** to move it to the **Fields to Include** list.
2. Under **Fields to Include**, click on the information type to remove from the QuickSearch results. Click **Remove** to move it to the **Available Fields** list.
3. Use the **Up** and **Down** arrows to change the order of the selected information type in the **Fields to Include** list. Use the **Top** and **Bottom** arrows to move it to the top or the bottom of the list.

   NOTE: The information types displayed in the QuickSearch results will follow the order of the list, arranged from left to right.
4. Click **Save Custom View** to save the current configuration to the **Saved Custom View** drop down list.
5. If desired, select a Custom View from the **Saved Custom View** drop down list and click on **Delete Saved Custom** to remove it.
6. Click **Apply** to display the selected information types from the **Fields to Include** list in the QuickSearch results.

© 2023, Motorola Solutions. All rights reserved. MOTOROLA, MOTO, MOTOROLA SOLUTIONS, and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of their respective owners.

USEFUL INFORMATION TYPES

Some useful Custom View information types to use in QuickSearch results are:

DEFAULT:

- **Color Overview**: A wide view image of the entire vehicle.
- **Plate Image**: A tight image of just the vehicle's license plate.
- **Plate**: The plate number as read by the camera.
- **Date**: The date the detection was made.
- **Time**: The time of day that the detection was made.
- **Scanned By**: The user logged in to the system that made the detection.
- **System**: The name of the system that made the detection.

LAW ENFORCEMENT (ADDITIONS):

- **Make**, **Model**, **Color**, **Year, Reg. State**: Vehicle type information.
- **Latitude**, **Longitude**, **Metropolitan Area**, **Detection State**: Location of the detection.
- **Sighting Count**: The number of times the vehicle has been detected.

PARKING (ADDITIONS):

- **Sighting Count**: The number of times the vehicle has been detected.
- **Agency**: The agency that owns the systems that made the detections.
- **Alert Type**: The alert type assigned to the vehicle if it is on a Hot List.
- **Authorized List Source**: The name of the Authorized List source that this vehicle is on.
- **Time Exceeded**: This vehicle has an expired permit.
- **Validated**: This vehicle's permit has been marked as valid.

© 2023, Motorola Solutions. All rights reserved. MOTOROLA, MOTO, MOTOROLA SOLUTIONS, and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of their respective owners.

Department of State Police
DIVISION COMMANDER'S ORDER

Issue Date	**Number**
September 13, 2023	**2023-DHS-013**
Subject: **ALPR Data Retention & Access**	

The Division of Homeland Security and Preparedness is responsible for the administration of the Department's Automatic License Plate Recognition (ALPR) system. The availability and use of ALPR technology significantly enhances public safety by augmenting the operational and investigative effectiveness of law enforcement agencies.

The use of ALPR technology is governed by General Order TRF-11 "Automatic License Plate Recognition". In addition, the use of ALPR systems shall be subject to the guidelines set forth in this Order unless superseded by General Order TRF-11.

Pursuant to General Order TRF-11, the retention of ALPR data collected by the Department shall be determined by the Department of Criminal Justice Information Services (DCJIS) policy. Furthermore, ALPR systems operated by the Department shall be configured to restrict data visibility for a maximum duration of sixty (60) days from the date of the initial request.

Users requesting to access records beyond sixty (60) days, shall contact the Commonwealth Watch Center, the ALPR Administrator, or other administrator authorized by the Division Commander of Homeland Security and Preparedness. The request will be reviewed on a case-by-case basis. In the absence of exigent circumstances, the user may be required to revise their request, consult with a District Attorney's Office of jurisdiction, or to submit legal process to obtain the requested records.

Streamvault SV-300E

All-in-one security appliance

The Streamvault™ SV-300E all-in-one security appliance helps you move to a unified system combining video surveillance, access control, intrusion, and communications more efficiently. It combines all the capabilities you need to secure a small site in a single device, simplifying both installation and maintenance.

Guaranteed performance

- up to **32** cameras
- up to **100** readers
- up to **32** ALPR cameras
- up to **60TB** storage

Key features

- Turnkey appliance with Genetec™ Security Center pre-installed
- Local recording and monitoring of video, access control, and other security events
- Machine learning endpoint protection
- 3-year hardware warranty with 1-year advance replacement

Benefits

Speed up your deployment – Get your security system up and running quickly and efficiently with Security Center pre-installed and built-in wizard-based tools to configure your system.

Protect your security system – Streamvault appliances help you build a resilient security system that protects your data and operations. Our cyber security experts stay vigilant on evolving threats and help identify and address new vulnerabilities promptly.

Reduce your system's footprint – With Security Center and the SV-300E, you can consolidate video, access control, intrusion detection, and other security systems on a single device.

Applications

Retail

Standardize your processes across your entire chain. The Streamvault SV-300E appliance lets you record and monitor video locally, and makes it easy to connect remote sites with a centralized location.

Education

The Streamvault SV-300E series lets you monitor entries and exists with unified video and access control, so you can keep staff and students safe across your school.

Banking

Combine video, access control, and intrusion systems in a single platform and enhance security across your installations.

Genetec Citigraf™

Comprehensive response coordination

Genetec™

See your city through a shared lens

Every day, law enforcement officers and emergency responders are working together to keep our cities and communities safe. But the realities of public safety are rapidly evolving, and the risks to cities are multiplying.

The task is made increasingly difficult by a growing array of sensors and solutions capturing data that can't be meaningfully integrated into everyday city operations. Often, responders lack a clear perspective on incidents, making coordination and collaboration difficult when shared information could improve effectiveness.

Genetec Citigraf is a decision support system that empowers public safety departments to build a deeper, data-driven understanding of what's happening in their city. Whether it's receiving an emergency call, responding to incidents, or ensuring public safety at an event, Citigraf provides a common operating picture so your personnel can make better decisions based on timely information.

Citigraf correlates and displays incoming data through dynamic maps, supporting operation centers and frontline personnel with deeper situational awareness as events unfold. They can act based on insights, share relevant information, and coordinate efforts more easily.

Following an event, managers can review responses, train staff, and improve planning and resource management. With Citigraf, they can manage every type of situation – from the unexpected to the everyday.

2433

Gather data from different sources

To this day, operators struggle to make sense of an array of incoming data. Coordinating a response is often a disjointed and time-consuming process that makes it difficult to provide valuable situational awareness to other agencies and first responders.

Citigraf changes all that. It allows you to collect and quickly analyze data from multiple sensors and systems, and use it to build a better understanding and coordinate operations.

Rely on a shared view of the city

Citigraf gives multiple agencies the ability to access, visualize, and direct assets and resources using a common operating picture. They tap into the same, relevant data sources, which allows them to gain a better view of events so they quickly respond to – and gain control of – situations.

Citigraf breaks down silos by displaying relevant and useful information to help multiple agencies act together rather than as individual entities. Through its intuitive interface based on dynamic city maps, command center staff get a complete overview of real-time and historical data. It provides better situational awareness, and empowers operators to make better, faster, more informed decisions.

Derive data-driven intelligence

Once data has been gathered, knowing how to make sense of it is essential. Citigraf continually analyzes information from thousands of sensors and data points, assisting frontline public safety teams by bringing to light relevant events and information.

The Citigraf correlation engine assesses both temporal and geospatial data to prepare responders for what they can expect before arriving onsite. It allows individuals and agencies to see the full landscape of what's happening across the city.

Learn through deeper understanding

After an event, use the knowledge acquired to refine prevention plans, response strategies, and resource management. Gauge the effectiveness of initiatives, and better train and teach your team to prepare for future situations.

For instance, based on historical data, you might recognize that car theft increases in the area where city visitors are staying in the days leading up to an annual public event. Equipped with that insight, police officers can be dispatched in that area to decrease that threat at future events.

An investment in public safety

Those in charge of protecting the public must deal with the dual challenge of managing both large-scale public events and unexpected situations. Let's look at two examples of how Citigraf can help decision makers safely manage and coordinate events – an annual parade, and a city flood.

The city's annual parade

Summer is a busy time for the city. The parade is one of the biggest events in the calendar, as the police, fire, and emergency operations prepare for an influx of visitors to add to the many thousands who already call the city home.

The heart of operations is the command center. The Citigraf application is used to manage the event and coordinate on-site personnel such as public workers, emergency operations staff, police officers and firefighters.

During the event planning phase, data relevant to the event is used to identify trends, and it is subsequently used to identify opportunities for future improvement.

As the event begins, all agencies coordinate with the command center for live operations. Information comes into Citigraf from event staff, patrol cars, officers on the street, automatic license plate

recognition (ALPR) systems, and cameras around the parade route. Video, event data, CAD, and emergency calls are all instantly available, analyzed, and correlated by Citigraf to optimize operations, response times, and mitigation of incidents. Critical situations around the event – from crimes to medical emergencies – are managed more efficiently.

22%

The decrease in shootings seen in one year in Chicago districts that have deployed Citigraf in their decision support centers.

The cross-departmental team can see a comprehensive map of the city delivered by Citigraf. They share the same view with the Chief of Police and the different agencies, and they have access to all cameras around the parade route, so they know exactly what's going on. Every point of data is geo-localized, so they know where everything is happening. They can see real-time information that previously wouldn't have made it into the command center until after the event. So, when an incident happens, they can quickly coordinate resources before, during, and after – and effectively respond.

After the event, decision makers can see what has transpired to help them plan for a safer, smoother event next year.

The threat of flooding

Floods can happen fast and they can be devastating. It's essential to be prepared for every eventuality and to have the capacity to act quickly.

A flood alert has been released by the weather service. The Chief of Police remembers the last time there was a flood in the city. A tropical storm had swept through and flooded the northern suburbs of the town. Back then, they recorded everything by writing things down. They didn't have the necessary data to analyze their response so they could improve operations in the future. This time, they are better prepared.

2440

39%

The reduction of on-scene arrival times in one of the most at-risk Chicago districts since Citigraf has been rolled out.

Using Citigraf, operators are notified about the developing situation, while the command center can view weather data on the map of the city, helping them easily identify the areas most at risk.

As the flood approaches, a clear picture of the situation begins to emerge in Citigraf. The team keeps a close eye on the weather and hydrology forecasts while monitoring the water level of every connected river, stream, and tributary. They can see how the tracks are forming, and which roads might need to be closed.

> ‘Through Citigraf, information can be dispatched quickly and efficiently to first responders attending to the people and areas in need.’

Through unified access to surveillance cameras and social media, the level of risk can be confirmed. Rich, visual layers of data on the map show major buildings or public areas that are without power or in need of evacuation. This essential information provides emergency responders with insights about the citizens who are most at risk. Through Citigraf, information can be dispatched quickly and efficiently to first responders attending to the people and areas in need. Emergency vehicles can see which roads to take, and which roads have been closed.

Once the water has subsided and the clean-up operation is underway, the incident managers can begin looking at how things unfolded to learn from the experience. They can train their teams, and share invaluable information that will help save lives.

Who's using Citigraf?

Law enforcement agencies
Chiefs of police, county sheriffs, fusion center directors, and state police commanders are equipped with the right tools to analyze and correlate data on a temporal and geospatial basis. It allows them to identify potential links and trends that affect crime levels and the safety of their communities.

Emergency management
The system can automatically prioritize relevant data as it is displayed in a simple way to enable a coordinated response. This gives emergency management the ability to effectively and quickly identify, respond to, and gain control of situations.

City officials
Mayors, governors, city councilors, and executives can reduce the cost of delayed responses. And, through better documentation of events, they can better communicate the effectiveness of first responders and their departmental budgets.

The benefits of Citigraf

A common operating picture
Tap into data from disparate systems and get access to data from video and ALPR cameras, CAD calls, digital maps, record management systems, weather reports, and a variety of sensors deployed throughout the city. Facilitate cross-agency communication based on a common operating picture.

Quicker access to relevant, correlated information
Get relevant information at the right time. Based on geospatial and temporal criteria, your system instantly detects and displays all relevant information from cameras, people, vehicles, and events that require immediate attention.

Use existing data to derive insights and help decision making
See incident trends emerge through an advanced operational analytics platform, with a correlation engine that connects searches across global databases. It will help you measure the effectiveness of initiatives, understand the evolution of incidents across the city, and be better prepared for major events.

A unified system, a coordinated response

Citigraf is a decision support system that allows cities, law enforcement, and emergency responders to work together to plan for, identify, and respond to events and incidents. It unifies public safety operations through situational awareness and the proper dissemination of information. A reduction in threats and better preparedness for what might happen lead to strengthened public safety, and an increase in the quality of life in local communities.

Genetec Citigraf empowers public safety agencies to share a common operating picture to help them prepare for, manage, and respond to situations – from the unexpected to the everyday.

STATE OF CONNECTICUT

DEPARTMENT OF EMERGENCY SERVICES AND PUBLIC PROTECTION

MEMORANDUM OF UNDERSTANDING
BETWEEN
THE CONNECTICUT DEPARTMENT OF EMERGENCY SERVICES AND PUBLIC PROTECTION
AND THE
TOWN OF MARLBOROUGH, POLICE DEPARTMENT
CONCERNING ACCESS TO VEHICLE RELATED INFORMATION IN THE NCIC SYSTEM FOR THE LICENSE PLATE READER PROJECT

I. PURPOSE

The purpose of this Memorandum of Understanding (MOU) is to document agreed responsibilities and functions of the Connecticut Department of Emergency Services and Public Protection ("DESPP") and the Town of Marlborough Police Department ("Town"), hereinafter, "the parties," with respect to the access, transmission, use, and storage of information from the License Plate Reader (LPR) hotlist and the National Crime Information Center (NCIC) System as retrieved through the LPR system.

II. AUTHORITIES

The DESPP enters into this MOU under the authority of Connecticut General Statutes (C.G.S.) § 4-8 and Chapters 528 and 529, *et seq*. The Town enters into this MOU under the authority of C.G.S. § 7-130d.

III. BACKGROUND INFORMATION

LPR systems utilize specialized cameras to capture license plate images and use computers to perform Optical Character Recognition (OCR) on those images such that the OCR values can be compared to a stored list of license plates values. The stored license plate value list is referred to as a hot list. The hot list contains license plate values associated with vehicles having significance to law enforcement, such as license plates associated with stolen vehicles, vehicles associated with wanted or missing persons, vehicles associated with AMBER/SILVER Alerts, as well as those reasonably believed to be involved with criminal activity. LPR systems include mobile LPR systems, mounted on police vehicles, and portable LPR systems that can be deployed in temporary stationary locations.

1111 Country Club Road
Middletown, CT 06457
Phone: (860) 685-8150/Fax: (860) 685-8354
An Affirmative Action/Equal Opportunity Employer

Town wishes to institute LPR technology from mobile and fixed sites that will allow DESPP to upload current information from NCIC and motor vehicle files. Vendors provide software and screening devices which have the capability to scan license plates and search local databases loaded into a patrol vehicle computer or other location controlled by the Town law enforcement agency.

IV. SPECIFIC RESPONSIBILITIES

1. DESPP will:

   a. Provide the Town LPR units with updated information from the LPR system database via the designated DESPP server.
   b. Provide the Town with the name and telephone number of a technical and an administrative point of contact (POC) for the LPR system;
   c. Designate a LPR System Administrator responsible for updating all LPR hotlists in a timely manner; and
   d. Ensure stored data is purged from the LPR system operations software ninety (90) days after it has initially been stored, subject to changing DESPP policies.

2. The Town law enforcement organization will:

   a. Use the LPR system information for law enforcement purposes only;
   b. Be responsible for the installation and maintenance of the LPR system equipment in vehicles, fixed, or temporary locations;
   c. Be responsible for any licensing costs, data usage and storage with vendors;
   d. Be responsible for any systems software purchase, installation, and maintenance costs;
   e. Ensure that software licenses are exactly synchronized with set DESPP expiration dates;
   f. Be responsible for officer training regarding use of the LPR system;
   g. Develop a LPR system policy for Town use;
   h. Create defined user roles and designate local and patrol-level system administrators, while ensuring that such users are maintained;
   i. Be responsible for the connection to the DESPP server through the Department of Administrative Services.
   j. In accordance with current NCIC "hit" confirmation procedures, confirm that extract matches against LPR scans are still active records in the NCIC System at the earliest reasonable opportunity.

k. Register all LPR devices with DESPP.
l. Not release NCIC data to any Vendors.
m. Report any data inaccuracies promptly to the LPR System Administrator.
n. Not release hotlists to any other municipal law enforcement agencies without written permission from DESPP.
o. Respond promptly to Freedom of Information Act requests if responsive material is available.

3. Both Parties agree:

a. Before using Personally Identifiable Information shared pursuant to this MOU, the recipient agency will make reasonable efforts to ensure the information is accurate, timely, relevant, and complete.

b. Each Party will immediately report to the other Party each instance in which data received from the other Party is used, disclosed, accessed in an unauthorized manner (including any data losses or breaches), or otherwise misused.

c. The FBI and/or DESPP may audit the handling and maintenance of data in electronic and paper recordkeeping systems to ensure appropriate security and privacy protections are in place.

d. The transfer of information described under this MOU will be conducted at the unclassified level and the transmission and storage of NCIC information will comply with the *CJIS Security Policy* and all relevant policy and regulations.

e. The Town shall indemnify, defend and hold harmless the State and its officers, representatives, agents, servants, employees, successors and assigns from and against any and all (1) Claims arising, directly or indirectly, in connection with the MOU, including the acts of commission or omission (collectively, the "Acts") of the Town; and (2) liabilities, damages, losses, costs and expenses, including but not limited to, attorneys' and other professionals' fees, arising, directly or indirectly, in connection with the MOU. The Town shall use counsel reasonably acceptable to the State in carrying out its obligations under this section. The Town's obligations under this section to indemnify, defend and hold harmless against Claims includes Claims concerning confidentiality of any part of or all of the Contractor's bid, proposal or any Records, any intellectual property rights, other proprietary rights of any person or entity, copyrighted or uncopyrighted compositions, secret processes, patented or unpatented inventions, articles or appliances furnished or used in the Performance. The Town shall not be

responsible for indemnifying or holding the State harmless from any liability arising due to the negligence of the State or any other person or entity acting under the direct control or supervision of the State.

f. The Parties acknowledge and agree that nothing in the MOU shall be construed as a modification, compromise or waiver by the State of any rights or defenses of any immunities provided by Federal law or the laws of the State of Connecticut to the State or any of its officers and employees, which they may have had, now have or will have with respect to all matters arising out of the MOU. To the extent that this section conflicts with any other section, this section shall govern.

g. This MOU is subject to the provisions of Executive Order No. Three of Governor Thomas J. Meskill, promulgated June 16, 1971, concerning labor employment practices, Executive Order No. Seventeen of Governor Thomas J. Meskill, promulgated February 15, 1973, concerning the listing of employment openings, Executive Order No. Sixteen of Governor John G. Rowland, promulgated August 4, 1999, concerning violence in the workplace, Executive Order No. 14 of Governor M. Jodi Rell, promulgated April 17, 2006, concerning procurement of cleaning products and services, in accordance with their respective terms and conditions; and Executive Order No.49 of Governor Dannel P. Malloy, promulgated May 22, 2015, which mandates disclosure of gifts to public employees and campaign contributions to candidates for statewide public office or the General Assembly for state contracts valued at more than $50,000, all of which are incorporated into and are made a part of the MOU as if they had been fully set forth in it.

h. The Town agrees and warrants that in the performance of the MOU such Town will not discriminate or permit discrimination against any person or group of persons on the grounds of race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, mental retardation, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by such Town that such disability prevents performance of the work involved, in any manner prohibited by the laws of the United States or of the State of Connecticut; and the Contractor further agrees to take affirmative action to insure that applicants with job-related qualifications are employed and that employees are treated when employed without regard to their race, color, religious creed, age, marital status, national origin, ancestry, sex, gender identity or expression, mental retardation, mental disability or physical disability, including, but not limited to, blindness, unless it is shown by the Town that such disability prevents performance of the work involved; (2) the Town agrees, in all

solicitations or advertisements for employees placed by or on behalf of the Town, to state that it is an "affirmative action equal opportunity employer" in accordance with regulations adopted by the Commission; (3) the Town agrees to provide each labor union or representative of workers with which the Town has a collective bargaining Agreement or other contract or understanding and each vendor with which the Town has a contract or understanding, a notice to be provided by the Commission, advising the labor union or workers' representative of the Contractor's commitments under this section and to post copies of the notice in conspicuous places available to employees and applicants for employment; (4) the Town agrees to comply with each provision of this Section and Connecticut General Statutes §§ 46a-68e and 46a-68f and with each regulation or relevant order issued by said Commission pursuant to Connecticut General Statutes §§ 46a-56, 46a-68e and 46a-68f; and (5) the Town agrees to provide the Commission on Human Rights and Opportunities with such information requested by the Commission, and permit access to pertinent books, records and accounts, concerning the employment practices and procedures of the Contractor as relate to the provisions of this Section and Connecticut General Statutes § 46a-56.

V. EFFECT OF THIS MOU

This MOU allows the Town law enforcement agency to utilize hotlist and other specified information via License Plate Readers under the aegis of the DESPP Chief Systems Administrator (CSA).

VI. EFFECTIVE DATE, ADMINISTRATION AND TERMINATION

1. This MOU shall become effective when executed by both Parties and will continue in effect for one (1) year from the date of execution, at which point all parties shall discuss its future, including financial costs. This MOU may be modified at any time by written consent of both Parties.

2. This MOU may be terminated, with respect to either Party, at any time upon written notice of withdrawal to the other Party. The Party desiring to withdraw from this MOU will provide written notification to the other Party at least thirty (30) days prior to the withdrawal. Such notice will be the subject of immediate consultation by the Parties to decide upon the appropriate course of action. Notwithstanding any provisions in this MOU, DESPP, through a duly authorized employee, may terminate the Agreement whenever DESPP makes a written determination that such termination is in the best interests of the State.

DMV-MOU-MARLBOROUGH PD 2021-40-079

MEMORANDUM OF UNDERSTANDING
BETWEEN
THE MARLBOROUGH POLICE DEPARTMENT
AND
THE DEPARTMENT OF MOTOR VEHICLES

THIS MEMORANDUM OF UNDERSTANDING (MOU) is made and entered into by and between the Marlborough Police Department, hereinafter referred to as "PD" and the State of Connecticut Department of Motor Vehicles, hereinafter referred to as "DMV", and is effective on the date of execution by the respective departments, as stated below.

PURPOSE: The PD and DMV agree that the intent and purpose of this MOU is to establish the terms, conditions and safeguards under which DMV will provide the PD with limited motor vehicle registration information from DMV files.

UNDERSTANDING: It is understood that DMV is authorized to issue and maintain the records of license plates for motor vehicles and the PD is a law enforcement department authorized to compile and maintain information concerning violations of laws of the state. The PD utilizes image processing technology known as License Plate Recognition (LPR) to identify vehicles by their license plates. The PD and DMV are permitted by their respective statutes and regulations to share record information and both departments recognize the critical need to protect public safety by obtaining the most accurate and up-to-date record information that is available, to enable appropriate and timely actions to be taken with respect to the registration status of a motor vehicle on public roads.

NOW, THEREFORE, the Director of the Marlborough Police Department and the Commissioner of Motor Vehicles hereby agree on behalf of their respective departments as follows:

1. DMV will provide the PD with access to a centrally located secure server to download a file of license plate numbers, vehicle descriptions (make, model and year) and corresponding registration class codes that have been identified in DMV records as having cancelled, suspended and expired registrations. The PD will update their LPR system with the electronic files of license plates as provided by DMV;

2. DMV will not provide any personal information, as defined by Section 14-10 of the Connecticut General Statutes, contained in these records;

3. All procedures, methods and requirements for the use of the LPR system have been developed solely by the PD and are described in Exhibit A, Marlborough Police Department License Plate Recognition Operational Procedures, attached hereto;

4. In accordance with Exhibit A, the PD will use the DMV information provided as an indicator only of a possible registration problem. The PD will confirm the license plate number, vehicle description, and administrative registration action on vehicles identified by the LPR through the Department of Emergency Services and Public Protection's Connecticut On-line Law Enforcement Communications Teleprocessing (COLLECT) system;

5. The PD agrees, represents, and warrants that it has obtained and will use the information furnished to it by the DMV for its own use and in connection with its LPR system only. Furthermore, the PD agrees that the information furnished by this MOU shall not be used, delivered, transmitted or otherwise conveyed to any other person, firm, partnership, corporation or any other entity, including other law enforcement entities; except where the PD has a written agreement with a vendor to perform the services contemplated in this agreement;

6. The PD agrees that the DMV shall not be responsible for any errors, omissions or discrepancies in the information furnished to the PD under this MOU;

7. DMV and the PD agree that each shall be responsible for all of its respective expenses and any liabilities that may be incurred with respect to any aspect of this MOU or performance hereunder. The PD agrees to defend, indemnify and save harmless the DMV from any and all claims and suits, and from liability of any kind whatsoever arising out of the PD's failure or alleged failure to follow the LPR procedures that it has developed, and that are specified in Exhibit A;

8. Amendments or additions to this MOU must be mutually agreed upon and shall be made only by written amendment, duly executed by both parties;

9. This MOU shall remain in effect until cancelled at any time by either party, without liability of any kind, upon (30) days' written notice to the other;

10. This MOU and the rights hereunder shall not be assigned by DMV or the PD;

11. The parties agree that this MOU and the interpretation of all its provisions shall be governed by the laws of the State of Connecticut;

12. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original and all of which together shall constitute one and the same instrument. Execution and delivery of this Agreement electronically is hereby deemed valid and effective; a signed PDF or electronic copy is hereby deemed an original for all purposes; and the parties fully intend that each may rely

upon such signature as being a true signature of the party's authorized officer or representative and deemed as due execution and delivery for all purposes whether or not hard copies of this Agreement were or are ever exchanged between them.

13. This MOU contains the entire agreement between the parties concerning the subject matter hereof, and supersedes any previous understandings, presentations, commitments or agreements, oral or written, relating hereto.

IN WITNESS THEREOF, the parties hereto have caused this MOU to be duly signed on the dates hereinafter stated.

Marlborough Police Department
License Plate Recognition Operational Procedures

The Marlborough Police Department has developed and shall follow the procedures below, in regards to the DMV data, during its operation of their LPR:

- DMV-provided data shall be updated with the most current information available prior to use of the reader.
- Only officers trained in the operation of the LPR will be permitted to use the equipment.
- The LPR is to be used as a screening tool only.
- All hits discovered as a result of LPR operation shall be confirmed by other means prior to taking police action.
- DMV hits will be verified by means of a COLLECT[1]

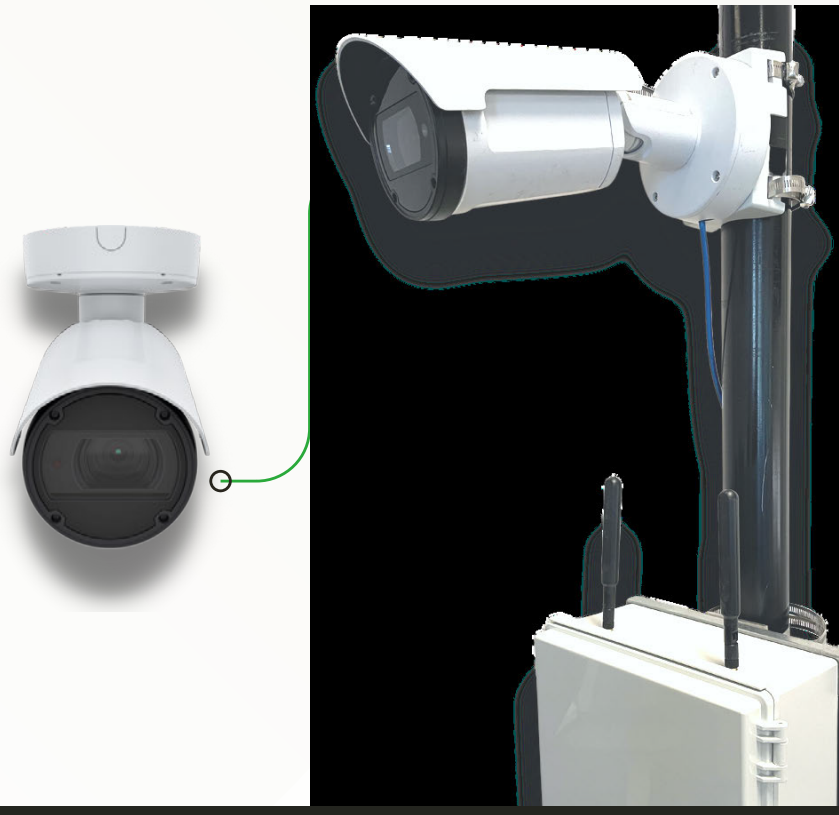
flock safety

Automate investigative leads with a camera that sees like a detective

Flock Safety Falcon ™
Long Range ALPR Camera

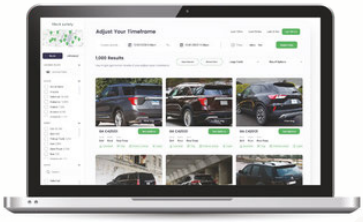


The Flock Safety Falcon is an affordable ALPR (automatic license plate reader) camera for law enforcement agencies who want to increase case clearance and eliminate crime. Unlike traditional ALPR, the Falcon can be deployed on any roadway and capture vehicles up to 150 feet away at 100 MPH. The Falcon's advanced computer vision uses Vehicle Fingerprint ™ technology to transform thousands of images into actionable evidence, even when a license plate isn't visible.

Not your average license plate reader

Install anywhere
With LTE connectivity, we can install the Falcon where it impacts crime the most.

No maintenance required
We install, maintain, and service your cameras for the life of your contract, all for one subscription price.



Vehicle Fingerprint Technology
Search images by vehicle type, make, color, license plate, and other unique features like bumper stickers, decals, and roof racks.

AWARD CONDITIONS

1. This Notice of Grant Award (NGA) awards the Recipient with the total award amount authorized in Block 11 to implement the FY 2019 High Priority Grant Program.

   The FMCSA approves the total project plan, line item budget and budget narrative as requested in the original application. The FY 2019 total recommended amount is $974,117. (Federal award = $828,000. / State match = $146,117).

   If the recipient is requesting indirect costs, the recipient may not request reimbursement for these costs until it has submitted a current approved indirect cost rate agreement to the FMCSA Division Office, and the GMO mailbox below:

   FMCSASECGMOHelpDesk@dot.gov

   The recipient and any sub-recipient must also comply with the applicable attached FMCSA general terms and conditions, which are incorporated into this NGA. Failure to comply with the attached terms and conditions and any additional provisions directly reflected in this NGA may result in enforcement actions as outlined in 2 CFR §§ 200.338 and 200.339.

AWARD ATTACHMENTS

Transportation, Massachusetts Executive Office FM-MHP-0485-19-01-00

1. Standard Terms and Conditions

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION
FINANCIAL ASSISTANCE AGREEMENT GENERAL TERMS AND CONDITIONS

Section 1. Grant Authority

a. Contract Authority.

The Federal Motor Carrier Safety Administration's (FMCSA) authorizing legislation, The Fixing America's Surface Transportation Act [FAST Act], Pub. L. No. 114-94, §5101 (2015) granted FMCSA contract authority. As codified in 49 U.S.C. §31104, the Secretary of Transportation's approval of the grant funds made available imposes a contractual obligation upon the United States for payment of the Government's share of costs in carrying out the grant objectives.

b. Lapse in Appropriations and/or Authorization.

Except in limited circumstances, the absence of FMCSA appropriations and/or authorization prevents the continuation of Federal supervision and support to the performance of a grant. In the absence of such supervision or support, the Recipient may only continue to proceed with its work if (1) the performance of such grant is not incurring obligations from the lapsed appropriations; (2) if continued grant management supervision or support is not critical to the Recipient's continued performance of the work; (3) and FMCSA has approved the continuation of such work. FMCSA will make such determinations in accordance with the Executive Office of the President, Office of Management and Budget, Memorandum "Planning for Agency Operations During a Lapse in Government Funding "(April 7, 2011), and any amendments or updated guidance thereto.

Section 2. Effective Date.

Recipient acknowledges that Federal funds are obligated on the effective date of the Grant Agreement. The effective date is the date that the Grant Agreement contains the authorized signatures of both parties to this agreement. Where the dates accompanying the signatures differ from party to party, the effective date of the Grant Agreement shall be the most recent of these dates.

Section 3. Electronic Signatures.

The Recipient understands that electronic signatures are binding. An electronic signature to the Grant Agreement commits the Recipient to these Provisions and Assurances, as well as all requirements denoted in Section 4.

Section 4. General Requirements.

a. Obligation of Recipient to Comply.

The Recipient understands that by signing the Grant Agreement, the Recipient is agreeing to carry out the approved project plan and the approved budget and to comply with all applicable Federal laws and requirements imposed by the FMCSA concerning special requirements of law, program requirements, and other administrative requirements. This includes, but is not limited to: (1) 49 U.S.C. chapters 311 and 313 (2016), as applicable and denoted in the Notice of Grant Agreement; (2) FAST Act, Pub. L. No. 114-94, §§ 5101 and 5104 (2015), as applicable and denoted in the Notice of Grant Agreement; (3) U.S. Department of Transportation (DOT) regulations; (4) the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 C.F.R. part 200); and (5) the Federal Grant and Cooperative Agreement Act of 1977.

For all Federal awards, compliance with statutory and national policy requirements also includes the provisions of the Federal Funding and Accountability Transparency Act (FFATA), which includes requirements on executive compensation, and also requirements implementing the Act for the non-Federal entity, codified at 2 C.F.R. part 25 and 2 C.F.R. part 170. See also statutory requirements for whistleblower protections at 10 U.S.C. §§ 2324 and 2409 and 41 U.S.C. § § 4304, 4310, and 4712.

b. Application of Federal, State, and Local Laws and Regulations.

i. Federal Laws.

The Recipient understands that Federal laws, regulations, policies, and related administrative practices applicable to this Agreement on the date the Agreement was executed may be modified from time to time. The Recipient agrees that the most recent of such Federal requirements will govern the administration of this Agreement at any particular time. Likewise, new Federal laws, regulations, policies and administrative practices may be established after the date the Agreement has been executed and may apply to this Agreement. To achieve compliance with changing Federal requirements, the Recipient agrees to include in all Subrecipient agreements and third-party contracts financed with FMCSA assistance, specific notice that Federal requirements may change and the changed requirements will apply to the Project as required. All limits or standards set forth in this Agreement to be observed in the performance of the Project are minimum requirements.

ii. State or Territorial Law and Local Law.

Except to the extent that a Federal statute or regulation preempts State or territorial law, nothing in this Agreement shall require the Recipient to observe or enforce compliance with any provision thereof, perform any other act, or do any other thing in contravention of any applicable State or territorial law;

however, if any of the provisions of this Agreement violate any applicable State or territorial law, or if compliance with the provisions of this Agreement would require the Recipient to violate any applicable State or territorial law, the Recipient agrees to notify the FMCSA immediately in writing in order that FMCSA and the Recipient may make appropriate arrangements to proceed with the Project as soon as possible.

c. Subrecipients.

State Recipients shall follow State law and procedures when awarding and administering subawards to local and Indian tribal governments including 2 C.F.R. § 200.317. All other non-federal entities, including Subrecipients of a State, will follow 2 C.F.R. § 200.318, General procurement standards, through § 200.326, Contract provision, as well as the Standards for Financial and Program Management, at §§ 200.300 through 200.309. Subrecipient means a non-Federal entity that receives a subaward from a pass-through entity to carry out part of a Federal program; but does not include an individual that is a beneficiary of such program. A Subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency.

d. Subawards.

Subaward means an award provided by a pass-through entity to a Subrecipient for the Subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program. A subaward may be provided through any form of legal agreement, including an agreement that the pass-through entity considers a contract.

e. Pass-Through Entity.

Pass-through entity means a non-Federal entity that provides a subaward to a Subrecipient to carry out part of a Federal program. All Pass-Through Entities must comply fully with 2 C.F.R. §§ 200.330, 200.331, 200.332, and 200.505.

f. Prohibition Against Transferring An Award.

The Recipient is prohibited from transferring or subrogating their rights and responsibilities of the grant program and funds associated with that grant to another entity. Subrogation is when a non-federal entity substitutes another entity, not awarded the subject grant by FMCSA, to a lawful claim, demand, or right, so that that entity succeeds to the rights of the other in relation to the debt or claim, and its rights, remedies, or fund access. The act of subawarding to a Subrecipient is not considered as the subrogation of the Recipient's award.

Section 5. Internal Controls. The Recipient must:

a. Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in "Standards for Internal Control in the Federal Government" issued by the Comptroller General of the United States and the "Internal Control Integrated Framework," issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO);

b. Comply with Federal statutes, regulations, and the terms and conditions of the Federal awards;

c. Evaluate and monitor the non-Federal entity's compliance with statute, regulations and the terms and conditions of Federal awards;

d. Take prompt action when instances of noncompliance are identified including noncompliance identified in audit findings; and

e. Take reasonable measures to safeguard protected personally identifiable information and other information the Federal awarding agency or pass-through entity designates as sensitive or the non-Federal entity considers sensitive consistent with applicable Federal, state and local laws regarding privacy and obligations of confidentiality.

Section 6. Ethics.

a. Written Code of Ethics.

The Recipient agrees to maintain a written code or standards of ethical conduct that shall govern the performance of its officers, employees, board members, or agents engaged in the award and administration of contracts supported by Federal funds. The code or standards shall provide that the Recipient's officers, employees, board members, or agents may neither solicit nor accept gratuities, favors or anything of monetary value from present or potential contractors, Subrecipients, or regulated entities. The Recipient may set minimum rules where the financial interest is not substantial or the gift is an unsolicited item of nominal intrinsic value. As permitted by State or local law or regulations, such code or standards shall provide for penalties, sanctions, or other disciplinary actions for violations by the Recipient's officers, employees, board members, or agents, or by contractors or·Subrecipients or their agents.

b. Personal Conflict of Interest.

The Recipient's code or standards must provide that no employee, officer, board member, or agent of the Recipient may participate in the selection, award, or administration of a contract supported by Federal funds if a real or apparent conflict of interest would be

involved. Such a conflict would arise when any of the parties set forth below has a financial or other interest in the firm selected for award:

i. The employee, officer, board member, or agent;
ii. Any member of his or her immediate family;
iii. His or her partner; or
iv. An organization that employs, is considering to employ, or is about to employ, any of the above.

c. Organizational Conflicts of Interest.

The Recipient's code or standards of conduct must include procedures for identifying and preventing real and apparent organizational conflicts of interests. An organizational conflict of interest exists when the nature of the work to be performed under a proposed third-party contract or subaward, may, without some restrictions on future activities, result in an unfair competitive advantage to the contractor or Subrecipient or impair the contractor's or Subrecipient's objectivity in performing the contract work.

Section 7. Hatch Act.

The Recipient agrees to comply, as applicable, with provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7321-7326), which limit the political activities of state or local employees whose principal employment is in connection with programs financed in whole or in part by loans or grants made by the United States or a Federal agency. The Hatch Act specifically exempts employees of educational institutions, and the Hatch is not applicable to private, nonprofit organizations unless the statutes through which the nonprofit organizations derive their federal funding contain a provision stating that the recipient organizations are deemed to be state or local government agencies for purposes of the Hatch Act. On December 19, 2012, Congress passed the Hatch Act Modernization Act of 2012 (the Act). The Act became effective on January 27, 2013. Now, only state, D.C., or local government employees whose salaries are paid for entirely by federal funds are prohibited from running for partisan office. All other state, D.C., and local employees, even if they are otherwise covered by Hatch Act restrictions are free under the Hatch Act to run for partisan office.

Section 8. Limitation on Use of Federal Funds for Lobbying for Grants in Excess of $100,000.

By signing this agreement, the Recipient declares that it is in compliance with 31 U.S.C. § 1352, which prohibits the use of federally appropriated funds to influence a Federal employee, officer, or Member of Congress in connection with the making or modification of any Federal grant, loan, contract, or cooperative agreement. Unless the payment of funds is otherwise reported to FMCSA, signing this agreement constitutes a declaration that no funds, including funds not federally appropriated, were used or agreed to be used to influence this grant.

Recipients of subawards in excess of $100,000 must make the same declarations to the Recipient. With respect to the payment of funds not federally appropriated by the Recipient and

Subrecipients, the Recipient must report to the FMCSA the name and address of each person paid or performing services for which payment is made, the amount paid, and the activity for which the person was paid.

Section 9. Contracting (Federal Standards).

The Recipient and Subrecipients agree to comply with the Procurement Standards requirements set forth at 2 C.F.R. §§ 200.317 through 200.326 inclusive, whichever may be applicable, and with applicable supplementary U.S. DOT or FMCSA directives or regulations. If determined necessary for proper Project administration, FMCSA reserves the right to review the Recipient's technical specifications and requirements.

Section 10. Notification Requirement.

With respect to any procurement for goods and services (including construction services) having an aggregate value of $500,000 or more, the Recipient agrees to:

a. Specify in any announcement of the awarding of the contract for such goods or services the amount of Federal funds that will be used to finance the acquisition; and

b. Express the said amount as a percentage of the total costs of the planned acquisition.

Section 11. Debarment and Suspension.

The Recipient agrees to obtain certifications on debarment and suspension from its third-party contractors and Subrecipients and otherwise comply with U.S. DOT regulations, Government-wide Debarment and Suspension (Non-procurement) and Government-wide Requirements for Drug-Free Workplace (Grants), 49 C.F.R. part 32. This action of certification shall take place for each federal year, regardless of prior certification completed for a Subrecipient or contractor.

Section 12. Notification of Third Party Contract or Subaward Disputes or Breaches.

The Recipient agrees to notify FMCSA of any current or prospective major dispute, breach, or litigation pertaining to any third-party contract or subaward. If the Recipient seeks to name FMCSA as a party to litigation for any reason, the Recipient agrees first to inform FMCSA before doing so. This provision applies to any type of litigation whatsoever, in any forum.

Section 13. Participation by Small Business Concerns Owned and Controlled by Socially and Economically Disadvantaged Individuals.

FMCSA encourages the Recipient to utilize small business concerns owned and controlled by socially and economically disadvantaged individuals (as that term is defined for other DOT agencies in 49 C.F.R. part 26) in carrying out the Project.

Section 14. Records Retention.

a. Requirement to Retain Records.

During the course of the Project and for three years after the final Federal financial report is submitted (form SF-425), the Recipient agrees to retain intact and to provide any data, documents, reports, records, contracts, and supporting materials relating to the Project as FMCSA may require. Reporting and record-keeping requirements are set forth in 2 C.F.R. § 200.333.

b. Access to Recipient and Subrecipient Records.

The Recipient, and related subrecipients, will give FMCSA, the Secretary of Transportation, the Comptroller General of the United States, or any of their duly authorized representatives, and, if appropriate the State, through any authorized representative, access to and the right to examine all records, books, papers or documents related to the award and will establish a proper accounting system in accordance with generally accepted accounting standards. Access requirements to records are set forth in 2 C.F.R. § 200.336.

Section 15. Audit and Inspection.

a. Inspector General Act of 1978.

Under the Inspector General Act of 1978, as amended, 5 U.S.C. App. 3 § 1 et seq., an audit of the award may be conducted at any time.

b. Single Audit Act Amendments of 1996.

The Recipient agrees to undergo the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and 2 C.F.R. § 200.501.

c. Other Audit Requirements.

A Recipient that is: (a) a State, local government or Indian tribal government, an institution of higher education or nonprofit organization agrees to comply with the audit requirements of 2 C.F.R. § 200.501, and any revision or supplement thereto; (c) a private for-profit organization agrees to comply with the audit requirements of 2 C.F.R. § 200.501(h).

It is imperative that Recipients submit required Single Audits within the time limits specified in the Circular. The Recipient agrees to submit the data collection form and copies of the reporting package required under the Single Audit Act Amendments of 1996 and 2 C.F.R. § 200.501 to:

The Federal Audit Clearinghouse Bureau of the Census
1201 East 10 Street,
Jefferson, IN 47132.

The Recipient agrees to obtain any other audits required by FMCSA. Project closeout will not alter the Recipient's audit responsibilities. Audit costs for Project administration and management are allowable under this Project to the extent authorized by 2 C.F.R. § 200.501.

The Recipient agrees to permit FMCSA, the Secretary of Transportation and the Comptroller General of the United States, or their authorized representatives, to inspect all Project work, materials, payrolls, and other data, and to audit the books, records, and accounts of the Recipient and its Subrecipients pertaining to the Project. The Recipient agrees to require each Subrecipient to permit the Secretary of Transportation and the Comptroller General of the United States, or their duly authorized representatives, to inspect all work, materials, payrolls, and other data and records involving that subaward, and to audit the books, records, and accounts involving that subaward as it affects the Project.

Section 16. Responsibility for Reporting Fraudulent Activity, Waste, and Abuse.

The Recipient understands that the Federal government shall pursue administrative, civil, or criminal action under a variety of statutes relating to fraud and making false statement or claims.

The Recipient is required to contact the DOT, the Office of Inspector General (OIG), if the Recipient becomes aware of the existence (or apparent existence) of fraudulent activity, waste, or abuse.

The OIG has authority within the DOT to conduct criminal investigations. The DOT OIG maintains a post office box and a toll-free hotline for receiving information from individuals concerning fraud, waste, or abuse under DOT grants and cooperative agreements. The hotline is available 24 hours a day, 7 days a week at https://www.oig.dot.gov/Hotline. The identity of the caller is kept confidential, and callers are not required to give their names.

Examples of fraud, waste, and abuse that should be reported include, but are not limited to, embezzlement, misuse, or misappropriation of grant funds or property, and false statements, whether by organizations or individuals. Other examples include, but not limited to, theft of grant funds for personal use; using funds for non-grant-related purposes; theft of federally owned property or property acquired or leased under a grant; charging inflated building rental fees for a building owned by the Recipient; submitting false financial reports; and submitting false financial data in bids submitted to the Recipient (for eventual payment under the grant).

Section 17. Budget and Finance.

The Recipient agrees to carry out Agreement activities and seek reimbursement in accordance with the Approved Project Budget after securing FMCSA written approval. The funding of items identified in the budget constitutes FMCSA 's authorization for the Recipient to incur these costs, if they are allowable, allocable, necessary, and reasonable. Furthermore, funds cannot be spent that violate any FMCSA policy or grants manual. Costs not specifically budgeted in this Agreement may be allowable if prior approval is not required and costs are

incurred consistently with the applicable cost principles.

Prior Approval means written permission provided by an FMCSA authorized official in advance of an act that would result in either (1) the obligation or expenditure of funds or (2) the performance or modification of an activity under the grant-supported project where such approval is required. Prior approval must be obtained in writing from the designated Grants Management Officer or FMCSA authorized official for the grant involved. Documentation of the approved budget on the Notice of Grant Award constitutes prior approval. Prior approval applies for the performance of activities and expenditure of funds as described in the grant application, unless otherwise restricted by the terms and conditions of the Agreement.

In accordance with 2 C.F.R. § 200.407 and § 200.308, the Recipient must obtain prior , written approval from FMCSA before making any revisions to the approved project budget and/or project plan: (1) extending the project period of the grant beyond the project period end date specified in the most recent revision of the Agreement; (2) that would require any transfer of funds between Standard Form (SF) 424A (direct-cost budget categories) cumulatively greater than ten percent of the total approved project budget; or (3) that require the addition of expenditures for items or services not approved in the original project plan. Examples include: increased cost of equipment purchased; subawarding, transferring or contracting out of any work under a Federal award not included in the original approved budget; or a first-time request to recover indirect costs.

The Recipient agrees to submit a request for prior approval no less than 30 days prior to the expiration of the Agreement. The FMCSA will not process requests for prior approval received less than 30 days from the Agreement expiration date. Within 30 calendar days from the date of the Recipient's request for prior approval, FMCSA will review the request and notify the Recipient whether the request has been approved. If the revision is still under consideration at the end of 30 calendar days, FMCSA will inform the Recipient in writing of the date when the Recipient may expect the decision.

The Recipient may, without prior approval from FMCSA, make any reasonable and necessary modification to the project budget if such deviations do not cumulatively exceed, or expect to exceed, ten percent of the total approved project amount and provided that such deviations only involve the transfer of funds between expenditure items, cost objectives or categories authorized by FMCSA in the currently approved budget. The Recipient agrees to notify FMCSA of this change.

The Recipient agrees to establish and maintain for the Project either a separate set of accounts or accounts within the framework of an established accounting system, in a manner consistent with 2 C.F.R. § 200.302. Consistent with the provisions of 2 C.F.R.§ 200.305, the Recipient agrees to record in the Project Account, and deposit in a financial institution all Project payments received by it from FMCSA pursuant to this Agreement and all other funds provided for, accruing to, or otherwise received because the Project (Project Funds). The Recipient is encouraged to use financial institutions owned at least 50 percent by minority group members.

All costs charged to the Project, including any approved services contributed by the Recipient

or others, shall be supported by properly executed payroll documents, time and attendance records, invoices, contracts, or vouchers describing in detail the nature and propriety of the charges. All match expenditures shall be supported by appropriate records. The Recipient also agrees to maintain accurate records of all Program Income derived from Project implementation. The Recipient agrees that all checks, payrolls, invoices, contracts, vouchers, orders, or other financial documents pertaining in whole or in part to the Project shall be clearly identified, readily accessible, and, to the extent feasible, kept separate from documents not pertaining to the Project.

Section 18. Payments.

a. Request by the Recipient for Payment.

The Recipient's request for payment of the Federal share of approved costs shall be made to FMCSA and will be acted upon by FMCSA as set forth in this section. Each payment made to the Recipient must be in compliance with Department of the Treasury regulations, "Rules and Procedures for Funds Transfers, 31 C.F.R. part 205. To receive a Federal assistance payment, the Recipient must:

i. Have demonstrated or certified that it has made a binding commitment of non-Federal funds, if applicable, adequate when combined with Federal payments, to cover all costs to be incurred under the Project to date. A Recipient required by Federal statute or this Agreement to provide contributory matching funds or a cost share agrees:

A. To refrain from requesting or obtaining Federal funds in excess of the amount justified by the contributory matching funds or cost share that has been provided; and

B. To refrain from taking any action that would cause the proportion of Federal funds made available to the Project at any time to exceed the percentage authorized under this Agreement. The requirement for contributory matching funds or cost share may be temporarily waived only to the extent expressly provided in writing by FMCSA.

ii. Have submitted to FMCSA all financial and progress reports required to date under this Agreement;

iii. Have identified the source(s) of financial assistance provided under this Project, if applicable, from which the payment is to be derived; and

iv. Have expended any earned Program Income before requesting any federal funds for reimbursement.

b. Delphi eInvoicing System for DOT Financial Assistance Awardees.

Subject to the requirements in 2 C.F.R. § 200.305, payments will be made after receipt of required FMC SA reporting forms and supporting documentation. Each payment request must be made electronically via the Delphi elnvoicing System.

The following are the procedures for accessing and utilizing the Delphi elnvoicing System.

i. Grant Recipient Requirements.

A. Recipient must have internet access to register and submit payment requests through the Delphi elnvoicing system.

B. Recipient must submit payment requests electronically and FMCSA must process payment requests electronically.

ii. System User Requirements.

A. Recipients should contact FMCSA to request access to the system. The FMCSA will provide the Recipient's name and email address to the DOT Financial Management Office. The DOT will then notify the Recipient to register for the system through an electronic invitation. The Recipient must complete online training prior to DOT giving system access.

B. The DOT will send the Recipient an email with an electronic form to verify the Recipient 's identity. The Recipient must complete the form, and present it to a Notary Public for verification. The Recipient will return the notarized form to:

DOT Enterprise Services Center
FAA Accounts Payable, AMZ-1 00
PO Box 25710
Oklahoma City, OK 73125.

C. The DOT will validate the form and email a user ID and password to the Recipient. The Recipient should contact the FMCSA grants management office with changes to their system information.

D. Note: Additional information, including access forms and training materials, can be found on the DOT elnvoicing website:
https://www.transportation.gov/cfo/delphi-einvoicing-system

E. Waivers.

DOT Financial Management officials may, in highly limited circumstances and on a case by case basis, waive the requirement to register and use the electronic grant payment system. Waiver request forms can be obtained on the DOT elnvoicing website https://www.transportation.gov/cfo/delphi-einvoicing-system or by contacting FMCSA.

Recipients must explain why they are unable to use or access the internet to register and enter payment requests.

c. Reimbursement Payment by FMCSA. If the reimbursement method is used, the Recipient agrees to:

i. Complete and submit Standard Form 3881, "Payment Information Form - ACH Payment Vendor Payment System," to FAA-ESC; and

ii. Complete and submit, on at least a quarterly basis, Standard Form 270, "Request for Advance or Reimbursement," to FMCSA.

iii. Possess and maintain a current DUNs number and entity registration with the System for Award Management (www.sam.gov).

Upon receipt of a payment request and adequate accompanying information (invoices in accordance with applicable cost principles), FMCSA will authorize payment by direct deposit provided the Recipient: (i) is in compliance with its obligations under this Agreement, (ii) has satisfied FMCSA that it needs the requested Federal funds during the requisition period, and (iii) is making adequate and timely progress toward Project completion. If all these circumstances are present, FMCSA may reimburse approved costs incurred by the Recipient up to the maxi mum amount of FMCSA's share of the total Project funding. FMCSA will employ a payment term of 20 days. The clock will start running for payment on receipt of the invoice by FMCSA's financial processor.

d. Other Payment Information.

The Recipient agrees to adhere to and impose on its Subrecipients all applicable foregoing "Payment by FMCSA" requirements of this Agreement. If the Recipient fails to adhere to the foregoing "Payment by FMCSA" requirements of this Agreement, FMCSA may revoke the portion of the Recipient's funds that has not been expended.

e. Effect of Program Income, Refunds, and Audit Recoveries on Payment.

In accordance with 2 C.F.R. § 200.305(b)(5) State, local government, nonprofit organizations and Indian tribunal Recipients and Subrecipients shall disburse program income, rebates, refunds, contract settlements, audit recoveries and interest earned on

such funds before requesting additional cash reimbursements.

f. Reimbursable Costs.

The Recipient's expenditures will be reimbursed only if they meet all requirements set forth below:

i. Conform with the Project description and the approved Project Budget and all other terms of this Agreement;

ii. Be necessary to accomplish the Project;

iii. Be reasonable for the goods or services purchased;

iv. Be actual net costs to the Recipient (i.e., the price paid minus any refunds, rebates, or other items of value received by the Recipient that have the effect of reducing the cost actually incurred);

v. Be incurred (and be for work performed) after the Federal Funding Period start date of this Agreement, unless specific prior authorization from FMCSA to the contrary is received in writing (pre-award costs);

vi. Unless permitted otherwise by Federal statute or regulation, conform with Federal guidelines or regulations and Federal cost principles as set forth below:

A. For Recipients that are governmental organizations, institutions of higher education, private non-profit organizations, the cost principles of 2 C.F.R. § 200, subpart E; and

B. For Recipients that are for-profit organizations, the standards of the Federal Acquisition Regulations, 48 C.F.R. part 31.2, "Contracts with Commercial Organizations" apply.

vii. Be satisfactorily documented; and

viii. Be treated uniformly and consistently as non-Federal funds under accounting principles and procedures approved and prescribed by FMCSA for the Recipient, and those approved or prescribed by the Recipient for its Subrecipients and contractors.

g. Indirect Costs.

If indirect costs are included in the approved budget, the Recipient may not request these costs for reimbursement absent a current approved indirect cost rate agreement submitted to the FMCSA Division Office, and included as part of the official grant record.

Indirect costs will not be reimbursed without documentation of an approved indirect cost rate from the Recipient's cognizant agency; however, a Recipient or Subrecipient that has never had a negotiated indirect cost rate may elect to charge a de minimis rate of 10% of modified total direct costs (MTDC) which may be used indefinitely, without documentation. If chosen, this methodology once elected must be used consistently for all Federal awards until such time as a non-Federal entity chooses to negotiate for a rate, which the non-Federal entity may apply to do at any time

As described in 2 C.F.R. § 200.403, factors affecting allowability of costs, costs must be consistently charged as either indirect or direct costs, but may not be double-charged or inconsistently charged as both. Except as provided above, if a Recipient intends to request reimbursement of indirect costs, the Recipient must submit the proper documentation before vouchers are submitted for reimbursement. The Recipient must indicate in its budget that it will be seeking indirect costs, and a placeholder indirect cost rate will suffice until an approved rate can be determined.

The Recipient must obtain prior approval through formal amendment in order to recover indirect costs at an approved rate higher than the place holder indirect cost rate if the cumulative amount of such transfer exceeds or is expected to exceed 10 percent of the total approved budget.

The Recipient may not request additional grant funds to recover indirect costs that it cannot recover by shifting funding from direct costs to indirect costs. After this Grant Agreement has been signed, any request for changes to the indirect cost rate will require an amendment and must be approved by formal amendment if the change to the indirect cost rate is a new rate or would cause the cumulative amount of a budget transfer to exceed 10 percent of the total approved budget.

The cognizant agency for indirect costs may allow for a one-time extension of the current indirect cost rate of up to four years without further negotiation of a federally approved indirect cost rate. If the cognizant agency permits any one-time extension, the Recipient is locked in with that indirect cost rate until the end of the approved extension.

h. Pre-Award Costs. A Recipient may be reimbursed for obligations incurred before the effective date of the award if:

i. The Recipient receives prior written approval from the FMCSA before the effective date of the grant agreement;

ii. The costs are necessary to conduct the project; and

iii. The costs would be allowable under the grant, if awarded.

If a specific expenditure would otherwise require prior approval before making the expenditure (i.e. pursuant to 2 C.F.R. § 200.407), then the Recipient must obtain FMCSA written approval before incurring the cost.

Recipient understands that the incurrence of pre-award costs in anticipation of an award is taken at the Recipient's risk and imposes no obligation on FMCSA to make the award or to increase the amount of the approved budget if (1) there is no award subsequently made;(2) an award is made for less than anticipated and is inadequate to cover the pre-award costs incurred; or (3) there are inadequate appropriations.

i. Disallowed Costs.

In determining the amount of Federal assistance FMCSA will provide, FMCSA will exclude:

i. Any Project costs incurred by the Recipient before the effective date of this Agreement, or amendment or modification thereof, whichever is later, unless otherwise permitted by Federal Law or regulation, or unless an authorized representative of FMCSA states in writing to the contrary;

ii. Any costs incurred by the Recipient that are not included in the latest approved Project Budget; and

iii. Any costs attributable to goods or services received under a contract or other arrangement that is required to be, but has not been, concurred with or approved in writing by FMCSA.

The Recipient agrees that reimbursement of any cost under the "Payment by FMCSA," part of this Agreement does not constitute a final FMCSA decision about the allowability of that cost and does not constitute a waiver of any violation by the Recipient of the terms of this Agreement. The Recipient understands that FMCSA will not make a final determination about the allowability of any cost until an audit of the Project has been completed. If FMCSA determines that the Recipient is not entitled to receive any part of the Federal funds requested, FMCSA will notify the Recipient stating the reasons thereof. Project closeout will not alter the Recipient's obligation to return any funds due to FMCSA as a result of later refunds, corrections, or other transactions. Nor will Project closeout alter FMCSA's right to disallow costs and recover funds based on a later audit or other review. Unless prohibited by law,

FMCSA may offset any Federal assistance funds to be made available under this Project as needed to satisfy any outstanding monetary claims that the Federal Government may have against the Recipient. Exceptions pertaining to disallowed costs will be assessed based on their applicability, as set forth in the applicable Federal cost principals or other written Federal guidance.

Section 19. Program Income.

Recipient agrees to comply with the regulations relating to program income, located at 2 C.F.R. §§ 200.305(b)(5) and 200.307 for State, local government, Indian tribunal recipients, and non-profit organizations, and their Subrecipients.

Program income means gross income earned by the Recipient, Subrecipient, or contractor under a grant that is directly generated by a grant-supported activity or earned because of the award during the award period. "During the grant period " is the time between the effective date of the award and the ending date of the award reflected in the final financial report.

Program income includes, but is not limited to, user charges or user fees, income from fees for services performed, the use or rental of real or personal property acquired under federally-funded projects, the sale of commodities or items fabricated under an award, license fees and royalties on patents and copyrights, and interest on loans made with award funds. Interest earned on advances of Federal funds is not program income. Except as otherwise provided in Federal awarding agency regulations or the terms and conditions of the award, program income does not include the receipt of principal on loans, rebates, credits, discounts, etc., or interest earned on any of them. Per 2 C.F.R. § 200.307 (c), Governmental revenues, taxes, special assessments, levies, fines, and other such revenues raised by a non-Federal entity are not program income unless the revenues are specifically identified in the Federal award or Federal awarding agency regulations as program income.

Recipients agree to use the Program income in accordance with 2 C.F.R. §§ 200.305(b)(5) 200.307 for State, local government, nonprofit organizations and Indian tribunal recipients and subrecipients.

Section 20. Reports.

a. Performance Progress Reports.

The Recipient will submit, at a minimum, quarterly performance progress reports and a final performance progress report at the completion of the award (within 90 days after) to the agency point of contact listed in the award document. Recipient must submit all performance progress report forms required by FMCSA. These reports will cover the period: January 1 -March 31, April 1-June 30, July 1- September 30, and October 1-December 31. The Recipient shall furnish one (1) copy of a quarterly performance progress report to the district office and respective Grant Manager, on or before the thirtieth (30th) calendar day of the month following the end of the quarter being reported. Each quarterly report shall set forth concise statements concerning activities relevant to the Project, and shall include, but not be limited to, the following:

i. An account of significant progress (findings, events, trends, etc.) made during the reporting period;

ii. A description of any technical and/or cost problem(s) encountered or anticipated

that will affect completion of the grant within the time and fiscal constraints as set forth in this Agreement, together with recommended solutions or corrective action plans (with dates) to such problems, or identification of specific action that is required by the FMCSA, or a statement that no problems were encountered;

iii. An outline of work and activities planned for the next reporting period; and

iv. A status update/resolution for all outstanding findings from program reviews and/or audits.

b. Quarterly Financial Status Reports.

The Recipient shall furnish one (1) copy of a quarterly financial status report to the division, and one (1) copy to the respective Grant Manager, on or before the thirtieth (30th) calendar day of the month following the end of the quarter being reported. The Recipient shall use SF-425, Federal Financial Report, to report the status of funds for all non-construction projects or programs. If the Recipient's accounting records are not normally kept on an accrual basis, the Recipient shall not be required to convert its accounting system, but shall develop such accrual information through an analysis of the documentation on hand. The Recipient shall certify to the expenditure of its proposed cost share for the period being reported, in the "Remarks" block.

Section 21. Non-Discrimination.

The Recipient will comply with all Federal authorities relating to nondiscrimination. These include, but are not limited to:

- Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq., 78 Stat. 252), which prohibits discrimination on the basis of race, color, or national origin, as implemented by 49 C.F.R . § 21.1 et seq. and 49 C.F.R. § 303;
- Federal-Aid Highway Act of 1973, (23 U.S.C. § 324, et seq.), which prohibits discrimination on the basis of sex;
- Title IX of the Education Amendments of 1972, as amended, (20 U.S.C. § 1681 et seq.), which prohibits discrimination on the basis of sex in education programs or activities, as implemented by 49 C.F.R. § 25.1 et seq.;
- The Age Discrimination Act of 1975, as amended, (42 U.S.C. § 6101 et seq.), which prohibits discrimination on the basis of age;
- Section 504 of the Rehabilitation Act of 1973, (29 U.S.C. § 794 et seq.), as amended, which prohibits discrimination on the basis of disability and 49 C.F.R. part 27;
- Titles II and III of the Americans with Disabilities Act, which prohibit discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing entities (42 U.S.C. §§ 12131 - 12189), as implemented by Department of Justice regulations at 28 C.F.R. parts 35 and 36, and Department of Transportation

regulations at 49 C.F.R. parts 37 and 38;
- The Civil Rights Restoration Act of 1987, (102 Stat. 28.), "which restore[d] the broad scope of coverage and to clarify the application of title IX of the Education Amendments of 1972, section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and title VI of the Civil Rights Act of 1964.";
- Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, which prohibits discrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations;
- Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, and resulting Department of Transportation guidance, national origin discrimination includes discrimination because of limited English proficiency (LEP);
- Title VII of the Civil Rights Act of 1964, as amended, (42 U.S.C. § 2000e et seq., 78 Stat. 252), which prohibits discrimination in employment on basis of race, color, national origin, religion, or disability, as implemented by 29 C.F.R. § 1601.1, et seq.
- The Recipient also agrees to comply with the FMCSA Standard Title VI/Non-Discrimination Assurances (DOT Order No. 1050.2A).

Section 22. Executive Order on Equal Opportunity Related to Contracts.

The Recipient will comply with all Federal statutes and Executive Orders relating to Equal Employment Opportunity.

The Recipient agrees to incorporate in all contracts having a value of over $10,000, the provisions requiring compliance with Executive Order 11246, as amended, and implementing regulations of the United States Department of Labor at 41 C.F.R. part 60, the provisions of which, other than the standard EEO clause and applicable goals for employment of minorities and women, may be incorporated by reference.

The Recipient agrees to ensure that its contractors and subcontractors, regardless of tier, awarding contracts and/or issuing purchase orders for material, supplies, or equipment over $10,000 in value will incorporate the required EEO provisions in such contracts and purchase orders.

Section 23. Employment Policies.

The Recipient further agrees that its own employment policies and practices will be without discrimination based on race, color, religion, sex, national origin, disability or age; and that it has an affirmative action plan (AAP) consistent with the Uniform Guidelines on Employee Selection Procedures, 29 C.F.R. § 1607, and the Affirmative Action Guidelines, 29 C.F.R. § 1608. The applicant/Recipient shall provide the AAP to FMCSA for inspection or copy upon request.

Section 24. Property.

a. General.

In general, title to equipment and supplies acquired by a Recipient with DOT funds vests in the Recipient upon acquisition, subject to the property management requirements of 2 C.F.R. §§ 200.302(b)(4); 200.307(d); 200.310; 200.313; 200.316; and 200.344(4).

A Recipient that is a State, local, or Indian tribal governments, institutions of higher education, and non-profits agrees to comply with the property management standards detailed in 2 C.F.R. §§ 200.312 and 200.313, including any amendments thereto, and with other applicable Federal regulations and directives. A Recipient that is a for-profit entity agrees to comply with property management standards satisfactory to FMCSA.

b. Use of Project Property.

i. The State Recipient agrees to use Project property for the purpose for which it was acquired under the period of performance of the Grant. State Recipients acknowledge that the FMCSA may ensure that the purpose of the grant is being satisfied. State Recipients acknowledge that FMCSA may request a copy of the State statute and procedures in determining whether a State is in compliance with its own State procedures, and to assist the FMCSA in determining the allocability, reasonableness, and allowability of costs.

ii. The Non-State Recipient agrees to use Project property for appropriate Project purposes (which may include joint development purposes that generate program income, both during and after the award period, beginning on the effective date, and used to support public transportation activities) for the duration of the useful life of that property, as required by FMCSA. Should the Recipient unreasonably delay or fail to use Project property during the useful life of that property, the Recipient agrees that it may be required to return the entire amount of the Federal assistance expended on that property. The Non-State Recipient further agrees to notify FMCSA immediately when any Project property is withdrawn from Project use or when any Project property is used in a manner substantially different from the representations the Recipient has made in its Application or in the Project Description for the Grant Agreement or Cooperative Agreement for the Project.

c. Maintenance.

The State Recipient agrees to maintain Project property in accordance with State law and procedures.

The Non-State Recipient agrees to maintain Project property in good operating order, in compliance with any applicable Federal regulations or directives that may be issued.

d. Records.

The State Recipient agrees to maintain property records in accordance with State law and procedures. The Non-State Recipient agrees to keep satisfactory property records pertaining to the use of Project property, and submit to FMCSA upon request such information as may be required with this agreement.

e. Incidental Use.

Any incidental use of Project property will not exceed that permitted under applicable Federal laws, regulations, and directives.

f. Encumbrance of Project Property.

i. The State Recipient agrees to maintain satisfactory continuing control of Project property in accordance with State law and procedures. The State Recipient understands that an encumbrance of project property may not interfere with the purpose for which the equipment was purchased.

ii. The Non-State Recipient agrees to maintain satisfactory continuing control of Project property as follows:

A. Written Transactions.

The Non-State Recipient agrees that it will not execute any transfer of title, lease, lien, pledge, mortgage, encumbrance, third-party contract, subaward, grant anticipation note, alienation, innovative finance arrangement (such as a cross border lease, leveraged lease, or otherwise), or any other obligation pertaining to Project property, that in any way would affect the continuing Federal interest in that Project property.

B. Oral Transactions.

The Non-State Recipient agrees that it will not obligate itself in any manner to any third-party with respect to Project property.

C. Other Actions.

The Non-State Recipient agrees that it will not take any action adversely affecting the Federal interest in or impair the Recipient's continuing control of the use of Project property.

D. The Non-State Recipient agrees that no use under this section will interference with the purpose for which the equipment was purchased.

g. Transfer of Project Property.

i. The State Recipient agrees to transfer Project property in accordance with State law and procedures.

ii. The Non-State Recipient understands and agrees as follows:

A. Transfers.

The Non-State Recipient may transfer any Project property financed with Federal assistance authorized under 49 U.S.C. chapter 53 to a public body to be used for any public purpose with no further obligation to the Federal Government, provided the transfer is approved by the FMCSA Administrator and conforms with the requirements of 49 U.S.C. §§ 5334(h)(1) and (2). Any leasing or rental of equipment purchased by federal funds or state match/cost sharing, during the period of performance will considered program income and will be managed, expended, and reported per 2 C.F.R. § 200.307.

B. Federal Government Direction.

The Non-State Recipient agrees that the Federal Government may direct the disposition of, and even require the Recipient to transfer, title to any Project property financed with Federal assistance under the Grant Agreement or Cooperative Agreement.

h. Leasing Project Property to Another Party.

If the Non-State Recipient leases any Project property to another party, the Non- State Recipient agrees to retain ownership of the leased Project property, and assure that the lessee will use the Project property appropriately, either through a written lease between the Non-State Recipient and lessee, or another similar document.

Upon request by FMCSA, the Non-State Recipient agrees to provide a copy of any relevant documents. Any leasing or rental of equipment purchased by federal funds or state match/cost sharing, during the period of performance will be considered program income and will be managed, expended, and reported per 2 C.F.R. § 200.307.

i. Disposition of Project Property.

i. The State Recipient may use its own disposition procedures, provided that those procedures comply with the laws of that State.

ii. The Non-State Recipient agrees to dispose of Project property as follows:

A. With prior FMCSA approval, the Non-State Recipient may sell, transfer, or lease Project property and use the proceeds to reduce the gross project cost of other eligible capital public transportation projects to the extent permitted by 49 U.S.C. §5334(h)(4). The Non-State Recipient also agrees that FMCSA may establish the useful life of Project property, and that it will use Project property continuously and appropriately throughout the useful life of that property.

B. Project Property with Expired Useful Life. When the useful life of Project property has expired, the Non-State Recipient agrees to comply with FMCSA's disposition requirements.

C. Project Property Prematurely Withdrawn from Use. For Project property withdrawn from appropriate use before its useful life has expired, the Recipient agrees as follows:

D. Notification Requirement. The Non-State Recipient agrees to notify FMCSA immediately when any Project property is prematurely withdrawn from appropriate use, whether by planned withdrawal, misuse, or casualty loss.

E. Calculating the Fair Market Value of Prematurely Withdrawn Project Property. The Non-State Recipient agrees that the Federal Government retains a Federal interest in the fair market value of Project property prematurely withdrawn from appropriate use. The amount of the Federal interest in the Project property shall be determined by the ratio of the Federal assistance awarded for the property to the actual cost of the property. The Non-State Recipient agrees that the fair market value of Project property prematurely withdrawn from use will be calculated as follows:

1. **Equipment and Supplies.** The Non-State Recipient agrees that the fair market value of Project equipment and supplies shall be calculated by straight-line depreciation of that property, based on the useful life of the equipment or supplies as established or approved by FMCSA. Information on straight line depreciation may be found in the Internal Revenue Code. The fair market value of Project equipment and supplies shall be the value immediately before the occurrence prompting the withdrawal of the equipment or supplies from appropriate use. In the case of Project equipment or supplies lost or damaged by fire, casualty, or natural disaster, the fair market value shall be calculated on the basis of the condition of that equipment or supplies immediately before the fire, casualty, or natural disaster, irrespective of the extent of insurance coverage.

2. **Real Property**. The Non-State Recipient agrees that the fair market value of real property shall be determined either by competent appraisal based on an appropriate date approved by the Federal Government, as provided by 49 C.F.R. part 24, or by straight line depreciation, whichever is greater.

3. **Exceptional Circumstances.** The Non-State Recipient agrees that the Federal Government may require the use of another method to determine the fair market value of Project property. In unusual circumstances, the Non-State Recipient may request that another reasonable valuation method be used including, but not limited to, accelerated depreciation, comparable sales, or established market values. In determining whether to approve such a request, the Federal Government may consider any action taken, omission made, or unfortunate occurrence suffered by the Non-State Recipient with respect to the preservation of Project property withdrawn from appropriate use.

j. Financial Obligations to the Federal Government.

The Recipient agrees to remit to the Federal Government the Federal interest in the fair market value of any Project property prematurely withdrawn from appropriate use. In the case of fire, casualty, or natural disaster, the Recipient may fulfill its obligations to remit the Federal interest by either:

Investing an amount equal to the remaining Federal interest in like-kind property that is eligible for assistance within the scope of the Project that provided Federal assistance for the Project property prematurely withdrawn from use; or

Returning to the Federal Government an amount equal to the remaining Federal interest in the withdrawn Project property.

k. Insurance Proceeds.

If the Recipient receives insurance proceeds as a result of damage or destruction to the Project property, the Recipient agrees to:

i. Apply those insurance proceeds to the cost of replacing the damaged or destroyed Project property taken out of service, or

ii. Return to the Federal Government an amount equal to the remaining Federal interest in the damaged or destroyed Project property.

l. Transportation of Hazardous Materials.

The Recipient agrees to comply with applicable requirements of U.S. Pipeline and Hazardous Materials Safety Administration regulations, "Shippers - General Requirements for Shipments and Packagings," 49 C.F.R. part 173, in connection with the transportation of any hazardous materials.

m. Misused or Damaged Project Property.

If any damage to Project property results from abuse or misuse occurring with the Recipient's knowledge and consent, the Recipient agrees to restore the Project property to its original condition or refund the value of the Federal interest in that property, as the Federal Government may require.

n. Responsibilities after Project Closeout.

The Recipient agrees that Project closeout by FMCSA will not change the Recipient's Project property management responsibilities as stated in these Grant Provisions and Assurances, and as may be set forth in subsequent Federal laws, regulations, and directives, except to the extent the Federal Government determines otherwise in writing.

Section 25. Davis-Bacon Act Requirements.

The Recipient agrees to comply, as applicable, with the provisions of the Davis Bacon Act (40 U.S.C. § 3145 and 18 U.S.C. § 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 3701 et seq.) regarding labor standards for federally-assisted construction sub-agreements.

Section 26. Environmental Requirements.

The Recipient agrees to comply, as applicable, with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clean Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§ 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93-205).

Section 27. Government Rights (Unlimited).

FMCSA shall have unlimited rights for the benefit of the Government in all other work developed in the performance of this Agreement, including the right to use same on any other Government work without additional cost to FMCSA. The rights to any inventions made by a Recipient under an FMCSA financial assistance award are determined by the Bayh-Dole Act, Pub. L. 96-517, as amended, and codified in 35 U.S.C. § 200, et seq., except as otherwise provided by law.

a. Patent Rights.

If any invention, improvement, or discovery of the Recipient or any of its third-party contractors is conceived or first actually reduced to practice in the course of or under this Project, and that invention, improvement, or discovery is patentable under the laws of the United States of America or any foreign country, the Recipient agrees to notify FMCSA immediately and provide a detailed report. The rights and responsibilities of the Recipient, third-party contractors and FMCSA with respect to such invention, improvement, or discovery will be determined in accordance with applicable Federal laws, regulations, policies, and any waiver thereof.

If the Recipient secures a patent with respect to any invention, improvement, or discovery of the Recipient or any of its third-party contractors conceived or first actually reduced to practice in the course of or under this Project, the Recipient agrees to grant to FMCSA a royalty-free, non- exclusive, and irrevocable license to use and to authorize others to use the patented device or process for Federal Government purposes.

The Recipient agrees to include the requirements of the "Patent Rights" section of this Agreement in its third-party contracts for planning, research, development, or demonstration under the Project.

b. Data Rights.

The term "subject data" used in this section means recorded information, whether or not copyrighted, that is developed, delivered, or specified to be delivered under this Agreement. The term includes graphic or pictorial delineations in media such as drawings or photographs; text in specifications or related performance or design-type documents; machine forms such as punched cards, magnetic tape, or computer memory printouts; and information retained in computer memory. Examples include, but are not limited to: computer software, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identifications, and related information. The term does not include financial reports, cost analyses, and similar information incidental to Project administration. The following restrictions apply to all subject data first produced in the performance of this Agreement:

i. Except for its own internal use, the Recipient may neither publish or reproduce such data in whole or in part, or in any manner or form, nor may

the Recipient authorize others to do so, without the written consent of FMCSA, until such time as FMCSA may have either released or approved the release of such data to the public.

ii. As authorized by 2 C.F.R. § 200.315(b), FMCSA reserves a royalty-free, non-exclusive and irrevocable license to reproduce, publish or otherwise use, and to authorize others to use, for Federal Government purposes:

A. Any work developed under a grant, cooperative agreement, sub-grant, sub-agreement, or third-party contract, irrespective of whether or not a copyright has been obtained; and

B. Any rights of copyright to which a Recipient, Subrecipient, or a third-party contractor purchases ownership with Federal assistance.

iii. When FMCSA provides assistance to a Recipient for a Project involving planning, research, or development of a system, program, document, enforcement concept, or any other activity provided for in the terms of this grant, it is generally FMCSA's intent to increase the body of knowledge, rather than to limit the benefits of the Project to those parties that have participated therein. Therefore, unless FMCSA determines otherwise, the Recipient understands and agrees that, in addition to the rights set forth in preceding portions of this section of this Agreement, FMCSA may make available to any FMCSA Recipient, Subrecipient, third-party contractor, or third-party subcontractor, either FMCSA's license in the copyright to the "subject data" derived under this Agreement or a copy of the "subject data" first produced under this Agreement. In the event that such a Project which is the subject of this Agreement is not completed, for any reason whatsoever, all data developed under that Project shall become subject data as defined herein and shall be delivered as FMCSA may direct.

iv. Unless prohibited by State law, the Recipient agrees to indemnify, save and hold harmless FMCSA, its officers, agents, and employees acting within the scope of their official duties against any liability, including costs and expenses, resulting from any willful or intentional violation by the Recipient of proprietary rights, copyrights, or right of privacy, arising out of the publication, translation, reproduction, delivery, use, or disposition of any data furnished under this Agreement. The Recipient shall not be required to indemnify FMCSA for any such liability arising out of the wrongful acts of employees or agents of FMCSA.

v. Nothing contained in this section on rights in data, shall imply a license to FMCSA under any patent or be construed as affecting the scope of any license or other right otherwise granted to FMCSA under any patent.

vi. The requirements of this section of this Agreement do not apply to material furnished to the Recipient by FMCSA and incorporated in the work carried out

under this Agreement, provided that such incorporated material is identified by the Recipient at the time of delivery of such work.

vii. Unless FMCSA determines otherwise, the Recipient agrees to include the requirements of this section of this Agreement in its third-party contracts for planning, research, development, or demonstration under the Project.

c. Acknowledgment or Support and Disclaimer.

i. An acknowledgment of FMCSA support and a disclaimer must appear in any Recipient publication, whether copyrighted or not, based on or developed under the Agreement, in the following terms:

"This material is based upon work supported by the Federal Motor Carrier Safety Administration under a grant/cooperative agreement/subaward, dated (fill-in appropriate identification of grant/cooperative agreement);"

ii. All Recipient publications must also contain the following:

"Any opinions, findings, and conclusions or recommendations expressed this publication are those of the author(s) and do not necessarily reflect the view of the Federal Motor Carrier Safety Administration and/or the U.S. Department of Transportation."

iii. The Recipient agrees to cause to be erected at the site of any construction, and maintain during construction, signs satisfactory to FMCSA identifying the Project and indicating that FMCSA is participating in the development of the Project.

Section 28. Drug Free Workplace.

By signing this agreement, the Recipient certifies that it is in compliance with the Drug-Free Workplace Act (41 U.S.C. §§ 701 et seq.) and implementing regulations (49 C.F.R. part 32), which require, in part, that Recipients prohibit drug use in the workplace, notify the FMCSA of employee convictions for violations of criminal drug laws occurring in the workplace, and take appropriate personnel action against a convicted employee or require the employee to participate in a drug abuse assistance program.

Section 29. Background Screening.

FMCSA reserves the right to perform individual background screening on key individuals of organizational units associated with the application at the effective date and at another interval thereafter for the life of the award. If in performance of a grant award requires Recipient organization personnel to have unsupervised physical access to a federally controlled facility for

more than 180 days or access to a Federal information system, such personnel must undergo the personal identity verification credential process under Homeland Security Presidential Directive 12.

Section 30. Site Visits.

FMCSA, through its authorized representatives, has the right, at all reasonable times, to make site visits to review Project accomplishments and management control systems and to provide such technical assistance as may be required. If any site visit is made by FMCSA on the premises of the Recipient, Subrecipient, or contractor under this Agreement, the Recipient shall provide and shall require its Subrecipients or contractors to provide, all reasonable facilities and assistance for the safety and convenience of FMCSA representatives in the performance of their duties. All site visits and evaluations shall be performed in such a manner as will not unduly delay work being conducted by the Recipient, Subrecipient, or subcontractor.

Section 31. Liability.

The Recipient acknowledges it is responsible for any act or omission of Recipient or Subrecipient, its officers, contractors, employees, or members, participants, agents, representatives, as appropriate, arising out of or in any way connected to activities authorized pursuant to this Agreement.

The Recipient acknowledges that FMCSA is not responsible for any act or omission of Recipient or Subrecipient, its officers, contractors, employees, or members, participants, agents, representatives, as appropriate, arising out of or in any way connected to activities authorized pursuant to this Agreement. This provision shall survive the expiration or termination of this Agreement.

Section 32. Right of FMCSA to Terminate Agreement.

a. General Right to Suspend or Terminate Assistance Agreement.

Upon written notice, the Recipient agrees that FMCSA may suspend or terminate all or part of the financial assistance provided herein if the Recipient has violated the terms of the Grant Agreement or these Provisions and Assurances, or if FMCSA determines that the purposes of the statute under which the Project is authorized would not be adequately served by continuation of Federal financial assistance for the Project. Any failure to make reasonable progress on the Project or other violation of this Agreement that significantly endangers substantial performance of the Project shall provide sufficient grounds for FMCSA to terminate this Agreement. The Recipient agrees to give the Federal Motor Carrier Safety Administration at least 90 days' notice of its intention to terminate this agreement.

b. Financial Obligations of the Government.

In general, termination of any financial assistance under this Agreement will not

invalidate obligations properly incurred by the Recipient and concurred by FMCSA before the termination date; to the extent those correctly accrued obligations cannot be cancelled.

However, if FMCSA determines that the Recipient has willfully misused Federal assistance funds by failing to make adequate progress, failing to make reasonable use of the Project property, facilities, or equipment, or failing to adhere to the terms of this Agreement, meet required match/cost sharing or maintenance of effort (MOE) levels, FMCSA reserves the right to require the Recipient to refund the entire amount of FMCSA funds provided under this Agreement or any lesser amount as may be determined by FMCSA.

c. De-obligation of Funds.

FMCSA reserves the right to unilaterally de-obligate any remaining grant or cooperative agreement funds due to the time elapsed since the effective date, lack of payment vouchers from the Recipient, lack of plans to expend funds based on this grant, failure to provide quarterly progress reports, or other such determination made by FMCSA. If FMCSA takes action to deobligate funds, a grant amendment/modification must be in place.

Section 33. Project Completion, Settlement, and Closeout.

a. Project Completion.

Within 90 days of the Project completion date or termination by FMCSA, the Recipient agrees to submit a final SF-425, Federal Financial Report, a certification or summary of Project expenses, and third-party au it reports, as applicable.

b. Remittance of Excess Payments.

If FMCSA has made payments to the Recipient in excess of the total amount of FMCSA Federal funding due to cover accumulated expenses, the Recipient agrees to promptly remit that excess and interest as may be required by the "Payment by FMCSA" section of this Attachment.

c. Project Closeout.

Project closeout, as defined in 2 C.F.R. § 200.16, occurs when all required Project work and all administrative procedures described in 2 C.F.R. § 200.343, as applicable, have been completed, and when FMCSA notifies the Recipient and forwards the final Federal assistance payment, or when FMCSA acknowledges the Recipient's remittance of the proper refund amount. Project closeout shall not invalidate any continuing obligations imposed by allowable, allocable, and reasonable costs on the Recipient by this Agreement that supports the project plan(s) or by the FMCSA's final notification or acknowledgment, if it occurs within the period of performance.

Section 34. Severability.

If any provision of this Agreement is held invalid, all remaining provisions of this Agreement shall continue in full force and effect to the extent not inconsistent with such holding.

Section 35. Entire Agreement and Amendments.

This Agreement constitutes the entire agreement between the parties. All prior discussions and understandings concerning such scope and subject matter are superseded by this Agreement.

Any modification not specifically permitted by this agreement requires an Amendment. These modifications may be made only in writing, signed by each party's authorized representative, and specifically referred to as an Amendment to this Agreement. Electronic signatures are binding. However, retroactive modifications to the project plan(s) or any aspects of the budget will not be approved.

Section 36. Use of Information Obtained.

Information obtained under this agreement may only be used by the Recipient to accomplish the project plan under this agreement.

Any information obtained or exchanged between FMCSA and the grant Recipient, to carry out each party 's responsibility under this agreement and project plan, shall not be released by the Recipient to any third-party without the written permission of FMCSA.

Recipient shall ensure that all its employees authorized to access FMCSA data and information systems sign and submit information technology user agreements provided by FMCSA.

Section 37. Miscellaneous Provisions.

a. Prohibition on Human Trafficking.

The Recipient agrees to comply, as applicable, with the provisions of Section 7104(g) of the Trafficking Victims Protection Act of 2000, 22 U.S.C. § 7104 as amended.

b. Wild and Scenic Rivers Act of 1968.

The Recipient agrees to comply, as applicable, with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

c. Fly America Act.

The Recipient shall comply with the provisions of the Fly America Act, 49 U.S.C. § 401 18.

d. Criminal and Prohibited Activities.

The Recipient will adhere to the Program Fraud Civil Remedies Act, 31 U.S.C. § 3801- 3812, which provides for the imposition of civil penalties against persons who make false, fictitious, or fraudulent claims to the Federal Government for money. Recipient will also adhere to the False Statements Act, 18 U.S.C. §§ 287 and 1001 which provides that whoever makes or presents any false, fictitious or fraudulent statements, representation, or claims against the United States shall be subject to imprisonment of not more than 5 years and shall be subject to a fine in the amount provided by 18 U.S.C. § 287. Recipient shall also adhere to the False Claims Act, 31 U.S.C. § 3729, which provides that suits under this act can be brought by the Government or a person on behalf of the Government, for false claims under the Federal assistance programs. Recipient shall also adhere to the Copeland "Anti-Kickback" Act, 18 U.S.C. § 874 and 40 U.S.C. § 3145, which prohibits a person or organization engaged in a federally supported project from enticing an employee working on the project from giving up a part of his compensation under an employment contract.

Section 38. Laptop Encryption.

All laptops used by Recipients, Subrecipients, and contractors in carrying out the Recipient 's project plan, which contain FMCSA-related data, including sensitive information and Personally Identifiable Information (PII), must be encrypted to the same standards utilized by FMCSA. The FMCSA encryptions standards prescribe whole disk encryption (FOE), which requires software or hardware to encrypt all data on a disk, including the partition tables, whole physical disk, master boot record, and available files. FMCSA requires that each Recipient who utilizes FMCSA sensitive information or PII complete installation of FOE on all laptop computers as soon as practicable, but no later than thirty (30) days from the execution of this agreement and prior to using the laptop to access FMCSA data systems or store FMCSA related data.

Section 39. Adaptability to Climate Changes.

If the grant is to be used to place equipment or temporary facilities, modify structures, or to alter existing infrastructure, the recipient is required to assess the ability for the equipment, modifications, or alterations to withstand current and future climatic conditions, including potential changes in climatic conditions. The recipient shall use the best-available peer reviewed studies and science to determine the potential climatic conditions the equipment, modifications or alterations may experience over the life-cycle of the equipment, modification or alteration funded by the grant. The recipient can rely on existing Federal Highway Administration suggestions or guidelines for placing infrastructure, or on other federally-issued guidance on assessing potential impacts of climate change.

Section 40. Commercial Vehicle Information Systems and Networks (CVISN) provisions.

The following provisions apply where applicable.

a. Compliance with the National ITS Architecture.

The recipient will ensure that Innovative Technology Deployment (ITD) activities, such as hardware procurement, software and system development, infrastructure modifications, etc., are consistent with the National ITS and commercial motor vehicle information and systems architectures and available standards and promote interoperability and efficiency to the extent practicable and required by law.

b. Interoperability.

For implementing ITD capabilities, the recipient will complete interoperability tests and ensure architectural conformance throughout the life of the project. Perform pairwise and end-to-end tests to demonstrate conformance with the standards and interoperability, verify that interfaces between selected products/systems meet the applicable standards, verify dataflow and data usage among the products/systems.

c. Independent Evaluation.

The FMCSA may conduct an independent evaluation of the effectiveness of the project in achieving Federal and State program goals. The independent evaluation will be conducted using existing Federal resources. Participants of projects that are selected for independent evaluations shall cooperate with the independent evaluators and participate in evaluation planning and progress review meetings to ensure a mutually acceptable, successful implementation of the independent evaluation. The FMCSA may contract with one or more independent evaluation contractor(s) to evaluate the projects.

d. Dedicated Short-Range Communications.

If applicable, the State shall also require that its contractors only install Dedicated Short Range Communications (DSRC) equipment that is interoperable and compatible at layers 1 and 2 of the Open Systems Interconnect Reference Model with equipment in operation on the North American Preclearance and Safety System and the Heavy Vehicle Electronic License Plate Inc.'s PrePass™ System deployments as well as the International Border Crossing Operational Tests, based upon on ASTM Draft 6, dated February 23, 1996.

Section 41. Federal Funding Accountability and Transparency Act.

The Federal Funding Accountability and Transparency Act (FFATA) of 2006 (Public Law 109-282) requires for each Federal award of $25,000 or more that OMB create a searchable, no cost, publicly accessible website(http://usaspending.gov/) that includes basic

information about the recipient and the project being funded. The Government Funding Transparency Act of 2008 (Public Law 110-252) amended FFATA, requiring recipients to report certain information about themselves and their first tier Subrecipient awards obligated as of October 1, 2010. Prime grant recipients/awardees of new non-Recovery Act federally funded grants and cooperative agreements of $25,000 or more awarded on or after October 1, 2010 are subject to FFATA reporting, sub-award reporting requirements and executive compensation reporting requirements as outlined in the Office of Management and Budgets guidance issued August 27, 2010. The prime awardee is required to file a FFATA sub-award report by the end of the month following the month in which the prime recipient awards any sub-grant greater than or equal to $25,000.

Section 42. Executive Order 13513.

Executive Order 13513 (E.O. 13513) requires each Federal agency to encourage contractors, subcontractors, and grant and cooperative agreement recipients and subrecipients to adopt and enforce policies that ban text messaging while driving company-owned or -rented vehicles or Government Owned Vehicles, or while driving Personally Owned Vehicles when on official Government business or when performing any work for or on behalf of the Government. To further the requirement of encouraging such policies, the FMCSA encourages recipients to consider new rules and programs, reevaluate existing programs to prohibit text messaging while driving, and conduct education, awareness, and other outreach for employees about the risks associated with texting while driving. These initiatives should encourage voluntary compliance with the recipient agency's text messaging policy while off duty. For the purposes of these Grant Provisions and Assurances and pursuant to E.O. 13513, the following definitions apply:

> "Texting" or "Text Messaging" means reading from or entering data into any handheld or other electronic device, including for the purpose of SMS texting, e-mailing, instant messaging, obtaining navigational information, or engaging in any other form of electronic data retrieval or electronic data communication.
>
> "Driving" means operating a motor vehicle on an active roadway with the motor running, including while temporarily stationary because of traffic, a traffic light or stop sign, or otherwise. It does not include operating a motor vehicle with or without the motor running when one has pulled over to the side of, or off, an active roadway and has halted in a location where one can safely remain stationary.

Section 43. Certification.

The Recipient certifies that the statements it made in the grant application are true and correct, and Recipient understands that any false statements made as part of these certifications can be prosecuted.

Which subrecipient are you reporting data for in this quarterly progress report?	Other Agency
Please select which other agency you are reporting data for in this quarterly report.	MSP Commonwealth Fusion Center (CFC)

Reporting Information

Project Name	FSHSP20CFC
Federal Fiscal Year (FFY) Funding	FFY 2020

Contact Information

Reported by	Amy Thibault
Job Title	Intelligence Services Manager
Email Address	amy.thibault@pol.state.ma.us
Phone Number	(978) 451-3717

Reporting Period

Quarter Number	2
Reporting Period (Months)	April 1st - June 30th
Reporting Period (Year)	2023

Instructions

I. Planning

II. Organization

Regional Specialty Response Teams

III. Equipment

Equipment State Share Text	LPR trailers and cameras were received, and old equipment is being replaced or repaired. Approximately $5700 of additional equipment was quoted and ordered during Q2. It is anticipated that supplies will be ordered with the remaining funds as approved in the grant modification from November 2022.

IV. Training

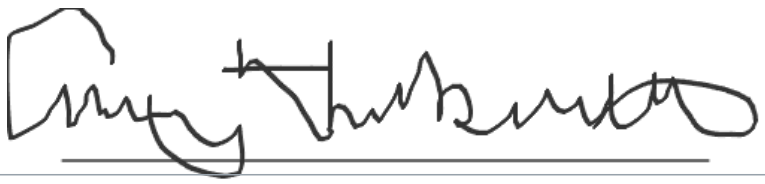
Exercise Program

Type of exercise	Seminar

V. Management and Administration

VI. Other Activities

VII. Challenges/Delays



VIII. Success Stories

IX. Meetings

Waste, Fraud, or Abuse

Are you aware of any concerns regarding waste, fraud, or abuse connected to any of the grant-funded activities described in this report?	No

Which subrecipient are you reporting data for in this quarterly progress report?	Other Agency
Please select which other agency you are reporting data for in this quarterly report.	MSP Commonwealth Fusion Center (CFC)

Reporting Information

Project Name	FSHSP20CFC
Federal Fiscal Year (FFY) Funding	FFY 2020

Contact Information

Reported by	Amy Thibault
Job Title	Intelligence Services Manager
Email Address	amy.thibault@pol.state.ma.us
Phone Number	(978) 451-3717

Reporting Period

Quarter Number	3
Reporting Period (Months)	July 1st - September 30th
Reporting Period (Year)	2023

Instructions

I. Planning

II. Organization

Regional Specialty Response Teams

III. Equipment

Equipment State Share Text	Additional equipment (brackets, cables and mounting hardware) for LPRs was received and put into use.

IV. Training

Exercise Program

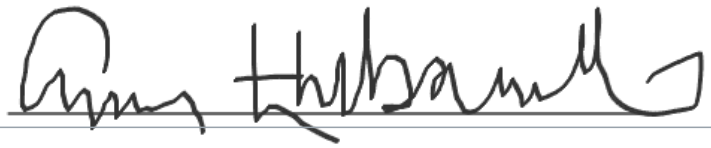
Type of exercise	Seminar

V. Management and Administration

VI. Other Activities

VII. Challenges/Delays

VIII. Success Stories



IX. Meetings

Waste, Fraud, or Abuse

Are you aware of any concerns regarding waste, fraud, or abuse connected to any of the grant-funded activities described in this report?	No

Fiduciary Coordinator Signature

Which subrecipient are you reporting data for in this quarterly progress report?	Other Agency
Please select which other agency you are reporting data for in this quarterly report.	MSP Commonwealth Fusion Center (CFC)

Reporting Information

Project Name	FSHSP22CFC_FUASI22CFC
Federal Fiscal Year (FFY) Funding	FFY 2022

Contact Information

Reported by	Amy Thibault
Job Title	Intelligence Services Manager
Email Address	amy.thibault@pol.state.ma.us
Phone Number	(978) 451-3717

Reporting Period

Quarter Number	3
Reporting Period (Months)	July 1st - September 30th
Reporting Period (Year)	2023

Instructions

I. Planning

II. Organization

Regional Specialty Response Teams

III. Equipment

IV. Training

Training Name	CrimeTracer Training
Which of the following best describes the topic of this training?	Other: Crimetracer Database Training
Total number of participants attending this training	334
	Multidisciplinary training? = No Related to ASHER/complex coordinated attacks? = No
Which of the following core capabilities does this training address?	Intelligence and Information Sharing
Total number of sessions related to training in this reporting period.	9
Training Session Date(s)	Jul 11, 2023
Training Session Date (2)	Jul 12, 2023
Training Session Date (3)	Jul 13, 2023
Training Session Date (4)	Aug 08, 2023
Training Session Date (5)	Aug 09, 2023
Training Session Date (6)	Aug 10, 2023
Training Session Date (7)	Sep 12, 2023
Training Session Date (8)	Sep 13, 2023
Training Session Date (9)	Sep 14, 2023
Add another training?	No

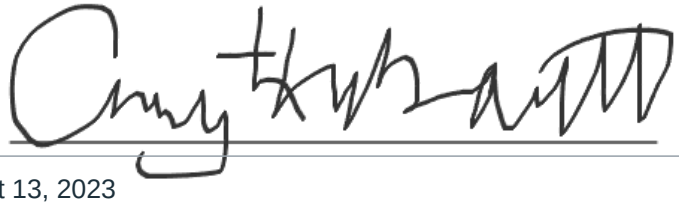
Exercise Program

Type of exercise	Seminar

V. Management and Administration

VI. Other Activities

VII. Challenges/Delays



VIII. Success Stories

IX. Meetings

Waste, Fraud, or Abuse

Are you aware of any concerns regarding waste, fraud, or abuse connected to any of the grant-funded activities described in this report?	No
